THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, MARCH 29, 1895

(\$2.00 per Year) No. 13

DROPS FROM THE EDITOR'S PEN.

At growing cane Cuba is a success, but at raising Cain she is a failure.

* * *

The man who lives for business frequently does not survive to partake of the fruits of his labor.

* * *

The Patrons are neither petted by politicians nor patronized by people. Ichabod is written on their dwelling place.

* * *

A commercial traveler is a man who in these days travels over a wide range of prices as well as a wide extent of country.

* * *

The man who comes short as an advertiser usually comes short as a business man. The one is the concomitant of the other.

* * *

Dust and cobwebs in the store are only the reflection of the dust and cobwebs that have accumulated on the storekeeper's brain.

* * *

Because fish is the fashionable diet during Lent, it is not to be premised that the finny tribe fathered the custom. It was not even consulted.

* * *

Trading in margins has been declared illegal by a Chicago court. Some people will now have larger margins to their credit at their banks.

* * *

It's a long lane that has no turn. The canned goods packers are realizing this. They have not only reached the turn, but they appear to possess the whole lane.

* * *

The more faithful the service rendered the more profitable will the clerk be to his employer. This thought should be every young man's incentive, for it is dollars in his pocket in the long run.

* * *

"Had I served my business as well as I have my party it would not have forsaken

me in my old age," has been the lament of more than one merchant whose concern for party has been deeper than his concern for business.

* * *

Travelers for St. John houses report better sales throughout the provinces than for months, and a much more hopeful feeling among country merchants generally.—St. John, N.B., Despatch.

This is good news. But, by-the-bye, the depression does not appear to have been as pronounced in New Brunswick and the Maritime provinces generally as in the Western provinces.

* * *

Unless the Business Men's Association of Toronto have a care in expending the proposed \$10,000 for advertising the "Queen City," the maximum of benefit will accrue to private individuals and the minimum to the city.

* * *

The man who stops his trade paper when he goes out of business is scarcely less natural than the man who neglects to write relatives after he leaves home. The one should keep in touch with his old associations as well as the other with his relatives.

* * *

Mistaken would be the man in his ideas if he supposed that advertisers always walked by faith. It is because of the works they see in the results that they advertise, and that continuously. Cast your eyes back over the files of THE CANADIAN GROCER and you will see who these men are.

* * *

"A Traveler's Easy Life," is the heading that graces the columns of an exchange. Yes, a traveler's life is easy—when orders are easily taken, when his hours and meals are regular, when traveling is comfortable, and when the house is satisfied with his returns. But the trouble is that these conditions do not always obtain.

* * *

Justice was over-tempered with mercy when Gles, the pool-room operator, was allowed to go on suspended sentence. He again and again openly defied the law, ruining in the meantime many young clerks, and

when at last he was cornered it was justice and not mercy that should have been meted out to him.

* * *

Now is it that the commercial traveler's patience is put to its maximum of trial. The country roads are so bad that to "sleigh" it would be absurd, and to "wheel" would be impossible. All he can do is to try and emulate Job of great patience fame.

* * *

There is a merchant in Wallace, N.S., who is just now sitting in sackcloth and ashes bemoaning his foolishness. He carried no insurance either on building or stock and his safe door he failed to lock. Last week fire ate up everything. Moralizing is not of much value to the aforesaid merchant, but it should be to those who, like him, carry no insurance.

* * *

A bill has been introduced in the Ontario Legislature to so amend the Assessment Act that farm land located in urban municipalities shall be assessed at the rate current in the adjoining rural municipality. The prayer of the real estate speculator who bought farm land in boom days and held it in the dull days can be heard rustling in the mulberry trees. But like Baal, his god is probably on a journey, for there is little hope of the supplication being answered.

* * *

War to the knife has been declared between the wholesale houses of St. Louis and Chicago. Some time ago the jobbers in the former city sent out circulars to Southwestern dealers in different lines of trade offering them free transportation to their homes if they came to St. Louis to make their purchases. Naturally Chicago wholesalers felt indignant, for it was against them the blow was primarily aimed. Now they have arisen in their might and are replying in kind. All lines of trade are being organized, and irate Chicago people vow they will cover the entire western territory unless the attacking party desist. In the meantime what spoils there are the retailers are gathering.

OUR TRADE WITH NORWAY.

EDITOR GROCER,—When in Toronto last summer I promised to keep you posted as to the success of Canadian goods in Europe. As I have since then been traveling for Canadian firms through nearly all of Europe (Norway, Sweden, Denmark, Germany, Switzerland, France, Spain, Italy and Austria), I will write you about a few articles which I have been working with.

I will first mention flour, for which we have lately cabled the Lake of the Woods Milling Co. (Ltd.), of Montreal, an order every month. Canadian wheat flour is growing in favor here, and is considered of superior quality, but has been a little higher in price than what the Minneapolis and St. Louis mills have been offering their best grades at. Consequently they have as yet the bulk of the trade; but our orders are, however, constantly increasing.

Norway is the largest wheat-importing country in the world for its size. Last year it imported nearly 90,000,000 barrels of wheat flour. So far we have only been selling Canadian wheat flour here in Christiana; but we shall later offer it in some of our other large cities, and also in Sweden.

With Canadian oatmeal we have not been so successful, and although we have sold some of it, it seems difficult to compete with the United States in this article. The best introduced brands here are the "Quaker" and "H.O."

Whenever I have offered Canadian oatmeal the importers have looked very sceptical, and tried to get the price down to a minimum, which, however, is always the custom of the importers when a new house is offering its goods in competition with older and already introduced makes. In such cases, if the exporter gets his money back he should be satisfied, and by making new shipments the importer will understand that he is able to compete, and if the goods have given satisfaction it will get its customers. Then the exporter is more independent, and can stipulate certain terms, etc.

For D. Ritchie & Co., of Montreal, it seems as if we are going to build an extensive business. I have personally visited the larger tobacco houses in Christiana, Stockholm, Gothenburg, Copenhagen, Hamburg, Amsterdam, Antwerp, Bruxelles and Basle (Switzerland), and in all these cities placed Ritchie & Co.'s goods with the largest importers, and their cigarettes and tobaccos being fully equal to the American Tobacco Co.'s goods, we will get our share of this trade in Europe.

Canadian whiskey—there is an increasing demand for it here in Europe; in fact Canadian whiskey is considered equal to the very best Irish and Scotch. A certain well-known Canadian whiskey (Canadian Club) sells all over Europe for the same price as the Hennessy and Martell brandies, 3 stars. At the Grand Hotel, in Paris, Canadian Club costs 10 francs per bottle and ordinary Scotch and Irish whiskey 5 francs. Still I know that in Canada itself a large majority of the people prefer an inferior young grade of European whiskey to their own good liquor. It is remarkable how goods from a distance are appreciated.

Since the passage of the new regulations in regard to the 99 per cent. drawback on all materials entering into the manufacture of goods which are subsequently exported from Canada, I have had letters from all kinds of manufacturers—even of dry goods. This very wise and liberal arrangement of the Canadian Government places all Canadian manufacturers on an even footing with any other manufacturers in the world, and it will cultivate in Canada a healthy and steadily increasing industry. I have in the leading papers here in Europe read commentary articles about this effort of the Canadian Government to place Canadian manufacturers in a position to compete for the foreign trade, and it has given everybody here the impression that Canada is working out for herself a prominent place among the suppliers to the European markets.

What might be of interest to Canadian exporters to Northern Europe is the new free port at Copenhagen which has recently been opened. It is well known that Copenhagen has for centuries played a prominent part in the trade on the Baltic; its favorable position and excellent port made it the chief emporium of the Baltic, and towards the end of last century it was the most important trading station in these waters.

But in the very beginning of the present century these circumstances were altogether changed through events of war, and few cities have sustained harder treatment than Copenhagen. The union between Denmark and Norway was, at the same time, put asunder, and the commercial life of the country was paralyzed.

Many large trading places have been crushed for ever under similar, and even less cruel blows; but thanks to its favorable position, Copenhagen soon began to recover, and since the middle of this century it has gone steadily forward. During the last decade Copenhagen has recommenced to get half of the wholesale trade on the Baltic, for which it naturally has so many qualifications, and which will now be further facilitated by the construction of the free port, which is mentioned below.

In the spring of 1891 it was decided to construct a free port at Copenhagen, and

this new port has now been opened for traffic. It would be too circumstantial to give a detailed description of this considerable work, but we may be allowed to state some of the numerous advantages which this port offers to the trade, especially to the transit trade of the Baltic. Tides being unknown at Copenhagen, the new port, of which the depth of water is 30 feet, will at any time afford access to the quays for the largest vessels. No bars obstruct the passage, and while the Baltic is difficult to navigate for the large trans-atlantic vessels, great depths of water are found everywhere on the road to Copenhagen. Moreover, Copenhagen is as free of ice as any port of the Baltic, and has for the last ten years rarely been inaccessible to steamers.

Copenhagen is in regular steamship connection with all Swedish, Finnish, Russian and German ports of the Baltic, as well as with Norwegian, British and the most important west and south European ports; the free port has direct communication not only with the Danish, but also by means of the steam ferry at Elsinore, with the Swedish railways, and another steam ferry is going to be established between the free port and Malmoe in 1895.

All charges in the free port are so very moderate, that it actually is one of the least expensive ports in Europe. The tonnage dues having been entirely done away with, and the port charges, which are reduced to one half, being only levied when the goods pass from the territory of the free port over the Danish custom boundary, the expenses for the ship are limited to pilotage and wharfage, which are charged according to a very moderate tariff.

In finally mentioning that the free port is furnished with excellently constructed warehouses and sheds, with the most perfect machines for loading and discharging cargoes, and with a complete system of electric power (cranes, elevators, etc.) we may safely state that the Copenhagen free port will be a place particularly advantageous for the storage of all kinds of goods that are to be transhipped to the Baltic.

REMARKS: We publish the above communication with pleasure. It contains not only much that is interesting, but much that should encourage and inspire Canadians to greater effort in developing trade between their country and Norway and Sweden.

THE EDITOR.

CANADIAN BUTTER IN ENGLAND.

EDITOR GROCER,—I have read your articles reproduced by The Grocers' Review, and write to congratulate you. You certainly hit the nail upon its head, only you are a little too modest in giving Montreal credit for originating the agitation in favor of the creamery system. If I mistake not, your own columns were the medium of the first shots that were fired upon this question, by which the dairymen of Canada were urged to make the choicest creamery butter possible and ship it immediately to the British market.

Some of our creamery friends commenced

shipping early in June last, and the season opened to net them about 17c. per lb., followed by an average of about 18c. clear in July and August, and 18½ to 19c. early in September. These prices were much below the figures made at the corresponding dates the previous year (doubtless in consequence of the general depression), and we presume below Canadian speculators' ideas for cold storage purposes. Consequently shipments fell off, and we have since had only stale Canadian butter to sell, with which we have been struggling, making very poor progress at an equivalent to 14 to 15c. net to our shippers.

In your last article, appearing in this week's Grocers' Review, you speak of the Danish and Finnish mild butters having won preference with the British consumer. This is quite true, and Canada must make the best possible article, put it up in the right package, and ship it promptly after being made, or she cannot hope to compete successfully.

There is, however, another important source of supply that must not be overlooked, the rapid growth of which materially strengthens your argument. Our kinsfolk and fellow-subjects in the Australasian colonies have built up an immense butter business with the Mother Country within the past few years, and, as their summer is convenient, they are determined to make and ship all the butter that John Bull will

likely require during the late winter and early spring.

Had our Canadian shippers shown the same pluck and perseverance that their Australasian cousins had done, they would have kept our market regularly supplied with fresh-made creamery, and would, even in the present exceptionally bad season, have been better off than by withholding their goods, besides having maintained a good reputation for Canadian creamery with the British trader and consumer.

Need I say I am deeply interested in this important branch of Canadian industry, and shall be glad to answer any enquiry in my power touching British markets that your readers may address to you, if given an opportunity.

Whilst Manchester is the recognised centre for Danish butter, and London for Australasian and New Zealand makes Liverpool is unquestionably the centre for your product, but no time should be lost in taking full possession of this market. Australasian butter is steadily obtaining a footing here.

WALTER STARK.

Liverpool, Feb., 1895.

The official estimate of the cranberry crop of the United States for last year is 410,000 bushels. In 1893 the yield was 1,000,000 bushels.

WHY SO BUSY?

BECAUSE the Trade realizes the fact that the "GLOBE" Brand TUBS and PAILS are the BEST GOODS, and at PRICES THAT CANNOT BE BEAT.

CONSEQUENTLY, we are flooded with Orders, but we are equal to the occasion, and all orders are receiving prompt attention. Is your order placed? If not, get it in at once.

WHAT IS THE FUTURE OF SUGAR?

UNIQUE in its history is the world's sugar market at the moment; and there is one factor which, more than any other, is the cause of this.

That one factor is the proposition of Germany to increase the bounty on sugar manufacture

At present the bounty is 21 1/2c. per 100 lb. on the refined article.

With this duty as it is, everybody in the trade knows how the Canadian market has been affected during the past few months: The price of the home article is lower than ever before, and although there is practically no German refined coming in just now, it is really because the home refiners have put their prices down to a figure that makes its importation impossible.

But what will be the effect should Germany increase the bounty as proposed?

One thing is certain: It will be anything but beneficial to sugar refineries outside the Fatherland.

Briefly stated, if the bill now before the Reichstag carries, the bounty on raw sugar will be equal to 43c. per 100 pounds instead of 13 1/2c, and that on refined 54c. per 100 pounds instead of 21 1/2c. as now. With this new law in force it is asserted that Germany will produce sugar at a price which will preclude all other competitors from the English and American markets.

The refiners in Great Britain suffer bad enough as it is, and it is only natural that they should feel alarmed at the increased danger now threatening them. Some people are urging the Government to take retaliatory measures against the German article. But this is so contrary to John Bull's principles that there is no likelihood of his complying—for the present, at any rate.

In the United States there is already an extra impost of 1-10c. per pound against

German sugar, but that did not prevent the latter being laid down in New York a few months ago at a lower price than the Trust was quoting. The House of Representatives, at the last session, it will be remembered, passed a bill abolishing this extra impost, but it failed to become law on account of the Senate adjourning without dealing with the matter. With an increased bounty and the next Congress Republican, it is scarcely probable that the discriminating 1-10c per pound will be removed.

The duty in Canada is 64-100c. per pound. Although this figure has not been sufficient to keep out German sugar, it is unlikely that any proposition to increase it would find favor in the country. But, of course, there is no telling what circumstances may demand.

Sugar making is Germany's national industry, and its development during the last twenty years has been wonderful, her exports during that period having risen from 15,000 to 1,200,000 tons. England is Germany's principal customer, while the United States last year took no less than 1,115,000 bags.

But Germany is not the only factor to be considered in the matter. If that country increases its bounty, it is expected that France will follow suit. And then it is understood that the Dutch contemplate removing the export duty on sugar, which will tend to cheapen the Java article.

All the features above noted are bearish in character. But the situation is not without its bullish features as well.

The severe winter which Europe experienced interfered with the beet-seeding operations, in consequence of which estimates of the next crop have been materially reduced during the past week or two. It must not be forgotten, however, that the estimates of the sugar crop generally still slightly exceed those of last year, and this, too, in spite of an estimated smaller crop of cane

Another bullish feature is the present low range of values. But in these days of surprisingly low prices, it is not wise to venture too much on this phase of the situation.

With Germany out of the way, the situation certainly seems favorable rather than otherwise to a stronger feeling, but the trouble is, Germany is not out of the way.

BUYING CHEAP SARDINES.

There is a growing tendency on the part of the trade to buy sardines for a price. This is to be regretted.

The cause of which this is the effect seems to be a desire to secure a sardine that can be sold by the retailer at a price—say 8 to 10c. per tin—which will allow him to compete with the departmental stores.

But there is a grave danger that the good which is sought by this means to ac-

complish will, in the long run, work much evil.

In other words, the treatment will develop more harmful conditions than the one it is sought to cure.

Sardines, and all similar lines of tinned goods should be bought with care. The fact that their contents are not seen till opened at the table demands that they should be.

Now it stands to reason that the quality of sardines bought to retail at any such price as that mentioned cannot be relied upon.

When sardines are bad they are bad. And the person who is at the table served with such is not likely soon to forget the occasion, while ten chances to one he may be afterwards counted as a foe rather than a friend of sardines.

This, then, is obvious: The increasing demand that is developing for the low-priced article must assuredly tend to a diminished consumption of sardines at a no very distant day.

Grocers should remember that there is a to-morrow as well as a to-day.

CANNED GOODS FOR THE ARMY.

Lord Wolseley, adjutant general of the British army, and noted for his care of troops under his command, has just pronounced a warm eulogium upon the keeping qualities of canned goods as army supplies.

He quotes and endorses the opinion of Surgeon-Major Pratt that "tinned provisions, meat and vegetables, put up separately or combined in the form of soups, are practically undamageable by any climatic heat," provided, of course, that the material is good, properly cooked, and the tin perfectly airtight. The meat keeps better, he finds, when not over-cooked. In great heat uncooked articles, such as butter, cheese, and some potted meats, suffer most.

Canned meats and other canned goods must form an increasingly large proportion of modern army supplies, and Canadian canned supplies are of such excellent quality, and have in recent years made so quickly a favorable impression, both in the home market and abroad, that Canadian makers would be repaid by pushing their products under the notice of the British army authorities.

There is never any sense in disparaging your rivals in trade, but, as regards canned goods, it is a fact that some foreign makes are poor. Mr. Edward Whymper, the most famous mountain climber of modern times, complained bitterly last year of canned goods he had taken in one of his climbs up the Andes. They spoiled, and his party were nearly starved. His legal adviser would not let him mention the name of the disappointing maker, so he contented himself with denouncing "all Chicago canned meats." This is, of course, unjust to good

makes, but it simply illustrates the mischief that may be done by inferior grades palmed off as first-class.

Canadian products of this kind are well thought of, and their reputation should be carefully guarded.

MONTREAL'S FOOD FAIR.

MONTREAL'S Food Fair, to open in Windsor Hall, April 15, is the first of the kind in Canada, and is designed to interest and instruct the general public in the products and materials which go into food.

A model cooking school, with all appliances, is attached. Here lectures will be given and eatables and drinkables of every sort prepared.

Now that women take such marked interest in cooking, they want to know and test for themselves the various brands of food and the qualities of the goods they buy at the grocer's. The Food Fair, therefore, draws together those interested in scientific cookery, in getting up appetizing yet inexpensive meals, and in the proper foods for the sick room.

Those who exhibit in the booths give samples of their goods to the lady visitors, who can go home to experiment.

The Food Fair is being held by the American Exposition Co., New York, under the auspices of the Wholesale and Retail Grocers' Associations of Montreal, many firms exhibiting.

The exhibitor usually explains his goods to the visitors, probably preparing some fish or beverage to be tasted, and giving a sample to be tried at home. Now that cooking schools are patronized by the leading society ladies, they usually attend these Food Fairs, thus bringing together the people who have food products to sell and those who wish to buy.

Among the exhibits will be cocoa, potted meats, farinaceous food of all kinds, breads, coffee, canned fruit, cheese, hams, baking powder, table essences, etc., and the design is to stimulate trade, while, at the same time, wholesome food, sterling brands of goods, and modern methods of cooking are encouraged and promoted. Cash prizes will be given for the best baked loaf of bread, cake, biscuits, etc., as well as candy.

The Exposition Co. lease space to manufacturers. These manufacturers, while exhibiting, also sell their goods and fill the order through the buyer's retail dealer, thus stimulating trade.

The Grocers' Association gets 10 per cent. of the gross door receipts, and each member of the association receives 20 per cent. on all the tickets he sells. He is not required to take any quantity, and may return any not sold.

Many of the leading charities are asked to co-operate. They each have a day at

the Fair, and 50 per cent. of the gross door receipts are given to that charity.

The Montreal Fair will continue for two and perhaps three weeks. From here the manager, Col. de Gama, who is known in Canada as a theatrical agent for many years, goes to Ottawa and then to Toronto to organize fairs in each of these cities. Later in the year St. John, N.B., Halifax, Winnipeg and Victoria or Vancouver will probably have their shows.

THE CANADIAN GROCER thinks he should also add Charlottetown, P.E.I., to his list, for the merchants there are alive, and they handle fine groceries.

SAVIOUR OF CURRANT MARKET.

RUSSIA is beginning to qualify as the saviour of the Greek currant market, if it has not already become such.

One thing is clear, at any rate, the currant market is in a healthier condition to-day than it otherwise would be but for the influence of the Russian buyer.

Then, again the cause of that may be traced back to the low prices at which currants have ruled in Greece during the last couple of years; for until this obtained Russia was not counted at all as a factor.

Now, what is the fact? Russia of late has been taking, it is said, from 125 to 150 tons of Grecian currants per week, during part of which time other countries were slow buyers.

And the better feeling which has developed in the currant market during the past few weeks is, in part at least, due to an increased demand from Russian interior points.

Another factor in this respect is the firmer prices in France, which has created the hope in Greece that the former country will again be found drawing on the latter for supplies.

Now that Russia has become a customer of Greece, in all likelihood she may be expected to remain so. It will be fortunate for the owners of the currant vineyards if she does. Their condition has been deplorable for some time—so much so, in fact, that many of them had contemplated turning their vineyards into wheat fields, or other agricultural agencies.

A large portion of the currants Russia is importing is said to be used for ordinary eating purposes, and for sweetening the dry wines made in that country.

A further improvement is expected in the Russian demand after the ports in that country open, which event usually occurs about this time of year.

The outlook for the currant market is certainly favorable at the moment. Stocks of good fruit in Greece are light, and the market in the United States is almost bare, and in Canada we have by no means a superfluity.

THE CANADIAN BRAND.

There exists far too prevalent an expression that a Canadian article is necessarily inferior to an imported one. It is not the fault of the merchant; the consumer's ignorance and prejudice are at the root of it.

There is a story told of an eminent Canadian financier, reputed to be our wealthiest, who was drinking some mineral water at a dinner party and pronounced it to be the finest he ever tasted. "Now," said he, "I would like to try a Canadian brand," "That's just what you have been taking" was the retort, and the relator does not say whether the great financier blushed for his instinctive belief that Canadian make couldn't be the best.

Another story illustrating the same point: A purchaser complained that the price of an article produced here was "nearly as high" as an imported article of the same class which had the duty to meet. The maker explained that there was no duty on this article, and he thought the quality warranted "nearly as high" a price as the foreign one. "But," retorted the other, "it's only home made," and then it took him some time to see the point.

There are foreign goods equal or superior to home made; there are Canadian goods better than or as good as the imported.

Let us acknowledge the facts in both cases frankly; but what every fair-minded person must object to is the setting of the brand of inferiority upon everything Canadian. That is nothing short of contemptible.

COMMERCIAL EDUCATION.

That is a good move of the Chambre de Commerce of Montreal to promote commercial education. They are not satisfied with the standard of commercial training given to French-Canadian youth. They are going to summon a congress of principals of academies, endeavor to arrange a good program of studies, and secure co-operation of all commercial schools. Prizes will be offered by the Chambre to the best pupils, and a committee will take charge permanently of the whole idea.

There is too much of the ornamental element in all schools in these times, in fact "flummery" is the best word to describe it. Commerce is the basis of the greatness achieved by every nation in the 19th century. Agriculture and business are the two great occupations before Canadian youth. Why should they be so much ignored in our schools?

The French-Canadian merchants are doubtless spurred to action by the success of the English minority in Quebec in commerce. The French are a clever people, they possess the prudence and capacity needed in business, and it is right to give their young men every advantage in commercial training.

HONORING A RETAILER.

NO retail grocer in Western Ontario is probably as well and as favorably known in the trade and out of the trade as W. H. Ferguson, of London.

Lately, as stated in a previous issue, he has been compelled on account of ill-health to retire from business; and not only to retire from business, but to leave London as well.

Naturally, in view of Mr. Ferguson's popularity, his confreres in the trade would desire to submit some tangible proof of the esteem in which he was held by them.

This natural inclination took practical shape on Wednesday, the 20th inst., when some forty retailers and a number of wholesalers assembled in Sherwood Hall, London, to honor the father of the retail grocery trade of the "Forest City." Mr. Andrew McCormick, of the Retail Grocers' Association presided. The testimonial consisted of an address and a silver set, not to mention the expressions of regret and the well-wishes that were heaped upon the venerable recipient.

The address, which was read by Mr. McCormick, was as follows:

TO W. H. FERGUSON, ESQ., PRESIDENT:

SIR,—We, the members of London Retail Grocers' Association, having learned of your intention to discontinue your present business and to remove from our city, desire to take this opportunity of expressing our deep regret in losing an officer who has been connected with the association since its commencement. You have at all times been most ready and willing to forward our interests by placing both time and influence at our disposal.

We wish to testify to the upright, conscientious and gentlemanly manner in which you have always acted during the many years in which we have been continually brought in contact with each other in business and other relations.

As a slight token of our respect we ask you to accept the accompanying silver set, trusting that in your future home it will serve to recall to memory some pleasant reminiscences of your life and associations in London. We also tender our most sincere hope that in your new sphere you and your family may be blessed with continued health and prosperity for many years to come.

Signed on behalf of the officers and members,

E. SUTTON, Secretary.

London, March 20, 1895.

The presentation consisted of a silver water service, large silver salver and two silver goblets.

Mr. P. McGlade followed the reading of the address with a short, witty address, saying that some of the "boys" had prepared a second address, and it was decided to choose the "wickedest" member of the association to read it. They first tried H. Branton, as he was accused of jockeying the menagerie race at the picnic, but that was not considered wicked enough, so he was not considered a fit and proper person to read the address. They thought Billy

Horner, on the corner, might do, but he positively declined. Dick Wood said he would import a string of eight horses for next picnic, and take every race, but as that was not considered a very wicked act, Dick was not considered eligible. As a last resort, they decided on Jack Treblecock, and Jack, in his usual good-natured way, undertook the duty.

This address, which was in rhyme, was signed by "The Boys." The first verse referred to a certain jug, which the recipient was to "keep filled with bug." The third verse read:

Dear Friend Ferg,
Though you leave this burg,
To live among the Johnnies,
Bear in mind,
You leave behind
True friends and trusty cronies.

W. H. FERGUSON, OF LONDON.

Mr. Ferguson in reply said he could not find words to express his feelings. He had always been treated with kindness by the members of the association, but this was entirely unexpected. The grocers of London were noted for keeping secrets when they wanted to do so, but he could not understand how they managed to get up an affair of this kind and he not obtain some hint of it. He assured the members and their friends that his associations with them during the past 27 years, and particularly since the association was formed, some four years since, were most pleasant, and would never be forgotten by him. He had endeavored to the best of his ability to further the interests of the members of the association and the trade at all times. He was pleased to

say the association was a success this far, and hoped they would elect a president that would carry them on to still greater success. He could do no more than thank them for their expression of kindness toward him.

Speeches on behalf of the wholesale trade were made by Mr. T. B. Escott, of T. B. Escott & Co., and A. M. Smith, of A. M. Smith & Co. Other speakers were Messrs. A. McCormick, T. A. Rowat, H. Branton, F. Harley, R. W. Sharpe and P. McGlade.

Mr. Ferguson will take up his residence in Detroit.

WILL SHUT OUT FOREIGN BRUSHES

The final steps connected with the establishment of a new brush factory at Maisonneuve, Montreal, were taken this week.

On Monday night Messrs. R. Bickerdike, H. Laporte, Senator Desjardins, Lafontaine and F. G. Lyman left for Toledo, Ohio, to examine the brush factory there, the patents of which are to be employed by the Gane Brush Company in their Montreal factory. The company will operate the Canadian market only, the Ohio concern owning the patent for the United States.

Already \$90,000 capital has been subscribed, well known Montreal names like Clendinning, Lyman, Laporte, Forget, Desjardins, etc., are in the new concern. Maisonneuve has granted the usual bonus and site. The factory, if the deputation to Toledo are confirmed in their present views, will be ready in the autumn. The output will not affect the market already supplied by the Canadian-made goods, but will capture the large import trade in French and German brushes.

Last year the imports reached \$160,000 in these goods, and the Gane Company claim they can manufacture here on a basis to get the lion's share of this trade.

Scientists have discovered a new use for salt. Mixed with water and heated to 110 to 120 degrees, it has been found efficacious as a substitute for blood for injection into the arteries of persons weakened through loss of the vital fluid as the result of accident, etc. Simple as salt is, it has evidently not yet reached the limit of its usefulness.

Hon. Mr. Harcourt, Provincial Treasurer, stated in the Ontario Legislature Monday, that according to a decision of Chief Justice Harrison the municipalities had not power to regulate the hours with regard to taverns, though they had with regard to the retail sale in shops. The license commissioners had the power with regard to both shops and taverns.

Investments

Pay You When Rightly Made. Here are a

FEW PAYING ONES:

A Good Investment

Our Fancy Cleaned Patras Currants in Cases,
@ 5½c. These are very fine and will do
your trade good.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, March 28, 1895.

GROCERIES.

TRADE exhibits a slight falling off in volume compared with a week ago. But at least one reason for this is clearly the bad condition of the roads, which are neither fit for sleighing nor wheeling. While, however, there may be a slight falling off in the turnover, there is a decidedly improved tone in business, an increased feeling of confidence being apparent on every hand. The demand for canned vegetables and fish is good, and better than a week ago, with prices as before. The position in coffee is strong, with the better grades scarce. Sugar is one of the commodities which exhibits a smaller movement, but prices are, on the other hand, stronger at the refineries, although there is still a good deal of cutting going on among the wholesalers. Tea is in fair request and firm. The feature in foreign dried fruits is a further advance in Bosnia prunes. Advices regarding currants indicate a better feeling in Greece in this commodity.

CANNED GOODS.

Business has improved during the week, and the demand for tomatoes, peas, corn and fish is good. Canned fruits are in fair request. All off brands appear to have gone out of first into second hands. The position remains strong. We quote: Tomatoes, 87½ to 90c. for choice and 85c. for inferior and old stock; corn, 90 to 95c. for choice and 87½c. for common; peas, 82½ to 87½c. for ordinary and \$1.40 for fancy;

peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.10 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.45 to \$1.50 for good red fish in tall tins, and \$1.60 to \$1.65 in flat tins; do., second quality, \$1.15 to \$1.25; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEE.

The situation in the coffee market continues strong. Coffees are scarce on the spot, particularly the higher grades of Rio. Advices to Warren Bros. & Boomer from Rio state that the crop there has been reduced by 2,000,000 to 2,500,000 bags, and that purchases at present prices are considered safe. There is a fair demand on the Toronto market for good coffees. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 21½ to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

The situation is much as before, business being of the character usual at this season. We quote as before: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¼ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Trade is quiet and featureless. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Business continues dull at unchanged prices. We quote: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona

almonds, 14 to 14½c.; peanuts, 10 to 12c for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

A stronger feeling has developed during the week, and some of the refineries are trying to get higher prices, but generally speaking prices are without quotable change. In the outside markets raws have advanced 1s. from lowest point, and centrifugals are up ½c. The N. Y. Journal of Commerce of Monday reports a sale of 13,000 bags of Cuba centrifugal sugar for shipment to Canada at 2¼c. for 96 test, and the following day the same journal announced the sale of 3,000 bags of molasses sugar afloat at 113-16c. for 89, cost and freight, for Canada. The demand on the Toronto market is not as good as it was, although there is still a fair movement. We quote: Granulated—domestic, \$3.40 to \$3.50; do., No. 2, 3¼ to 330c.; yellows, 2½ to 3¾c. Raw—Demerara, dark, 2¾c.; golden, 3 to 3¾c.; bright, 3¾c.

SYRUPS.

There is no special feature to note, either in regard to business or prices. We quote: Dark, 25c.; medium, 28 to 30c.; bright, 35 to 40c.; very bright, 45 to 50c.

MOLASSES.

Trade keeps quiet. We quote as follows: New Orleans, barrels, 26 to 28c.; half-barrels, 30½ to 32c.; Barbadoes, barrels, 28 to 32c.; half-barrels, 30 to 34c.

TEAS.

There has been no material change in the situation. The market remains strong, and the demand locally is still fairly good for low grade and medium teas. We quote ruling prices to retailers: Young Hysons,

WILSON'S PURE MALT VINEGAR

P. C. LARKIN & CO.

WHOLESALE AGENTS,

25 Front St. East.

TORONTO

MARKETS—Continued

12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

Mail advices from London, under date of March 15, show that the amount of tea on which duty has been paid for home consumption since the commencement of the season does not show much increase on last year's figures. Although the use of China tea continues to fall off, that of Indian and Ceylon more than counterbalances the deficit.

DRIED FRUIT.

Demand for Valencia raisins is fair, although not as large as the trade would like to see. There is a good deal of cheap fruit selling, off-stalk being obtainable as low as 85c. per box. Selected and selected layers are in fair request on account probably of their threatened scarcity. The situation on good fruit is strong. We quote: Off-stalk, $3\frac{3}{4}$ to $3\frac{1}{2}$ c.; fine off-stalk, 4 to $4\frac{1}{4}$ c.; selected, $5\frac{1}{2}$ to 6c.; layers, $5\frac{1}{2}$ to 6c.

Further advances are to be recorded in Bosnia prunes, prices being up 5s. or 50 per cent. from lowest point. The market is strong at the advance, with higher grades practically all sold. The position of the French article is also strong. Demand for prunes on the spot is good at previous quotations. We quote: "Sphinx"—"U," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "C," 85 to 90 to half kilo, $6\frac{1}{2}$ c. per lb.; "B," 80 to 85 to half kilo, 7 to $7\frac{1}{2}$ c. per lb. "Atlas,"—"D," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "Uncorn," 5 to $5\frac{1}{2}$ c. Bordeaux prunes, $4\frac{1}{2}$ to $6\frac{1}{2}$ c.

Sultana raisins are quiet and firm at $5\frac{3}{4}$ to $8\frac{1}{2}$ c. according to quality.

Currants are selling moderately well only. There is good value in Patras currants selling at $5\frac{1}{2}$ c. A good many currants have been bought by local jobbers for shipment on the steamer which sails about April 3. We quote: Filiatras, half-barrels, 4 to $4\frac{1}{2}$ c., barrels, $4\frac{1}{2}$ c.; fine Filiatras, half-barrels, $4\frac{3}{4}$ c., barrels, $4\frac{3}{8}$ c.; Patras, $5\frac{1}{2}$ c., in cases; Casalinas, $5\frac{1}{2}$ to 6c.; Vostizzas, $6\frac{1}{2}$ to 7c. in cases and half cases; Panaretos, 8 to $8\frac{1}{2}$ c. Dem. Schis, of Patras, in their latest advices to their Toronto agents, say: "Judging from the present firmness of our market, in spite of prolonged inactivity and the general prospects, which on the whole are favorable, I am inclined to think our buyers are very much mistaken in postponing their purchases with the hope of a decline. With the better feeling prevailing the last few days in the Russian market and the important advance in France, a decline is, I may say, out of the question, and a rise, and perhaps a sharp one, much more probable."

Figs are dull and nominally unchanged. We quote nominally: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; naturals, 6 to 7c.

Demand continues good for California evaporated fruits. We quote according to quality: Peaches, $10\frac{1}{2}$ to 13c.; apricots, $10\frac{1}{2}$ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

BUTTER AND CHEESE.

Large roll butter and winter creamery continue to supply the market to the exclusion of inferior grades. Prices are unchanged. We quote: Summer dairy and store packed—Choice, 12 to 15c.; low-grade baking butter, 8 to 10c.; fresh large rolls, 13 to 15c.; pound prints, 16 to 17c. Summer creamery, 12 to 15c. Winter creamery—Tubs, 20 to 21c.; pound prints, 21 to 22c. Canadian cheese has advanced a little. August and September makes are quoted at $10\frac{3}{4}$ to 11c., and half sizes at $11\frac{1}{4}$ to $11\frac{1}{2}$ c. Small Stiltons bring 12 to $12\frac{1}{2}$ c.

GREEN FRUIT.

Prices are well sustained in all lines, and the better weather is having a good effect on jobbers' trade. We quote: Lemons—Messinas, \$2.75 to \$3.50. Oranges—Valencias, small crate, \$4.25 to \$4.50, and Jumbo crates, \$5.25 to \$5.50; Messinas, \$2.75 to \$3; California seedlings, \$3 to \$3.75; California navels, \$3.50 to \$4. Bananas, \$1.50 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$3.50 per bbl.; common fruit, \$1.75 to \$2. Grapes—Malagas, \$5 to \$6.50 per keg. California dried fruit—Apricots, $12\frac{1}{2}$ c.; peaches, 13 to $13\frac{1}{2}$ c.

COUNTRY PRODUCE.

BEANS—Are scarce. Choice hand-picked bring \$1.35 to \$1.40, and medium grades, \$1.15.

DRIED APPLES—These continue firm at $5\frac{1}{2}$ to 6c.

EVAPORATED APPLES—In 50-lb. boxes: $6\frac{3}{4}$ to $7\frac{1}{4}$ c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4.

HONEY—We quote: Strained, in bulk, 7 to 9c.; comb, 14c. for clover and 10c. for buckwheat.

POTATOES—Large quantities for this time of the year are being bought up in the country and shipped across the border. The market is a little easier this week. We quote: 57 to 60c. on the track and 65c. out of store.

POULTRY—Scarce on a firm market. Turkeys bring 12c., geese 7 to 8c., chickens 30 to 75c., ducks 50 to 90c.

EGGS—The receipts have dropped off the past few days, and the supply is not equal to the demand. As a result the market has firmed up, and new laid (the only kind offered) at date of writing bring 15c. a doz. The prices must come down again in a few days.

FISH AND OYSTERS.

Trade is reported fairly good, one fish jobber stating that the feature of the past week has been that the supply was hardly equal to the demand. We quote: Salmon trout (frozen), $6\frac{1}{2}$ to 7c.; white fish (frozen), $6\frac{1}{2}$ to 7c.; No. 2 white fish, 4c.; skinned and boned codfish, $6\frac{1}{2}$ c.; boneless fish, $3\frac{1}{2}$ to 4c.; market cod, 3 to 5c.; steak cod, 6 to $6\frac{1}{2}$ c.; haddock, 4 to $4\frac{1}{2}$ c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; sea herring (frozen), \$1.25 per 100 fish; blue pickerel, 4 to 5c. lb.; yellow ditto, 6c. per lb.; mackerel, 14c. each; pike, 3 to 4c. lb.; cod, 6c. per lb.; flitch cod, 5c.; finnan haddies, $6\frac{1}{2}$ to 7c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; Vancouver halibut, 6 to 7c.; large halibut, 10 to 13c. Oysters, \$1.20 per gallon for standards and \$1.50 for selects.

PROVISIONS AND DRESSED HOGS.

Prices are somewhat higher still, owing chiefly to the shortage in hogs throughout the country. We quote prices:

DRESSED HOGS—\$5.75 to \$6 per 100 lbs.

BACON—Long clear, 7 to $7\frac{1}{2}$ c. for carload lots, $7\frac{1}{4}$ to $7\frac{1}{2}$ c. for ton lots and for small lots; breakfast bacon, $10\frac{1}{2}$ c.; rolls, 8c.

HAMS—Large, 22 lbs. and over, $9\frac{1}{2}$ c.; medium, 15 to 20 lbs., 10c.; small hams, $10\frac{1}{2}$ c.; pickled, 9 to $9\frac{1}{2}$ c.

LARD—Pure Canadian, tierces, $8\frac{1}{4}$ c.; tubs, $8\frac{1}{2}$ to $8\frac{3}{4}$ c.; pails, $8\frac{1}{2}$ to $8\frac{3}{4}$ c.

BARREL PORK—Canadian heavy mess, \$15.25; Canadian short-cut, \$15.50; clear shoulder mess, \$13.50 to \$14; shoulder mess, \$13 to \$13.50.

SALT.

The week just past has been the best this spring for the salt jobbers. Many sales have been made. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, 59c.

FLOUR AND FEED.

WHEAT—The market is rapidly firming up and prices are growing higher. We quote: White, $66\frac{1}{2}$ c.; red, 62c.; goose, $61\frac{1}{2}$ c. per bush.

OATS—Are getting scarcer and dearer. We quote: 40 $\frac{1}{2}$ to 41c.

BARLEY—No change in market. We quote: 49c.

FLOUR—The market is fairly active. Prices are stationary. We quote: Ontario straight roller, \$2.65 to \$2.75; Manitoba, \$3.60 to \$3.65; patents, \$3.75 to \$3.90.

BREAKFAST FOODS—The demand is good and prices remain very firm, with no prospect of weakening. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; corn-

The Best of Everything

CLEMES BROS. - TORONTO**MARKETS.—Continued**

meal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SEEDS.

Enquiries are somewhat freer, but there is not yet a very great amount of activity. Alsike is quoted thus by jobbers: Prime to choice, \$4.80 to \$5; really fancy, \$5 to \$6.25; and lower grades \$4.

Red clover is fairly firm. We quote jobbers' prices at \$6.30 to \$6.60.

Jobbers are giving \$2.50 to \$2.75 for prime to choice grades of machine threshed timothy, and 20c. more for bright unhulled lines.

HIDES, SKINS, WOOL AND TALLOW.**HIDES**—In accordance with the upward tendency noted in these columns last week, hides have risen ½c. per lb. We quote: 5¾ to 6c. for cured, and for green No. 1, 5c.; No. 2, 4c., and No. 3, 3c.**SHEEPSKINS**—Are bringing better prices for good stock, 85 to 90c. being quoted. Calfskins nominally at 6c. for No. 1, and 4c. for No. 2.**TALLOW**—Quiet, at 5 to 5¼c.**WOOL**—Canadian fleece, all cleared out. For round lots of desirable wool 19 to 19½c. is obtainable. Pulled wools are rising. Best supers are quoted at 19 to 21c., and extras at 21 to 22c.**PETROLEUM.**

Crude oil is steadily advancing, having gone up several points during the past few days. As a result refined oils are very firm, although no alteration in prices has occurred on the local market. Jobbers seem inclined to expect refined oils to go up. We quote in 5 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 12½c.; carbon safety, 15 to 16c.; Canadian water white, 16 to 17c.; American water white, 18c.; photogene, 20c.

MARKET NOTES.

A new line of rice is being offered by the Eby, Blain Co. It is granulated.

McWilliam & Everist, Toronto, are just in receipt of two cars of bananas and one car of navel oranges.

A shipment of Martin Wagner's eyeless and coreless pineapple is to hand with the Eby, Blain Co.

Smith & Keighley have to hand a carload of California evaporated prunes, apricots and peaches of various kinds.

The Eby, Blain Co. wish to draw the attention of the trade to the special values being offered in their advertisement in this issue.

Clemes Bros. have received a shipment of pineapples. They also report the arrival of another fancy line of evaporated peaches and apricots.

Warren Bros. & Boomer have in stock a shipment of "Anchor" brand Bosnia prunes,

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

ASK FOR

MOTT'S

"B" & "C." They have a shipment of "Sphinx" brand on the way.

"Pickles are beginning to boom," write Wm. Paterson & Son.

James Turner & Co. report having still a nice fish stock, and invite selection.

Davidson & Hay are offering a full line of Morion's herrings, sprats and bloaters.

"Always something new" is Wm. Paterson & Son's ad. on page 6.

Davidson & Hay report large sales of gallon apples through their ad. in last week's GROCER.

Apricots are, it is said, almost sure to be a short crop in California owing to damage by frost.

H. P. Eckardt & Co. are offering "New England" self-rising buckwheat flour, 1 doz. pkgs. in case.

W. H. Gillard & Co. report that retailers are continually repeating orders for Seville orange marmalade.

H. P. Eckardt & Co. have choice apricots in 85 lb. sacks. Trade are requested to write for quotations.

The Provincial Canning Co., a new concern, with a capital of \$100,000 will build their factory at Eburne, Lulu Island, B.C.

Wagner's eyeless and coreless pineapples, put up in attractive packages, is for sale by H. P. Eckardt & Co.

James Turner & Co. are advertising grated pineapples, which they say is a very economical way of canning this fruit.

The F. F. Dalley Co., of Hamilton, report that their spring orders for "English Army" blacking are, so far, exceedingly satisfactory.

The Eby, Blain Co. are offering off-stalk raisins, J. Merle's brand, at 85c. per box. They are offering gunpowder tea at 10c. per lb.

Another big invoice of "Bargain" molasses is to hand with Lucas, Steele & Bristol. It is said that this brand proves a most perfect baker.

W. H. Gillard & Co.'s advertisement this week deals with that firm's "Standard" black tea, the popularity of which is said to be gradually increasing.

The Toronto Salt Works Co. claim to be getting good returns for their advertising in THE CANADIAN GROCER in the shape of numerous orders from the country.

Warren Bros. & Boomer have received a fresh shipment of off-stalk raisins, which they are offering at a price that will enable the retailer to sell the fruit at \$1 per box.

Dawson & Co., Toronto, are handling a line of potatoes just now, shipping direct from country points to United States markets. They sent over ten carloads during the past week.

P. C. Larkin & Co. report that they have opened up 43 accounts in Montreal for

Salada Ceylon tea, "which means," said Mr. Larkin, "that 43 grocers are handling our tea there."

D. Gunn, Flavell & Co. have just received a shipment of new cheese in flats—the first of the season.

The Empire Tobacco Co., of Montreal, have approached the council of Granby, Que., in regard to a removal of the plant there. There are 250 employes, and the cash disbursements in 1894 were \$65,000.

Lucas, Steele & Bristol have close at hand a consignment of French prunes in kegs and extra sizes of plums in cases. This firm also reports that it is offering currants at close figures.

"The season for using smoked meat is coming round, and consumers are recognizing the excellent quality of our 'Maple Leaf' brand of hams and bacon," said a member of the firm of Gunn, Flavell & Co.

Some choice Assams and Ceylons are now being offered by Lucas, Steele & Bristol. This firm are also showing genuine Ting Ling Orange Pekoe Darjeeling in half-chests and a line of choicest Young Hyson in cases.

Orders for good-sized blocks of Canadian pack canned lobster have been placed the past few days at \$1.72½ per dozen for tall tins, delivered here. Some brands and moderate quantities realized \$1.75 to \$1.80. Flat tins were sold for European account at a parity of about \$2.15 to \$2.20 at factory. Some Maine pack standards, in tall tins, at \$1.80 delivered.—N.Y. Journal of Commerce.

It is to be regretted that the old reliable crockery firm of James A. Skinner & Co. is going into voluntary liquidation after having been in business nearly half a century. They were the pioneer house to the Northwest and British Columbia, and have always maintained the reputation of carrying the finest class of goods. With such an immense and valuable stock it should pay every dealer to visit the warerooms and make personal selections, it being understood that everything will be cleared out.

MONTREAL MARKETS

MONTREAL, March 28, 1895.

GROCERIES.

THERE has not been any radical change in the position of the grocery market during the past week. The pronounced change in the weather toward the close of last week has made the country roads in Quebec, the Ottawa valley, and some parts of Ontario even worse than they were, and the fact has been appreciated in the smaller country movement of such staples as tea, sugar, molasses, etc. No change of importance is to note in the matter of values, though the sugar refiners

exhibit a disinclination to operate ahead for future delivery on sugar. Whether this is significant of an advance or not is hard to say. Tea is not quite as active as it was a week ago, but the tone is steady. In canned goods vegetables exhibit a fair local jobbing movement, and that is about all. No offers on new pack canned salmon are yet reported. In dried fruit local jobbers have been replenishing stock a little more freely with California raisins, but otherwise business is dull, though currants continue to hold their very firm tone, the same remarks applying also to prunes.

SUGAR.

The sugar market continues much as it was last week, demand being of a fairly steady character while the tone is steady. Advices on the raw article are strong, on the whole, but the fact has had no influence on the position here. Demand for refined here from local jobbers is fair, but the stocks in the country are pretty large as buyers have operated pretty freely at the low range of values that has ruled. With regard to spring shipments, refiners do not show much disposition to book ahead on spring account as they predict higher prices. Round lots of standard granulated have left refiners' hands at 35-16 to 3¾c., while yellows are moving at a range of 27-16 to 2¾c., as to grade, in round lots. Jobbers' prices here are unchanged from last week as follows: Standard granulated, 3¾c.; No. 2, 3¾c.; yellows, 2½ to 3¼c., as to quality.

SYRUPS.

Demand for syrups is not very brisk, but a fair trade is doing at steady rates. There is some divergence in quality, and prices range in accordance from 1½ to 2¼c., as to quality.

MOLASSES.

Since the sales of the cargo lots of Barbadoes that we especially referred to last week nothing very important has transpired in molasses. In consequence of these lower offers buyers are not quite so urgent as they were, but round lots for future delivery may be quoted at 28 to 30c., as to grade, laid down in Montreal. No great change in jobbing prices is to note, except some lower grade stock has been sold at 32½c. in hogheads, which is a shading of ½c. In barrels and half-barrels the quotation is retained at 36c.

RICE.

There is no change in rice, and a fair business was transacted during the week at former rates. We quote: Japan, standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

There is a fair demand for spices, and prices are unchanged. We quote: Penang black pepper, 6 to 7½c.; white pepper, 10 to 12½c.; cloves, 7½ to 9c.; cassia, 8½ to 9½c.; nutmegs, 40 to 90c.; and Jamaica ginger, 15½ to 18½c.

COFFEES.

There was a fair business done in coffee this week at steady prices. The movement, however, was not of large volume, as the

MONTREAL MARKETS—Continued

roasters were only buying in small quantities. For unroasted we quote: Maracaibo, 20½ to 22.; Rio, 18½ to 20c.; Java, 23 to 29.; Jamaica, 18 to 19c.; and Mocha, 26 to 28c.

TEA.

The tea market remains much as it was a week ago, so far as the actual spot movement is concerned. In fact, enquiry from the country is not quite as good as it was a short time ago. There is some enquiry from dealers, however, on prospects of future supplies, but whether this will result in any activity is difficult to say. Advices from primary points are certainly firm. We quote: Japans, low grades, 12½ to 14c.; medium, 15½ to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUIT.

In dried fruit, the new feature has been rather more enquiry for California raisins, and sales agents have placed with jobbers here some good-sized lots on the basis of \$4.60 in bond laid down here. Diminishing stocks of Valencia fruit, and the fact that little are near at hand, is, no doubt, turning the attention of jobbers more to the California fruit, to supply actual running wants, as they can be laid down handily in car lots. We quote: 4-crown loose muscates, 6¾ to 7c., duty paid, and 3-crown do. 5½c.

Business in Valencia fruit has been exceedingly quiet and there is little to report on their account. The stock here in first hands is practically out, but jobbers do not seem anxious. We quote off-stalk 3¾ to 4½c., selected 4¾ to 5½c., and layers 5 to 6c. in a jobbing way, but some round lots of the latter have been placed here for less money.

Sultana raisins are in few hands here and are as firmly held as ever. Holders appear to require all they have got for their own wants, and we quote values firm at 5c. for good, 5½c. for fine and 7c. for choice brands.

The currant market continues firm under strong advices from abroad, though the demand here is rather quiet. Holders, however, evidently consider the fruit good property at the following range: Filiatras and Provincials, 3¾c. in barrels, 4 to 4½c. in cases; Patras, 5 to 5½c., and Vostizzas, 7 to 7½c.

Advices continue firm on prunes, and spot quotations are well maintained all round under a good steady demand. We quote: Bordeaux, 4 to 4½c.; Bosnia, 4½ to 5c., and California, 7 to 9c.

There is a quiet jobbing trade in figs at steady prices, viz., 10 to 16c., as to brand, in boxes.

Dates are steady and unchanged, under a fair enquiry, at 4 to 5c.

There is no abatement to the firmness of the dried apple market. Stocks in wholesale grocers' hands are limited, and the holders seem to want all they have, while the fruit operators have little or none. Indeed, some of them have felt the necessity of borrowing a few cases here and there

MONTREAL MARKETS.—Continued.

from their customers. We quote them firm at 6 to 6½c.

Evaporated apples are without change, but are held under light stocks fully as firmly as dried stock, at 7½ to 8c., as to quality.

NUTS.

There is little change in these which rule firm and unchanged, with the exception of pecans and peanuts which are rather easier. We quote : Tarragona almonds, 12 to 13c.; filberts, 7 to 8c.; Brazil nuts, 8 to 9c.; pecans, small, 9c.; medium, 11c., and extra, 13c.; Grenoble walnuts, 13 to 14c.; Bordeaux ditto, 9 to 10c.; peanuts, 6½ to 9c. for roasted and 6 to 8c. for raw; cocoanuts, \$3.50 to \$4 per 100.

CANNED GOODS.

There is little change in this market. A moderate jobbing trade is doing in canned vegetables, stocks of which are not heavy in staple lines. Otherwise there is little to report, and no sales of new crop salmon are yet reported from the coast except on English account. We quote : Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.10 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 95c. to \$1 per doz.; marrowfat peas, 90c. to \$1 per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, 90c. to \$1.10.

FISH.

The fish trade has ruled much the same as it was last week, all staple lines moving rather slowly in consequence of the mild weather. Stocks of fresh fish on this account are considered to be rather large, and it looks now as though some losses would be made on them. Bright fresh herrings have sold in round lots at 90c. to \$1 per 100, while white fish have changed hands at 4 to 5c. per lb.; pike at 3c.; dore at 5c., and halibut at 6 to 7c. Round lots of fresh haddock are offered at ½ to 1c. per lb., and No. 1 Nova Scotia herrings are quoted at \$4 to \$4.50 per bbl.; No. 1 green cod, \$5; B. C. salmon, \$11 to \$11.50, and No. 2 mackerel, \$13 per bbl. Finnan haddies are dearer at 6 to 7c. per lb., and bloaters are steady at 75c. to \$1 per box, and smoked herrings at 10c. per box.

GREEN FRUIT.

APPLES—This market rules quiet and firm under light stocks at \$3 to \$5 per bbl., as to quality.

ORANGES—The orange market is steady on the whole for spot supplies, but foreign advices are rather easier. We quote : Valencias, \$3.75 to \$4.50, and Messinas, \$2 to \$3; Californias, \$3.25 to \$4 per box, and Jamaicas, \$8 to \$9, and Havanas \$6 to \$8 per bbl.

LEMONS—There are rather firmer advices on lemons, but they are more or less suppositions. We quote spot prices firm under an active demand at \$2.50 to \$3.50, as to grade.

GRAPES—The stock of Almeria grapes here is diminishing, and with the fact prices are \$1 higher for a range than last week at \$7 to \$8 per bbl.

SWEET POTATOES—Receipts of these are not heavy, and sell at \$5 per bbl.

BANANAS—Receipts of these are rather heavier, and we quote a rather lower range at \$2 to \$3 as to quality.

PINEAPPLES—Only a few of these are arriving, and they sell at 12 to 30c., as to quality.

COUNTRY PRODUCE.

EGGS—The egg market rules quiet and still a shade easier than last week, though receipts are not so heavy. We quote 15 to 15½c.

HONEY—The honey market is without changed. We quote : Extracted, old, 4½ to 5½c., and new, 7 to 9c. per lb. in tins, as to quality. Comb honey, 10 to 13c.

MAPLE PRODUCTS—There is little yet to report in this market, for receipts of new stock are light. Some guaranteed new syrups sold on Tuesday for 90c., but the price is no criterion, and the same can be said of a sale of new maple sugar at 10c. per lb. We quote : Old syrup, 50 to 65c., and sugar 6 to 6½c.

BEANS—The bean market continues firm at \$1.50 for hand-picked, and \$1.25 for lower grades in round lots.

HOPS—No change, and we quote 4 to 7c., as to quality.

POTATOES—Sales of Early Rose on the track have been made at 50 to 55c., and we quote 65c. in a jobbing way. New Bermuda potatoes continue to sell at \$8 to \$9 per bbl.

ONIONS—There is a steady demand for onions at former prices, viz., \$1.75 to \$2 per barrel. Bermuda onions sell at \$3.50 per crate.

TOMATOES—A few small lots of new Southern tomatoes continue to arrive, and sell at \$5.50 per bushel.

PROVISIONS.

The tone of the provision market is firmer, and prices for pork have an upward tendency, in sympathy with the strong and advancing prices in the west. The demand is fair, a moderately active business being transacted. We quote as follows : Canadian short cut, heavy, \$14 to \$15; hams, city cured, per lb., 9 to 10½c.; lard, Canadian, in pails, 9 to 10c.; bacon, per lb., 9 to 10½c.; lard, common, refined, per lb., 7 to 7½c.

FLOUR AND MEAL.

There is no important change in the situation of the flour market. The feeling is firm with prices well maintained, and an active business is doing on local and country account. We quote : Winter wheat, \$3.60 to \$3.75; spring wheat, patents, \$3.75 to \$3.90; straight roller, \$2.85 to \$3; extra, \$2.65 to \$2.70; superfine, \$2.50 to \$2.60; Manitoba strong bakers', \$3.75.

The demand for feed continues good, and the market active and firm. We quote : Bran, \$18 to \$19; shorts, \$19 to \$20; mouillie, \$23 to \$24.

A moderate business is transacted in oatmeal at firm prices. We quote : Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.20 to \$4.25.

CHEESE AND BUTTER

The tone of the cheese market is firm on what little old stock there is remaining here. In fact, the market is almost practically wound up. We quote strictly finest 10 to 10¼c. and under grades 9½ to 9¾c.

The butter market continues steady on fresh stock, and sellers find a ready sale for choice late made winter creamery at 21 to 21½c., and even more for some specially fancy parcels. Some new fodder Townships dairy have sold at 18c., but the flavor of these fodder goods is not equal to the creamery. Western dairy butter can be had for

almost anything, ruling weak at 7 to 10c., and held creamery is not much better, finding a very slow demand at 14 to 15c.

ASHES.

The ashes market is quiet and unchanged at the decline noted last week. We quote : First pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6.00 to \$6.10.

MONTREAL TRADE NOTES.

The demand for California raisins from jobbers here has been brisker than usual this week. A. P. Tippet & Co. have placed several good sized lots.

A consignment of fine seedless California oranges has just been received by Hart & Tuckwell, of McGill street.

Advices from primary Mediterranean markets to Rose & Laflamme are firm both on dried and green fruits, but especially on lemons.

Advices to A. P. Tippet & Co. from Liverpool continue firm on bicarbonate of soda.

Laporte, Martin & Co. call attention to the fact that they are offering special Lenten prices on leading brands of fine off-stalk Valencia raisins, as per their advertisement.

L. Chaput, Sons & Co. will be among the first firms in Montreal to offer new crop Barbadoes molasses to Canadian buyers of this staple. They have a small cargo lot near at hand.

No Berthier beet root sugar jobbing prices can now be quoted in Montreal as will be noted in our regular sugar report this week.

Several of the French wholesale houses have shaded their jobbing price on lower grades of Barbadoes molasses, hogsheds, ½c. this week to ¾c.

There have been offers of nutmegs on this market as low as 40c. this week, and that figure is quoted as our inside price, though the range still runs up to 90c.

Fresh receipts of pecan nuts have been received by jobbing houses here at a modified cost, laid down, that necessitates a slight alteration in our quotations.

The first genuine new maple syrup was received on this market this week. It jobbed out at 90c., but the figure is hardly a fair criterion to work on.

J. Alex. Gordon, tea broker, says that there is considerable enquiry regarding tea, but that no important business results.

Private cables note a firm feeling in the beet sugar market both for March and April shipment, the advance being equivalent to 3d. over the figures of a week ago.

A letter from Yokohama, March 1, to R. W. Forester, St. John, N.B., says : "The prospects for the new season's are very uncertain. The Japanese claim teas will be 20 per cent. higher than last year's opening, owing to the want of hands and the difficulty of transport, all the railroads being required by the Government for transport of troops. Should there be a descent on Formosa, or further complications with Russia, goodness knows where tea may go to, or if we shall get any tea at all. Under these circumstances teas cannot by any possibility be cheap next season, and are likely to be very dear, so that whatever you hold of stock at present there is no occasion to press anything under a profit even if they be held until the new season."

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., March 28, 1895.

JUST at present there is no trade here. As there is the lull before the storm, so there is always a short quiet season just before the opening of navigation. There is, however, a hopeful feeling that there will be a good spring trade. Money is not plenty and a fair proportion of renewals are reported. In business troubles the grocery trade is beginning now to have its share. A failure in Yarmouth, N.S., has been felt to some extent here, and one of our own wholesale grocery houses has had to suspend payment since our last report. In markets except sugar, butter and eggs, there is a firmer feeling, and in many cases there are advanced prices. In prices there is no change except that pepper shows signs of an advance. Cream of tartar remains as for some time. In tea, brokers selling direct report fair sales, but on the whole business is quiet and warmer weather is anxiously looked for.

SALT—In the past two weeks some 8,000 bags of coarse and 600 bags of fine have been landed here, before which the market was quite bare. It is, however, still a little early for much demand, and the fact that more is on the way keeps the market in the buyers' favor. The fine in the last cargo turned out in particularly good condition. Prices are: Coarse, out of store, 53 to 55c; fine factory filled, \$1 to \$1.10; 5 lb. bags, \$3 to \$3.25 per bbl.; 10 lb. bags, \$2.80 to \$3 per bbl.; 20 lb. wood boxes, 20c. each; 10 lb. boxes, 12c. each; cartoons, \$2 per doz.

CANNED GOODS—There is little change in price. A fair demand is reported, but sales will be much larger with the opening of navigation. Now will begin the season for peas, pumpkins and apples, though all grades will feel the increased demand. There is a rather firmer feeling in oysters. In haddies the sale is not as large as in the west, as we are so near the source of the fresh smoked, though there are many who, even here, prefer the canned. We quote prices as follows: Corn, \$1; peas, 95c. to \$1; tomatoes, \$1.05 to \$1.10; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$2.75 to \$2.85; 1-lb tins, \$1.65 to \$1.70; oysters, 2's, \$2.20; 1's, \$1.55 to \$1.60; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; salmon, \$1.35 to \$1.40; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, 4 doz., \$5.50; chowder, 2 doz., \$3.50; scallops, 4 doz., \$5.50.

DRIED FRUIT—Movement is light, and prices show no change. The demand which was felt for dried apples has stopped to a great extent, owing to holders asking too high prices to allow of export. In evaporated prices are firmer, but the demand is light, and as stocks are fairly large, it is hard to tell just what the market is. In prunes demand is light. The cause for this is said to be that this season the prunes are not keeping their appearance, though their quality is all right. The dates in this market are of extra quality. Nuts show a very light movement. Prices are quoted: Sultana raisins, 6 to 7c.; Valencia, 4¼ to 4½c.; Valencia layers, 5¼ to 5½c.; London layers, \$2.10 to \$2.25; loose muscatels, 5½ to 6c.; currants, bbls., 4 to 4¼c.; cases, 4½ to 4¾c.; evaporated apples, 8 to 8½c.; dried, 5½ to 5¾c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.

GREEN FRUIT—Apples are bringing better values. The last steamer sailing from

Nova Scotia took 10,000 barrels. Reports from the other side are most favorable. A few arriving here this week brought \$2.25 to \$3 for best qualities, finding ready sale. There are, however, poorer qualities to be bought from \$1 to \$2, but stocks of all kinds are getting less. In oranges, Californias are having a large sale, but the qualities do not quite suit this market. The poorer qualities are not good enough, and the good are too high, though splendid fruit. All oranges are firm. Bananas are arriving in fair quantities; a better range of prices will, however, be possible when they begin to arrive loose, which will be about April 1. Prices are: California oranges, \$3 to \$4.50; Messina, \$2.75 to \$3; blood, \$2.35 to \$2.75 per half box; Valencia, medium, \$4.50 to \$5; large, \$6 to \$6.50; lemons, \$3 to \$4.50; bananas, \$2.22 to \$2.50; onions, \$2.50 to \$3 per barrel.

DAIRY PRODUCTS—In butter there is no change. Fresh made finds fair sale, but held tubs are most unsatisfactory. Last fall there was no butter to be bought in this province. Now the country seems to be full of it. At that time holders could have got a good price, but now they are pleased to sell at any price, and may say they have learned a lesson, but I fear with most it will be forgotten. Makers of cheese and butter should sell when their goods are in the best condition. If others wish to speculate they should let them do it. One N. B. creamery was trying to place four tons of their butter here this week, and could get no offer. Last fall they had good offers but would not sell. In cheese the feeling is firm, though prices here are below those in Ontario. The demand is light. Eggs—Stocks are small, and with a fair demand prices are easy. We quote: Creamery prints, 23 to 24c; tubs, 18 to 20c.; dairy, 16 to 18c.; eggs, 18c.; cheese, 10 to 10½c.

MOLASSES—The new Barbadoes which arrived by last steamer was not as good as was expected. But the very first run is never as bright as that of a few weeks later, and better goods are looked for in the next steamer, due in about three weeks. Demand good and prices very firm, stocks being light. Syrup is in fair demand. We quote: New Barbadoes, 32 to 33c.; new Nevis, 28 to 29c.; Porto Rico, 30 to 31c.; Antigua, 28 to 30c.; syrup, 33 to 35c.

SUGAR—Again our refiners are off an ¼c., much to the surprise and disappointment of many. Large stocks are bought to arrive as far ahead at least as June at ¼c. above the market now, and holders are now looking anxiously to the Government that they may save them making a loss by imposing a larger duty. The very low prices are causing a good demand. We quote: granulated sugar, \$3.50 to \$3.60; yellow, 2½ to 3c.; Paris lump, 4¼c.

FISH—The demand is light, and except in dry cod prices are easy. A very peculiar incident has happened in this market. A car of fresh haddock was sold in Montreal and brought here to be smoked, the fresh fish market there being overstocked. It is understood the haddock sold in Montreal for ½c. per lb., just about the freight there. In smoked herring the stocks are larger and prices low. The tendency during the past season has been to smoke too many herring both on the English and American side. All the herring are English and those smoked on the American side, like the herring which they use for sardines from English waters pay no duty. Pickled are unchanged. We quote: Large dry cod, \$4.25; medium, \$4; small, \$3.35 to \$3.50; smoked

herring, 6 to 7c.; pollock, \$1.75; bay herring, \$1.50 to \$1.60; Shelburne, No. 1, bbl., \$4 to \$4.25; half-bbls., \$2.40 to \$2.50.

PROVISIONS—Prices are firmer, and a better demand is to note. In barrel pork, prices here are not as high as western quotations would warrant. Fresh beef (Ontario is quoted ¾c. higher, hams and roll ½c., and lard shows about same advance. Plate beef is also higher. We quote: Clear pork, \$17.50 to \$18; mess, \$15 to \$15.50; plate beef, \$13 to \$13.50; pure lard, 9¼ to 10; compound, 8½ to 9c.; cottolene, 9¼ to 9½c.; hams, 11 to 12c.; rolls, 9½ to 10c.

FLOUR, FEED AND MEAL.

The flour market is very firm, and higher prices are looked for, many brands having been marked up during the past week. Feed flour shows light demand, though it is but little higher than middlings, which are high and hard to get. In cornmeal, prices continue low. Mills report good sales. To many an advance would not be a surprise, as corn shows higher tendency. Oats and oatmeal are higher and very firm. Hay is dull. We quote: Manitoba, \$4.40 to \$4.50; best Ontario, \$3.55 to \$3.65; medium, \$3.35 to \$3.50; oatmeal, \$4.20 to \$4.25; cornmeal, \$2.80 to \$2.85; middlings, \$2.4 to \$2.45; bran, \$2.25 to \$2.3; oats, local, on track, 43 to 44c.; Ontario, 45 to 46c.; best seed, 50c.; beans, \$1.70 to \$1.80; hay, on track, \$8.75 to \$9; clover seed, 11 to 12c.; timothy, \$3.15 to \$3.25.

ST. JOHN MARKET NOTES.

Some 400 bags of cocoanuts passed through here, ex steamer Duart Castle, for Montreal.

There is a demand for potatoes from the American market, and a number of shipments are reported during the past week.

The name of the party opening the Dufferin hotel is C. Leroi Willis, of this city.

The failure of Messrs. Crosby, of Yarmouth, is being felt in this city, a number of our merchants being interested.

During the past week a quantity of flour arrived from the west via schooner from Boston.

Canned clams are gaining friends every day. Northrup & Co. can quote lowest prices.

Horse radish locally put up is finding quite a sale here. It is in bottles and sells at \$1 per doz.

John Seely has lately received a large shipment of smoked herring. Those buying from him can always rely on quality.

Sardines in $\frac{1}{4}$ lb. oils and $\frac{3}{4}$ lb. mustards are too well known to require talking about, but Northrup & Co. say their prices are right.

The Aughinbaugh Canning Co., of Baltimore, the packers of the famous Nigger Head brand, are now represented in this market by J. Hunter White.

Northrup & Co. are able to supply their customers with boneless fish in 25 lb. boxes. They report increasing demand for this class of fish.

C. & E. Macmichael have received another shipment of the White Moss cocoanut in glass cabinets. This they are prepared to sell at best prices to the trade.

Messrs. Northrup & Co report the best season's sales of canned golden finnan haddies which they have yet had. This celebrated brand is particularly in demand on the coast.

The steamer Duart Castle sailing for the West Indies this week took from here equal to 2,500 barrels freight, among which was a handsome carriage for Antiqua from J. Edgcombe & Sons, Fredericton.

A long felt want has been that of a reliable local house to sell cheese and butter factory supplies, so many of these factories are now in this province. H. B. White is now in a position to quote lowest prices on all such goods.

The firm of Smith & Tilton representing the Hudson salt works are not behind in effective methods of advertising. They sent to the Woodstock Opera House this week a large quantity of regular opera house tickets with ads. for Windsor salt on the back.

THE CANADIAN GROCER regrets to have to report the suspension of Messrs. Jardine

& Co., wholesale and retail grocers, of this city. They are one of our oldest houses, and have had a most honorable record. Losses made some years ago are said to be at the bottom of the trouble. It is expected a compromise will be made and the wholesale business continued.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, March 28, 1895.

THE general tone of the market shows an improvement, particularly in bread-stuffs and provisions. The fish market is suffering from the lack of demand from the West Indies, caused partly by the reimposition of the duty and the ruling low prices generally.

FLOUR—The market is still firm in Ontario, but the response to the rise here has not been in proportion to other markets. It never is in this line, as millers make Halifax a sort of dumping ground for surplus stock. Manitobas remain unchanged, but an advance is looked for in the near future. Quotations are: Hungarian patents, Manitobas, \$4.50 to \$4.65; Manitoba strong bakers', \$4.35 to \$4.50; Canadian pastry, \$3.75 to \$4; 75 per cent. rolled patent, \$3.65 to \$3.75; 80 per cent. \$3.50 to \$3.60; 90 per cent. \$3.40 to \$3.65; straights, \$3.25 to \$3.50; extra, \$3 to \$3.15.

BEANS—A good trade is being done in beans at \$1.90 to \$2.

OATS—This line is well up, Canadian in carloads being sold 46 and 47c. P.E. Island are worth 45 to 46c., and Nova Scotia, 43 to 45c.

FISH—There is little or nothing doing in fish. Some cargoes arriving can hardly find a market at any price. The West India market has gone all to pieces, and stocks are worth less in Porto Rico than they can be purchased for here. Grocery cod and good herring are scarce, there being none of the latter in the market.

CANNED GOODS—The demand for canned goods in all lines is excellent. Beef is steady at \$2.80 for 2's and \$1.85 for 1's. Ox tongue is steady at \$4 for 1's and \$8 for 2's. Lobsters are worth \$6. Fruits and vegetables remain unchanged.

CHEESE—The cheese market remains dull, with little demand. Early is quoted at 11c. and September at 11 $\frac{1}{2}$ c.

PROVISIONS—This line is also fairly active. Canadian beef is worth \$7. The following quotations are interesting: American clear pork, \$19 to \$20; do. mess pork, \$16.50 to \$17; P. E. Island mess pork, \$16 to \$16.50; do. thin do., \$14.50; do. rump do., \$14; do. prime do., \$13.25; American extra mess beef, \$13; do. plate do., \$14.

BRAN, MIDDLINGS AND OATMEAL—All these lines are booming. Bran is quoted at \$23.25, oatmeal at \$4.65 to \$4.75, with middlings about the same.

HAY—Hay is dull, with no demand to speak of and prices weak. Several car lots were received this week from Quebec. Quotations are less than \$10.50.

SUGAR—A good deal of business is being done, but there is no change in prices of material note. Porto Rico, in barrels, is quoted at 3c.; refined cut loaf at 5c.; granulated, 3 $\frac{3}{4}$ c.; Standard A, 3 $\frac{1}{2}$ c.; white extra C, 3 $\frac{1}{2}$ c.; standard yellow C, 3 $\frac{1}{2}$ c.; extra C, 3c.; yellow extra C, 2 $\frac{3}{4}$ to 3c.

MOLASSES—The market is well stocked with Porto Rico, several cargoes having arrived during the past few days. The general quotation is 35c., but some lots were sold from vessel at 31c. Barbadoes is quoted at 34c., and Demerara (N) D brand at 45c.

GREEN FRUIT—There is a good demand for green fruit of all kinds. Valencia oranges, which are greatly improved in quality, are quoted at \$5 to \$5.50. Lemons are worth \$3.50 to \$4. Apples are scarce and prices are likely to stiffen. Quotations range from \$2.50 to \$3.50, which is \$1 better than a few weeks ago. Bananas are arriving in fine condition, and are worth \$1.75 to \$2.25. There are a few Malaga grapes on hand.

DRIED FRUIT—Dried fruits of all kinds show an improvement in demand. Valencia raisins are steady at 4 $\frac{1}{2}$ to 4 $\frac{3}{4}$ c. Prunes are worth 4 $\frac{3}{4}$ to 5c. Dried apples are steady at 5 $\frac{1}{4}$ c. Figs—What few there are in the market, are worth 10 $\frac{1}{2}$ to 11c. for layer.

ONIONS—New Bermuda onions are due this week. Canadian stock remains steady at 2c.

EGGS—The high prices are likely past and good stock can now be had at 17c.

HALIFAX MARKET NOTES.

M. H. Ruggles, general grocer, has moved into the Atchison corner, corner Argyle and Buckingham streets. His new premises are handsomely fitted up.

The season for maple sugar, candy and syrup has arrived, and with it a good demand.

Supplies of green fruit are now beginning to arrive from Boston. The steamer Halifax brought a lot over Sunday last.

PERSONAL MENTION.

William Paterson, jr., of W. Paterson & Son, biscuit manufacturers, Brantford, Ont., was in Toronto this week.

M. W. Rublee, of Rublee, Riddell & Co., fruits, biscuits and confectionery, Winnipeg, is in Montreal on private affairs.

Mr. H. Laporte, of Laporte, Martin & Cie, Montreal, has gone on a fortnight's trip to Washington, Baltimore, New York, and other American cities.

EARLY STORE CLOSING.

The Executive Committees of the Trades and Labor Council and the Retail Grocers' Association met a few days ago, and drew up a circular to be issued to the public, asking the people to co-operate with these organizations in a general concentrated movement for the early closing of stores. The members of the Retail Grocers' Association have decided to close their stores at 8 o'clock every evening in the week, except Saturdays, this arrangement to go into force on May 1.

TRADE WITH THE MEXICANS.

LAST week, E. E. Sheppard, writing in his paper, Saturday Night, refers to the openings in Mexico for Canadian products. Happening to mention the matter to Col. De Garmo, who is working up the Food Exposition in Montreal, when in the office of THE CANADIAN GROCER, he produced a letter he had just received from Mrs. Green, a Mexican lady, wife of Col. Green, an American, who has been an officer in the Mexican army for the past forty years, and now on the staff of the President of that republic. Col. Green was also the Mexican Commissioner at the Chicago and San Francisco Expositions, where Mrs. Green had an opportunity of seeing and trying American products.

In her letter, dated March 2, Mrs. Green says: "They are working here for a National Fair. The Government will not allow an International to be held, as they can not give any money, and, besides feel that the country is too poor to invite foreign countries here; but a concession was given to Gygnacio Beyarano, who sold a contract to Viscount Cornelly for the foreign department. Mr. Cornelly is at present in San Francisco trying to form a company, and also to raise enough money to start his department. A meeting will be held in the city of Mexico, March 25, to see what can be done. It is hard to get it started, but a grand success is looked for. I would like to assist your company in opening here in the pure food line. There is a grand chance in this city of Mexico for a place of this sort. Food such as good soups, coffees, biscuits, jellies, oatmeal, cannot be found excepting in some private American families. Tomatoes can be had only as one buys them from some dirty Indian on the street. We have only one American house here. Rolled oats in a two-pound box sell at 45c. a box, and in bulk 20c. per lb."

This last information may be of value to the leading manufacturers of these goods in Canada, such as The Ireland Co., Toronto, E. D. Tillson, Tilsonburg, or David Ross. Embro. Mr. Sheppard writes: "We made a reasonably careful examination of the wholesale houses and stores, and in no place did we find a dollar's worth of Canadian goods offered for sale. Canned salmon came from the Columbia instead of the Fraser river; cod from New England instead of from Nova Scotia; biscuits, oatmeal and flour from Kansas City instead of Canada; indeed, it was dispiriting to find how little we had accomplished in making our existence known to the Mexicans, who are large consumers of imported goods. One of their great imports is pork, yet neither ham nor bacon bore the Canadian mark. Neither pianos, organs nor sewing machines are made in Mexico, if you except, perhaps, one little factory which turns out less than a dozen instruments a year of an inferior quality. They export much that we need, coffee, sugar, cotton, dye-woods and a hundred articles of our commerce. Furthermore, they hate the Gringos, as they

call the Yankees, and would rather trade with any people on earth than their next-door neighbors to the north."

TORONTO FISH FIRM FAILS.

Aikenhead & Sloan, wholesale fish dealers and cold storage warehousemen, Toronto, have assigned. Their liabilities total \$5,663.30, while their nominal assets amount to \$3,188.12. A meeting of creditors, held on Monday, was adjourned to see if an offer could be got for the cold storage plant, which is valued at \$2,500, and constitutes the chief asset.

TO CHARGE FOR EGG CASES.

As is well known, it has been for years customary for the leading produce and commission merchants of Toronto to send out through the country hundreds of egg cases. Each firm at the commencement of each year has always had made a large number of these cases, for which it charged the city and country dealers nothing.

This scheme worked all right as long as the empty cases were returned, but when it became the ordinary thing for hundreds of cases to entirely disappear, the jobbers began to be dissatisfied. Under that state of affairs they were, through the carelessness of retail merchants, subjected to losses amounting annually to no mean figure.

It was resolved to get over this difficulty, and at a meeting of the city produce men held at the office of D. Gunn, Flavelle & Co., it was resolved to charge city and country merchants for cases, and to allow a rebate when the cases were returned in good condition.

There were present at this meeting representatives of: D. Gunn, Flavelle & Co.; J. F. Young & Co.; W. Ryan; Park, Blackwell, & Co.; J. Hawley; J. E. Bailie; Graham, McLean & Co.; L. Gibb; A. Paxton & Co.; A. J. King; Rutherford, Marshall & Co.; Fox Bro. & Co. Mr. Dundas presided, and Mr. J. F. Young acted as secretary. After considerable discussion it was moved by Mr. Young, seconded by Mr. Rutherford,

and unanimously carried, "That the commission and produce merchants of Toronto hereby agree that they will charge from this date forward, either to city or country customers, 25c. for 30 dozen, 30c. for 36 dozen and 40c. for 49 dozen egg cases. All cases, when returned in good order, will be credited at prices charged."

FAILURE OF R. H. RAMSAY & SON.

The past week has been marked by the failure of the old and respected commission merchants and produce dealers, R. H. Ramsay & Son, Toronto. The senior member of the firm has been in business in Toronto for over 40 years, and received his first serious blow through unlucky investments in real estate. The assignment was made to Henry Barber & Co., who prepared a statement showing the assets of the company to amount to \$5,476.37, and the liabilities to \$21,355.02, leaving a deficit of \$15,878.65. Many of the creditors are country merchants. At a meeting of those interested, held at the assignee's office on Tuesday, it was decided to leave the estate in the hands of three inspectors, who were appointed, viz.: Messrs. Moffat, Wright and Dundas.

WITH THE RETAILERS.

Crawford, Lynch & Co., of Orillia, are in receipt of their spring importations from England.

Some time ago W. R. Scott bought out H. Stuckey, groceries, etc., Grand Valley, the latter being retained as manager. Now Mr. Stuckey has bought back his old business.

William Loney, groceries and hardware, Grand Valley, has sold out to Groskurth Bros.

A. Moyer, general merchant, Mildmay, has sold out. The purchaser, a Barrie man, will take possession May 1.

THRIVING TRURO.

TRURO, N. S., is a thriving town. Blessed with natural facilities of no mean order, it is fast growing in importance as a trade centre. An indication of the enterprise and progressive nature of its citizens is the fact that the Board of Trade of the town, which was incorporated only five years ago, now numbers among its members 100 leading business men. The board the other day elected its officers for the ensuing year as follows:

President, C. E. Bentley; 1st vice-president, E. E. McNutt; 2nd vice-president, W. E. Bligh; secretary-treasurer, G. A. Hall; council—T. G. McMullen, P. McG. Archibald, R. J. Turner, S. M. Bentley, J. E. Bigelow, G. W. Smith, R. T. Craig, Wm. Craig, F. McClure, D. J. Thomas.

The board has issued the following circular to draw attention to the advantages which the town possesses:

"The business outlook for 1895 in Truro is encouraging. Two new industries—one manufacturing hats, another a woodworking establishment—have started with the new year. Three existing factories, making (1) knitted underwear, (2) hats, (3) milk condensing and canning, propose extensive additions. Some \$85,000 of building operations are projected for the coming season. Exceptional facilities are offered to manufacturers, by reason of the near vicinity of the great coal and iron deposits of Nova Scotia. Cheap electric power is also available for small establishments. Being the railway centre of the province, special advantages exist for the distributing trade. Truro has now fourteen manufacturing, and thirteen wholesale establishments; three weekly and one daily newspapers; nine hotels; eight

churches; three banks; good water supply and fire service; handsome streets, squares and public park; an excellent school system. In fact, it is a live progressive town. Enquirers for business, manufacturing or residence purposes can obtain any information required by addressing the Truro Board of Trade."

WINNIPEG RETAILERS.

At a largely attended meeting of the Winnipeg Retailers' Association held on March 19, committees were appointed to go before the Local Legislature to protest against the abolition of imprisonment for debt, and the abolishing of garnishees. The completion of the early closing by-law petition was also dealt with. The Taxation Committee reported progress since the last meeting, at which a resolution was passed recommending a reduction of 33⅓ per cent. on the maximum rental and floor space percentage, and the collection of income and poll tax. The Membership Committee reported ten new members since last meeting.

PERSEVERANCE REWARDED.

Two new members have been added to the firm of Laporte, Martin & Cie, namely, Mr. A. Delorme, book keeper in the office for eleven years, and Mr. J. Ethier, salesman for nine years. Both new partners joined the concern when mere lads, and are still young men. Mr. Delorme is a Montrealer, and resides in St. Henri, and was a member of its Council for years. Mr.

Ethier is a native of Ste. Eustache, came to Montreal a boy, and lives in St. Cunegonde. Both were accorded some years ago a percentage of the profits in the business, in pursuance of a wise policy, and now unite their prosperity with that of the firm, which consists of Messrs. H. Laporte, J. B. A. Martin, J. O. Boucher, and the two latest additions.

OLD HOUSE IN TROUBLE.

Jardine & Co., the oldest wholesale grocery house in St. John, N.B., is in financial difficulties, and has been compelled to suspend with liabilities, it is said, well up to \$50,000. The firm has had an honorable record. It is likely an effort will be made to compromise and carry on the wholesale business, but the retail business will be closed.

Heating Appliances FOR SALE.

We are compelled to move into larger and more commodious offices immediately, and we offer our Furnace, Radiators, etc., at less than half cost. These were put in new three years ago. Can be seen at this office.

GROWTH OF THE TRADE JOURNAL.

THE evolution of the trade journal from the feebleness of infancy to its present position of influence is a most interesting study, says the N.Y. Journalist.

The pioneers in this now important branch of the American press were generally men of limited means and limited newspaper experience. Conditions were not altogether favorable to attract the best talent.

The possibilities of the field were not seen, and the facilities for gathering legitimate trade news were very meagre.

Trade journals were looked upon as a luxury, not as a necessity, and their early promoters relied for support upon some one or more leading houses, with the understanding that exclusive favors were to be shown these sponsors in return for advertising.

Facts were suppressed and long-winded write-ups, like two grains of wheat in two bushels of chaff, took their place.

Consequently, these early publications were little more than house-organs, whose columns were filled with fulsome panegyrics of this or that line of wares, and the makers and vendors thereof. The houses so flattered were content to pay well for it, without looking very critically into the extent of circulation or thinking what effect these commercial pæans might have on intelligent readers.

It was cheaper to print a journal by proxy, they thought.

As time went on, however, these favored ones could not but lose respect for such

venal sheets, and the publishers themselves learned that servility never wins applause, and that a trade journal has a higher mission than to be the mouthpiece of any house or combination of houses.

Always to praise and never to blame or criticise foredooms to failure, and to abuse the weak and flatter the strong is the habit of the sycophant.

Publishers of trade journals gradually came into touch with entire trades they represented, and, as their horizon widened, they saw clearly that the value of a trade journal depends on its bona fide circulation, and, to obtain this progressiveness, fearlessness and independence must characterize its policy.

They became leaders and organizers in trade reforms, guardians of the welfare of the trades among which they circulated, champions of the right, chastisers of the wrong.

Such are the foremost trade journals in the land to-day. They have made for themselves a place which no other mediums can fill.

The brightest young men in the mercantile world to-day are those who early learned the value of the trade journal, and from its pages gleaned the information and caught the ambition that is responsible for their advancement.

Too often, managers and heads of houses neglect opportunities which the underlings take advantage of.

THE CANADIAN GROCER early recognized the value of bona fide circulation, and is the first and only publication in Canada who

has kept, and is keeping, subscription canvassers at work in every province the year round.

THE DAMAGE EXAGGERATED.

THE CANADIAN GROCER pointed out at the time that the reports of the complete destruction of the Florida orange crop were much exaggerated. Other papers, however, continued to say that there would be no oranges from there this year, and that prices would be doubled.

A Canadian who owns extensive plantations in Florida has just returned to Montreal from there, and in conversation with THE CANADIAN GROCER said that there had been some damage in February, but that there would be a fair crop in most parts.

The exaggerated reports were published to boom prices, and dealers should therefore not place too much reliance on them.

BRITISH COLUMBIA HOPS.

Government Commissioner Larke writes from Australia that samples of British Columbian hops which have been forwarded to him have, on being tested, proved to be of excellent quality. They are, in fact, worth 3½d. per lb. more than the California hop, which is sold in large quantities in Sydney at 8½d. per lb. The prospects for trade in this line he considers good.

WILL LEMONS BE HIGH ?

TALK of large profits on some of the first purchases of November cut Mediterranean lemons has occasioned some speculation in Montreal during the past week.

Some holders in this connection profess to have made as much as \$1 per box on the purchase price of some of their first deal, but though it is admitted that the tenor of primary advices on lemons are firm, these assertions of big profits are not given unqualified acceptance. In fact there are importers in Montreal to-day who say they are prepared to place quite a quantity of consignments of lemons if they are guaranteed a good deal less than an advance of \$1.

However, though this is the case, they do not dispute that present indications point to a strong lemon market; but, in spite of this, hold that it would be unwise to "bank" on such exceptionally high prices, as some of the more sanguine ones predict.

While prepared to admit that the present indications point to smaller direct importations via Montreal this spring, owing to the sentiments expressed by fruit shippers, they remark that in former seasons the same predictions have been made and not always borne out.

At present, according to the information to hand, it is anticipated that the direct shipments of Mediterranean fruit via the St. Lawrence will be two-thirds oranges and one-third lemons, the exact opposite being the case last year.

This calculation is based upon what cargoes are now in port, and what are reported to sail in the future.

Last spring the receipts, all told, of oranges and lemons at Montreal were in the vicinity of 160,000 packages; so our readers, taking these figures, can draw their own conclusions should the percentage given above rule.

It may be stated in this connection that there are fruit houses, both in Montreal and Toronto, who alone imported 15,000 to 18,000 boxes of lemons, individually, last season, that so far have hardly contracted for any at all.

CANNED SALMON PROSPECTS.

FURTHER interviews with sales agents for leading Pacific Coast salmon canners in Montreal have failed to elicit the fact of any sales on the coast of new pack for Canadian account. In fact, leading agents look for a much later opening than last year, and some of them, with the experience they had last year in view, are not at all sorry that this should be so.

Last spring sales agents commenced to book orders on new pack salmon as early as the middle of February, and when these orders came to be filled there was consider-

able dissatisfaction, as THE CANADIAN GROCER noted at the time, between buyers and sellers. The prices were purely speculative ones, and, of course, there were disputes over them.

Briefly, matters were rushed too fast last spring, with the result of a lull of several weeks in March after the first burst. Then, when matters had settled down to their normal level, sales agents commenced to experience demand after the first week in

One of the Many Testimonials We Have Received

THE ROYAL HOTEL,

HAMILTON, July 12th, 1894.

THE F. F. DALLEY CO., LTD., CITY :

Dear Sirs,—Our porters, having a large number of boots to polish every day, ranging from seventy-five to two hundred pairs, we endeavor to give them the best blacking to be got. We have used all the best known blackings in the market, and have pleasure in stating that the "ENGLISH ARMY BLACKING" is their choice, as they consider it far superior to any other make for a quick, bright and permanent polish, giving a beautiful jet black finish to the leather.

Yours truly,

HOOD & BRO., Proprietors.

April, and this was kept up steadily until the middle of the summer.

Last spring prices ranged from \$3.75 to \$4.25, but this year the only indication of what the opening will be was contained in some private letters received in Montreal this week. These letters were to the effect that in the ordinary course of events there should be a small run this year, but it was just possible that the floods this season might alter all this.

On the coast the evident willingness of British buyers to speculate ahead was attributed to the former assumption; and in this connection it was stated that a figure equivalent to \$4.37½ had been paid for some

shipments to Great Britain via the Horn. These, of course, are no reliable criterion for Canadian buyers to work on, but are interesting all the same.

THE SEASON'S BUSINESS IN FISH.

Montreal reports a good Lenten trade in fish this season. The business is over for the time being with the importers, and is in the hands of the retailers, who find demands up to the average. Stewart Munn & Co. said to THE CANADIAN GROCER that the past season in imports has been chiefly marked by the changes which have been coming over the fish trade in recent years. The demand for salt herrings has

declined, partly because the quality has not kept up, and owing to a popular preference in Canada for fresh fish. The boneless cod trade is expanding as far as Newfoundland is concerned; a good article is being sent to this market, and there is a demand for it. The fresh herring trade varies much according to the catch and the weather. The past season, being warm, interfered with conditions of shipment, and prices ruled low as compared with the previous year, being in some instances as low as 75c. to \$1 per 100 fish against \$1 to \$1.80. The imports of salt herrings have declined with the past ten years from a total of 30,000 to 40,000 barrels to between 5,000 and 10,000 this year.

**Don't
Need
to Sell
Mixtures**

It's risky selling these new Coffee Mixtures. You risk your reputation, risk losing your best customers, and risk trouble with the Government Inspector, for the Adulteration of Foods Act was not intended to—and certainly will not—protect or recognize a trade where the consumer is liable to get an article with only a nominal trace of genuine Coffee, even although it may be called Coffee Mixture. Why risk so much, when you can get a Genuine Pure Coffee—our new West India Coffee Siftings—at 20 cents per lb.?

We have more respect for the time-honored trade names—"Java and Mocha"—than to apply them to this Coffee, but we do say and guarantee that it is a strictly pure Coffee, drinks well, and, for a medium-priced Coffee, there is nothing to equal it in Canada.

Where a taste is cultivated for high grade Coffee, we can recommend nothing better than our old favorite, Excelsior Blend Coffee, or our new Bourbon Coffee, at 32 cents.

BEET SUGAR INDUSTRY.

AN interesting lecture was delivered in Cobourg, on the 20th inst., by Mr. Robert Lawder, of Montreal, on the beet sugar industry.

He showed that forty years ago the world's production of sugar was 1,400,000 tons, of which 1,200,000 tons were of cane sugar, and only 200,000 tons of beet sugar; that the production has increased in 1894-95 to 8,100,000 tons, of which 4,975,000 tons are beet sugar, or a little more than sixty per cent., beet sugar having increased twenty-five fold in the forty years.

Mr. Lawder gave a short sketch of the history of beet sugar, from its discovery by Prof. Margraff, of Berlin, in 1747, up to the present time, and showed that its establishment in Germany and France was secured by liberal grants from Frederick William III., King of Prussia, and from Napoleon I., Emperor of France. He showed that the marvellous development of the industry in European countries was accomplished by means of the protective policy of a heavy duty on imported sugars, under which policy Germany, France, Austria and Russia soon ceased to be importers, but became large exporters of sugar. Mr. Lawder quoted from several acknowledged authorities to prove that the prejudice against beet sugar is unfounded, because, when properly refined, beet sugar cannot be distinguished from the best sugar of sugar-cane, either by taste, appearance or chemical analysis—the two sugars are identical. Any impurity or inferiority in beet sugar is due to imperfect methods of refining.

With respect to the adaptability of the soil and climate of Ontario to the production of sugar beets of good saccharine quality, Mr. Lawder quoted largely from the annual reports of the Ontario Agricultural College and Experimental Farm, which contain the analyses of the roots grown in this province in 1889, '90 and '91, in which years a large number of experiments in beet cultivation were conducted at the Guelph farm, and in different sections, from the Bay of Quinte district up to Walkerville. The conduct of these experiments was under the direction of Mr. Charles Drury and Mr. John Dryden, the preceding and present Minister of Agriculture, at whose instance the money expended for the distribution of seed and collection of average samples of the roots, and transport to and expenses at the laboratory, was very liberally granted to the promoters of the industry. A comparison of these analyses with those of 42 recent experiments made by expert professors at Halle and Cologne showed that the crops raised on the Guelph farm, and at several farms in different parts of the province, excelled the average of the German experiments in yield per acre, percentage of sugar in beets, but were, with

one exception, slightly inferior in purity of sugar. On the other hand, many of the samples from Ontario were very defective, owing to unfit conditions of the soil, improper manuring, and neglect of the growers to follow the methods of cultivation pointed out in handbills of instruction delivered along with the seed.

Mr. Lawder stated that with an ample supply of beets, such as those grown on the Guelph and some other farms, a beet sugar factory in Ontario should be able to operate successfully with very little protection. But as many years would elapse before a large factory would be able to get a full supply, or before it can be expected that the average quality will be equal to that obtained in countries where the farmers have had 60 or 70 years' experience in this crop, and many years, also, before the employes of the factory shall have attained to the same skill as in old established factories, it is not to be expected that capital can be attracted to this new industry unless favored by reasonable protection against foreign sugar, or by a reasonable bonus on the home product. The consumption of sugar in the Dominion now exceeds 150,000 tons, having increased 50 per cent. since 1886-87.

All experts who have investigated the subject agree that the conditions in Canada are so favorable that at the expiration of ten years the beet sugar industry here will not require any protection. Mr. Lawder went into many details as to probable cost of production of beets, and the prices proposed to be paid for them, the cost of manufacturing, the capacity of intended factories, the conditions required for sites of factories, etc. He showed that in Europe, where grain prices are much higher than here, the cultivation of sugar beet is extending rapidly, owing not only to the superior profit from the crop itself, but largely owing to the great benefit derived by the soil from the thorough cultivation and weeding necessary to success in beet crop, by which the land is vastly improved for future crops.

At the close of the address the following resolution was also carried, after considerable discussion, but a few of those present declined to vote:—"That the establishment and the development of the beet sugar industry in Canada will prove a great benefit to its agricultural interests, and will largely contribute to the commercial and manufacturing prosperity of the Dominion. Resolved: That this meeting would strongly urge upon the Dominion and Provincial Governments the propriety of granting such liberal assistance to all promoters of this enterprise as will secure the early erection of several large, well-equipped beet sugar factories in some of the sections of the Province of Ontario which experiments have shown to be admirably adapted to the cultivation of sugar beet.

INTERESTING COFFEE DATA.

A CIRCULAR recently issued by W. Schoeffer & Co., of Rotterdam, goes into considerable detail regarding the production and consumption of coffee in the world, and from which the following extracts covering the main points are made. Estimates in detail of the production are given as follows:

	Bags.		
	1893-94.	1894-95.	1895-96.
Rio, Victoria and Ceara	2,700,000	2,800,000	2,000,000
Santos	1,770,000	4,000,000	3,500,000
Bahia	370,000	300,000	350,000
Mexico and Central America	1,476,400	1,250,000	1,350,000
Venezuela and Colombia	1,214,900	800,000	1,000,000
Porto Rico and British West India	405,900	200,000	225,000
Hayti	434,200	400,000	450,000
Java Government and private	463,200	800,000	750,000
Padang	82,700	43,000	50,000
Menado	3,000	1,000	5,000
Macassar, Timor, etc.	31,900	45,000	40,000
Ceylon	27,400	40,000	40,000
English East India and Manilla	276,300	250,000	300,000
Africa, Mocha, etc.	156,100	200,000	200,000
Total	9,202,000	11,120,000	10,270,000

According to the most reliable figures, which were compiled with great care, the world's consumption of coffee in 1894 amounted to 11,357,250 bags. Contrary to production, which is subject to violent fluctuations, consumption remains steadily on the increase, as can be seen by the table of deliveries of coffee in Germany, France, Austria, Belgium and the United States. A compilation is then given showing deliveries from 1866 to 1894, but we reproduce simply enough to show the ratio of increase in recent years:

	Cwts.		Cwts.
1883-85	27,660,840	1888-90	27,225,760
1884-86	28,476,440	1889-91	27,850,540
1885-87	27,501,420	1890-92	29,316,560
1886-88	26,954,460	1891-93	30,254,480
1887-89	26,143,100	1892-94	30,672,140

The circular further claims as follows: The regular course of consumption was only interrupted during times of great speculation, as was the case in 1871-73 to 1873-75 and 1886-88 to 1888-90; but the following years quickly made up for lost ground, and taken in the average the increase in consumption makes steady progress. It is therefore illogical to say that the consumption of coffee decreases, or to pretend that the price of coffee is too high because other articles have depreciated in value in consequence of over-production. There can be no lasting decline in the price of coffee unless several consecutive crops exceed the present yearly requirements for consumption. From present indications production and consumption about balance each other. The world's visible supply on the 1st of August will probably show little change from that existing same time last year, whilst a reduction in the visible supply of the world will take place during the season of 1895-96.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES

DOSITHE CLEMENT, general store, Alfred, Ont., has compromised at 50c. on the dollar.

D. Allen, general store, Malton, Ont., has assigned to Wm. Logan.

Benjamin A. Cote, general store, Hebertsville, Que., has assigned.

R. B. Hamilton, grocer, Atwood, Ont., has assigned to F. H. Lamb.

The creditors of W. J. Delaney, grocer, Montreal, have been called together.

P. Cossette, general store, Champlain, Que., has assigned to Kent & Turcotte.

Irene D. Gravel, general store, Louiseville, Que., has assigned to Kent & Turcotte.

McLean & McKay, general store, Underwood, Ont., have assigned to C. B. Armstrong.

Kent & Turcotte have been named curators of Louis Taschereau, general store, Lourdes.

Wm. T. Cleary, general store, Spaniard's Bay, Newfoundland, has been declared insolvent.

Mrs. M. B. Sabourin, general store, Glen Sanfield, Ont., has compromised at 30c. on the dollar.

C. H. Dannielle, grocer, etc., St. John's, Newfoundland, has compromised at 30c. on the dollar.

A statement of the affairs of F. S. X. Armour, general store, Acton Euclide, Que., is being prepared.

W. J. Moran advertises that he will not be responsible for any goods shipped the firm of Moran & Bent, general store, Amherst, N.S.

An insolvency declaration has been applied for in the case of T. P. Jackman, grocer and provisions, St. John's, Newfoundland.

Good Bros. (Geo. Good only), grocer, Wingham, Ont., has transferred his assignment to Henry Barber & Co., Toronto. There is an offer of compromise.

PARTNERSHIPS FORMED AND DISSOLVED

Monette & Lebœuf, grocers, Montreal, have dissolved.

Brisebois & Co., grain, Acton Euclide, Que., have dissolved.

A co-partnership has been registered between J. S. Hubley and A. R. McDonald, grocer and feed, Halifax, N.S.

Johnson & Hendry, general store, Watson's Corners, Ont., have dissolved. Jas. Johnson has removed to Ompah.

Henry H. Regan and Cuthbert C. Regan have been registered proprietors of H. H. Regan & Son, grocers, Montreal.

Francois X. Godbout and Albert Lamontagne have been registered proprietors of

Godbout & Lamontagne, merchants, Quebec, Que.

Michael Gauthier and Louis Fontaine have been registered proprietors of the cheese factory of Fontaine & Gauthier, St. Germaine and Contrecoeur, Que.

The firm of Laporte, Martin & Co., wholesale grocers, Montreal, have added two more members to the firm. They are Adhemar Delorme, their book-keeper for the past eleven years, and Joseph Ethier, salesman for nine years. The prosperous business carried on by the firm will no doubt receive a new impulse from the united efforts and capabilities of the five partners.

SALES MADE AND PENDING.

A. S. Betts, grocer, Oxford, N.S., has sold out.

Hardress Clark, grocer, St. John, N.B., is selling out.

C. E. Scammell, ship chandler, St. John, N.B., has been sold out by auction.

Baruabe Laloude, general store, St. Renipteur, Que., has sold out to G. Valois.

The stock of Fradette & Riverin, grocers, Quebec, Que., has been advertised for sale.

W. E. Milner & Co., grocers and grain, Brampton, Ont. have sold out to Crawford & Deews.

The stock of Ferguson & Co., crockery, London, Ont., has been advertised for sale by auction.

The stock of W. J. McGinn, confectioner, etc., London, Ont., has been advertised for sale by auction.

The estate of Jas. Allen & Co., general store, Beamsville, Ont., is advertised for sale by auction on April 3.

The estate of Lawson, Harrington & Co., commission, flour, oils, etc., Halifax, N.S., has been advertised for sale by the assignees.

CHANGES.

Charles Anderson, grocer, Vancouver, B.C., has given up business.

J. G. Laidlaw, general store, Seaforth, Ont., has been succeeded by Fred. Davis.

W. Pitman & Co., groceries, Calgary, N.W.T., has been succeeded by J. S. Hawkey.

Julie Lefebvre has been registered proprietress of Jos. Lefebvre & Co., grain, Montreal.

Dame Reine Duhamel, wife of Etienne Bessette, has been registered proprietress of E. Bessette & Cie, hay and grain, Versailles, Que.

Wm. Germain, hotel and general store, Meteghan, N.S., has registered a consent for his wife, Edith, to do business in her own name.

George Robertson & Co., St. John, N.B., will retire from the retail grocery business about May 1, and confine their attention entirely to the wholesale trade.

DEATHS.

Jas. McCarthy, general store, Thibert Creek, B.C., is dead.

Alfred I. Kierstead, general store, Collina, N.B., is dead.

FIRES.

N. Bloom & Co., general store, Cookshire, Que., has been burned out. Partially insured.

GOLDTUAUB ARRESTED.

Recently at Plum Coulee, Manitoba, a general store owned and conducted by a merchant named S. Goldtaub, was burned out. Representatives of the insurance company that held a risk on the property visited the scene and were about to pay Goldtaub's claim for the loss of the stock when something transpired that convinced them fraud had been practiced. Detective McKenzie was engaged on the case, and a quantity of goods alleged to be part of Goldtaub's stock was found stored in a stable, carefully packed and covered with hay. Goldtaub was arrested and taken to Winnipeg. He succeeded in getting bail, which was fixed at \$3,000, Mr. Goldstine and one or two other Winnipeg friends of the accused putting up the bail.

TO ACCOMMODATE TRAVELERS.

The Western Ontario Commercial Travelers' Association have been in communication for some time with the Michigan Central Railway, endeavoring to get them to give better local train accommodation between St. Thomas and Windsor. The secretary of the association has just received word from Mr. Laven, the general passenger agent, that it has been arranged for the present to stop east-bound train No. 10 on signal at Comber and west-bound No. 37 on signal at Comber and Essex. These concessions will prove a great convenience to commercial travelers.

GRIEVANCES OF B. C. FISHERMEN

British Columbia fishermen are pressing their grievances upon Mr. Costigan. When his predecessor, Sir Charles H. Tupper, was in the west, arrangements were made to lay before him the subject matter of their complaints. But the death of Sir John Thompson necessitated the return of Sir Charles to Ottawa before he could hear their representations. They have now forwarded to Ottawa a petition asking for a thorough investigation of the habits of the salmon of Fraser river, and urging that factories to convert fish offal into fish oil be bonused by the Government. They ask further that fishing with trawls for sturgeon be permitted.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, APRIL 5, 1895

(\$2.00 per Year) No. 14

DROPS FROM THE EDITOR'S PEN.

The inquest into the Simpson fire may not reveal the cause of the conflagration, but it has proved that the Holmes patrol system comes far short of being all that it is claimed to be.

* * *

While trade in Canada is not well, it is convalescing, and that nicely, thank you.

* * *

A good deal has been heard about over-production. What we want now is over-consumption.

* * *

Discounts saved may not be the wheels that carry trade along, but they are the oil that lubricates the wheels.

* * *

Advertising is like seed that is sown. The more it is cared for and cultivated the more bountifully will it yield.

* * *

The cold snap Monday was not returning winter. It was merely departing winter trying to play an April fool joke.

* * *

The man with a good name and few dollars is more to be emulated than the man with many dollars and a bad name.

* * *

A contemporary says that the cash basis is advantageous to both sides. Of course it is. It would not last long if it were not.

* * *

Merchants who are more concerned about the quality of the goods they sell than the quantity, also secure the quantity eventually.

* * *

A contemporary talks of "the world's debt to electricity." Yes, it owes it a good deal. But some people pay their debts by electricity: The felon in New York State, for instance.

* * *

The merchant who cuts prices to court trade often finds himself in the sea of bank-

ruptcy without a friend to even throw him a straw. Cutters make many enemies, but no friends.

* * *

When grocers and representatives of labor join hands to boom early closing, want of backbone only can prevent the desideratum being secured.

* * *

The man who lies in his advertisements is as bad as the man who lies orally, and both are minus the confidence and respect of the public.

* * *

The merchant tailors of Winnipeg patched up an agreement to close their places of business at 7 p.m. Now it has been broken and no effort is being made to stitch it together again.

* * *

The farmers of Ontario County are organizing a mutual fire insurance company. The business men of Toronto will be compelled to do ditto unless the regular insurance companies discard the autocrat.

* * *

Canada better than the United States? Why, of course it is. Ask those from Dakota, Minnesota, Michigan, the New England States, and many other States, who are turning their faces hitherward.

* * *

The agent of the Ceylon Tea Association, who has been doing missionary work in the United States, speaks hopefully of the success of his mission. That depends whether the flavor of Ceylon tea finds favor with the people.

* * *

So The Montreal Trade Bulletin has caught The Montreal Herald red-handed stealing an editorial from THE CANADIAN GROCER and publishing it as its own. This is not the first time The Herald has appropriated articles from our columns without giving credit. We have been cognizant of it for some time. We are, however, charitable. If a contemporary steals a paragraph

we give him an article. And The Herald has not been too modest to decline. Now that the cat is out of the bag, common decency should put a stop to what there was not hitherto a sufficiency of journalistic modesty or honesty to do.

* * *

If people contemplating a trip to Europe next summer will take a twelve-mile ride along Canadian undulating country roads just now they will be able to learn what manner of seamen they will make when crossing the Atlantic.

* * *

A bill has been introduced into the Ontario Legislature to declare the cutting of a horse's tail a misdemeanor. How would it do to extend the application of the bill so as to include the merchant who "cuts" the price of commodities?

* * *

Please rouse out my name Of your \$ List dont senit anemore haft this, the Paper.

This is the brief note The New England Grocer recently received. Of course the man did not want "anemore" papers. He wanted brains; and these neither trade papers nor any other human agency can supply. Their office is to furnish views and ideas

* * *

The Minister of Agriculture, in his annual report, says that "the high rate of insurance militated against the experimental shipment of 834 cattle to Villette, in France." The high rates of insurance are militating against a good many industries in Canada just now. Reigns of autocrats, however, are short in these days.

* * *

Max O'Rell says that the man who has solved the problem of life is the French provincial merchant who, at the noonday meal hour, locks his store door so that he may not be disturbed while he eats his dinner, and subsequently romps with his children. The French merchant may not have solved the problem, but he is a great deal nearer doing so than is the average merchant on this side of the Atlantic.

SOMETHING ABOUT LICORICE.

LICORICE root grows wild. It requires low, marshy ground, along the banks of rivers. The climate of Spain—say in the Provinces of Murcia, Aragon, and Toledo—is most suitable. In Spain it requires, on an average, about eight years to reach maturity. The plant or stalk is not utilized beyond the root. It grows in many countries, and varies in quality according to the soil. The ground is pulled at intervals of three, four, or five years, according to circumstances, by digging trenches and pulling the root until it breaks. After a year or two it shows above the ground with a little stem, and in the spring it flowers. From the time this stem appears until the flowers have fallen the root is not in condition to extract, for the sap does not return to the root until then. It is from September to March that the root is gathered, and goes through a process of drying or “curing” before it is considered marketable. The time required for “curing” is from four to five months, and needs a dry climate. Licorice root is also found and gathered in Asiatic Turkey, Greece, Italy, and the Sicilies. The total amount of all kinds imported into the United States is about eighty million pounds a year, a great part of which is employed in the tobacco manufacturing industry.

To give a brief idea of the process of manufacturing licorice in Sicily, we quote Prof. Fluckinger in *The Archiv. Der Pharm.*, who was given every facility for making observations. It was in Via Molino a Vente, and he says: “The operation is quite simple, and is conducted during the winter, between October and April. The roots are washed, crushed upon a stone, then twice boiled with water in flat iron pans (*caldaje*), holding 250 litres, about 66 gallons, and subjected twice to pressure. The work at each pan, with the quantity mentioned, consumes about one day. The boiled root is transferred from the pans into basket-like receptacles (*trantojo*, *sporta di pezzuola*, made from chestnut shavings), where they are pressed. A more perfect arrangement (called *gabbia*) consists of a wooden framework into which fit eighteen perforated iron plates (*lastre di ferro*), between which the roots are placed. The expressed juice is clarified by merely allowing it to stand. The last portions are poured upon a fresh lot of roots. The same pans (*caldaje*) are also used for inspissating the juice, heat being applied at first by means of coal and afterwards by charcoal. Each pan yields about four hundred kilos of “pasta” or mass, which is immediately cut up by females upon an oil table made of walnut wood. The mass is either formed into blocks (*pani* or *blocchi*) weighing five kilos, or is formed, by the aid of gutter-like forms made of marble or brass, into sticks (*bilie*) of equal size, which are

stamped and then rapidly washed in order to remove the oil with which the sticks have become coated during the rolling. The final drying is accomplished in hurdles (*tavole*) in the storerooms, by exposure to the summer temperature. No artificial heat is used for drying.”

As one can easily see, this manner of manufacturing licorice abroad is very crude, and the exposure of fresh-made goods to the flying dust, together with the neglect of proper care to protect the goods from any other possible objection—such as germs, etc.—make imported goods always a subject for suspicion; while, on the other hand, the most improved methods that science can suggest are employed here to produce a perfectly pure, wholesome and hygienic article. The brand “Solazzi” is, or was, the property of an Italian noble, the Prince of Piedmonte d’Alife. It is made in the small town of Corigliano, situated on the Gulf of Tarento, where the Duke of Corigliano also manufactures the stick licorice bearing his name. The “Barracco” was made by the Baron de Barraccy, at Cotrone, while the “Pignatelli” comes from the factory of Prince Pignatelli, of Strongoli, situated at Torre Cerchiora. It is a frequent comment that imported stick licorice is gritty, while on the contrary, experience has proven the fact that licorice of the grade and quality of the “Y. & S.” brand has never yet been subjected to any such criticism. It is hardly to be expected that the lowest class of labor, employed at starvation wages, will take that care and interest in the manufacturing of imported licorice that is sure to be exercised by intelligent, properly paid, careful and clean American hands; and to show the appreciation of the public of this fact, together with the fact that they believe and know they are getting better goods in this country, we have only to add that about twenty-five years ago all, or nearly all, the licorice consumed in the United States came from abroad, while to-day probably 95 per cent. of the manufactured article consumed by the people of this country is manufactured by American concerns.

THE TREND OF THE TIMES.

Not many months ago the people of this Coast were discussing the probability of an extensive trade in flour springing up between this country and the Orient. We have seen this trade expand so rapidly that all the steamers plying between San Francisco, Puget Sound and Vancouver, B.C., and Oriental ports are unable to handle the freight offering, and have their whole tonnage engaged for months ahead. Still more recently the prospect of a direct line of ships to South Africa was mentioned. As we stated yesterday, the pioneer steamer of the new line which will run from British Columbia has been arranged for. It ought to be

mentioned in this case that if the scheme for unrestricted reciprocity between Canada and South Africa succeeds, Washington will not have much chance to compete in the new field so far as lumber is concerned. But the opening of the new line is of interest to us because, taken in connection with the rapid expansion of the Oriental trade, it shows how the commercial importance of this part of the Coast is forging ahead. These two incidents are full of encouragement. They show that the Pacific Northwest may realize the possibilities before it commercially at an earlier day than any of us have ventured to hope.—*Seattle Press Times*.

THE EIGHT-HOUR SYSTEM.

Mr. Brunner, of the firm of Brunner, Mond & Co., sends to *The London Times* an interesting report of the result of a five years’ experience of the eight-hour rule in his works. He says that at first the wage cost per ton went up, then dropped, and is now as low as it was in 1889, the last year of the twelve-hour day. In other words, the men get as much work done in eight hours as they used to get done in twelve. That this is not merely the result of a coincidental improvement in machinery or the methods of manufacture, is vouched for by the managers of the works, who have considered the point. Their opinion that, though the men work less hours, the efficiency of the work is not diminished, is supported by their report as to the improvement in greater regularity of attendance, increased application and improved health among them. The men used often to be irregular and drunken; these offenders are now rare. “The men come down to their shifts regularly, and they come sober.” In the long double shift at the end of each week, which is necessary for the work, the men used often to be found asleep. This does not occur under the new conditions. Lastly, the health of the men has much improved. “The improvement in the men’s looks, and especially in their gait when leaving the works at the end of the shift, is very marked.”

CHANGES IN CUT NAILS.

The cut nail manufacturers have made some reductions in the selling prices.

The base price, in the ordinary way, is unchanged at \$2.10 f.o.b., Hamilton, Toronto, Montreal and London.

They will deliver at \$2.10 in ten keg lots where the freight does not exceed 25c from any f.o.b. points. When a buyer takes 200 at a time he will get a reduction of 10c per keg instead of 5c as formerly; when he purchases 1,000 kegs during the year he will have a total rebate of 15c, against 10c hitherto, and on 5,000 kegs 20c, which is an extra inducement.

Merchants in Montreal, Toronto and Hamilton, will get an extra rebate of 5c per keg of the invoice price.

Manitoba and the Northwest Territories will be given a freight allowance of 25c. Maritime province figures will be found elsewhere.—Canadian Hardware Merchant.

ANTICIPATIONS BRIGHT.

Although low prices have prevailed during the past year, those engaged in the salmon canning industry look for an upward movement in the market and for more profitable results this season. It is probable that three or four new canneries will be completed in time for this season's operations which seem to show that, notwith-

standing all the talk about over production, those most directly concerned believe that the trade is capable of still further development.—B.C. News Advertiser.

FRAUDS IN WINE.

Trouble is in store for a Toronto man if investigation proves the report true that someone there is turning out an inferior brand of the Commendador port wine of Feuerheerd, Oporto, putting it up in identical bottles and employing the firm's labels. Information to this effect having been given, the Canadian agents of the Feuerheerds, J. M. Douglas & Co., Montreal, are taking steps to find out the facts and stop frauds. The wine is protected by Canadian registration.

PROTECTED.

Yes, the buyer makes no mistake in handling our goods, for every can is fully guaranteed; this makes the retailer solid and retains his customers, for we are told nothing is so annoying as losing customers by selling cheap and inferior goods. You can hold your trade by handling Boulter's famous "Lion" brand canned goods. Time has clearly shown that they have no equal. Factories: Picton, Toronto and Demorestville.

TRADE WITH GREAT BRITAIN.

THE CANADIAN GROCER had a chat a few days ago with a gentleman who has just returned from a two or three years' stay in Great Britain. THE CANADIAN GROCER is not authorized to give his name, but he is well qualified to speak on trade matters.

"We did well with hay for a while," he said, in reply to a query, "and are doing a little yet, but, and I am sorry to say it, Canadians killed the trade by their own dishonest practices."

"In what way?"

"O, by watering the bales to make them weigh heavier. Hay thus treated, of course, ferments. Canada's chief trade with Great Britain is, of course, in cheese. Into this very province of Ontario where we stand to day she sent last year \$10,000,000 for cheese. Next to cheese comes cattle, of which we are still sending a good few in spite of the embargo. And, let me tell you, that embargo will never be removed. We are sending a little oatmeal and a great deal of canned goods, but in wheat and flour there is little or nothing doing just now. The export trade in two-rowed barley is also dead, thanks to Canadians themselves. In spite of all protests to the contrary, they would persist in mixing other kinds with the two-rowed, and you know the result."

OUR NEW OFFICES.

THE CANADIAN GROCER is this week issued from new offices. The office of publication is now at 26 Front street west.

Ever since the inception of THE CANADIAN GROCER it has been the aim of its publishers to issue a trade journal attractive in its appearance, newsy and bright in its subject matter, and independent and just in its tone. We have hewed faithfully to these lines.

It is frequently said regarding individuals that their efforts are not appreciated in this life. As publishers of this journal, our experience is of the very opposite character.

The trade, both readers and advertisers, have and are appreciating our efforts. Our subscription list and advertising columns attest this.

And it is because of the demands of this ever-increasing recognition that our removal was necessitated.

With more extended arrangements for gathering news, with more commodious and larger offices, with faster presses and other improved appurtenances, the readers of THE CANADIAN GROCER may look for a better paper than ever before, and advertisers an even better medium for acquainting the trade with what they have to sell.

Call in and see us when you are in Toronto.

FREIGHT DISCRIMINATION.

Montreal refiners have a grievance against the railways. A case that occurred last week affords a good example.

A carload of sugar was wanted for Sudbury, Ont. The freight from Montreal was 40c. per 100 lbs., and from Halifax, more than double the distance, 45c.

But the discrimination against Montreal is even greater than appears at first. Re-

finers here have to pay 25c. per 100 lbs. on the raw sugar from Halifax to Montreal. This means they pay 65c. to deliver 100 lbs. at North-western Ontario points, against 45c. from Halifax.

Flour millers have an arrangement with the railways by which they get a through rate on wheat from Manitoba to the seaboard, with the privilege of grinding the wheat into flour in transit. Why should not sugar refiners have a similar favor? The circumstances are alike.

TEA IMPORT REGULATIONS.

THERE was a good deal of surprise and indignation last week among importers in Toronto who had brought tea in via United States ports.

The cause was a new regulation decreeing that importers bringing in tea via United States ports shall produce certificate showing that the tea had been entered at the entry port for prompt shipment.

The notice was unexpected, and as the importers had been in the habit of bringing in tea without this document, they naturally felt annoyed. Little or no inconvenience, however, was occasioned, as they were permitted to pass the tea on promising to produce the required certificate.

From enquiries made at the Custom House THE CANADIAN GROCER learns that the regulation, while new to Toronto, is not a new one in the country, other entry ports having had it in force for some time, and the Toronto authorities only found out that they were not following the custom through the receipt of a letter of enquiry. Then it was that it was decided to fall into line. The matter is not a law; it is merely a regulation.

As every one is aware, tea imported from the United States is subject to a duty of 10 per cent., it being otherwise free.

Probably ever since this duty was established there has been a violation of it, and in this way: Some importers, desiring to take advantage of both the United States and Canadian markets, would have a clause inserted in the bill of lading—or rather attached thereto—indicating that the consignment was not to be transhipped immediately. While this tea lay in bond salesmen would busy themselves, and the tea would be sold in the most advantageous market.

Obviously, if the tea was sold in Canada there was a violation of the tariff law.

It was to put a stop to such practices as this that the regulations in question were created. In Toronto the practice heretofore has been to take the date on the bill of lading as an evidence as to whether or not the tea was promptly shipped.

Toronto importers are not the victims of any special regulation, and, therefore, beyond feeling a little annoyed at the suddenness of the enforcement of the regulations, have no cause for complaint.

UNWISE INSURANCE MEN.

WHILE union breeds strength, sometimes strength breeds foolishness. The Fire Underwriters' Association is a strong institution. It decreeth and its slaves—the merchants and manufacturers—obey.

For many years life insurance companies doing business in Toronto have been making much money, because of the immunity of the city from large conflagrations.

On account of this the insured opined that rates ought to be lower, and the opinion was more than once ventured that Toronto—in fact large cities generally—was paying the losses incurred in the unprotected villages throughout the country. But be that as it may, Toronto was a profitable city for the insurance companies until the beginning of the present year. By the three large conflagrations of January and February the insurance companies lost heavily.

But epidemics of fire appear sometimes as well as epidemics of disease. And actuarial scientists are not ignorant of this fact.

Insurance men are, as a rule, accounted pretty level-headed fellows. But whatever they may be ordinarily, they have not shown themselves to be such during the last three months.

In spite of the strength which their combination—the Underwriters' Association—gives them, the three fires in question seem to have non-plussed them altogether.

Like an undisciplined army struck suddenly by a disciplined foe, they seem to have completely lost their heads. At any rate, they are acting as if such was the case.

They were justified in raising the rates until such time as improved fire appliances were provided, but it was poor policy, indeed, for them to still further increase the rates when part of the required appliances had been obtained and others were forthcoming.

But it was not in raising the rates that the insurance people went to the greatest length of their absurdity and arbitrary power.

They went to this in the way in which they cancelled, and are cancelling, policies. A manufacturer said the other day: "A fellow may have his place burned down to-night and find on opening his mail tomorrow morning that his insurance policy has been cancelled."

Of course, the law does not permit such breaches of faith as that. But this man's remark about shows what sort of faith commercial men have just now in the integrity of the insurance companies doing business in Toronto.

As a result of this THE CANADIAN GROCER knows of some large wholesale merchants who are not renewing policies

that are lapsing, while at least two, and both the largest of their kind in the city, have dropped all their policies in the companies as represented in the Underwriters' Association, and taken out risks in Chicago. We know of others who are following this particular firm's example.

This is to be regretted, for it means good Canadian money going out of the country to feed foreign corporations. But what else is to be expected? The end undoubtedly justifies the means.

It is, however, not since the fire that the insurance companies have exhibited all their insanity. THE CANADIAN GROCER is cognizant of instances where stocks were insured to as high as 100 per cent. above their value, while in one instance, at least, the policy holders were utter strangers both to Toronto and the insurance people. We have particular reference to the case of Schaffer & Rittenberg, who, on \$2,000 stock, carried \$5,000 insurance. It is no wonder that fires have occurred in some of these places.

Now the insurance companies, through the medium of the Underwriters' Association, are going to the other extreme. And where by one species of foolishness they lost money, by the other they are losing both customers and money. Well may their last state be termed worse than their first.

There is business in Toronto at the moment for a few good independent companies.

THAT GRIEVANCE OF BROKERS.

THE article which appeared in THE CANADIAN GROCER of two weeks ago, "A Grievance of Brokers" has been the subject of much discussion in sample rooms.

The brokers of course received the article with favor, and some of the wholesalers and their clerks acknowledged that there was good ground for its appearance. At the same time it was avowed that there was room for improvement in the methods of at least some of the brokers.

Brokers, it was claimed, did not get down early enough in the morning, while some of them brought their samples around too late in the evening, to the disapproval of the clerks in particular. Others, it is charged, play "Paul Pry," or even interfere when a brother broker is offering his goods.

This may be true enough. But that does not alter the grievance of the brokers regarding some wholesalers unnecessarily wasting their time.

The fact of the matter is that wholesalers should, as far as possible, have a certain specified time for seeing brokers and the goods they sell.

By this means there would be both an economising of their own time and that of the brokers as well.

A little room in the rear of the sample room, where teas and other lines could be inspected, would materially assist in the premises.

AUSTRALIAN ARROWROOT.

One of the appendices of the report of the Department of Agriculture deals with the Australian arrowroot submitted to grocers, druggists and analysts.

While all agree on its nutritious and excellent qualities, none hold out any hope of its being successfully introduced into the Canadian market, although one firm did think it might be, provided it sold at a lower figure than the Bermuda article.

The analysts specified the arrowroot as the "ton les mois" of commerce, or "Canna" arrowroot, which was "sold years ago at a pretty high price, but which is now hardly known." The analyst here quoted also declared that "the microscope showed the substance is really not arrowroot."

It is said that the consumption of arrowroot in Canada is not more than half a ton annually, and that the quantity sold is gradually growing less.

Arrowroot seems to be one thing that Canada will not take from Australia.

R. H. RAMSAY & SON FAILURE.

THE failure of R. H. Ramsay & Son, the insolvent Toronto commission merchants, conveys another lesson to business men of all kinds, of the danger that is involved in investing money in speculations outside the particular line of trade in which they are engaged.

The senior member of the firm was in business 30 years, during which time he worked up a successful trade, and besides making money, made for himself a good reputation for upright dealing.

Up to the time of the failure of the firm it was rated at from ten to twenty thousand, and its credit was classified as "good."

In the face, however, of the recent statement, which makes a poor showing for the creditors, it is obvious that the rating was not even approximately correct, although it probably was at one time.

The downfall of R. H. Ramsay & Son can be traced back to the real estate boom in Toronto, when they began to draw on their capital for investment in land.

Since then the firm has been gradually getting into deeper water, the final result being the present assignment.

To those having close connection with the firm, it has been for some little time known that it was in a bad condition, but no one seems to have realized that it was as bad as it really turned out to be. At present there is practically nothing in sight for the creditors.

The book debts, fixtures and stock have been purchased from the assignee for be-

tween \$1,100 and \$1,200, but of this sum about one-half will have to go to pay preferred claims; and assignee's fees and expenses, leaving about \$500 to liquidate ordinary liabilities of over \$21,000. Frederick E. Ramsay, the 19-year-old son of the senior member of the firm, was the purchaser of the stock, etc.

The senior member of the firm held \$3,700 worth of Imperial Bank shares, all of which was hypothecated for a special loan. The Imperial Bank also has a preferred claim of \$7,000 against the firm, security for which it holds in the shape of warehouse receipts.

Some of these warehouse receipts are for goods such as butter, etc., which were consigned to R. H. Ramsay & Son, and consequently were not the property of the firm, but of the country merchants who consigned them. It is in this particular that the firm's action is accounted questionable.

This is another illustration of what a man, hitherto of high integrity, will sometimes do to worm himself out of a tight corner.

There is some real estate held by the individual members of the firm, but this has not yet been assigned. The creditors are not likely to be benefitted much if this property is ultimately thrown in with the other assets, it being, we understand, mortgaged up to its full value.

NO SAFETY IN ORDINARY MILK.

ALL recent scientific researches point to great danger in consuming ordinary milk from the cow. The presence of tuberculosis in cows is now universally admitted, and tuberculosis or consumption, is the most fatal and incurable disease which afflicts the human race to-day. The milk of a tuberculous animal cannot be trusted, and the difficulty of discovering when the animal is diseased is great. The cow may look perfectly healthy, but only in rare cases can a proper examination be made. Such reports as the following from San Francisco a few days ago are often seen in the newspapers:

"Every cow of a herd of eleven at the State University dairy, on the outskirts of the city, has been condemned by the inspector of the Board of Health, who has ordered the animals slaughtered on account of tuberculosis. All the cows have the disease in an advanced stage, and the proprietor admitted he had been serving customers with milk, although he knew the cows were diseased. The authorities will probably arrest him on a criminal charge."

Here is a typical instance of diseased cows supplying milk to unsuspecting consumers. A dairy, under semi-official control, was actually spreading disease until checked by inspection. No doubt the proprietor was not wilfully culpable. Likely the signs of disease were not perceptible. How many consumers of milk know whether the cow which is supplying them is healthy? In fact, how can the owner of cows feel sure of their condition? The best medical opinion pronounces in favor of boiling and otherwise treating the milk before it is used.

Condensed milk is sterilized with steam, killing all disease germs. The day is at hand when condensed milk in some shape or form must take the place of the ordinary article, especially for infants, now so recklessly and dangerously used. Dealers should point out the advantages of condensed milk. It means increased trade for them.

OUR BUTTER IN ENGLAND.

IF creamery butter makers had availed themselves as freely as they might of the 20c. per pound offer made by the Dominion Government, the Federal authorities would hardly have found their venture a profitable one. This is shown clearly by advices to Montreal butter dealers which came to hand last week from Manchester, to which market some shipments of winter creamery were made.

The top price realized on these shipments was 90s., and at this basis a butter exporter would have to buy butter at 17½c. at least, or at the very outside 17¾c. in Montreal, if he wanted to make any money, for 90s. is about equivalent to 18c. per pound, which would allow him just ¼c. per pound margin.

With local dealers readily according 21½ to 22c. at present for fine winter creamery, and the market well cleaned up at that, the case is an obvious one in a business sense against the 20c. per pound idea. The best evidence of it lies in the fact that very few butter makers availed themselves of the offer, naturally preferring the higher prices which could be realized on home account.

This is just what THE CANADIAN GROCER predicted would happen, for, as far as can be learned, not over 300 packages of winter creamery of private make has been exported. The Government dairy stations, however, have sent forward several good sized parcels, and it was some of these which sold in Manchester at 90s. as above mentioned. But though the Government idea may have been impractical in a business sense, it must be admitted that by stiffening up the local market it has enabled the farmers to obtain fully 2c. per pound more for their winter creamery. Besides, there is another point to be argued in its favor.

The British advices above referred to state that the quality of the creamery which sold at 90s. created a favorable impression on the Manchester market, and that there was an opening for a great deal more of the same quality.

If this means that a section of the British butter trade is convinced that Canada can make a fine fresh, unsalty butter, something has been gained, even if the Government has lost a few cents per pound.

It must be understood, however, that a few isolated shipments will not be sufficient to demonstrate this clearly. The ice has

merely been broken, and now the hole will have to be widened, so that it will include all the British markets. It may take long and tedious effort to do this, and at a narrow margin, but a market that consumes twenty-five millions worth of foreign butter every year is certainly worth the trouble.

The Government will have to see that the necessary cold storage of the most ample kind is provided. It is not the winter creamery that we want to land fresh and solid on English shores, but the heavy make of summer and fall goods which this spring is growing "stronger and stronger" in our cold storage warehouses.

All sections of the trade will have to use concerted efforts to educate the British consumer into the idea that Canadian creamery is as fine as any on earth.

Our butter makers know pretty well by this time what the former want, viz., a fine, fresh, unsalty butter. Therefore they cannot hold it for over a month after it is ready for the market, because they think prices are going higher, and then expect that it will compete with other butter which is landed fresh in England.

No; in the first place the makers will have to sell at the market price. This will go a long way to ensuring prompt shipment. The speculative dealers also, who have been quite as much to blame for storing and holding butter, will have to adopt a different tack. They have got such a "jacketing" this year on their speculation, having in the majority of instances lost over \$3 per tub, that it is to be hoped the severe lesson will do them good. Then the cold storage facilities, both on this side, in transport by sea and rail, and on the other side, have to be provided for, and the task is almost accomplished.

It is no doubt a pretty big contract, but all sections of the trade appear to be so fully alive to the importance of the matter, that we may reasonably expect to have a different story to tell in the fall of 1895, than in the fall of 1894.

IMPORTANT TO EXPORTERS.

Mr. J. S. Larke, commercial agent in Australasia, has forwarded the Department of Trade and Commerce a caution to Canadian exporters. He states that in Fiji, as in all the Australian colonies, amounts ranging from 5 per cent. in Fiji to 10 per cent. in New South Wales are added to the invoiced value of goods when they are appraised for customs, to cover the cost of freight. Consequently, when goods are sold to be delivered at the ships' side, the invoice must be made out at the cost in Canada, otherwise the importers will have to pay duty twice on the value of freight, insurance, etc. Where packages are shipped, the actual weight should be invoiced, and not the reputed weight, for specific duties are always levied upon reputed weight, when it is greater than actual weight.

MONEY AND STOCKS.

CANADIAN Pacific has been gathering strength during the past week on reports of shorts covering their sales.

* * *

There is very little change in bank stocks, but what tendency there is is toward slightly increased values.

* * *

The local money market continues to evince a hardening tendency, although 4 per cent. is still the ruling figure for call loans.

* * *

Municipal bonds are still being sought by investors. "With the hardening tendency of money," remarked a broker to me, "there will naturally be less anxiety to secure municipal bonds, while some of those who are already holding this kind of investment will be inclined to sell out in order to secure the money for re-investment."

* * *

The vacancy in the management of the Dominion Bank, caused by the death of Mr. R. H. Bethune, has not yet been filled. There are a great many men named as Mr. Bethune's successor, some of whom can be termed outsiders—that is, men who are holding responsible positions in other financial institutions. I was unable to obtain the names of these applicants. "One, however," said a well-known financial man, "is from the Bank of Commerce, and another from the Bank of Toronto. That will be hint enough."

* * *

The little flutter in fire insurance stocks is over. "People were talking about the good investment these stocks afforded, and the daily papers were urging those with money to take them up," remarked a broker; "but I cannot see where the good investment comes in. On account of a big fire this stock is liable any day to recede 10 or 20 per cent., while shareholders are liable for a call of equal to 50 per cent. of their stock should the company be unable to meet its liabilities in the ordinary way. With all such risks as these I want something more than 6 per cent. dividends to induce me to invest in fire insurance stocks."

* * *

The earnings of the Toronto Railway Co. for March were \$69,900.63, as compared with \$72,826.59 during March, 1894, showing a decrease of \$2,925.96. There was one less working day in March, 1895, than in March, 1894, but as an average day's earnings is \$2,700, the earnings are rather less, day for day, than in March of last year. The statement has weakened the stock on the local Stock Exchange.

ARGUROS.

NEEDY MEN IN PARLIAMENT.

THE editor of THE CANADIAN GROCER was approached the other day by a member of Parliament for the loan of a few dollars. This M.P. is quite a prominent man, and has been spoken of for a Cabinet position. He will borrow small sums from friends and acquaintances, and occasionally returns the money. He is only one of a number of men in Parliament who are chronically hard up, and to whom the sessional indemnity is a godsend.

Sending impecunious men to Parliament is a bad practice, because, no matter how independent and honest a man desires to be, his necessities drive him to be an abject follower of his party leaders, while, if those leaders are in power and form the Government of the day, he becomes a mere voting-machine. He is forced to look forward to an office as the reward of party service, and a Government can do almost anything, when supported by members of the needy variety. This sort of representative is responsible for a larger share of the evils of party government than most people know.

Members of Parliament should be chosen from among persons possessed of sufficient substance to be free from the necessities of having to shape their course in Parliament so as to pay their accounts. How many M.P.'s get advances on their sessional allowance as soon as Parliament opens, and

stave off creditors by their privilege of membership? If the financial condition of every M.P. were laid bare the country would be amazed and disgusted.

GROCERS' GRIEVANCES.

EDITOR GROCER,—Your valuable paper is very much appreciated by me, and I hope it may long continue in existence and grow each year, having more leaves and bearing more fruit to the good of the grocery trade, which is going through a very fiery ordeal at present, owing to pedlars, patrons of "injury," and departmental stores.

Every town and city has its own troubles. Our trouble here is in grocers drawing the sword against each other. It's who can exist on the smallest profits. I am told that one firm sells flour at a profit of 5c. per cwt., and also that they live on the stuff that is about to spoil in their store. Verily they shall have their reward.

A great many grocers here are noted for cutting down their own salaries by selling cheap, and going around their respective stores like bears with sore ears, grumbling about hard times and wishing some blasting furnace for making pig iron would start up to make times better.

How are the twins getting along? I mean Mocha and Java. I suppose the end is not yet, for I dreamt that E. B. was determined to crush Pure Gold. However, "Retailer" was a little too hard on both. I

have run off several cases of Pure Gold coffee, in lb. pails, and have heard nothing but praise of the contents, and for a good, pure article I recommend Todhunter & Mitchell's "Excelsior" blend; there is no better. I have found that most of the houses that advertise in your paper mean business and are reliable.

ANOTHER RETAILER.

Barrie, March, 1895.

PROJECTING SIGNS MUST GO.

A committee of the Ottawa City Council have unanimously recommended the passage of a by-law to force the removal of all projecting signs. The owners will be given ten days to effect removal, but if they fail to act the signs will be taken down by the corporation at the owner's expense. This is drastic legislation if the Council ever adopts it.

There are two sides to the sign question as well as to the signs. Some project dangerously, look badly, and spoil the appearance of a street. Others are modest in size, neat in form, and are a real convenience to the business and buying public. Why wipe out all when the real offenders are the bulky ones? There are high shops and warehouses where a projecting sign of suitable dimensions is an advantage.

If kept within bound signs are not wholly an evil, and the mistake of the Ottawa proposal is in going too far.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, April 4, 1895.

GROCERIES.

NOTHING materially new has developed in trade during the week. The volume of business is, if anything, lighter than a week ago, but still the houses are fairly well employed. What little feature there is about the market is principally in sugar, for which the refineries are trying to get a little higher prices. Trade in sugar is moderate only. There are still a good many canned vegetables moving, but there is not the same activity that obtained a week or two ago. Coffees are in fair demand, with stocks light. There is a fair movement in syrups. Demand continues firm for prunes at firm figures. Foreign dried fruits generally are in fair demand. There is a little more enquiry for teas than there was.

CANNED GOODS.

Trade is scarcely as brisk in tomatoes, peas and corn as it was last week, but there is still a moderate movement. Salmon is in moderate demand. Stocks of sockeye are getting low on this market, some houses appearing to be completely cleaned out. Horseshoe particularly is likely to be scarce. In consequence of this condition of affairs higher prices are looked for. No new season's pack has been offered on this market yet, which is unusual. We quote: Tomatoes, 87½ to 90c. for choice and 85c. for inferior and old stock; corn, 90 to 95c. for choice and 87½c. for common; peas, 82½ to 87½c. for ordinary and \$1.40 for fancy; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.10 to \$2.25, and preserved

fancy quarters at \$1.35 to \$1.40; salmon, \$1.45 to \$1.50 for good red fish in tall tins, and \$1.60 to \$1.65 in flat tins; do., second quality, \$1.15 to \$1.25; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

There is some demand for green Rio coffee, but it does not amount to much. Good grades are still difficult to get. Local stocks are almost here. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 21½ to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

There is just the usual moderate trade doing. We quote as before: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5½c.; imported Japan, 5¼ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Trade is quiet and featureless. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Business continues dull at unchanged prices. We quote: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

Firmness is the principal characteristic of the sugar market. The refiners are trying to get a little higher prices, but they

appear to have a good deal of difficulty in getting wholesalers up to their views. The wholesalers do not, however, feel as disposed to cut prices as they have done. For No. 1 granulated \$3.45 to \$3.50 per 100 lbs. are the ruling figures, although there are still some disposed to accept lower figures. The refiners are now asking 3¾c. per lb., and they do not appear to have any yellows under 2½c. There is an occasional carload moving, demand being nearly altogether for small lots, the trade being pretty well supplied. It is, evidently, this fact that is keeping prices down at the moment. Further purchases of raws have been made in New York this week on Canadian account. In fact, most of the raws purchased there appear to have been for this country. We quote: Granulated—domestic, \$3.40 to \$3.50; do., No. 2, 3¼ to 3 30c.; yellows, 2½ to 3¾c. Raw—Demerara, dark, 2¾c.; golden, 3 to 3¼c.; bright, 3½c.

SYRUPS.

There are a few bright and dark syrups selling, but that is about all, trade being quieter this spring than usual. We quote: Dark, 25c.; medium, 28 to 30c.; bright, 35 to 40c.; very bright, 45 to 50c.

MOLASSES.

Just an odd package, mostly New Orleans, at 30 to 35c. is going out. We quote as follows: New Orleans, barrels, 26 to 28c.; half-barrels, 30½ to 32c.; Barbadoes, barrels, 28 to 32c.; half-barrels, 30 to 34c.

TEA.

Indian and Ceylon teas are meeting with much more enquiry. A good many sales have been made this week on London sample of teas of very good liquor at from 10d. to 1s. per lb. There is not much disposition to look at fine teas at the latter figure. There is a little more enquiry from jobbers for Japan teas and China greens, although there are not many going out. Wholesalers report a fair movement in

MARKETS.—Continued

medium and low grade Japan teas, and the same may be said of Young Hysons at about 30 to 45c. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

Mail advices from London, under date of March 22, state that the low price ruling for good liquoring teas over 8d. or 9d. per lb. has tempted buyers to operate in them with more confidence. On the other hand, teas of poorer quality have continued to show weakness, as the ships lately arriving have brought such kinds in large quantities. Regarding Ceylon teas the advices say: "Though the average price for the week remains unaltered, yet the market must be quoted easier, as in the majority of instances quality showed an improvement. Taking this improved quality into consideration, the market for tea over 8d. per lb. is as cheap, or cheaper, than it has ever been."

DRIED FRUIT.

There are a good many cheap Valencia raisins moving, but otherwise there is not much doing. Selected fruit is scarce and firm and higher prices are looked for. We quote: Off-stalk, $3\frac{1}{4}$ to $3\frac{3}{4}$ c.; fine off-stalk, 4 to $4\frac{1}{4}$ c.; selected, $5\frac{1}{2}$ to 6c.; layers, $5\frac{1}{2}$ to 6c.

Sultana raisins are quiet and firm. Stocks held here are lighter than for several years past at this time, and no fresh shipments are likely to be brought in direct. Ruling prices are 6 to 7c.

Prunes continue in good demand. French prunes are higher in the primary markets, but there will be no more brought on here. Some dealers appear to be caught short on Bosnia prunes. We quote: "Sphinx"—"U," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "C," 85 to 90 to half kilo, $6\frac{1}{2}$ c. per lb.; "B," 80 to 85 to half kilo, 7 to $7\frac{1}{2}$ c. per lb. "Atlas"—"D," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "Unicorn," 5 to $5\frac{1}{2}$ c. Bordeaux prunes, $4\frac{1}{2}$ to $6\frac{1}{2}$ c.

In currants, there is a good demand for fine fruit, but poor fruit is not much wanted. We quote: Filiatras, half-barrels, 4 to $4\frac{1}{2}$ c., barrels, $4\frac{1}{4}$ c.; fine Filiatras, half-barrels, $4\frac{3}{4}$ c., barrels, $4\frac{3}{8}$ c.; Patras, $5\frac{1}{2}$ c., in cases; Casalinas, $5\frac{1}{2}$ to 6c.; Vostizzas, $6\frac{1}{2}$ to 7c. in cases and half cases.

An occasional box only of dates is going out; $4\frac{1}{2}$ c. is the ruling price.

Figs are dull and nominally unchanged. We quote nominally: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; naturals, 6 to 7c.

California evaporated fruits are still going out well. We quote according to quality:

Peaches, $10\frac{1}{2}$ to 13c.; apricots, $10\frac{1}{2}$ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

BUTTER AND CHEESE.

As indicated in a special article in another column, the butter market is flooded with fall and summer makes, and as a result even choice butter does not bring its proper value. The inferior grades will have to be sacrificed yet to relieve the situation. We quote: Summer dairy and store packed—Choice, 10 to 13c.; low grade baking butter, 7 to 9c.; fresh large rolls, 13 to 15c.; pound prints, 16 to 17c. Summer creamery, 12 to 15c. Winter creamery—Tubs, 20 to 21c.; pound prints, 21 to 22c. August and September makes of Canadian cheese bring 8 to $10\frac{1}{2}$ c., and new Canadian cheese is quoted at 11c. Small Stilltons bring 12 to $12\frac{1}{2}$ c.

GREEN FRUIT.

Trade is reported improving in all lines of green fruits. Since the beginning of the more favorable weather the country has begun to open up, so that direct and prompt shipments by freight are possible; consequently country dealers are taking more goods than they did when the roads were so bad that it was not safe to have their orders sent them otherwise than through the expensive express companies. Lemons are firmer, and apples are bringing good figures. Prices are unchanged. We quote: Lemons—Messinas, \$2.75 to \$3.50. Oranges—Valencias, small crate, \$4.25 to \$4.50, and Jumbo crates, \$5.25 to \$5.50; Messinas, \$2.75 to \$3; California seedlings, \$3 to \$3.75; California navels, \$3.50 to \$4. Bananas, \$1.50 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$3.50 per bbl.; common fruit, \$1.75 to \$2. Grapes—Malagas, \$5 to \$6.50 per keg. California dried fruit—Apricots, $12\frac{1}{2}$ c.; peaches, 13 to $13\frac{1}{2}$ c.

COUNTRY PRODUCE.

BEANS—Not very plentiful, with advancing prices. Choice hand-picked bring \$1.50 to \$1.60, and medium grades \$1.15.

DRIED APPLES—For export are bringing 6 to $6\frac{1}{4}$ c. a lb.

EVAPORATED APPLES—In 50-lb. boxes: 7 to $7\frac{1}{4}$ c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4.

HONEY—We quote: Strained, in bulk, 7 to 9c.; comb, 14c. for clover and 10c. for buckwheat.

POTATOES—The large and increasing export demand keeps the prices of potatoes firm. We quote: 58 to 60c. on the track and 65c. out of store.

POULTRY—Scarce on a firm market. Turkeys bring 12c., geese 7 to 8c., chickens 30 to 75c., ducks 50 to 90c.

EGGS—The receipts are very large, and as a result prices have gone down. Fresh eggs are selling at from 12 to $12\frac{1}{2}$ c. a dozen

at date of writing, and dealers are looking for still lower prices.

FISH AND OYSTERS.

Dealers say that trade continues disappointingly quiet for the Lenten season, but speak as though confident of winding up the period of fasting with a great run of business the coming week. Prices are unchanged. We quote as follows: Salmon trout (frozen), $6\frac{1}{2}$ to 7c.; white fish (frozen), $6\frac{1}{2}$ to 7c.; No. 2 white fish, 4c.; skinned and boned codfish, $6\frac{1}{2}$ c.; boneless fish, $3\frac{1}{2}$ to 4c.; market cod, 3 to 5c.; steak cod, 6 to $6\frac{1}{2}$ c.; haddock, 4 to $4\frac{1}{2}$ c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; sea herring (frozen), \$1.25 per 100 fish; blue pickerel, 4 to 5c. lb.; yellow ditto, 6c. per lb.; mackerel, 14c. each; pike, 3 to 4c. lb.; cod, 6c. per lb.; flitch cod, 5c.; finnan haddies, 6 to 7c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; Vancouver halibut, 6 to 7c.; large halibut, 10 to 13c. Oysters, \$1.20 per gallon for standards and \$1.50 for selects.

PROVISIONS AND DRESSED HOGS.

Owing to the increase in the price of live and dressed hogs, all hog products have made a decided advance, and the prospects are that they will go still higher. Notwithstanding advanced prices a good trade is being done in all lines. We quote prices:

DRESSED HOGS—\$5.90 to \$6.10 per 100 lbs.

BACON—Long clear, $7\frac{1}{2}$ c. for carload lots, $7\frac{3}{4}$ to 8c. for ton and small lots; breakfast bacon, $10\frac{1}{2}$ c. to 11c.; rolls, 8c.

HAMS—Large, 22 lbs. and over, $9\frac{1}{2}$ c. to 10c.; medium, 15 to 20 lbs., $10\frac{1}{2}$ to 11c.; small hams, $10\frac{1}{2}$ to 11c.; pickled, 9 to 10c.

LARD—Pure Canadian, tierces, $8\frac{1}{2}$ c.; tubs, $8\frac{3}{4}$ c.; pails, 9c.

BARREL PORK—Canadian heavy mess, \$15.50; Canadian short-cut, \$16; clear shoulder mess, \$13.50 to \$14; shoulder mess, \$13 to \$13.50.

SALT.

Trade the past week has been comparatively slow. Prices are unchanged. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

FLOUR AND FEED.

WHEAT—Is still rising rapidly. We quote: White, 70c.; red, 68c.; goose, 62c. per bush.

OATS—Have weakened the past few days and few sales have been made. We quote: 41 to 42c.

BARLEY—No change in market. We quote: 49c.

FLOUR—The market is fairly active. Prices are stationary. We quote: Ontario

The Best of Everything

CLEMES BROS. - TORONTO

straight roller, \$2.65 to \$2.75; Manitoba, \$3.60 to \$3.65; patents, \$3.75 to \$3.90.

BREAKFAST FOODS—The weakening of oats has not yet affected the price of oat-meals, and other foods remain firm at unaltered figures. We quote: Standard oat-meal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; cornmeal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SEEDS.

The Canadian crop of seeds is practically marketed, and the prices quoted here now are those at which the big jobbers are selling to outside dealers in small lots. Prices, except in red clover, are practically unchanged. Alsike is quoted thus by jobbers: Prime to choice, \$4.80 to \$5; really fancy, \$5 to \$6.60; and lower grades \$4.

There is in the Western States a freer feeling in red clover, and prices have gone down a little. Good clover now brings \$6.20 to \$6.50.

In timothy, the jobbing prices to the trade are \$3 to \$3.50 for prime to choice grades of machine-threshed seed, and a little more for the bright unhulled article.

HIDES, SKINS, WOOL AND TALLOW.

HIDES—Are scarce at prices unchanged since the advance noted in these columns last week. We quote: 5¼ to 6c. for cured, and for green No. 1, 5c.; No. 2, 4c., and No. 3, 3c.

SHEEPSKINS—Good stock is quoted at 85 to 90c.

CALFSKINS—Are a little more plentiful, but prices remain steady at 6c. for No. 1 and 4c. for No. 2.

TALLOW—Is still rather quiet. Jobbers quote 5 to 5¼c. and sell at 5¼c.

WOOL—Canadian fleece is quoted nominally at 19 to 20c., there being none on the market. In pulled wools best supers are quoted at 19 to 21c., and extras at 21 to 22c.

PETROLEUM.

Crude oil is still firm, and the refined article is of course, sympathetic. Prices are unchanged. We quote in 5 to 10 bbl. lots, imperial gallon Toronto: Canadian, 12¼c.; carbon safety, 15 to 16c.; Canadian water white, 16 to 17c.; American water white, 18c.; photogene, 20c.

MARKET NOTES.

Davidson & Hay are said to be offering a snap in bluing.

Smith & Keighley report that they are making cut prices in Malaga raisins.

Davidson & Hay are offering "Coral Brand" lobsters in flat cans.

Hannah & Co., Toronto, want all the potatoes they can get for export.

H. P. Eckardt & Co. are offering "Crown" brand fruit jars, one dozen in case.

The Pure Gold Manufacturing Co.'s sales for March exceeded those for the corresponding month for some years. "The

MOTT'S

month opened up slow," said a member of the firm, "but it picked up wonderfully well toward the latter part."

A direct shipment of prunes in cases is to hand with Davidson & Hay this week.

Warren Bros. & Boomer, have a lot of choice currants, "Imperial" brand, arriving.

James Turner & Co. report arrival of another consignment of Marshall's canned fish.

A fair movement in the better grades of Young Hysons is reported by Perkins, Ince & Co.

Perkins, Ince & Co., are offering a special line of Arquimbau's off-stalk Valencia raisins.

W. H. Gillard & Co. report a ready sale for "Unicorn" prunes, which they handle largely.

D. Gunn, Flavell & Co. report liberal sales of their Maple Leaf brand of hams, bacon, etc.

Dawson & Co., Toronto, are just in receipt of an extra fine line of Washington navel oranges.

H. P. Eckardt & Co. are offering what is said to be a fine line of Bosnia prunes in barrels at 3½c.

A line of lobster that will retail at 10c. per box, is what Warren Bros. & Boomer are offering to the trade.

The Pure Gold Manufacturing Co. are putting their icings on the market in a new and more attractive package.

W. H. Gillard & Co. have received numerous orders for their "Seville" orange marmalade from the Northwest.

Hannah & Co. are loading three cars of potatoes for Cincinnati and further large quantities for various western points.

Clemes Bros., Toronto, have just received a car of "Golden Apple" brand California navel oranges; also two carloads of bananas.

The Berlin Brush Works offered for sale in the Globe, is not the Berlin Brush Co., which is as busy as ever, still working overtime.

In Japan teas, at 16 to 17c., Lucas, Steele & Bristol are said to be offering excellent values. Buyers can secure samples on application.

The Eby, Blain Co. have to hand a shipment of Batcher's marmalade in 1-lb. glass jars, which they are said to be offering at low figures.

"Jams put up in 7-lb. pails, six pails in a crate, are finding a ready sale with us, and their superior quality brings many repeat orders," say W. H. Gillard & Co.

"L., P. & Co.'s blends of coffee are giving everyone satisfaction," report Lucas, Steele & Bristol, the sellers, who will gladly furnish samples.

The Eby, Blain Co. report that sales of crushed coffee are still keeping up well.

They also report a good demand for Gillard's London Relish.

Todhunter, Mitchell & Co., Toronto, are still offering their brand of whole roasted or fine ground West India coffee at the remarkably low figure of 20c. a pound.

D. Gunn, Flavell & Co., Toronto, have received a shipment of cheese from the Ontario Agricultural College, packed two in a box, all fresh made and very choice goods.

Mr. John Mouat, Northwest representative for W. H. Gillard & Co., states that his sales of their blend "Imperial" are away ahead of former years, which attests the merit of that article.

C. Wilson & Son, of the Toronto Scales Works, have received notice that they will receive their gold medal and diploma about 1st June, being the highest award for scales at the World's Fair, Chicago.

Mr. Bingeman, of the Berlin Brush Co., has received his American patent on the "Anchor Fastener" for fastening fibre, rice root, etc., into solid-back brushes. European patents are also applied for.

W. H. Gillard & Co. have been selling large quantities of Dixon's Carburet of Iron Stove Polish, of which they are the wholesale agents. Customers say: "It delights everybody; its results are perfect."

James Turner & Co. report a run on prunes, owing to firmer advices from foreign markets, "but having a large and well-assorted stock," they write, "we are prepared to fill a limited number of orders without making full advance."

R. Simpson, of the big departmental store, has placed another order for eight fancy grocer scales with C. Wilson & Son, Toronto. He ordered eight just a few days before the fire from the same firm, which were all consumed.

T. B. Escott & Co. are offering the trade this year what is termed a superior Japan tea under the brand "White Bear." It is packed exclusively for T. B. Escott & Co.'s trade. The trade report a good many repeat orders for "Grand Mogul" tea.

The Toronto Salt Works report the sale of four cars of lump rock salt during March. They find the demand for this salt to be increasing among the farmers and stock men for use in salting stock. Country dealers will find it a good seller in the spring.

The Steele, Briggs, Marcon Seed Co., Ltd., Toronto, to whom THE CANADIAN GROCER is largely indebted for the information furnished in its weekly seed market reports, announce that the Canadian crop is now almost entirely bought in.

The Pure Gold Mfg. Co. are putting a new package of mustard on the market. The package is most attractive. It is called the "School Children's Lunch Box," and holds one pound of mustard. It is handsomely japanned, and across the cover is

the word "Lunch." The box is designed for carrying lunch after the mustard has been used.

The Canadian Pacific, Grand Trunk and Intercolonial lines of railway reduced freights on all classes of merchandise on Monday. The reduction is the ordinary one at this time of the year, to compete with the forthcoming canal traffic.

Dawson & Co., Toronto, are doing quite a large spring business in apples. This week they shipped four cars of fine winter apples to England. They will place two carloads on the Toronto market next week and make another large shipment to Europe.

The continued advance in the rate on silver is having a beneficial effect on several lines of East India products of staple groceries. Some grades of coffee, foreign rice, nearly all spices, and teas are strengthened, and coming in conjunction with an improving tendency in business, gives the markets strong tone.—N. Y. Journal of Commerce.

Some private advices are coming in from Japan of quite a contradictory character. Many by implication or direct claim carry an idea that prices on teas will be much higher than last season, but others suggest about an average crop, and without evidence of advance, except possibly to the extent of additional firing charges decided upon some time ago, and to which we then called attention. The latter view is generally entertained by conservative operators here, although it is assumed that Japan and China crops will all be late in reaching market.—N. Y. Journal of Commerce.

MONTREAL MARKETS.

MONTREAL April 4, 1895.

GROCERIES.

THE grocery market does not furnish anything strikingly new this week.

The bad condition of the roads has interfered to some extent with the movement to adjacent sections, but taken on the whole a fairly good trade is to note. Prices, with a few minor exceptions, rule firm, and the indications do not point to a decline in any leading line. There is some anxiety among the trade here as to what will be done at the coming session of Parliament, for the trade feel that if any increased revenue is required sugar and tea will be the lines that will be most susceptible to taxation.

SUGAR.

The sugar market exhibits a fair degree of activity for the season, both from first and second hands. The tone is steady and prices are maintained all round as last quoted. Advices on the raw article continue firm, and this is having its effect, while there is some uncertainty regarding what will be done at Ottawa during the coming session that exerts an influence in the same direction. There has been a fair movement

MONTREAL MARKETS.—Continued.

of granulated from refiners' hands at 3 5-16 to 3 3-4 c., according to quantity, while there is quite a free movement of yellows at 2 1-2 to 3 c., as to quality at the factory. The movement in a jobbing way is rather quiet, the bad country roads in many sections checking trade in this particular. We quote jobbing prices: Standard granulated, 3 3-4 c., and yellows, 2 1-2 to 3 1-4 c., as to quality.

SYRUPS.

Demand for syrups is not as brisk as it was, business ruling rather quiet, as buyers have supplied their wants for some time ahead. Prices, however, are steady at 1 1-2 to 2 1-4 c., as to quality and quantity.

MOLASSES.

No important change is to note in the molasses market. A good consumptive demand is experienced from stocks in store, while there has been a fair enquiry for new crop Barbadoes also. We quote round lots to arrive, 28 to 30 c., and spot quotations, 28 1-2 to 31 1-4 c., as to quality. The jobbing basis is unchanged, at 32 1-2 c., in hogsheads, and 36 c. in barrels and half-barrels. Sales of Porto Rico are also reported this week at 29 c. for some small lots.

RICE.

A good trade has been done in rice for the season, small lots moving out with a fair degree of freedom. We quote: Japan, standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

There is no change in spices, which rule steady, with a fair business doing. We quote: Penang black pepper, 9 c.; white pepper, 11 to 15 c.; cloves, 9 to 20 c.; cassia, 9 to 20 c.; nutmegs, 40 to 90 c.; and Jamaica ginger, 18 to 25 c., according to grade.

COFFEES.

This market is firmer, but business rules quiet, a few small sales of Maracaibo and Rio at steady prices being the only transactions of importance. We quote for green coffee in bags: Maracaibo, 20 1-2 to 22 c.; Rio, 18 1-2 to 20 c.; Java, 25 to 30 c.; Jamaica, 20 to 23 c.; and Mocha, 29 to 34 c.

TEA.

The tea market is quiet and steady, the only business of any magnitude being in a few small lots of Japans on the basis of 15 1-2 to 17 c., and some Congous at 14 c. The tone however is steady, and no easiness is looked for by holders, who are calmly awaiting the demand. We quote: Japans, low grades, 11 to 14 c.; medium, 15 to 17 c.; fine, 18 1-2 to 24 c.; and choice, 25 to 31 c.

DRIED FRUIT.

In raisins what little enquiry or activity there is seems to be centred around California fruit, and some further fair sized lots have been placed with jobbing houses here this week on the basis of \$4.60 in bond laid down here. Advices from the coast on these fruits continue firm, and we quote

75 YONGE ST., TORONTO

MONTREAL MARKETS—Continued

prices steady at 6¾ to 7c. for 4-crown loose Muscatels, and 5½ for 3-crown do.

Some enquiry is to note regarding Valencia stock, but it has not resulted in any important business, stocks of these fruits being in small compass and firmly held. We quote off-stalk 3¾ to 4½c., and layers 50c., in a jobbing way.

Nothing new is to be said regarding Sultanias. Trade is confined to a small jobbing demand at 5½c. for fine and 7c. for choice.

Advices on currants continue firm, but there is little or no activity to note here. The tone is steady and prices are well maintained, as last noted, viz.: Filiatras and Provincials 4 to 4½c., in cases, Patinas 5 to 5½c., and Vostizzas 7 to 7½c.

There is no change in prunes. Demand is fair and prices steady, as follows: Bordeaux 4 to 4½c., Bosnias 4½ to 5c., and California 7 to 9c.

Figs are quiet and unchanged at 10 to 12c. per lb. in boxes, as to brand. Dates rule dull and heavy, and prices are ½c. lower at 3½ to 4c.

The firm feeling in dried apples is unchanged, though there is no great activity to note.

CANNED GOODS.

There is a rather better feeling in canned goods, though no special feature is to note. Still a fair degree of activity is to note in staple lines of vegetables, peas and corn selling fairly well in this connection. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.10 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 95c. to \$1 per doz.; marrowfat peas, 90c. to \$1 per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green Gages, \$2 to \$2.25; blue plums or Damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, 90c. to \$1.10.

FISH.

With the Lenten season drawing to a close business in fish is diminishing, especially as retail dealers generally have pretty good supplies on hand. Demand in consequence is limited, and stocks are moving off rather slowly, sales in some cases netting a loss to the seller. Haddock have sold at 1 to 3c. per lb. for old, and new stock fresh herrings, 75 to 90c. per 100; halibut at 7c. per lb.; fresh salmon, 13c., and dore, 5 to 6c. A feature is the scarcity of choice pickled herrings, of which there are none on the market. Ordinary stock are quoted at \$3.50 to \$4 per bbl.; B. C. salmon, \$11 to \$12; No. 2 mackerel, \$13; Finnan haddies, 6 to 7c.; boneless cod, 6c.; smoked herrings, 10c. per box, and bloaters 75 to 90c.

GREEN FRUIT.

APPLES—The apple market is quiet but firm, at \$3 to \$5 per bbl. as to quality.

ORANGES—No change is to note in this market, the tone ruling steady. We quote: Valencias, \$3.75 to \$4.50, and Messinas, \$2 to \$3; ditto bloods, \$3.50 to \$4.50; Californias, \$3.25 to \$4 per box, and Jamaicas, \$8 to \$9, and Havanas \$6 to \$8 per bbl.

LEMONS—Firm advices continue to come to hand on lemons and prices rule steady. Spot business is on the basis of \$2.50 to \$3 50

GRAPES—Very little business is doing in these, but prices are firm at \$7 to \$8 per bbl.

SWEET POTATOES—A fair business is doing in these at \$5 per bbl., while receipts continue light.

BANANAS—There were heavier receipts of these last week and prices declined \$1 per bunch to \$1 to \$2.

PINEAPPLES—There is a marked scarcity of these and prices have stiffened 8c. to 20 to 30c.

COUNTRY PRODUCE.

EGGS—The egg market has stiffened 1c. per dozen since our last, under lighter receipts, and for the past few days values have ruled firm at 16 to 16½c.

HONEY—There is no change in this except in comb stock, of which there is a scarcity, and it sells at 12 to 15c. Old extracted is unchanged at 4½ to 5½c., and new, 7 to 9c.

MAPLE PRODUCTS—Freer receipts of new maple syrup since the opening of the week has led to a decline in price to 60 to 70c, while new sugar is 8 to 9c., and old, 5 to 6c.

BEANS—Hand-picked beans remain steady at \$1.50 and lower grades \$1.25.

HOPS—No change, and we quote 5 to 7½c.

ONIONS—These meet a quiet demand and domestic stock is rather lower in its range at \$1 to \$2 per bbl., as to quality. Bermuda onions are unchanged at \$3.50 per crate.

POTATOES—Demand fair and prices steady at 65c. per bag in a jobbing way.

TOMATOES—Southern tomatoes are moving out quietly and larger receipts have led to a lower range at \$4 to \$5.

PROVISIONS.

The local provision market is steady, in fact firmer, and an improved demand has led to an advance of \$1. per bbl. in the price of Canadian heavy short cut, which rules very firm. We quote as follows: Canadian short cut, heavy, \$16 to \$16.50; hams, city cured, per lb., 9 to 10½c.; lard, Canadian, in pails, 9 to 10c.; bacon, per lb., 9 to 10½c.; lard, common, refined, per lb., 7 to 7½c.

FLOUR AND MEAL.

There is a brisk demand for flour from local and country buyers and an active business was transacted at firm prices. Sales reported by one milling concern were fifty cars. There were also cable enquiries for export account, but as this is already oversold, no business in this respect was done. In Ontario grades dealers also report a fair business doing. We quote: Winter wheat, \$3.60 to \$3.75; spring wheat, patents, \$3.75 to \$3.90; straight roller, \$3.15 to \$3.25; straight roller, bags, \$1.50 to \$1.55; extra, \$2.75 to \$2.85; extra bags, \$1.35 to \$1.45; superfine, \$2.50 to \$2.60; Manitoba strong bakers', \$3.75.

The demand for feed continues good and an active trade is doing. We quote: Bran, \$19 to \$19.50; shorts, \$19 to \$20; mouillie, \$23 to \$24.

There was no change in oatmeal, prices being steady with a fair business doing. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

CHEESE AND BUTTER.

The cheese market rules about steady, with no new business of importance to note. Advices from the other side report what has already been said regarding stocks there. They are heavy, but chiefly of Eastern makes, the demand for which is slow at 45s. to 46s. This basis is about equivalent

to a spot price of 9 to 9¼c. on summer goods. As these, allowing for carrying charges, etc., have cost fully 10c., some idea of the losses that these cheese operators have been put to this season can be gathered. Account sales on some recent consignments net about 9½c. here on summer goods, and the shippers profess to be thankful to have got out with as little loss as this. We quote the range in fine fall goods at 10 to 10¼c., and undergrades 9½ to 9¾c. The shipments of cheese last week were 3,743 boxes to London, and 14,570 boxes to Liverpool, a total of 18,313 boxes.

Butter rules quiet and unchanged. There is a steady demand for winter creamery at 21½ to 22c., and fresh Townships 18c. Held creamery is quotable at 14 to 15c., Townships 14 to 15c., and western dairy 7 to 12c.

ASHES.

There is no change in the ashes market, and prices are steady. We quote: First pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6.00 to \$6.10.

MONTREAL TRADE NOTES.

Cables on lemons to Rose & Laflamme quote the f.o.b. price Montreal at 11s. 9d.

Recent receipts of dates on this market have been offered at a decline of ½c. to 1c. per lb.

At an auction sale held on Monday, domestic onions sold in lots as low as 30c. per barrel.

Vipond, McBride & Co. received some round lots of bananas this week aggregating some 500 bunches.

The first receipts of genuine new maple sugar came to hand on Monday. Sales were freely made at 8c.

Cables from England state that last season's pack of B.C. canned salmon is now arriving on that market.

There is a decided scarcity of choice pickled herrings in this market, and quotations can hardly be given.

Fresh receipts of Messina blood oranges came to hand last week from New York. They are selling at \$3.50 to \$4.50, according to quality.

Montreal refiners were very free operators in the raw sugar market in New York last week. They bought largely of both centrifugal and molasses sugar.

Rose & Laflamme note some good sales of Patterson's Eureka pickles, Worcester sauce, and comp. coffee essence. They call attention to their advertisement this week on these goods.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., April 5, 1895.

THE spring business is beginning. Most of the Nova Scotia packets have made their first trips, and the wharves begin to look like business. There is little new in the market. Sugar, beef products and pork products are higher. Eggs,

ST. JOHN MARKETS—Continued.

smoked herring and butter are lower. Other lines about hold their own. Apples and oranges are firmer. In tea the market is easy, and the principal sales are being made by brokers, who sell for direct shipment from China. In spices the market shows no change.

SALT—Market is easy, with light demand, owing to fishing being quiet. During the past week a schooner from Boston landed 300 tons Krappani salt. This quantity about supplies the needs for a season. Prices are: Coarse, 53 to 55c.; fine factory filled, \$1 to \$1.10; 5 lb. bags, \$3 to \$3.25 per bbl.; 10 lb. bags, \$2.80 to \$3 per bbl.; 20 lb. wood boxes, 30c. each; 10 lb. boxes, 12c. each; cartoons, \$2 per doz.

CANNED GOODS—The principal interest during the week has been in canned beef, prices of which are higher. Further advances are looked for. A larger quantity of Canadian has been sold here than for some time past; and some of our largest handlers feel that the Canadian will be a very strong competitor of the American article. Prices in this market have not yet advanced, though it is thought to be but a matter of time. Blueberries, though low, are finding a very slow sale. For other goods there is a fair demand at steady prices. We quote: Corn, \$1; peas, 95c. to \$1; tomatoes, \$1.05 to \$1.10; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$2.75 to \$2.85; 1-lb. tins, \$1.65 to \$1.75; oysters (which are firmer, have advanced in Baltimore), \$2 to \$2.20; 1's, \$1.55 to \$1.60; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; salmon, \$1.35 to \$1.40; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, 4 doz., \$5.50; chowder, 2 doz., \$3.50; scallops, 4 doz., \$5.50.

DRIED FRUIT—Market quiet and values unchanged. We would again say to packers of Nova Scotia dried, if they would but put their apples up off the strings, press them into the barrels hard, see that they run even in the barrels and that the different barrels in a lot are the same in quality, also that the barrels themselves are in condition to ship, and above all that the apples are bright and dry, they would find that their profits would rapidly increase. The wholesale grocers could do much to aid this, if they would give a better price for apples rightly put up as compared with the price allowed for the others. Dried are rather firmer. We quote: Dried apples, 5½ to 5¾c.; evaporated apples, 8¼ to 8½c.; Sultana raisins, 6 to 7c.; Valencia, 4¼ to 4½c.; layers, 5¼ to 5½c.; London layers, \$2.10 to \$2.25; loose Muscatels, 5½ to 6c.; currants, bbls., 4 to 4½c.; cases, 4½ to 4¾c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.

GREEN FRUIT—Business grows better from week to week, and the season's shipments will soon be in full swing. Apples are high and scarce, the best hard fruit finding a ready sale at good prices in Nova Scotia for export. Lemons are selling higher with the market firm. By the time this report is perused by the readers of THE CANADIAN GROCER green bananas will be coming here loose, and the banana trade, which is now one of the principal factors in green fruit business, will have commenced

in earnest. Oranges are being received in large quantities, but prices have so far continued firm. Prices are: Apples, hard fruit, \$2.50 to \$3.50; soft fruit, \$1 to \$2; California oranges, \$3 to \$4.50; Messina, \$2.75 to \$3; blood, \$2.35 to \$2.75 per half box; Valencia, medium, \$4.50 to \$5; large, \$6 to \$6.50; lemons, \$3.50 to \$4.50; bananas, \$2 to \$2.25; onions, \$2.50 to \$3.

DAIRY PRODUCTS—Butter is, if anything, more unsatisfactory. There are still large quantities coming forward. One creamery sold the balance of their last season's make in this market for 16c. to a jobber here, and the best dairy is being sold by the jobber here for 17c. There is no demand. Market is very weak. It is not so much a matter of price, but of selling at all. Eggs are lower, and the retail and wholesale prices are about the same, showing the market to be weak. Eggs have sold as low as 13c. and these are being retailed at 15c. Market is likely to go lower. In cheese the demand is light. Stocks, however, are not large, and holders are getting fair prices, though about ¼ to ½c. less than what were paid last fall. Prices are lower here than in the west. It will be some time before this province turns out any new cheese. We quote: Butter—Dairy, 16 to 17c.; creamery, 18 to 20c.; fresh creamery prints, 23½ to 24c. Eggs, 13 to 15c. Cheese, 10 to 10½c.

MOLASSES—Stocks here are very light, though some 800 casks of Barbadoes are expected here about the last of next week. Prices are very firm, though the market is not as high as was expected. In syrup the demand is light. We quote: New Barbadoes, 32 to 33c.; new Nevis, 28 to 29c.; Porto Rico, 30 to 31c.; Antigua, 28 to 30c.; syrup, 33 to 35c.

SUGAR—The market here has recovered the ¼c. decline spoken of last week and is rather firmer. Large stocks are being held here. The demand is good and merchants are selling on very small margins. We quote: Granulated sugar, \$3.50 to \$3.65; yellow, 2½ to 2¾c.; Paris lump, 4¾ to 5c.; pulverized, 4¾ to 5c.

FISH—Lent, which has about closed, has not been to the fish business what was hoped. The demand has been, and is, light, and prices on all except dry are weak. Some extra pickled Grand Manan arrived during the past week. There are very few to come forward. In smoked, arrivals continue fairly large, and there is little demand, the market being overstocked. In gaspereau fishing in the harbor large numbers were being taken and prices dropped quickly from \$4 per 100 to \$1, but owing to the colder weather the catch for some days has been light. The buyers here who pay cash are complaining very much of the growing tendency of the fishermen taking the trade, as it places a false value on the fish; and if the fishermen would but think of the matter carefully they would see that the taking of trade is to their own disadvantage. We quote: Large cod, \$4.25; medium, \$4; small, \$3.35 to \$3.50; pollock, \$1.75; bay herring, \$1.50 half-bbl.; Shelburne, No. 1, bbl., \$4; half-bbl., \$2.40 to \$2.50; smoked herring, 7 to 8c.

PROVISIONS—Demand is light. Fresh beef has advanced in the west and dealers here are not prepared to follow, so arrivals have been very light this week. Some fresh beef fully equal to the Chicago article has been received from Ontario this spring. I regret to have to report it very much better than our own. In salt pork and

beef, barreled, prices are also firmer. Lard is marked up. We quote: Clear pork, \$18 to \$18.50; mess, \$15.50 to \$16; beef, \$14 to \$14.50; pure lard, 10½ to 11; hams, 11 to 12c.; rolls, 9½c.; compound lard, 8½ to 9½c.

FLOUR, FEED AND SEED.

In flour, demand is light with market strong, though as compared with last week there is no advance. Manitoba, which has advanced much less than Ontario grades, is particularly firm and an advance would not be a surprise. Oatmeal and oats are firm, with beans much higher and likely to advance still further. The bean market has been rather a surprise this season and few have even prepared for the advance. Cornmeal is firm at an advance of 5c. Large quantities of seed are now arriving. Hay continues very dull. We quote: Manitoba, \$4.40 to \$4.50; best Ontario, \$3.55 to \$3.65; medium, \$3.35 to \$3.50; oatmeal, \$4.25 to \$4.30; cornmeal, \$2.85; middlings, \$24 to \$25 on track; bran, \$22.50 to \$23; hard picked beans, \$1.85 to \$1.90; prime, \$1.75 to \$1.80; oats, local, on track, 43 to 44c.; Ontario, 45 to 46c.; hay, \$8.75 to \$9; pot barley, \$3.90 to \$4; round peas, \$3.75 to \$3.90; split, \$3.70 to \$3.90; American timothy seed, \$3.20 to \$3.30; Canadian, \$3 to \$3.50; red clover, 11 to 12½c.; Alsike, 11½ to 12½c.

TRADE NOTES.

Lumber shipments during the past week have been the largest of the season, though

NORTHROP & CO.

Packers' Agents,

ST. JOHN, N. B.

prices are hardly ruling as high as was expected.

Turpentine is much firmer in this market.

Some 400,000 feet of oak passed through St. John this week for Amherst. It came from New York.

With a little warmer weather the St. John river would soon open. It is now free of ice to above Welter's landing.

Messrs. N. W. Taussig & Co. are offering some extra fancy price Porto Rico direct at a low figure. Their agent here is J. Hunter White.

During the past year the sale of Springhill coal in St. John was 2,000 tons in excess of last season's sales, the amount being 41,000 tons.

Messrs. C. & E. Macmichael have received a stock of Bryant's root beer. Retailers will find it to their advantage to see them before buying their summer stock.

The failure, at Springhill, of Horton & Scott, grocers, is reported. Liabilities, \$2,000; assets, about \$1,200 to \$1,500. C. M. Bostwicke & Co., of this city, are preferred for \$800.

The McAlpine Tobacco Co. are putting on this market an extra quality mixed cut smoking tobacco called Tonka. It is sold for 70c. put up in packages of 9 to the lb. Fred. R. Titus represents the firm in this city.

J. A. Leney, of the firm of R. Kivining & Co., London, was in the city for the first time during the past week. He was much pleased with both the city and its business men. His firm is represented here by J. Hunter White.

Since the reduction in the price of Sunlight soap, their agent, N. D. Hooper, finds a greatly increasing demand. The quality of the goods has always been admitted extra, but the price has been against it. Now that it can be sold at 6c., it is a seller.

The merchants feel the wharfage which is to be charged on apples, dried and pickled fish, is most unfair, particularly when it is remembered that schooner men are permitted to retail goods out of the vessels without paying license, taxes, or other charges. The schooner men object to the tax because they say the port is already a very dear one.

Messrs. Jardine & Co., whose suspension was reported last week, have furnished a statement to their creditors. It shows secured liabilities, consisting of rent and amounts of wages owing to employees, \$2,000; unsecured, \$50,000; indirect, \$5,000; assets, \$23,142. They offer 20 cents cash, or 25 cents in quarterly payments, extending over twelve months. It is hoped a settlement will be effected.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, April 4, 1895.

BUSINESS is improving in nearly every line in the grocery trade. The tendency in breadstuffs is still upward. The advance last week on the sharp advances of the preceding part of the month would necessarily be limited to 5c. at a time, but two advances of 5c. each took place through the week, closing Saturday strong all round, American as well as Canadian. Our markets are to-day 25c. a barrel higher than the American, but a further ad-

vance of 50c. cannot be made before we meet with the overflow of American products, as the duty is 75c. In the meanwhile American products are likely to advance. The fruit market is very active and provisions are advancing. Butter, cheese, and eggs are down. So is hay.

FLOUR—The market is steady and firm at the following quotations: Hungarian patent Manitoban, \$4.60 to \$4.70; Manitoba strong bakers', \$3.35 to \$4.45; Canadian pastry, \$3.85 to \$4; 75 per cent. rolled patent, \$3.75 to \$3.85; 80 per cent. \$3.60 to \$3.70; 90 per cent. \$3.50 to \$3.60; straight, \$3.40 to \$3.50; extra, \$3.10 to \$3.25.

BRAN, MIDDINGS AND OATMEAL—Fahcy bran is worth \$24 a ton, and middlings from \$25 to \$26. Oatmeal remains at \$4.65 to \$4.75.

HAY—Hay is dull. There is lots offering, but no demand. Quotations are about \$10.

OATS—Oats still hold up. Several carloads of Canadian and P.E. Island have been received, which sold at 47c. for the former, and 46c. for the latter.

CANNED GOODS—The demand for canned goods is steadily improving. Quotations remain the same as last week.

CHEESE—The cheese market is characterized as flat, with no prospects for an immediate improvement. Stocks on hand are large.

BUTTER—Butter seems bent on self-destruction. It is on the down grade, and seems determined not to reform. Canadian creamery is quoted to-day at 15 and 16c.

EGGS—Eggs are plentiful, and fresh stock is only bringing 13c.

PROVISIONS—The provision market has stiffened wonderfully. Our advices from Ontario show an advance of \$1 on beef, and as we are supplied from that quarter, we have to respond in sympathy. Ordinary beef is worth \$8 to \$8.50, and choice is bringing \$9. Several car loads are on the way from Toronto, having been purchased before the rise. Mutton is worth 10 and 11c. A few spring lambs are offering at \$4 and \$5. Veal is worth 5 to 6c. Other quotations remain, viz: American clear pork, \$19 to \$20; do. mess pork, \$16.50 to \$17; P. E. Island mess pork, \$16 to \$16.50; do. thin do., \$14.50; do. rump do., \$14; do. prime do., \$13.25; American extra mess beef, \$13; do. plate do., \$14. Hogs are worth 6½ to 6¾c. for Canadian.

GREEN FRUIT—The green fruit now coming in is looking fine, and good sales are being made. Bananas are eagerly sought after. Valencia oranges are easier, caused by a "new man" doing some cutting, and sell to-day at \$4.50 to \$5. California navels are worth \$3.50, seedlings \$3, Messinas \$3.50 (200 count), and bloods (200 count), \$4. Lemons remain at \$3 to \$3.50. Bananas sell at \$2.25 and \$2.50. Apples are scarce, and only poor fruit is being offered.

ONIONS—American onions are worth 2½c., and Canadian 2c.

DRIED FRUIT—Dried fruit is in fair demand, with no change in quotations.

FISH—The situation in fish remains unchanged. Some small lots have been received from Newfoundland. Mr. Louis Butler has made some purchases for the Hayti market, but otherwise there is no movement and no demand.

MOLASSES—There is no change in the market in molasses. The schooner Vivian arrived from St. Kitt's this week with 165 pans, 10 hhd., and 40 bbls., to James Fraser. Prices remain at 35c. for Porto

Rico; 34c. for Barbadoes, and 45c. for Demerara, (N) D brand.

SUGAR—Sugar is moving slow, with little enquiry. Latest quotations are: Porto Rico, in barrels, 2¾c.; refined cut loaf 5c.; granulated, 3¾c.; standard A, 3½c.; white extra C, 3½c.; standard yellow C, 3c.; extra C, 2¾c.; extra yellow C, 2½ to 2¾c.

HALIFAX MARKET NOTES.

A sign artist from Ontario is here, and the fronts, roofs and sides of grocery stores tell wonderful tales.

The bread war still continues. Two-pound loaves still sell for 4c. The rise in flour seems to have no effect.

The naval authorities have decided to purchase the salt beef, pork and suet for the North American squadron in Halifax, and tenders will shortly be called for. Formerly the salt meats were brought from England.

Messrs. Horton & Scott, grocers, of the town of Springhill, made an assignment for the benefit of their creditors. The liabilities of the estate are about \$2,000, and the assets will probably realize from \$1,200 to \$1,500. Messrs. C. M. Bostwick & Co., of St. John, who have been supplying the firm, are preferred for \$800, and Isaac G. Phelan and Clinton McKay for \$100 each for cash lent. Percy B. Evans, of St. John, is the trustee of the estate.

JOHN SLOAN & CO.

The old established Toronto wholesale grocery firm of Sloan & Crowther will be no more known as such. Mr. John Sloan has bought out the business and will henceforth carry it on with renewed vigor under the style of John Sloan & Co.

Mr. Sloan is one of the best known and most esteemed men in Canadian business circles, and under his direction, the old house is bound to flourish anew.

John Sloan & Co. are starting out with a stock that is very complete in staple lines and especially in teas. We would refer our readers to the advertisement in this week's issue, of a special line of teas. The firm is also carrying a full assortment of Canadian canned goods and fish, including one of the finest brands of sock-eye salmon on the market.

THE CANADIAN GROCER ventures to predict a successful future for the newly organized house.

THE DOMINION SUSPENDER CO.

The Dominion Suspender Company, of Niagara Falls, write asking why we do not say something good about their suspenders. Great Scott! what is the use of our telling people something they know already? Who in Canada does not know that this Company is the brightest, liveliest, most original and most energetic of our manufacturers? Is there anyone between Victoria and Halifax unaware that these people manufacture the best suspenders in the Dominion? If you have any doubt about what we say, put yourself in communication with them. You will doubt no longer after that.

TRADE SALES.

At Suckling's on Wednesday the general stock of R. D. Gardner, of Mount Pleasant, was sold to M. M. Evans at 60c. on the dollar. The general stock of Lee & Co., of Lisle, amounting to \$1,760, was sold at 49½c. on the dollar. The Beamsville stock of James A. Adam & Co., general merchants, amounting to \$14,750, was withdrawn at 55c.

Successors to Sloan & Crowther.

THE BUTTER MARKET.

The market in butter is featureless. Summer and fall tub butter is still accumulating. One Toronto firm alone is now holding about 1,000 tubs of commissioned butter, and this stock is being rapidly added to by large daily receipts. The situation of this house is indicative of the general state of affairs, and dealers are unanimously of the opinion that "the woods" is still full of butter. Jobbers and commission men are now facing a serious question. What are they to do with all this poor butter? It is understood that the situation in Montreal is even worse than in Toronto. Several carloads of butter have been recently disposed of in the former city at 6 to 7c. a pound.

It is unfortunate that some outlet cannot be found for this butter, for as long as it remains on the market good butter will not bring its proper value. We believe that it would be a good move to relieve the situation by disposing of all this inferior stuff for grease purposes. By this means the market could be cleaned up, and the dealers could start out in the spring business with clear decks.

"PURE GOLD" AGENCIES.

The Pure Gold Mfg. Co., Toronto, has been making some changes in its agencies lately. Baker Bros., Halifax, have been appointed to look after the firm's business in that province. In Montreal, Mr. Dunn, who has retired, has been succeeded by T. F. Ballantyne. Baker Bros. are well known as an enterprising and highly esteemed

firm of commission merchants, while Mr. Ballantyne is one of the best known and popular travelers in Quebec province.

PILING UP BUSINESS TAXES.

Quebec expects to raise \$10,000 additional revenue this year by increased taxes on business companies. Electric light will pay \$1,200, express companies, \$150; gas, \$1,700; plate glass insurance companies \$75; beer bottlers, \$30; banks' second branches, \$200. Is Quebec doing so well as a mercantile centre that it can afford to pile up the taxes on business concerns?

N. B. INSOLVENT LAW.

The new insolvency law just passed by the New Brunswick Legislature is regarded with favor by business men. The Act renders null and void any confession of judgment or undue preference given in favor of one creditor to the detriment of others, by a party who is insolvent or unable to pay his full debts, or is about to become insolvent. Provision is made for assignments by insolvents to the Sheriff or other assignee for the benefit of all their creditors, and the assignee is to receive such remuneration as shall be voted him by the creditors at any meeting called for the purpose after the first dividend sheet has been prepared, or by the inspectors in case the creditors fail to vote it, or failing that, by a judge. Notice of assignments must be published in the Royal Gazette and also in a newspaper of the district, and the votes of creditors shall

be calculated as follows: One for claims between \$100 and \$200, two for claims of \$200 to \$300, three for every claim of \$300 to \$1,000, and one more for every additional \$1,000 or fraction thereof.

The various powers and duties of assignees are clearly outlined in the Act.

PERSONAL MENTION.

Mr. N. W. Taussig has just returned from New Orleans. He confirms previous reports of practical exhaustion of fine molasses and full valuations on what remains.—N. Y. Journal of Commerce.

E. M. Young, Picton, son-in-law of Wellington Boulter, has been appointed solicitor for the Canadian Packers' Association.

E. D. Tillson, the veteran miller and manufacturer, of Tilsonburg, was 70 years of age March 26. Although having lived man's allotted time, Mr. Tillson is still a vigorous man, and is head supervisor of his different industries.

G. Cecil Brown, Toronto, is making a trip to Jamaica for the Pure Gold Manufacturing Co.

A. Whitelaw, of the Whitelaw Trading Co., Brandon, Man., was in Toronto this week on business. Mr. Whitelaw is one of the best known traders west of Winnipeg, and he reports trade fairly good.

Mr. Morrow, of Montreal, was in Toronto this week looking up business. "Business in Montreal is about the same as it is in Toronto," he said. "The only difference between the two cities is that it is colder in Montreal than here."

WE MAKE A PROFIT

On all our goods, but we try to make it fairly.

We don't believe in selling one article at cost and putting a big profit on another. We believe in good, honest goods, at a fair price, put up in attractive packages. We are now putting up D.S.F. Mustard in handsomely decorated school children's lunch boxes, one pound each. They are bound to sell well, because every child attending school in the land will want one. Drop us a card, or see our travellers for particulars.

PURE GOLD MANUFACTURING CO.
TORONTO

TRADE IN PASSOVER GROCERIES.

A DEVELOPING trade with a good profit is that of foods for the feast of the Passover. This festival is celebrated by Hebrews, everywhere and calls for a variety of articles in special demand amongst people of this religion, notably unleavened bread, dried fruits, meal, flour, etc.

This year Fraser, Viger & Co., of Montreal, have a special department in their large retail store filled with these Passover products. They were imported from New York, but as the demand is extending over the country, the firm intend to import direct next year in several lines from Austria and other countries of manufacture.

The Hebrew trade is itself growing, and dealers will find a general demand for some of these articles which it will pay to handle. Many Christians, for instance, already order unleavened bread, which resembles biscuits, and is exceptionally pure and light. The Hebrews are noted for the wise care they take of the qualities of food eaten. To this is largely due the longevity which the race is noted for. In such lines as the dried pears and prunes, the prune wine and brandy, the Gouda cheese and the olives, the distinguishing feature is excellence combined with delicious flavor. There is a demand for some of these Hebrew goods the

year round. But the special trade is for the Passover, which, occurring near Easter, affords grocers generally a chance of extending a promising trade.

DUTY ON SUGAR AND TEA.

THERE have been whispers this week regarding coming sensational developments at Ottawa that have created some anxiety among members of the grocery trade.

It is now pretty well known that the Government will have to face a deficit, and it is the uncertainty as to what will be done in regard to this that is bothering the trade.

If the Government does decide to provide for it, the feeling is that two well-known staple lines of groceries will be selected as the most prompt means of increasing the revenue. These two lines are raw sugar and tea. Of course nothing definite is known as to what the deficit actually is, but it is generally placed between \$3,000,000 and \$4,000,000.

It is held by some, therefore, that a duty of ½c. per lb. on sugar and the old duty on tea of 5 to 6c. per lb. respectively on blacks and Japans would provide this revenue. For this reason one or two Montreal jobbers who were spoken to by THE CANADIAN

GROCER advised careful operations in these two lines.

On the other hand, a leading politician who was spoken to, and who is on the inside, said that it was just as probable that the deficit this session would be charged up to the debt account and the estimates passed. The Government would then go to the country after the session, trusting in the meantime that improved business will increase the revenue. If not, the matter of new duties could be settled by the new Parliament. Should it be decided, however, to provide for the deficit this session, sugar and tea were certain to be the staples selected on which to impose a tax. He was of the opinion, though, that if one was imposed it would amount to more than half a cent on raw sugar. In fact, he would be disposed to place it at 1½c. per lb., which would give a revenue of possibly a little over \$3,000,000, while the tax on tea already mentioned, would realize another half million.

If a tax on sugar is in the future, prices, of course, are bound to advance to an equivalent extent, and this, no doubt, could not be displeasing to the members of the jobbing trade, who, as THE CANADIAN GROCER has pointed out from time to time previously this winter, have been loading up freely with the staple and must be carrying a large stock of it.

ENCOURAGE THE HORSE SHOW.

The breeding of horses was at one time a profitable department of Ontario farming. Almost anything, no matter how badly bred, could be sold. This was before electric street railways. Now only the higher grades are wanted and poor horses are very cheap. Thanks to the Ontario Jockey Club, the breeding of the best saddle horses has become popular. The numerous trotting associations have developed the interest in this variety. Some progress has also been made in the heavier weights such as Clydesdales for dray work. We have been exporting all of these varieties to the States and to Great Britain, and they have been making reputations for Canadian breeders. The demand is increasing. It is often difficult to get a really good saddle horse, the inquiry being so great from the States, and \$200 to \$400 are not unusual selling prices. This gives a good profit to the breeder, and most breeders are farmers.

As the average farmer lives well and spends most of his money with the retailer these days, the more he has to spend the better for the merchant. As we have frequently urged, it is our duty as merchants to encourage anything that will increase the earning capacity of the farm.

During the present month there will be a horse show in Toronto, under the auspices of the Agriculture and Arts Association, the

Toronto Country and Hunt Club, and the various breeders' associations of Canada. Its object is to encourage the development of better horses, and it is intended to make it an annual affair. It is our duty to encourage the show in every way and induce as many farmers as possible to take an interest in it. It takes place at The Armories, April 18, 19 and 20.

Copies of the prize lists may be had by application to the secretary, Henry Wade, 12 Elm street, Toronto.

WHITE BEANS IN THE STATES.

SINCE the opening of the crop year, October 1, to date, the importations of white beans have reached a total of 41,081 bags, against 69,667 bags corresponding period last year. Following this date to the close of the season last year there were 122,109 bags landed, making an aggregate quantity for the season of 1893-94 of 191,776 bags. In sight to-day there are only 3,000 bags to arrive per Chollerton and 13,500 bags per Belgravia. Shipments from this time on are likely to prove of an uncertain character, as all reports from the primary markets of Hungary are to the effect that very little stock remains in the principal trade centres, and that interior points or producing sections have about exhausted their supplies. Cable inquiries are making from this side for quantities to bridge the

period to next crop, and though would-be importers are prepared to meet a liberal value, the quantities tendered in return are so small and the prices so extreme that important negotiations are held in check, local importers being reluctant to open credits or close for shipments upon the basis of the terms cabled. Medium are offered in a limited way at the sterling price of 11s 9d. to 12s. 6d., or say the equivalent of \$1.95 to \$2.10 laid down, and pea at 12s. 6d. In this market to-day medium are quoted at \$1.95 to \$2.05, and pea at \$2.05 to \$2.10, which prices, it will be observed, are about on a par with the present import cost. The stock of foreign in this market is estimated at about 6,000 bags, which added to the quantity in transit, makes a total visible supply of 23,500 bags. When it is considered that April, May, and June, the three heavy consuming months, have yet to be provided for, it is reasonable to believe that the confident anticipations of many in the trade regarding materially higher prices will be fully realized. State medium are held to-day at \$2.20, pea at \$2.20 to \$2.25, and marrow at \$2.90. The stock of marrow abroad is entirely exhausted, this fact being shown by the inability of importers to obtain offers of stock or quotations. The statistical position is certainly of a most favorable character to holders, and the rising tendency of prices, it is believed in the trade, will not be stayed until the advance reaches a point that will serve to check consumption.—N. Y. Journal of Commerce.

FRAUDS IN SAUCES AND PICKLES.

AN agent of the English manufacturers of sauces, pickles, etc., Crosse & Blackwell, Lea and Perrin, and other firms, is in Canada investigating suspected frauds on their goods by re-filled bottles marked with their labels and trade-marks, but containing inferior preparations.

For years the Canadian representatives of these firms have kept a close watch upon the perpetrators of this sort of imposition. In some cases the bottles of well-known makers like these may be used without the proprietors of hotels and restaurants being fully aware of the illegal nature of the practice. When a bottle of the genuine article has been used, the vessel is refilled with something of home production and is patronized by the consumer often in ignorance of the change, the average individual not being a connoisseur. On one occasion a representative of an English sauce manufacturer detected at a Canadian restaurant the spurious article, though the regular bottle was employed. He complained to the waiter, who examined the bottle and went away for a bottle filled with the real thing, thus showing that undiscerning guests were supplied with inferior stuffs, while some of the genuine sauce was kept for the epicure.

This kind of deception is pretty prevalent, though not so easy to discover. The law in Canada clothes the manufacturer with ample

power to punish, and prevent the practice. He may, in the presence of a police official, enter any restaurant, seize the stuff, and sealing it, carry it away to be examined under lawful supervision. This course has its difficulties, because an unjust seizure leaves him liable to an action at law. Hence the necessity of having an expert tester who cannot be deceived in the quality; and the English makers are now adopting this plan by employing a competent man to investigate.

But the frauds are sometimes carried on more boldly and systematically. Cases have in late years been brought into court and proved, where Canadian makers produced in large quantities an inferior stuff turned out in the English bottles. In Montreal, Toronto, and Ottawa, cases of this kind have been exposed. A man in Montreal was heavily fined, his stock destroyed and the illegal business ended. The penalty is severe, and the fraud, besides injuring the English maker, harms the trade in Canada as well. The consumer finds the bogus stuff unpalatable and harmful, and ceases to patronize, while the dealer in the genuine article loses his custom through a growing distaste for sauces and other appetizers.

The trade is as much concerned to stop fraudulent practices as the manufacturer, since in those days the taste for condiments

is rapidly growing, and a profitable business can be done. As a proof of this, THE CANADIAN GROCER is informed, the sale of Crosse & Blackwell's and Lea and Perrin's products was larger last year than for several years. Thus, those who handle a good article can afford to safeguard the genuine stuff in every way.

JAPAN RICE ADVANCING.

A New York firm has received the following interesting rice information from its correspondents: Prices in Japan continue to go up owing to the strong attitude of the farmers, who seem to be very firm and not at all anxious to sell their stocks. Our friends report higher prices owing to a scarcity of supplies from the interior, the rise in exchange, and the reported formation of a combination or ring in Japan to advance prices. These causes have also had the effect of increasing the firmness of European holders of Japan rice, who are now compelled to pay higher prices for forward shipment, although the arrivals in Europe of new Burmah rices in about a month's time will undoubtedly check the demand there for cleaned Japan, as the new crop of Japan as well as Patna has been selling very freely on account of the superb quality of both rices this season, and the relative inferiority of the remaining old crop Basseins and Rangoons.

All Grocers in Canada

MONTREAL'S PEDDLING LAWS.

THE CANADIAN GROCER had a chat with Ald. Nolan, the chairman of the Montreal Market Committee, on Monday last about the peddling of produce, etc., by small traders about the city.

He says that his committee have been holding three sessions a week, and that they are almost through their revision of the market by-laws. If their report is adopted by the Council he feels assured that grocers and other regular traders will be satisfied. Conferences have been held with the Retail Grocers' Association, the Butchers' Association, etc., for the committee feel that not only are the members of these associations treated unfairly by the existing by-laws, but the city loses a good deal of revenue.

At present everything in the fruit and vegetable line is peddled about, and some of the pedlars do not pay any license at all. In fact, the Grocers' Association brought up and proved instances where one license covered three pedlars. The cart license went with one, the badge with the second, and the receipt with the third.

The clauses which it is proposed to submit will do away with the chance for this trickery, and it is the intention to impose a uniform tax of \$100 per annum on all pedlars, no matter whether it is a hand cart or a two horse rig that they carry their produce

around with. The clause of the market by-law at present governing this nuisance reads as follows:

"No person shall sell, offer, or expose for sale in or upon any street, lane, yard, or in any store, shop, or other place in the city, than one of the meat markets (public or private) established by this by-law, any kind of butcher's meat, fresh pork, turkeys, geese, ducks, poultry, fish, fruits, grain, produce, or effects usually brought to and sold on the public markets; provided that nothing herein contained shall prevent shopkeepers, grocers or traders retailing as heretofore, in their shops, butter, eggs, hay, straw, salt pork, game, cured fish, canned meat, fruits or vegetables; provided also that farmers and gardeners in and in the vicinity of the city, may sell and deliver to their customers in any part of the city, except in the immediate vicinity of the said markets, potatoes and other vegetables and fruit, the produce of their farm or garden, upon their obtaining from the chief of police an annual license for each vehicle used for that purpose, for which they shall pay every year the following rates: 1. For a one horse vehicle, fifteen dollars; 2. For a two horse vehicle, twenty-five dollars. But such license shall not entitle the holders thereof to occupy a stand, free of charge, on any of the said markets for the purposes of selling or delivering their produce."

It will be seen that farmers are accorded considerable privileges by this clause, and, even with the proposed uniform tax of \$100, they compete at an unfair advantage with the regular trader, who has to pay water tax, real estate assessment, etc., as well as the

heavy municipal and provincial business tax. It is also proposed to add to the above clause the following:

"Provided also that nothing herein contained shall prevent dairymen and farm produce merchants or farmers arriving with their goods by rail or by boat from selling said goods on the wharves subject to a market fee of five cents per packet, bag, box or barrel when not more than twenty-five are offered for sale, and two cents per packet when more than twenty-five are offered for sale."

The Committee expects to get through its work and report to council next week.

AGENCIES WANTED.

In another column an advertiser is asking for agencies for staple lines, with headquarters in Revelstoke, B.C. This bright town is the head of navigation, and the Canadian distributing point for the mining districts of Slokan and Trail Creek. All letters addressed "Revelstoke" care THE CANADIAN GROCER will be promptly forwarded.

COCOA EXPORTS.

ALLAN LINE

ROYAL MAIL STEAMSHIPS

Liverpool, Halifax, and Portland Mail Service

After Nov. 18th the Mail Service will be continued for the Winter 1894-5, from Portland to Halifax, as under:

STEAMSHIPS.	From Portland.	From Halifax.
PARISIAN	Apr. 11	Apr. 13
NUMIDIAN	" 25	" 27

The Steamers of this service carry all classes of passengers. The Saloons and Staterooms are in the central part where least motion is felt. Electricity is used for lighting the ships throughout, the lights being at the command of the passengers at any hour of the night. Music rooms and Smoking room on the promenade deck. The Saloons and Staterooms are heated by steam.

RATES OF PASSAGE:—Cabin, \$45 and upwards, according to Steamer, location of and number of persons in Stateroom. Second Cabin, \$30; Return, \$55.

Steerage to or from Liverpool, London, Glasgow, Belfast, or Londonderry, \$15.

H. & A. ALLAN, Gen. Agents, Montreal, or H. C. BOURLIER, 1 King St., Toronto

Alfred Cummings, general store, St. John's, Ont., has been burned out.

C. A. Scott, general store, Wallace, Ont., has been burned out. No insurance.

The premises of Felix Delisle, grocer, Quebec, Que., have been damaged by fire.

DEATHS.

Octave Morin, grocer, Montreal, is dead.

John Foster, grocer, etc., St. John, N.B., is dead.

L. S. Van Wart, general store, Wickham, Ont., is dead.

Joseph Gauthier, baker, Three Rivers, Que., is dead.

John Howard, general store, Grenville, Que., is dead.

A PLAGIARIST EXPOSED.

Toronto GROCER,
March 22nd.

WILL BE NO TEA
INSPECTORS.

There are a large number of applicants for the positions of Government Tea Inspectors, but they will all be disappointed. The Government has no intention of making any such appointments.

Hon. Clarke Wallace, Controller of Customs, has taken up the matter personally. He knows the tea trade thoroughly himself, and has decided that the analytical test that was first applied is not a satisfactory one.

The teas which were seized he will allow to be exported instead of confiscated, the law giving him discretionary power to do so.

If, however, importers persist in bringing these inferior grades in after this warning not to do so, he will confiscate them.

For the future he will apply the ordinary trade methods of testing the purity and quality of importations by drawing the samples.

The work will be done under his personal supervision by his present staff without any increased expenditure being necessary.

Montreal HERALD,
March 23rd.

WILL BE NO TEA
INSPECTORS.

There are a large number of applicants for the positions of Government Tea Inspectors, but they will all be disappointed. The Government has no intention of making any such appointments.

Hon. Clarke Wallace, Controller of Customs, has taken up the matter personally. He knows the tea trade thoroughly himself, and has decided that the analytical test that was first applied is not a satisfactory one.

The teas which were seized he will allow to be exported instead of confiscated, the law giving him discretionary power to do so.

If, however, importers persist in bringing these inferior grades in after this warning not to do so, he will confiscate them.

For the future he will apply the ordinary trade methods of testing the purity and quality of importations by drawing the samples.

The work will be done under his personal supervision by his present staff without any increased expenditure being necessary.

The Trade Bulletin has repeatedly had occasion to expose the thieving raids that have been made upon our columns by unscrupulous contemporaries which are as ready to pilfer brain property as any other; and we are just as eager to bring these journalistic thieves to book, when we detect them misappropriating the mental labor of others and palming it off as their own, as if they were trespassing on our own preserves. The above is a flagrant instance in which The Herald plays the guilty role, by stealing an editorial from the Toronto GROCER in its entirety, without giving the slightest credit therefor; and this is the journalistic saint that pretended to be so shocked and pained at Lawyer Gilman's indiscriminate denunciation of all newspapers as "simply blackmailers," that it felt called upon to publish an editorial on the subject, lest the public might suspect that Gilman had his "weather" eye on it.—Trade Bulletin, Montreal.

CURRENT MARKET QUOTATIONS

TORONTO, April 4, 1895

This list is corrected every Thursday. The prices are solicited for publication, and are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit.

Goods in large lots and for prompt pay are generally obtainable at lower prices.

All quotations in this department are under the direct control of the Editor, and are not paid for or doctored by any manufacturing or jobbing house unless given under their name, the right being reserved to exclude such firms as do not furnish reliable information.

"If a Herring and a Half

Cost a Farthing and a Half--"

How often this old brain-twister comes to your mind to-day, when you are serving two or three customers at once and in the meantime wrangling with a calculation of pounds and ounces at so many and a quarter cents.

It's different when you have a Computing Scale. You don't have to bother your brain with a single figure. With it, you do away entirely with the necessity of weighing goods in pounds and ounces, arriving at the true value with one operation.

An interesting pamphlet will be mailed you on receipt of your address.

Mills & Company

700-701 Garden City Block

BRANTFORD, ONT.

This journal has the largest circulation and the largest advertising patronage of any grocery paper in the world. We prove it.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, APRIL 12, 1895

(\$2.00 per Year) No. 15

DROPS FROM THE EDITOR'S PEN.

There is always room on top for the best—merchants and clerks included.

* * *

A querist wants to know how to treat big head. Why, let out some of the conceit, of course.

* * *

The Patrons, in refusing railway passes, evidently do not desire to pass as ordinary politicians.

* * *

It is absurd to expect a dead merchant to advertise. It is the live merchant that advertises.

* * *

The merchant who has no use for the trade paper is usually the man for whom the public has no use.

* * *

In Europe the tax on salt amounts to \$50,000,000 per year. Not much free breakfast table there, evidently.

* * *

It is want of energy, and not want of ability, that keeps most clerks from reaching the top of the ladder.

* * *

The coming of spring appears to be about as uncertain as the general election. Both will come in time, however.

* * *

The merchant who does not keep a cash book may succeed. So, without a compass, may a vessel cross the Atlantic.

* * *

The President of the Montreal Gas Company has just been voted a salary of \$10,000. "Gas" men are as a rule well paid.

* * *

It is nice to have friends to trust, but it is unwise to trust in friends. The better man, the most successful man, is he who paddles his own canoe.

* * *

A British grocer was brought before a judge the other day charged with selling

poison. The poison was Fellows' syrup of hypophosphites. The factious fellow who prosecuted should be liberally dosed with the "poison."

* * *

Dead beats ruin some merchants, but more merchants are ruined by their own half-dead-and-alive business methods than by fraudulent customers.

* * *

The reason that advertising does not pay some men is because they do not advertise aright. There is money in advertising as sure as there is fish in the sea.

* * *

Australian tallow is now going into the United States. Wool has been going in for some time; and it is not impossible that the whole sheep may be going in soon.

* * *

The merchant who does not insure his stock should go into partnership with the man who puts his head into the lion's mouth. The one may some day lose his "all" and the other his head.

* * *

There is no more relationship between a grocery store and a junk shop than there is between a man and a monkey, notwithstanding that appearances would sometimes indicate that there was.

* * *

Toronto does not want municipal insurance, but there is no knowing what she may want or do if the fire insurance companies are not careful. It is dangerous to "monkey with the buzz saw."

* * *

There have been so many fires in Toronto lately attributed to firebugs that the daily newspaper reporter, without wearying either his brain or his legs to discover the cause, ascribes all fires alike to the work of this particular "insect."

* * *

Consumed with foolishness is the London Gazette when it urges the shareholders of

the C. P. R. to hereafter hold their meetings in the British metropolis instead of in Montreal. With the experience of the Grand Trunk in view, none but a foolish man would make such a proposition.

* * *

"Robin" and "scrubbing" rhyme. The notes of the spring robin are now heard in the land, and so should the music of spring scrubbing be heard in the retailer's store. The advent of the one should always be followed by the operation of the other.

* * *

The hog is both magnanimous and self-sacrificing sometimes. By filling himself liberally with wheat he is helping to raise the price thereof, notwithstanding that the higher the value is the smaller will be the proportion of the cereal falling into his trough.

* * *

The first important thing discussed by the Canada-Newfoundland conference was the pronunciation of the word Newfoundland. It was pointed out that the correct way was to place the accent on the second syllable. It is well that we should begin right. If Newfoundland came into the Confederation serious consequences might result from incorrect pronunciation. She might go out again.

* * *

The members of the grocery and kindred trades in New York are forming a club, to be known as the Commercial Club. The object is to furnish persons engaged in commercial and professional pursuits in Gotham with facilities for social intercourse and a great deal of what appertains thereto. One of the features of the club building will be a roof garden, which in the winter months can be used as a sun-parlor. There is a great deal more affinity between kindred trades than a good many imagine, and this business men in the different Canadian cities would learn if they would follow the example of their confreres in New York.

THE INSOLVENCY BILL.

THE decision of the Dominion Government not to introduce the Insolvency Bill during the coming session is viewed in various ways by the business community. Legislation in this matter has been on the tapis for a long time, and numerous measures to improve the existing state of affairs have been mooted from time to time. When Sir Mackenzie Bowell fathered a special bill last session those desirous of its speedy passage were satisfied that the goal towards which they had been striving was in sight. The news that now comes from Ottawa is, however, disappointing.

Mr. Stapleton Caldecott, President of the Toronto Board of Trade, when asked his opinion of the Government's decision not to bring forward the bill the coming session, said: "I am very much surprised to hear of this. It was understood last session that the bill was dropped merely for lack of time. If there is not time, because of the necessary brevity of the pending session to deal with the bill, I can understand the Government's action, but on no other ground. The merchants are expecting this legislation, and unless something is quickly done there will be a general advance all over the country to demand the passage of the bill. I may say that I hope the bankers are not responsible for this delay."

Mr. Hugh Blain, ex-President of the Toronto Board of Trade, when interviewed, remarked: "The Government are afraid of alienating votes by pressing the bill. Politics are now in a very precarious condition, and by letting this matter lie quiet they can escape giving offence in some quarters. The delay in introducing the bill is, from the merchants' point of view, a great pity, and there is no doubt that something will have to be done soon. I think that at the first session of the new Parliament, if either party is strong enough, an insolvency bill will be brought in."

Mr. William Ince, of Perkins, Ince & Co., Toronto, gave it as his opinion that it was rather a pity that the bill could not be dealt with this session, as it had been so long talked of, and some action was now generally expected of the Government. The only reason, he thought, the Government had for not introducing the measure this session was that there would not be time to deal with it. The discussion was bound to last over several weeks.

BUYING DIRECT.

A Montreal importer complained to THE CANADIAN GROCER this week that there was a perceptible tendency in the Province of Quebec for the retailer to import direct, and that country firms which formerly bought here were led to pass over the Canadian importer with no advantage as to

price. This method was encouraged rather than frowned upon by British and French houses formerly content to do their business through the wholesale trade, but now allowing their representatives to go direct to the customers of the very firms which for years had been dealing with them. This system, he contended, accounted partly for the absence of profit which many wholesale grocery firms report of late.

WHERE DO WE COME IN ?

EVERY class in the community except we businessmen organizes to get what it wants in politics. The temperance element buttonholes candidates and pledges governments. The labor unions speak for workingmen. The manufacturers are organized and openly acknowledge that Government listens to their voice. The Patrons of Industry are agitating for the farmer's interest, and so on through the list. But the business men as such are not similarly active. In consequence, legislation for the benefit of organized interests is easily obtained, while reasonable demands from the business community are either ignored or staved off. When the labor men wanted their "day" made a statutory holiday they had only to ask and the request was granted. But how long have business men been agitating for a new insolvency law without success? Session after session of Parliament has passed and the bill is dangled before their eyes without being adopted. This is only one instance of the way in which the mercantile interests play second fiddle in politics.

The Boards of Trade, the grocers' associations, the dry goods associations, etc., should imitate the policy of other organized interests and press warmly for what they want. The smiling candidate is now circulating about, promising the labor vote this, the Patrons that, and the manufacturer the other thing. What does he promise the business man? Nothing. He canvasses the business community with the happy consciousness that he will get this vote anyway. Business men are, therefore, a good deal to blame for the inattention which Parliament displays towards their interests. Let them act unitedly and strongly and the position of affairs will change.

The other day the produce exporters in Montreal objected to the new butter policy of Government, by which the country proposes, for one season at least, to go into competition with private dealers to help the alleged "poor farmer," who is pampered enough by legislation as it is. The butter men who risk their energy and capital in the business all the time were simply ignored. Reason why? There are apparently more votes in bonus butter than in dissatisfied business men. Now is the right time, with a general election in prospect, for business men to make their influence felt and insist

on candidates who ask for support promising to deal with every demand from the merchant class in the same zealous spirit they show to every request from an interest that has a "pull."

TELEPHONE COMPETITION.

There is telephone opposition in Montreal now which is rapidly developing. The company known as the Merchants' Exchange has a good many subscribers among merchants in the east end who complain of the \$50 rate for a telephone as too high. Each subscriber in the new concern becomes a stockholder by paying \$100 and gets the telephone for \$35.

The Bell Company gives Montreal a prompt and efficient service and the rate is the only thing complained of. In Toronto the Bell Company has a monopoly, obtained by guaranteeing a fixed rate and by paying a percentage of the profits to the municipality. This latter feature is good, but does the monopoly clause account for the fact that Toronto does not enjoy as satisfactory a service as Montreal?

There is much to be said on grounds of convenience for a telephone monopoly, and if the new Montreal concern should ever get absorbed, as the old Federal was by the larger company, the city might find it advantageous to make an arrangement like Toronto's, only better.

BAD POSTAGE STAMPS.

Sometime ago a vigorous protest was made against the mucilage used on postage stamps, and an improvement resulted. Now, attention is called to the miserable paper employed in the stamps. It is too light, and tears too easily. There appears to be no toughness in the texture. If a sheet of stamps is divided into singles the chances are in favor of a tear every time. The Postmaster-General should look into this.

Does that high official, who gets \$8,000 per year to serve us, trouble himself with a personal investigation into these grievances? He ought to lick the stamps and try the paper like the rest of us, being paid to do it.

ANOTHER COFFEE POOL.

Reports have been in circulation on the Coffee Exchange for some days that a new pool to corner the coffee market had been formed, and while no definite information has been received the story as it is in circulation on the Exchange seems about as follows: Guzman Blanco, ex-president of Venezuela, and a man of ample means, is said to be the chief factor in the pool. He resides in Havre, and has, it is said, purchased outright 200,000 bags of Rio and Santos spot coffees, which have been margined down 30 per cent., the money being loaned by the Bank of France on warehouse receipts. The pool is also said to be carrying a large amount of coffee futures.

It is reported that the deal already gives this pool a profit, but being such an extensive affair many doubts are entertained as to the ultimate outcome of the venture, and as a result there is little disposition on the part of traders here to operate.

The last coffee deal, it will be remembered, says the N. Y. Journal of Commerce, was that of two years ago, in which G. E. Kaltenbach, of Paris, figured, and which resulted in failure, being reflected in this market by the suspension of the old coffee firm of T. M. Barr & Co., who were the agents of the pool here.

Mr. Henry Hentz, when questioned as to the importance of the new pool yesterday,

said: "I have no definite information on the subject, but it is evident that the market is entirely under the influence of the Blanco deal."

CUT NAILS IN THE PROVINCES.

A despatch from St. John, N.B., to The Canadian Hardware and Metal Merchant says: The trade in the maritime provinces will buy cut nails 20c. a keg lower than merchants in Quebec and the west. The base price here has been fixed at \$1.90 per keg. We will get a rebate of 10c a keg in car loads in one delivery or shipment. Those who take 500 kegs or more before the end of the year will get a total rebate of 15c. and on 1,000 kegs or over 20c.

THE NEW BRUSH FACTORY.

The delegates representing the Gane Brush Factory, the new Montreal concern which intends to manufacture for the Canadian market, hitherto supplied by French and German brushes, have returned from Toledo, Ohio, and have reported in favor of going on with the enterprise. The delegates, Messrs. Desjardins, Laporte, Cousineau and Lafontaine, the latter an experienced engineer, found the Toledo factory of Ames, Bonner & Co. turning out 1,000 brushes a day and employing 250 hands, and working on a contract for 12,000 brushes

for the Pullman Company. At a meeting of the Canadian company, held since the favorable report was endorsed, the following were elected provisional directors, they being the five largest stockholders: Senator Desjardins, Messrs. Forget, Bousquet, H. Laporte and R. Bickerdike.

IN THE VAULTS.

H. Laporte, President Chambre de Commerce, Montreal, returned on Monday from a fortnight's trip to several cities in the United States, partly on business and partly for rest. Mr. Laporte told THE CANADIAN GROCER that the difference in temperature was marked, the thermometer at Old Point Comfort on April 2 registering 75 degrees at noon, and at 9.30 a.m. 69 degrees. He was especially impressed with the politeness extended to him, as representing the Chambre de Commerce, by Mr. Morgan, of the U. S. Treasury in Washington, who allowed the visitor to enter the vaults where coin and bullion are stored. The contents of these vaults when he visited them last week were:

Vault 1—Silver dollars, halves	\$ 380,000
" 2—Silver dollars	48,000,000
Gold coin	2,680,000
Small silver coin	705,000
" 3—National bank notes for redemption	3,500,000
" 4—Mixed moneys for daily redemption	1,000,000
" 5—Mixed moneys for daily use	26,000,000
" 6—Bonds security for national bank notes	250,000,000
" 7—Reserve to replace worn and torn notes	349,000,000
Total	\$784,125,000

EDWARD ADAMS & CO. - London, Ont.

WHAT WOULD YOU THINK

Of a grocer who, in ordering soap, would simply order "a box of soap," without asking for some especial brand?

THE SAME REASON EXISTS

For ordering some especial brand of Salt. The difference between Salts is great, but grocers can be assured that, in ordering

Windsor Salt

for Table or Dairy use, they will get the

PUREST AND BEST

Salt that is being sold in Canada. Remember, we do not say that Windsor Salt is "as good" as any other; we positively claim it is "THE BEST," and that includes the imported Salts as well. We are prepared to make this statement good at any time.

TABLE SALT, in bags, 100's, 60's, 42's, 30's per barrel.
DAIRY SALT, 15 per barrel, a splendid selling size for early Spring, and in 50-lb. and 200-lb. White Duck Sacks, and in Paper-lined Barrels, 280 lbs. net.

WINDSOR FINE BARREL SALT

in car lots . . .
50c. per barrel, f.o.b. Windsor.

Any WHOLESALE GROCER can supply you with Windsor Salt, in any size package or quantity, or apply to our agents:

AGAIN IGNORING MERCHANTS.

IF press despatches from Ottawa be true, again has the Dominion Government decided to defer till another session the introduction of an insolvency measure.

Procrastination has for several years been the policy of the Federal authorities in regard to the demand for this particular class of legislation.

"Not this session, but some more convenient one will we do this thing," has been the cry almost year after year. True, last session the Government did go a step farther and put an insolvency bill through the Senate, but the Commons excused itself from dealing with it on the plea of want of time to discuss it, notwithstanding that well threshed out in committee and in the Senate were the different clauses composing the bill.

That fact of the matter is that the Government and Parliament of the Dominion are merely playing with the business men of this country. They dare not openly refuse the legislation in question, because that would lead the business men to do what dilly-dallying is not so likely to do, namely, organize their forces and demand what they have hitherto merely pleaded for.

Prompt enough, as a rule, is Parliament to legislate for the especial benefit of manufacturers, bankers, mechanics and farmers, but it is a horse of another color when it comes to enacting laws for the special benefit of the merchants.

And the reason is that the favored ones are more or less organized, while the ill-favored ones are not.

It is a crying shame that the merchants—the most important class in the country—cannot obtain legislation they require, and legislation that treads on nobody's corns, which cannot always be said of many of the laws that are enacted for the benefit of the more favored classes.

One of the causes of which this neglect of mercantile interests is the effect, is that

there is not a sufficient number of men in Parliament who are careful for merchants' interests. This is, of course, largely the fault of the merchants themselves.

Another general election is not very distant, and it behoves them to bestir themselves and see that the weaknesses which have characterized the present and past Parliaments are not so marked in the next.

It is to be hoped that the Government will see fit to change its mind and pass through its final stages the insolvency measure that last session received the endorsement of the Senate. As an act of justice it should do so.

Composed of several provinces as we are, we are all one country. The limitation of distances interferes with inter-provincial trade in some instances. Legislation cannot overcome that. But there are some obstacles that now stand in the way of freer trade between the different provinces that can by legislative enactment be remedied. One of these is the lack of uniformity in the insolvency laws of the different provinces, thus, in some instances, deterring merchants in one province from doing business in another.

Laws in interference of trade are not permissible, and neither should Parliament be passively permitted year after year to neglect to pass laws which would obviously facilitate trade.

BANKRUPT STOCK DEALERS.

A BILL of considerable interest, particularly to country merchants, passed the Municipal Committee of the Ontario Legislature last week.

The bill was to amend the Transient Traders' Act, and if it passes the House as it came from the hands of the committee, itinerant dealers in bankrupt stocks will have to pay dearer than they have hitherto done for the privilege of disturbing trade in towns or villages throughout the country.

And not only will they have to pay more for this privilege, but they will not have as much latitude as hitherto for escaping payment of the tax.

Under the law now in force it was possible for dealers in bankrupt stocks to evade payment of the license fee by professing their intention of settling permanently in the municipality. With the proposed new law in force it will be necessary for them to reside at least three months in the corporation before they can start into business without taking out license.

The license fee is \$250 instead of \$100, as at present.

The adoption of the new law is of course optional with each municipality, but there are not many municipalities which will refuse to exercise the power which the Legislature proposes to give them.

It is to be hoped that the Legislature will endorse the action of the Municipal Com-

mittee. Two hundred and fifty dollars is none too large a fee for a license of this particular character.

In self-protection it is right that the fee should be a substantial one. These dealers in bankrupt stocks, during the time they are located in a town, not only deprive the legitimate merchants of business and profits, but cause a demoralization of trade from which it often takes a long time to recover, while failures have sometimes in the meantime been caused.

With a tax of \$250 to come out of the profits, the transient trader will naturally be compelled to sell his goods at a higher figure than he otherwise would, a fact that will naturally tend to lessen his power to harm the regular merchants of the place.

The amendment in question is a step in the direction of a solution of the bankrupt stock evil.

IMPURE MAPLE PRODUCTS.

There are the usual crop of complaints this season about offerings of adulterated maple sugar and syrup.

It seems impossible to stop this evil practice, though there is a fine imposed in case of conviction.

THE CANADIAN GROCER on Friday last was shown some maple syrup in Montreal, the adulteration of which the merest novice would have recognized at a glance. It was not only mixed with old held syrup, but had evidently been profusely watered as well, for it was very thin, though fairly palatable. A lot of sugar was shown that was as dark as molasses sugar.

With new maple sugar selling at 8c. per pound and brown cane sugar obtainable at 3c., the temptation to adulterate the former proves too great to be resisted by unscrupulous traders.

Another statement that was made by a Montreal broker fully bears out the above.

"Why," said he, "I have placed a big lot of sugar with some of the wholesale confectioners. They are as busy as nailers boiling down old maple syrups and brown sugar, and turning it into new maple sugar as bright as the genuine article. I have tasted some of it, and it would take an expert to tell the difference. The receipts of new sugar and syrup also this season have been very light, and there is a brisk demand, not only from local buyers in Montreal, but some large western orders have been placed for execution.

Some of the big Toronto dealers say that good new maple sugar and syrup are bound to be scarce, as the weather necessary to give a large supply has not been forthcoming. The majority, however, seem to be of the opinion that both the liquid and solid product of the maple are sure to be plentiful and cheap.

It will likely be a week or so yet before much movement in these lines will be

noticed, although one or two Toronto houses have already received small consignments of new syrup from the Eastern Townships of Quebec—the source of the best supply. New sugar at present is quoted at from 8 to 8½ cents a pound, and new syrup at 80 cents a gallon in five-gallon lots, or 90 cents a gallon in gallon tins.

From reliable sources it is learned that a tremendous quantity of adulterated maple sugar and syrup is likely to be placed on the market during the next few weeks, and the results of enquiries among the leading Toronto dealers do not serve to dispel this idea. Southern and German sugar is so cheap in Canada now that a great deal of it will probably be cooked up to resemble mable syrup and sugar. In fact it is said that fully half the maple syrup on the market this spring will be a manufactured article.

And as for maple sugar, a representative of THE CANADIAN GROCER happening to notice in a large warehouse the other day a box of brown squares that looked like soap, asked the proprietor if that was a good assortment of maple sugar, and he laughingly acknowledged that there was mighty little maple sugar about this lot at all.

But those who know good maple sugar when they see it can easily detect a specious imitation. All they need to do this year is to exercise a little extra care in purchasing.

INCREASED TEA CONSIGNMENTS.

While teas on this market will in all probability rule higher next season than they have during the past one, there is likely to be present one factor that will keep values from appreciating to the extent they otherwise would.

That factor is consigned teas, which will be much larger than usual. This applies particularly to China and Japan teas.

The cause appears to be largely due to speculation on the part of large tea operators, who, on account of the appreciation in exchange, have been buying exchange to provide for their probable purchases of coming season's teas, counting that if exchange went much higher they would get better prices for their teas. So far the aggregate advance in exchange has been something like 10 per cent.

With the speculative fever upon them many of the operators bought exchange in excess of their requirements, so THE CANADIAN GROCER is given to understand, with the result that they found it necessary to buy larger quantities of tea in order to take up all their exchange. In consequence of this, these big tea houses are consigning more teas to this country, and all other countries we suppose, and will naturally be satisfied with an advance something less than the total appreciation in the exchange.

THE INSPECTION OF TEA.

THE recent order of the Customs department regarding the inspection of teas imported into Canada has received considerable attention from the wholesale grocery trade.

THE CANADIAN GROCER was assured recently by the majority of the representative members of the trade that the stricter the inspection the better pleased all honest members would be. At the same time they expressed strong dissatisfaction with the manner in which the customs staff carried out the orders of the department. They in fact intimated plainly that it was an absurd farce to enact regulations, with officials to enforce them who knew as much about tea as of the philosopher's stone.

Frequent instances were cited to show the ignorance of the officials and the inconvenience and loss that the trade were put to in consequence.

In one case a consignment of tea, identically the same, came in two lots. The customs officials passed the first lot, and the very next day rejected the second.

In another case they passed a lot of tea as first-class that every member of the trade knew to be dust and nothing else.

Several of the firms spoken to cited many instances of this sort, and as they all dovetailed together, the presumption is that their opinion of the intelligence of the officials in regard to the grades and qualities of the different teas is not far from correct. The delay frequently displayed in adjudicating upon a case in dispute was also complained of.

The trade believed that the Controller was earnest in his desire to facilitate business, but unfortunately his subordinates acted as if they were not.

It very often happened that it took over a month for the official to decide upon a lot of tea. Now, with an article the value of which fluctuated so much, the actual loss, leaving the mere inconvenience aside, that a trader might be subjected to by a delay of this length was considerable.

In one case mentioned the people at Ottawa refused to accept the valuation placed upon the Mexican silver dollar by the Bank of Montreal. They demanded an invoice certified to by the British consul at Yokohama. This official was written to, and refused to certify to anything of the kind, and then the customs people backed down. In the meantime the tea in dispute was tied up in bond over two months, to the great disadvantage of its owners.

Referring to the examination of samples at the examining warehouse, more than one member of the trade spoke against the rough usage to which packages were subjected, and gave THE CANADIAN GROCER ocular proof of the fact by showing some

of the packages in question. In each case there was plenty of reason for complaint.

There is no earthly reason whatever for splitting the whole side of a tea chest to make a small auger hole to draw out some tea. Several of the firms believed that they lost considerable pounds of tea in the year through this carelessness.

After giving this expression to their discontent they said that they could find no fault with the recent order, but remarked that in cases in dispute the adoption of the method in vogue in the United States would give satisfaction.

There the importer or owner appointed an arbitrator, the Government another, and when the two could not agree they themselves appointed a third, who decided between the two.

The recent order instructs collectors and appraisers to observe the following :

1. In order to avoid unnecessary damage to the packages whenever it is necessary to obtain samples, not more than one chest of each kind or brand in a shipment need be sampled, unless at the request of the importer, or in the opinion of the collector or appraiser of the port in any case, a greater number should be sampled.

2. The samples so taken shall be carefully examined, and in any case where the collector or appraiser deems it advisable, such samples may be tested by him, by infusing a portion thereof and testing same; and in case he is satisfied with such test and passes the tea, he will be held strictly responsible therefor; but if not satisfied with such test, or if he finds the tea is invoiced at an exceptionally low price, or if he has any good reason to suspect the tea is adulterated with spurious leaf or with exhausted leaves, or that it contains so great an admixture of chemical or other deleterious substances as to make it unfit for use, he shall send samples of the tea to this Department for further inspection or analysis before allowing delivery thereof through the customs.

FREIGHTS TO MANITOBA.

At a conference of forty representatives of Lake and Rail Freight agents it was agreed to make the freights from Montreal and all Ontario points to Winnipeg the same as last year's regular rates, namely \$1.43 per 100 lbs. for first class and 72c. for fifth class freight. The all water freights were accorded differential rates which allow them to make a lower tariff.

Last year they agreed to a lower and special tariff on iron and nails and other metal products of 67c. It has been decided not to continue this at present, but it is not improbable that they will have to come to it to enable Ontario and Quebec manufacturers and importers to compete with the exceptionally low rates given by American roads to south and south-eastern manufacturers.—Canadian Hardware and Metal Merchant.

The bill designed to improve the quality of the American sardine pack, that was recently introduced in the Maine Legislature, has become law, having passed both houses and received the Governor's signature. It provides that a certain amount and quality of oil or vinegar shall be used in each can of sardines.

IMPORTATIONS OF GREEN FRUIT.

THERE has been nothing definite received over the cable by Montreal fruit importers with regard to the quantity of Mediterranean oranges and lemons which the direct steamers will bring to Montreal this spring. It seems pretty certain, however, now, that the aggregate consignments will be much less than those of last spring.

The Thomson line, which usually does the bulk of this business, has this year only two steamers which will devote their attention exclusively to fruit, viz., the Fremona and the Avlona. They have another steamer, the Dracona, picking up freight in the Mediterranean, but the vessel is devoting attention chiefly to wines and liquors, and will carry little, or in fact, no fruit.

With regard to the two first named all the advices so far received infer that they are experiencing difficulty in securing a full cargo. There is also an outside boat, the Astrid, which is gathering up fruit with the intention of sailing to Montreal.

Allowing that these three steamers are successful in securing full cargoes of fruit, their total capacity can hardly exceed 100,000 boxes; and Montreal fruit dealers are disposed to place the direct importations this spring in the vicinity of that figure. The bulk of these will consist of oranges, for, as we pointed out last week, there are reasons why the importations of lemons will not be as heavy as those of last year. THE CANADIAN GROCER is given to understand in this connection that there have been some 20,000 boxes of lemons purchased to arrive. These purchases are chiefly restricted to Montreal houses, though some western firms have been indulging, the quantity being distributed in lots of 3,000 to 4,000 boxes over about ten different firms of importers. Most, if not all, of this fruit has been bought on the basis of 11s. 9d., f.o.b. Montreal.

SPECIAL MEETING OF PACKERS.

A special meeting of the Canadian Packers' Association was held in the Board of Trade building, Toronto, Thursday and Friday last, Mr. W. Boulter presiding.

It was decided to advance the price of gallon apples 5c. per dozen. "We have," said an officer of the association, "exported large quantities of gallon apples this season. They are very popular in England. The result is that we are now nearly cleaned out of gallon apples, and another advance is likely. Threes are also nearly cleaned out."

"You have been importing a good many tomatoes too, have you not?"

"Yes, I should suppose the association has exported from ten to fifteen carloads within the last six weeks. By-the-bye, we are also nearly cleaned out of pumpkins, and they really ought to be advanced."

THE CANADIAN GROCER understands that the Prince Edward Canning Company was received into membership during the meeting.

THAT INSURANCE ARTICLE.

MUCH interest is manifested in certain quarters regarding the article in last week's CANADIAN GROCER, entitled "Unwise Insurance Men," and outside of the Underwriters' Association it is universally conceded that we have taken the right stand on the question.

R. & T. Watson, wholesale grocers, Toronto, are among those who may be seriously affected by the companies' determination (or threat) to raise the premium. Already the Queen City Company has cancelled one policy for \$1,000 which they held, and the other companies have raised the premiums from \$1.50 to \$3.30 per \$100. Of course these new rates do not take effect until the expiration of the old policies, and it is to be hoped that before that time comes the insurance men will have reconsidered the whole question and decided upon a more sensible line of action. R. & T. Watson are particularly annoyed that the insurance companies have given them no official notice of the change in the tariff. This they have found out incidentally through a second channel. The Messrs. Watson state that they will not pay this exorbitant figure. If necessary they will forsake the underwriter combine companies and insure in some of the outside companies, which are willing to take their risks.

Mr. John Taylor, of the Morse Soap Company, when interviewed regarding the situation, said that the companies had threatened to raise the premiums of his policies, but he did not feel anxious, as he could easily get all the insurance he wanted to carry in outside companies.

THE CANADIAN GROCER, on visiting the office of the Underwriters' Association in Toronto, was informed that R. & T. Watson's premium would have been raised anyway, whether there had been any big fires in Toronto or not. Nine months ago the underwriters had adopted a schedule which classified confectionery and tin-stamping factories as particularly hazardous risks, and made the rate on them \$3.30 per \$100. It is said, however, that this schedule will be adhered to whether or no.

BEET SUGAR FACTORY.

M. Lefebvre & Co., beet sugar manufacturers, of Montreal, propose erecting a beet sugar factory at Leamington, Ont. The factory will employ 300 hands four months in the year, and 50 hands all the year round. The machinery will cost \$125,000. The factory will use 500 tons of beets a day. The refuse will feed 2,000 head of cattle. The factory complete will cost \$350,000, and of this sum the farmers will be asked to take \$150,000 in shares.

MONEY AND STOCKS.

THERE has been a marked weakening in Bell Telephone owing to the strong syndicate being formed in the United States and Canada to compete with existing lines. This new syndicate proposes to divide Canada into three districts—east, west and central. One thing seems certain, the general public will not suffer by the competition of the new company.

* * *

Bank stocks are dull and slightly weaker.

* * *

Commercial Cable is not attracting much attention, but it keeps fairly steady. "This stock," said a broker, "is a good purchase around 140. Unlike the telephone and electric light companies, its capital is not invested in a lot of patents; its money is invested in plant, etc. This makes it a pretty safe stock."

* * *

Another attack of weakness is upon Toronto Street Railway stock. The direct cause appears to be writs materialized and writs anticipated. In spite of fairly good earnings, electric railway stocks are growing less popular with investors, and I suppose speculators too, for that matter. The reason is that they are beginning to recognize the inherent weaknesses of these concerns. "It is now a recognized fact," remarked a broker to me, "that the first year is as a rule the best for electric railway companies. After that there is always some improvement that has to be put in, while dynamos and other pieces of machinery are likely to give out at any time. Then look at the money these electric railway and electric light companies have invested in patents?"

* * *

The hardening tendency of the money market that I have been noticing for some weeks past is more pronounced this week. The ruling rate for sharp call loans is 4 per cent. Owing to the anticipated advance in rates call loans seem at the moment to be preferred to time loans.

* * *

"There will be no advance in C. P. R. stock for some time," said a well-known financial man to me; "at least until they have used up all their obligations on the leased lines. You see, the main line is being milked to feed the leased lines, which are losing concerns. Some new arrangements will have to be made. The C. P. R. will either have to throw them up or compel them to make better terms. As they cannot exist alone, they will probably agree to better terms." ARGUROS.

PRISON-MADE BROOM HANDLES.

BEFORE the Public Accounts Committee of the Ontario Legislature on Friday Mr. J. C. Taylor, of Taylor, Scott & Co., Toronto, made a series of statements purporting to show the effect of prison labor upon free labor. He said that, as a result of the Government work done in the Central Prison, he had in his workshop married men with families who made washboards at \$5 a week. His firm had, he said, discontinued making broom handles, because, whilst it cost them \$14 or \$15 to make a thousand, they could buy them from the Central Prison for \$10 per thousand. Washboards, which had cost the firm to make \$1.31 per dozen, formerly sold for \$1.70. Now, through the competition of the Central Prison, per H. A. Nelson & Sons and Walter Woods & Co., they were selling at less than they cost to make. As a result of the keen competition the wages paid his employes had been reduced about 40 per cent.

The broom contracts between the Nelsons and the prison for last year being shown to Mr. Taylor, he pronounced that they were most favorable to the contractors. He had, he said, never had an opportunity of tendering for the broom contract. Last summer he heard that the contract was expiring and wrote to Inspector Noxon about it; but he received a reply saying it had been re-

newed. He would have been willing to pay more than Nelsons' contract; there was no large maker in Canada who would not be willing to do so. One manufacturer he knew had expressed his willingness to pay 10 cents a dozen more than was being paid by Messrs. Nelson, and then would consider it a great bargain.

Broom making at the prison, Mr. Taylor assured the committee, had had the effect of reducing the wages 10 per cent. all round, with the result that no skilled mechanic earned such small wages as the broom maker. If Messrs. Nelson were to cut the prices for brooms as low as they might, he declared it would close his firm up.

THE CANADIAN GROCER on Monday asked Mr. Nelson, of H. A. Nelson & Sons, for his opinions on this subject. He said in the first place that only a few broom handles were ever made in the Central Prison. It was found that broom handles could be brought in from other parts of the province cheaper. Then again, in Chicago the best maple broom handles were quoted as low as \$9 per 1,000, while from the Central Prison the same article was sold for \$10.

"As regards washboards," said Mr. Nelson, "Eddy also sells them at \$1.21 a dozen, and Taylor Scott & Co. at \$1.20 a thousand, three off. Now, we sell our prison made washboards at \$1.10 straight. As far as brooms and whisks go, we supply the

material and pay the Government for making them. The prison shops never paid until we took them over some fifteen years ago, and since then they have made money. The prices paid for these prison goods compare favorably with those paid at other prisons in the United States."

As a side issue it may be maintained that Mr. E. B. Eddy, of the E. B. Eddy Co., states that the Ontario Government are violating a verbal agreement made with him some years ago when he purchased all machinery for woodenware and washboard manufacture, they admitting then that they were making these goods at a loss, and infringing upon the rights of legitimate trade.

THE LATE MR. WATSON.

John C. Watson, a prominent Montrealer, died suddenly in Bermuda last week, where he had gone for his health. Mr. Watson was up to 1880 an extensive importer in china, glass and wall paper, entering subsequently on the manufacture of wall paper, the firm being Watson, Foster & Co. For a year Mr. Watson has been a special partner in this well-known firm, Mr. Foster being managing partner. At St Paul's Church last Sunday, of which church Mr. Watson was a prominent member and trustee, the pulpit was draped in black and Rev. Dr. Barclay made a feeling reference in his sermon to the demise of the lamented gentleman. The remains will be brought home from Bermuda for interment.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, April 11, 1895.
GROCERIES.

THE volume of trade is gradually getting better in spite of the bad condition of country roads. Buying is a little more general in staple lines than it has been for some time, but it is confined to actual requirements. The increased demand seems to be spread over sundries including canned goods, teas and spices. The principal feature in canned goods is an advance of 5c. per dozen in the packers' price of gallon apples, which are scarce, as also are 3's. Sugars are a little stronger, although without quotable change in price. Demand is a little better than a week ago. The coffee market continues to occupy a strong position. The usual seasonable demand is setting in for rice. Foreign dried fruits are in much the same position as before, except it be that there is a little better movement in currants. Payments are only moderate.

CANNED GOODS.

There is a slightly increased movement to report again this week, and the situation is generally strong. A good many staple lines are selling. Gallon apples have been advanced 5c. per dozen by the packers. Wholesale figures are unchanged. Demand for them is good, with stocks of both gallons and 3's nearly cleaned out. The association also reports a good demand for pears. A brisk enquiry has sprung up for canned pumpkins, and the packers are talking of advancing prices, owing to light stocks. Chicago canned meats are from 10 to 15c. per dozen higher. An increasing demand is reported for salmon, with the finer and

better known brands, scarcer and higher. We quote: Tomatoes, 87½ to 90c. for choice and 85c. for inferior and old stock; corn, 90 to 95c. for choice and 87½c. for common; peas, 82½ to 87½c. for ordinary and \$1.40 for fancy; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.10 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.45 to \$1.50 for choice and \$1.35 for good red fish of not so well known brands in tall tins, and \$1.60 to \$1.65 in flat tins; do., second quality, \$1.15 to \$1.25; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

The coffee market remains steady, with finer grades scarce. Demand is fair. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

The usual seasonable demand is setting in, but there is nothing special beyond this to note. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Some improvement is to note in the demand for this line. There has been a reaction in the price of cloves, pepper, etc., in the primary markets, but the lower prices have not affected this market. Pure Jamaica ginger is scarce and wanted. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

There is no change to note in this market. We quote: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

Demand for sugar is a little better than a week ago, there being more enquiries for carload lots. The American and Cuban raw markets are firm, on account of the heavy buying by speculators, together with the heavy purchasing by Canadian refineries. Beet sugar is, on the other hand, weaker. We quote: Granulated—domestic, \$3.40 to \$3.50; do., No. 2, 3¼c.; yellows, 2½ to 3¾c. Raw—Demerara, dark, 2¾c.; golden, 3 to 3¼c.; bright, 3¾c.

N.Y. Journal of Commerce, April: Raws, remain well in hand, with tone of market much the same as at the close of last week. Some importers have the idea that it would be well to keep on selling a while longer without making any special effort to raise the line of value, but in general the inclination is to look upon conditions at primal points as strengthening, and offerings are reduced accordingly. We note sales of 5,500 bags centrifugal to arrive and go to Canada from this port at 2 7-32c. for 95 test, cost and freight: 4,900 bags do. at Breakwater, to come to local refiners at 2 3-16c. cost and freight for 95 test; 2,737 and 960 bags centrifugal at 3c. for 96 test, and 1,140 bags molasses sugar at 2 7-16c. for 89 test.

SYRUPS.

Demand is fair for syrups. Very bright syrups are scarce, and the Lower Province refiners appear to have no syrups of any

TORONTO

MARKETS—Continued

kind. We quote: Dark, 25c.; medium, 28 to 30c.; bright, 35 to 40c.; very bright, 45 to 50c.

MOLASSES.

The market is quiet and unchanged. We quote as follows: New Orleans, barrels, 26 to 28c.; half-barrels, 30½ to 32c.; Barbadoes, barrels, 28 to 32c.; half-barrels, 30 to 34c.

TEAS.

Retailers continue to buy from hand to mouth, but there is a fair quantity of low and medium grades going out notwithstanding, both in blacks and Japans. Young Hysons and high grade blacks are still attracting little or no attention from retailers. Indian and Ceylon teas are a little easier in London. It is the general opinion that the advance in these teas was abnormal, the fruit of which is the present reaction. Holders are now prepared to take prices they would not listen to a week ago. Prices in Toronto have not been affected, the advances here not having equalled those in the primary markets. The local representatives of Indian and Ceylon tea houses report the sale of a good many fine teas at from 9 to 11d. per lb. Generally speaking the wholesalers appear to be freer buyers of teas than they were. That lower prices have induced this is borne out by the following extract from a London letter: "The demand for Indian and Ceylon teas in the United States and Canada is making progress, and the lower quotations now ruling in London are attracting attention from those important markets, as well as from the Continent of Europe." The same letter says that the official estimate of the total Ceylon tea crop for 1895, is placed at 90,000,000 lbs., and it is expected that about 80,000,000 lbs. will be available for the United Kingdom. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUITS.

There is a seasonable increase in the demand for currants. The Avlona sailed from Patras on the 29th ult. with a cargo of currants for Montreal, and is expected to reach her destination about the middle of May. From what THE CANADIAN GROCER can gather, importers have to thank Dem. Schisas for guaranteeing the Avlona sufficient cargo to call at Patras. Other shippers, it is said, had little or nothing for her, and the steamship company only agreed to send her in on Mr. Schisas' guarantee. Prices are unchanged. We quote: Filiatras, half-barrels, 4 to 4½c., barrels, 4½c.; fine Filiatras, half-barrels, 4¾c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 5½ to

6c.; Vostizzas, 6½ to 7c. in cases and half cases.

Valencia raisins remain much as before, the cheaper kinds receiving the most attention. We quote: Off-stalk, 3¼ to 3¾c.; fine off-stalk, 4 to 4¾c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Sultana raisins are quiet and firm, ruling prices being 5½ to 7c.

Prunes continue in good demand. Prices are firm at the recent advance. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 5 to 5½c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 7 to 7½c. per lb. "Atlas,"—"D," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "Unicorn," 5 to 5½c. Bordeaux prunes, 4½ to 6½c.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote nominally: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

Demand continues good for California dried fruits. We quote according to quality: Peaches, 10½ to 13c.; apricots, 10½ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

BUTTER AND CHEESE.

Really good butter is in somewhat better demand than last week, but the lower grades are, if possible, harder than ever to dispose of. Advances from the east are discouraging, and there is a feeling that the poorer classes of butter must be got rid of at any sacrifice within a month in order to make way for fresh spring makes. Prices for lower grades have fallen. We quote: Summer dairy and store packed—Choice, 10 to 13c.; low grade baking butter, 7 to 8c.; fresh large rolls, 12 to 14c.; pound prints, 14 to 16c. Summer creamery, 12 to 15c. Winter creamery—Tubs, 20 to 21c.; pound prints, 21 to 22c. August and September makes of Canadian cheese bring 8 to 10½c., and new Canadian cheese is quoted at 11c. Small Stiltons bring 12 to 12½c.

GREEN FRUIT.

Wholesale dealers generally are talking as though business were steadily improving, and the green fruit market, on the whole, wears a more encouraging aspect than for some weeks past. Bananas are moving freely, oranges are selling well, and some dealers are in receipt of late consignments of cranberries. Prices are not much altered. We quote as follows: Lemons—Messinas, \$2.75 to \$3.50. Oranges—Valencias, small crate, \$4.25 to \$4.50, and Jumbo crates, \$5.25 to \$5.50; Messinas, \$2.75 to \$3; California seedlings, \$2.75 to \$3.50; California navels, \$3.50 to \$4. Bananas, \$1.50 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. Grapes—Malagas, \$5 to \$6.50 per keg. California dried fruit—Apricots, 12½c.; peaches, 13 to 13½c.; cranberries, \$3.50 per box.

COUNTRY PRODUCE.

BEANS—Are firm. Choice hand-picked bring \$1.40 to \$1.60 per box.

DRIED APPLES—For export are bringing 6 to 6¼c. a lb.

EVAPORATED APPLES—In 50-lb. boxes: 7 to 7¼c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.75 to \$3 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

POTATOES—Although there is a feeling that there are a lot of potatoes in the country, they keep firm and high. By a temporary advance they are quoted now at 6½c. on the track and 75c. out of store.

MAPLE PRODUCTS—There is very little doing. We quote: Sugar, 8 to 8½c. per lb.; syrup, 80c. in 5-gallon lots and 90c. in gallon tins.

POULTRY—Scarce on a firm market. Turkeys bring 12c., geese 7 to 8c., chickens 30 to 75c., ducks 50 to 90c.

EGGS—There is a temporary scarcity of eggs, and, as a result, they are quoted half a cent higher than a week ago, viz.: 12½ to 13c. a dozen.

FISH AND OYSTERS.

The demand for new caught fish is greater than the supply. Hence prices are firm, though unaltered. Fairly good trade is reported for the last few days. We quote: Salmon trout (frozen), 6½ to 7c.; white fish (frozen), 6½ to 7c.; No. 2 white fish, 4c.; skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; market cod, 3 to 5c.; steak cod, 6 to 6½c.; haddock, 4 to 4½c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; sea herring (frozen), \$1.25 per 100 fish; blue pickerel, 4 to 5c. lb.; yellow ditto, 6c. per lb.; mackerel, 14c. each; pike, 3 to 4c. lb.; cod, 6c. per lb.; flitch cod, 5c.; finnan haddies, 6½ to 7c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; Vancouver halibut, 6 to 7c.; large halibut, 10 to 13c. Oysters, \$1.20 per gallon for standards and \$1.50 for selects.

PROVISIONS AND DRESSED HOGS.

Dressed hogs and their products remain firm, with slight advances in some lines.

DRESSED HOGS—\$5.90 to \$6.20 per 100 lbs.

BACON—Long clear, 7¾c. for carload lots, 7¾ to 8c. for ton and small lots; breakfast bacon, 10½c. to 11c.; rolls, 8c.

HAMS—Large, 22 lbs. and over, 9½c. to 10c.; medium, 15 to 20 lbs., 10½ to 11c.; small hams, 10½ to 11c.; pickled, 9 to 10c.

LARD—Pure Canadian, tierces, 8½c.; tubs, 8¾c.; pails, 9c.

The Best of Everything

CLEMES BROS. - TORONTO**BARREL PORK**—Canadian heavy mess, \$15.50; Canadian short-cut, \$16; clear shoulder mess, \$13.50 to \$14; shoulder mess, \$13 to \$13.50.**SALT.**

A fair trade is being done, and prices are unaltered. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

FLOUR AND FEED.**WHEAT**—Maintains the local advance made some time ago. We quote: White, 70c.; red, 69c.; goose, 68½c. per bush.**OATS**—Steady at 40 to 41c.**BARLEY**—Remains at 49c. per bush.**FLOUR**—Prices are unchanged. We quote: Ontario straight roller, \$2.65 to \$2.75; Manitoba, \$3.60 to \$3.65; patents, \$3.75 to \$3.90.**BREAKFAST FOODS**—Prices are the same as those of last week, and a fair trade is being done. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; cornmeal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.**SEEDS.**

The market is steady and there is a firmer feeling in red clover on account of the sharp advance made in the markets of the Western States within the past few days. Prices are unaltered. Alsike is quoted thus by jobbers: Prime to choice, \$4.80 to \$5; really fancy, \$5 to \$6.60; and lower grades \$4.

Good clover now brings \$6.20 to \$6.50.

In timothy the jobbing prices to the trade are \$3 to \$3.50 for prime to choice grades of machine-threshed seed, and a little more for the bright unhulled article.

HIDES, SKINS, WOOL AND TALLOW**HIDES**—Green hides have advanced another half cent, and now stand at 5½c. for No. 1, 4½c. for No. 2, and 3½c. for No. 3. For cured 6½c. is asked. The supplies are light.**SHEEPSKINS**—Good stock is quoted at 85 to 90c.**CALFSKINS**—Are a little more plentiful, but prices remain steady at 6c. for No. 1 and 4c. for No. 2.**TALLOW**—Is steady. Jobbers quote 5 to 5½c. and sell at 5¾c.**WOOL**—Canadian fleece is quoted nominally at 19 to 20c., there being none on the market. In pulled wools best supers are quoted at 19 to 21c., and extras at 21 to 22c.**PETROLEUM.**

Since our last issue there has occurred another advance all round in oils. This is due to the scarcity of crude both at Petrolea and in Pennsylvania. We quote in 5 to 10 bbl. lots, imperial gallon Toronto: Canadian, 12c.; carbon safety, 15 to 16c.; Canadian water white, 16 to 17c.; American water white, 19c.; photogene, 20c.

The Petrolea Advertiser has this to say of the situation: Crude is steadily going up, and we may reasonably expect any amount of excitement in oil circles at any

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

MARKETS—Continued

time now. Values are rapidly rising in the United States, and will in all probability continue to do so for some time to come.

Drilling operations will be commenced in earnest just as soon as the weather permits, and we look forward to an unusually prosperous season.

MARKET NOTES.

Hannah & Co., Toronto, want to buy potatoes.

Clemes Bros. have on hand some choice cranberries.

Large consignments of butter are to hand with Smith & Keighley.

John Sloan & Co. are in receipt of a shipment of "Sphinx U" prunes.

Smith & Keighley have in stock a new lot of "Golden" Sultana raisins.

McWilliam & Everist, Toronto, are just in receipt of a carload of lemons.

Wm. Paterson & Son report heavy sales of their high grade domestic pickles.

W. H. Gillard & Co. state that their trade for "Mallawalla" tea is steadily increasing.

H. P. Eckardt & Co. are offering a choice line of 6-crown figs in 10 lb. boxes at a low figure.

Davidson & Hay are in receipt of a direct shipment of "Anchor" brand prunes in cases.

Huntley & Palmer's price list for Canada and the United States for April has been issued.

The Eby, Blain Co. are offering new maple syrup in half and one gallon tins, and in bottles.

Wm. Paterson & Son have completed their thirty-second year in business. See ad., page 6.

Dawson & Co., Toronto, have in hand a car of fine lemons, all 300's, and entirely free from frost.

D. Gunn, Flavell & Co. have on the way to their warehouses a choice consignment of extra heavy maple syrup.

A good demand for Ewen & Co.'s "Lion" salmon and "Clover Leaf" flats is reported by John Sloan & Co.

The plant of the Kingsville Canning Co. is advertised to be sold under power of mortgage on April 22.

H. P. Eckardt & Co. report they are offering a special drive in 3-lb. tins California peaches in heavy syrup.

T. A. Lytle & Co. report a brisk sale for their new maple syrup put up in ½, 1 and 5 gal. tins and quart bottles.

Try a box of Seeley's pressed sea chickens, and you will be sure to order more. For sale by H. P. Eckardt & Co.

Rutherford, Marshall & Co. have been making heavy shipments of honey to the Lower Provinces, and have received from

the Eastern townships a large consignment of new maple sugar.

Imported salad oil in gallon tins is being offered by Davidson & Hay, at what are said to be exceptionally low figures.

Lucas, Steele & Bristol report that they are offering, by the box, some good values in fine off-stalk Valencia raisins.

The stock of C. S. Shaw & Co., crockery, Ottawa, has been sold to Gowans, Kent & Co., Toronto, at 44½c. on the dollar.

A nice assortment of California evaporated apricots and plums in boxes has arrived at Clemes Bros'. Toronto warehouse.

Dawson & Co., Toronto, are buying up potatoes in the country. They have just placed 4 carloads on the Toronto market.

A. P. Tippet & Co. are landing another consignment of Fry's "Diamond" chocolate, for which they find an increasing sale.

W. H. Gillard & Co. have left a few packages of Labrador and gibbed herrings which they offer at what are said to be low prices.

Davidson & Hay report that their sales of "Kurma" tea last week were larger than for any preceding week. Most of them were repeat orders.

At the prices they are offering, Lucas, Steele & Bristol think their marmalade and raspberry jam in pails a "snap"; they have had many repeat orders.

Clemes Bros., Toronto, have just received a consignment of Egyptian onions, the first of the season. They sell in 100 to 112 lb. bags at from \$2.75 to \$3.

The "Unicorn" prunes offered by W. H. Gillard & Co. show exceptional value, that firm says. Although their importation was large many repeat orders have nearly depleted their stock.

"Get our figures for canned fruits and vegetables before buying," write Lucas, Steele & Bristol. "We are offering the closest figures on corned beef we have ever been able to do.

Ceylon and Indian teas, according to statements of some jobbing houses, are being used here more extensively for mixing purposes, and also selling better on their merits. —N.Y. Journal of Commerce.

The Toronto Biscuit and Confectionery Co. are showing a marmalade that is claimed to be a superior article. They say it is not beaten by any imported, and they are below water-line with prices.

A direct importation of golden tipped choice Ceylon tea in 20-lb. boxes and 50-lb. half chests. "These are handsome in leaf, rich in liquor, and show excellent value," said a representative of the house.

A line, "Sole agents for Toronto," inadvertently got into the advertisement of Perkins, Ince & Co. last week. This line made it appear that the firm was the sole

agent in Toronto for Argumbau's Valencia raisins, which is of course something Perkins, Ince & Co. would not claim to be.

The following brands of Dufour's French plums in cases are now to hand with Lucas, Steele & Bristol: "Superior," "Choice," "Extra," and "Selected." They also offer low figures on Bosnia prunes, in cases.

Lucas, Steele & Bristol report all back orders for Hillwattee filled. The sale of this blend has been beyond their expectations this spring, the firm reports. Several invoices of choice Ceylons are to hand this week.

Large sales of pure Seville orange marmalade, six pails in crate. This marmalade can be retailed at 2 lbs. for 25c. The firm also reports numerous sales of Allworth's "Star" evaporated cream, the season for which is now opening up.

MONTREAL MARKETS.

MONTREAL April 11, 1895.

GROCERIES.

THE week has developed no special change in the grocery market, and no great activity is to note in any particular line. The tone as a rule continues steady; in fact, in some lines it is firm and points to higher values. This is the case with tea, in which some fair sized purchases were made by jobbers since our last. There is a steady feeling in sugar and coffees also, and the same can be said of spices. Molasses is rather easier in feeling, while no change is to note in syrups. Dried fruits are featureless, and canned goods are steady, with packers firm in their views on both vegetables and fruit for any fresh supplies. In fish first offers of B.C. canned salmon have been made, but the price is hardly a fair criterion.

SUGAR.

The sugar market is without important change, but the feeling rules firm in sympathy with outside advices, and values are well maintained. Demand from refiners' hands has been quite good during the past week, while there has been a satisfactory jobbing movement also. Granulated has sold in round lots from the refineries at 3 5-16 to 3¾c., the inside for 100 bbl. lots, and the outside for 50 bbls, while there has been a good demand from jobbers for yellows at the following range: Low grade yellows, 2 7-16 to 2½c.; mediums, 2¾ to 2½c., and brights, 2¾ to 3. The regular jobbing range in sugar is unchanged, and we quote as before at about ¼c. advance on refineries' price as follows: Granulated, 3¾c., and yellows, 2½ to 3¾c., as to grade.

SYRUPS.

Business in this market has not shown much activity, demand being limited from first hands, as jobbers appear to be pretty well supplied for the time being. The regular jobbing demand has been fair. Values all round are steady on the whole, round

Care and cleanliness assured.

F. W. FEARMAN HAMILTON.

THE BEST IN THE MARKET.

Ask your wholesale grocer for it.

THE FOAM YEAST CO., LTD. TORONTO.
79 Esplanade.

lots changing hands at 1½c. to 2¼c., and a slight advance on this basis being asked for ordinary jobbing parcels.

MOLASSES.

There has been a fair demand experienced for Barbadoes molasses, and the market rules steady. Sales of round lots of Barbadoes have transpired at 28½ to 31½c., as to quality, the inside being for stock to arrive, net cash 30 days. The regular jobbing basis is unchanged at 32½c. in hogsheds, and 35c. in barrels and half-barrels.

RICE.

There is a good demand for rice, and prices are well maintained as follows: We quote: Japan standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

The spice market is steady on the whole. Jobbers have not been doing much buying, but we note some transactions in the market at 7½c. for black pepper and 8½ to 9c. for cassia in invoice lots. For regular jobbing parcels we quote: Penang black pepper, 9c.; white pepper, 11 to 15c.; cloves, 9 to 20c.; cassia, 9 to 20c.; nutmegs, 40 to 90c.; and Jamaica ginger, 18 to 25c., according to grade.

COFFEES.

There has been a good demand for green coffee in bags during the week, manufacturers putting through some good sized purchases of both Maracaibos, Javas and Mochas, all of which rule firm in tendency. The inside for round lots of Java this week is 24c. and Mocha 27½c., while Maracaibo is held firm at 20½c. In a regular way we quote green coffee in bags as follows: Maracaibo, 20½ to 22c.; Rio, 18½ to 20c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

There has been an improvement in the volume of business in tea since our last, and the tone is very firm, all outside advances tending to strengthen sellers' views as to the value of their property. Pea leaf gunpowders have been in good demand, and are scarce at values ranging from 20 to 25c., and sellers are disposed to ask an advance. Low grade Congous and Japans continue in good demand, while stocks are small and prices firm. We note fair sized sales of each. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUIT.

There has been a steady but moderate business to report in California raisins during the week at steady prices. We quote: 4-crown loose Muscatels, 6¼ to 7c., and 3-crown do., 5½c.

Demand for Valencias is not brisk, but with light stocks prices rule very firm at 3¼ to 4½c. for off-stalk, and layers 5½ to 5¾c., as to grade.

MONTREAL MARKETS—Continued

There is only a small trade to note in Sultanias, which are a very small stock, and are held firm at $5\frac{1}{2}$ to 7c., as to quality.

Advices on currants continue firm, but the local enquiry continues dull. Prices on spot are steady as follows: Filiatras and Provincials 4 to $4\frac{1}{2}$ c., in cases, Patnas 5 to $5\frac{1}{2}$ c., and Vostizzas 7 to $7\frac{1}{2}$ c.

Prunes are quiet and firm for all kinds. No cheaper grades of California are now offering than 9c. We quote: Bordeaux, 4 to $4\frac{1}{2}$ c.; Bosnias, $4\frac{1}{2}$ to 5c., and Californias 9c.

Figs are quiet and steady at 10 to 12c. in boxes, as to brand

Dates are dull and unchanged at $3\frac{1}{2}$ to 4c.

Dried apples are firm at 6 to $6\frac{1}{2}$ c., and evaporated at 7 to $7\frac{1}{2}$ c., as to grade. Stocks are light in both descriptions, and holders independent.

NUTS.

Business in nuts is quiet and unchanged. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 13 to 14c.; shelled ditto, 24 to 25c.; filberts, 7 to 8c.; and pecans, 9 to 11c.

CANNED GOODS.

There has been little change in the situation of this market. A fair amount of business is doing, and on any new business to be done here canners are firm in their views both on vegetables and fruit. The first offer of B.C. canned salmon was made at the close of last week at equivalent to \$4.20 f.o.b. on the Coast. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.10 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 95c. to \$1 per doz.; marrowfat peas, 90c. to \$1 per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green Gages, \$2 to \$2.25; blue plums or Damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, 90c. to \$1.10.

FISH.

There is a fair jobbing trade in fish and the season is almost over, holders clearing out what stock they have of fresh fish at what they can get, in many instances netting a sensible loss. Haddock sells in a small way at 1 to 3c. per lb.; fresh herrings at 50 to 80c. per 100; bloaters at 75c. per box; boneless cod at 6c. per lb., and smoked herrings at 10c. per box. A few hundred barrels of ordinary pickled herrings are still on the market and selling slowly at \$3 to \$3.50; No. 2 B.C. salmon at \$10 to \$11; and No. 2 mackerel at \$13.

GREEN FRUIT.

APPLES—The apple market is without change, and we quote \$3 to \$5.50, as to quality.

ORANGES—There is only a quiet business doing in oranges. We quote: Valencias, \$3.75 to \$4.50, and Messinas, \$2 to \$3; ditto, bloods, \$3.50 to \$4.50; Californias, \$3.25 to \$4 per box, and Jamaicas, \$8 to \$9, and Havanais \$6 to \$8 per bbl.

LEMONS—There is no change in this fruit. Demand is quiet and prices steady at \$2.50 to \$3.50.

GRAPES—The grape market is without change. We quote \$7 to \$8 per bbl. for Almerias.

BANANAS—Receipts of these are on the increase, but prices have ruled fairly steady at \$1 to \$2 per bunch.

PINEAPPLES—Continue scarce and firm at 20 to 30c.

COUNTRY PRODUCE.

EGGS—The egg market has been subjected to considerable fluctuation since our last, under largely increased receipts, and prices dropped over 2c. per dozen. At this writing, however, values are firmer in tone at 14 to 15c.

HONEY—Quiet and unchanged. We quote: Comb, 12 to 15c.; new extracted, 7 to 9c.; old ditto, $4\frac{1}{2}$ to $5\frac{1}{2}$ c.

MAPLE PRODUCTS—There is a good active trade in these, and with light receipts the market is kept clean. We quote: New syrup, 6 to 7c., and new sugar rather lower, at 6 to 7c., with old stock heavy at 5c.

BEANS—These show no change. We quote: Hand-picked, \$1.50, and lower grades, \$1.25.

HOPS—Quiet and featureless at 5 to 7c., as to grade.

ONIONS—Demand is fair and prices steady at \$1 to \$2 per bbl., the wide range being due to great differences in quality. Fresh receipts of Bermudas sold this week at \$3.25 to \$3.50 per crate.

POTATOES—There is a fair demand for these, but quality is poor as a rule. We quote a range of 60 to 70c., as to quality.

PROVISIONS.

The demand for provisions in small lots is fair, and the market was moderately active and steady. We quote as follows: Canadian short cut, clear, \$16 to \$16.50; Canadian short cut, mess, \$17; hams, city cured, per lb., 9 to $10\frac{1}{2}$ c.; lard, Canadian, in pails, 9 to 10c.; bacon, per lb., 9 to $10\frac{1}{2}$ c.; lard, common, refined, per lb., 7 to $7\frac{1}{2}$ c.

FLOUR AND MEAL.

The demand for flour on local and country account continues good and the market rules active and firm. We quote: Winter wheat, \$3.60 to \$3.75; spring wheat, patents, \$3.75 to \$3.90; straight roller, \$3.15 to \$3.25; straight roller, bags, \$1.50 to \$1.55; extra, \$2.75 to \$2.85; extra bags, \$1.35 to \$1.45; superfine, \$2.50 to \$2.60; Manitoba strong bakers', \$3.75.

The demand for feed continues good and the market steady. We quote: Bran, \$19 to \$19.50; shorts, \$19 to \$20; mouillie, \$23 to \$24.

There is no change in oatmeal, business being quiet and of a jobbing character. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

CHEESE AND BUTTER.

The cheese market is without change. The movement of cheese outward goes quietly on, some 11,580 boxes being moved last week, both through and local. Of these 4,961 were to Liverpool, 4,680 to London, and 1,939 to Bristol. This makes the total shipments to date since the close of navigation, 329,082 boxes. We quote nominally $9\frac{1}{2}$ to 10c.

The butter market remains quiet and unchanged. A steady jobbing demand is experienced, which keeps the market well cleaned up of winter creamery at $21\frac{1}{2}$ to 22c.; fresh Townships dairy, 19 to 20c., and fresh Western dairy, 14 to 15c. Held creamery is a slow sale at 14c., and held Western dairy at 7 to 10c.

ASIIES.

The receipts of ashes continue small, and the market dull and steady. We quote: First

pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6.00 to \$6.10 per 100 lbs.

MONTREAL TRADE NOTES.

Cables from Barbadoes state that the crop is progressing slowly, and that the offerings are not large.

Mr. Lightbound is compelled to stay in his house, the result of a severe cold caught during a recent visit to Toronto.

Laporte, Martin & Co. are offering special value in Barbadoes molasses this week, and call attention to their advertisement.

R. S. McIndoe has been appointed agent in Toronto for Beardsley's shredded codfish and Gordon & Dilworth's pickles, etc.

The first offer of new pack canned B. C. salmon was made on Thursday last to arrive, at equivalent to \$4.20 f. o. b. on the coast.

The first consignment of Barbadoes molasses, new crop, is expected by the end of this month, and is consigned to Laporte, Martin & Co., of Montreal.

Advices from California to A. P. Tippet & Co. cite a steady feeling in dried fruit. All the lower grades of California prunes have been cleared off the market.

Ewing, Herron & Co., Montreal, are advertising black pepper, said to be pure, at $5\frac{1}{2}$ c. per lb. "It is an extraordinarily low price for pure pepper," they write.

Rose & Laflamme note an increasing sale of Batger's "Nonpareil" jellies this spring, and also for new marmalade, having placed much larger quantities of both these lines.

Cables on Monday stated that the first direct fruit steamer had sailed from Palermo. The expectations now are that only two cargoes will come direct to Montreal this spring.

Halifax shippers have been rather reckless with their consignments of fresh fish to this market. As a consequence sales have been made during the past week at a considerable loss.

Fresh receipts of Bermuda onions came to hand on Saturday morning last. They are meeting a good reception. Vipond, McBride & Co. and Hart & Tuckwell are among the larger holders.

The ship Macedon, Captain Macmaster, is reported as sailing from Iloilo, Philippine islands, for Montreal with sugar on January 16. The sugar fleet from the East Indies for the St. Lawrence is not, so far this year, as large as usual.

Edward Valpy, of Huntly & Palmer's spent a few days here. With the dealers in fancy groceries, their biscuits are ever popular, and it is a trade which retailers can increase with their wealthier customers. Rose & Laflamme are local agents.

Though fish prices are reported in Montreal as being good in Halifax, one sale at \$4 per quintal being recorded there, which

is a good price for this season of the year, the Montreal import trade is practically over for the time being. Stewart Munn & Co. have cleared out the remnant of the season's stock of green fish (50 barrels) for local consumption.

At a meeting of the directors of the St. Lawrence Sugar Refining Company, Limited, held yesterday, Mr. A. Baumgarten was elected president, and Mr. Theo. Labatt vice-president, and Mr. B. McNally was appointed secretary-treasurer.

Huyler's, New York, have opened an agency here, and will also establish one in Toronto. H. H. Stacy, one of the firm, was here last week. He does not think they can do much with their confectionery, the jobbing price of which is 60c. in New York. They will push only their cocoa chocolate.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., April 11, 1895.

BUSINESS is now active. The spring orders are being shipped to the Annapolis Valley, Nova Scotia, where St. John merchants do a large and satisfactory trade. The prospects for the river opening soon are good. This will add much to business activity, particularly at Indiantown. Prices are all firm. Flour, which at last writing seemed rather easier, is again higher and firm. Our candy manufacturers report business not just what it should be. The prices are easy, figures being very low. Our broom and brush factory report business opening up satisfactorily. Prices show no change. The oil market is firm with a good demand. American burning oil is up one cent, and Canadian half a cent. Turpentine is being sold here at less than in other markets. An advance is looked for. Burning oil is quoted: American, 20c.; best Canadian, 18c.; second, 13½c.

SALT—Demand light. Prices remain unchanged. Some 10,000 to 15,000 bags are expected to arrive shortly. The sale of rock salt here has almost completely fallen off, there being not 10 pounds sold now, where not a great many years ago tons were disposed of. The fact that no ships are being built here is said to be the reason. Prices are: Coarse, to arrive, 43 to 45c.; out of store, 50 to 55c.; fine factory filled, \$1 to \$1.15; 5 lb. bags, \$3 per bbl.; 10 lb. bags, \$2.80 per bbl.; 20 lb. box, 20c.; 10 lb. box, 12c.; cartoons, \$2 per doz.

CANNED GOODS—Demand is good. Stocks of tomatoes in this market are low. In tomatoes, and perhaps in other lines, some parties are offering below the market. This is sometimes accounted for by the goods being old stock. This does not of necessity mean bad stock. In oysters, and particularly beef, the market is firm. Owing to a duty on pineapples going into the States the canned fruit will go higher. We quote clam chowder 25c. per doz. lower for these goods; a better demand is noted. We quote: Corn, \$1; peas, 95c.; tomatoes, \$1.05; corned beef, 2 lb. tins,

\$2.75 to \$2.80; 1-lb. tins, \$1.65 to \$1.75; oysters, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.70; 2's, \$1.90 to \$2; lobsters, \$1.75 to \$2; haddies, \$1.40; salmon, \$1.35 to \$1.40; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—There continues to be a light demand. In evaporated apples those who bought in time are now making a good profit. Prices are firm and holders are not pushing sales. In dried, stocks are light, as is demand. Prices are firm, but show little advance, they having opened higher in proportion than evaporated. Currants continue firm with light stocks, but, as with raisins, there is little doing. In prunes the market is firmer, though no advance has yet been made here. Prices are as follows: Sultana raisins, 6 to 7c.; Valencia, 4¼ to 4½c.; layers, 5¼ to 5½c.; London layers, \$2.10 to \$2.25; California loose Muscatels, 5½ to 6c.; currants, bbls., 3¼ to 4c.; half-cases, 4¼ to 4½c.; evaporated apples, 8¼ to 8½c.; dried apples, 5½ to 5¾c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.

GREEN FRUIT—Business is active. In apples demand is good and low priced fruit is hard to get. There are but small stocks of any kind. In oranges there are large quantities of all kinds except Floridas, of which there may be said to be none in this market. Prices have an easy feeling, and it looks as if we would continue to have cheap oranges. There are now here some extra grades of Californias. Bloods are rather lower. Pineapples are very scarce. Bananas are now coming in this market green, and buyers can be supplied with any priced bunch they wish. Old onions are about out of the market. New Egyptian are expected shortly. Prices are: Apples, best, \$2.50 to \$3; seconds, \$1 to \$2; Valencia oranges, \$4.25 to \$4.50; large, \$5.50 to \$6; Messina, \$2.75 to \$3; California seedlings, \$1.75 to \$2.75; navels, \$3.50 to \$4.50; bloods, \$2.50 to \$2.75; lemons, \$4 to \$4.50; bananas, \$1.50 to \$2.25; onions, \$2.50 to \$3.

DAIRY PRODUCTS—Butter in the produce line and smoked herrings in fish are something alike. But it is impossible for anything to be more unsatisfactory than is the butter market. A party buying some creamery at under 16c. has been able to run the best part of it off fairly quickly, but this is the only report of any demand I have been able to get. Quite a little new is coming into the market where good finds fair sale. Cheese remains as last week. No improvement in demand. But it is not thought prices will go lower. Eggs are easy. No very large quantities are coming forward. The retail price is kept so low the dealers find it hard to buy low enough to make a profit. We quote: Creamery, 17 to 18c.; dairy, 15 to 16c. Cheese, 10 to 10½c. Eggs, 13 to 14c.

MOLASSES—By the time this report is read there will, it is expected, be more molasses in this port than for some months. There are so many importers now that the profits which used to be made in this line are things of the past. There is very little now to pay for the trouble, when it is remembered that these goods are paid for before they leave the island, and that there are many other risks to be taken into consideration. About 800 sacks are expected. Price of Barbadoes will be about 30c. It is hoped the quality will be better than that of the first arrivals. We quote: New Barbadoes, 30 to 32c.; Nevis, 28 to 29c.; Porto Rico, 30 to 31c.; syrup, 33 to 35c.

SUGAR—Large quantities are moving. Wholesalers are well stocked, and in many cases quantities are bought ahead. Markets are rather firmer, and refineries are not anxious to sell futures. Prices are: Granulated sugar, \$3.50 to \$3.65; yellow, 2¾ to 2¾c.; Paris lump, 4¾ to 5c.; pulverized, 4¾ to 5c.

FISH—There is little change. In fresh gaspereaux the catch has of late been small, but during this week it is expected large numbers of fish will be taken. Lobsters as yet have hardly been seen in this market, those being caught being shipped right away to the States. Halibut as yet are only coming forward in small quantities. In smoked herring values are very low, and there is a small demand with large stocks. Pickled are easy, while dry continues firm: We quote: Cod, \$4; large, \$4.25; small, \$3.50; pollock, \$1.75 to \$1.85; bay herring, \$1.40 to \$1.50; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; Canso, \$5; smoked herring, 7c.; Digby chickens, 10 to 12c.; Halibut, 9c.; gaspereaux, 65c. to \$1.

PROVISIONS—In these lines business is more active than for some time past. It would seem that stocks through the country were getting light. All beef and pork products are marked up, and the market continues firm with further advances looked for. We quote: Clear pork, \$18.50 to \$19; mess, \$16.50 to \$17; prime, \$13 to \$13.50; extra plate, \$14 to \$14.50; plate, \$13 to \$13.50; pure lard, 9½ to 10c.; compound, 8½ to 9½c.; cottolene, 9¼ to 9¾c.; hams, 11 to 12c.; rolls, 9 to 9½c.

FLOUR, FEED AND SEED.

Flour, which at last writing appeared more steady, has again advanced, and prices are very firm. A very fair business is reported. Feed continues high. Oatmeal is firm, as is cornmeal. Bran shows light demand. Beans still have an upward tendency, with buyers backward. Oats are

Packers' Agents,

ST. JOHN, N.B.

ST. JOHN MARKETS—Continued.

rather easier, with demand good. Pot barley is again marked up. Seeds are firm and the hay market still continues dull. We quote: Manitoba, \$4.50; best Ontario, \$3.75 to \$3.80; medium, \$3.55 to \$3.60; oatmeal, \$4.15 to \$4.25; cornmeal, \$2.85 to \$2.90; middlings, \$2.3 to \$2.4; bran, \$22.50 to \$23; oats, local, on track, 43 to 44c.; Ontario, 45 to 46c.; beans, hand-picked \$1.90 to \$1.95; prime, \$1.80 to \$1.95; split peas, \$3.70 to \$3.90; pot barley, \$4 to \$4.25; hay, on track, \$9; American timothy seed, \$3.25 to \$3.50; red clover, 11½ to 12½c.; Alsike, 11½ to 13c.; buckwheat, \$1.40.

ST. JOHN MARKET NOTES.

Shippers of lime report prospects for spring business very poor.

Northrup & Co. say they can sell smoked herring at right prices.

Boneless fish in boxes, 25-lb. boxes, are selling readily. Northrup & Co. can quote special prices.

Nelson Morris, of Chicago, has advanced his quotation on extra plate \$2.25 during the past week.

Prices from Carleton county are reported as follows: Loose hay, \$4; oats, 35c.; potatoes, 65c. to \$1.

Apoahqui, Kings county, is to have a new dry goods and grocery store. The name of the firm is J. A. Campbell & Sons.

The output of the Havelock mineral spring will be handled this season by Messrs. Taylor, Dockrill & Co., of this city.

Real maple candy and sugar are now coming forward in good quantities. Other grades have been on the market for some time.

Large quantities of potatoes continue to go forward to the American market, some fourteen cars having passed through here in one day.

Freights coastwise, which are very important to St. John, are fair, and better values are looked for, there being large quantities of lumber to go to the American market.

Business at Sussex, Kings county, is very active. It is said it will take 115 cars to move the deals, tan bark and other goods which have collected in the freight yard there.

John Seeley, who does a large fish business with the West Indies, received the first Bermuda onions and tomatoes coming to this market. He had another small consignment by the last steamer.

We regret to have to report a large fire in Summerside, P.E.I. Loss about \$35,000; insurance, \$15,000. The following are among the losers: R. C. McLeod, J. D. Reid, D. McKinnon, J. A. Gourley and Geo. Muttard.

W. Frank Hatheway, wholesale grocer, of this city, and ex-President of the Board of Trade, is still away on his extended trip. When last heard from he was at Assouan,

on the Nile, visiting temples built by the Pharaohs 3000 B.C.

Messrs. C. & E. Macmichael have just received another shipment of Messrs. Maconochie Bros.' pickles. These goods are now being sold in Nova Scotia more largely than any other brand, and New Brunswick is beginning to appreciate the extra value of these goods.

We are pleased to see our merchants are more and more inclining to shorter hours and give weekly half-holidays. It is a step in the right direction. The retailers of Carleton have decided to close their stores at 6 o'clock on Wednesdays and Fridays. This, though it looks like a small thing, is very much appreciated by the clerks affected.

Prices at Summerside, P.E.I., of produce during the past week were quoted as follows: Oats, 36 to 38c.; potatoes, 32c.; turnips, 16c.; hay, loose \$5, pressed \$8; eggs, 10c.; butter, 18c. The price of mess pork on the island has been marked up 50c. per barrel.

Mr. Hardress Clarke, one of our most successful grocers, on account of ill-health has been compelled to sell out his business, which is now being carried on by Messrs. Brown & Davidson. He is going to Victoria, B.C. He said to THE GROCER: "I have found your paper a necessity, and have been much pleased at its continued improvement."

MONTREAL'S FOOD FAIR.

A PROOF of the truth of the reports of better times by R. G. Dun & Co. and Bradstreets, is the energy and enterprise shown by the manufacturers in taking up the Food Fair. It not only shows their good judgment in showing their goods to the consumer in this manner, but it speaks of a greater confidence in business matters for them to spend the time and money in advertising their goods.

In France, it is just the reverse; whenever business gets dull they get up some kind of an exhibition for the purpose of drawing people to their cities, and stir up trade in a general way.

In all matters pertaining to the advertising of merchandise, it goes without saying that the first issue of anything in the way of a novelty is the most successful. From the indications of the present Montreal Food Fair the proof of this is apparent, and we would advise all manufacturers of any article that can be sold in a retail grocery store to take advantage of this opportunity and obtain space if possible.

The entertaining attractions which go hand in hand with this kind of a Fair lend great zest to it, amuse and interest the people while educating them, and a person can pass many interesting half hours in visiting such an exhibition.

You can always hear the doubters say,

"Times are hard." The very people who cry hard times, if they knew it, are producing and creating lack of confidence, and retard business of every nature. It becomes a habit with them. They repeat "hard times" so often that it becomes chronic with them. The times cannot be so very bad when men will invest thousands of dollars in organizing and promoting a Fair of this kind. They naturally expect a reward, and the capital and energy they invest obtains it for them. The following things are given the visitor for the small admission of 25c.: A concert, an entertainment on the stage, a demonstrated lecture on cookery, and numbers of handsome souvenir samples which are valuable in themselves.

If the times were as bad as the chronic kicker would have us believe, manufacturers and the management of the Food Fair would not go to the expense that they have in the construction of this one.

We are glad to state that Montreal's first Food Fair is an assured success. Hundreds of letters have been received making enquiries regarding the free cooking lessons, and if there is a manufacturer in the Dominion of Canada who has an article that he wants to introduce, we would advise him to apply for space at once in the Montreal Food Fair to be held in Windsor Hall for three weeks, commencing Easter Monday, April 15.—[Advertisement.]

HANDSOME BLACKING SIGN.

One of the most handsome store signs THE CANADIAN GROCER remembers seeing is being distributed to the trade by the F. F. Dalley Co., Ltd., of Hamilton. Its special mission is to advertise "English Army" blacking. In the foreground is a group of foot-soldiers, representative of the different lines in the service, while in the background are cavalry and artillerymen. British flags gracefully droop on each of the top corners, while the letters "E." and "A." respectively flank either side of the group of soldiers. The figures and flags are in natural colors. One of these signs accompanies every box of "English Army" blacking; three dozen to the box.

A CUSTOMS BOARD.

THE following is a copy of the suggestions that head a petition which the Montreal Board of Trade is now circulating for signature regarding the formation of a Customs Board of experts.

TO THE HONORABLE THE HOUSE OF COMMONS OF THE DOMINION OF CANADA, IN PARLIAMENT ASSEMBLED :

The petition of the undersigned merchants, importers and manufacturers of the city of Montreal.

HUMBLY SHEWETH, —That your petitioners suffer from want of uniformity in the application of the tariff, and from the circumstance that there is no satisfactory recourse or remedy in matters of dispute as to classification for duty, value for duty, or in cases where Customs officials inflict injustice upon importers by erroneous and arbitrary rulings ;

That your petitioners believe that these grievances could be removed by the establishment by Parliament of a Board of Experts, with power to deal with all questions and disputes between Collectors of Customs and importers, as to rates of duty or classification, and as to value for duty ; also, to act as a Board of Reference in matters of seizures, to the end that the technical facts of a case may be established prior to publicity, and with a view to avoiding practical injustice through error or precipitate action of irresponsible employees in the Customs service ;

That your petitioners suggest with respect to the establishment of such a Board of Experts :

That it shall consist of five members, being one for each of the principal branches of trade as follows : (1) Dry goods, (2) hardware, oils, paints, etc. ; (3) drugs, chemicals, fancy goods, stationery, and jewelry ; (4) groceries, provisions, and fruits ; (5) leather and shoefindings ;

That appointments be made on the basis of competence for the office ;

That sufficient remuneration be given to secure men technically competent and with business experience, so that the Board would enjoy the confidence of merchants ;

That the Board be empowered to administer oaths and subpoena witnesses ;

That the Board's decisions be published periodically and sent to Collectors of Customs and Boards of Trade throughout the Dominion, which would promote uniformity as to classification and value for duty, and ;

That both the Government and importers should have the right of appeal from the Board's decisions to the Exchequer Court ;

That such a Board of Experts has for some years been in operation in the United States, where it appears to have well fulfilled its purpose of insuring to the Government the full Customs revenue intended by the Customs Act, of securing uniformity in valuation for duty, and of affording satisfaction to importers ;

Wherefore your petitioners do pray your honorable House to enact legislation for the establishment of a Board of Customs Experts as hereinbefore suggested, and so relieve them and importers generally from the serious disabilities now suffered by reason of lack of uniformity in the administration of the tariff ;

And your petitioners, as in duty bound, will ever pray.

RAINY RIVER RAILROAD.

A large deputation consisting of a number of well-known financial and railway men and other parties interested interviewed the Government Thursday for the purpose of asking assistance on behalf of the Ontario and Rainy River railroad. The total length of the proposed road is 140 miles, of which 35 have been bonused and completed. The deputation, which was introduced by Mr. Conmee, and accompanied by a number of other members, consisted of Messrs. D. F. Burke, J. Hodder, Councillor Hammond and George R. Thompson, of Port Arthur and Fort William ; George Webster and D. C. Irwin, of Fort Frances ; B. Folger, of Kingston ; David Blain, J. F. Eby, J. W. Langmuir, Walter Barwick, W. R. Brock, W. H. Beatty, G. R. R. Cockburn, M.P., of Toronto ; W. Hamilton, of Sault Ste. Marie ; F. D. Woodbury and W. H. Curran, of St. Paul, Minnesota ; and Mr. Alger, of Hudson, N.Y. The request of the deputation was presented by Messrs. Burke, Folger, Conmee, Blaine and Langmuir. They made different propositions : that they be granted a subsidy of \$5,000 per mile ; a guarantee at 4 per cent. for 20 years of interest on first mortgage bonds of \$15,000 per mile ; or a 20-year guarantee of \$10,000 per mile at 3½ per cent., ninety per cent. of the per mileage bonds to be handed over on the laying of rails on each five-mile section, and the balance on completion of each 25 miles. The company further proposed to deposit with the Government under clauses 2 and 3 of their proposal fifteen per cent. of their gross earnings at the end of every three months, ten per cent. to pay the interest on the bonds, and five per cent. as a sinking fund. They further proposed that the Government should appoint a director on the board. The Government promised to give the matter consideration.

ELORA BOARD OF TRADE.

A meeting was held on Friday evening in the Town Hall, at Elora, Ont., for the organization of a Board of Trade. The following officers were elected : Hon. president, Mr. Charles Clarke ; president, Mr. T. B. Smith ; vice-president, Mr. Thos. E. Lipsey ; secretary, M. E. Burns ; treasurer, Mr. John Gibb. Messrs. James Wells, S. Springer, and F. Wissler, with the officers, will form the council. The meeting was most enthusiastic, and a determination was expressed to push Elora to the front.

THE FOOD FAIR.

Though the Retail Grocers' committee have withdrawn their patronage from the Montreal Food Fair, the Wholesale Grocers' Guild, and a number of retailers both in and outside the association, are standing by it, and hope to make the affair a success.

It appears letters have been received in Montreal from Albany and Rochester, where Col. De Garmo was, criticising his management of shows, and these have been made a basis of the attacks on him. On the other hand, replies to inquiries sent out by wholesale grocers to exhibitors show that they were thoroughly satisfied with their treatment.

CENTRAL PRISON BROOMS.

Hon Mr. Gibson moved the ratification of an agreement between the Government and H. A. Nelson & Sons for the manufacture of brooms and whisks at the Central Prison by the prisoners. He explained that Messrs. Nelson had the same kind of a contract last year, and it had netted to the Government the satisfactory rate of 40 to 50 cents per diem for the prisoners' labor. The inspector believed that the new contract would be still more profitable to the Government.

Mr. Marter complained that there had been no opportunity of examining into this matter in the Public Accounts Committee because of Inspector Noxon's illness. To this Mr. Gibson at once replied that he would allow the motion to stand until the desired opportunity shall have been furnished. —Globe, Friday.

PERSONAL MENTION.

Arthur J. Seguin, formerly one of John Taylor & Co.'s travelers, has been appointed manager in Canada for Gelle Freres, of Paris, France. A few of his Toronto friends presented Mr. Seguin with a gold-headed cane the other night.

H. H. Bennett, representing in Canada Beardsley's shredded codfish, and Gordon & Dilworth, was in Toronto last week.

Mr. W. J. Shaw, of Brantford, who died lately in Toronto after returning from a health-seeking trip to England, was born in York county, and was formerly in the wholesale grocery business in Toronto. He removed to Brantford about ten years ago. The remains were interred in the Necropolis, Toronto on Friday last.

Messrs. D. Ferguson & Co. have removed their stock from Acton to New Hamburg in order to be nearer their main store at Stratford.

John Green & Co., wholesale merchants, of London, have sold out to John C. Green, who will continue to carry on the business under the style of "John C. Green & Co."

The leading fruit growers of Essex county say that the peach trees in that section have stood the winter well, and that there are good prospects of a large crop this year.

The Cork Co. of Canada, to buy and sell corkwood and engage in the manufacture of corks, with a capital stock of \$150,000, is applying for incorporation. It proposes to erect a factory in Toronto. The provisional directors are Messrs. C. R. De La Sabliere, L. O. Dusseau, J. A. Gendron, and L. O. Blachaud, of Toronto, and John Howard, of London, England.

PURE GOLD MFG. CO.
TORONTO

TO PREVENT BIG FIRES.

A SUB-COMMITTEE of the Toronto City Council recently discussed a number of amendments to the building by-law advised by the architects of the city, with a view to a prevention of the recurrence of great fires.

It was decided that the following recommendations of the architects be embodied in the building by-law forthwith :

Floor area—No building hereafter erected (except public audience rooms) shall have on any floor thereof more than 4,000 square feet of floor area undivided by division walls. Nor shall the undivided floor area of any floor in any existing building (except public audience rooms) be increased so as to contain more than 4,000 square feet.

Division walls to divide the floor area of a building into spaces of not more than 4,000 square feet must be of stone, brick, or terra cotta.

Doors or other openings through division walls must not exceed in their united width one-third the length of the wall.

All openings through division or party walls shall have tight-fitting doors and frames of iron, or else, if of wood, constructed of two thicknesses of solid boards and covered with asbestos and sheet metal.

The division walls must, in all cases, be extended two feet higher than the roof of

each building in which such division or party walls are erected.

Recesses and openings.—In external walls recesses and openings must have backs with a minimum thickness of one brick.

The maximum area of recesses or openings must not exceed one-fourth of the wall surface on any one floor without an equivalent increase in thickness of wall. Recesses in same wall not less than eight feet apart.

There may be recesses in walls for stairs or elevators, but such recesses shall have back of thickness equal to second-storey wall.

A continuous vertical recess must have back nine inches thick, and no such recess in a nine-inch wall.

No horizontal recess and no continuous vertical recesses other than flues in stacks nearer than seven feet to any other recess.

No opening cut through a party wall must exceed eight feet wide and ten feet high.

Fire stops of projecting brick must be built at the level of every floor where walls are strapped.

The architects propose that all parts of buildings divided by party walls should have separate stairways and street exits, but the committee thought that the fire-escape appliances which must now be provided for

each separate section of a large building would meet the case.

The question of erecting stand-pipes in large buildings was referred to the Fire and Light Department to report upon.

The fire escapes on all buildings must be constructed to the satisfaction of the City Commissioner. Escapes will be ordered for all large buildings, and the number for each building will be determined by the City Commissioner.

An effort will be made to get all these changes adopted without delay, and in the meantime no permits will be issued unless those applying agree to observe these regulations.

LOUIS BENMORE.

Mr. Louis Benmore is one of the youngest, most energetic, most enterprising and most successful grocers of Belleville, Ont. He is successor to Walmsley & Spafford, and his place of business is located at the corner of Front and Hotel streets. He has just issued an ably written circular letter to his patrons, which he winds up with a list of the special lines of goods he carries. Mr. Benmore shows that he is abreast of the times by subscribing to THE CANADIAN GROCER.

The British Board of Trade returns for March show that during that month the imports increased £653,533, and the exports increased £424,127, as compared with those for the corresponding month last year.

Its excellence
is acknowledged

TORONTO RETAIL GROCERS

DECIDE UPON EARLY CLOSING AND OTHER IMPORTANT MATTERS.

At the regular monthly meeting of the Toronto Retail Grocers' Association held in St. George's hall, Elm street, on Monday night, there was a fair attendance. President F. S. Roberts occupied the chair.

A letter was read from P. Degarms, secretary of the Food Exhibition, to be held in Montreal shortly, asking that the Association endorse a scheme to have a similar exposition in Toronto. The feeling of the meeting was against the idea, and Hon. Secretary Mills was instructed to write Mr. Degarms that the Association could not see its way clear to invite him and his show to the "Queen City." For the benefit of members present, an article on the Montreal Food Exhibition which appeared in THE CANADIAN GROCER last week, was read by the secretary.

A communication from the Trades and Labor Council favoring the early closing of stores during the summer was read. The association then adopted a circular already endorsed by a joint committee of the Grocers' Association and the Trades and Labor Council.

According to a draft circular the early closing was to begin May 1st, but the Association decided it would be better to put the change off one month to June 1. Five thousand copies of this circular are to be forthwith printed and distributed.

Certain retail grocers of the city complained that a section of the public was in the habit of defrauding them. One case was cited as follows: A woman goes to a store, orders a quantity of goods to be sent to her house. On the groceries being delivered the delivery man is met at the door by a small girl, who says that her "Mamma is out," and if he will leave the goods her mother will call at the store and settle. In the ordinary case the delivery messenger accedes to the child's request, and that's the last the grocer hears of it. Such practices as this, according to all accounts, are becoming quite common in some parts of Toronto, and it was decided that if some specific case of fraud could be picked out, the Association would supply the funds necessary for a prosecution.

It was resolved to hold an excursion to Hamilton by boat the coming summer. The date was left in the hands of the Executive Committee, with instructions to invite the retail grocers of London and Hamilton to join in the outing.

Complaints were made by two members that they knew of certain wholesale houses in Toronto, who were supplying the retailers of the city, and then sending men around to the consumers to undersell them.

One tea house in particular came in for censure, and it was, moreover, asserted that some wholesale firms were in the habit of supplying large boarding houses with groceries, etc., in extensive quantities.

Secretary Mills stated that this practice violated the agreement entered into some time ago between the wholesalers and retailers of Toronto. Action in the near future was decided upon.

F. S. Roberts, Robert Mills and D. W. Clark were appointed a committee to try to secure the repeal of the pedlars' by-law. It was argued that the by-law was openly violated, and that the only step open was to abolish peddling in the streets altogether. Those who spoke on the question seemed to be sanguine of favorable action by the city fathers.

MONTREAL GROCERS' MEETING.

A SPECIAL meeting of the Grocers' Association was held on Wednesday April 3. There were present John Johnston, president, in the chair, B. Taylor, B. Connaughton, W. Wilson, W. Carrigan, J. B. V. Daoust, R. Turner, ex-Ald. Gauthier, Jas. O'Shaughnessy, J. O. Levesque, M. P. Laverty, John Scanlan, A. D. Fraser, and M. Delehanty. On motion of Mr. Scanlan, seconded by Mr. Fraser, R. B. Hall, St. Catherine street, was elected a member of the association.

A resolution of congratulation from the Grocery Clerks' Association was read, expressing satisfaction with the stand taken by the Grocers' Association on the early closing movement.

An appeal from the Carters Union' was read protesting against the placing of salt and sand on the tracks and streets by the Montreal Street Railway, and asking the aid of the grocers.

The association considered the suggestion of Mr. Monier and A. H. Lionais, of Le Prix Courant, to have an exhibition of grocers' products on the Exhibition grounds in July, and guaranteeing the Grocers' Association \$500, or 50 per cent. of the gate receipts, provided the annual picnic were held on the grounds during the Fair.

Mr. O'Shaughnessy and other members objected to the picnic being held near the city. The picnic was the big event of the year for the association, and was always held in the country.

It was decided not to entertain Mr. Monier's idea, but to hold the picnic at some rural point on the last Wednesday in July.

The question of the Food Fair in Windsor Hall came up, and Mr. Fraser moved the appointment of the following as a committee to deal with the whole subject: John Johnston, S. D. Valhere, John Scan-

lan, S. Demers, J. O. Levesque, Ald. R. Turner, B. Connaughton.

The committee met on Monday night, and, after discussion, passed the following resolution:

That the Secretary be instructed to notify Col. De Garmo that, after full investigation, the association feels compelled to withdraw its endorsement and support of the proposed Food Fair to be held in the Windsor Hall, commencing 15th inst., and cannot recognize same in any form whatever. That a copy of this resolution be given to the public press.

ALWAYS THE BEST.

DORCHESTER, MASS.

CAUSE OF HARD TIMES.

Scene : Corner Yonge and Queen streets.
Mr. Jones, reading a newspaper. Approach
Mr. Brown.

Brown : Hello, Jones, what are you reading?

Jones : I see some of the papers are taking up the departmental store question, a thing that is much needed. Most of the papers, however, seem afraid to say anything for fear of losing their advertising. Something will have to be done to put a stop to such monopolies, else they will ruin the city.

Brown : Why? how are they going to ruin the city? I think they are a good thing. My wife buys what groceries she wants down there. She says she gets them much cheaper. She can get 30 pounds of granulated sugar for a dollar, and lovely tea for 25 cents a pound.

Jones : Brown, you and your wife are two blooming fools. The benefit you say you are deriving is only an imaginary one. I sell 32 pounds of granulated sugar for a dollar, and a far better tea for 20 cents a pound; but then I am not surprised, for a customer of my own came in one day and told me the same story, and when I told her she was paying too much for her goods she looked a little put out and replied : "Well, you see I met Mrs. Spendom, Mrs. Waster and Mrs. Dontgiveacent there. After lunch there we took a walk down to another store, and do you know I spent five dollars before I got through—all the money I had. I only meant to spend one dollar, but we got talking, and I bought a lot of things, although I know I don't need them. I don't know what my husband would say if he knew it. I'll have to ask you to let me have a few things until the end of the month." That is how it goes, Brown. If I know one I know a dozen men's wives who do just the same thing day after day. They spend their money on things they don't need, and then run tick for the necessities of life on the grocer. I tell you what, Brown, if they get a few groceries cheap they very often have to pay for it on the dry goods and things they know nothing about. My wife told me the other day that several friends of hers bought what they thought to be bargains, and she could have got just the same material exactly for much less, so you see in a number of cases the advantage is only imaginary. I have been told over and over again by ladies of my acquaintance that they often could not get the bargains advertised because it was just sold out. Two ladies told me that they got up very early one morning, and although the store had been opened only a few minutes, the article advertised had just been sold out. They thought the bargains were very hard to catch. The early bird did not catch the worm that time, but the worm caught the bird, for they were induced to buy some of the same article at a higher price. These people will spend all their ready cash at some of these places and then expect to run a thirty, sixty or ninety days' account with us. You can attribute the present hard times to a great extent to the supporting of these same places or humbugs.

Brown : How do you make that out?

Jones : I will try to show you. We will suppose, for example, that each of these

departmental stores means that there would be 24 other stores occupied that are not, owing to their existence. That means 24 employers and their wives and families making a living. Where there is only one there would be 24 domestics engaged to attend to their wants. There would be 48 employees needed at a salary from \$7 to \$12 a week. There would be 24 more waggons, 24 more horses, 24 more sets of harness, 24 horses to be shod, 24 sets of harness to be repaired, 24 waggons to be repaired, 24 more carpenters at work to make the fixtures, shelving, counters, &c., more scales in use, more refrigerators, more paper hangers, more painters, more glaziers, more tin-smiths, more men to drive horses. I might continue to the middle of the week enumerating, but this should be enough to show you that it is no wonder that so many factories are closing down. Do the members of the labor organizations who cry out for less hours and more pay, in allowing their wives to support these places, ever think of the poor, ill-paid girls who are working on undergarments at 35c. a doz., and making men's pants at 8c. a pair, and lined at that? These girls are sewing a shroud as well as a shirt. The inevitable result of this system will be the shutting down of wholesale houses and industries which will throw hundreds out of employment and drive the people into miserable garrets and flats, similar to the poorer ones in the States.

Brown : How do you make out the wholesale houses will suffer?

Jones? They sell to these houses at a greatly reduced rate. Where they used to sell the regular retailer 20 boxes raisins and 5 bbls. currants they only sell them 2 boxes of raisins and 1 bbl. of currants.

Brown : Well, even so it don't seem to cause as many failures as you would expect.

Jones : You cannot judge by the failures reported. Dozens of men go out of business that you never hear anything about. They simply find it don't pay and they close down.

If a few more merchants would fail and pay 25 or 30c. on the dollar they would then be able to cope with their bargain days.

CANADIAN CANAL TOLLS.

The canal regulations for the year 1895 have been embodied in an order-in-Council, which has received the formal assent of the Dominion Government. Under them the policy of the Department of Railways and Canals of last year will be continued. There will be no discrimination against the citizens of the United States. The Sault Ste. Marie canal may be navigated by vessels having seventeen feet draught, and no tolls will be charged. The more important clauses of the regulations are as follows :—

All vessels and freight shall be permitted to pass through the Sault Ste. Marie canal free of toll upon such vessels and freight until otherwise ordered. All goods having paid toll through the whole line of the St. Lawrence canals, or through the Lachine canal, St. Ann's lock, or Ottawa and Rideau canals, shall be allowed to pass free through the Welland canal, and if tolls have been

paid at the Chambly canal such tolls shall be refunded at Montreal or Kingston Mills, and having paid full tolls through the Welland canal they shall be allowed to pass free through the St. Lawrence canals or through the Ottawa and Rideau canals, St. Ann's locks, the Lachine canal, and the Chambly canal, provided always that the articles to be entitled to the above exemptions shall go downward through the whole length of the canal to Montreal, or pass upward from Montreal the whole length of the St. Lawrence canals or the Ottawa and Rideau canals to Lake Ontario. Goods shipped to any port west of the St. Lawrence canals, tolls upon which have already been paid through such canals, may be reshipped from such ports and be passed through the Welland canal free of toll in the same way as if they had been shipped through direct in the first instance, and the goods going eastward having paid Welland canal tolls may be transhipped at any port in Lake Ontario, and thereafter passed free through the St. Lawrence canals as if they had been shipped direct in the first instance.

TO MAINTAIN FLOUR PRICES.

At a meeting of the Hamilton Retail Grocers' Association a delegation of millers was present to confer regarding the price of flour. The millers pointed out that while the advance in the price of wheat has been at the rate of 35 per cent., flour has increased only 25 per cent. in price, even at the ruling figure of \$1.75 per 100 pounds. This the millers argued was a proof that the increase was not unreasonable, and as in some cases they had been selling below cost to hold the trade, they appealed to the grocers to assist them to obtain a fair price.

This view of the case presented itself favorably to the grocers, and as a result of the conference it is probable the recent advance in flour quotations will be maintained.

A committee was appointed to make arrangements for the annual picnic.

TRADE WITH NEW ZEALAND.

The Dominion Department of Trade and Commerce has been advised by Sir Charles Tupper, the High Commissioner in England, that Mr. Ward, the Treasurer of New Zealand, who is in London, is prepared to enter into negotiations with Canada for a commercial treaty between this country and New Zealand. It is altogether likely that the information will be acted upon when further details are forthcoming. The Minister of Trade and Commerce, Mr. Ives, is disposed to think that the prospects of developing our trade with New Zealand are well worthy of consideration. The New Zealanders import very largely in cotton goods, woolen manufactures, boots and shoes, and haberdashery. In return for these they have to offer frozen meat, hides, wool, timber, and an article known as kaurigum, which is obtained from the roots of certain trees, and used in the manufacture of varnishes. The only objection that could be raised to free trade with New Zealand would be that its farm products, particularly frozen meats, might enter British Columbia, and affect to some extent the market which Manitoba and the ranching portion of the North-west enjoy in the Pacific Province. It is considered, however, not at all likely that such a trade would develop to large proportions. New Zealanders are to some extent our competitors in the British market,

and they will so continue whether we enter into trade relations with them or not. It is not considered at all probable that a favorable trade arrangement with New Zealand would be injurious to the agricultural interests of Canada, whereas it might very materially widen the market for our manufactures.

ADVANCE IN WOOLEN FABRICS.

IF present indications are a reliable criterion, says CANADIAN DRY GOODS REVIEW, the coming summer and fall is to witness a firm woolen market, and much higher prices on all kinds of fabrics of this class. The sharp advance in the price of raw material is, perhaps, the most influential reason why prices should go higher. Take the price of Canadian fleece, for instance. Two months ago orders could easily be filled at 17c. that to-day could not be repeated except at an advance of 3 to 5c. per lb., for there has been free buying of wool during the past month at different points in Ontario at 21c. In fact, at the present writing reports from different points in the province agree that the market has been well cleaned up of the available supply of wool, and that there is very little to be had at present. This state of affairs is due to the active demand experienced from American buyers, who freely operated in the wool

market at the advanced basis, with the natural result of entailing an extra cost upon our manufacturers. The difference in this respect is so great that manufacturers who have had to pay the increased price will be compelled to take account of it, while those who were lucky enough to get their supplies at the lower prices, are quite likely to take full advantage of the situation also.

Briefly, substantial advances in domestic wool and woolen fabrics are expected, and the first intimation in this connection came to hand on the 4th, when leading jobbers were advised by the manufacturers that domestic woolen yarns and fingerings had been advanced, though the exact percentage had not been figured out yet. The advance in yarns, etc., is almost certain to be followed by higher prices on Canadian tweeds. Advices from buyers on the other side with regard to foreign woolen fabrics state that sellers are indifferent, and that higher values are looked for on both plain and fancy dress goods. The result of the series of wool sales which have just closed in London also strengthens the expectation of higher prices. There was a steady, legitimate demand, and the upward movement was a healthy one, the average advance realized on the offerings as compared with the previous sales being 10 per cent. In a word, all the news in regard to woollens infers a firm market.

TANGLEFOOT

SEALED

... STICKY FLY PAPER ...

"Little" Tanglefoot

5 1/4 x 9 inches.

Particularly adapted for Show Windows and Fine Rooms. . . .

25 Double Sheets in a box, 15 boxes in a case.

Retails for 30 cts. a box
Costs \$2.50 per case

PROFIT Eighty per cent.

WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

Notwithstanding the reduction in price the quality is improved in general. The paper is a little stronger, a little stickier, and will remain sticky a little longer.

REGULAR SIZE

Prices for 1895

Per Box - 50 cts.

Per Case - \$4.75

In Five Case lots,
per case, \$4.50

Each box contains 25 Double Sheets and 5 Tanglefoot Holders.

The general store of R. Irvine, Cedarville, Ont., has been sold out to Wm. McLuban.

The stock of L. Beaucaire, grocer, Mon- treal, has been sold at 52 cents on the dol- lar.

The stock of C. S. Shaw & Co., crockery, Ottawa, has been sold at 44½ cents on the dollar.

The stock of W. Z. Guay, general store, Napierville, Que., has been sold at 53 cents on the dollar.

The business of the late C. W. Walden, general store, Birr, Ont., has been sold to F. Campbell.

The stock of Louis Taschereau, general store, Notre Dame De Lourdes, Que., is to be sold by auction on April 15.

CHANGES.

J. Almour, general store, New Denver, B.C., has removed to Rossland.

F. Archambault is starting a grocery business at Ste. Cunegonde, Que.

J. A. Griffin, general stores, Griffin's Cor- ners and Straffordville, Ont., has closed his Straffordville branch.

J. N. Munshaw, grocer, Toronto, has re- moved to Woodburn, Ont., where he has succeeded J. E. Jarvis in the general store business.

Alexandrina Bellehumeur, wife of Joseph O. Lemire, has been registered proprietress of J. O. Lemire & Co., general store, Wel- don, Que.

John D. Campbell has registered a con- sent order for his wife, Mary E. Campbell, to do business as a general storekeeper at Ingonish, N.S.

FIRES.

R. Peers, general store, Beachville, Ont., has been burned out.

D. McKinnon, grocer, Summerside, P.E.I., has been burned out.

Caster & Co., general store, Claremont, Ont., have been burned out.

Robt. C. McLeod, flour and provisions, Summerside, P.E.I., has been burned out.

DEATHS.

J. G. Tobin, grocer, Milledgeville, N.B., is dead.

D. S. Baird, general store, Fitzroy Har- bor, Ont., is dead.

HARVEST MITTS.

W. R. Brock & Co. have purchased a manufacturer's stock of Harvest Mitts, "seconds," for cash, much below the cost of production, and are offering them to the trade in three lengths at prices which they claim were never heard of before. Cash men and close buyers should send for sample dozens.

RUTHERFORD, MARSHALL & CO.

W. A. Rutherford, proprietor of Ruther- ford & Harrison, wholesale produce and commission merchants, Toronto, has ad- mitted a new partner into the firm—W. J. Marshall. This business was estab- lished under the name of Rutherford & Harrison some years ago, Mr. Har- rison retiring after a short connection. Since that time Mr. Rutherford has been the sole proprietor, but the business has grown to such dimensions that he has been obliged to secure a partner. The new firm will be known as Rutherford, Marshall & Co. Mr. Marshall is a man of wide prac- tical experience, extending over a period of fifteen years with the well-known firm of W. R. Marshall & Son, Stratford, Ont., and will be an undoubted acquisition to the business.

This house has a wide connection in Montreal, Halifax, and other eastern points, and is thus in a way to do a thriving trade. On leaving Stratford the press and public of that city expressed the liveliest regret at his departure.

CANADIAN SOAP IN OTHER FIELDS.

J. E. GANONG, one of the proprietors of the St. Croix Soap Manufacturing Co., St. Stephen, N.B., was in Toronto a few days last week. Saturday I had a few minutes interesting chat with him. "Well," he said in reply to a query of mine, "the only new thing I can tell you about is that we are just now making arrangements to introduce our soaps, particularly 'Surprise,' into new fields. We already sell all over Canada and Newfoundland, and have customers in the West Indies, South America and other foreign countries. Now we are going to introduce our soaps into Australia, New Zealand and South Africa. 'Surprise' is the soap we are going to push, because we believe it is the best soap in the—. Well, it is the same old story. But I'll tell you, we have confidence to think that we can compete with the English, German and American soaps that have preceded us in those countries. Prices, though, are pretty low there; but still we are encouraged to go on."

Then Mr. Ganong animadverted upon the marked increase in the consumption of not only "Surprise," but soaps generally. "Soap," he explained, "is now so cheap that people in the rural districts have largely stopped making their own soaps, while others are not so economical as they used to be, and consequently waste more. All this naturally helps to increase the sale of the ordinary manufactured article."

The St. Croix Soap Manufacturing Co. have nine branches and agencies in Canada besides agencies in New York and Great Britain.

UNIQUE WAY OF PAYING DEBTS.

Upon peculiar technicalities do men sometimes escape paying their debts to their creditors and to justice.

The Victoria, (B. C.) man who was declared purged of all responsibilities for the payment of an \$8,000 debt when his creditors had seized his person, is a case in point.

Unless set aside by a higher court the ruling in question means that once the person of a debtor is seized by his creditors, his liability is discharged.

It is almost unnecessary to say that this method for securing settlement is too prompt, and at the same time inadequate.

The trouble is that the laws against debtors, in going from the ultra-rigid so vividly depicted by Dickens, have swung around to the ultra-lax, until to-day the man who refuses to pay his debts can snap his fingers at his creditors; while if they arrest him he discharges his liabilities without handing over dollars or even "thanks."

The pendulum of the law evidently needs to swing back in the other direction a little.

CUSTOMERS SATISFACTION.**

Our 5-lb. tin of
B. F. P. COUGH DROPS.

The Cold Weather

Is gone, but the season for colds, is with us now as much as ever it was. April is a star month in this respect. How about Cough Drops? There is no more pleasant or more effective remedy than our **B. F. P. Cough Drops**. They are well known, and sell freely, at a popular price. This cut shows our 5 lb. canister.

Toronto Biscuit & Confectionery Co.

TORONTO

Manufacturers by appointment to Her Majesty the Queen,
H.R.H. The Prince of Wales and the Army and Navy.

150 Years' Record

Liquid and Paste Blacking

Black and White Cream for Patent Leather.

Russet Cream

For Brown Boots, Saddlery, Etc.

DAY & MARTIN LTD. London and
Liverpool

E. T. STURDEE, St. John, N.B., for Maritime Provinces.

CHAS GYDE, Montreal, for Ontario and Quebec.

Marmalade

If our MARMALADE is not as fine as the best imported you can return it to us at our expense. Looks risky on our part, but we know whereof we write. Put up in 1-lb. Glasses, 5 and 10-lb. Tins, and 7, 14 and 28-lb. Pails. Send along your trial order. We take all the risk, and you make the money.

"If a Herring and a Half

Cost a Farthing and a Half---

How often this old brain-twister comes to your mind to-day, when you are serving two or three customers at once and in the meantime wrangling with a calculation of pounds and ounces at so many and a quarter cents.

It's different when you have a Computing Scale. You don't have to bother your brain with a single figure. With it, you do away entirely with the necessity of weighing goods in pounds and ounces, arriving at the true value with one operation.

An interesting pamphlet will be mailed you on receipt of your address.

... STICKY FLY PAPER ...

"Little" Tanglefoot

5 1/4 x 9 inches.

Particularly adapted
for Show Windows and
Fine Rooms. . . .

25 Double Sheets in a
box, 15 boxes in a case.

Retails for 30 cts. a box
Costs \$2.50 per case
PROFIT Eighty per cent.

WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

Notwithstanding the reduction in price the quality is improved in general. The paper is a little stronger, a little stickier, and will remain sticky a little longer.

REGULAR SIZE

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, APRIL 19, 1895

(\$2.00 per Year) No. 16

DROPS FROM THE EDITOR'S PEN.

The merchant should now reach forth for the things that are before, forgetting the dull times that are behind.

* * *

The Better Times to be seen on the trade horizon are no mirage. They are a reality, and the more energy we exhibit the sooner will we get to where we can enjoy them to the full.

* * *

The Oil Trust is engaged in cornering oil in order that the price waves may rise abnormally. Waves of this kind, however, sometimes swamp those who are trying to manipulate them.

* * *

A contemporary remarks that the life of a collector is not an easy one. Did anybody ever say it was? The only thing easy about it is the way in which he is sometimes kicked down stairs.

* * *

From the way spring lingers in the lap of winter one would imagine she preferred cold to heat. It does not follow that storekeepers should imitate her, and linger in pushing spring trade.

* * *

People are busy speculating upon the advantages that will accrue to China in a commercial sense on account of the thrashing Japan has given her. It is safe opining that China does not see eye to eye with them.

* * *

The imports at the port of Toronto last month aggregated \$188,076 more than for the same month last year, and the exports were \$124,416 more than for March, 1894. Another evidence of returning activity.

* * *

A new sweetening compound has been discovered by a scientist in connection with the Chicago University. It is derived from coal tar products, and its sweetening power exceeds that of saccharine. Tar products have produced many surprising results, and

this is probably not the least. It is now in order to test its value as a marketable commodity.

* * *

Those who try to get education in order to escape perspiration will not be able to raise enough friction to keep themselves warm, much less set the world on fire. Get education, but get it in order that your perspiration may be to more purpose.

* * *

Now that the inquiry into the cause of the Simpson conflagration has been closed, and four men are charged with knowing something as to the origin of the fire, the coroner will turn his attention to probing the Globe fire.

* * *

The aggregate exports of the two provinces of Ontario and Quebec to the United States during the fiscal year ending June 31, 1894, were \$934,000 in excess of the corresponding period of 1893. In view of the depression this is particularly gratifying.

* * *

Some there are who contend that the entrance of the departmental store and the exit of the small store means the survival of the fittest. The "fittest" means the best. But how the departmental stores can be so designated is an enigma to a good many; and all are not storekeepers either.

* * *

Judging from the number of capitalists from the United States who have been reconnoitering the Dominion with a view to starting new industries here, the knowledge that Canada is a "pretty good country to live in" is gradually being disseminated among our cousins south of the border.

* * *

The April crop report of the United States Department of Agriculture has been issued. It shows the average condition of winter wheat to be 81.4, against 86.7 last year. It was 77.4 in 1893, 86.2 in 1892, and

86.9 in 1891. The past winter was hard on wheat. The bulls, it is almost needless to say, are not dejected over the report.

* * *

The abnormally rich are not, as a rule, popular, but most of us are willing to sit at their feet and take lessons on how to acquire wealth.

* * *

So the Toronto Public School Board has also got a bone to pick with the Fire Underwriters' Association. With both business men and educationalists picking away at the same bone, they ought to be able to get the insurance men near enough to the verge of starvation to bring them to their senses.

* * *

A gradual falling off in the crop of bankrupt stock dealers may be expected, since the Ontario Legislature has adopted the bill permitting only those who have resided in a place three months to start into business there without being subject to a license fee of \$250. This is the kind of crop that business men will like to see diminish, for it means a better harvest of profits for them.

* * *

The Southern States have demonstrated their ability to compete with the Northern States in the production of iron and manufacture of cotton. Now they are talking of their possibilities for canning. "With thousands of acres of kind, loamy soil, free of stones, easily tilled, and plenty of bright sunshine and little frost and snow, the Southern States possess every natural advantage for fruit crops, and are not so handicapped by the elements as the Northern States. . . . The conditions of soil and climate argue strongly for the establishment of canning factories through the South, either by the clubbing together of the farmers or by capitalists." The quotation is from The American Packer, which is, by the way, a Southern paper, however. If the South could not surpass the North in the arts of war, she promises well to be able to do so in the arts of peace.

HAD A GOOD WINTER'S TRADE.

MR. George Simms, Nipissing, Parry Sound District, was in Toronto last week on a purchasing trip. Mr. Simms is a general merchant, besides which he performs the duties of post master in his village. He is one of THE CANADIAN GROCER'S oldest subscribers, and usually gives us a call when in Toronto.

Nipissing is situated in an excellent lumbering district, while around it are a number of good farms. "Nipissing is a good market for the farmers," remarked Mr. Simms. "Why, do you know that when oats, for instance, are selling in Toronto as low as 25c. per bushel, the farmers around Nipissing are getting 40 or 50c. or even more per bushel from the lumbermen."

When I asked him how business had been during the past winter, he said, as he leisurely twirled his hat in his hand: "We had a splendid winter's trade; better in fact than usual. Booth, I should think, has taken out fully 200,000 saw logs in our neighborhood this winter. When spring opens the logs are taken across Lake Nipissing to connect with Mr. Booth's railway. There the logs are loaded on to the cars by means of an endless chain and taken to Lake Nonbonging, where they are dumped into the water and floated down to Ottawa."

COFFEE AND SPICE FREIGHTS.

Speaking of the past season's trade in spices, coffees, etc., a Montreal firm said to THE CANADIAN GROCER this week: "The winter freight rates on these goods are far too high. The rates have been practically the same for years back, and are based on a scale of prices and profits in this branch of trade which has not been maintained. For this reason, competition in the Maritime Provinces and elsewhere is greatly felt by the Montreal trade. If there was more unity amongst this branch of manufacturers, a strong protest might have some good effect with the railways."

CENTRAL PRISON BROOMS.

BEFORE prorogation the Ontario Legislature dealt partially with the prison labor question discussed in these columns last week.

Mr. Gibson (Hamilton) moved that the House ratify an agreement made with H. A. Nelson & Sons for the manufacture of brooms and whisks at the Central Prison by the prisoners confined therein.

Mr. Whitney moved in amendment to the effect that no agreement for prison labor should be entered into with any individual or firm until other individuals or firms interested in the manufacture of articles of the same description shall have had ample opportunity by public notice of competing for the purpose of entering into such agreement.

It seems difficult to understand, he said, upon what principle the Government could sanction the proposed abandonment of the principle of allowing privileges of this sort to be open for public tender. Instead of giving public notice to manufacturers of their intention to dispose of the privilege, it appeared to be the fact that it had been granted to one firm without open competition. From this two evils had arisen. First, the Government had not received a sufficient price for its prison labor; and, second, the business of manufacturers in similar lines had been injuriously affected by prison competition. For this reason he had introduced his amendment. He did not intend to discuss it at any length, but would urge it upon the favorable consideration of the House.

Mr. Gibson (Hamilton) reminded the House that a primary object of the industries had been to supply work for the prisoners, and, while establishing a diversity of industry, to interfere as little as possible with outside labor. This was not the first renewal of Messrs. Nelson's contract, and the House would easily understand the great advantage of dealing with a firm of perfect reliability and high standing, such as they knew that firm to be. Mr. Gibson mentioned the fact that a great proportion of Messrs. Nelson's goods were shipped out of the province, and thus did not come into competition with local manufacturers. This had been taken into account as a very important consideration in making the contract. The transaction had been conducted on a business basis, and he had to ask the House to reject the amendment.

Finally Mr. Gibson's motion was carried on a division of the House by a vote of 51 to 37.

DISEASES IN ORDINARY MILK.

EVIDENCE accumulates every day to prove that milk from the cow cannot be used either for adults or children with safety unless it is properly boiled or sterilized. All dealers who sell milk should keep this fact before consumers of milk. A good trade is now done in the condensed article, which must become a substance of universal consumption, since scientific authority is pronounced against the use of ordinary milk. The following case was reported last week in Toronto:

People who drink milk have a new form of disease to guard against, if the evidence given in a police case be true. The case arose out of the discovery made by the sanitary inspector that a cow owned by Mrs. Palmer was afflicted by a contagious disease. The inspector called in a veterinary, who pronounced the disease an advanced case of lump jaw. This is a disease which is transferred to milk, and by this means germs are communicated to man. When the condition of the cow was discovered, Mrs. Palmer sold the animal to people who keep a dairy. Now some consumers are drinking the milk of the diseased cow, which may by this time have spread the contagion to the entire herd. The case was adjourned.

The case was adjourned, but the disease generated by the milk was not. It goes right ahead. The discovery of disease in cows is comparatively rare, taking the total number of milch cows into consideration. The animal often seems perfectly well, and through ignorance that most incurable of ills, consumption, or tuberculosis, is spread. There are instances on record where persons have been afflicted with consumption who had no hereditary taint, and who could not be shown to have acquired the disease by contagion. M. Ollivier reported to the Academy of Medicine of Paris the case of a young girl of 20 whose death from consumption seemed inexplicable. Her parents were strong, healthy people. She came of sound stock, and up to a certain age was herself perfectly strong. Investigation proved that at the convent where she had finished her education milk was the common diet, and the cows which supplied this milk were found to have tuberculosis. This was discovered by slaughtering one of them, for to all outward appearance they were healthy. M. Ollivier concluded from his researches in this and other cases that milk must be boiled before being used.

Condensed milk contains the nutritive properties of the ordinary article, while, being sterilized, the disease germs are got rid of. Merchants would lose nothing by urging upon their customers the substitution of condensed milk for the ordinary milk, especially for infants and children, and on the grounds of good health the sooner the change comes the better.

By drawing the attention of the people of their locality to the substance of this article through their local papers they will be doing the public a service and increase their own sales as well.

NEW CHEESE FACTORY.

The Manitoba Free Press says: "The new cheese factory at Strathclair, Man., is being pushed rapidly forward. The plant is in the hands of Mr. Henry Roberts, to whose enterprise and energy so many of Strathclair's advances are due. There are two buildings, one 22 x 30, the other 22 x 50. Three hundred cows are assured, and much gratification is expressed by the farmers."

It Came to Stay, It Has Stayed

Like the trees of the forest, the greater the storms the more deeply rooted become the trees. This is our experience with the celebrated Ram Lal's Tea. At its inception it was assailed, its doom was pronounced in many languages by rival dealers long before the public had given their verdict, yet to-day it stands without a peer, imitated by many, rivalled by none. Equal to Ram Lal's was the highest eulogy bestowed on samples given to dealers by travellers throughout the country, and in many cases the dealers were victimized, and why? Because Ram Lal's Pure Indian Tea has no equal.

Wherever Ram Lal's Tea is shown,
It stands unrivalled and alone.

And why has Ram Lal's Tea no equal? Because it is a pure **INDIAN** blend. Indian Tea possesses more retentive quality than any other tea known to commerce.

IMITATION BLENDS sold throughout the country to-day meet with considerable favor for a time and then become unpopular, and why? Because Ceylons are used very extensively in these blends, and after being kept in stock for a time go "off," losing their pungency and aroma. This has been the experience of practical tea men the world over. The sale of this brand is not confined to Ontario alone, but from all parts of the Dominion orders are being received daily, and numerous enquiries from across the border. Each year these goods are becoming more and more popular, sales having far exceeded our most sanguine expectations.

Wholesale Grocers

.....TORONTO

CANADA'S OFFERS UNKNOWN.

Hon. Clarke Wallace, Controller of Customs, returned this week from his visit to New York and other centres of United States trade. Mr. Wallace also visited Washington, and had an interview with Mr. Carlisle, the Secretary of the Treasury.

In conversation with THE CANADIAN GROCER, Mr. Wallace said that the Canadian authorities kept a far closer watch upon tariff changes and tariff rulings at Washington than the American officials bestowed upon tariff legislation here. The Secretary, for example, knew nothing of Canada's offers of reciprocity embodied in the Tariff Act of 1894, yet he is in charge of the revenue department, and ought to be posted on tariff possibilities affecting the revenue.

This discovery of the Controller should force our Government to adopt a method of keeping the Washington authorities posted. Either our tariff offers to extend trade mean something or they should be rescinded. Have these reciprocity clauses in the tariff, passed last session of Parliament, ever been brought to the attention of the powers at Washington? Unless they are mere claptrap they ought to have been. Of course, all negotiations must pass through the Imperial ambassador, Sir Julian P. P. But is he kept duly informed of our wishes? Sir John Thompson once favored the appointment of a Canadian official at

Washington attached to the British Embassy, who would have the necessary knowledge, and be in close touch with Ottawa. Something of that kind is needed unless Parliament's statutory declarations of a wish to extend trade are delusions.

BETTER SUGAR SITUATION.

Confidence in the sugar market seems to be more pronounced at the moment than it has been for some time.

The reason for this is the opinion that the bearish factors that were so threatening a short time ago have been discounted.

The principal element of strength is the decrease in the estimates of the beet crop. This decrease is something like 300,000 tons. In Germany, the beet root centre, the seeding season is about six weeks late.

Holders of new sugars in both Europe and America are holding prices firm. In Cuba, the advance has placed the parity of prices above those of New York.

Aside from the condition of the sugar crops, it must not be forgotten that the prices are abnormally low, which fact, particularly in view of the revival of trade, will tend to induce an increase in the consumption of sugar above even the natural ratio. And this, with a world's crop now only estimated to be slightly in excess of last year, and much later in maturing.

The sugar situation certainly looks better than it has for some time.

FIRST FRUIT CARGOES.

The first definite news with regard to the direct shipments of dried fruit to Montreal came to hand on Monday last. On that day cables were received stating that the Astria, the outside vessel that we have already referred to, had passed Gibraltar for Montreal with 16,000 odd boxes of oranges, and 8,000 boxes of lemons.

The cargo in detail was as follows: 700 boxes Catania oranges, 4,000 half boxes ditto; 10,000 boxes Messina oranges, 2,000 half boxes ditto, and 5,000 boxes Messina lemons, and 3,000 boxes Catania lemons.

From these figures it will be seen that the anticipations of smaller receipts of lemons this spring as compared with oranges, that THE CANADIAN GROCER was the first to call attention to, are very likely to be verified.

Advices came to hand in Montreal on Tuesday last giving definite details of the steamship Fremona's cargo of green fruit. The vessel has 800 boxes and 5,000 half-boxes of Catania oranges, 2,000 boxes of Catania lemons, 4,000 boxes and 6,000 half-boxes Messina oranges, and 37,500 boxes ditto lemons, making 55,300 packages in all. She has also called at Palermo, but the details of the consignments from that port have not yet been received.

CANNED BEEF SITUATION.

UNDOUBTEDLY the most interesting feature in the grocery trade at the moment is the appreciation in the price of canned beef, consequent upon the scarcity of cattle in the United States.

On the Canadian market two distinct advances have been made in canned beef within the last few days.

In the domestic put up article the aggregate advance is 20c. per dozen in 1-lb. tins, 30c. in 2-lb. tins, \$1.25 in 6-lb. tins, and \$1.50 per dozen in 14-lb. tins. In Chicago meats the advance is 15c. per dozen in 1-lb. tins, 25c. in 2-lb. tins, and 75c. in 14-lb. tins.

Although the advance in Canadian canned beef is greater than in the American article, the price is still lower than that of the latter.

On account of the duty of 25 per cent. comparatively little Chicago canned beef now comes into Canada, the demand being largely supplied by the home article, which is pronounced by the trade to be equal in quality to that imported.

The Chicago packers do not book ahead, but the Canadian packers do, and from what THE CANADIAN GROCER can gather, a number of the wholesale men had placed their orders three or four weeks ago, and before the advance took place. The outlook is, of course, good for them, but how it is for the packers we are not in a position to state.

The immediate cause of the present scarcity of cattle in the Western States is given as the extraordinary drouth of last summer, which, it is said, both caused the starvation of thousands of cattle, and compelled the farmers to reduce the number they usually fatten for market.

Back of this, however, there is another cause, although an indirect one. For some years past cattle-raising has not been a very profitable industry in the United States. In consequence of this, capital

was largely withdrawn from the ranches. What followed is obvious.

Up to the end of last week the shortage in supplies at the four leading packing centres (Chicago, Kansas City, Omaha and St. Louis) was 270,000 head, compared with the same time a year ago. The shortage in dressed beef since the beginning of the year is 175,000,000 lbs., or nearly 2,000,000 lbs. per day. From points where trainloads of cattle were shipped a year ago, now carloads only are going out, while most of the young stock have already been shipped out.

While there is such a shortage of cattle in the Western States, if what advices from New Mexico say be true, the conditions in that territory are the very opposite, it being credited with having 1,000,000 head of meat cattle, 250,000 of which are ready for shipment. It is said that at the advanced price some 4,000 carloads of cattle will be shipped out of the territory during the next six weeks. Last year the number of cattle on the New Mexico ranches was 500,000.

It has been asserted in some quarters that the marked appreciation in prices is due to a combination. This, however, is denied by those who are well qualified to give an opinion on the subject. Probably there has been some manipulation; but the fact of the shortage in cattle cannot be gainsaid. This particular feature, however, will probably be determined by the investigation which has been ordered by the Federal Government.

The higher values obtaining in the United States have naturally affected the Canadian market. On the Toronto market the advance in cattle on the hoof during the past few weeks has been equal to three-quarters of a cent per pound.

There have been some American buyers in different parts of Canada, and it is said that some purchases on United States account have been made on the Toronto market, but nothing very authoritative is obtainable to substantiate this.

The fact that there is a ninety-day embargo against live cattle from Canada, and a 20 per cent. duty against both dressed meat and live animals, prevents this country from being such a factor in the situation as she otherwise would.

Owing probably in part to the embargo in Great Britain against Canadian cattle on the hoof, the farmers of the Dominion have also been raising less cattle lately. The number is asserted by some to be one-third less than a year ago, but others—and reputable cattle men—to whom THE CANADIAN GROCER spoke, opine that the shortage is not so large as alleged. In Great Britain, too, the supply of cattle is said to be short.

Holders of canned meats at the old prices are evidently fortunate men, although it is the opinion of a good many that there will be no further advance.

SAVING THE DISCOUNTS.

As we wish to take advantage of all discounts, please send us a statement of any outstanding you may now have against us, and always hereafter send us statements from time to time within such time as will enable us to exercise our option to pay cash and take the discount.

THIS is the contents of a card which the E. B. Eddy Co. are in the habit of sending out to those from whom they purchase goods, and should be an incentive for others to go and do likewise.

In these days, with the margin of profit so small as it is in many lines, the saving of every cent or fraction of a cent is so important that nothing should be left undone to secure it.

By saving his discounts the merchant or manufacturer may be said to have ensured a profit before he has sold the article bought. No matter how small the discounts, it should be made a rule with every business man to take them, unless, of course, it is clearly more profitable to take the time instead of the discount.

As a rule, however, it is better to take the discounts, on the principle that a bird in the hand is worth two in the bush.

If the discounts only pay 25 per cent. of the rent, that is worth considering. It is a small business, indeed, that will not do this, or even more.

BUSINESS MEN IN THE CABINET.

WHY is it that Governments in Canada have so few business men in their membership? Both federal and provincial administrations are almost wholly composed of lawyers. The Dominion Government is largely made up of professional men, and the result is that a practical business-like control of public affairs is hard to get.

There are at present fourteen Ministers actually in charge of departments, and of these ten are lawyers and only two business men. The ten legal gentlemen are: Messrs. Tupper, Angers, Ouimet, Caron, Daly, Dickey, Costigan, Curran, Ives and Wood. Mr. Foster has been a college professor and temperance lecturer. Dr. Montague is a practising physician. The only two who can fairly be termed business men are Mr. Haggart, Minister of Railways, and Mr. Wallace, Controller of Customs. The Premier, Sir M. Bowell, who was in the publishing business for many years, is President of the Council, and therefore without a portfolio.

Mr. Foster is certainly able, and his tariff labors have brought him fortunately much in contact with commercial men of the country. But how valuable a personal knowledge of business interests and methods would have been to him, he would probably be the first to acknowledge. Necessarily his information, however quickly acquired and aptly assimilated, is second-hand.

Mr. Haggart at once showed the superiority of business knowledge over legal

training, when in charge of a great spending department, by putting the Intercolonial Railway on a paying basis.

Mr. Wallace, a successful general merchant and miller, was placed at the head of the Customs Department in 1892, and from the outset introduced business methods into its control. He has tried to meet the wants and wishes of business men. Tariff administration at all times gives rise to inconveniences and grievances, and there will always be persons who are not satisfied; but Mr. Wallace's accessibility and attention to complaints are appreciated by merchants. The Controller is not perfect, but he is a business man. That qualification covers fully two-thirds of the requirements of a Minister.

Sir Frank Smith, an experienced and capable merchant, has no portfolio. When for a few months in 1891 he consented to take charge of the Public Works Department, his administration was admitted to be a distinct success.

When cabinets are being made up, board of trade and business men generally should see that the whole work of Government is not passed over to professional men. The most disastrous errors made in public policy during the past fifteen years have been due to misspent money and loose business methods.

It is an utter farce that Canada, whose whole prosperity rests upon agriculture and trade, should be administered by lawyers. Some deputy-heads are capable and energetic, but their powers are limited, and the tendency with permanent officials is to get into ruts, and to surround themselves with dry-as-dust methods. There is more red tape and sealing wax in public administration than sound sense and promptitude.

Our business men are much to blame for allowing affairs to pass under the control of wire-pullers, both in the federal arena and in the provinces. As matters stand, when egregious business mistakes are committed by Governments, an appeal to party fealty is made on behalf of the offenders, who, often through sheer ignorance, proceed to make more blunders.

If this sort of thing is to stop, the business men must wake up and insist that public affairs be regulated by the same principles that govern every successful private concern.

THAT INSOLVENCY BILL.

A POOR excuse indeed is that advanced by the Dominion Government why it proposes to again defer dealing with an insolvency law.

Time ample will there be found for allowing members to repeat old campaign speeches, which neither fellow members listen to nor the electorate read, and whose

only office is to release pent-up partizan wind.

But when it comes to dealing with the Insolvency Bill "time cannot be found for discussing a measure of such importance."

What nonsense! But if it is sound logic, what a commentary it is upon the intelligence of the members of the House!

From time to time during five years at any rate the question of a Dominion insolvency law has been a live topic of discussion in the trade and daily press, while the measure that was introduced last session by Sir Mackenzie Bowell was sifted and re-sifted in committee and in the Senate. And he who, after that, is not familiar with the bill is more fitted for an insane asylum than membership in the House of Commons.

But there is a grave suspicion that the excuse advanced is merely improvised, and, therefore, is not real.

The whole truth of the matter is that the Government is afraid to deal with the bill.

Had we more business men in both the Cabinet and House, and fewer lawyers, we would not see business interests sacrificed to political exigencies as they are now being, and as they will be in the future unless a marked change is made in the personnel of those delegated to make and fashion the laws of the land.

Men do not gather grapes of thorns or figs of thistles.

SITUATION IN LEMONS.

The market for lemons, both in Canada and the United States has lately begun to show some signs of activity. The improved demand is promoting a feeling of confidence, and dealers generally speak very hopefully of the prospects for the trade from now on through the summer months. Importations to United States ports have so far shown a considerable falling off as compared with last year, and the quantity in transit to these points is said to be much smaller than usual at this season.

According to the N.Y. Journal of Commerce, advices from Sicily are of an unfavorable character regarding the shipments that will be made from there during the next sixty or ninety days. Severe storms and extreme cold weather are credited with seriously damaging the crop, many authorities stating positively that the total yield will be far below the average, and that materially higher prices will certainly prevail for the fruit through the summer months.

The stocks he'd in Toronto and at other Canadian centres are not large, but it is said they are sufficient to satisfy the demand until the annual May sales in Montreal. As is well known, the whole Canadian sum-

mer trade is practically supplied with the Sicilian lemons disposed of at the eastern metropolis next week. The news of the injury to the crops in the Italian isle is therefore fraught with considerable importance to our jobbers and retail dealers.

Everything depends upon the arrivals at Montreal during the next few weeks. Meantime lemons are firm, and the prospects for higher prices are good.

TARIFF DECISIONS.

The sub-committee of the Montreal Board of Trade appointed to deal with the subject of tariff decisions has drawn up a form of petition asking the Governor-in-Council to appoint a Board of Experts to secure uniformity in the application of the tariff.

This is a definite move in favor of a uniform tariff, which THE CANADIAN GROCER has been agitating for over a year and a half, and which means more to the internal commerce of this country than a great many reforms which make more stir.

The business men in Montreal and elsewhere were for some time apathetic on the subject, and contented themselves with occasional mutterings against unequal and contradictory rulings from the department. Now, however, the Board of Trade at Montreal is awakening to the importance of the reform, and the petition drawn up is to be sent to the other commercial bodies of the Dominion for joint signature. Montreal and Toronto, as the largest importing centres of Canada, may justly take the lead in this agitation, but the trade everywhere are directly concerned in removing the present inequalities.

Controller Mr. Wallace has since his appointment done his best by the system of checking to remedy the grievance of the trade, but no expedient can be so satisfactory as a permanent court which will at once enforce uniformity and act as expert judges on disputes between the importers and the authorities.

For years back the growing unpopularity of the tariff as a revenue-raising institution may be traced to the anomalies allowed to exist in its administration. The best merchants in Canada have had reason to feel disgust and annoyance at the way the Customs law was enforced. In fact, to some minds the suspicion was natural that there were officials in the department who wanted to make the tariff as oppressive and obnoxious as possible.

A Court of Appeal would relieve this strain, and merchants everywhere should see that the Montreal petition is largely signed, and that the reform so often advocated in these columns is dealt with at the session of Parliament which opens this week.

The question is not so intricate that it cannot be promptly and adequately dealt with this year.

CANNING VEGETABLES IN QUEBEC.

THERE is some talk of starting a canning establishment at Sherbrooke, in the Eastern Townships of Quebec, for the canning of sweet corn, tomatoes and other vegetables.

This district is one of the richest in the province, in an agricultural sense; but, so far, establishments of this kind have not been successful. Attempts have been made at different points on a small scale, and at St. Johns on a large one, to run a canning business, but they have all been given up.

No one seems to be able to clearly explain the reason of this. For instance, the factory at St. Johns, while it was running in odd years, turned out a pack of tomatoes and corn that was the equal of any goods produced anywhere else. The difficulty, however, was that the pack, year in and year out, was not a uniform one, and eventually Mr. Douglas, the proprietor, ceased operations.

In fact the general opinion in the trade in Montreal seems to be that vegetables came in rather too late in the Province of Quebec to permit of as uniform an output of canned vegetables as those of Ontario. At least this is the explanation given for the limited canning operations carried on in Quebec as compared with those of Ontario.

At present there are only about five canneries in operation in Quebec, and these devote their attention chiefly to tomatoes.

The trade generally hope that the proposed venture in Sherbrooke will not share the experience of its predecessor in St. Johns; but the future only can decide this.

It may be remarked as an axiom in this connection, that the further north vegetables ripen, provided they do so in a given time, the better they are for canning purposes. This explains the fact that frequently better canned tomatoes are turned out in Quebec than in Ontario. The difficulty, however, is the lack of uniformity, which enables the Ontario canners to operate under more favorable conditions.

It is proposed also to run a condensed milk manufactory in connection with the projected cannery at Sherbrooke.

TEA PROSPECTS.

SEVERAL tea importers who have been interviewed recently regarding future prospects on the staple are of the opinion that owing to the Oriental complications prices will be higher.

One dealer looked for an advance of 20 per cent. on all Japan teas, and a similar, if not greater, advance in China blacks. Formosa Oolongs of the best quality were also apt to record a material increase in price, and the marked scarcity of pea leaf Ping-

sueys in Canada indicated higher values on them also.

The latter fact is pretty generally admitted, for there are no teas of this description now to be had in Montreal, according to our market reports, under 20c., while good crop stock runs up as high as 24c. It may be added, also, that the advance in the value of silver, if sustained, is likely to cause an increase in the price of tea.

Advices from Yokohama state that there is great likelihood of there being a scarcity of labor, and that the first crop of tea will probably be a little later than usual in arriving, though it was not anticipated that it would show any great advance in price, though it might come later on, perhaps.

Low grade teas ranging from 12c. down were scarce, but goods worth from 12 to 30c. were fairly plentiful.

VALENCIA RAISINS.

Valencia raisins continue to occupy a fairly good position. This is evidenced by advices received in Toronto within the last few days.

The 1894 crop is placed at about 600,000 boxes in excess of last year. Out of the total crop some 2,000,000 boxes have been exported, while the balance remaining consists entirely of fruit unfit for shipment, and will have to be utilized almost entirely for distillation.

Of the exports, about 200,000 boxes more went to the United Kingdom than in 1893, and to the United States and Canada about 16,000 boxes more than in that year. France and the Continent, on the other hand, took about 60,000 boxes less.

At the end of last month stocks in New York aggregated about 50,000 boxes, which is comparatively small. A month previous the stock was 65,000 boxes, while at the close of January it was 90,000 boxes.

On the Toronto market stocks are pretty well reduced for this time of year.

There is no fruit offering in the original market, the season being practically over.

A CHANGE IN TEA INSPECTION.

THE CANADIAN GROCER is informed that the Customs Department will meet the wishes of the trade in the matter of tea inspection, in accordance with the promise made to the grocers' deputation recently. The chemical analysis of tea, by which the soluble ash of the leaf was taken as the test, will be abolished, and the system of testing by samples will be restored.

Osmund, Skrine & Co., having sold out their business at Grenfell, N.W.T., are opening up a general commission business in Vancouver.

MONEY AND STOCKS.

THE firmness noted last week in the money market has become more pronounced. The ruling rate for call loans is $4\frac{1}{2}$ per cent., but in some cases 5 per cent. has been charged. The usual seasonable demand is beginning to develop.

* * *

Canadian Pacific is a little stronger. "Some investment stock," said a broker, "is being taken off the market, which shows that people have not lost faith in C. P. R. yet. With increased traffic, rates in the United States are being restored, and the same may naturally be expected of C.P.R."

* * *

Insurance stocks are dull, with the tendency of values downward.

* * *

Postal Telegraph is attracting a little more attention. To the fact that it is to be listed on the New York Stock Exchange is due this. "It is now 71," said a financial man, "and it is likely to go up to 80 after being listed." It is proposed to increase the capital stock \$5,000,000, which will be devoted to liquidating certain liabilities.

* * *

There is still a good demand for municipal bonds, but, as of yore, there are practically none to be had.

* * *

The activity in grain and provisions in Chicago, and in stocks in New York, is again stirring up the speculative spirit of speculative Torontonians, who dream of fortunes awaiting them in "Gotham" or in the "Windy City."

* * *

The circulation in the Dominion during March was \$20,946,237. This is nearly half a million less than in the same month a year ago.

* * *

Toronto has succeeded in getting power from the Legislature to issue debentures bearing 4 per cent. interest if by so doing a better price can be got than for $3\frac{1}{2}$'s. This power, it will be remembered, was asked in order that the city might be able to accept the bid of the Scotch capitalists for the purchase of certain municipal bonds.

* * *

Winnipeg's 4 per cent. 30 year bonds have been sold at 96.76. A Montreal firm was the purchaser, and the price paid is understood to be in excess of that anticipated.

* * *

Commercial Cable's earnings for the first three months of the year are said to show an increase of \$600 per day compared with the same period of 1894. ARGUOS.

THE LATE GEO. CHILDS.

MEMBERS of the grocery trade throughout the Dominion will learn with regret of the death of Mr. Geo. Childs, one of Montreal's oldest and most respected wholesale grocery merchants.

The event will cause surprise among the trade and his many friends, as the fact that he was seriously ill was not generally known. Some five weeks ago he underwent an operation for calculus, which, though successfully performed, in the end involved too heavy a strain on his physical strength, and Mr. Childs closed a long and useful life of 70 years on Sunday afternoon last.

Mr. Childs was born in Quebec on the 16th April, 1825. He came to Montreal when a lad, and entered the house of Mr. W. M. Addy, then a well-known merchant, with whom he thoroughly mastered all the details of the grocery business.

Thirty-four years ago he purchased the wholesale grocery business of Mr. I. M. Bryson, which he has successfully conducted ever since under the title of Geo. Childs & Co., the house being one of the best known in the Dominion, and having up to the late lamented occurrence witnessed fewer changes in its personnel than perhaps any other firm in the trade in Montreal. For the last few years, however, the active work of the business has been conducted by his

sons, George and Henry Childs, who became associated with their father some years ago.

The late Mr. Childs was president of the Wholesale Grocers' Guild for many years, occupying the office at the time of his death. He also filled several municipal offices, being elected to the City Council in 1876, and for several sessions filled the important position of chairman of the Finance Committee of that body. At the time of his death he was a member of the Council of the Board of Trade, of the Mount Royal Cemetery Trust, a governor of the Protestant House of Industry and Refuge, and of the Western Hospital, and was for some time a governor of the Montreal General Hospital. He was the senior elder of the American Presbyterian Church, with which he associated himself on his coming to Montreal in his youth. He was also one of the originators and one of the first presidents of the Y.M.C.A. A great deal of his time, indeed, was given to religious and philanthropic work, in which his advice was always received with respect. He married Miss Murphy, daughter of Mr. Alex. Murphy, dry goods merchant, and sister of Messrs. John and Alexander Murphy, of Montreal, and of Mrs. H. S. J. Jackson, of Brockville, and Mrs. Dr. Bowlby, of Berlin. He had seven sons, five of whom survive him. They are Messrs. George, Henry and Alfred, of Montreal; Charles, of Minne-

apolis, and Arthur, who is an electrical engineer, in Philadelphia. Mr. Childs' funeral took place on Tuesday, which would have been his birthday.

The Council of the Board of Trade adjourned on Tuesday to attend his funeral in a body on the same day, as did also the Wholesale Grocers' Guild.

ONTARIO'S WEALTHY INDIANS.

A computation has been made by the Indian Department of the surrendered surveyed Indian lands, of which the Government is the trustee for the various Indian tribes in Ontario. The total area is 452,694 acres. These are bringing, when sold, about \$1.50 an acre. The land disposed of in 1894 was 32,385 acres, which yielded the sum of \$44,711. Besides this, the Indians of Ontario, who number 17,330, own 3,680 houses, 858 barns, 1,577 stables, 77,749 acres of cultivated land. Their live stock consists of 3,857 horses, 2,367 cows, 388 oxen, 48 bulls, 691 sheep, 4,897 pigs, and 3,034 young stock. The crops of the Indians in this province last year consisted principally of 65,589 bushels of wheat, 107,773 bushels of oats, 31,115 bushels of peas, 11,419 bushels of barley, 87,255 bushels of potatoes, and 11,501 tons of hay. In addition to this they had fish, furs and other industries valued at \$165,172.

Wholesale Grocers

TORONTO - - ONTARIO

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, April 18, 1895.

THE advent of Lent did not materially help the fish business, and the same may be said of Easter as regards the grocery and provision trade. Indeed, the Easter trade here amounted this year to little or nothing, and the victuallers had no fancy prices for beef. Our fish business is in a poor condition and bids fair to become worse. There is no market, either at home or abroad. The West Indian market is demoralized, owing to the low price of sugar and the insurrection in Cuba. Prices are down to rock bottom and cargoes offering here can find no purchasers. There is an active movement in breadstuffs and mill feeds, while hay remains unusually cheap.

FLOUR—Markets are all firm and higher, with no prospects of a let up in prices. Quotations are: Hungarian patents, Manitoba, \$4.50 to \$4.60; Manitoba strong bakers', \$3.35 to \$4.45; Canadian pastry, \$3.85 to \$4; 75 per cent. rolled patent, \$3.80 to \$3.90; 80 per cent. \$3.70 to \$3.80; 90 per cent. \$3.60 to \$3.70; straight, \$3.50 to \$3.60; extra, \$3.25 to \$3.35.

FISH—Prices are low and no demand. Quotations, to wit, are: Dry cod, shore, prime, \$3.25 to \$3.50; do. bank, \$2.50 to \$2.60; do. large bank, \$4.60; haddock, \$2.25 to \$2.50; herring, No. 1, fall spit, \$1.50 to \$1.75; alewives, No. 1, \$2.50; mackerel, No. 3, large, \$12. The supply of smoked her-

ring is heavy and prices are below all profit, sales being made at 5½c. for cargo lots.

PROVISIONS—Some choice Canadian beef has been received here and the market is easy. A very superior article sold for \$10, but general figures are away below that. Mutton is scarce at 10c. Spring lambs are coming in and are worth from \$5 to \$6. Canadian pork is selling at 6½ to 7c.

EGGS—There has been a big drop in eggs. Dealers retailed during Easter at 15c., and are offering now at 13 and 14c. The jobbing price ranges from 11 to 12c.

BUTTER AND CHEESE—Butter remains demoralized, with prices from 13c. up. Cheese is slow. A lot of September was offered to-day at 9¾c.

GREEN FRUIT—The fruit market remains steady. There is a good supply of oranges, which meet a ready sale at: Valencias, \$5 to \$6; Jamaicas, \$8.50 to \$9; Messinas, \$3; California Navels, \$3.75 to \$4.25. There is a good demand for lemons at advancing prices. Apples are scarce, last season's crop in the Annapolis valley being about cleaned up. Good fruit is selling as high as \$4. New Bermuda tomatoes and onions have arrived, and Florida rhubarb is selling at 10c. per lb. Porto Rico cocoanuts are selling at \$35 per 100.

SUGAR—The steamer Remus has arrived from Dantzic with 29,973 bags of beet root sugar, and the Robinia from Cardenas and Matanzas with 18,631 bags of sugar, the combined weight of the two cargoes being 5,824 tons. To-day's quotations are: Porto Rico, in barrels, 2¼c.; refined cut loaf 5c.; granulated, 3¾c.; standard A, 3½c.; white

extra C, 3¾c.; standard yellow C, 3c.; extra C, 2¾c.; yellow extra C, 2½ to 2¾c.

MOLASSES—There is practically no change in this market in molasses. Port Rico is worth 32 to 35c.; Barbadoes, 39c.; Demerara and W. R. brand, 39c., and St. Kitts, 29c.

PRODUCE—Oats are still high. Canadian are bringing 44 to 46c.; Nova Scotia, 44 to 45c., and P.E. Island, 44 to 48c. Barley is worth 75c. P.E. Island potatoes are worth 45 to 48c., and Nova Scotia, 50 to 55c.

HALIFAX MARKET NOTES.

A big storm set in on Monday, which completely paralyzed trade for a couple of days.

Maple sugar, syrup and candy are receiving considerable attention. Evaporated fruits of all kinds find a ready sale on account of the scarcity of green fruit.

There is no change in canned goods. The demand is good.

Another cargo of Grand Manan smoked herrings has been received—some 10,000 boxes.

American burning oil shave advanced 1c. per gallon, and Canadian ½c.

The Western Bank of Canada has elected these officers for the ensuing year: President, John Cowan; vice-president, R. S. Hamlin; directors, John Cowan, R. S. Hamlin, W. F. Cowan, Dr. McIntosh, W. F. Allen, Thomas Patterson and J. A. Gibson.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, April 18, 1895.

GROCERIES.

A SLIGHT lapse in trade compared with a week ago is to be noted. It is, however, of a temporary character, and is, no doubt, due to the backwardness of the season. Country roads have been in a worse condition than before, owing to the recent rains. The small northern lakes are still frozen, and this is preventing numbers of the sawmills from beginning operations. The general outlook, however, continues fairly good, and merchants are anything but pessimistic in their views. The markets are, if anything, stronger. The demand for sugar has dropped off materially, but there is more confidence in prices. Teas, on the other hand, are a little easier, but it is thought by a good many to be only temporary. Canned goods are in fair demand and steady. Foreign dried fruits continue firm, but prunes is the only line in which trade is active. Payments are still rather slow.

CANNED GOODS.

Vegetables continue in fairly active demand, although retailers are not buying so freely as a few weeks ago. Corn and tomatoes are in particularly good demand, and there is some talk now of there being a shortage in these lines. As pointed out last week, a number of carload lots of tomatoes have been shipped by the packers to the English market, but whether there will be an absolute shortage remains to be seen. Salmon continues in good demand with prices firm. No new pack is being offered on the Toronto market yet. We

quote: Tomatoes, 87½ to 90c. for choice and 85c. for inferior and old stock; corn, 90 to 95c. for choice and 87½c. for common; peas, 82½ to 87½c. for ordinary and \$1.40 for fancy; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.10 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.45 to \$1.50 for choice and \$1.35 for good red fish of not so well known brands in tall tins, and \$1.60 to \$1.65 in flat tins; do., second quality, \$1.15 to \$1.25; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

The local market is fairly well supplied with green Rio coffee, but the demand is only moderate. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

Nothing new to note, there being the usual seasonable demand at unchanged prices. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

The market is quiet and devoid of special feature. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

There is no change to note in this market. We quote: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona

almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The market continues strong. There is not much doing, however, the demand during the last few weeks having dropped off materially. Bids of 1-16c. less than the stipulated price for large lots have been rejected by the refineries during the last few days. One of the bids rejected was for 2,000 barrels of granulated. There is still a good deal of cutting going on among the wholesalers, sales being made at less than present refiners' prices. This, however, is probably sugar bought before the recent advance, and the disposition to cut figures seems to be getting gradually less. We quote: Granulated—domestic, \$3.40 to \$3.50; do., No. 2, 3¾c.; yellows, 2½ to 3¾c. Raw—Demerara, dark, 2¾c.; golden, 3 to 3¾c.; bright, 3½c.

N. Y. Journal of Commerce, Tuesday: There is still an apparent tendency to assume that raw sugars have at least passed the worst stage, and changes in future must be for the better. Refiners are reasonably well fortified with stocks in hand and coming, but evidently have not entirely lost interest, and with supplies attracting investment demand, the prospect for a continued outlook appears good. The modification of ideas in regard to outcome of West India yield is a feature at the other end of the situation tending to increase confidence.

SYRUPS.

On account of the advent of the maple product, the usual seasonable falling off in the demand for syrups is reported. There is, however, a moderate business doing for this time of the year. We quote: Dark,

MARKETS—Continued

25c.; medium, 28 to 30c.; bright, 35 to 40c.; very bright, 45 to 50c.

MOLASSES.

There is the usual seasonable demand only. We quote as follows: New Orleans, barrels, 26 to 28c.; half-barrels, 30½ to 32c.; Barbadoes, barrels, 28 to 32c.; half-barrels, 30 to 34c.

TEAS.

There are a few more teas selling on account of the better values being shown from London, but there is not much stir in the market. Advices from London indicate that a better trade and firmer prices were anticipated after the Easter holidays. The uncertainty as to whether or not the coming British budget speech will foreshadow any changes in the duty on tea is also a factor in the market. Mail advices state that the London tea market was extremely quiet during March, and that prices of all kinds again slightly fell. The deliveries for the month were considered good in spite of a further falling off in exports. The imports of March for London were 14,611,000 lbs., against 12,534,000 lbs. last year; the deliveries, 19,025,000 lbs., against 17,903,000 lbs. last year, and the stocks there on 31st March were 91,544,000 lbs., against 93,331,000 lbs. last year. Japan teas appear to be a little firmer during the last few days. Indian and Ceylon teas are much as before. Wholesalers report the demand principally for Japans and Young Hysons. There are a few Indian and Ceylon teas selling. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUITS.

Currants are in fair demand at unchanged prices. Further shipments are to hand on the Toronto market this week. We quote: Filiatras, half-barrels, 4 to 4½c., barrels, 4¼c.; fine Filiatras, half-barrels, 4¾c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 5½ to 6c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Valencia raisins are quiet, although cheap off-stalk appears to be attracting some attention. The outside markets remain steady, with stocks generally light. Further information along this line will be found in another page. We quote: Off-stalk, 3¼ to 3¾c.; fine off-stalk, 4 to 4¾c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Prunes continue in demand. Stocks are much reduced, but the high prices have checked importation for the time being. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 5 to 5½c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo,

7 to 7½c. per lb. "Atlas,"—"D," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

Sulana raisins are very firm at the recent advances. Advices received by P. L. Mason & Co. from Smyrna state that stocks of Sultana raisins there have been reduced to 1,500 tons, while this quantity is gradually being bought up for shipment to the Continent. The same advices report prices slightly higher. We quote 5½ to 7c.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote nominally: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

Demand continues good for California Dried fruits. We quote according to quality: Peaches, 10½ to 13c.; apricots, 10½ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

BUTTER AND CHEESE.

Deliveries of fresh roll butter have been lately much more liberal than for some time past, and this class of butter is commencing to accumulate on the market. This is no doubt largely due to the quantity of fall butter that is still undisposed of. If the summer butter could once be got rid of there is no doubt that for present receipts of fresh makes fairly good prices could be got. As it is all classes of butter are sick. We quote: Summer dairy and store packed—Choice, 10 to 13c.; low grade baking butter, 7 to 8c.; fresh large rolls, 12 to 14c.; pound prints, 14 to 16c. Summer creamery, 11 to 14c. Winter creamery—Tubs, 19 to 20c.; pound prints, 20 to 21c. August and September makes of Canadian cheese bring 8 to 10½c., and new Canadian cheese is quoted at 11c. Small Stiltons bring 12 to 12½c.

GREEN FRUIT.

Business is still picking up, and wholesale dealers are somewhat encouraged by the outlook. Considerable sales are being made in oranges and bananas. The feature of the market is the appearance of the first strawberries of the season, some small consignments having been received from Florida and Tennessee. Prices are only slightly altered in some lines. We quote: Lemons—Messinas, \$2.75 to \$3.75. Oranges—Valencias, small crate, \$4.25 to \$4.50, and Jumbo crates, \$5.25 to \$5.50; Messinas, \$2.50 to \$3; California seedlings, \$2.75 to \$3; California navel, \$3.50 to \$3.75. Bananas, \$1.50 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. Grapes—Malagas, \$5 to \$6.50 per keg. California dried fruit—Apricots, 12½c.; peaches, 13 to 13½c.; cranberries, \$3.50 per box. Strawberries, 50c. a quart basket.

COUNTRY PRODUCE.

BEANS—Are higher and firm, choice hand-picked bringing \$1.60 to \$1.65 a box.

DRIED APPLES—Seem firm at 6½c. a pound.

EVAPORATED APPLES—In 50-lb. boxes: 7 to 7¼c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.75 to \$3 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—New sugar and syrup are beginning to come in from North Ontario and the Eastern Townships of Quebec, but as yet not a very large trade is being done in these lines. We quote: Sugar, 8 to 8½c. per lb.; syrup, 75c. in 5-gallon lots and 85c. in gallon tins.

POTATOES—Are still in good demand. For a day or two during the past week good qualities brought as high as 68c. on the track, but they are now quoted at 65c. on track and 75c. out of store, which is still a considerable advance on prices paid two weeks ago.

POULTRY—Getting dearer, scarcer and firmer. We quote: Turkeys, 14c.; geese, 8 to 9c.; chickens, 50 to 75c., ducks 75c. to \$1.

EGGS—Now that the Easter holidays are over the supply of eggs is becoming more liberal than ever, and prices have declined to 11 to 11½c. a dozen, with a fair prospect of a 10c. market in the course of a few days.

FISH AND OYSTERS.

Frozen lines of fish are about out of season on account of the mild spring weather, and stocks are now pretty well sold out. Very little fresh fish are coming in yet owing to the fact that quantities of ice still linger in the upper lakes. The sales for Easter week are reported good on this market. Practically nothing is being done in oysters. We quote as follows: Salmon trout (frozen), 6½ to 7c.; white fish (frozen), 6½ to 7c.; No. 2 white fish, 4c.; skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; market cod, 3 to 5c.; steak cod, 6 to 6½c.; haddock, 4 to 4½c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; sea herring (frozen), \$1.25 per 100 fish; blue pickerel, 4 to 5c. lb.; yellow ditto, 6c. per lb.; mackerel, 14c. each; pike, 3 to 4c. lb.; cod, 6c. per lb.; flitch cod, 5c.; finnan haddies, 6½ to 7c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; Vancouver halibut, 6 to 7c.; large halibut, 10 to 13c. Oysters, \$1.20 per gallon for standards and \$1.50 for selects.

PROVISIONS AND DRESSED HOGS.

Dressed hogs and their products have advanced considerably, and the market is firm at outside points. Dressed hogs are being taken on this market at \$6.25 per 100 lbs., and even higher prices than this could be

gotten if the right quality were offered. We quote products:

BACON—Long clear, 7½c. for carload lots, 8c. for ton lots, and 8½c. for small lots; breakfast bacon, 10½c to 11c.; rolls, 8c. to 8½c.**HAMS**—Large, 22 lbs. and over, 9½c to 10c.; medium, 15 to 20 lbs., 10½ to 11c.; small hams, 10¾ to 11c.; pickled, 9½ to 10c.**LARD**—Pure Canadian, tierces, 8¾c.; tubs, 9c.; pails, 9¼c.**BARREL PORK**—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.25; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.**SALT.**

Trade in this staple has been brisk during the past few days. Prices remain as before. Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

FLOUR AND FEED.**WHEAT**—Maintains the local advance made some time ago. We quote: White, 70c.; red, 69c.; goose, 69½c. per bush.**OATS**—Steady at 40 to 41c.**BARLEY**—Remains at 49c. per bush.**FLOUR**—No change in the situation. Quotations locally are: Ontario straight roller, \$2.65 to \$2.75; Manitoba, \$3.60 to \$3.65; patents, \$3.75 to \$3.90.**BREAKFAST FOODS**—Prices are the same as those of last week, and a fair trade is being done. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; cornmeal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.**SEEDS.**

The local market is firm, out of sympathy with the American markets. There is a good jobbing demand, but no changes are reported in prices. Alsike is quoted thus by jobbers: Prime to choice, \$4.80 to \$5; really fancy, \$5 to \$6.60; and lower grades \$4.

Good clover now brings \$6.20 to \$6.50.

In timothy the jobbing prices to the trade are \$3 to \$3.50 for prime, to choice grades of machine-threshed seed, and a little more for the bright unhulled article.

HIDES, SKINS, WOOL AND TALLOW**HIDES**—Green hides stand at 5½c. for No. 1, 4½c. for No. 2, and 3½c. for No. 3. For cured 6½c. is asked. The supplies are light.**SHEEPSKINS**—Good stock is quoted at 85 to 90c.**CALFSKINS**—Are fairly plentiful, but prices remain steady at 6c. for No. 1 and 4c. for No. 2.**TALLOW**—Is steady. Jobbers quote 5 to 5¼c. and sell at 5¼c.**WOOL**—Canadian fleece is quoted nominally at 19 to 20c., there being none on the market. In pulled wools best supers are quoted at 19 to 21c., and extras at 21 to 22c.**PETROLEUM.**

As noted in a special article on the oil situation in another column, crude has made a phenomenal advance, and refined, both

MARKETS—Continued

American and Canadian, has gone up from 4½ to 5c. a gallon. Prices are not likely to be lower very soon. We quote in 1 to 10 bbl. lots, imperial gallon Toronto: Canadian, 17 to 18c.; carbon safety, 18½ to 19½c.; Canadian water white, 18½ to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

MARKET NOTES.

Dawson & Co. have some strawberries in from Tennessee.

Hannah & Co. are still looking for any good potatoes that are offering.

Smith & Keighley report large sales of California dried fruits.

Davidson & Hay have a shipment of "Maple Leaf" canned salmon to hand.

A. P. Tippet & Co., report the receipt of large orders for Lazenby's jellies.

T. Kinnear & Co. report they have peas, corn, and tomatoes slightly under regular prices.

Continued good sales of Seville orange marmalade are reported by W. H. Gillard & Co.

D. Gunn, Flavell & Co. are offering a special line of clean, bright evaporated apples at 7c.

Golden tipped Ceylon tea in 20-lb. boxes and 50-lb. half chests is to hand with the Eby, Blain Co.

Warren Bros. & Boomer have to hand this week a shipment of "Imperial" currants, in cases and half-cases.

John Sloan & Co. report large sales of Congou teas as a result of their advertisement in THE CANADIAN GROCER.

McWilliam & Everist are daily expecting 2 cars of Valencia oranges, 2 cars of Egyptian onions, and 4 cars of bananas.

D. Gunn, Flavell & Co. report a very marked increase in their sales of meats and lard during the past few weeks.

T. Kinnear & Co. are in receipt of a carload of currants; also a carload of syrup, which they consider shows good value.

Seville orange marmalade, six pails in crate, is being offered by the Eby, Blain Co. It can be retailed at 2 lbs. for 25c.

"Our stock of canned goods includes some of the best brands in the market. Get our prices," say H. P. Eckardt & Co.

McWilliam & Everist have received a small shipment of strawberries from Florida, which they are disposing of at 50c. a quart box.

Perkins, Ince & Co. have a shipment of cheap French prunes on the way. This will be the last shipment of these goods for the season.

John Sloan & Co. report the arrival of shipments of "Regalitzza" currants, Sultan raisins, and Arguimbau's selected layer Valencia raisins.

Another shipment of cheap Valencia off-stalk raisins has arrived for Warren Bros. & Boomer. "They show the best value on the street," remarked a member of the firm.

W. H. Gillard & Co. are having a ready sale for Knox's "Sparkling" calves-foot gelatine, which received the only medal at the World's Fair.

Between the sentiment prevalent a fortnight ago and the actual experience with dried beans at the present time there is some contrast. A few weeks ago nothing "bull-

ish" was too strong to say of the market. At present it looks as though high cost had affected sales to the jobbing and retail trades.—N. Y. Journal of Commerce.

W. H. Gillard & Co. have received a large consignment of New Orleans molasses (barrels and half-barrels), which show, it is said, splendid value.

A cable to P. L. Mason & Co. states that prices for new crop candied peel are rapidly advancing, owing to the destruction of the plant and fruit by the frosts of the past winter.

Toronto Salt Works are now supplying Windsor dairy salt to every creamery in the vicinity of Toronto that formerly used imported salt.

"The price at which we are offering 6-lb. corned beef is inducing large buying," write Lucas, Steele & Bristol, Hamilton. Their figure is away below market value.

P. C. Larkin & Co. have opened 73 accounts for the sale of "Salada" in Montreal up to date. Their warehouse and offices in that city are at 318 St. Paul street.

A large invoice of shell Castile soap, bars and cakes, is expected daily with Lucas, Steele & Bristol, Hamilton. This firm have also nother big lot of "Bargins" molasses just to hand.

"'Imperial' Congou is gaining in favor every day in the Northwest Territories and Manitoba, and consumers there say it is peculiarly adapted to their alkaline water," write W. H. Gillard & Co.

"Plymouth Rock" gelatine, pink and white, is reported a good seller with Lucas, Steel & Bristol, Hamilton. "Crystal" gelatine is also a good one. The 20c. packet will make three quarts jelly.

"Canadians do not eat enough orange marmalade," said a Scotchman the other day. The Toronto Biscuit and Confectionery Co. are making marmalade that they claim is equal to the best imported.

The Mazawattee Ceylon Tea Company report that sales for their packet tea continue to increase beyond expectations. They are daily increasing the already large number of their agents throughout the Province, all of whom speak highly of the way the tea sells, and the entire satisfaction it affords the consumer.

J. W. Beardsley's Sons are pushing the sale of their shredded codfish, "Acme" beef and boneless herring. The two last named are new lines. The sample of the latter submitted to THE CANADIAN GROCER was delicious. The firm is still prosecuting the work of establishing cooking schools for shredded codfish. "These cooking schools," said R. S. McIndoe, the Toronto agent, are of great advantage to the merchants throughout the country, for they increase trade in this particular line in every town they go. In some places all that wanted to get into the schools could not do so."

MONTREAL MARKETS.

MONTREAL April 18, 1895.

GROCERIES.

THE grocery market has furnished a fair degree of activity since our last, but there is little actual change to note either in the conditions or price governing any of the leading staples. In sugar, jobbers evidently would operate ahead more largely, but refiners prefer to keep their

order sheets well in hand in view of the low range in prices ruling. In molasses, the feeling is uncertain, but advices to hand this week create the impression that the low offers at which some supplies have been booked to arrive this spring are premature, and that the sellers will hardly be able to fill them at a profit. Tea is a strong line, and importers seem to look for continued firmness on future importations. Dried fruit is dull and featureless, and the same can be said of canned goods. Reference is made elsewhere to the first direct cargoes of green fruit, and other lines furnish no feature.

SUGAR.

There has been a fair business doing in sugar during the week, with no notable change in the position of the market.

THE FOAM YEAST CO., LTD. TORONTO.
79 Esplanade.

Refiners note a disposition on the part of jobbers to operate ahead, but they themselves are disposed to use caution in this respect. In fact, they are not accepting orders for any large quantities ahead at all. The jobbing demand is fair also, both for yellows and granulated. In fact, dealers all round evidently consider that sugar is good property at its present cost. Granulated is rather firmer in tone, and though some lots have been placed at 3 5-16c. from the refineries, the latter are disposed to ask rather more money. Yellows are in active enquiry, 100-barrel lots selling at 2 7-16 to 2 1/2 c.; for low grade mediums 2 3/8 to 2 3/4 c., and brights 2 3/8 to 3c. For regular jobbing business we quote granulated 3 1/2 c. for standard and 3 3/4 c. for No. 2, with yellows 2 3/8 to 3 1/4 c., as to grade.

SYRUP.

There has been a good jobbing trade doing in syrups, while several round lots of stock have left first hands at firm prices, and we quote 1 1/2 to 2 1/4 c., as to quality.

MOLASSES.

The molasses market is rather difficult to understand this week. For business from stocks on spot, prices are unchanged, and we quote 31 1/2 c. as holders' ideas. With regard to new supplies to arrive, it is claimed that the low offers that we have already reported are premature, and that no supplies can now be laid down in Montreal for less than 30c.

RICE.

There has been a fair spot business in rice, the tone of the market being firm and well maintained. Primary advices generally tend to strengthen this feeling also, while across the line market reports indicate that all the supplies of Japan rice have been bought up, and buyers are awaiting new arrivals. We quote mill prices for invoice lots as follows: Japan standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

There is a steady feeling in the spice market, all lines ruling firm. We quote in a jobbing way: Penang black pepper, 8 to 9c.; white pepper, 11 to 15c.; cloves, 9 to 20c.; cassia, 9 to 20c.; nutmegs, 40 to 90c.; and Jamaica ginger, 18 to 25c., according to grade.

COFFEES.

There is no change in the coffee market. Business has been fairly active and prices are steady to firm. In a regular way we quote green coffee in bags as follows: Maracaibo, 20 1/2 to 22c.; Rio, 18 1/2 to 20c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

The tea market has continued to exhibit a fair degree of activity during the past week, and the question of future supplies and their cost is attracting some attention from importers. The expectation generally is for firmer prices. The chief feature recently on spot has been the demand for low

THE DOVER VINEGAR WORKS
PORT DOVER, ONT.

MONTREAL MARKETS—Continued

grade Congous and Japans. The latter are difficult to obtain, in fact it is doubtful if an order for a straight lot of low grade Japan under 12c. could be filled at present. In Congous we note the sale of some 900 chests at prices ranging from 10 to 14c., while Pea Leaf Ping Sueys are hard to obtain. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUIT.

There is no change in the raisin market, business ruling quiet and prices steady. A moderate jobbing trade is doing in California raisins, which are not a heavy stock here. We quote: 4-crown loose Muscatels, 6¾ to 7c., and 3-crown do., 5½c.

Valencia raisins are moving out quickly in a jobbing way at former prices. We quote: Off stalk, 3½ to 4½ as to grade, and layers 5 to 5½c.

There is no change to note in currants and business rules quiet. We repeat prices as before: Filiatras and Provincials, 4 to 4½c., in cases; Patras, 5 to 5½c., and Vostizzas, 7 to 7½c.

The prune market is quiet and unchanged. There is only one large line of California prunes here on the market, and they are held for from 8 to 9c. as to grade. Bordeaux and Bosnias are not in heavy supply, and prices are held firm at 4 to 4½c. for the former, and 4½ to 5c. for the latter.

Figs are practically off the market so far as any straight wholesale lots are concerned. A few boxed figs are held by jobbers who want them for their own trade, and ask 10 or 12c. per lb.

There is no change in dates. We quote as before: 3½ to 4c.

Dried apples continue scarce and firmly held at 6 to 6½c., and the same remarks apply to evaporated fruit at 7 to 7½c., as to grade.

NUTS.

There is a quiet jobbing trade doing in nuts. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 13 to 14c.; shelled ditto, 24 to 25c.; filberts, 7 to 8c.; and pecans, 9 to 11c.

CANNED GOODS.

There is no change in the canned goods market. Business is quiet, and we do not hear of any offers of new pack salmon this week. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.10 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 95c. to \$1 per doz.; marrowfat peas, 90c. to \$1 per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green Gages, \$2 to \$2.25; blue plums or Damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, 90c. to \$1.10.

FISH.

With Lent over, the fish market is naturally quiet, and business is of a small sorting character, principally in pickled fish. Fresh herrings have sold at 60 to 80c. per 100, dore at 5 to 6c. per lb., trout at 6½c., and fresh salmon at 13c. No. 2 B.C. salmon have changed hands at \$11 per bbl., and No. 2 mackerel at \$15. New Finnan haddies have sold at 8c. per lb., and old stock at 5c., and bloaters at 75c. per box.

GREEN FRUIT.

APPLES—The apple market is without change, and we quote \$3 to \$5.50, according to grade.

ORANGES—Business is quiet in oranges. California stock are practically a drug on

the market, and prices on them range down pretty low in consequence. We quote: Valencias, \$3.75 to \$4.50, and Messinas, \$2 to \$3; ditto, bloods, \$3.50 to \$4.50; Californias, \$1.50 to \$3 per box, and Jamaicas, \$7 to \$8.

LEMONS—Rule quiet but firm at \$2.50 to \$3.50 as to quality.

GRAPES—They are practically out of the market, and we do not quote them.

BANANAS—Receipts of bananas have been liberal, but prices are fairly steady. We quote: No. 1, \$1.75 to \$2, and No. 2, 80c. to \$1.25.

PINEAPPLES—Rule firm under light supplies at 20 to 30c.

COUNTRY PRODUCE.

EGGS—There has been considerable fluctuation in this market. Previous to Easter there was a brisk demand, and prices stiffened over 2c. The advance brought on large receipts and prices promptly fell back, and at the time of writing are easy at 13 to 14c. per dozen.

MAPLE PRODUCTS—There is a steady trade doing in maple sugar and syrup. Prices rule steady to firm under light receipts at 60 to 70c. per gallon tin for syrup and 7 to 8c. per lb. for sugar.

BEANS—Continue quiet and steady at \$1.50 for hand-picked and \$1.25 for lower grades.

HOPS—Continue dull and unchanged at 5 to 7c. as to grade.

ONIONS, DOMESTIC—These are rather firmer in tone under lighter stocks at \$1.25 to \$2.25 per barrel.

ONIONS, IMPORTED—New Egyptian onions were offered for the first time this week at 2c. per lb. Bermuda stock in crates is rather lower at \$2.50 to \$3 under increased supplies.

POTATOES—There has been an active demand for potatoes during the past week, and prices have advanced sharply in consequence to \$1 to \$1.25 per bag as to quality.

PROVISIONS.

The provisions market is quiet, but the feeling is firm and prices are maintained. The demand was slow and business of a jobbing character. We quote: Canadian short cut, clear, \$16 to \$16.50; Canadian short cut, mess, \$17; hams, city cured, per lb., 9 to 10½c.; lard, Canadian, in pails, 9 to 10c.; bacon, per lb., 9 to 10½c.; lard, common, refined, per lb., 7 to 7½c.

FLOUR AND MEAL.

The flour market continues active and firm. The demand from local country buyers is good, and a large volume of business is doing. There is also some enquiry from abroad, but millers are holding off for the present. We quote: Winter wheat, \$3.60 to \$3.75; spring wheat, patents, \$3.75 to \$3.90; straight roller, \$3.15 to \$3.25; straight roller, bags, \$1.50 to \$1.55; extra, \$2.75 to \$2.85; extra bag, \$1.35 to \$1.45; superfine, \$2.50 to \$2.60; Manitoba strong bakers', \$3.75.

The demand for feed is good and the market active and steady. We quote: Bran, \$19 to \$19.50; shorts, \$19 to \$20; millie, \$23 to \$24.

There was no change in the situation of the oatmeal market, business being quiet and principally of a jobbing character. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

BUTTER.

The butter market does not improve, and holders of large stocks of held butter would certainly submit to further substantial concessions wherever a clearance is possible. This was evidenced Monday when a round lot of held Western dairy sold at 5c. This is the lowest price in years and speaks pretty plainly of the poor prospects on held stock. Held creamery is equally heavy, for although the nominal asking price is 14c. it is quite likely that 12c. would be accepted if a buyer could be found at the price. The difficulty, however, is that they are hard to find. For fresh butter the market continues to be a narrow jobbing one. Prices hold steady under moderate stocks at 21 to 22c. for creamery, and 18 to 20c. for fresh Townships dairy.

CHEESE.

The cheese market continues quiet and unchanged, and there is little demand to note from the other side for the stock remaining here. There is still wide diversity of opinion regarding what remains, there being more than one who place the stock at practically as high a figure as that estimated over a fortnight ago, despite the shipments that have been made since. It may be that stocks were largely underestimated, as claimed, for, owing to the conditions ruling here, only an approximate guess at stocks can ever be made. It seems unreasonable to suppose, however, even allowing that this is so, that stocks were as much underestimated as the pessimistic ones claim. The shipments to date since the close of navigation have been 340,744 boxes, or 40,000 more than for the same period last year. With as large an increase as this in view, stocks in Canada on the first of the year could hardly have been so much heavier to allow of a very large quantity yet remaining to go forward. The exports for the week ending last week from Montreal were 11,662 boxes, 5,142 to London, 4,610 to Liverpool, and 1,910 to Bristol. With regard to the actual business passing, it is almost nil. It is stated that offers have been made recently of a large line of stock which has been carried here on English account through the winter. The goods in question amount to in the vicinity of 8,000 boxes, and, if the report is correct, it does not speak for much activity in England. It is difficult to understand, however, on what ground the British owners hoped to find purchasers on this side as late in the season as this, if they could not find buyers on their own side of the water. Quotations here are purely nominal at 9½c. to 10c., as to grade.

ASHES.

There is no change in ashes, the market being quiet and steady. We quote: First

Wilson's take the Prize.

Scales, Refrigerators, Bakers' Machinery
67 Esplanade St. E., Toronto.
Special Terms this Month.

pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6 to \$6.10 per 100 lbs.

MONTREAL TRADE NOTES.

The first receipts of new Egyptian onions this spring were received this week by Vipond, McBride & Co.

Cables from Barbadoes to Gillespie & Co. report that the crop of molasses will be much later than usual coming forward.

Diminishing stocks and some large purchases by outside buyers have led to an advance of 30c. per bag on potatoes.

A rush for Hires' root beer is reported by T. J. Cooke & Co., and the increased demand points to the wisdom of ordering early in the season.

A. P. Tippet & Co. have just received some handsome sample bottles of Lazenby's pickles. The bottles are supplied with the patent lever stopper.

Rose & Laflamme have been appointed agents for Cunningham's desiccated egg food. It is put up in handy packages and should meet a good reception.

W. R. Wonham & Sons are giving their friends some handsome pocket books. These books are an "ad." for Walker & Sons' whiskeys, of which Messrs. Wonham are the agents.

A. P. Tippet & Co.'s advices from the Pacific coast note firmness on all kinds of prime California dried fruits. They have placed several lots with the trade here a rather firmer figures.

The steamship Premier, owned by Vipond, McBride & Co., fruit merchants, which was in the direct fruit trade between Montreal and Jamaica last summer, has been chartered by the Colombian Government to transport troops in connection with the rebellion.

The Edwardsburgh Starch Co., having resumed the making of glucose a year ago, report an exceedingly good March, better than last year, and the works are now employed to their full capacity. Prices have been low, and American concerns, by reckless cutting, have tried to get possession of the Canadian market, but the prospects for the Canadian maker are distinctly better.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., April 18, 1895.

BUSINESS during the past week has been good, though city collections continue rather slow. This is true in a number of cases where there is no just reason for it, and city retailers should take note of this and for their own sake not have it so. In the country market the Easter display was good, some fine Ontario beef being much admired. The West India steamer's being some four days late was somewhat of a disappointment. In prices the firm feeling noted continues, and with the exception of a few things, as hay, butter and smoked herring the tone is very firm. Flour, beans, beef and pork are higher and further advances would not surprise.

OILS—Burning oils are again higher with a good demand and the market firm. Second quality is now costing the retailer the same price at which he sold it but a week or two ago. In lubricating oils the

demand is large, as always at this season when mills are starting. Prices show no change. Best American burning oil, 21c.; best Canadian, 19c.; second, 15c., no change for barrel.

SALT—Markets are as last reported. Some cargoes which have been out some weeks are looked for daily. Prices to arrive are: Coarse, 43 to 45c.; ex store, 50 to 55c.; fine factory filled, \$1 to \$1.10; 5 lb. bags, \$3 to \$3.25 per bbl.; 10 lb. bags, \$2.80 to \$3 per bbl.; 20 lb. wood boxes, 30c. each; 10 lb. boxes, 12c. each; cartoons, \$2 per doz.

CANNED GOODS—As reported stocks are light and wholesale dealers are in the market, but owing to the price being higher than last fall and firm, there is no large buying. One car of assorted kinds arrived during the past week. As noted in our report some two weeks ago, canned corned beef is a commodity of interest. The advance during the part week is between 10 and 15c. per doz. Oysters, though firm, as yet show no advance. Tomatoes are somewhat scarce. All vegetables are firm. Since the importing of two cars of California canned fruit last fall none has arrived in this market. Our merchants feel that except in the very highest priced goods, our own fruits give every satisfaction. We quote prices: Corn, \$1; peas, 95c. to \$1; tomatoes, \$1.05 to \$1.10; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$2.85 to \$2.95; 1-lb. tins, \$1.70 to \$1.80; oysters, 2's, \$2.20 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; salmon, \$1.35 to \$1.40; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, 4 doz., \$5.50; chowder, 2 doz., \$3; scallops, 4 doz., \$5.50; Digby chickens, \$1.

DRIED FRUIT—At this season little is moving. Evaporated apples are rather easier, though prices show no change. The most here were bought low, though some lots were bought at top figures. In dried, the demand and the stocks are both light. Owing to the prices asked by holders, there is no export demand. In California evaporated fruit there is some movement, but it is small. Prices are firm, and, owing to advances abroad, higher prices are looked for. Raisins show no change. We quote: Dried apples, 5½ to 5¾c.; evaporated apples, 8¼ to 8½c.; Sultana raisins, 6 to 7c.; Valencia, 4¼ to 4½c.; layers, 5¼ to 5½c.; London layers, \$2.10 to \$2.25; loose Muscatels, 5½ to 6c.; currants, bbls., 4 to 4¼c.; cases, 4¼ to 4½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.

GREEN FRUIT—Dealers are very busy, though the Easter demand was not as good as expected. New Egyptian onions are now in the market and a good demand is reported. A few Bermudas are also here. In oranges prices continue low. Lemons are firm. Nuts show no change, and the demand is light outside of peanuts, which show fair sales. Bananas being received now are of extra quality. Valencia oranges are getting soft and Messinas are coming more into use. In apples, while hard fruit finds good demand, soft will not sell; very few are coming to hand, and demand is fair. Prices are: Apples, hard fruit, \$2.50 to \$3; soft fruit, \$1 to \$2.50; California seedling oranges, \$1.75 to \$2.75; navels, \$3.50 to \$4.50; Messina, \$2.75 to \$3; bloods, \$2.50 to \$2.75 per half-box; Valencia, medium, \$4.25 to \$4.50; large, \$5.50 to \$6.50; lemons, \$4 to \$4.50; bananas, \$1.50 to \$2.25; onions, Egyptian, 2½ to 3c.

DAIRY PRODUCE—Butter shows no improvement. Price is not a question. Sales are made whenever possible. Last fall there

was no butter to be bought at any price, but to judge from the market now a quantity must have been discovered, as it cannot all have been made during the winter. The discovery would have been made to better advantage last fall. Cheese is easy, with a market fully stocked. It is expected a few new will be offered here soon, but no quantity will be in this market for some time. The retailers got caught on eggs this Easter,

ST. JOHN MARKETS—Continued.

and it is hoped it will be a lesson. A few had been secured rather under the market. Down went the price, and quantities not coming in as was expected, they were soon bought and sold at the same price. Dealers should not be in such a hurry, because they buy a trifle below a neighbor, to cut prices. Eggs will likely be lower. We quote: Butter—Dairy, 12 to 16c.; creamery, 17 to 18c.; fresh creamery prints, 23½ to 24c. Eggs, 13 to 15c. Cheese, 10 to 10½c.

MOLASSES—Market is bare, the steamer not arriving as was expected, but before this report is read lots will be here. Some good Porto Rico is offered at low prices. Antigua is out of the market. The small quantity of new Nevis which is held here finds ready sale. Syrups are in light demand. We quote: New Barbadoes, 30 to 32c.; new Nevis, 28 to 29c.; Porto Rico, 30 to 31c.; syrup, 33 to 35c.

SUGARS—Remain unchanged. There are large quantities moving. Prices are firm. There is nothing new to report. The low prices will no doubt largely increase the consumption during the season. We quote: Granulated sugar, \$3.50 to \$3.65; yellow, 2½ to 2¾c.; Paris lump, 4¾ to 5c.; pulverized, 4¾ to 5c.

FISH—The business is not very satisfactory at present. Dry cod are rather easier. The market has been supplied with what will likely be needed till new arrive. Gaspareaux continue to be but small catches. The price has, however, been run down to 60c. per 100. The quality is good. Halibut are lower. They are coming forward in better quantities. Hake and smoked herring continue very dull, both here and abroad. Pickled are low. We quote prices: large cod, \$4; medium, \$3.85 to \$4; small, \$3 to \$3.25; pollock, \$1.75; bay herring, \$1.50 half-bbl.; Shelburne, No. 1, bbl.; \$4; half-bbl., \$2.40 to \$2.50; smoked herring, 7 to 8c.; Digby chickens, 10 to 12c.

PROVISIONS—Demand continues active, with firm prices. Wholesale dealers are not active buyers at present figures. In smoked meats a good trade is reported, with hams rather higher in proportion than rolls. Lard is marked up. We quote: Clear pork, \$18.50 to \$19; mess, \$16 to \$16.50; beef, \$14 to \$14.50; pure lard, 10½ to 11c.; hams, 11 to 12c.; rolls, 9½c.; compound lard, 8½ to 9½c.

FLOUR, FEED AND SEED.

The flour market continues very firm, with rather higher prices than last year. Ontario millers say they are doing business on as small a margin as possible, and there is some talk of importing American flour; but nothing has been done, and at present prices it would be a very low grade. Manitoba remains low in proportion, and large quantities are being brought into this market. Bran is rather easier, as is cottonseed meal. In oats prices are somewhat lower. Oatmeal is firm. Pot barley and beans are higher and firm. Hay shows no improvement. Seeds are firm with a good demand. We quote: Manitoba, \$4.40 to \$4.50; best Ontario, \$3.75 to \$3.85; medium, \$3.55 to \$3.70; oatmeal, \$4.25 to \$4.30; cornmeal, \$2.85; middlings, \$24 to \$25 on track; bran, \$21.50 to \$22.50; hand-picked beans, \$1.95 to \$2.00; prime, \$1.85 to \$1.90; oats, local, on track, 42 to 43c.; Ontario, 44 to 45c.; hay, \$8.75 to \$9; pot barley, \$4.15 to \$4.20; round peas, \$3.75 to \$3.90; split, \$3.70 to \$3.90; American timothy seed, \$3.20 to \$3.30; Canadian, \$3 to \$3.50; red clover, 11½ to 12½c.; Alsike, 11½ to 12½c.

ST. JOHN MARKET NOTES.

Savings Bank deposits, \$77,409; withdrawals, \$74,657.

Wild geese have made their appearance in the country market.

Both Nova Scotia and New Brunswick are to have a number of new cheese factories this spring.

The steel barque Manchester Castle, which has arrived here, makes the third four-masted steel barque in port.

The export of lumber from St. John in March was \$20,000 less in value than the shipments in March of last year.

Mr. James Bostwick, of the firm of Messrs. C. & N. Bostwick, is home after a two months trip to the West Indies.

It has been decided to open the Provincial Exhibition here on the 24th of September, and to close on the 4th of October.

Navigation is all but open between P.E.I. and the mainland. It is now only the matter of a few days before the passage will be clear.

The first trip ever made by a river steamer before Easter was made this year. The steamer went some fifteen miles up the river.

The West India steamer is to hand. This, with a cargo of Barbadoes due, will likely cause molasses to fall a cent or two below quotation given in the market report.

Imports for March, '95, \$269,511; for last March, \$311,015. Duty, \$64,754; last March, \$82,898. Free goods, \$73,937; last March, \$79,387. Exports, \$144,852; last March, \$165,193.

At a meeting of the creditors of Messrs. Jardine & Co. the other day the feeling was in favor of accepting their offer of 20 per cent., and it is expected a compromise will be effected.

The Dairy School in Sussex is now in full swing. A great deal of interest is shown, and some forty students are in attendance. The instructions are given by J. Hopkins and W. W. Hubbard.

The merchants of Digby have requested the merchants of St. John to discontinue the selling of goods in small quantities at wholesale prices to captains of schooners and consumers. The request is a fair one, and a number of the wholesale merchants intend to do as requested.

We regret to have to report the burning of the large mill owned by A. Cushing & Co., near Fairville. The loss will be much felt, as upwards of 200 men were employed. The insurance amounted to about \$30,000. It is to be hoped they will rebuild.

Geo. L. Slipp, flour merchant, of this city, who is just home from the West Indies, says such a trip is good, if only to make us the better satisfied with home. He says that the planters are much discouraged, their sugar not bringing enough to cover cost of production. In regard to molasses in Barbadoes, he sees nothing to cause much higher prices.

Quite an excitement was caused here by the police making a raid on the stock brokerage agency of Baldwin & Co. They claim it is a bucket shop, and that under the criminal code of Canada its existence is illegal. The manager, clerk and telegraph operator, with a leading citizen, were placed under arrest. They were admitted to bail. There is as yet no decision in the matter.

PERSONAL MENTION.

W. C. Crowther, formerly of Sloan & Crowther, has moved into the offices formerly occupied by W. T. Tassie, broker, 48 Front street east, Toronto. Mr. Crowther will carry on an insurance and financial business.

F. W. Hudson has just returned from a business trip to Chicago. "I spent a few days with the Cosmos Buttermilk Soap Co." he said, "and they are so pleased with the result of their last year's business in Canada that they are going to double their advertising here this year. It is enormous the quantity of soap this firm turns out. Their sales since the first of the year have averaged over 4,100 gross monthly."

W. H. Seyler, of the Eby, Blain Co., spent a couple of days in Waterloo this week. This is where his father lives, and the direct object of his visit was to attend the celebration of the former's silver wed-

ding. Now, it is not to be inferred that Mr. Seyler, Jr., is under 25 years of age, although he did at the banquet on Monday night jocularly remark that he was. The silver wedding in question celebrated Mr. Seyler senior's second marriage. The knowledge of this destroys all hope Mr. Seyler junior may have of passing off as a youth not yet past the quarter century mark. The celebration was attended by about 200 guests.

FRAUDULENT FRUIT SALES.

AFTER much delay and deliberation the Ontario Legislature has passed a bill entitled "An Act for the Prevention of Fraud in the Sale of Fruit." Originally the bill contained nine clauses, but as passed it consists of only four. The first five sections relating to the grading of fruit were struck out. Following is the bill in full as passed:

1. Every person who with intent to defraud:

(a) Alters, effaces, obliterates, or covers wholly or partially, or causes to be altered, effaced, obliterated or covered, any packer's marks made on any article in which any fruit is offered for sale, or

(b) Counterfeits any such marks or brands or writes the same on any such article, after the same has been once marked, or

(c) Empties or partially empties any such marked article, in order to put into the same any other fruit (of the same or any other

kind) not contained therein at the time of the original marking, or

(d) Uses for the purpose of packing fruit, any article bearing marks previously made by any other packer, or

(e) Falsely states the grade of fruit packed in the article marked or the name or address of the packer or the weight or measure of the fruit so packed,

Shall be liable on summary conviction therefor to a fine of not less than \$1 or more than \$5 and costs.

2. Every person who shall knowingly and with intent to defraud so place or arrange apples, pears, plums, peaches, nectarines, cherries, grapes, apricots or berries of any description whatever, in any box, crate, barrel, basket, or other article, for delivery to any other person in such a manner as to conceal defects in size or quality in any portion of such fruit by covering the same with fruit of larger size or better quality or otherwise shall be liable on summary conviction therefor to a penalty of not less than \$1 nor more than \$5 and costs

3. Every person receiving fruit of any kind mentioned in the preceding section for sale in bulk on commission, shall, when requested to do so by the consignor in writing, furnish the said consignor within one week after receiving notice, or after disposing of the fruit as may be requested, with a written detailed statement in regard to the sale or disposal of the same, giving the price or prices received therefor and the names and addresses of the purchasers.

4. No prosecution or conviction under this Act shall be a bar to any proceeding for the

recovery of penalties which may be imposed under any other Act, nor to any action for the recovery of damages which may be brought by any person injured or defrauded by the sale of fruit in violation of the provisions of this Act, but all such penalties may be recovered, and all such actions may be brought in the same manner as if this Act had not been passed.

MR. CHAPUT IS PRESIDENT.

At a meeting of the Montreal branch of the Dominion Wholesale Grocers' Guild on Wednesday night Mr. Charles Chaput, of L. Chaput, Sons & Co., was elected president, vice George Childs, deceased. Mr. G. A. Childs was elected to fill the vice-chair, made vacant by the elevation of Mr. Chaput to the presidency.

COFFEES AND SPICES.

The officials of the Inland Revenue Department have been busy lately in the district of Montreal investigating alleged adulterations in several articles sold by grocers, chiefly tea, coffee, spices and lard. In the case of lard no injurious mixtures have yet been found to any extent. In coffees and spices there is no diminution of adulterations, and a report has been made to Ottawa which may form the basis of prosecutions in the courts. In samples of coffees the analyses are claimed to have shown adulteration as high as 30 to 50 per cent.

HAD BEEN "RAIT-ED."

THE latest story from New York pertains to a frugal German of the type who keep small saloons in the district where sanded floors and plain bars abound. His name was Jacob Miller, and, not unlike many of his countrymen after being in New York four or five years, he had managed not only to keep a horde of children well dressed and in school, but to accumulate a small sum of money. He feared thieves would find his little hoard, which he kept snugly stowed away in a stocking in the bottom of his emigrant trunk, and so he determined to open a bank account. Pushing his way through the heavy swinging doors of a prominent Wall street banking house one morning he shuffled up to the first window and said:

"I want to open me a little bank account here."

"Second window to the right," was the laconic reply.

Approaching the cashier's desk he repeated his desires.

"Your name, please," said the cashier.

"My name is Yacob Meeler."

"What is your business?"

"Vell, I keeps me a little restaurant, No. 96 Canal street."

"Do you do much business?"

"Vell, I sells a few meals, vonce in a

while a drink or two, and I keeps me a few rooms upstairs."

"Do you intend keeping a large balance on deposit?"

"Vell, I don't know about dot. You see, I makes me a leetle money and all I vants is a blace to keep id."

"Is your business respectable?"

"I already told you dot. I has only von small blace where I sells a few meals, some dimes a drink or two, and I keeps me a few rooms upstairs. I yoost vant a place to keep mine money, and August Bingenheimer, the Dock Commissioner, he tell me to come here."

"O, well," said the cashier, "we do not care to open any new accounts, but if Mr. Bingenheimer sent you here we will accommodate you. He is one of our directors, and upon his recommendation I believe your business is respectable and we will open the account. Let me see," continued the cashier turning to Bradstreet's book of commercial ratings and running his finger up and down the names commencing with M. "I do not find the name Jacob Miller here. Were you ever rated by Bradstreet?"

"Rai-ded, did you say? Vell, no, I vas never raided by Bradstreet, but I vas two times already raided by Parkhurst."

Burglars the other night robbed the general store of Geo. A. Bigelow, Rossland, Ont., of \$300 in cash and goods.

TRIUMPH OVER FRAUD.

The proprietor of a great London restaurant has just paid the penalty for supplying his guests, in Lea & Perrins' bottles, with a sauce not made by that noted firm. Mr. Justice North heard the application of Lea & Perrins for an injunction to restrain Jeremiah Roberts, proprietor of St. James' Hall restaurant, Piccadilly, from using the bottles of the firm to supply another kind of sauce than the genuine Worcestershire. Evidence was taken to show that visitors to the restaurant who were familiar with the real sauce discovered a difference, and notified the firm. Hence the action. Roberts had had his own labels put on some of the bottles, and claimed to be selling Lea & Perrins' sauce as his own.

The judge decided that even this course was not permissible, and that the firm's bottles had been used to supply a different sauce from theirs, so he gave judgment for the plaintiffs with costs, granting an injunction restraining Mr. Roberts from selling, disposing of, or using in the course of his trade any sauce not Lea & Perrins' in bottles bearing their name or labels. The result of the case is a triumph for all firms endeavoring to stop these frauds in sauces.

Dealers in noted sauces and pickles are concerned with the manufacturer to stop these practices, because it deprives them of a good trade, the substitutes being always home made stuff of inferior quality.

EXCITEMENT AMONG OIL MEN.

PETROLEUM is higher to-day than it has been at any other time for eighteen years past.

The American crude oil market has advanced phenomenally, taking the market for all classes of refined oil with it. Crude closed at \$1.99 in Oil City on Saturday, Canadian crude running from \$1.45 to \$1.50.

All grades of refined, both American and Canadian, have gone up in sympathy from 2 to 2½c. per gallon, but this advance does not cover the whole advance in crude. Therefore if crude maintains its present figure, refined oil must advance still further to cover the cost to the manufacturer.

There has been no such sudden upheaval in the oil market, no such excitement among oil men, since the great advance of 1877.

It is interesting to note the causes of this unusual state of the oil market. Mr. Rogers, of Samuel Rogers & Co., Toronto, said to a representative of THE CANADIAN GROCER on Tuesday: "Remarkably low prices have prevailed for some years on American crude and refined oils, and the exports of refined grades to other countries have enormously increased. These circumstances, together with the lessening production of the various fields, have conspired to lessen the stock of crude in sight to a very low point, and the present advance

seems to be the result in part at least of the producer, manufacturer and speculator awakening to the fact that the consumption is considerably exceeding the supply. It is difficult to say how much the increased prices are the result of speculation, nor does it seem easier to tell whether the present prices will advance or recede.

"It seems certain however," concluded Mr. Rogers, "that unless fresh fields are discovered the old low prices to which we have been accustomed will never be reached again."

Mr. Rogers had barely ceased speaking to THE CANADIAN GROCER when a message came over the wires that crude had taken another jump, and refined oils forthwith made in sympathy a further advance of from 2 to 2½c. a gallon.

There is no telling where this will stop. The oil well men have the key to the situation, and evidently intend to hang on to it until they make up for the 18 years of poor prices they claim to have endured.

A despatch from Oil City to The New York Journal of Commerce, dated April 12, gives a clue to the feeling in the Pennsylvania oil regions. It reads:

"What is going to become of the oil market? That is the question that above all others is now agitating the minds of the people who have some oil production or a little money to lose or make more with in a speculative deal.

About two years ago oil was selling around 53 cents a barrel and the supply was so much greater than demand that production fell off on account of the low prices. Things have

changed wonderfully since then and oil has been gradually creeping up in price. At the opening of the present year the dollar mark was reached. Yesterday it sold for \$1.80 per barrel. The decrease of the stocks and the continued drain of production had begun to excite comment, and the world awakened to the situation. It was seen that an enormous demand had been created for Pennsylvania oil, which demand had exhausted the supply, outgrown the ability of the country to satisfy, and on the heels of a failing production.

"The stock of oil on hand at the present time is 5,000,000 barrels. The monthly consumption is not far from 3,000,000 barrels. It will be seen, therefore, that the supply on hand, if no more were produced, would not run two months. But the production of the various fields in Pennsylvania is about 2,000,000 barrels a month, so that at the present rate of production and consumption the stocks will last the balance of the year. However, this is not really a test, for the present consumption is lighter than for months before, and at the rate of consumption that has prevailed all winter the stocks would barely run to midsummer.

"Producers and not speculators are reaping the benefit of this advance in oil. Prior to 1890, the oil exchanges were the curse of the oil producers. In 1882-83, the last big advance in prices, the oil country went mad over gambling on the exchanges. Oil producers would sell their credit balances to buy certificates on margin, and the large producers would deposit their certificates with brokers to buy options. Now they are selling their crude oil and banking the cash. There will be unparalleled activity in the fields this month. Scouts are now out leasing anything and everything that remotely resembles oil territory. All the small well territory in the Bradford and Allegheny fields is being drilled, and old wells are being cleaned out and shot with nitro-glycerine to increase their output.

"It is rumored here to-night that a conference of some sort is in progress in New York between officials of the United States Pipe Line and Standard Oil Company people. Just what the conference is about, no one seems to venture an opinion, but it seems obvious that it has to do with the big advance in prices."

CONFEDERATION LIFE ASSOCIATION.

TWENTY-THIRD ANNUAL REPORT— ANOTHER PROSPEROUS YEAR.

SUBSTANTIAL INCREASES IN ALL DEPARTMENTS OF THE BUSINESS—A LARGE VOLUME OF NEW INSURANCE WRITTEN—AN EXTREMELY FAVORABLE MORTALITY EXPERIENCE—PAYMENTS TO POLICY HOLDERS FOR THE YEAR EXCEED \$435,000.

THE annual meeting of the above Association was held at the head office of the Company, Yonge, Richmond and Victoria streets, Toronto, on the afternoon of Tuesday, the 9th inst. There was a large attendance of policy-holders and shareholders and members of the agency staff of the Association.

Hon Sir W. P. Howland, C.B., K.C.M.G., was called to the chair, and Mr. J. K. Macdonald, managing director, acted as secretary of the meeting.

The following report and financial statements were submitted:—

REPORT.

Your directors beg to submit to the policy-holders and shareholders the twenty-third annual report of the Association, covering the operations for the year 1894. In doing so it is scarcely necessary to state that the year was one of unusual stringency and general depression in all branches of trade. This could scarcely fail to have a marked influence upon the business of life insurance, and in view of that fact it will be a source of gratification to all persons interested in the Association to observe the substantial progress made and the large volume of new business secured. It has not been deemed wise to depart from the policy which has guided your directors in the past, and therefore new business was sought for only at reasonable cost.

Your directors have had before them 2,321 applications for a total insurance of \$3,631,550. Of these 2,218 for \$3,469,550 were approved; 98 for \$152,000 were declined, and 5 for various reasons were deferred. Adding the revived policies, which had been written off in previous years, and bonus additions, the new business for the year was 2,248 policies for \$3,528,204 of insurance.

The total insurance in force at the close of the year was \$25,455,342 under 16,625 policies on 14,667 lives.

The death claims for the year were light, being 93 deaths under 105 policies, calling for a total insurance of \$164,287.50. Under a re-assurance this amount was reduced by the sum of \$1,994.50, making the net claims \$162,293. This is a striking evidence of the care exercised in the selection and acceptance of new business, and is a high compliment to our field staff.

The financial statements submitted herewith fully exhibit the position of the Association on the 31st December last.

The auditors have continued to give close attention to their duties, and have been thorough and prompt in their work. Their report will be found appended hereto.

Your directors are pleased to be able to state that the head office building is filling

up very well, considering the effect of the prevailing depression upon all property of the kind. A considerable portion has been rented during the past year, and more since the beginning of the present year.

All the directors retire but are eligible for re-election.

W. P. HOWLAND, President.

J. K. MACDONALD, Managing Director.

J. K. MACDONALD, Managing Director.

AUDITORS' REPORT.

We beg to report that we have completed the audit of the books of the Association for the year ending December 31st, 1894, and have examined the vouchers connected therewith, and certify that the financial statements agree with the books and are correct.

The securities represented in the assets (with the exception of those lodged with the Dominion Government, amounting to \$84,500, and those deposited with the Government of Newfoundland, amounting to \$25,000), have been examined and compared with the books of the Association and are correct and correspond with the schedules and ledgers.

The bank balances and cash are certified as correct.

(Signed) W R HARRIS,

WM. E. WATSON, F.C.A., Auditors.

TORONTO, March 7, 1895.

The president, Sir William P. Howland, moved the adoption of the report and financial statements submitted to the meeting, and in doing so alluded to the commercial stringency which had prevailed during the past year, and whilst these unfavorable conditions had had some effect in limiting the amount of business done by life insurance companies, yet it was gratifying to note that the amount of business on their books had not only been generally maintained, but had shown a satisfactory increase. This Association during the past year secured policies representing \$3,528,304. The total in-

surance in force at the end of the year was \$25,455,342.

The company has maintained a careful and conservative policy, being determined to keep the expenses of obtaining business within a reasonable limit, and to use every precaution in the selection of risks. An evidence of the latter is to be found in the fact that we have had only 93 deaths during the year, the total claims thereunder being \$162,293 only.

The business of the company continued to receive during the year the special attention of the managing director and staff at the head office, and the favorable results obtained must be attributed to this fact, and also to the very efficient organization which the company have throughout the Dominion.

It had always been the view of the managing director and the Board that the statement of the affairs of the company should be placed before you in as clear, concise, and simple form as possible. That being the case, and the statements having been in your hands for some time, it will not require any special explanation from me, but if information is required by any gentleman present in regard thereto, I am sure the managing director will be happy to afford it if requested.

Mr. W. H. Beatty, vice-president, in seconding the resolution, said:

I think that we have fair reason to congratulate ourselves upon the amount of business which has been secured during the past year, which has all been obtained in the Dominion of Canada, with the exception of Newfoundland, which we suppose will very shortly be a part of the Dominion, and where we re-established an agency during the year. The business shows an increase all along the line. The president referred to the depression which had existed in commercial affairs, but when we consider the very large amount of money that is paid for life insurance in the Dominion, aggregating many millions of dollars, we cannot but conclude that it is an evidence of the very solid financial condition of the country.

Allusion was made to the manner in which the head office building of the company was being rented, which could not fail to prove satisfactory to all interested; it was now beginning to pay fairly well; there was every reason to expect that within a short time it would prove to be a very good investment. It was not possible to expect a large building such as this, which was not only a credit to the city of Toronto, but to the whole Dominion, to yield a large return from the outset, but there was every reason to hope that within a limited time we shall have a return from it that we cannot get from any other investment affording equally good security.

I am perfectly satisfied with the report, and I have no doubt our shareholders and policy-holders will be also. I have much pleasure in seconding the resolution.

The motion was carried unanimously.

Resolutions were moved thanking the directors, management, and also the agency staff for their services during the past year, and carried unanimously. They were severally responded to, numerous references being made to the satisfactory report which had been presented to the meeting.

The retiring Board of Directors were all re-elected.

After the meeting adjourned a meeting of the new board was held, and Hon. Sir W. P. Howland, C.B., K.C.M.G., was re-elected president; Messrs. E. Hooper and W. H. Beatty, vice-presidents.

TRADE CHAT.

THE Canadian Pacific has decided to build a large storehouse, capable of holding 5,000 barrels of flour, in Windsor. The flour will be brought down on the Athabaska from the Soo and shipped to points east.

It has been estimated that the women of the United States spend \$20,000,000 every year on chewing gum.

The general postoffice of England in the course of a year deals with over 2,853,000,000 letters, etc., 54,000,000 parcels, 70,000,000 telegrams, and 56,000,000 postal orders, besides many other branches of business.

The boot and shoe manufacturers of Montreal have decided, owing to the advance in the price of leather, to increase the price of footwear. It has also been decided to form a boot and shoe association in connection with the Board of Trade.

The Canada Steamship Company is to be reorganized under practically the old stockholders, and will run a regular line from Montreal during the coming season of navigation. The vessels will include all the old vessels of the old line, with possibly the exception of the Lake Nepigon, which will be replaced.

The Kingston Board of Trade had its annual meeting Tuesday night, when the following officers were elected: President, John Hewton; first vice-president, A. Chadwick; second vice-president, L. B. Spencer; executive committee, J. Minnes, J. Gaskin, B. W. Robertson, R. J. Carson, J. Muckleston, Geo. E. Hague, G. Richardson, G. Y. Chown, J. McKelvey, and J. Redden; secretary-treasurer, F. King, M.A.

A LITTLE FRUIT WAR.

According to The Manitoba Free Press, Portage la Prairie is experiencing a little fruit war. One firm advertises bananas, oranges, lemons, etc., two dozen for twenty-five cents. Other dealers meet the reduction by a cut of two dozen for 20 cents. Next week the normal rate of 25 cents per dozen for bananas, oranges and lemons will be restored. Portage people can just now buy their bananas cheaper than in the city of New Orleans.

"IMPORTANCE OF THE TRADE AND YOUR WESTERN CIRCULATION."

It is well known to our advertisers that we have never asked them to take our word for it when we named our circulation. We have always furnished proof, and will furnish it when requested to do so. Our circulation is not 8,000, neither is it 10,000. We do not want that many. We have always been after QUALITY, not QUANTITY, in circulation and in advertising; the result is that we now have a large quantity of good quality. We

carry more good advertising than any grocery journal in existence.

Herewith is a copy of a letter from one of the largest and most reliable houses in Canada:

THE CANADIAN GROCER:

DEAR SIRS,—We scarcely think the Winnipeg wholesale grocery trade is represented in your advertising columns to a degree commensurate with the importance of the trade and your western circulation.

Please let us have rates for one-third and one-half pages for six months, and also yearly, with weekly change of advertisement.

We are, yours truly,

TURNER, MACKEND & Co.,
Winnipeg.

HE SAW IT IN EUROPE.

Here is another proof of this journal's circulation:

"The writer has been away since 2nd March, and just returned from England by steamship Vancouver, on Sunday. THE GROCER containing our write-up was duly presented to the writer by numbers of the business houses visited in London; also noticed it in a conspicuous place in the Colonial Institute Reading Rooms.

"Yours truly,

Scott & Co., general store, Napanee Mills, Ont., have sold out to Thos. Johnston.

The stock, etc., of W. T. Wills, grocer, Brantford, Ont., has been advertised for sale by auction.

The stock of Jas. Laurier, general store, St. Roch Lochigan, Que., has been advertised for sale.

George Rutherford, groceries and boots and shoes, Fenelon Falls, Ont., has sold out his grocery business.

The stock of Louis Taschereau, general store, Notre Dame De Lourdes, Que., has been sold at 55c. on the dollar.

The property of the Kingsville Preserving Co., Kingsville, Ont., is to be sold by auction under mortgage on April 22.

CHANGES.

N. Croteau, is starting a general store at St. Victor De Tring, Que.

Lecours & Frere are commencing business as general storekeepers at Levis, Que.

R. A. S. Allan has been registered proprietor of Robert Allan & Co., flour and produce, Montreal.

H. Levett, grocer, etc., North Port, Ont., is giving up business, to be succeeded by J. N. Sanderson.

Elodie Archambault, wife of Leandre Beaucaire, Montreal, has been registered proprietress of the business of E. A. Beaucaire, groceries.

DEATHS.

Richard Leary, grain, Lindsay, Ont., is dead.

J. S. Bowman, produce and eggs, Listowel, Ont., is dead.

Geo. Childs, of Geo. Childs & Co., wholesale grocers, Montreal, is dead.

THE CONTEST OF LIFE.

CHAUNCEY DEPEW delivered an address to the students of Chicago University a few days ago. The subject was: "The Present; Its Opportunities and Perils." As reported by a New York paper he said:

"Blood and treasure are not poured out in a successful career in literature, the professions, or business. It is an ignoble and a mean view which relies upon the ruin of an opponent in order to secure his place. Success in life, with all its hot competitions, is rather a contest like some of the games of Olympia and some of the athletic feats of our own times, in which the swifter runner or the more skilful oarsman may win the

prize, but there are honors and cheers, there are places and rewards for those who fail in securing the supreme positions.

"Of course, we know of fortunes which have been made by the misfortunes of others, and positions which have been won by the overthrow of others, but the man whose accumulations, however great and glittering they may be, represent simply the ruin of tens or hundreds or thousands, is nothing but a legalized brigand. It is the misfortune of our complex civilization that the law has not comprehended and covered in its prohibitions and penalties all the opportunities of sinning against the persons and properties of a community.

"I acknowledge the position and the usefulness of the business college, the manual training school, the technological institute, the scientific schools, and the schools of mines, medicine, law, and theology. They are of infinite importance to the youth who has not the money, the time, or the oppor-

tunity to secure a liberal education. They are of equal benefit to the college graduate who has had a liberal education in training him for his selected pursuit. But the theorists or, rather, the practical men who are the architects of their own fortunes, and who are proclaiming on every occasion that a liberal education is a waste of time for a business man, and that the boy who starts early and is trained only for his one pursuit is destined for a larger success, are doing infinite harm to the ambitious youth of this country.

"It is the province of education to solve problems and remove acute conditions. Our period is the paradox of civilization. Heretofore our course has been a matter of easy interpretation and plain sailing by the navigation books of the past. But we stand five years from the twentieth century, facing conditions which are almost as novel as if a vast convulsion had hurled us through space and we found ourselves sitting beside one of the canals of Mars.

"The times are ripe for ignorant demagogues and educated patriots, and our colleges are the recruiting stations for the patriots. All these are not revolutions. They are symptoms—symptoms of conditions which must be grasped, understood, met and solved. We need fear no revolution, because revolution only comes, as it has in the past, when there is an under and oppressed class seeking to break the crust of caste or privilege. We have no caste or privilege. The people who are discontented are the governors and rulers, and they must solve their own problems. They can elect their own Congresses and Presidents."

ENTERPRISE AT MACDONALD.

The Free Press, Winnipeg, prints a despatch from Macdonald, Man., which states that a meeting for the purpose of organizing a cheese and butter manufacturing company was held in the school house at that place on Tuesday evening, and was ably addressed by Prof. S. M. Barre. Some were in favor of a cheese factory and some of a creamery, and canvassers were appointed to canvass for cows and report on Friday night. At the adjourned meeting on Friday night the canvassers' reports were so favorable that after listening to an able address by Mr. Hettle, M.P.P., it was decided to organize at once. The capital stock of the company was placed at \$3,000, with shares \$10 each. The following provisional directors were appointed: James Bray, Peter Cameron, D. W. McCuaig, D. McKerchar, Sam Elliott, J. W. Neelands, John McKay.

D. W. McCuaig was appointed provisional secretary, and commenced canvassing for the sale of shares at once. He is meeting with good success. Application will be made for a charter immediately. The company is to be known as the Macdonald Cheese and Butter Manufacturing Company, Ltd. Building operations will be commenced at once, and it is expected that by the 1st of June the creamery will be running in full blast.

Have You Investigated

THE NEW SYSTEM OF WEIGHING ?

An investment paying from 100 to 1,000 per cent. per annum! A scale that weighs in money. The results are MARVELOUS as well as STARTLING. Your living is in your profits, and your scales regulate that profit. The Dayton Computing Scale tells you just what you are doing. They are the only real computing scale, and have come to revolutionize the method of selling goods by weight. The progressive merchants are buying them.

CORNWALL, Ont., Oct. 8th, 1894.

MESSRS. MILLS & Co., CHICAGO :

Gentlemen,—The Computing Scale purchased from you some time ago has given perfect satisfaction.

It is just what every grocer needs in these times of close cutting prices and keen competition, on account of its great accuracy and as a safeguard against mistakes. We recommend it to all.

Yours truly, SHAW BROS.

There was an Article

ALLWORTH'S

STAR BRAND

On the eighth page of last week's GROCER, headed "Diseases in Ordinary Milk," which contained information of special value and interest to both trade and public.

The danger in using fresh milk is great, and scientific authority is pronounced against the use of it altogether. Speaking of condensed milk, the writer says, "Condensed milk contains the nutritive properties of the ordinary article, while, being sterilized, the disease germs are got rid of." Allworth's "Star Brand" is strictly pure and unskimmed fresh milk, free from any adulteration, evaporated and preserved in such a manner as to retain all its wholesome properties.

It is a perfect milk. Test a sample from any wholesaler, or from

TANGLEFOOT

SEALED

... STICKY FLY PAPER ...

"Little" Tanglefoot

5¼ x 9 inches.

Particularly adapted
for Show Windows and
Fine Rooms. . . .

25 Double Sheets in a
box, 15 boxes in a case.

Retails for 30 cts. a box
Costs \$2.50 per case

PROFIT Eighty per cent.

WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

Notwithstanding the reduction in price the quality is improved in general. The paper is a little stronger, a little stickier, and will remain sticky a little longer.

REGULAR SIZE

Prices for 1895

Per Box - 50 cts.

Per Case - \$4.75

In Five Case lots,
per case, \$4.50

Each box contains 25
Double Sheets and 5
Tanglefoot Holders.

ORDER the largest quantity
you can use and get the

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, APRIL 26, 1895

(\$2.00 per Year) No. 17

DROPS FROM THE EDITOR'S PEN.

What went ye business men to the horse show to see? The fine horses or the pretty women?

* * *

The daily papers say gas is going up. What business men want is gas to come down.

* * *

Trade is evidently girding herself for a good time. It is about time it went into training.

* * *

It is just possible the Standard Oil Co. may be making its grave as well as millions of dollars.

* * *

Because beef is at the moment controlled by the bulls it must not be inferred that all beef is bull.

* * *

Only about one kind of advertising is there that is not to be commended: That which advertises self.

* * *

Oil is still bubbling. So are the hopes of speculators. And the collapse of one will mean the collapse of both.

* * *

We are seldom long satisfied with the same thing. In the winter we seek the sun; in the summer we shun it.

* * *

The credit system has evidently become a discredit system. Most merchants are wanting to forsake it, anyhow.

* * *

The Retailers' Association in Winnipeg is booming. This is in keeping with the general tenor of things in the Prairie Province just now.

* * *

The Speech from the Throne at the opening of the Dominion Parliament intimates that an insolvency measure will after all be introduced. When the Government intimated through its organs that it would not be,

it evidently put its finger on the mercantile pulse, and then finally decided to act as the beating of the pulse indicated was best.

* * *

The clerk who is a shining light in society is often an inert and opaque figure in business. It is better to aim to shine in business than in society.

* * *

The half yearly report of the Grand Trunk Railway shows the net revenue deficiency to be £97,684. And as long as there is inefficiency in the management there will be a deficiency in the revenue.

* * *

A good many shop lifters are falling into the hands of the police these days. They are now realizing that "lifting" sometimes means "going down."

* * *

A paying business is a matrimonial agency said to be. But how about the man who buys the wares it has to sell? Is not matrimony said to be a lottery?

* * *

Oil is just now being used by monopolists as a lubricant for facilitating the movement of dollars from the pockets of consumers to the coffers of the manipulators.

* * *

Dr. Salmon, chief of the Bureau of Animal Industry, Washington, says the wholesalers forced the price of beef up. What does a fish know about meat, anyhow?

* * *

A writer in a contemporary claims to have discovered a remarkable process for making sugar from corn. Up to the time of writing, sugar has not gone down nor corn up.

* * *

A contemporary says there are two sides to the tariff. Yes, and more than that. And so will there continue to be until the necessary Board of Customs Appraisers is appointed.

* * *

Manitoba is coming to the front as a butter-maker as well as a wheat raiser. Medi-

ocrity is something Manitobans do not appear to countenance in any industry to which they turn their attention.

* * *

A New York shoemaker has invented a pneumatic spring heel. The necessity of a pneumatic spring toe has not yet arisen. There is usually enough natural energy behind the toe to do all the "raising" demanded.

* * *

A "drummer" is said to have lost his nerve the other day. In the absence of name and proof we must refuse to believe such a seemingly impossible thing. Probably it was his grip that he lost, not his nerve.

* * *

Commercial travelers have been aptly described as the stokers of the trade engine.—Exchange.

No, they are not the stokers. They don't do the "dirty" work. They are the conductor and engineer in one. They run the trade train, and when they say "Go ahead," she goes.

* * *

Now that spring is setting in in real earnest the Browns, Joneses, Smiths and Robinsons are beginning to talk of tripping Europe-wards. Would not they—and we mean Canadians generally—be exhibiting more common sense if they were talking of doing a little touring in their own country first? A man should know something about his own home before he lolls around his neighbor's fireside.

* * *

A Harlem retail grocer is said to have brought a number of people to his store by sending out post cards announcing he had bought a large quantity of a certain line and was prepared to sell at an extremely low figure. Had he spent the time and money devoted to getting out the post cards in advertising in a good newspaper he would have had better results. Post cards only reach those whose names and addresses are known. The newspaper goes into nearly every home.

G. R. ASHWELL & SONS.

THE CANADIAN GROCER proposes to give this week the history of the rise of the well-known Chilliwack (B.C.) firm of G. R. Ashwell & Sons, which is practically a history of the life of its senior member, G. R. Ashwell.

G. R. ASHWELL, Chilliwack, B.C.

G. R. Ashwell was born in Henlow, Bedfordshire, Eng., in 1833, and twenty-three years later emigrated to Canada. Arriving at Toronto with only one York shilling in his pocket, he worked at carpentering for five years, at the end of which period he removed to New Westminster, B.C. There in 1862 he, in company with Thomas Cunningham, established the first hardware and furniture store in that section, under the firm name of Cunningham & Ashwell. The following year the firm was dissolved, and Mr. Ashwell carried on the business alone until 1871, when he moved to Chilliwack, and opened the first general store there. He paid \$12 per barrel for flour, and the dry goods section of his stock amounted to only \$30 in value. In 1873 he bought out R. C. Garner, who had only been in business for one year, and moved to his (Garner's) premises at the Landing.

During the construction of the C.P.R. he carried on a successful branch at Harrison Station, in charge of Mr. John Barker, now of Dewdney, B.C. For several years prior to the building of that road, he had no opposition. Since then several parties have started out in business in the same town, but his firm continues to grow more prosperous every day.

In 1888 he moved from the Landing to Centreville (now Chilliwack), where he bought out the stock of John Grant, when, on account of ill-health, owing to close confinement to business, he placed the management of the concern in the hands of his eld-

est son, J. H. Ashwell, admitting him as a partner under the firm name of G. R. Ashwell & Son. And in 1894 he admitted his youngest son, G. H. W. Ashwell, the firm now being known as G. R. Ashwell & Sons.

The firm attribute their success to (1) steady industrious habits; (2) pluck and energy; (3) judicious advertising, having used considerable space in the local papers, both in the way of local notices and frequently changed space advertisements; (4) personal attention of the management to small details; (5) selling the best articles at the most reasonable prices; (6) careful buying and prompt settlements of their accounts, which enables them to buy in the best markets at the lowest prices.

To Mrs. Ashwell must be conceded a goodly share of the credit of her husband's success. For twenty years she was his only assistant in the business.

The senior member of the firm has been Justice of the Peace for the district of New Westminster for the last twelve years and Reeve of the municipality twice. He has also been president of the Chilliwack Agricultural Society for several years. Although not yet severed from the firm, he has been able to devote much of his time to public work of a business, religious, and philanthropic nature, taking an active part in all forward movements. He owns a farm about four miles out from the village, and may be seen daily going to and from the same, in which he takes great delight.

J. H. ASHWELL, Chilliwack, B.C.

J. H. Ashwell, the manager of the firm, who is in his twenty-eighth year, was born at Westminster. He received his education at the Public Schools and Methodist College of Westminster, and has been born, bred, and brought up at the business. He passed the entrance examination to the High School at the age of eleven years, ranking third out of ninety pupils, and thus showing early in life his capacity for success.

COCOA SITUATION.

The following review of the London cocoa market is taken from a circular of Edward Kynaston, under date of April 8th: Stocks in London—1895, 134,692 bags; 1894, 92,818 bags; 1893, 61,588 bags; 1892, 89,987 bags. Our stock continues to grow, and weighs heavily on the market, so much so that a further decline of 2 to 4s. has taken place in the values of West India cocoa during the fortnight, the greater fall being on Trinidad kinds, which for a long time have been relatively dear. The only remedy for this state of things appears to be a reduction in prices charged to consumers of manufactured cocoa and chocolate, thus stimulating consumption, for while the growth of cocoa everywhere is on the increase, and the use of it is crippled by the high prices charged to actual consumers, it seems hopeless to look elsewhere for any amelioration in the situation. During the past fortnight the public sales have presented a total of 8,262 bags British West India Island cocoa, consisting of 6,287 bags Trinidad, 1,167 bags Grenada, and 808 bags from other places. The Trinidad went badly, and less than one-half sold, the closing values being 56s. for fair collected, and 58 to 70s. for estate marks. The Grenada, although less depressed, also went slowly, and prices are about 43s. for fair, and 45 to 47s. for good to fine estate qualities, while for fair native from other places 40s. is a full quotation. The next public sales were fixed for Tuesday, the 23rd, being an interval of three weeks, and it is to be feared the unwisdom of this long adjournment will be painfully manifest by the enormous quantity that will then be offered from all parts of the world, being the accumulation of arrivals during the intervening period, and which cannot fail to severely test the buying capacity of the trade. According to latest advices the shipments from Grenada of this crop to date have been 27,507 bags, against 36,221, 21,417, 32,006, and 27,004 respectively the four previous seasons.

It Came to Stay, It Has Stayed

Like the trees of the forest, the greater the storms the more deeply rooted become the trees. This is our experience with the celebrated Ram Lal's Tea. At its inception it was assailed, its doom was pronounced in many languages by rival dealers long before the public had given their verdict, yet to-day it stands without a peer, imitated by many, rivalled by none. Equal to Ram Lal's was the highest eulogy bestowed on samples given to dealers by travellers throughout the country, and in many cases the dealers were victimized, and why? Because Ram Lal's Pure Indian Tea has no equal.

Wherever Ram Lal's Tea is shown,
It stands unrivalled and alone.

And why has Ram Lal's Tea no equal? Because it is a pure **INDIAN** blend. Indian Tea possesses more retentive quality than any other tea known to commerce.

IMITATION BLENDS sold throughout the country to-day meet with considerable favor for a time and then become unpopular, and why? Because Ceylons are used very extensively in these blends, and after being kept in stock for a time go "off," losing their pungency and aroma. This has been the experience of practical tea men the world over. The sale of this brand is not confined to Ontario alone, but from all parts of the Dominion orders are being received daily, and numerous enquiries from across the border. Each year these goods are becoming more and more popular, sales having far exceeded our most sanguine expectations.

Wholesale Grocers

.....TORONTO

REGARDING RETAILERS.

CRAWFORD & DEEVES, groceries, boots and shoes, Brampton, who recently purchased the store and business of W. Milner & Co., are making extensive alterations in their premises.

James Firstbrook, of Acton, has sold out to George Adams.

Long & Co., general merchants, Orono, have sold out to Nash & Lawrie.

John Kelly, formerly with Mr. Mitchell, Guelph, has opened up on his own account in that town.

John Lipps, of Wellesley, who has been ill for two or three months, is again able to attend to business.

Mr. Ferguson, of Stratford, has started a branch store in New Hamburg. It will be run on a cash basis.

Edward McLaughlin has succeeded to the proprietorship of the general business of James Playfair & Co., Sturgeon Bay.

The estate of the late John Smart, Acton, has been purchased by Mr. Kelly. The business has been carried on since his demise by Mr. Smart's daughters.

The old grocery business of W. E. Preston, Midland, better known as the "Star Grocery," is undergoing a change. Mr. James Playfair, of Sturgeon Bay, has entered the firm, and the style will now be Playfair &

Preston. The firm will occupy the building in Midland owned by Burton Bros., of Barrie.

The store of Hurley & Brady, grocers, Lindsay, damaged by water during the recent fire at the Benson House, is being refitted. When completed it will be one of the best stores in Lindsay. Hurley & Brady are at present occupying temporary premises.

good office for obedient voting in the House?

There ought to be a law forbidding the appointment of M.P.'s and M.P.P.'s to public positions for life during a period of at least five years after they retire from Parliament. This would remedy the evil of rewarding needy members, who shape their whole course to drop out of Parliament into a comfortable berth.

NEEDY MEN IN PARLIAMENT.

The chief means by which impecunious members of our Parliament and Legislatures stave off utter financial collapse is by pressing for a good fat berth in the public service and promising their trusting friends repayment when the office is got. This enables them to keep afloat, but renders them the abject slaves of the Ministers of the day and quite unfit to discharge independently and fearlessly the duties of a member of Parliament. The proportion of ex-M.P.'s and ex-M.P.P.'s who now fill public positions is very large. Small wonder that the interests and requests of our business men play second fiddle in Parliament. What do these interesting adventurers care for our votes, or why should they lie awake at night worrying about our business questions when the haven of their hopes is a

PERSONAL MENTION.

George E. Church, Burk's Falls, was in Toronto a few days ago on a buying trip.

A. Forsyth, member of a firm of tea shippers, Colombo, Ceylon, is expected in Toronto to-day (Friday), by his agents, J. L. Watt & Scott.

A. P. Cockburn, manager of the Muskoka and Georgian Bay Navigation Co., was in Toronto on Saturday purchasing supplies for his steamers, which will start running about the end of this week.

At London, Ont., W. H. Ferguson, for years a prominent grocer of that city, who is moving to Detroit, was given a farewell banquet on Friday evening. T. C. Irvine, of Bradstreet's, presided, and W. Bremner, of Perkins, Ince & Co., Toronto, occupied the vice chair. Mr. Ferguson was presented with a complimentary address.

CUSTOMS RULING ON GELATINE.

IT is an axiom in law that whenever there is a question of doubt the benefit shall be given to the one who is likely to suffer most from a wrong interpretation thereof—the defendant.

When, however, it comes to an interpretation of the Customs law, the very opposite rule obtains. True, since Hon. Clarke Wallace became Controller of the Customs Department there has been a marked improvement in this respect. But there is still room for further improvement.

Here is a case in point: Several firms imported a consignment of gelatine. This article is one of those not specifically mentioned in the new tariff. But clause 481 of the new tariff says in effect that all goods not enumerated in the Act shall be subjected to a duty of 20 per cent.

In the light of this clause the importers of the gelatine in question presented their consignments for duty at a rate of 20 per cent. And then, too, this was the rate of duty on gelatine under the old tariff. Furthermore, the gelatine was purchased and the cost price based on a 20 per cent. duty.

But, forsooth, the officials declared that gelatine came within clause 25, which reads: "Glue and mucilage, 25 per cent."

Naturally the importers demurred and appealed to Caesar—or, rather, Hon. Clarke Wallace. And, grocer and all as he is, he upheld the ruling of his subordinates, declaring that gelatine and glue are derived from the same stock.

A reference to Webster's Unabridged supports this contention. So far, so good. But Webster does not say that both are put to the same uses. They may come from the same stock, but there the comparison ends. The ultimate object of the one is to build up animal tissue, the other to build up and mend furniture, etc.

Yet in spite of these dissimilar utilitarian objects of gelatine and glue, the Customs

Department declares that they are both subject to a similar duty because both had the one origin.

Obviously this is an unfair interpretation of the Customs law. There is probably not one man in 10,000 outside the Customs Department who would classify gelatine with glue and mucilage. If there were no such clause as 481, and gelatine had been omitted altogether from the tariff list, then it might with more reason be classified with glue, because of the common origin of the two articles.

But to carry the ruling to a logical conclusion, whisky should be classified with corn, cutlery and other finished products with iron ore, wine with grapes, boots and shoes with hides, furniture with lumber.

To plead warranty under the similitude clauses of the Customs Act does not alter the situation, for, as already pointed out, the uses of gelatine and glue are entirely opposite.

It is safe venturing that were there such an institution as a Dominion Board of Appraisers, composed of experts, there would have been no such ruling as that cited. Decisions would not then be determined by the amount of revenue that would accrue, but by equity. Let us have the Board of Appraisers.

PATRONS AND PASSES.

There is considerable humbug at the root of the protest raised by the Patrons of Industry against the use of railway passes by members of the Legislature.

The Patrons affect to be superior to everyone else in public life, but thus far their conduct has been merely small-minded and picayune. They want to do away with legitimate trading in all lines, and their entire policy is the old game of trying to get something for nothing. They are trying to divide the community into two classes: Those who raise farm products, and those who consume them.

The idea that merchants, or any other commercial class, are leeches living on the farmer, is a monstrosity similar to the Patron notion that every legislator who accepts a pass is purchased by the railway corporations.

A pass may purchase a Patron, but no one else can be bought for that amount. The only real objection to the acceptance of railway passes by legislators is that members should not travel free, and at the same time draw the mileage allowance for railway journeys granted them by the country. Either the passes or the allowances must go.

It does not necessarily follow that the milch cow will have to go out of business because of the development of the condensed milk industry. There will be plenty for her to do in supplying the raw material.

WHO IS LYING ABOUT MOLASSES?

The molasses market in Montreal this spring has been a confusing one, and advices which came to hand on Tuesday last are calculated to make it more so.

As readers of THE CANADIAN GROCER are aware, the first business for importation was on the basis of 30c. laid down in Montreal. A couple of cargo lots were ordered on this basis for prompt shipment via Portland; but that was all, for the fact that a sales agent offered stock at 1½c. less frightened buyers, and made business difficult since. In fact the agent for a leading firm at the Islands assured THE CANADIAN GROCER that at this time last year he had placed over 4,000 puncheons, whereas this year he had placed only a few lots, owing to the fact of these low offers making it impossible for him to do business. On the other hand, advices from the Islands all along have repeated the warning that the crop was late this year, and that it would be short.

Finally, on Tuesday last cable offers to Barbadoes were refused at a price that would mean fully 30c. laid down in Montreal, and then leave little margin for the seller, it being further stated that firm bids of 21c. cost and freight at Barbadoes had been standing unfilled for some time. If this information is correct—and there is no reason to doubt it—the people who have been selling molasses at the lower figures referred to will have some difficulty in filling their orders at a profit to themselves, unless they have the goods ready to ship.

If this is so, there must be some tall prevarication somewhere; and only the future will show which party it is.

A BUSINESS MAN IN PARLIAMENT

The most noteworthy feature of the four election contests in Canada last week to us is the return of Mr. R. R. Dobell, a prominent business man, as member for Quebec West.

Mr. Dobell enters Parliament unpledged to either political party. He has his own views on commercial questions and is a man of independent means. It remains to be seen whether the new member for Quebec West will take advantage of these fortunate circumstances and present the spectacle of a level-headed, unbiassed business man in Parliament, deciding questions on their merits, and pushing the claims of merchants as a body to the front. If he does, the reform advocated in these columns of more business men in the Government, and less needy adventurers in the House, will receive a powerful impulse.

Mr. Dobell is a member of the lumber exporting firm of Dobell, Becket & Co., Quebec, has studied commercial matters at home and abroad, and must be well qualified to represent our business element in the House.

CANADA'S TRADE CONDITIONS.

THE unique position that Canada has held among the nations during the financial depression of the last two years has been the subject of favorable comment by journalists, financiers and capitalists in both the United States and Great Britain.

The test to which this depression put the country demonstrated to the world that the trade and financial institutions of Canada were not built upon the sands. The floods—created by the unparalleled depression in the United States—which beat against them, clearly proved they were built upon a rock.

Canada could not under the present conditions experience such a commercial crisis as that which obtained in the United States.

The seed-germ of the unfortunate condition of affairs in the United States was want of confidence by its own people in the currency and banking systems of the country.

In Canada the system of currency has been tried under all sorts of conditions, and found equal to all demands made upon it, while the country is not divided into warring factions over sound and unsound money. Consequently every capitalist who invests his money in the Dominion is as confident that he will lose nothing through a depreciated currency as he is of the sun rising in the east on the morrow.

Our banking system is the ideal of those who are championing the cause of reform in the antiquated banking system of the United States.

We have been induced to this retrospect by the receipt of a copy of the Trade and Navigation Returns of the Dominion for the fiscal year ending June 31, 1894, the period when the depression hung the heaviest over the United States.

With its next door neighbor, and the neighbor with whom it did a large portion of its business in such a bad financial condition, it is only natural to expect that the Dominion's foreign trade should be influenced to some extent. And it was, but to a surprisingly slight extent, when the crisis in the United States is taken into account and the dullness obtaining in Great Britain and Europe generally is considered.

The aggregate imports for home consumption were valued at \$113,093,983, a decrease of a little over 7 per cent. compared with 1893, in which year, with one exception, the imports were the largest in the history of the country. This decrease was principally in dutiable goods, free goods exhibiting a decline of less than 3 per cent. Great Britain and the United States are, of course, the principal countries with which we trade. Our imports from both

these countries show a marked falling off, but the decrease is \$756,731 greater in the imports from the United States than from Great Britain. The countries from whom we bought more than in 1893 were Germany, Spain, Italy, Newfoundland, South America, China, Japan and Switzerland.

The following table shows some of the principal articles imported during the fiscal years 1893 and 1894.

DUTIABLE GOODS			
	1893.	1894.

Tin.....	1,242,049	1,274,512	
Zinc.....	124,360	90,689	
All other n. e. s.....	198,783	244,486	
Coffee, green.....	594,888	565,008	
Tea of all kinds, n. c. s.....	2,886,841	2,863,939	
Coin and bullion.....	6,534,200	4,023,072	
Settlers' effects.....	2,223,269	3,322,499	

The returns regarding the exports are particularly gratifying. They show a decline of less than 1 per cent. compared with 1893's figures, which were by some \$5,000,000 larger than ever before in the history of the country. The actual figures for 1894 were \$117,524,949, and the difference between them and those of the preceding year is more than accounted for in the exports of coin and bullion alone, the decline in which was over 2¼ million dollars. Omitting coin and bullion and the estimated shortage at inland ports, a recapitulation of

the exports for the years 1893 and 1894 shows this result :

	1893.	1894.
Produce of the mine.....	\$5,625,526	\$6,055,894
" " fisheries.....	8,941,357	11,412,281
" " forest.....	27,632,791	26,504,756
Animals and their produce.....	32,775,879	33,046,467
Agricultural products.....	27,093,195	26,757,346
Manufactures.....	8,487,271	8,336,312
Miscellaneous articles.....	392,327	307,602
Total.....	\$110,948,346	\$112,420,658

It will be observed from the above table that in the exports of her staple products Canada did even better in 1894 than in 1893 in spite of the phenomenal increase in the exports of the latter year.

It may be interesting by way of comparison to note that imports into the United States for the year ending December 31, 1894, fell off over 63 million dollars and the exports over 47 million dollars, compared with 1893.

Canada's foreign trade for 1894 affords much food for gratification, especially when it is compared with that of the United States for the same year.

A SAVING CLAUSE.

AMONG the bills of interest to merchants which passed the Ontario Legislature at its recent session was that amending the Pharmacy Act.

Following, although in a minor degree, the example set by their prototype in England, the Pharmaceutical Society inaugurated a species of factious persecution of merchants outside qualified druggists who kept patent medicines for sale.

The premise upon which this persecution was based was that patent medicines contained poison, and consequently none but druggists should sell them.

Of course, upon analysis, these medicines were found to contain poison. It was not necessary that the poison should be present in sufficient quantity to cause harm. All they wanted was poison, whereby the pharmacutists might kill the right of all outside their particular circle to sell the proprietary article.

Obviously this was menacing a right of merchants that had obtained from the early history of the country; but that did not disturb the druggists. They wanted a monopoly. This was clear.

The bill adopted by the Ontario Legislature aims to put a stop to this factious persecution, by inserting a clause in the Pharmacy Act to provide "that in case there be reason to apprehend the presence in any medicine generally sold under section 35 of the Act of any poison in such quantity as might prove dangerous to life or health, an analysis may be ordered by the Provincial Board of Health, and if the poison be found the proprietor should be notified and means taken to prevent the continuation of the free traffic in the medicine."

This means that hereafter when the Pharmaceutical Society prosecute a merchant who is not a qualified druggist, for selling patent medicines, they must not only establish the fact that they contain poison, but that they contain it in sufficient quantity to make them dangerous to life.

A FEW OF

The Eby, Blain Co.'s

Bargains

Currants . . . 3 Crown Vostizzas, in half cases, cleaned—6½c.

Marmalade . . Absolutely pure Seville Orange Marmalade—made after an old English recipe. Put up in pails, 7 lb.—6 pails to crate.

TORONTO - - - ONTARIO

PATRON MEMBERS WANT OFFICE.

AS MIGHT be expected of men who want to do away with all fair commercial dealings, the Patron members elected to the Ontario Legislature last June have made no favorable impression during their first session in the House. Their course has, in the main, been devoted to looking after their own personal interests. They appear to be on better terms with the Government side of the House than the Opposition, because the former have power and patronage to dispose of and the latter have not. The Patrons announced at an early stage that they had not been elected to turn out Governments. This intimation, instead of foreshadowing an attitude of impartiality as toward rival parties, was soon seen to mean a quiet hint that they would not bite the hand that fed them. If another election were held the Patrons would be wiped out, as the bye-election in Haldimand has indicated. Hence the Patrons are intent on staying in the House for the whole four years at \$600 per session apiece, winding up that career, in as many cases as possible, with an appointment to a permanent office. Two Patron members are said to have admitted that they would get Government positions when the time was up.

These are the kind of men who claim to be superior to the rest of mankind, and who

want to abolish merchants and traders and grab the whole profit themselves. Such an element in a Legislature is worse than a band of needy party hacks, because we business men can at least hold the latter responsible through their leaders. But the Patrons, having no definite platform on many public issues, are simply open to the highest bidder.

Both Conservatives and Liberals have united to defeat them. This was done in the Haldimand local election, where the Conservatives voted to a man for the Liberal (Dr. Baxter), who was thus elected by a large majority over Senn, the Patron.

TRADE WITH NEWFOUNDLAND.

AS Newfoundland will shortly join the Dominion and enlarge the area of Canadian free trade, it is worth noting briefly the present state of our commerce with the colony, as seen in the trade returns for 1894, issued at Ottawa last Friday. Our merchants and manufacturers may expect to greatly increase their business with Newfoundland, which will at the date of union remove all tariff barriers against Canada and assume the Customs duties of the Dominion against the rest of the world. In 1894 Canada sent \$2,818,592 worth of goods to Newfoundland. Of these \$1,033,703 were agricultural products,

\$780,354 manufactures, \$325,847 animal produce, \$176,904 forest products, and \$175,642 minerals.

While not extensive, the trade comprehends nearly every line of Canadian produce which, under differential tariff rates, ought to supersede goods of the same class now imported into the colony from the United States. Already in such Canadian lines as woollens, tinware, soap, tobacco, etc., the island is our best outside customer. Some of the larger items of Canadian exports there in 1894 are the following:

	Quantity.	Value.
Flour (barrels)	201,583	\$803,521
Coal (tons)	79,751	172,257
Leather		144,067
Butter (lbs)	595,423	109,263
Cattle (head)	3,436	99,384
Bricks		29,919
Boots and shoes		72,933
Tobacco		38,468
Furniture		34,403
Hardware		99,962
Meats and poultry (lbs.)	477,626	34,053

Canada also sold the island 85 ships of the small fishing class in 1894, and the various kinds of products indicated in the above list will show the sort of trade to be expected. When Newfoundland joins us, politically and commercially, her commerce with us will cease to rank as part of our foreign trade, and a yearly sum of about \$4,000,000 will disappear from our trade and navigation tables. The change will cost us no revenue, however, since we only collected \$1,623 of revenue in 1894 from Newfoundland.

The Approach of Warm Weather

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, April 25, 1895.
GROCERIES.

OPENING of navigation orders are beginning to arrive freely this week. This is practically the feature of trade this week. Some houses report the receipt of a large number of this class of orders, and they are generally in good spirits as a result. Generally speaking, the volume of business is a little larger than a week ago, but trade is not yet, however, what might be termed brisk. From what we can gather, the volume of trade for the first three months is ahead of what it was for the same time last year. An increased demand is reported for canned vegetables, and there are more Valencia raisins selling. Sugars continue firm and unchanged with demand moderate only. Teas show a little more activity, but the increased business is practically confined to Ceylon kinds. Payments are moderate.

CANNED GOODS.

The volume of trade is, if anything, better than it was a week ago, and an increasing demand has developed for the better brands. These remarks apply particularly to peas, corn and tomatoes. There have been no changes in prices. Gallon apples are still in brisk demand, but, generally speaking, fruits are not attracting much attention. Salmon is in active demand, principally at \$1.35 for talls and \$1.55 for flats. No new salmon is being offered here yet, but advices received from the Coast state that there have been sales on English account, and that canners are looking for higher prices than last year. Canned finnan haddies and fresh herring are in good demand.

We quote: Tomatoes, 85 to 95c. for choice; corn, 85 to 95c.; peas, 82½ to 87½c. for ordinary and \$1.40 for fancy; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.10 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.45 to \$1.50 for choice and \$1.35 for good red fish of not so well known brands in tall tins, and \$1.60 to \$1.65 in flat tins; do., second quality, \$1.15 to \$1.25; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

Demand for green coffees continues moderate only. N. Y. Journal of Commerce of Tuesday says: "Brazil entirely independent of other influences continue to suffer from the great irregularity of quality. Some fine coffee is in hand, but the pans of samples are kept in special drawers as a rule and not shown to ordinary custom, and over what is presented for examination buyers feel a decided indifference about negotiating even when valuation seems comparatively low. In one or two cases jobbers reported a fair demand, but outside of that business appeared dull and the tone dragging." Quotations on the Toronto market are unchanged. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

Trade continues fairly good at unchanged prices. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Nothing materially new has developed either in regard to business or prices.

We quote as follows: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

No material change has taken place during the week. The market is strong, but the volume of business is not as good as it was a week or two ago. An odd carload is going out here and there, and comparatively speaking there is more doing in this way than in small lots. The refineries positively refuse to sell yellows in advance, but they will book orders for delivery early in May at 1-16c. advance on present prices. The refiners are complaining that present prices are too low to yield them adequate profit. We quote: Granulated—domestic, \$3.40 to \$3.50; do., No. 2, 3¼c.; yellows, 2½ to 3¾c. Raw—Demerara, dark, 2¾c.; golden, 3 to 3¾c.; bright, 3½c.

N. Y. Journal of Commerce of Tuesday says: On market for raw sugars the average theory of the position seems to be that prices are probably as low as likely to settle, and that natural tendency is toward a higher range. Many importers undoubtedly calculated upon developing the firmer tone before this time, but have been disappointed by the promiscuous offering of arriving parcels upon which owners preferred realizing to selling. The Cuban accounts continue firm, but Europe is a shade easier.

MARKETS—Continued

SYRUPS.

Trade in syrups is fair, especially in mediums and brights at about $2\frac{1}{2}$ to $2\frac{3}{4}$ c. per lb. Syrups are still scarce at the refineries. We quote: Dark, 25c.; medium, 28 to 30c.; bright, 35 to 40c.; very bright, 45 to 50c.

MOLASSES.

There is a moderate movement at unchanged prices. The kind most in demand is a molasses which sells at 28c. in barrels and 30c. in half-barrels. We quote as follows: New Orleans, barrels, 26 to 28c.; half-barrels, 30½ to 32c.; Barbadoes, barrels, 28 to 32c.; half-barrels, 30 to 34c.

TEAS.

London circulars received on Tuesday report that at the sales on the 15th inst. Ceylons were freely competed for and realized slightly better prices. Cable advices also received on Tuesday last state that sales on the previous day were again large, and that desirable parcels of Ceylons realized prices exceeding brokers' valuations. On the Toronto market teas are attracting a little more attention than a week or two ago, but it is principally confined to Ceylons, although some good sales of China blacks are reported. Stock of green teas offering is of course small. The market is bare of low grade Ceylons, and this is the kind that is most wanted here. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUITS.

Currants are moving more freely, particularly the better grades. Prices are steady and unchanged. We quote: Filiatras, half-barrels, 4 to 4½c., barrels, 4¼c.; fine Filiatras, half-barrels, 4¾c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 5½ to 6c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Valencia raisins are moving freely, the demand having improved during the week. There is a good deal of cheap fruit going out, but the layer and selected kinds are in good demand also, with prices being firmly held, owing to the lightness of stocks. We quote: Off-stalk, 3¼ to 3¾c.; fine off-stalk, 4 to 4¾c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Prunes continue in active demand at unchanged prices. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 5 to 5½c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 7 to 7½c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, 4¾

to 5c. per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

Sultana raisins are in fairly good demand, business having improved lately. We quote good, bright goods at 6 to 6½c.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

Demand continues good for California dried fruits. We quote according to quality: Peaches, 10½ to 13c.; apricots, 10½ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

CHEESE AND BUTTER.

The prices of butter are still gradually sinking, and dealers are expressing anxiety that old stuff should be cleared off the market at any price to make way for the spring and summer article. The situation is reviewed in extenso elsewhere. We quote: Summer dairy and store packed—Choice, 9 to 12c.; low grade baking butter, 5 to 6c.; fresh large rolls, 11 to 13c.; pound prints, 14 to 15c. Summer creamery, 11 to 14c. Winter creamery—Tubs, 19 to 20c.; pound prints, 20 to 21c.

August and September makes of Canadian cheese bring 9 to 10½c., and new Canadian cheese is quoted at 10 to 10½c. Small Stiltons bring 12 to 12½c.

GREEN FRUIT.

A brisk trade is being done since the country roads began to become passable. Lemons are in fair demand, but they are not plentiful, and some say that even after the spring arrivals at Montreal they will be rather dear. California navel oranges are rather scarce, and a good trade is being done in bananas. California dried fruit is a little lower in price. A few strawberries are being received from the South. We quote figures: Lemons—Messinas, \$3.25 to \$4. Oranges—Valencias, small crate, \$4.25 to \$4.50, and Jumbo crates, \$5.25 to \$5.50; Messinas, \$2.50 to \$3; California seedlings, \$2.75 to \$3; California navels, \$3.50 to \$4. Bananas, \$1.50 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. Grapes—Malaga, \$5 to \$6.50 per keg. California dried fruit—Apricots, 11 to 12c. peaches, 12½c.; cranberries, \$3.50 per box. Strawberries, 45c. a quart basket; cocoanuts, \$4.50 a sack.

COUNTRY PRODUCE.

BEANS—Remain firm at \$1.60 to \$1.65 a bushel for the choice hand-picked article.

DRIED APPLES—Seem firm at 6½c. a pound.

EVAPORATED APPLES—In 50-lb. boxes: 7 to 7¼c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.75 to \$3 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—Receipts of maple sugar and syrup during the past few days have been large, while sales are said to be slow. Sugar is cheaper, but syrup about holds its own. We quote: 7 to 8c. per lb. for sugar; syrup, in 5-gallon lots, 70 to 75c. a gallon, and in gallon tins, 80 to 85c.

POTATOES—The American demand is said to be broken, and the Canadian market has therefore materially weakened. There seem to be lots of potatoes yet in the country. We quote: 60 to 65c. on the track, and 70 to 75c. out of store.

POULTRY—Scarce and firm. Prices unaltered. We quote: Turkeys, 14c.; geese, 8 to 9c.; chickens, 50 to 75c., ducks 75c. to \$1.

EGGS—Eggs are very plentiful now, and the 10c. market predicted last week by THE CANADIAN GROCER is practically reached, for the best article is now selling at 10½c.

FISH AND OYSTERS.

Frozen stocks of fish are almost entirely out of the market, and very little in fresh lines are to hand yet, dealers' windows being filled in the meantime with such local catches as perch and bass. We quote: Salmon trout (frozen), 6½ to 7c.; white fish (frozen), 6½ to 7c.; No. 2 white fish, 4c.; skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; market cod, 3 to 5c.; steak cod, 6 to 6½c.; haddock, 4 to 4½c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; sea herring (frozen), \$1.25 per 100 fish; blue pickerel, 4 to 5c. lb.; yellow ditto, 6c. per lb.; mackerel, 14c. each; pike, 3 to 4c. lb.; cod, 6c. per lb.; flitch cod, 5c.; finnan haddies, 6½ to 7c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; Vancouver halibut, 6 to 7c.; large halibut, 10 to 13c. Oysters, \$1.20 per gallon for standards and \$1.50 for selects.

PROVISIONS AND DRESSED HOGS.

Dressed hogs have advanced a little, but their products are unaltered in price. There is a good demand for dressed hogs at \$6.25 to \$6.40 per 100 lbs. We quote products:

BACON—Long clear, 7¾c. for carload lots, 8c. for ton lots, and 8¼c. for small lots; breakfast bacon, 10½c to 11c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 9½c to 10c.; medium, 15 to 20 lbs., 10½ to 11c.; small hams, 10¾ to 11c.; pickled, 9½ to 10c.

LARD—Pure Canadian, tierces, 8¾c.; tubs, 9c.; pails, 9¼c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.25; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

CLEMES BROS. - TORONTO**FLOUR AND FEED.****WHEAT**—A further rise has taken place both on Chicago and local markets. Local prices are: White, 71½c.; red, 69 to 71½c.; goose, 70c.**OATS**—Are slightly weaker at 40c.**BARLEY**—Has fallen one point in price, selling now at 48c.**FLOUR**—As a result partially of the firmness of wheat the price of flour is more active than for some time past, trade being quite lively. We quote local prices: Ontario straight roller, \$3.30 to \$3.40; Manitoba, \$3.65 to \$3.70; patents, \$3.90 to \$4.**BREAKFAST FOODS**—Prices are the same as those of last week, and a fair trade is being done. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; cornmeal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.**SALT.**

A good trade, especially in dairy lines, is being done at old prices, viz.: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

SEEDS.

Trade, with the more seasonable weather now prevailing, has become more active. Red clover keeps firm, with prices all slightly advanced. Alsike is in good demand for the finest grades. Timothy is somewhat easier in price for medium and lower qualities, while fancy kinds remain about unchanged. At present jobbing values are: Red clover, \$6.50 to \$6.75; alsike, \$4.50 to \$6.30; timothy, \$3 to \$3.50. The foregoing quotations are prices to the trade for cleaned stocks; sellers and growers would have to sell accordingly.

HIDES, SKINS, WOOL AND TALLOW**HIDES**—Are scarce and the demand is good. Consequently prices have taken a jump upwards of ½c. We quote: Green hides, No. 1, 6c.; No. 2, 5c.; No. 3, 4c. For cured 7c. is paid.**SHEEPSKINS**—Quoted at 90c. to \$1, an advance of 5 to 10c.**CALFSKINS**—These are also up, No. 1 selling at 7c., and No. 2 at 5c.**TALLOW**—Jobbers quote 5 to 5½c., and sell at 6c.**WOOL**—Canadian fleece is quoted nominally at 19 to 20c., there being none on the market. In pulled wools best supers are quoted at 19 to 21c., and extras at 21 to 22c.**PETROLEUM.**

Petroleum remains firm at the high prices quoted last week. If crude maintains its present price, which some think it likely will, refined, it is thought, will go higher on the Canadian markets. We quote prices, in 1 to 10 bbl. lots, imperial gallon Toronto: Canadian, 17 to 18c.; carbon safety, 18½ to 19½c.; Canadian water white, 18½ to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

MARKET NOTES.

Dawson & Co. have some direct shipments of pineapples in.

Four carloads of bananas arrived at Clemes Bros.' warerooms this week.

Smith & Keighley have in stock a fine line of syrups.

See Wm. Paterson & Son's candy ad. on page 6, this issue.

Beardsley's smoked sliced beef is now in stock with Lucas, Steele & Bristol.

Davidson & Hay report that they have still a few cases of gallon apples left.

H. P. Eckardt & Co. are offering special values in Parts off-stalk Valencia raisins.

The Toronto Biscuit and Confectionery Co. are finding a ready sale for their marmalade.

"Star" brand boneless herring in tins, with key opener, is for sale by H. P. Eckardt & Co.

Todhunter, Mitchell & Co. are still pushing their soc. pure ground West Indian coffee.

Wm. Paterson & Son write that the demand for their high-class domestic pickles is brisk.

W. H. Gillard & Co. have received a consignment of "Non Plus Ultra" currants of superior quality.

The Eby, Blain Co. desire to draw the special attention of the trade to their advertisement in this issue.

John Sloan & Co. are in receipt of a carload of new crop fine New Orleans molasses in barrels and half barrels.

Davidson & Hay are in receipt of direct shipments of Ceylon, Indian Golden-Tipped Pekoe, and Young Hyson teas.

Wm. Paterson & Son are making a beautiful line of buttercups, satinettes and pastilles, put up in 5-lb. glass jars.

Smith & Keighley announce that they are running off their stock of Valencia raisins at greatly reduced prices.

A shipment of canned strawberries is to hand with John Sloan & Co. These goods are scarce on the Toronto market.

Beardsley's "Acme" brand sliced smoked beef, without doubt the finest in the market, is for sale by H. P. Eckardt & Co.

Pure Gold Mfg. Co. is putting tomato catsup on the market in white stone gallon jars especially made for the firm.

Plum, raspberry, peach and other jams; also choice marmalade, in pails, are offering very cheap by Lucas, Steele & Bristol.

Lucas, Steele & Bristol have a fine assortment of French plums and Bosnia prunes in cases; also another lot of cheap Valencia raisins.

Some good values in Ceylon broken Pekoes are being offered by Lucas, Steele & Bristol. They will furnish samples on application.

Warren Bros. & Boomer have a shipment of Sphinx prunes between here and New

York. This will probably be the last shipment this season owing to the high prices now ruling.

The Toronto Biscuit & Confectionery Co. report large sales of maple syrup and maple sugar. They devote considerable attention to this line.

W. H. Gillard & Co. say that their import orders for Japan teas will show exceptional values this season. They have ordered extensively of high grade lines and will be able to show some bargains.

Three-crown Vostizza currants are being offered by the Eby, Blain Co. at what are said to be close figures. The firm is also offering canned greengages and Lombard plums in 2-lb. tins; also corn in flat tins.

In the summer goods line the Eby, Blain Co. are drawing special attention to Cunningham & De Fourier's (London, Eng.), potted meats and game delicacies, and are offering them at special prices and discounts this season.

Graham, McLean & Co., 77 Colborne street, Toronto, have been appointed Toronto agents for the Union Produce Co.'s "Cream" cheese. The cheese is put up in pots under the brands of "Manitoban" and "Beaver."

The consumption of Ceylon tea in Canada last year was 1,053,393 pounds, an increase of 295,369 pounds compared with the previous year. The consumption of Indian tea was practically the same as the preceding year.

T. B. Escott & Co. beg to announce that after this week all orders for "Grand Mogul" tea will be shipped promptly. The early part of the month brought such a rush of orders of this brand of tea that there has been some delay in filling orders.

The latest novelty placed on the Canadian market is a tin of baking powder, containing $\frac{1}{4}$ lb. baking powder, with two cake cutters and a dredge tin, all to be retailed for 10c. The Lion Spice Manufacturing Co., of London, Ont., are placing large quantities with the trade.

Mr. Robert Jardine still represents the Pure Gold Mfg. Co. in New Brunswick, with headquarters and sample-room at St. John. Baker Bros., of Halifax, will look after Nova Scotia and Cape Breton, and have opened a sample-room for the Pure Gold Mfg. Co. at Halifax.

The Eby, Blain Co., Ltd., report arrival of spring shipment of Higgins' "Eureka" dairy salt, all sizes. "At the reduced prices of this salt every merchant will find it profitable to handle, and no dairyman can afford to be without it," said a member of the firm. Price list furnished on application.

W. H. Gillard & Co. report that their sales of Dixon's Carburet of Iron Stove Polish are rapidly increasing, and that it is finding special favor with housekeepers

throughout the country. The manufacturers claim that one package of this polish contains more polish than almost two of any other make, and is of superior quality.

Beardsley's celebrated shredded codfish is offered by the Eby, Blain Co., and meeting with good sales. This article is specially prepared for summer trade.

MONTREAL MARKETS

MONTREAL, April 25, 1895.

GROCERIES.

THE grocery market does not exhibit much change, business ruling quiet in the main. With the opening of water navigation, however, trade is expected to pick up. There is no radical change in the conditions governing any of the staple branches. Sugar has shown some irregularity in tone, but the general belief is that prices have touched bottom, and there is no disposition to accept orders any length ahead. Reports regarding new crop molasses are unsettled. The Wholesale Guild held a meeting this week and fixed jobbing prices, the facts of which are given elsewhere. In syrups, dullness rules; there is no change in spices, which are firm, especially pepper. Coffees continue strong in tendency, especially Maracaibos, and the same can be said of tea, though it rules very quiet. Canned goods, dried fruit and other lines are featureless.

SUGAR.

Though lower prices have been spoken of in some instances the tone of the sugar market is steady on the whole, and prices rule the same. At a meeting held last week the Wholesale Guild confirmed the jobbing price on granulated at $2\frac{3}{8}$ c. for standard, and $3\frac{1}{4}$ c. for No. 2. On yellows, on the other hand, we know where orders for jobbing quantities have been refused at $2\frac{3}{8}$ c., and the inside jobbing price on these is now $2\frac{1}{2}$ c. Business has been fair both from first and second hands during the week, but sellers are not very urgent about operating to any large extent ahead. From the refineries a fair quality has been moved on the basis of 3 5-16c. for granulated, and 2 7-16 to $2\frac{7}{8}$ c. for yellows, as to quality. In a regular jobbing way we quote prices: Granulated, $3\frac{3}{8}$ c. for standard; $3\frac{1}{4}$ c. for No. 2; yellows, $2\frac{1}{2}$ to $3\frac{1}{4}$ c., as to grade.

SYRUP.

There is not much doing in syrups in a large way this week, refiners finding business quiet and prices are a shade lower on round lots, at 1 1-16 to 2c., the sale of a 900 bbl. lot made within the range being the chief feature of the market since last report. We quote $1\frac{1}{2}$ to $2\frac{1}{4}$ c. as to grade for ordinary business in domestic.

MOLASSES.

The jobbing movement is not heavy, but we understand that some round lots have been placed with three of the French wholesale houses this week at equivalent to $28\frac{1}{2}$ c. laid down in Montreal to arrive in June. In a local way prices have been fixed on new crop to arrive via the St. Lawrence at $30\frac{1}{2}$ c. carload lots and $31\frac{1}{2}$ c. less than carload lots. For prompt shipment from stock the old price, $31\frac{1}{2}$ c. carloads and $32\frac{1}{2}$ c. less than carloads holds good.

THE CANADIAN GROCER

THE DULLNESS IN CHEESE.

THE wind up of the export cheese business this spring, notwithstanding the low prices that have ruled ever since the first of the year at Montreal, has been about as dull, if not duller, than any member of the trade can remember.

It has been an exceptional circumstance with exporters at the big port to have to consign cheese. The fact that they have consigned this winter and spring heavier than ever before speaks volumes for the dullness of the market. Approximately the consignments of cheese to Great Britain since the beginning of February from Montreal must aggregate 70,000 boxes, and on Saturday last shippers there received cables from correspondents on the other side that they could not handle any more consignments at present.

The truth of the matter is, the Britishers are as heavily loaded with cheese as anyone else, an evidence in this connection being the fact that a large line of cheese was held on English account in Montreal until a week ago, when it was sent forward. The owners in Great Britain tried several times to turn it over on this side of the water, and finding at last that they could not, ordered it forward.

Nearly all of the consignments above referred to comprised high-priced late-made fall cheese, the first cost of which averaged 10c., and it must have cost, with interest, storage, etc., 1 1/2c. more per lb. to carry it. In other words, goods which stood the owners 11 1/2c. per lb. in Montreal were sent forward in the hope of their realizing the equivalent of 9 1/2 to 9 3/4c. in Montreal.

Figured on this basis, it is no exaggeration to say that over \$1 per box has been lost on these consignments, or, in round figures, \$70,000. This is a nice little sum, and does not by any means represent the total that exporters are out of pocket, for on the sales actually made on spot in Montreal equally heavy losses were made.

Just previous to the end of Lent, dealers thought they saw a ray of light in the situation owing to the spurt in the enquiry experienced from Great Britain. It was only a ray, for the improvement in the demand was short lived, as it was simply an unsuccessful effort of the trade in Great Britain, heavily loaded up with cheese, to put some snap into the market.

The depressing conditions were too strong to be controlled however. Another indica-

tion of indifference is the fact that there has been no contracting of any account yet for the output of favorite factories during the coming season.

Last spring at this date fully 30 to 40 per cent. of the factories in the Brockville district had been contracted for by the Montreal exporters. This year they have all they care to attend to, and instead of an insignificant 1,500 boxes being carried to the opening of navigation, as was the case last year, it is quite probable that there will be 15,000 this spring.

THE FOOD FAIR.

THE Montreal Food Fair opened in Windsor Hall, Montreal, last week, and will last until the end of next week. A number of people have been present each day both in the day time and at night, and the hall, while not large, is prettily decorated, and looks attractive. A representative of THE CANADIAN GROCER visited the Fair and inspected the exhibits. The exhibitors have shown taste in arranging the booths, and the general appearance of the Fair is to be commended.

The idea of a Food Exhibition being novel in Canada, THE CANADIAN GROCER would like to have been able to state definitely whether or not exhibitors are repaid by taking part in it.

At ordinary Fall Fairs and annual exhibitions it is well known that, while some advantage is gained, the return never equals the outlay, and few exhibit a second time. The case of a Food Fair being rather different, the result might be more satisfactory. The Montreal Food Fair is, however, hardly extensive enough to judge by. It represents but a fraction of the trade, and is therefore limited in scope and influence.

Fortunately, some good firms have been secured to join it, the most extensive booth, and one which is exceedingly well embellished, being that of Rose & Laflamme, a firm well-known to readers of THE CANADIAN GROCER. Other exhibits are also quite impressive, like that of the products of the Edwardsburgh Starch Co. which are well shown. There is a good exhibit of Johnston's Fluid Beef. One booth contains a display of Radnor water, the new Canadian table beverage. The exhibits of Reckitt's Blue by Thos. Leeming & Co., and the woodenware shown by H. A. Nelson & Sons are noticeable. There is a satis-

factory display of Cook's Friend Baking Powder, and in lines like these the Fair is up to the mark. Other booths, however, such as that containing the Irish laces, and other products being pushed under the patronage of the Countess of Aberdeen, another for jewelry, and another for cigars, etc., do not, of course, properly come under the notion of a Food Fair. Omitting these, the range of exhibits is not wide, and as a Food Fair the enterprise is hardly representative enough to impress the general public.

Complaint has been made of the high rate of admission—25 cents—but this must be founded on the fact that the Fair is a small one, and not on its general appearance, which is decidedly prepossessing. Generally the arrangements and the bill of attractions, musical and otherwise, reflect very great credit on the manager, Col. De Garmo.

TO STOP ADULTERATIONS.

THE retail trade have just reason to complain that the laws and regulations governing the making and sale of inferior baking powders and adulterated coffees, spices, etc., are not satisfactorily enforced. No dealer gains anything by exposing inferior articles for sale, and in these cases he is obliged to sell what is made, and, if proper supervision is not exercised over the manufacture, the retailer is not to blame. The makers of good baking powders, and those whose coffees and spices are of excellent quality are also injured by the non-enforcement of regulations to prevent the sale of adulterated stuff.

In regard to baking powders there is, no doubt, some difficulty. Analysts are not entirely agreed as to the standard. The prosecutions conducted by the officers of the Inland Revenue Department have gone on the assumption that alum powders are not satisfactory, but the prosecutions have never amounted to anything, and makers of good qualities, and retailers desirous of handling only the best kinds, are left at the mercy of inferior stuff, which the authorities appear to take no steps to suppress.

There is a good deal of adulteration going on all the time in such lines as coffees and spices. Is the retailer aware how often he loses a good customer forever because a chance pound of coffee was not up to the average? The customer gets offended, thinks he has been imposed on, and pro-

ceeds to buy elsewhere. Yet the dealer was in no whit to blame, having bought what was deemed a good article from a reputable house. What is the practice in regard to adulterated articles? Since 1889 the Government have devised a plan by which the offender—the manufacturer or miller—receives notice from the Department that adulteration has been discovered in his goods. He is made to pay \$14, which covers the cost of analysis and inflicts a small fine. This punishment is a mere flea bite. It is not a heavy penalty for doing wrong and it does not frighten anyone into doing right. Who ever heard of a second prosecution, or any serious effort to root out the abuse? Like the liquor men who get fined repeatedly for “first” offences, because prosecution of second or third offences would involve serious consequences, the adulteration offenders get off with \$14.

The most notable suggestion to reform this condition of things is a recommendation, which was endorsed by the chief officer of the Inland Revenue Department, that departmental licenses should be issued to the grinders or wholesale trade. This would entail inspection of premises and would, it is claimed, give the authorities the needed control of the business. It seems a radical move and might not be of any value. But something should be done, and that at once.

QUEBEC BOARD OF TRADE.

At the last meeting of the Quebec Board of Trade the question of the best means to be adopted towards obtaining perfect uniformity in the interpretation and application of the Customs tariff all over Canada came up. Some months ago the Quebec Board suggested that meetings of the Customs appraisers of large Canadian centres be held from time to time with this object. Since then the petition of the Montreal Board favoring the suggestion made by THE CANADIAN GROCER of the appointment of a Board of Customs Experts has been framed, and the Quebec Board has now decided to endorse that.

It was decided to petition the Hon. Controller of Customs to have merchants notified as soon as their goods are landed from ships and to extend the time of payment of Customs duties to from 9 a. m. to 4 p. m., and from 8 a. m. to 6 p. m. in summer time, and 8 a. m. to 5 p. m. in winter time for the delivery of the goods from warehouses. The Council is in communication with Chicago experts on the cold storage question.

The Board noted with approval the fact that the mails from the west arriving in Montreal Saturday night are now forwarded to Quebec by the Sunday afternoon instead of the Monday morning C. P. R. train, thus gaining over twelve hours in time.

HEAVY LOSSES ON BUTTER.

SEVERAL western dealers visited Montreal last week to try and sell some butter, of which there is a considerable quantity in the hands of speculators in Ontario. Their visit again recalls to mind the exceptionally heavy stock of last season's creamery and dairy still carried in cold store. As THE CANADIAN GROCER has pointed out before, butter dealers have already taken heavy losses on sales, and it looks as though they are going to have still heavier on what yet remains to be sold.

In fact, it is simply a consideration of finance with many that prevents them realizing at once and taking what loss there is.

The stock of old butter in Montreal at the present time is variously estimated at from 6,000 to 8,000 packages, principally creamery, with a fair percentage of western dairy. The creamery cost when purchased last fall or summer 18c. on the average, and the western dairy 14 to 15c.

For the creamery many dealers secured advances of 18c. per lb. on the warehouse receipts from the banks, and possibly 13 to 14c. advance on the western dairy.

At present the ruling price on old creamery is difficult to fix. Nominally 14c. is the idea, but there have been sales as low as 10c. per lb. and if a holder was forced to realize he would hardly get more than 13 to 14c. per lb. Western dairy has been sold as low as 5c. per lb., or cheaper than the commonest lard, and the general asking price is 7c. The difference between these figures and what the butter cost, 6c. and 7c. per lb. respectively for creamery and dairy, is the loss that butter dealers have to take. On the stock yet in Montreal the banks have advanced in round figures \$100,000 on the basis above outlined, and it is a question with many of the holders of butter whether it is not better to pay the interest on the advances than make the sales and take the losses at the prices ruling. The ones who are inclined to the former course, provided the banks will allow them, figure on an improved market during the coming season in consequence of a reduced output resulting from the exceptional depression of the past year.

The wisdom of this course is questionable, for they cannot tell what the producer will do, especially as the latter did not suffer from reduced prices last summer, having sold out at top prices to the speculative dealers.

That the depreciation in prices is remarkable no one can gainsay, with lard selling at a range of 7 to 10c., or identically the same as western dairy stock.

Despite this fact, the confectioners are not free buyers of the latter, for many of them prefer fresh lard to butter that is strong enough to lift the roof off a house.

All this only goes to show the utter foolishness of speculating in such a perish-

able article as butter, and carrying it for too long a period. Of course, no accurate idea can be arrived at of the losses incurred during the present winter on the commodity, but a well-informed dealer estimates them in the aggregate at \$100,000 in Montreal alone.

WANTED TO BUY SUGAR.

A London merchant arrived in Montreal a few days ago with a “straight tip” that the Government intended putting a duty on sugar. He was there to buy a round lot, and tried to make a deal with the refiners at less than current prices. It is understood he made only a small purchase, for he found that the trade there took their tip from THE CANADIAN GROCER and were holding off. THE CANADIAN GROCER, it will be remembered, gave it on the authority of a member of the Cabinet that it was not likely that a duty would be put on this season, but that the deficit in revenue would be charged to capital account. Eventually the duty would go on sugar, for that staple can stand it better than any other.

When these views were expressed it was thought there would be but one session of Parliament before the general election.

Now, however, it is not improbable that Parliament may run its full term and there will be another session with an election in 1896. On this account the sugar duty is again being discussed in Government circles.

FRENCH CHAMBER OF COMMERCE.

The Council of the Chambre de Commerce met in Montreal last Friday, the president, Mr. H. Laporte, in the chair, and the following other members being present: Messrs. C. Desmarteau, L. E. Moran, Jr., J. X. Perrault, A. Racine, F. D. Shallow, Louis Tourville, C. Cattelli, H. Haynes, Guillaume Bolvin, C. Chagnon, O. Foucher, R. Bickerdyke, August Girard, J. D. Roland, A. Baker, J. B. Monier, W. Marson and A. Aumand.

A motion was passed in favor of the petition to the Government for a Board of Experts to arbitrate on Customs law disputes.

A committee was appointed to deal with the request from the retail merchants of Valleyfield for a better train service between that town and Montreal.

The council endorsed the petition of the Merchants' Telephone Co. to be allowed to put wires on railway bridges and telephone instruments in railway stations.

Mr. L. E. Morin, Jr., gave notice of a resolution to make the inspection of hay compulsory. Mr. Morin said that the hay which was supplied to his department in the corporation contained all sorts of impurities.

NEW MOLASSES PRICES.

THE Molasses Committee of the Montreal Wholesale Grocers' Guild, at a meeting held on Tuesday last decided upon the prices which should govern business on the new crop molasses which arrives via the St. Lawrence.

The basis agreed upon is 30½c. in carload lots and 31½c. in less than carload lots.

These prices, it must be understood, apply only on new crop to arrive via the St. Lawrence. For old crop in store here and on a couple of cargoes which have come forward via Portland the old basis still holds good, that is, 31½c. in carload lots and 32½c. in less than carload lots, prompt shipment.

Further advices from the Islands confirm what has been said before regarding prospects on new crop. It is estimated that the yield this season will be from 25,000 to 28,000 puncheons, against a total yield of 43,000 puncheons last year.

Reports also state that the average of quality is not satisfactory, and for this reason buyers are disposed to be very strict in their demands for guarantees as to gauge and sourness.

So far it is understood that contracts for 5,000 puncheons have been put through for June delivery. This stock will cost about 29 to 30c., laid down in Montreal, and it is doubtful if orders could be repeated on as advantageous terms to-day.

It is understood, nevertheless, that there has been considerable competition between agents here for contracts. When all the necessary guarantees are demanded by a buyer, 21½c. at the Islands is the lowest figure, and one agent said that his principals had withdrawn this price, stipulating for a fraction over 22c. Offers of less than 21½c. have been made, but as they do not provide for guarantees as to gauge and sourness, they cannot be seriously considered with the former.

A buyer is, of course, at liberty to accept them, but he is taking chances on what condition his importations will arrive in.

A PANACEA FOR DEADBEATS.

A Toronto evening paper preaches this doctrine: "Make all sums under \$100 non-collectable by process of law, and the best possible means will be taken of enforcing the general introduction of the cash system."

Such a policy will be favored by people who want to escape paying their debts, but by no one else. No doubt our Toronto contemporary has plenty of readers whom the proposal will suit very well. Abolishing the collection of small debts by law would not hasten the introduction of the cash system: it would chiefly benefit the per-

sons who won't pay and who would study to get into the confidence of merchants so as to run up bills which could not be collected. That would be too heavy a price to pay for the cash system.

Dealing for cash can best be promoted by mutual confidence and co-operation amongst merchants, by commercial organizations persistently pointing out its benefits, and by purchasers themselves realizing that cash payments mean cheaper goods, and that every deadbeat who lives on credit is a tax on the man who pays.

DISEASE GERMS IN MILK.

THE crusade which medical authority has been carrying on for some years against the use of cows' milk which has not been boiled, sterilized or condensed is due entirely to the results of scientific investigation.

It may be simpler to consume fresh milk, but if disease germs are to be avoided we must conform to medical advice. That is the only way in which, under modern conditions, the public health has been built up.

Milk is so universal an article of diet, its properties are so valuable, that its abandonment altogether is not feasible. The plan, therefore, which offers the best solution is to adapt our needs and tastes to the boiled, condensed or sterilized article. In the case of young children, or infants especially, the sooner the change is made the better.

Doctors know that the best food for the young child is to be nursed by a healthy mother, but in cases where this is not practicable the condensed milk, from which disease germs are removed, should be used in preference to cow's milk. If any doubt existed on this point it was set at rest by the report of W. H. Power, who undertook to investigate the whole matter for the Local Government Board, England, and whose report, as published in The British Medical Journal, declared:

Scarlet fever can be produced by the milk of cows suffering from a disease so slight in its local manifestations as almost to escape attention and producing so little disturbance of the general health of the cows that their appetite is not impaired nor the quantity of milk which they yield diminished.

It seems, therefore, that not only tuberculosis or consumption may be imparted by milk, but that scarlet fever, one of the greatest scourges of youth, may likewise be unconsciously imbibed.

For years it was supposed that tuberculosis was a hereditary disease only. Now we know it is contagious, and is propagated by parasites. These parasites are occasionally found in the milk of tuberculous cows, and as it is extremely difficult, at times impossible, to know whether a cow be diseased or not without killing the animal, the danger of catching disease from milk becomes a menace. Condensed milk fortunately supplies the need, and it can be

recommended by dealers with the double satisfaction that it conforms to the latest medical opinion, and is besides a profitable article to deal in.

The facts which have been appearing in these columns lately on the subject of disease germs in milk, ought, apart from even commercial conditions, to be widely diffused, and grocers who read them would do well to draw the attention of the newspaper editors in their localities to what constitutes a great modern medical reform.

A BRISK TRADE EXPECTED.

"The coming season's foreign business in transportation promises well," said a prominent Montreal railway official to THE CANADIAN GROCER. "The fleet of vessels already reported inward is large, much larger than last year, and the outlook is for greater trade." "Which means an increase in both exports and imports," he was asked. "Yes, I think you will see a brisk summer's business. The tonnage record in the port of Montreal will be high. But rates are low. Business ought to be good, a distinct revival, in fact."

THE AVLONA CURRANT CARGO.

Reference was made in THE CANADIAN GROCER a couple of weeks ago to the sailing of the s.s. Avlona with currants for Montreal. Advices received in Toronto this week state that she only carries one hundred tons of currants for Montreal. This is not sufficient to supply the regular demand till the new crop begins to arrive. It is therefore certain, as stocks are very small in the country, that further buying will take place from Patras. This means shipment by indirect routes and, consequently, higher prices.

FURTHER HONORS.

Notice has just been received by A. G. Gardner, manager for J. M. Douglas & Co., the Canadian agents for the whisky of John Dewar & Sons, Limited, Perth, Scotland, that Messrs. Dewar have just received the diploma of honor for their Scotch whisky at the Brewers' Exhibition, Manchester, adding another highest award to their present list of thirty gold and prize medals.

A NEW CORNMEAL.

E. D. Tillson, of Tilsonburg, Ont., who has long been known as one of the most progressive manufacturers of the country, is with his usual enterprise now putting upon the market a new cornmeal which he calls "Gold Dust." For some time Mr. Tillson has been dissatisfied with the product of his corn mill, and has been quietly

at work to put upon the market a cornmeal which would equal in quality his other cereals. He says he has been at it for over six months, changing one machine after another, always experimenting and comparing his products with those of the best American goods, but until this week he was not satisfied with his work. The new meal is of a bright, clear, golden color, almost free from spots, and should find favor with the trade.

MAKING BUTTER FROM WHEY.

An interesting bulletin, just issued by Cornell University Agricultural Experiment Station, describes a new process of making butter from whey. It is a well known fact that in the process of cheese making a small percentage of fat escapes in the whey. The Cornell experts were led to believe that this fat could be utilized in the form of commercial butter. "Accordingly, January 18, 1895," the bulletin says, "we began to run the whey from the cheese making regularly through the separators, and we have been successful in securing a large proportion of the fat in the whey in the form of commercial butter of good quality. This butter has been scarcely, if any, inferior to that made from cream separated from the whole milk, and it has been printed and sold in the same market with our best butter." Good judges who have seen the two kinds of butter side, by side have been in some cases unable to detect which was made from whey and which from cream.

A MAGNIFYING SHOW WINDOW.

One of the most extraordinary devices for attracting custom on record was that of a fruiterer in a midland town. Instead of the ordinary plate glass a large number of rough and magnifying glasses formed the window. Seen through one of these panes an orange looked as large as a pumpkin and cherries as large as apples. A great disadvantage attaching to the novelty was the fact that at the distance of a few yards from the window it was quite impossible to see into the shop. Everybody knows that you must hold a magnifying glass very close to the eyes to see anything through it. Nevertheless, for some time, at all events, the enterprising proprietor did a roaring trade.—London Answers.

LATE BUSINESS CHANGES.

The grocery stock of W. T. Willis, Brantford, Ont., has been sold.—Thos. H. Cheer, grocer, Brighton, Ont., has sold out to Caleb Tompkins.—F. G. Ball, general store, Cedar Springs, Ont., is giving up business.—W. S. Collins & Co., wholesale and retail produce, Toronto, have assigned

to R. Tew.—A. Fisher, grocer, Wallaceburg, Ont., has sold out to D. Dobie.—Siegrist & Lyne, grocers, etc., Warton, Ont., have dissolved. They have been succeeded by Lyne & Co.—Stewart Munn & Co., commission merchants, Montreal, have dissolved, and a new partnership has been registered composed of Stewart Munn and Stewart Munden Munn, style unchanged.—Robert & Mercille, grocers, Montreal, have dissolved.—Walter Townsend and Alma Simmons have been registered proprietors of Walter Townsend & Co., general store, Montreal.—O. Lasalle is opening a general store at St. Jacques L'Achigan.—Adelard Raymond, general store, St. Stanislas De Kostka, Que., is offering to compromise at 25c. on the dollar.—C. J. Robson, fruit, New Westminster, B.C., has assigned.—Noe Morrisette and Benjamin Pothier have been registered proprietors of Morrisette & Pothier, cheese factory, Ste. Gertrude, Que.—J. Dick, general store, Findlay, Min., has been granted an extension.—F. J. Lawlor, general store, Killarney, Man., is offering to compromise at 50c. on the dollar.—Wm. Middleton, general store, McLeod and Namaka, Man., has assigned to V. J. Beaupre, Gleichen.

A VITAL MATTER.

THE American Grocer says: In this specialized age the trade newspaper has become an institution. In each of the principal trades and branches of commerce there are one or more technical publications which are justly entitled to the name of "newspaper." There are many more which are masquerading as such, which are not. They have few or no paid subscriptions, as little editorial staff, publish no valuable original matter, and are simply the cover for the circulation of some private price list, or are advertising freebooters backed by some commercial house. Many of them copied the former make-up of The American Grocer, which advertised the price list of a prominent house (charging its full rates therefor), and they claimed the same privilege in the mails as a legitimate paper which pays thousands of dollars for valuable original matter.

"If an advertisement appears in a legitimate newspaper they at once apply for it, backed, perhaps, by the patronage of the house whose price list they publish free or at a reduced rate, in consideration of its ownership or influence in getting 'ads.' The buyers of such houses get 'commissions' on all 'ads' 'influenced,' and in due course it gets loaded up with goods it does not need, and which ultimately are sold at a loss. Advertisers get no value, because the so-called newspapers have no regular paid circulation, but little free circulation, and are not read and have no influence if taken out of their wrappers.

Five thousand distributors who read and value the publication they pay for are of more value to an advertiser than fifty thousand who receive a free publication, whether a circular or a so-called 'newspaper.' The opportunity to reach the minds of 5,000 paid readers, buyers and distributors is worth a great deal to a manufacturer of meritorious goods. Through the co-operation of sixty-five millions of people a manufacturer can thus transmit, at nominal cost through the post office, a message at a rate of speed that a monarch, with all the resources of empire at his command, could not excel, and have it considered at a time when the receiver has leisure. A circular usually goes into the waste basket, as does also a free newspaper; but if a person thinks enough of a newspaper to pay for it, he preserves and reads it.

"It is clear that the time has arrived for advertisers to draw the line between real and bogus trade newspapers. We have advertisers of twenty-five years' standing who do thus draw the line and decide between legitimate advertising and house price lists. It is a question whether the proprietors of house price lists masquerading as newspapers would not do better, on the whole, to legitimately advertise their wares in legitimate newspapers which give value in advertising."

If this is all our contemporary has to complain of he is lucky. The papers in Canada which come under the above class are edited weekly with a scissors, pastepot and a copy of THE CANADIAN GROCER. Circulation—about 200. Still they have advertisers. What kind of advertisers? The advertisers who say it "don't pay" to advertise.

THE BEET SUGAR CROPS.

Referring to European beetroot crops, Willett & Gray have the following: "What the reduction in sowing will amount to is yet difficult to say. Austria is disposed to make quite a decrease, provided the beet raisers can be assured that the reduction made will not be taken advantage of by Germany to make a corresponding increase. Five to 7½ per cent. general decrease seems now to be the nearest 'guess' that can be made. This would reduce the crops 250,000 tons to 500,000 tons under average season's weather, and be quite sufficient to cause an improvement in the situation. The last news about the weather is not very favorable. In Russia it is cold again, and an average temperature is given of about five degrees below zero. In most of the other states the rivers are navigable again, and especially in France the farmers began to sow the beetroots. From Germany come complaints about too much rain, which badly affects the work in the field, and causes, together with the melting snow, the soil to be too wet to be prepared for sowing. In Austria the weather is more springlike, and the contracts between manufacturers and beetroot growers are signed one after the other."

THE FOAM YEAST CO., LTD. TORONTO.
79 Esplanade.

RICE.

There is only a limited demand for rice, and the market rules quiet, but prices are well maintained. Mill quotations on lots are as follows: Japan standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

The situation of the spice market is much the same as it was. Business is of moderate volume, and the tone, especially on pepper, is distinctly firm. In lots Penang has sold at 6½ to 7½c., and it is possible that nothing above a very poor stock can now be had at the inside figure. We quote jobbing prices: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

The coffee market has not exhibited very marked activity. The firm feeling that has been noted previously is fully maintained, Maracaibo especially showing a marked tendency in this direction, and sales of round lots have been made at an advance of ½c., at 21 to 22½c. Rios, also, and Javas have been moved in lots at steady prices. In a regular way we quote green coffee in bags as follows: Maracaibo, 21½ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

The tea market during the past week has been rather quieter than it was for the two previous ones. Reports from travelers seem to indicate that dealers in the country are well supplied for some time now, and not anxious buyers, while between the trade on spot little activity is to note, except the movement of some further lots of low grade Japans and pea leaf gunpowders, which are growing scarcer as time passes. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUIT.

There is absolutely no change to note in Valencia raisins since last report. Business rules quiet and prices steady, and dealers do not anticipate much change in the demand for a week or so yet. We quote: Off stalk, 3½ to 4½ as to grade, and layers 5 to 5½c.

In California raisins some good sized lots have been placed with jobbers here at firm figures laid down, but the jobbing demand is quite as dull as in the case of Valencias. We quote: 4-crown loose Muscatels, 6¾ to 7c., and 3-crown do., 5½c.

The currant market exhibits no change. Business rules quiet and prices steady. We quote: Filhatras and Provincials, bbls., 3½c.; cases, 4 to 4½c.; Patras, 5 to 5½c., and Vostizzas, 7 to 7½c.

The prune market is firming, as it will cost more to lay down fresh supplies than the inside figure quoted on stock on spot. This applies to European brands, and the feeling is equally firm in California stock. We

Of the purest and best description, manufac-
tured from the celebrated Norfolk County
apples—the finest flavored fruit in Canada.
Prices very low. Send for quotations to

THE DOVER VINEGAR WORKS

PORT DOVER, ONT.

MONTREAL MARKETS—Continued

quote : Bordeaux, 4 to 4½c.; Bosnia, 4½ to 5c.; California, 8 to 9c.

There are practically no figs here. A few jobbers have got small lots, which they are jobbing in a small way at 12 to 13c. per lb. in boxes.

Dates continue quiet and unchanged at 3½ to 4c.

The dried apple market is quiet. Supplies are limited, however, and prices firmly held at 6 to 6½c. The same can be said of evaporated stock, which, in fact, has been advanced to 7½ to 8c.

NUTS.

Business in nuts continues quiet, and prices generally are unchanged. Shelled Grenoble walnuts are rather scarce and firmer at 25 to 26c. We quote : Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 13 to 14c.; shelled ditto, 25 to 26c.; filberts, 7 to 8c.; and pecans, 9 to 11c.

CANNED GOODS.

The offers of canned salmon referred to a fortnight ago it transpires were not new pack, but old fish which had been carried over on the Coast. No offers on new pack have been spoken of yet, and the market generally is quiet on all kinds of canned stock. We quote : Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.10 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 95c. to \$1 per doz.; marrowfat peas, 90c. to \$1 per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, 90c. to \$1.10.

GREEN FRUIT.

APPLES—The apple market is quiet and unchanged, at \$3 to \$5.50 per bbl.

ORANGES—There has been a good demand for oranges during the week and values have ruled rather firmer on Valencias, sales taking place at an advance of 25c. We quote : Valencias, \$4 to \$4.50; Messinas, \$2 to \$3; ditto, bloods, \$3.50 to \$4.50; Californias, \$1.50 to \$3 per box, and Jamaicas, \$7 to \$8 per bbl.

LEMONS—The lemon market is firm but quiet. No fruit could be had here this week under \$3, which is an advance of 50c., and we now quote \$3 to \$3.50.

BANANAS—The banana market has ruled firmer under lighter receipts, and prices are strong at this writing as follows : No. 1, \$2.50 to \$3, and No. 2 \$1 to \$1.50.

COUNTRY PRODUCE

EGGS—This market has steadily declined since last report under increasing receipts, and prices are now 1½ to 2c. per dozen lower than they were, at 11½ to 12c. Demand is very limited, buyers only taking what they actually need for immediate wants. In fact prices tend still lower.

MAPLE PRODUCTS—There is a fair demand for maple sugar and syrup. With the advance of the season, however, and larger receipts, prices are 5c. per gallon lower on syrup and 1c. per lb. on sugar, as follows : Syrup, 50 to 60c. per gallon tin; sugar, 6 to 7c. per lb.

BEANS—Continue steady but quiet, at \$1.50 to \$1.60 for hand-picked and \$1.25 for inferior grades.

HOPS—Quiet and unchanged at 5 to 8c., as to quality.

HONEY—There is no change. We quote : Extracted, 7 to 9c. per lb., and comb stock, 10 to 13c.

ONIONS, DOMESTIC—There is a rather easier feeling in domestic onions, which have sold as low as \$1 to \$1.50 per bbl. this week.

ONIONS, IMPORTED—Egyptian onions are selling steady at 2c. per lb., and Bermuda \$2.50 to \$3 per crate.

POTATOES—The feeling in potatoes has ruled easier. Car lots on the track have realized 75 to 80c., and in a small way we quote 90c. to \$1 per bag.

FLOUR AND MEAL.

There is an active demand for both Ontario and Manitoba flour. Buyers seem very anxious to secure large supplies, as millers state a number of them want to place orders for future delivery. The tone of the market is very strong in sympathy with wheat, and higher prices are anticipated in the near future; in fact, dealers in Ontario grades are firmer, and \$3.50 was the inside figure for straight roller and \$3.10 for extra. We quote : Winter wheat, \$3.60 to \$3.75; spring wheat, patents, \$3.75 to \$3.90; straight roller, \$3.50; straight roller, bags, \$1.65; extra, \$3.10; extra bags, \$1.55; superfine, \$2.70; Manitoba strong bakers', \$3.75.

The demand for feed is good and the market is fairly active and steady. We quote : Bran, \$18; shorts, \$19; mouillie, \$23 to \$24.

The feeling in oatmeal is easy in sympathy with oats, but no actual decline in prices has taken place yet. The demand for small lots is fair. We quote : Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

PROVISIONS.

There was no important change in the local provision market. The feeling is steady and values are sustained. The demand for small lots is fair, but on the whole the market is quiet. We quote : Canadian short cut, clear, \$16 to \$16.50; Canadian short cut, mess, \$17; hams, city cured, per lb., 9 to 10½c.; lard, Canadian, in pails, 9 to 10c.; bacon, per lb., 9 to 10½c.; lard, common, refined, per lb., 7 to 7½c.

CHEESE AND BUTTER.

There is no improvement in the cheese market. Business is very dull and prices are nominal in the absence of anything on which to base quotations. A fair range is 9½ to 9¾c. for old cheese and 9c. for new fodder makes in a jobbing way. The exports from Montreal for the week ending the 20th are 12,066 boxes, as follows : 3,514 to Bristol, 2,660 to London, and 5,892 to Liverpool.

The butter market continues dull and unchanged. A small jobbing trade is doing in late made creamery and dairy on local account. We quote : Fresh made creamery, 19 to 20c.; old creamery, 10 to 12c.; Townships dairy, 17 to 18c.; Morrisburg and Brockville, 16 to 17c.; western, 15 to 16c.; old dairy, 6 to 10c. There were exports of 175 packages of butter to Liverpool last week.

ASHES.

The tone of the market for ashes is steady, but business continues dull on account of the light offerings. We quote : First pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6 to \$6.10 per 100 lbs.

MONTREAL TRADE NOTES.

Mr. A. P. Tippet, of A. P. Tippet & Co., is away on a business trip.

The s.s. Dracona, according to cables, is now completing her cargo with oranges and lemons at Messina.

Green Maracaibo bean coffee has stiffened in tone this week sales being noted of round lots at an advance of ½c at 21c.

The consensus of opinion here is that the stock of tea on spot is very much lighter than it was at the same period last year.

L. A. Bowin, of Mogenais, Bowin & Co., wholesale grocers, has been elected to a seat on the Council of the Montreal Board of Trade vice the late Geo. Childs.

Ewing, Herron & Co., have had a busy week of it in spices. They sent forward a shipment to Quebec on Tuesday comprising fully 10 tons of goods.

W. D. MacLaren & Co., makers of the Cook's Friend, report a good many orders this week from Ottawa and Quebec. Shipments for Quebec will await the first vessels down the river.

There have been no offers on new pack canned B.C. salmon yet this spring. The offers of goods to arrive noted previously were not new pack, but old pack, which had been carried on the coast.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., April 25, 1895.

BUSINESS, though active, is not what can be called good. Money is not as plentiful as it should be. In fact, the want of it is much felt, and there is a corresponding slowness of payments. But there is little or no uneasy feeling as regards ultimate payments. At Indiantown, where the bulk of the river business is done, the scene is a busy one. The freshet is nearly over, the water having begun to go down. The steamers are all on the move and once more the whole town is active. In markets, except in butter and cheese, the tone is very firm, and in many cases prices are higher. In teas there is a fair business doing at easy prices. Those who buy direct, and a very large quantity is now bought that way, have sent most of their orders in. The agents for English houses find the direct business having a marked effect upon their sales, though they believe not always to the advantage of the buyer.

OIL—The merchants here were not expecting the sharp advance of the last two or three weeks, so that stocks were light and profits are not what they might have been. An advance in crude oil is not always followed by a corresponding advance in refined, but this time, perhaps for reasons best known by the Standard Oil Co., the advance in refined has been very marked. Canadian is higher, though the advance is not as much as in American. Though prices are very firm, there is a feeling of uncertainty as regards the high prices holding. We quote : Burning oil, American, 24½ to

25 1/2c.; best Canadian, 21 to 22c.; second, 17 to 18c.

SALT—Demand light with fairly large stocks. Prices easy. There are two large cargoes shortly expected. Some vessels which it was expected would bring salt are not doing so on account of the low freights offered, so that the feeling is rather better than it was. The cost price of salt is more affected by the amount of freight paid than by any other cause. We quote: Coarse, to arrive, 43 to 45c.; out of store, 50 to 55c.; fine factory filled, 95c. to \$1.10; 5 lb. bags, \$3 per bbl.; 10 lb. bags, \$2.80 per bbl.; 20 lb. boxes, 20c.; 10 lb. boxes, 12c.; cartoons, \$2 per doz.

CANNED GOODS—During the past week there has been some movement both in and out, but the trade cannot be called particularly active. Vegetables and fruits show no change, vegetables showing the best demand, and tomatoes the firmest price. Oysters continue to show firmness, though prices are not changed. Beef, as noted, is an object of interest. Price is firm at the advance, and tendency is higher. Some good sales are reported and more Canadian is noticed in the market than for some time. We quote: Corn, 95c. to \$1; peas, 90 to 95c.; tomatoes, \$1 to \$1.05; corned beef, 2 lb. tins, \$2.70 to \$2.80; 1-lb. tins, \$1.65 to \$1.75; oysters, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.70; 2's, \$1.90 to \$2; lobsters, \$1.75 to \$2; haddies, \$1.40; salmon, \$1.30 to \$1.40; flat, \$1.65; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—The market is very dull, there being but little demand. There is some small movement in currants, but raisins are very quiet. In California evaporated the movement is light, not many wholesale grocers carrying stocks. The business is hurt by the selling of these goods by some agents direct to the retail trade at wholesale prices. Dried apples are rather firmer than evaporated in this market owing to light stocks. A few Bermuda onions arrived by the last steamer, but owing to the high price the demand is not extra. We quote: Sultana raisins, 6 to 7c.; Valencia, 4 1/4 to 4 1/2c.; layers, 5 1/4 to 5 1/2c.; London layers, \$2.10 to \$2.25; California loose muscatels, 5 1/2 to 6c.; currants, bbls., 3 1/2 to 3 3/4c.; half-cases, 4 to 4 1/4c.; evaporated apples, 8 1/4 to 8 1/2c.; dried apples, 5 3/4 to 6 1/4c.; dates, 4 to 4 1/2c.; prunes, 4 1/2 to 5 1/2c.; figs, 11 to 18c.; Bermuda onions, \$2.50 per crate.

GREEN FRUIT—Dealers are now very busy. For what few good apples there are in the market there is a fair demand at a good price. The only other green fruits are bananas, in which the business is now increasing from week to week. In oranges a great many kinds are now offering at low figures, but still the Floridas are much missed. Lemons are firm; nuts show no change. Prices are: Apples, best, \$2 to \$3; seconds, \$1 to \$2; Valencia oranges, \$4.25 to \$4.50; large, \$5.50 to \$6; Messina, \$2.75 to \$3; California seedlings, \$1.75 to \$2.75; navels, \$3.50 to \$4.50; bloods, \$2.50 to \$2.75; lemons, \$4 to \$4.50; bananas, \$1.50 to \$2.25.

DAIRY PRODUCTS—There is nothing active but eggs, which are very scarce. Retailers have had to advance their prices, and their profit on eggs for some few weeks has been very light. With the weather as it is there will soon be plenty and prices will drop back. Butter is very dull, but prices cannot go much lower. It is a question of finding a demand. Real good butter is

showing rather better value and demand than last week, but is still some four to five cents below last fall's prices. Cheese is hardly as firm, there being a few still in the country to come forward. During the past week a small shipment was made from here to England. The West India market is very dull. Prices are lower here than west. We quote: Creamery, 17 to 18c.; dairy, 15 to 16c. Cheese, 10 to 10 1/2c. Eggs, 14 to 15c.

MOLASSES—This has been the principal interest of the week. Although the West India steamer had about a thousand packages for here, the market was so bare and the demand so active that a number of the importers did not have enough on hand to fill their orders. A quantity changed hands among the jobbers at very little over cost, and in all cases prices were lower than the market warranted, but such is the desire to do business that this is often the case. Until the goods are gauged the cost is uncertain, and one importer had four empties. The market in Barbadoes is higher than when it opened, having advanced a cent, and many think that the price will not be lower. The quality this season is hardly as good as usual. Some St. Croix is being offered low. There has been quite a quantity of Porto Rico arrive here via Yarmouth. It is a very nice molasses. The stock here is now very light, with prices firm. There is a small cargo due here in a few days by sailer. Syrups find light demand. We quote: New Barbadoes, 28 to 30c.; St. Croix, 27 to 28c.; Porto Rico, 33 to 34c.; syrup, 33 to 35c.

SUGAR—Demand fair. Prices slow. No change, though market is firm and prices are not expected to be lower. Stocks held and to arrive are large. We quote: Granulated sugar, \$3.50 to \$3.60; yellow, 2 3/8 to 2 3/4c.; Paris lump, 4 3/4 to 5c.; pulverized, 4 1/4 to 5c.

FISH—In all lines the market is rather easier. Dried are in fair demand, but the demand for pickled is light and smoked herrings are very dull. The principal interest is in finest gaspereaux. Large quantities are now being caught. Some are sold fresh, but a larger number are smoked, and quantities of them are shipped to the States, where they bring fair prices. The larger number of these fish are salted and packed in barrels and called alewives, some 15,000 to 20,000 bbls, being put up in a season. It is hoped prices of these will be better than last year. Halibut continue to arrive in small quantities, as do lobsters. We quote: Cod, \$2.80; large \$4; small, \$3.25; pollock, \$1.70 to \$1.80; bay herring, \$1.40 to \$1.50; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; Canso, \$5; smoked herring, 7c.; Digby chickens, 10 to 12c.; halibut, 9c.; gaspereaux, 60 to 65c.; smoked, \$1.

PROVISIONS—Show fair demand. Canadian packers have advanced plate beef. All lines are very firm, particularly beef. We quote: Clear pork, \$18.50 to \$19; mess, \$16.80 to \$17; prime, \$13 to \$13.50; extra plate, \$14 to \$14.50; plate, \$13 to \$13.50; pure lard, 9 1/2 to 10c.; compound, 8 1/2 to 9 1/2c.; cottolene, 9 1/4 to 9 3/4c.; hams, 11 to 12c.; rolls, 9 to 9 1/2c.

FLOUR, FEED AND SEED.

In flour, prices, contrary to the expectation of a great many continue to advance, that is Ontario grades. Manitobas show little change. They are now much cheaper in proportion than Ontario, and stocks bought and to arrive are fairly large. It is not expected Ontarios will be lower before another harvest, the millers not being able to get

SOLD BY GROCERS EVERYWHERE.

WALTER BAKER & CO.,
DORCHESTER, MASS.

ST. JOHN MARKETS—Continued.

the wheat. The price cannot yet be called high. In outside markets the advance is much less. In feed-flour the demand is not large. Middlings though firm show no advance during the past week. Oats are rather easier. There are only Ontario in the market. Beans continue firm at the advance. In seeds the demand is good, large shipments going forward. Some lower qualities are offered rather under the market. We quote: Manitoba, \$4.50 to \$4.60; best Ontario, \$3.90 to \$4.00; medium, \$3.60 to \$3.75; oatmeal, \$4.25 to \$4.30; cornmeal, \$2.85; middlings, \$24 to \$25 on track; bran, \$22.50 to \$23.00; hand-picked beans, \$1.90 to \$1.95; prime, \$1.80 to \$1.95; split peas, \$3.70 to \$3.90; pot barley, \$4.00 to \$4.25; hay on track, \$9.00; timothy seed, \$3.25 to \$3.50; red clover, 11½ to 12½c.; Alsike, 11½ to 13c.; buckwheat, \$1.40.

ST. JOHN MARKET NOTES.

The brig Boston Herald is in St. Stephen with Barbadoes molasses for C. H. Clerke.

Alex. Gibson is, it is said, interested in the shingle and pulp mill, which is to be built at Briestown.

John Sealy received by the last West India steamer a consignment of Bermuda onions.

Among the imports by the Taymouth Castle were 100 bags of cocoanuts for Theo. H. Estabrooks from Trinidad.

C & E. Macmichael received by the last English steamer a shipment of Orlando Jones' "Cream" starch. This brand is particularly adapted for doing up curtains.

Both in this province and in P.E.I. extensive preparations are being made for the putting up of a large quantity of canned

lobsters, one firm alone having 3,000 traps on a strip of seven miles of coast.

Geo. Robertson & Co., will on the 1st of May move into the store lately occupied by Jardine & Co., where they will close out their retail stock.

Fred. R. Titus intends going with J. Harvey Brown, tea merchant, after the 1st of May. He will continue to hold his present agencies.

C & E. Macmichael have been appointed agents for Lyman's concentrated extract of

coffee. There is nothing better than it when a good cup of coffee is wanted at short notice.

The Furness line of steamers will make regular fortnightly trips during the summer between St. John and London.

A noticeable feature in the seed market here is the increase in the Canadian product sold from year to year.

The steamer is now running one trip a week between St. John and Grand Manan, leaving here every Tuesday at 9.30 a.m.

The "Average" Grocer

Who cares little or nothing about his reputation, or whether his goods give satisfaction or not, may get along for a while on cheap canned goods of an unknown brand. He can "work them off" on people who are not particular what they eat. But—

Those who are above the "average" and are interested in first-class stuff will find that the "Maple Leaf" canned goods fill every requirement and sell more readily the better they are known.

Delhi Canning Co.

DELHI, ONT.

WOODSTOCK, N.B., MARKETS.

WOODSTOCK, N.B., April 25, 1895.

With the prospect of the river opening and the steamer running between here and Fredericton, business is more active. It is said the expending of not a very large sum of money would enable the steamer to run the best part of the season. This would be a great advantage, both to Woodstock and along the river. The decline in the value of cheese and butter, the latter particularly, is much felt here, and purchasers are wishing they had allowed others to speculate. It is hoped the lesson will not be lost. Prices are: Loose hay, \$5 to \$5.50; butter, 15 to 16c.; eggs, 12 to 13c.; oats, 38c.; cheese, 9½ to 10c.; beans, \$1.50 to \$1.75; potatoes, 72 to 90c.; buckwheat meal, \$1.25; straw, \$3 per ton.

In Sussex, Kings county, the packing of pork is becoming an industry of importance. Last season one merchant handled 65 tons, while another handled 15 tons. The farmers around do not supply all the stock, but are each year giving more attention to it.

OPPORTUNITIES FOR SUCCESS.

WILLIAM MATHEWS, LL.D., author of "Getting On in the World," says, in an interesting article in The Golden Rule:

It is a common complaint in these days that there are no good opportunities now, such as there once were, to make money. Competition, men tell you, is so keen that the profits of business are small, while the risks of loss are many and large. To do a profitable business requires not only more brains, but a larger capital and intenser activity than ever before. Trade tends to concentration in fewer and fewer hands. The great houses are continually absorbing the small ones, or, by underselling them, driving them into bankruptcy. For every clerkship there are hundreds of applicants, which reduces wages so low that a young man who wishes to go into business by and by for himself can barely live, without laying up a dollar.

Now, while there is a certain amount of truth in this, we believe it to be enormously exaggerated. We think we could show, had we space, that for a man who is abreast with the age, and has mastered the latest and best modes of doing business, the present is in many respects the best time in the world's history to win an independence or a fortune. Instead, however, of showing the truth of this opinion, we will tell an anecdote.

About fifty years ago, we were chatting in a hotel in Maine with a shrewd old retired merchant over 80 years of age, who, beginning life a poor boy in a village in Kennebec County, Maine, had accumulated from \$800,000 to \$1,000,000—a sum equal, probably, to more than twice as much to-day.

"People," said the old man, "are always complaining that there are no chances

now to make money. Thirty years ago, they tell you, there were plenty of such chances; and, had you lived at that time, you would have heard the same croakings. I remember well that people then said that the days for acquiring fortunes had gone by—that the time for making money was just after the revolution; and I have no doubt that during this last period there were plenty of unsuccessful men who asserted that there was no profit in business—that the lucky men were those who lived a generation earlier. And so you might go back a hundred years, or more, and always you would hear from many persons the same despairing. Now, the fact is, Mr. Mathews," continued he, after pausing a moment to take a pinch of snuff, "that all times are good for making money, if you only know how; and if you don't know how all times are bad."

"But, Mr. G——," said we "suppose that a young man is a clerk in a store in Boston, with a salary of only \$200 a year, and he has to pay \$5 a week for his clothes and board; how is he to lay up any money? How is he to get a start in life, or find capital to go into any business for himself?"

"I don't undertake," replied the old man, in his shrill, low voice, "to say how it can be done; I only say that, if he has a will to do it, it will be done. But, instead of arguing the matter, I will tell you a story.

"About fifty years ago there was a poor boy in Maine, whose father, once independent, had lost most of his property by indorsing notes for friends, and lived in a log house. The boy used to pick strawberries and other fruits, and carry them two miles to a country village, where he sold them at 3 cents a quart.

"One day a firm of traders, thinking he had a turn for business, asked him how he would like to be one of their clerks. His eyes sparkled at the proposal, and on his saying that he would like the place, he was taken into the store. His salary for the first seven years was \$40 a year and board. For the next two years he received \$100 a year and his board. At the end of the nine years' clerkship his employers took him into co-partnership. How much money do you suppose he had at that time laid up?"

"Why," we replied, "if he had resembled some clerks that are employed to-day, he probably, if he could have got credit for such a sum, would have been about \$1,500 in debt."

"Well," said the old merchant, in a tone of triumph, "that is precisely the sum which he had laid up in clean cash. And now if you don't believe the story, I will tell you who the boy was. He was your own father, and I was one of the firm that employed him as clerk and finally took him into co-partnership."

Surprised at this revelation, and conscious that we had been floored by an argumen-

tum ad hominem, we were silent for a few minutes, and then added: "But the whole of the clerk's salary, Mr. G——, for the nine years, put at compound interest, wouldn't have amounted to the \$1,500 which you say he had hoarded."

"O," was the reply, "he kept his money turning over, of course. He fished at night in the Kennebec—caught and sold salmon, and dickered with the farmers, etc., etc. But he never neglected his employers' business. He was my partner for thirty years, and the only one I did not lose money by."

THE OUTLOOK IN BELLEVILLE.

Louis Benmore, one of Belleville's live grocers, was in Toronto last week. "Business," he said, "has been quiet, but it is picking up wonderfully well. A good many buildings are going up this season. We have a hotel second to none between Toronto and Montreal, and by September we expect to have our street car service converted into the electric system. Then of course we are looking forward to the summer carnival, which we expect will be much better than the one you had in Toronto a few years ago." Then he animadverted upon THE CANADIAN GROCER. "I think a great deal of THE GROCER. In fact, I owe my success partly to it, having from it obtained information on many points upon which I otherwise might have been ignorant. Your paper always arrives on time. I know when I go to the post office Friday mornings that I shall get THE CANADIAN GROCER if I get nothing else. I subscribe for many trade journals, but yours is the only one that I can say this about."

AN UP-TO-DATE COMPANY.

The E. B. Eddy Co. are always getting out something unique. Their latest attractive little fad is an "advertising match," which is a high grade parlor lucifer, done up a dozen in a package, with a parti-colored little ribbon attached to each for the purpose of drawing it from the box.

The Eddy Co.'s, newest thing is their electrically welded steel wire hooped woodenware, which allows the pail or tub to expand or contract without falling to pieces, no matter what the weather be.

Their new manilla box-shaped paper bags are also bound to attract a great deal of attention and patronage.

SALMON ON THE COAST.

Preparations are being pushed forward for the new season's pack at the canneries, all of which the owners intend to operate this year. It is believed that the preparations will be made for only a moderate quantity, as this is the second year since the last big run, which has occurred every fourth season on the Fraser River and is expected again in 1897 —B.C. Commercial Journal.

COMPLAINT FROM VALLEYFIELD.

Mr. Marchand, of Valleyfield, is in Montreal this week, as the spokesman of the merchants of that town, to secure a better train service with Montreal. There are 40 to 45 merchants in Valleyfield, and they do a good deal of their business with Montreal, but are put to inconvenience in reaching the city. There is only one train per day each way, leaving the town at 6.10 a. m., and leaving Montreal to return at 4 p. m., while a change of cars has to be made at a junction where long stops occur. Co-operation is sought from the merchants and Boards of Trade in Montreal to secure a better service from the Grand Trunk.

TORONTO'S BIG PREVARICATOR.

A traveler was in the north a few days ago, and offered a grocer new maple syrup.

"Why," said the grocer, "how can you sell it this time of the year?"

"Oh," replied the C.T., "our company has a maple bush near Toronto. It is lit up with electric lights, and that affects the sap just the same as the sun does."

The grocer bought. Half an hour afterwards he caught sight of the C.T. passing his store. He called him in, and, taking him by the lapel of his fur coat, said: "You are the biggest liar that comes out

of Toronto, and I am the biggest fool in Wiarton. What do you drink?"

This is a fact. It is scarcely necessary to say the C.T. is an Irishman.

EDDY'S MATCH GIRL.

The girls in the E. B. Eddy Co.'s match factory at Hull, P.Q., evidently are well disciplined. The other day the Governor-General, during his visit, enquired of one of them in English if the fumes from the matches did not affect her bronchial tubes. She replied, "comprend pas." Then His Ex. repeated the question in good French, to which she replied in the mother tongue, "The foreman will furnish you with all necessary information." The Governor-General enjoyed the situation, and subsequently remarked to Mr. Geo. Millen: "I fancy she took me for an inspector."

CANADA'S FISH SUPPLY.

Few realize the wealth of the Canadian fisheries, which in 1894 netted the country in exported fish the sum of \$11,412,281, against \$8,941,357 the year before. The values of the various kinds in 1894 were: Codfish, \$3,423,701; salmon, \$2,602,588; lobsters, \$2,361,250; mackerel, \$496,800, and herring, \$486,801. The inland fisheries are likewise priceless, and the exports in

1894 of lake trout and other fresh fish amounted to \$837,120. When Newfoundland comes in the fish possessions of Canada will be the richest in the world.

SHIP EGGS WHILE FRESH.

In a circular to the trade this week D. Gunn, Flavell & Co., Toronto, seek to impress upon country merchants the necessity of forwarding eggs to the packers while fresh. The circular reads, in part: "In this city last summer, thousands of dozens of eggs were sent to the dump, and tens of thousands of dozens were almost useless because they reached market too old. Our chief market now for eggs is Great Britain, and it requires care and skill to overcome the distance and land the eggs in good order; but all the care and skill is vain if the egg is not fresh when it reaches the packer."

QUEBEC GROCERS' CLERKS.

The grocers' clerks of the city of Quebec paraded the streets on Thursday last to press upon the attention of the public their claims for early closing. This parade was all right so long as it was conducted in an orderly manner, but it is to be regretted, if reports are true, that some of those who joined in the procession became unruly and broke a number of windows in the stores of those employing grocers who have been most strongly opposed to the clerks' demands.

TRADE CHAT.

CANADIAN tobacco manufacturers sold last year 10,692,940 cigarettes in the country and exported 10,283,180.

Last year 762,548 gallons of vinegar were manufactured in Canada.

The Brackman & Ker Milling Co., of New Westminster, B.C., have decided to establish an oatmeal mill and elevator at South Edmonton, Alta. Construction will be proceeded with as soon as the lines are perfected. T. W. Lines has been admitted into the firm and will manage the business at Edmonton.

A Rapid City (Man.) despatch says : R. S. Armstrong has returned from Toronto, where he purchased from J. & G. Greey the machinery for the Hamiota roller flour mill and elevator. The firm, consisting of Mr. Armstrong and Mr. G. A. Basler, will commence the erection of a mill at once, and expect it will be complete and ready to work about midsummer.

BOATS TO PORT STANLEY.

London, Ont., is evidently intent on showing its appreciation of the steamship service to be inaugurated within a few days between Port Stanley, Toronto and the Lower Provinces. The service, it is understood, is to be run under the auspices of the

Merchants' Line, which has heretofore operated between St. Catharines, Toronto and Montreal. The two boats to be put on are, however, to be operated nominally, at any rate, by the City of London Merchants' and Manufacturers' Steamship Company. The McClary Mfg. Co. have already on the wharves at Port Stanley, ready for loading, a trial shipment of 60 tons of tin plating for Toronto and other points. It is expected a considerable saving in freight will be effected, and, if so, the new line will undoubtedly have considerable patronage. The first boat, it is said, will sail east on May 2nd.

A PROMISING BOY.

A sharp snip of a boy went into the office of a business house on Jefferson avenue and delivered a note to the manager. He read the note and looked the boy over.

"Your father," he said, "says you want to go to work?"

"I've heard him say that a good many times," responded the boy, carelessly.

"Is that so?"

"Yes, sir."

"Well, that's what he has written in this note."

"Did he write that?" asked the boy, in considerable surprise.

"Of course."

"And sign his name to it?"

"Certainly. Look for yourself," and the

puzzled manager handed the note over to the youngster.

He read it over carefully and noted the signature.

"Well," he exclaimed, "I wouldn't at
thought the old gent would a-done it."

"Done what?" asked the still more puzzled manager.

"Put his name to that, of course," replied the boy. "It ain't so bad," he continued, "when a boy tells what ain't so, but when he puts it down in black and white and signs his name to it, it's about time he was having somebody to watch him."

Then it began to dawn on the manager, and he took the lad in and though he never did want to work he was always strictly honest, which is not to be sneezed at in these days of modern methods.—Detroit Free Press.

HE COULD NOT HEAR.

A gentleman the other day employed a carpenter to partition off a part of his study and particularly instructed the workman to make the partition sound-proof. The carpenter declared that he could do this effectually with a filling of sawdust. When it was finished, the gentleman stood on one side and called to the carpenter on the other : " Can you hear me, John ? " " No, sir ; not a bit," was the prompt reply.

MONTREAL GROCERS.

At a special meeting of the Montreal Wholesale Grocers' Association the following resolution was unanimously adopted, on the motion of Mr. Wm. Kinloch, seconded by Mr. H. Laporte :

That the Montreal Wholesale Grocers' Association has learned with profound sorrow of the death of its president, Mr. Geo. Childs, who by his long and honored connection therewith won for him the highest respect of its members; that Mr. Childs' services to the Association, dating as they do from its origination, have been continuous, hearty, and contributed largely to its success, and the vacancy created by his death will long be felt, and most difficult to fill; that as the head of one of the oldest wholesale grocery houses of this city, he won from all who came in contact with him the highest regard, his upright and unblemished character, kindly disposition, and charm of manner endearing him to all his business associates, by whom his death is most sincerely mourned, and by whom his memory will be affectionately cherished; that the Association tenders its sincere sympathy to the family of the deceased gentleman in their great loss.

THE BUTTER SITUATION.

UNSATISFACTORY indeed is the butter situation. In Toronto and the west it was probably never worse. At any rate, stocks in Toronto are asserted by old dealers to be larger than ever before at this time of the year, while that stocks in the country are congested may be gathered from the letters that holders are continually dropping to possible buyers.

In Toronto alone, from what THE CANADIAN GROCER can gather, the commission houses are holding between five and six thousand packages of butter, which in weight would represent a quarter of a million or more pounds. This, too, is practically all old butter. Much of this butter holders would be glad to take as low as 6c. per pound for, while if it had been marketed some months before it was, a fair price would have been realized.

We know of creamery for which 18½c. was bid early last fall, but which sold for 6½c. per pound less a few months later, and of dairy for which 15c. was bid, and which holders would be glad to take less than half for to-day. We hear of one house that has from 8,000 to 10,000 pounds of roll butter which it would like to dispose of at from 10 to 12c. per pound.

In spite of the stocks of butter on hand, deliveries of roll butter are free, and butter will be coming in still more liberally in a week or two, when the grass butter season opens.

Wherein is to be found the remedy for the present congested state of affairs is the question that is now agitating the minds of butter dealers. There is no hope in the British market for the class of butter that is now filling up the warehouses and cellars of country merchants. As an experiment, one Toronto house some three months ago sent a small consignment of twenty-five tubs to Glasgow, and there it still lies.

As long as so much old butter remains on the market, poor as the bulk of it may be, the price of the new season's make must be injuriously affected.

The only remedy in sight, as far as we can see, is for holders, both in country and city, to sell out the poor butter they have at the price usually obtaining for the grease article. It is understood that a market can be found in Germany for this kind of butter at a price, where it is wanted for greasing wools.

"IT WORKS TO PERFECTION"

So writes A. McKenzie, of St. Thomas, in reference to a recently purchased Computing Scale.

Here is his letter in full :

PALACE GROCERY, ST. THOMAS, ONT., Oct. 4, 1894.

MESSRS. MILLS & CO., CHICAGO :

Dear Sirs,—The Computing Scale purchased of you works to perfection. I am more than pleased with my investment, and could not be persuaded to part with mine if I could not get another. I heartily recommend it to all doing a retail business.

Yours very truly,

(Signed) A. MCKENZIE.

Just think of a scale that makes all your calculations for you! Don't you think it would save you a lot of worry and trouble—to say nothing of dollars?

25 Double Sheets in a
box, 15 boxes in a case.

Retails for 30 cts. a box
Costs \$2.50 per case

PROFIT Eighty per cent.

WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

Notwithstanding the reduction in price the quality is improved in general. The paper is a little stronger, a little stickier, and will remain sticky a little longer.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, MAY 3, 1895

(\$2.00 per Year) No. 18

DROPS FROM THE EDITOR'S PEN.

Advertising, to be profitable, must be truthful, prominent and permanent.

* * *

'Commercial travelers, how shall we treat them?' asks a contemporary. Why, with respect, of course.

* * *

A Toronto baker was arrested the other day for "raising" a disturbance. He was evidently too liberal with the yeast.

* * *

While it is advisable for the grocer to preach about his goods he should see to it that he does not preach to his customers.

* * *

Commercial travelers are great talkers, but they are great information bearers, too. Listen to them now and then. It will pay you.

* * *

"There is one thing I do not like," remarked the pessimistic merchant. "These returning good times will induce people to go into business."

* * *

Trout fishing is in order after May 1. Travelers' stories of wonderful catches and bounteous feasts of the speckled beauties will also be in order after that date.

* * *

While some business men are too slow, others are too energetic. They have time for nothing but shop; and their end is dyspepsia, pessimism, and crankiness.

* * *

New York has a store 3 x 4 feet. Pittsburgh is said to have one still smaller. Small as these stores are, they are doubtless big enough for some of the people who enter them.

* * *

The Yankee is unique if he is anything. A New Yorker has started a schooner on a fishing and hunting trip to Florida, and the catch of both fish and fowl will be canned on board, all the necessary appurtenances having been provided. This is a new feature

in the canning industry, but whether it will become permanent is yet to be determined.

* * *

The "Quaker City" grocers have evidently not been waiting for the spirit to move them, but they have been moving the spirit. The hint to merchants in Canada is obvious.

* * *

Hon. Timothy Anglin has been appointed clerk of the Surrogate Court, Osgoode Hall. Someone will probably arise and remark that he has been angling for a Government appointment for some time.

* * *

The merchant when he advertises should, like the minister when he preaches, have something to say. He won't be heard if he has not. Neither must he say too much, for then people will not stop and listen to him.

* * *

Illinois proposes to tax bachelors. If the bill becomes law, many an old bachelor will be found burning the midnight oil, figuring whether it will be cheaper to avoid the tax by marrying, or pay the tax and remain single.

* * *

Maple syrup? Ah, that is the question—whether it is drawn from the succulent maple and boiled in the orthodox fashion, or through the bung-hole of the molasses barrel and treated with sundry ingredients to deceive the eye and the palate.

* * *

The Grocery World, in referring to an article which appeared in our columns recently urging business men to organize, says:

The Canadian Grocer should come to Philadelphia and look around a little. It would find that there is scarcely a more potent factor in pushing and shaping legislation to be found anywhere than the same business organizations which the journal mentions. * * * Almost every Legislature now in session has at least one bill before it fathered by grocers' organizations, and most of them will undoubtedly pass.

* * *

It is wonderful the difference there is between the value of some merchants' busi-

nesses when one is negotiating with a view to purchase, and when the said merchants are bemoaning the dulness of trade. Dollars are demanded where cents would have, apparently, sufficed before.

* * *

At Boston last week one Customs official ruled that a cargo of Newfoundland frozen herring was not subject to duty, while another ruled that it was, and imposed a tax of half-cent per pound. An effort is evidently being made to freeze out frozen Newfoundland herring.

* * *

"How shall the grocer invest his surplus capital?" queries a writer in an exchange. How shall he? Ah, that's the question. But, by-the-bye, have we not been given to understand that the grocer is so poor "that there is none to do him reverence." There is evidently a conflict of truth somewhere.

* * *

The advocates of municipal fire insurance may be termed foolish, but people are often impelled to foolishness by the lack of wisdom in others. If the Underwriters' Association had been wise in exercising the monopoly it enjoyed, advocates of municipal fire insurance would have been fewer than they are to-day.

* * *

Fire insurance is one of the innovations of civilization. But it would hardly be correct to speak of the merchant who does not insure as a barbarian any more than it would be to so term him who does not advertise. To be charitable one might merely classify him among the back numbers of the dispensation of civilization.

* * *

Chauncey Depew says that "every young man should be an optimist." He is right. Optimism is a lubricant; pessimism a brake. Anyone whose temperament is of the latter character should take Fuller's advice: "To divert at any time a troublesome fancy, run to thy books; they presently fix thee to them and drive the other out of thy thoughts. They always receive thee with the same kindness."

DEPARTMENTAL STORES.

THE chief topic of discussion at the second annual convention of the National Retail Grocers' Association, which was held in New York last week, was the departmental store question. President Callahan, in calling the convention, had issued this significant circular :

Because of the great issues to be settled and because our grocers here have succeeded in partially overcoming the department store evil, in so far that no jobber or manufacturer will concede that he sells goods to them, and because, on that account, goods are being supplied from great centres like Philadelphia, Boston, St. Louis, and Chicago, we know that you cannot afford to be absent from this convention, and should be represented in person or by proxy.

When the convention opened the discussion on the all important subject began, and many addresses were made. It was alleged that the department stores were outwitting the small grocers and the public by deceptive advertisements, and that if the public would only stop to think they would find out that goods could be purchased at regular stores just as cheap, if not cheaper. It was admitted that it would be unfair to ask jobbers and manufacturers to boycott the department stores, because the latter could pay as much, if not more, and spot cash, for goods, while the grocer had to take the full time allowed on his purchases.

C. F. Manielly, of Minneapolis, spoke at some length. After outlining the subject in general, he went on to tell what the retail grocers had done to meet the departmental stores. "I would like," he said, "to explain the manner in which we have operated for the past three years a system in our city which we call our association, and it has met with very great success in putting the trade in a better light before the public, giving the people better service and a much better quality of goods.

"We find our people want good goods at the lowest possible prices, which we have been enabled, through our association, to give them, and we find our people much more satisfied in these three years with the operation of our association.

"First of all, what the Minneapolis Association has done is a social feature among the retail business of our city. We have four hundred members; we find at this time these four hundred grocers, or nearly all of them, are acquainted with one another, and appear to be working for their common benefit. They are actuated by a higher principle than is involved in that which usually animates rival merchants in our city.

"We have a limited price upon three commodities of our business, which are flour, sugar and oil. We all know that sugar is used by a great many department houses as a leader, leading the public by deception. In their advertisements they place sugar in

a prominent place and other items afterward. They lose money on the sugar; the other items are sold by them at a profit of at least 50 per cent. They consist of such goods as can be adulterated and the customer is therefore deceived and also injured in regard to health and pays for something which he does not get.

"We also have the flour manufacturers with us, helping us at every point in this good and successful way of doing business. They will not sell their flour to a retail dealer who does not sell their flour at a certain profit, which is about 15 per cent. above the real cost of the article.

"Oil, which hitherto was used as an advertisement item, is now sold at a profit by all our dealers."

"Cash vs. Credit; the merits and demerits of each system, from the standpoint of the retail grocer," was the topic of George C. Small. Mr. Small said: "I do not propose to condemn the credit system. In skilled hands it is a useful tool of trade, and indeed it is difficult to imagine what would be the condition of business if all were suddenly forced into a cash basis. While fully realizing the advantages of credit, we cannot shut our eyes to the fact that it would be to the advantage of nine tenths of the country if the cash system could be made compulsory in all retail transactions. With cash sales the prices would be reduced and the poor made more provident and thrifty. What makes the credit system worse than it need be is the flagrant partiality of the State laws for the collection of debts. These laws have been framed more for the benefit of the debtor of the retail dealer than for the benefits of the dealer. The honest dealer reaps little or no advantage. The law simply places a premium upon the rascality of the dishonest debtor. There are 150,000 retail grocers in this country, and doing about \$1,250,000,000 business annually. It would seem a trade so large could easily get any reasonable legislation asked. Do they get it? No, not unless the greedy open hand behind the legislator is filled with a wad and the wad a fat one. If every retail dealer were skilled and experienced, the credit system would be comparatively harmless, but in the unskilled and inexperienced hand it is a dangerous weapon—a veritable boomerang. The loss of money and the extra labor and anxiety caused by bad debts among the fairly experienced and solvent retailers who manage to keep afloat, I regard as evils to be deplored, and I would apply the remedy if the proper one could be found."

At the second day of the convention the following resolution was adopted :

Whereas, Certain department stores use deceptive methods of advertising grocers' specialties and staples and

falsely offer to sell them at cost, but invariably refuse the buyer the right to take as much or as little of these goods as he may want ;

Whereas, Such methods destroy the reputation of standard goods for retailers and manufacturers and create discord in the trade, and

Whereas, These methods, while selling no more goods for the manufacturer, simply tend to change the channels of distribution and frequently cause grocers to shut them out of their store, and

Whereas, If successful, these methods will depreciate the value of real estate by lessening the number of renters of business property and the ability to pay of those who do rent, and

Whereas, The consumer is not benefited, since he can purchase all groceries from his regular dealer at the same or smaller price, and

Whereas, In case of complete success in establishing department stores it will result in oppression to the public by suppressing competition and causing the consumer in the end to pay higher prices than now paid, and in the end will create a monopoly, and

Whereas, Their success would close to thousands of energetic young men who lack great capital the avenues of business which they should find open to them ; therefore be it

Resolved, That we call upon all manufacturers and wholesalers to sustain the retail grocers, as distributors to the public, by refusing to sell goods to dealers who adopt questionable methods above described, and

Resolved, That we ask all grocers to favor those manufacturers and wholesalers with their business who sustain the position herein defined.

This resolution was also adopted :

That the National Retail Grocers' Association, in convention in the city of New York, April 24 and 25, urge that in such towns and cities where it is deemed necessary, the Retail Grocers' Association establish exchanges for purchase and distribution of goods, in order to meet unjust competition which now faces the retail trade.

This resolution regarding grocery packages was carried :

Whereas, a vast amount of deception is practised by the sale of short-weight packages ; and

Whereas, There are no laws compelling manufacturers to brand their goods which are not strictly pure as conditions ; and

Whereas, The grocer should be enabled to vouch for the quality of his goods according to the label thereon ; therefore, be it

Resolved, That legal enactments be urged in the several States, specifying weight and quality in package.

The annual election of officers resulted as follows : President, George A. Scherer, Peoria, Ill. ; first vice president, Herman Rohrs, New York ; secretary, A. M. Crawford, Chicago ; treasurer, F. W. Lorenz, Minneapolis, Minn.

It was decided that the next convention of the grocers would be held at Minneapolis April 24, 1897.

"PLEASED TO SEND SAMPLES."

It Came to Stay, It Has Stayed

Like the trees of the forest, the greater the storms the more deeply rooted become the trees. This is our experience with the celebrated Ram Lal's Tea. At its inception it was assailed, its doom was pronounced in many languages by rival dealers long before the public had given their verdict, yet to-day it stands without a peer, imitated by many, rivalled by none. Equal to Ram Lal's was the highest eulogy bestowed on samples given to dealers by travellers throughout the country, and in many cases the dealers were victimized, and why? Because Ram Lal's Pure Indian Tea has no equal.

Wherever Ram Lal's Tea is shown,
It stands unrivalled and alone.

And why has Ram Lal's Tea no equal? Because it is a pure **INDIAN** blend. Indian Tea possesses more retentive quality than any other tea known to commerce.

IMITATION BLENDS sold throughout the country to-day meet with considerable favor for a time and then become unpopular, and why? Because Ceylons are used very extensively in these blends, and after being kept in stock for a time go "off," losing their pungency and aroma. This has been the experience of practical tea men the world over. The sale of this brand is not confined to Ontario alone, but from all parts of the Dominion orders are being received daily, and numerous enquiries from across the border. Each year these goods are becoming more and more popular, sales having far exceeded our most sanguine expectations.

LARGE SALES OF MOLASSES.

ADVANCES received in Montreal by leading commission houses on Tuesday last indicated a more accommodating disposition among sellers of molasses at Barbadoes. The cables in question did not give quotably lower prices, but they inferred that holders at the Islands were more disposed to do business than formerly; that, in fact, there were more sellers at 21c. this week than there were bids.

This is a change from a week ago, and it is attributed to the fact that the early contracts having been provided for, supplies are coming out freer than they were. Some commission houses look for even a lower cost and freight basis than 21c.

Finally, the more accommodating disposition of sellers on Monday last was confirmed by the sale on Tuesday in Montreal of a round lot of 3,000 puncheons of A1 Barbadoes stock at 21c. cost and freight at the Islands.

This sale is a decline of $\frac{1}{2}$ c. from what sellers had been previously asking on guaranteed prime stock.

THE SMALL FRUIT CROP.

Mr. M. P. Clemes (the "M. P." as he is called to distinguish him from the four other brothers), of Clemes Bros., Toronto, returned a few weeks ago from a two weeks'

drive through the Niagara fruit district. "The small fruits look well," he remarked to THE CANADIAN GROCER. "Peaches will be only about half last year's production. You see, peaches overdid themselves last year. The sample, however, promises to be much better. Plums will also be only about half a crop. They, too, you will remember, gave a heavy yield last year."

IMPROVIDENT MEMBERS.

THE CANADIAN GROCER has a pointed editorial on the bad practice of sending needy men to Parliament, the inspiration for the article having come from the touching of the editor for the loan of a few dollars by a prominent M.P. "This M.P.," says THE GROCER, "will borrow small sums from friends and acquaintances, and occasionally returns the money. He is only one of a number of men in Parliament who are chronically hard up, and to whom the sessional indemnity is a godsend." It goes on to point out the danger of electing to Parliament men whose necessities forbid their freedom of action and make them subservient to influences which they should resist. There is sound sense in THE GROCER'S observations. While there is no desire in this democratic country to limit the membership of Parliament to rich men, no man should think of offering himself as a

candidate unless he is in a position in which the sessional indemnity will not appeal to him as a good reason why he should be elected.—Montreal Herald.

THE DIRECT FRUIT CARGOES.

The auction sales of fresh Mediterranean oranges and lemons open in Montreal this week, and it is expected, will attract the usual number of buyers.

The s.s. Astrid, the first steamer, arrived in Montreal on Monday last, and her cargo of oranges and lemons will be sold on Friday in the Long room of the Board of Trade.

THE CANADIAN GROCER has already given the quantity of her cargo as well as that of the Fremona, which passed Quebec inward on Tuesday.

The exact date on which this latter cargo will be auctioned has not been fixed at this writing, but it is expected that it will be put up either on Wednesday or Thursday of next week.

It may be remarked in connection with the Astrid's cargo that the vessel has had a pleasant voyage and that the fruit, as far as a partial inspection shows, is landing in first class condition.

INCREASED DUTIES.

The total duties collected at the port of Toronto for April, 1895, amounted to \$326,231.45, an increase of \$32,700.25 over the returns for the same month last year.

EDWARD ADAMS & CO. - London, Ont.

Our sales of Ram Lal Pure Indian Tea have doubled during the past few months.

WHY?

Owing to the heavy advance in all Indian Teas our competitors have been forced to choose between two alternatives. Advance price or reduce quality. The latter has been their choice.

Our choice has been to keep Ram Lal pre-eminently the King of Package Teas, exactly at the same high standard of unvarying excellence that it has always occupied, regardless of our profit. The increase in our sales is a satisfactory answer that our policy is correct.

Ram Lal towers above its competitors, not only a trade winner, but a trade keeper.

REBATES ON CANNED GOODS.

THERE are usually two ways in which an act can be performed—the direct and the indirect. Every business man knows this, for both methods are utilised in mercantile life, particularly in cutting prices.

They may be designated as the open and the covert. The former commonly obtains among retailers and wholesalers when acting independently; the latter among individual members of trade associations, or by those who subscribe to certain agreements when they wish to do those things which the tenets of their respective organizations say they shall not do.

As all readers of THE CANADIAN GROCER are aware, there is an organization known as the Canadian Packers' Association. Nearly all the leading packers of the country are members. The goods are sold through what is termed a "Selling Committee," and the prices are fixed. To sell below the stipulated figure is to forfeit a substantial sum of money—in the event, of course, of being found out.

As we pointed out when the association was organized on its present basis, more than a year ago, the agreement was drawn up by a lawyer, and was thought to be a pretty intact and formidable document.

But just as the strength of a chain is no greater than its weakest link, so the soundness of the agreement in question is gauged by the holes that are in it.

And there are holes in the agreement of the Canadian Packers' Association. They have been wilfully made by the members themselves; and through them members are crawling and violating their pledge to sell only at a certain price.

True, they are not directly doing so, but they are indirectly; at least, some of them are. And the evidence proving this is not indirect, either.

The particular manner in which they are violating the agreement is by recourse to

rebates, etc., on the invoice price of the goods sold.

These rebates, credit notes and other schemes of the same nature for reducing the face value of a bill of goods are not—of late at any rate—occasional matters; they are frequent.

In some instances it may be an understanding at the time the order is given that the buyer shall be given a rebate or credit note. But we are assured that these evidences of the sellers' generosity sometimes come unsolicited and unexpected. And the substantial character of some of them THE CANADIAN GROCER saw indicates that they were not to buy "candies for the children"—unless said candies were to aggregate the value of a suit of clothes or a new dress.

Canned goods could be bought to-day at 85c., for which wholesalers paid, according to invoice, 87½c., and yet they would net the seller a small profit. The rebate is in evidence here clear enough.

Whether all customers of the packers are sharing in these rebates we cannot say. We know that some of them are, and that is in itself sufficient reason for this article.

THE CANADIAN GROCER, at the very birth of the association's present selling scheme, pointed out its inherent weakness. The packers questioned the correctness of our view, and although we have not changed it, we have withheld criticism in order that the scheme might be given a fair trial. But after a trial of nearly eighteen months it has been found wanting, and that, in the particular instances cited, when the association is supposed to have control of the market.

If, with practically everything in its own hands, the association cannot maintain prices, what may be expected with outside competition a stronger factor than it is to-day?

CANADA-MEXICO TRADE.

A CONTEMPORARY, The Modern Miller, of Kansas City, takes umbrage at what was recently said in this journal with regard to Canada's trade with Mexico.

Unfortunately for the strength of its own argument, it bases its criticism on an inference that was not advanced by THE CANADIAN GROCER. We never deigned to say that Canada was a more important factor in the Mexican trade than the United States. On the contrary, it was Canada's weakness in this respect that was the kernel of our subject.

But the unpardonable sin was in that we deigned to suggest that Canada should make an effort to secure more business with the Mexican republic.

The Trade and Navigation Returns show that our imports from Mexico for the fiscal year ending June 30, 1894, amounted to the insignificant aggregate of \$611, the duty

upon which was \$533, or over 87 per cent. of the value of the goods imported.

Our exports to Mexico in the year given were valued at \$57,000. While this is so much better than our imports from that country, yet they are but a drop in the bucket to what they might or should be. Kansas City alone has, according to The Modern Miller, supplied Mexico with \$10,000,000 worth of breadstuffs in one year.

Mexico is an importer of a good many staples of which Canada is an exporter. This being undisputed, what the Dominion needs to do is to push for more of the desired trade.

This we mean to do, and, what is more, we shall succeed, notwithstanding that our American cousins have at the moment the inside track of us. But at the same time, we must remember that if we are to sell more of our products to Mexico we must buy more of her products. One-sided trade cannot be permanent.

COLD STORAGE.

CONSERVATISM is a marked characteristic of the human family; and, with all our boasted enterprise, too many of us are slow in appropriating adjuncts to business that are even within our reach.

One of the evidences of this is to be seen in the half-hearted way in which cold storage is taken advantage of.

It is not because the advantages of cold storage are not recognized. Most grocers and provision dealers do recognize their efficiency, but they either hope they can get along without putting their produce into a properly equipped cold storage established or they improvise a cold storage system of their own, often in a damp and musty cellar.

By these methods thousands of dollars are lost annually, through depreciation in value and destruction of goods.

The trade will remember the unusually large number of musty eggs that there were on the market last year. All these eggs might have been sound and sweet, and large sums of money saved if a few dollars had been expended in the first instance in cold storage fees.

Commodities taken from cold storage are as good as if fresh, if, of course, used within a reasonable time after being removed therefrom, and consequently it is to the pecuniary advantage of the trade to utilize cold storage when the preservation of poultry, meats and dairy products is desired.

A writer in The Inter-State Grocer says that what grocers need is a man to "bring them out of the slough of despondency into which so many of them seem to have fallen." Alas, then the many will be lost. The slough of despondency is not the slough which Webster describes as a "place of deep mud or mire." Out of the latter a man may be pulled by a rope, but for getting out of the former a man must depend on his own energies.

OPENING PRICE OF SALMON.

THE market for new season's canned salmon seems to be surrounded with more than the usual quantity of uncertainty.

Information is said to have been received in Toronto this week to the effect that the lowest opening price for good sockeye fish would be \$4.75 f.o.b. This would make the laid-down price in Toronto about \$5.43 per case, or \$1.35 $\frac{3}{4}$ per dozen.

THE CANADIAN GROCER saw some of the agents of British Columbian canneries, but none of them had yet any figures as to what the opening price would be; and the figure \$4.75 they were inclined to question.

The opening price last year was, it will be remembered, \$4 f.o.b. on the Coast. But this did not long obtain, the bulk of the pack being sold at about \$3.65, and a good deal went at \$3.50, while towards the close \$3.25 was not refused. It is no wonder then that people are sceptical about \$4.75.

An English syndicate has acquired a number of canneries on the Coast, and it is asserted that some sort of an agreement has been arrived at among the different canners as to prices.

One agent, interrogated on this point, said: "If the run is large, the canners will limit the pack, and if the pack is short prices will be correspondingly increased. One thing is certain, prices will not be down to where they were last season."

As pointed out a week or so ago, the canners have sold some futures on English account, but so far there have been no offerings on the Toronto market. Last year futures were offered in March, and by this time some of the agents had disposed of their allotment.

The position of the English market is, at the moment, favorable, and good red fish is by no means too plentiful in Canada, so the new pack is likely to come upon a comparatively bare market.

The situation undoubtedly favors higher prices, but whether the market will open at the extraordinary figure quoted is another thing. One thing is certain, if it does there will be a curtailment of consumption.

A FAILURE AND ITS LESSON.

THE recent failure of W. S. Collins & Co., produce and commission merchants, Colborne street, Toronto, should serve as a warning to country shippers.

About five months ago W. S. Collins, who formerly kept a restaurant in this city, returned from the United States, where he had sojourned for a year or so, and started business with the firm style above set out.

He knew nothing about produce or commission work, but had associated with him his brother-in-law, one J. Bell, who, by the

way, about two years ago went into the produce and commission business in this city, and at the end of six months, it is alleged, left the country, much to the chagrin of certain outside dealers.

Collins set up business shortly after Bell's return to Toronto. He opened a wholesale establishment in Colborne street and three retail stores on Yonge, Church, and Queen streets. His next step was to advertise largely in the daily papers, drawing the attention of country dealers to the fact that as he was the proprietor of three retail establishments in different parts of the city, he was in a position to realize the quickest and highest returns to be had from country produce, inasmuch as he dealt directly with the consumer.

The advertisements worked well, and ere long the consignments began to pour in, and W. S. Collins & Co.'s wagons were daily seen scurrying about the city streets laden with the "milk and honey" of the land. Consignments were received at the Colborne street house, and thence transferred to the retail shops, where the produce was sold to the consumer.

It soon transpired, however, that the new house was quoting stock to the consumer and retailer at less than cost price, and the leading commission merchants on Front and Colborne streets began to be suspicious of the firm, and to throw out warnings to their friends in the country of the existing state of affairs.

Latterly, it is said, Collins, in making returns to shippers, in order to gain time, sent out unsigned cheques, pretending to have overlooked the small detail of subscribing his name to the papers. Than a few days ago the end came, and an assignment was made to Richard Tew. The creditors met on Tuesday last, but did not get much satisfaction, as it is understood there is practically no estate.

Shortly before the announcement of the failure, Collins disposed of two of his retail stores, (which by the way, contained nothing but fixtures) to G. P. Reid, of Toronto, the deal being engineered by one Banks.

The bailiff is now in charge of the Colborne street warehouse at the instance of a local loan company, who are looking for their rent. In this store is a quantity of maple syrup and other produce, which, however, cannot be touched, as it is the property of some outside consignor.

The real losers are the general storekeepers and other outside shippers who have for months past been sending Collins produce for sale on commission. Claims are coming in from all quarters, and many a country dealer is out of pocket. The sums involved in the various cases run from \$5 up to \$100, and even higher.

Collins did not turn up at the meeting of creditors, and it is said that he has left for other parts. The story is that, on raising

all the money he could, he started for the United States on a bicycle, but broke his wheel near Hamilton, Ont., where he boarded a train, which he traveled upon as far as Rochester, N.Y.

Some creditors seem to think Collins was dishonest, and one has even talked of having him arrested, but the general opinion seems to be that his failure was due to incapacity. He knew nothing of the produce business, and, launching out on the scale he did, he was bound to lose money.

But, whatever the cause of the smash, it should teach our produce shippers a lesson.

Country produce dealers should never send any firm a consignment until they have made enquiries, and established to their own satisfaction the moral reliability and financial standing of the house. Every few months some irresponsible man or set of men will launch out in the commission line in the same way without any show of success, and a few weeks later witnesses a big failure, with a lot of outside shippers involved in the catastrophe. It is an easy thing for the dealer to ascertain to whom it is safe to ship. Read, mark, learn and inwardly digest.

FRAUD WILL BE LESS EASY.

ONE of the Acts passed at the last session of the Ontario Legislature is of special interest to the creditor class. We have reference to the Act "to make further provision respecting assignments for the benefit of creditors."

One wise provision is that which enables a creditor to trace up and recover property which has been fraudulently assigned and subsequently sold.

Fraudulent transfers of property have been a fruitful source of litigation, particularly within the past year. With the law now more explicit and far reaching, friends of people in a shaky condition financially will be less willing to shoulder the responsibility of "purchasing" property when the creditors are known to be impatiently knocking at the door.

Another clause, and one of the most important in the Act, is that providing for the examination of an assignor.

This examination may be secured under oath before a Master without an order, merely upon resolution or written request of a majority of the creditors. And at this examination the insolvent can be examined as to the property and means he had when the earliest of the debts were incurred; as to the property and means he still has of discharging his debts; as to the disposal he has made of any property since contracting such debts; and as to any or what debts are owing to him.

The person liable to examination must produce books and papers demanded. Failure to comply or attend for examination is to run the risk of being committed to the

common jail for a term not exceeding twelve months.

The whole tendency of the Act is to make more difficult fraudulent practices by insolvents, and at the same time to make easier the pathway of creditors when on investigation bent.

DEVELOPING DAIRY INDUSTRY.

THE dairy industry has engaged a good deal of our legislators' attention, both provincial and federal, during the past week. At Ottawa the question of branding cheese with the date of its manufacture, etc., and the wisdom of the Government's offer of 20c. per lb. for creamery butter was discussed.

In the first connection a resolution was introduced and passed for the first time, providing that all cheese should be branded as to date and section. This is an important subject, for though the exporters in Montreal, as a body, are quite as much in favor of it as the factorymen, they have pointed out that the provisions of the proposed bill should be so drawn up that they can be practically enforced.

However, the Government has had many consultations with the trade, and it is the hope of THE CANADIAN GROCER, as it is of every honest member of the cheese trade, that this vexed question will be finally settled this summer, and the possibility of poor cheese being palmed off as finest Canadian done away with.

With regard to the purchase of winter creamery, the Hon. Dr. Montague explained that the Dairy Commissioner accepted 915 packages of fresh made creamery butter from eighteen creameries and from five of the Government experimental dairy stations, for shipment to Great Britain on Government account, to introduce and advertise the quality of fresh made creamery butter there, between 12th February and 6th April, 1895. The particulars of the latest shipment from Prince Edward Island have not yet been received. An advance of 20c. per pound was paid. Payments had been made to each as per sheet attached. Nine hundred and fifteen packages of butter of fine quality, in packages suitable for export, were shipped to Great Britain; 246 packages of fine quality, but in packages not suitable for export, were, or are, being sold in Montreal. What of it has been sold, and most of it has been sold, has realized more than the price advanced on it by the Government; 224 packages were received by the Dairy Commissioner in Montreal which were not strictly fine in quality or were made before January, 1895. These were taken charge of by the shippers or are being sold on their account in Montreal. Accounts of the sales in detail have not been received from Great Britain. The accounts of the freight charges from the creameries to Montreal have not

yet been received by the department. The amount to be paid by the Government for freight charges to Montreal and storage charges there will be less than ½c. per lb. From the statement laid on the table by the Secretary of State it would appear that advances had been made on account of 794 packages, weighing 39,791 pounds and valued at \$7,964.

THE CANADIAN GROCER some time ago had occasion to refer to some sales of Canadian winter creamery in Manchester at figures which certainly did not leave a profit on cost of 20c. per lb. in Montreal. Dr. Montague's statement does not agree with these sales, and though it is not our desire to cast any doubt upon the statement made in the House, more explicit information is required to convince us that sales have been made at a profit, considering the conditions that have ruled the English market ever since last fall.

The Quebec provincial authorities have also talked butter and cheese during the week, receiving an influential deputation in Montreal the other day.

Mr. Milton McDonald reminded the Ministers that this question was not a new one, and that the Hon. Minister of Agriculture and the other members of the Ministry had about decided to grant the bonus in question when, on account of opposition from certain members, the proposition had been allowed to drop. Since then, however, some 25 favorable resolutions had been adopted, even in the districts represented by those recalcitrant members, and the speaker believed the province was ripe to support such aid from the Government. Mr. McDonald said that in granting the bonus asked for, the Ministers would prevent a certain disaster to the dairy industry, and announced that the trade had a promise of \$20,000 from the Dominion Government to furnish refrigerators on board the cars.

Mr. A. Ayer said that what was good for the farmer was good for the trader. He was going on to speak of the machinery in use, when Hon. Mr. Hackett asked if it was not true that the machinery now used in the cheese factories can be changed for butter-making in an hour's time?

Mr. Ayer replied in the affirmative, and proceeded to detail the successful efforts that had been made in Denmark and Australia in the interest of the butter industry. Canada, he contended, could do even better.

The Ministers promised to take the suggestions of the deputation into consideration at an early day.

THE CANADIAN GROCER may remark that all these measures are quite right and proper, but they will be simply so much labor lost if the proper cold storage facilities are not provided for the butter in transport. The federal authorities have given a clear and unmistakable promise in this connection, and they should be held to it, even if there is not a general election before another year.

MONEY AND STOCKS.

BONDS to the value of \$6,000,000 were purchased in New York last week on London accounts.

Bank exchanges in the United States may be improving, compared with 1894, but they are still behind 1893. The daily average for April was 16.3 per cent. less than the same month two years ago.

A better feeling and stronger tone has developed on the Toronto Stock Exchange in bank stocks. The shares that have led in the higher figures are those of the Imperial and Commerce banks. "It looks," said a broker, "as if investors are taking hold of these stocks at the advanced prices. Of course, in view of the higher rates of interest, the improved tone of business, and the consequent less idle money, the earnings will be greater than they have been, hence one of the reasons for the stronger market."

Reports of increased local fires, particularly in the Northwest Territories and the in the eastern provinces, is having a deleterious effect on fire insurance stocks. I have been given to understand that the losses are much heavier than a year ago at this time.

Commercial Cable, Bell Telephone and Toronto Street Railway stocks are all stronger, with an upward tendency. Cable is 2¼ per cent. higher than a week ago, and it is ex-dividend. The advance in these stocks appears to have checked business.

C. P. R. is very much stronger. In New York the advance is in sympathy with the general tenor of the market, and in London it is due to the supposed covering by shorts, "for," said a broker, "it is after all only a supposition."

Call loans are advancing, and an advance to 5 per cent. all round is probable within a day or so. "There is more demand for legitimate use," remarked a financial man, "which, of course, means business."

The City Council of Toronto has passed by-laws authorizing the issue of \$60,081.81 of local improvement 4 per cent. debentures to pay for work authorized.

May 1 brings a large number of loan company debentures out. They are being fairly well renewed, but not quite so satisfactorily as for the corresponding time last year. The passing of the dividend by the C. P. R. has had a depressing effect on Canadian securities. The advance in the rate of sterling will cause a loss to the companies who have to place money to meet debentures that are not renewed. A year ago the sterling rate was 9½; to-day it is as high as 10¾.

ARGUROS.

INSOLVENCY BILL INTRODUCED.

The Insolvency Bill which was left over from last session was introduced in the Senate on Monday last by Sir Mackenzie Bowell.

In introducing the bill, the Premier said it was so fully discussed last session that it would not take up much time this. The bill was re-introduced this session in consequence of a distinct promise given by the late Premier in the House of Commons last session. There are very few changes in the bill as now introduced, and none affecting the principles of the measure. Conflicting clauses and clerical errors comprise the only changes from the bill as amended last session. The bill was read a first time.

It is to be hoped that the bill will be put through the various stages necessary to make it law. Nothing but factious opposition can now prevent the consummation of what the advocates of a Dominion insolvency law have been so long contending for, and it will be advisable for the boards of trade throughout the country to be on the alert to counteract any such opposition as may develop.

READS "THE GROCER" FIRST.

" * * * * What you had in THE CANADIAN GROCER of 5th—'No Safety in Ordinary Milk,' and this week's, 'Diseases

in Ordinary Milk,' are doing excellent work, for we have heard several comments on them already. Anything published in THE CANADIAN GROCER will not escape my eyes, for I read THE CANADIAN GROCER first; my daily paper comes next." So writes a subscriber under date of April 22.

THE TRANSIENT TRADERS' ACT.

Editorial reference was made a few weeks ago to an amendment to the Ontario Transient Traders' Act, whereby municipalities were given more power to control dealers in bankrupt stocks and other itinerant merchants.

A supplement to the Ontario Gazette, issued on Saturday last, contains the full text of the amendment, and we hereby reproduce it for the benefit of our readers. The text is as follows:

21. Sub-section 9A of section 489 of said Act (45 Vic. c. 42) is amended by striking out the figures "\$100" in the eighth line thereof, and substituting therefor the figures "\$250," and by striking out the figures "\$50" in the said eighth line, and substituting therefor the figures \$100.

22. Section 489 of the said Act is amended by inserting therein the following, as sub-section 9B:

9B. The words "transient traders," whenever they occur in sub-sections 9 and 9A of this section, shall extend to and include any person commencing the business in the said sub-sections mentioned, in any municipality, who has not resided continuously in such municipality for a period of at least three months next preceding the time of the commencement of such business therein.

It now devolves upon the merchants in the different municipalities in Ontario to

exercise their influence with their respective councils with a view to getting the provisions of the Act embodied in their by-laws. The sooner they move in the matter the better.

"THE GROCER" FIRST AGAIN.

THE CANADIAN GROCER's pair of Irish terriers, the Canadian Ambassador and Deramore Biddy, won five first prizes at the Toronto Dog Show last week, again proving that THE GROCER is first in everything it undertakes, whether in collecting news or winning prizes.

Biddy is the best dog of her class in America, if not in the world. She won first in Edinburgh, first in Dublin, and first in Armagh last year, and first in New York, in competition with 54 dogs, this spring. She was bought as a puppy by a member of this staff early last spring.

The Irish terrier is like its countrymen in many respects, for it is one of the brightest and most intelligent of all breeds. They can be trained to perform any kind of work, but it is as companions, watch dogs and ratters they are best known. A subscriber in the Parry Sound district, who has spent much of his leisure time with his gun, says he has also found them the best partridge dogs.

There were over four hundred dogs at the Toronto show.

The Approach of Warm Weather

Always stimulates the demand for Breakfast Foods, in small packages—the profitable kinds. If you keep your stock toned up with our specialties, like

Desiccated Rolled Wheat
Desiccated Rolled Oats
Snowflake Barley

(In 2-lb. packages. Beautiful goods.)

people will quickly find out that yours is the store where delicious, reliable Breakfast Cereal Foods can be had. You will thus make for yourself profitable customers. By the way, we might suggest right here that

TRADE CHAT.

THE Kingston Canning Company has been sold under mortgage to Darius Wigle for \$7,512.40. The original cost was about \$20,000.

Japan is to have a world's fair at Kyoto.

P. E. Island lobster men are getting their traps out.

The Columbia River Fishermen's Protective Union has fixed the price of chinook salmon at 5c. per pound and steelheads at 2c.

A company is being formed in London for the purpose of converting into oil and guano the waste fish and offal from the canneries on the rivers of British Columbia.

Financial troubles caused the suicide of L. J. Allen, of Oneida, N.Y., at Stratford on Saturday. His brother, J. C. Allen, the Buffalo broker, had just failed for a quarter of a million.

The decision of Judge Drake, of Vancouver, B.C., restraining the canners from polluting the waters of the Fraser River with offal will cause the canners great expense in disposing of it by other means.

La Compagnie de Cigares de l'Epiphanie is a new company with a capital stock of \$10,000 and its chief place of business at l'Epiphanie, Quebec. The directors are: J. M. Fortier, J. Edouard Majeau, M. Roch, Pierre A. Trotier, J. M. Bourgoin, Medard Forest and Edmond Prudhomme.

The directors of the Eastern Assurance Co., Halifax, have decided to transfer the entire business of the company to the Union Fire Association of London, England. The head office will be at Montreal, with Thomas Morrissey, formerly of Halifax, as the manager.

Stratford Board of Trade has elected the following officers: President, John Welsh; vice-president, F. D. Hamilton; secretary, C. J. McGregor; council, George McLagan, A. F. McLaren, D. B. Burritt, W. Buckingham, C. W. Young, C. McIlhargey, W. J. Ferguson, E. T. Duffton, E. K. Barnsdale, A. Caven, J. H. Nasmyth, J. A. Duggan.

ENDORSED BY THE JOURNAL.

The Ottawa Journal endorses the stand taken by THE CANADIAN GROCER in favor of a Customs Court—a reform which, after persistent agitation in these columns, has at last been taken up by the Montreal Board of Trade and Chambre de Commerce, with good prospects of support from the other commercial bodies in Canada. The Journal says: "One reason against a Customs Court of Appeal is the expense. Another may be that frivolous appeals will be taken in great numbers, embarrassing Customs business. But this last would be an argument against having any courts at all. As to the other, expense could not be grave

enough to be a decisive reason against so important an aid to commercial justice."

These views are sound. THE CANADIAN GROCER does not propose to let the matter rest simply because the Boards of Trade are now, somewhat tardily, doing their duty. It will continue to urge the importance of this reform until Parliament takes action. If Government is slow to move, have we business men no representatives in the House of Commons who will take the initiative, frame a bill, introduce it, and allow Ministers to adopt or amend it as they see fit? Surely a little time can be spared from political sparring matches to do a real service to the whole commercial community.

A FOOD SUPPLY FOR THE FUTURE.

IN the way of furnishing a food supply for the future, and especially for the poor, the rabbit industry, we are told, offers remarkable advantages. To cheer up the readers of Malthus, who are apprehensive of starvation for the race in the dim and distant future, writers have described the wonderful possibilities in the way of a fish supply, and others more recently have suggested the manufacture of food by chemistry out of the elements round about us in the air, the water and the earth. Now comes another writer suggesting the cultivation of rabbits on a large scale, and explaining the advantages they present in point of economy. The article is found in Nordstjernen, Copenhagen, and, as translated for The Literary Digest, runs as follows:

"The rabbit supplies in many ways the requirements of 'the poor man's food.' The poor can easily raise them, for they are cheap to keep and their propagating power is most extraordinary. Pennant has calculated that one pair will in four years' time, if all the young ones are kept alive, have multiplied into 1,274,840. A female rabbit casts young ones eight times a year; if she casts seven at the average, she bears fifty-six all told in a year. Let us say she bears fifty per year, and estimate each at ten pounds; she produces 500 pounds of meat in a year. As many poor people could get the rabbit's food free of cost, they could practically get a few hundred pounds of meat for nothing. The rabbit skins are worth something, when prepared. Under various names twenty million rabbit skins are exported yearly from Australia to London. London alone uses every week half a million rabbits, most of which come from Belgium. Belgium earns yearly 50,000,000 to 60,000,000 francs (\$10,000,000 to \$12,000,000) on rabbits; France, 400,000,000 francs (\$80,000,000)."

The author next describes the various breeds suitable for food, and recommends the Norman rabbit, bred in the neighbor-

hood of Cherbourg and Rouen, as the best. In South France and Spain they raise the Angora rabbit, whose hair they cut frequently and spin into a fabric they call cashmir. A cross between the Angora rabbit and the Russian rabbit produces a fine stock, and still better hair than that of the original Angora. Of the manner of raising the rabbits we are told:

"No success can be had in rabbit-raising on a large scale unless one scrupulously attends to the cleanliness of the animals, their feeding by strict and regular rules, the separation of the two sexes till they are fully developed. . . . The rabbits can be reared in isolated small pens or in large houses, built for the purpose. But under all circumstances the animals kept for breeding must be isolated, the males and females in special boxes of about one and one-half yards bottom surface, and of an inside height of about one yard. . . . The disagreeable smell so often observed around rabbits comes from lack of cleanliness. . . . Special nests must be prepared for the females; the males do not need them. . . . The natural food for rabbits is vegetable; almost all refuse from a vegetable store is suitable. In the spring when green fodder is scarce, the rabbits eat carrots and other roots. They must never get onions."

A TIMELY HINT.

One way to induce customers to carry home goods, remarks Trade Magazine, is to make a neat, tidy package, wrapped in white paper, and tied with colored twine. While this plan will cost a trifle more than the old way, it will pay you in the end, in that you will not have so many goods to deliver. Do not blame ladies for not wanting to carry home goods wrapped in coarse brown paper.

"NAUGHT" IS RIGHT, BUT
"AUGHT" NOT.

Why do young ladies in the Montreal offices of the Bell Telephone Co. say "aught" for "naught"? If you call up a number containing a cipher—say 6042 for example—the operator will repeat "six-aught-four-two," with the accent on the aught. And as a rule you weakly say yes. But you shouldn't, because aught, according to Webster (the man who made the dictionary), means "anything," "any part." Plainly, then, six anything-four-two is not a number that would satisfy you. Now, "naught" (according to the same authority) means "a cipher, the arithmetical character." Naught is therefore correct.

First Boarder—What's the star boarder making all that hubbub about over that berry pie? Second Boarder—I guess he found the berry.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, May 2, 1895.
GROCERIES.

NOTHING strikingly new has developed during the week. Business continues fair, although the turn-over is not yet as large as the trade would desire. Sugar is firmer, while the demand, on the other hand, is probably not so brisk. Canned vegetables are attracting rather less attention than they were a week or two ago. There is a brisk movement, however, in canned salmon. Teas are rather quiet, with Ceylons the most active. Coffees are quiet, with prices rather firmer outside. Foreign dried fruits are without material change either in regard to volume of business or prices. There is a fair demand for the season for both syrups and molasses. Travelers report that the outlook continues to improve in the country. Wholesalers report that last month's trade was more satisfactory than for the same time a year ago.

CANNED GOODS.

The demand for tomatoes, peas and corn is not quite so active as a week ago, but there is still a fairly good trade being done at steady prices. Canned fruits are in light demand, and gallon apples are not commanding as much attention as a short time ago. Salmon is in brisk demand at \$1.35 to \$1.45 for talls and \$1.55 for "Clover Leaf" flats. Some demand is experienced for cohoes at \$1.05 to \$1.10. Another advance has taken place in the price of Canadian canned beef, 1's and 2's being 10c. per doz. higher, 6's 25c., and 14's 50c. per doz. higher. We quote: Tomatoes, 85 to 95c. for choice; corn, 85 to 95c.; peas, 82½ to 87½c. for ordinary and \$1.40 for fancy; peaches, \$2.75 to

\$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.10 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.35 to \$1.45, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

Both business and prices on the local market are much as before. The outside markets are firmer on Brazil's growths, on account of the order prohibiting the sending of cables from Brazil in cypher, another revolution being thought to be impending. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

Trade remains much as before. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Trade is moderate only. A further advance is announced in cream tartar, although no change has been made in the local price. We quote as follows: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts,

\$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The demand is not so brisk as it was. Prices, however are firmer, in sympathy with the New York market, where centrifugals sold for May delivery at an advance of ½c., with granulated 1.16c. higher. The Toronto agents of the Canadian refiners have been this week asking and getting 1-16c. higher for granulated, and they are quoting yellows at 1-16c. to ½c. advance. At the time of writing the wholesalers have made no quotable change, but the minimum figures do not obtain as much as formerly. We quote: Granulated—domestic, 3¾c. to 3½c.; do., No. 2, 3¼c.; yellows, 2¾ to 3¾c. Raw—Demerara, dark, 2¾c.; golden, 3 to 3¼c.; bright, 3½c.

SYRUPS.

There is not much doing in syrups, except in half barrels of the better grades, for which the demand is fairly active. We quote: Dark, 25c.; medium, 28 to 30c.; bright, 35 to 40c.; very bright, 45 to 50c.

MOLASSES.

A fair movement is reported in New Orleans molasses of the better quality at about 33c. in barrels and 38c. in half-barrels. We quote as follows: New Orleans, barrels, 26 to 28c.; halfbarrels, 30½ to 32c.; Barbadoes, barrels, 28 to 32c.; half-barrels, 30 to 34c.

TEAS.

Private advices announce that the Japan tea market has opened, and about a week later than last year. Prices are slightly higher than the opening figures of last year. A small shipment of 200 packages of early garden teas is on the way per s.s. City of Pekin for the American market. It costs from \$44 to \$48 per picul. There has been

TORONTO

MARKETS—Continued

no material change in teas on the Toronto market. Wholesalers' purchases are still principally of Ceylon teas, which are firm in price. Retailers, on the other hand, are principally buying Japans and China Congous, the former at 15 to 18c., and the latter at 14½ to 25c. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUITS.

Currants remain much as before. Fine currants are showing the best value now on account of the higher prices of the lower grades. We quote: Filiatras, half-barrels, 4 to 4½c., barrels, 4¼c.; fine Filiatras, half-barrels, 4¾c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 5½ to 6c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Valencia raisins of the cheaper kinds are still in good demand, but there is a nice trade doing in selected layers. We quote: Off-stalk, 3¼ to 3¾c.; fine off-stalk, 4 to 4¾c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Prunes continue in good demand at unchanged prices. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 5 to 5½c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 7 to 7½c. per lb.; "Atlas"—"D," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

A few odd boxes of sultana raisins are still going out at 6 to 6½c. for bright goods.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

Demand is fair for California dried fruits. We quote according to quality: Peaches, 10½ to 13c.; apricots, 10½ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

BUTTER AND CHEESE.

The butter market is still over-crowded, and there seems to be no outlet for poorer lines. Prices remain about the same as last week, fresh rolls being a point lower. We quote: Summer dairy and store packed—Choice, 9 to 12c.; low grade baking butter, 5 to 6c.; fresh large rolls, 10 to 12c.; pound prints, 14 to 15c. Summer creamery, 11 to 14c. Winter creamery—Tubs, 19 to 20c.; pound prints, 20 to 21c.

August and September makes of Canadian cheese bring 9 to 10½c., and new Canadian cheese is quoted at 10 to 10½c. Small Stiltons bring 12 to 12½c.

GREEN FRUIT.

Trade in general is fast picking up, and growing in volume. Pineapples are beginning to be plentiful and cheaper. Bananas are suffering from a temporary scarcity. Strawberries are becoming cheaper, and Southern string beans are now in the market for the first time. We quote: Lemons—Messinas, \$3 to \$4. Oranges—Valencias, small crates, \$4.25 to \$4.50, and Jumbo crates, \$5.25 to \$5.50; Messinas, \$2.50 to \$3; California seedlings, \$2.75 to \$3; California navels, \$3.50 to \$4. Bananas, \$1.50 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. Grapes—Malagas, \$5 to \$6.50 per keg. California dried fruit—Apricots, 11 to 12c. peaches, 12½c.; cranberries, \$3.50 per box. Strawberries, 27 to 32c. a quart and 14 to 15 a pint; cocoanuts, \$4.50 a sack: pineapples, 12 to 23c.; green string beans, \$2.50 to \$3 per bushel crate.

COUNTRY PRODUCE.

BEANS—Choice hand-picked still bring from \$1.50 to \$1.65 a bushel.

DRIED APPLES—Are quoted at 6 to 6¼c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: 7 to 7¼c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.75 to \$3 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—Are plentiful, but the demand seems to equal the supply, so that the former prices are maintained. We quote: 7 to 8c. per lb. for sugar; syrup, in 5-gallon lots, 70 to 75c. a gallon, and in gallon tins, 80 to 85c.

POTATOES—Are quoted at from 60 to 62c. on the track, and 70 to 75c. out of store.

POULTRY—Scarce and firm. Prices unaltered. We quote: Turkeys, 14c.; geese, 8 to 9c.; chickens, 50 to 75c., ducks 75c. to \$1.

EGGS—Though the receipts are fairly large, eggs are firm at 10c., with a tendency towards 10½c.

FISH AND OYSTERS.

This is the transition season of the fish trade, when stocks are small and sales are few. Frozen stocks are all out, and fresh caught are not yet on the market. A few lake trout and white fish are, however, being received. We quote: skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; haddock, 5 to 5½c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; yellow ditto, 7c. per lb.; pike, 4½ to 5c. per lb.; flitch

cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 7 to 7½c.; white fish, 8c.; Georgian Bay herring, \$2 per 100.

PROVISIONS AND DRESSED HOGS.

Dressed hogs remain very firm, and there are some advances in hog products. There is a good demand for dressed hogs at \$6.25 to \$6.40 per 100 lbs. We quote products:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8¼c. for small lots; breakfast bacon, 11c to 11½c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 9½c to 10c.; medium, 15 to 20 lbs., 10½ to 11c.; small hams, 10¾ to 11c.; pickled, 9½ to 10c.

LARD—Pure Canadian, tierces, 9c.; tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Firm, with a tendency to rise, both on Toronto and Chicago markets. Local quotations are: White, 80c.; red, 80c.; goose, 75c.

OATS—Still bring 40c. a bushel.

BARLEY—Selling at 48c.

FLOUR—In sympathy with the rise of wheat in the local market and the firmness of the American market, flour is advancing in price steadily. We note this week another advance over last week. We quote: Ontario straight roller, \$3.50 to \$3.60; Manitoba, \$3.85 to \$3.95; patents, \$4.10 to \$4.15.

BREAKFAST FOODS—Owing to the advance in wheat, rolled wheat is firm, and an advance is said to be looked for within a few days. Oatmeal remains steady. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; corn meal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SALT.

A fairly good business is the order of the day. Prices are unaltered. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

SEEDS.

With seeding in the earlier sections of Ontario now pretty well advanced, the demand is not quite so urgent this week, but with stocks apparently none too great to provide for the demand, prices have remained very steady, and there is practically no change to report since our last quotations. Jobbing values are as follows: Red clover, \$6.50 to \$6.75; alsike, \$4.50 to \$6.30; timothy, \$3 to \$3.50 per bushel, all for re-cleaned stocks. Sellers would have to make some allowance on the foregoing prices.

HIDES, SKINS, WOOL AND TALLOW

HIDES—With a good demand prices are unchanged. We quote: Green hides, No.

CLEMES BROS. - TORONTO

1, 6c.; No. 2, 5c.; No. 3, 4c. For cured 7c. is paid.

SHEEPSKINS—Quoted at 90c. to \$1, an advance of 5 to 10c.

CALFSKINS—These are firm, No. 1 selling at 7c., and No. 2 at 5c.

TALLOW—Jobbers quote 5 to 5½c., and sell at 6c.

WOOL—There is no Canadian fleece on the market, and it is expected that new wool will open at from 17 to 18c. There are no changes in pulled wools, supers being quoted at 19 to 21c., and extras at 21 to 22c.

PETROLEUM.

Both crude and refined oil, Canadian and American, maintain their high prices, and there is no prospect, as far as can now be seen, for any lower quotations. We quote prices much the same as last week: In 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 17 to 18c.; carbon safety, 19 to 19½c.; Canadian water white, 19 to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

TORONTO MARKET NOTES.

Cream tartar is higher.

Mississippi strawberries are on the market.

H. W. Dawson, of Dawson & Co., is in New York on business.

A fresh supply of Hires' Root Beer is now to hand with Lucas, Steele & Bristol.

Dawson & Co. have a fine line of early spring beans from the south.

J. P. Clemes, of Clemes Bros., is in Montreal attending the spring fruit sales.

S. K. Moyer expects large consignments of fresh salmon trout and whitefish daily.

John Sloan & Co. report an active demand for canned salmon in "Clover Leaf" flats.

Perkins, Ince & Co. have a shipment of French prunes to hand which they are offering at 4c.

Another advance of from 10 to 50c. per dozen, according to size, is announced in the price of Canadian canned beef.

The Toronto Salt Works this week sold Davidson & Hay a carload of table salt, and Sloan & Co. a carload of assorted brands.

Canned chicken, turkey, duck, pigs' feet, lunch tongue, etc., are in stock with Lucas, Steele & Bristol. Get their figures before buying.

Clemes Bros., S. K. Moyer, Dawson & Co., and McWilliam & Everist all report the receipt or expected arrival of large consignments of pine apples.

Day & Martin's English blacking is selling with Lucas, Steele & Bristol. D. & M.'s liquid blacking in jars is now a staple article with them.

The stock of chicory in London on April 1, 1895, was 18,764 pounds, against 7,628 at the corresponding date last year and 7,422 in 1893. English home consumption and exports are shown to have been remarkably

ASK FOR

MOTT'S

even during the first three months of 1895 and the preceding two years.

Shipments of bright syrups are to hand with Davidson & Hay.

A large direct shipment of Ceylon teas arrived this week for Davidson & Hay.

Wm. Paterson & Son are hardly able to keep up with the demand for their soda biscuits.

Davidson & Hay are drawing attention this week to special values in Japan teas, in 10-lb. mats and 30-lb. caddies.

The Pure Gold Manufacturing Co. are putting their sweet and "Pure Gold" tomato catsups on the market in a new dress.

James Keiller & Sons' (Dundee) marmalade, in 1-lb. pots and 7-lb. tins, is in stock with Davidson & Hay at low quotations.

The London Produce Markets' Review of April 20 notes more enquiry from some parts of Canada for Saryune & Padraes China teas.

"Trade is particularly bright with us in teas," say W. H. Gillard & Co. "Our sales to arrive have in some cases even exceeded our import orders."

The Eby, Blain Co., Ltd., have in stock another shipment of "Orient" tea. "Our sales of this tea are increasing," remarked a member of the firm.

"We are offering," said a member of the firm of Warren Bros. & Boomer, "Layer Valencia raisins at cut prices. They are Merle's brand, and fine fruit."

The Eby, Blain Co. report that they are making special prices on such house-cleaning requisites as brushes, brooms, whisks, whitewash brushes, etc.

Dixon's celebrated Carburet of Iron Stove Polish has come to stay, it would appear from the large sales reported by W. H. Gillard & Co., the Canadian agents.

W. H. Gillard & Co. report large sales of their "Seville" orange marmalade. They are also having a successful sale of their jams and jellies, which are offered at low figures.

Lucas, Steele & Bristol, Hamilton, report big sales of peas, corn and tomatoes. They are giving special quotations, having bought several thousand cases from different factories.

P. C. Larkin & Co., of Toronto, established a branch in Montreal at 318 St. Paul street seven weeks ago for "Salada" Ceylon tea, and up to the end of last week 118 retail stores were selling "Salada."

Toronto Biscuit and Confectionery Co.'s "Sodas" are now recognized as among the best in Canada. This company is very busy, and their travelers report large sales and prospects AI for a big trade this year.

On account of the revolution in Cuba, it is estimated by Willett & Gray's Statistical

that the sugar cane crop of 1895 6 will be 100,000 to 200,000 tons less than that of 1894-5.

The Retail Grocers' Association, of London, will hold their annual picnic on July 24th.

D. S. Perrin & Co., of London, are putting in a new front and also adding two storeys to their factory. This will make their factory one of the finest in the "Forest City."

Auctioneer Jones, of London, sold two bankrupt stocks on Friday. That of D. W. McWillie, of London, went to J. W. Broderick for 65 cents, and Hiram Mosser's stock (Allen Park) sold for 77½ cents to W. Laidlaw, of Durham.

Prices for new pack Canadian lobster, in tall tins, are stiffer. Orders have been secured at \$1.75 for goods that were under contract at a fraction less earlier in the season. In other words, there is 2½c. per doz. advance.—N.Y. Journal of Commerce.

Wm. Paterson & Son have been in receipt of several communications of late enquiring if they put up any \$1 a doz. pickles. The firm wish to state through THE CANADIAN GROCER that they have not put up, and do not intend to put up, goods of an inferior quality. What they offer are all high class goods and at reasonable prices.

MONTREAL MARKETS.

MONTREAL May 2, 1895.

GROCERIES.

THE opening of inland navigation has brightened up trade to a certain extent this week, but it has not led to the increased volume of trade that some expected. The situation as to values is much as it was, but there is an impression that prices on leading staples—for instance, tea and sugar—cannot go much lower, and sellers, therefore, are not disposed to operate ahead for large quantities. Spices and coffees continue firm, while dried fruits are quiet. In canned goods no offers of new canned salmon can be verified, for though a price of \$3.50 f.o.b. on the Coast has again been mentioned, it is not believed to be on new pack fish. In green fruit the sale of the two first cargoes will take place soon, and a large attendance of buyers is anticipated from Ontario and the States.

SUGAR.

There is no change in the sugar market, the tone ruling steady. Demand has been fair on the whole, but it is not as extensive as it usually is at this season. The tone is steady and values show no change, though the trade would not be surprised if they advanced, considering the tone of the raw market and the tendency on refined sugar in New York. Sales of granulated on spot have taken place at 3¼ to 3 5-16c, and yellows at 2 7-16 to 3c, according to grade and quality. In a jobbing way values are

steady as follows: Granulated, 3¾c. for standard, 3¼c. for No. 2; yellows, 2½ to 3¼c., as to grade.

SYRUP.

The market has continued quiet and unchanged, and business is of a small jobbing character. The tone is steady, sales of round lots transpiring at 1 7-16 to 2c. per lb., and in a jobbing way the range of values is firm at 1½ to 2¼c. as to grade.

MOLASSES.

Nothing very striking has taken place in the molasses market since the large purchase we noted last week, and business in a jobbing way is of a moderate character. On goods from stock for prompt shipment we quote 31½c. in carloads and 32½c. in less than carload lots. For forward shipment the new prices are those exclusively given in THE CANADIAN GROCER last week, viz., 30½c. in carlots and 31½c. in less than carlots.

RICE.

The rice market continues firm and values are well maintained. Demand is slow and few important transactions are put through, business being restricted to a hand to mouth character. Mill quotations on lots are as follows: Japan standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

There is no new feature in the spice market, but the tone is very steady all round. We quote jobbing prices: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

There has been a fair business doing in coffees, both in a jobbing and wholesale way. No quotable change in prices of a radical kind, but the tone is firm with an upward tendency. In a regular way we quote green coffee in bags as follows: Maracaibo, 21½ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

An improved jobbing enquiry has been experienced for tea since our last report, but the volume of business transacted continues small in the aggregate. Enquiry is still most largely for low grade Japans and Congous, and these teas are the staple lines in Montreal, say at prices ranging from 12 to 14c. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUIT.

There has been no change in Valencia raisins, which rule quiet and steady under moderate stocks. We quote: Off stalk, 3½ to 4½ as to grade, and layers 5 to 5½c. California raisins have been placed with jobbers at steady prices since our list. We quote: 4 crown loose muscatels 6¾ to 7c., and 3-crown ditto 5½c.

The currant market is dull and featureless. We quote: Filiatras and Provincials, bbls. 3½c.; cases, 4 to 4½c.; Patras, 5 to 5½c. and Vostizzas, 7 to 7½c.

There has been no radical change in prunes, but the tone of the market is firm. A fair jobbing trade is, therefore, to report at steady prices. We quote: Bordeaux,

THE BEST IN THE MARKET.

Ask your wholesale grocer for it.

THE FOAM YEAST CO., LTD. -- TORONTO.
79 Esplanade.

4 1/4 to 4 1/2c.; Bosnia, 4 1/4 to 5c., and Cali-
fornia, 8 to 9c.

Some small quantities of Eleme figs have
come forward via New York this week, and
are selling at 10 to 12c.

Dates are quiet and without feature at 3 1/2
to 4c.

There is no change either in dried apples
or evaporated. Both are in small supply
and firmly held. We quote the former 6 to
6 1/2c., and the latter 7 1/2 to 8c.

NUTS.

There is a moderate jobbing trade in
nuts at steady prices. We quote: Brazils, 8
to 9c.; shelled almonds, 18 to 25c.; Tarra-
gona, 11 to 13c.; Grenoble walnuts, 13 to
14c.; shelled ditto, 25 to 26c.; filberts, 7 to
8c.; and pecans, 9 to 11c.

CANNED GOODS

There has been no important change in
canned goods. Agents of Ontario packers
were here during the week trying to place
orders and close out some of their old lines
of vegetables and fruit, but did not meet
with much encouragement, except some
moderate orders for corn and tomatoes.
Canned meats, in consequence of the
strength of the provision market, are firmer
in tone but quiet. Further offers of B. C.
canned salmon have been made here at \$3.50
f.o.b. on the Coast, but it is not explicitly
stated whether they are new pack or not,
while the offers do not comprise any of the
standard brands. Agents have not made
any propositions on new pack yet. Values
are steady. We quote: Lobsters, \$1.50 to \$1.90
per doz.; sardines, \$8.50 to \$9.50; salmon,
\$1.10 to \$1.45 per doz.; tomatoes, 80 to
90c. per doz.; peaches, \$2 to \$2.25 per doz.;
corn, 95c. to \$1 per doz.; marrowfat peas,
90c. to \$1 per doz.; strawberries, \$2 to
\$2.25; raspberries, \$1.75 to \$2; green
gages, \$2 to \$2.25; blue plums or damsons,
\$1.50 to \$1.75; pineapples, \$2 to \$2.25, and
3-lb. apples, 90c. to \$1.10.

GREEN FRUIT.

In green fruit, of course, the chief feature
of the week has been the arrival of the fruit
steamers. The quantities offered by these
have already been given. The first sale will
take place on Thursday, and the second
vessel's cargo next week.

APPLES—The apple market is quiet and
unchanged. We quote \$3 to \$5.50 per bbl.,
as to quality.

ORANGES—The orange market is dull but
steady. Valencia oranges are very firm and
25c. per case higher. We quote: Valen-
cias, \$4.25 to \$4.50; Messinas, \$2 to \$3;
ditto, bloods, \$3.50 to \$4.50; Californias,
\$1.50 to \$3 per box.

LEMONS—These are quiet and unchanged
at \$3 to \$3.50.

BANANAS—Fairly active and strong in
tone. No. 1, \$2.50 to \$3; No. 2, \$1 to \$1.50.

PINEAPPLES—There have been some
small receipts of pineapples, which sell at a
range of 7 to 25c., as to quality.

COUNTRY PRODUCE

EGGS—Steadily increasing receipts of
eggs have caused further declines in price.
We quote: 10 to 10 1/2c.

THE DOVER VINEGAR WORKS
PORT DOVER, ONT.

MONTREAL MARKETS—Continued

MAPLE PRODUCTS—The market for maple sugar is quiet and steady at 6 to 7c. per lb., and syrups 50 to 60c. per gal. tin.

HOPS—Dull and unchanged at 5 to 8c., as to quality.

HONEY—Dull and unchanged at 7 to 9c. for extracted, and 10 to 13c. for comb honey.

ONIONS, DOMESTIC—quiet and rather heavy at \$1 to \$1.50 per bbl.

ONIONS, IMPORTED—Business quiet. Egyptian, 2c. per lb., and Bermuda, \$2 50 to \$3 per crate.

BEANS—Little doing at \$1.50 to \$1.60 for hand-picked, and \$1.25 for medium grades.

POTATOES—A small trade is doing on the basis of 75c. per bag.

PROVISIONS.

There was no important change in the provision market. The feeling is firm and values are well sustained, but the volume of business doing is small. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

The feature of the flour market is the good enquiry from abroad, and, as cables are higher, the local demand for all grades continues fair, and the market is fairly active and firm. We quote: Winter wheat, \$3.90 to \$4; spring wheat, patents, \$4 to \$4.15; straight roller, \$3.75 to \$3.80; straight roller, bags, \$1.75 to \$1.80; extra, \$3.25 to \$3.75; extra, bags, \$1.55 to \$1.65; Manitoba strong bakers', \$3.85 to \$4.

There was no change in the feed market, prices being steady, with a fair demand. We quote: Bran, \$17 to \$17.25; shorts, \$19; mouillie, \$22 to \$23.

The market for oatmeal continues quiet and steady. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

CHEESE AND BUTTER.

The cheese market rules quiet and unchanged. New fadder cheese is offering at 8¼ to 8½c. on spot, and buyers are not urgent at this range. Cables continue depressing in tone, the market declining another 6d. Monday on both white and colored. The exports last week were 1,148 to London, 1,452 to Bristol, and 1,754 to Liverpool. This will about close out the shipments via the American seaboard.

Butter continues dull and heavy. Receipts of new made creamery and dairy are on the increase, and prices have an easier tendency. We quote: Fresh made creamery, 18c.; old creamery, 10 to 12c.; Townships dairy, 17c.; Morrisburg and Brockville, 16c.; western, 15c.; old dairy, 6 to 9c.

ASHES.

There is no change in the ashes market, which rules quiet and steady. We quote: First pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6 to \$6.10 per 100 lbs.

MONTREAL TRADE NOTES.

Laporte, Martin & Co. are receiving shortly some large lots of molasses. It is of prime quality.

Morrow & Ewing placed a round quantity of molasses on Tuesday, aggregating 3,000

puncheons, on the basis of 21c at the Islands, cost and freight.

The s.s. Fremona, which passed Quebec on Tuesday, had alone some 35,000 packages of lemons.

Advices from New York on Tuesday, quoted an advance of 1 16c on refined sugar. It had no effect here.

The first fruit steamer has arrived, the Astrid, and Hart & Tuckwell have the handling of most of the consignments.

There is practically no low grade Congou teas in this market. Buyers want them and are bidding higher figures for them.

Vipond, McBride & Co. among others, received some small consignments of Eleme figs, which have replenished the stock of this fruit.

Advices from the Islands this week are rather easier in tone and sellers show more disposition to meet buyers than they did last week.

Rose & Laflamme, of Montreal, report a decided improvement in the sale of the goods they are exhibiting at the Food Fair, namely: Ram Lal's tea, Paterson's sauce and Eureka pickles, McLaren's Imperial cheese, laundry rubber starch, and Fould's wheat-germ meal.

NEW BRUNSWICK MARKETS.**OFFICE OF THE CANADIAN GROCER.**

ST. JOHN, N.B., May 2, 1895.

BUSINESS during the past week has been active, but payments might be more satisfactory. The markets are, as a rule, firm, though fish, particularly smoked herring, are easy. A car of fresh beef has been received from Ontario during the week. This beef gives good satisfaction. In cream of tartar the foreign market has advanced 5s. to 7s. 6d., and prices are very firm, although so far there has been but little advance here as far as average sales go. In tea a fair trade is being done at easy prices. In the English market high priced teas are scarce. In coffee markets are firm. Our largest buyers are well stocked. In lumber the English market shows no improvement. The American demand is fair at low prices. There are large quantities to be sawn. In freight there is no improvement. There is no lack of vessels.

OIL—In burning oil, owing to the sharp advance the demand is falling off somewhat, buyers waiting to see what turn the market will take, there being some who look for a reaction. At present there is an easier feeling, there being no upward tendency for a few days. Lubricating oils are active, there being a good demand. We quote: Best American burning oil, 25c.; best Canadian, 22½c.; second, 18c., no charge for barrels.

SALT—The Trojan discharged some 5,000 bags of coarse salt during the past week, the prices from the vessel's side being 45 to 50c. Demand fair. The Dunvagen with 600 tons of coarse salt from Middlesborough is due. This is perhaps the only cargo of this salt which has ever been im-

ported. It differs from the Cheshire salt in its mode of manufacture, gas being used in the place of coal. The reason this salt does not come here oftener is because the principal offers of tonnage are from Liverpool. Ex store prices are: 50 to 55c.; fine factory filled, 95c. to \$1.10; 5 lb. bags, \$3 to \$3.25 per bbl.; 10 lb. bags, \$2.80 to \$3 per bbl.; 20 lb. wood boxes, 20c. each; 10 lb. boxes, 12c. each; cartoons, \$2 per doz.

CANNED GOODS—There are no very large quantities moving. Prices in vegetables are rather easier, except, perhaps, tomatoes, though no further decline is looked for. In canned beef prices are very firm. At present these goods are selling at about cost in this market. During the past week some enquiry has been made from American buyers to contract for lobsters, but no sales are reported. Prices offered are low. We quote: Corn, 95c. to \$1; peas, 90 to \$1; tomatoes, 95c. to \$1; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$2.90 to \$2.95; 1-lb. tins, \$1.70 to \$1.80; oysters, 2's \$2.20 to \$2.30; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; salmon, \$1.35 to \$1.40; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, 4 doz., \$5.50; chowder, 2 doz., \$3; scallops, 4 doz., \$5.50; Digby chickens, \$1.

DRIED FRUIT—There is but little doing and prices are easier. In Valencia raisins prices are off ¼c. Loose muscatels (California) are lower in New York, 3-crown being worth 3c. there. In dried apples, though light, stocks are easier, owing to there being no demand. In evaporated prices are also rather easier. It is understood that the N. S. dried shipped from here to New York for export, did not give satisfaction, owing to the manner in which they were packed. The causes of this and the way in which they can be overcome, have been pointed out in these columns a number of times. With these goods rightly packed a

Canned Scallops, Clams and Sardines.

profitable business could be done. There is a good demand for cleaned currants. Prices in 1-lb. cartons, 7½c.; bulk, 6½c. Dried apples, 5¼ to 5¾c.; evaporated apples, 8¼ to 8½c.; Sultana raisins, 6 to 7c.; Valencia, 4 to 4¼c.; layers, 5 to 5¼c.; London layers, \$2.10 to \$2.25; loose muscatels, 5½ to 6c.; currants, bbls., 3¼ to 4c.; half-cases, 4¼ to 4½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.; Bermuda onions, \$2.50 per crate; Egyptian, 2½ to 3c.

GREEN FRUIT—The quantity of fruit moving increases from week to week. Pineapples are quoted, as is rhubarb. In oranges there are large quantities to hand, and buyers are taking advantage of prices; Lemons are firm. Apples are about out of the market. Good fruit will bring a good price. We quote: Pineapples, 15 to 20c.; rhubarb, 6c.; apples, hard fruit, \$2.50 to \$3; soft fruit, \$1 to \$2; California seedling oranges, \$1 to \$2.75; navel, \$4 to \$4.50; Messinas, \$2.75 to \$3; bloods, \$2.50 to \$2.75 per half box; Valencia, medium, \$4.50 to \$5; large, \$6 to \$6.50; lemons, \$4 to \$4.50; bananas, \$1.75 to \$2.25.

DAIRY PRODUCTS—Eggs, contrary to expectations, continue scarce. It is not expected prices will hold as high as at present. In butter the position shows no change. It is reported good. Dairy sold in Carleton County this week as low as 10c., being 6 to 8c. below the price offered for same butter last fall. New butter, where good, is finding a fair sale at good prices. Cheeses are rather lower, owing to a good many old being still in the market and new not far away. This week in a wholesale way some changed hands at 1c. below last fall's prices. Prices: Butter—New dairy, 20 to 21c.; dairy, 12 to 16c.; creamery, 17 to 18c.; fresh creamery prints, 23½ to 24c. Eggs, 14 to 15c. Cheese, 10c.

MOLASSES—A three-masted schooner is at the North Wharf with a cargo of about 400 casks of Barbadoes molasses for W. F. Harrison & Co. It is understood that offers at a good profit covering the whole cargo have been received. Stocks here are very light, and everything points to a firm market. Higher prices are expected. There are some new St. Croix and Porto Rico here. Syrup is dull. We quote: New Barbadoes, 28 to 30c.; new Nevis, 28 to 29c.; Porto Rico, 30 to 34c.; syrup, 33 to 35c.; St. Croix, 27 to 28c.

SUGAR—Markets during the week have again been rather easier. A sale of 1,500 bbls. standard granulated at 3¾c. is reported. A railway man said during the week that it seemed an odd thing to him, but about the same quantity of sugar went west as came east. It at least shows business is being pushed. Demand is good. Prices: Granulated sugar, \$3.50 to \$3.65; yellow, 2½ to 2¾c.; Paris lump, 4¼ to 5c.; pulverized, 4¼ to 5c.

FISH—Demand is light and prices are easy. Large quantities of smoked have arrived during the week, and there are large quantities to come. They have been offered ex vessel as low as 4c. Gaspereaux are being caught in good quantities, large numbers being shipped away for bait. Lobsters and halibut are coming in more freely, and shad and salmon have been seen, though that is about all as yet. Prices: Halibut, 8 to 8½c.; gaspereau, 50 to 60c.; smoked, \$1 per 100; lobsters, \$6 per 100; large cod, \$4; medium, \$3.85 to \$4; small, \$3 to \$3.25; pollock, \$1.75; bay herring, \$1.40 to \$1.50 half bbl.; Shelburne, No. 1,

—SOLD BY—

All Grocers in Canada

ST. JOHN MARKETS—Continued.

\$4 per bbl.; half-bbl., \$2.40 to \$2.50.; smoked herring, 7 to 8c; Digby chickens, 10 to 12c.

PROVISIONS—Higher prices are affecting the demand, though a fair trade is doing. We quote pork rather higher. Prices: Clear pork, \$19 to \$19.50; mess, \$16.50 to \$17; beef, \$14 to \$14.50; pure lard, 10 to 11c.; hams, 11 to 12c.; rolls, 9½c.; compound lard, 8½ to 9½c.

FLOUR, FEED AND SEED.

Flour is higher all round, Manitoba at last having taken a decided advance, though still low as compared with Ontario. It is being sold here below cost of importation, and all flours are sold very close to cost. The advance in Manitoba is 25c. Millers all recognize a firm market, with prospects of higher prices. Stocks here and to arrive are quite large. In oats prices are rather easier. It is expected some P.E.I. oats will be offered in the market this week. Feed shows no change, but is firm. Seeds are higher and firmer at an advance. Large quantities are moving. We quote: Manitoba, \$4.50 to \$4.70; best Ontario, \$4.10 to \$4.25; medium, \$3.90 to \$4; oatmeal, \$4.25 to \$4.30; cornmeal, \$2.85; middlings, \$24 to \$25 on track; bran, \$21.50 to \$22.50; hand-picked beans, \$1.95 to \$2; prime, \$1.85 to \$1.90; oats, local, on track, 42 to 43c.; Ontario, 44 to 45c.; hay, \$8.75 to \$9; pot barley, \$4.15 to \$4.20; round peas, \$3.75 to \$3.90; split, \$3.70 to \$3.90; American timothy seed, \$3.20 to \$3.30; Canadian, \$3 to \$3.50; red clover, 11½ to 12½c.; Alsike, 11½ to 13c.

ST. JOHN MARKET NOTES.

Northrup & Co. say they can quote lowest prices on canned scallops, clams or sardines.

Over one thousand head of cattle passed through Moncton for shipment to England during the week.

The bakers in Shaw Bros.' employ went on strike during the past week, but their bread was to be had as usual.

The lumbermen of the Miramichi met with a large loss during the week, the ice sending adrift some \$10,000 worth of logs.

"Golden finnan haddies are gaining new friends every day," was remarked by the agents of these celebrated fish, Northrup & Co.

The merchants of St. John are much pleased to hear of the election of W. W. Ogilvie as a director of the Bank of Montreal.

Stream driving is now the order of the day. Large quantities of logs are being got out. Five hundred drivers are on the Tobique River alone.

Two of the bakers leaving Shaw Bros.' employ have gone into business for themselves, and are seeking the support of the trade. The name of the firm is Whipple & McDade.

THE CANADIAN GROCER had the pleasure of a call from Walter J. Harty, representing E. Myers & Co., of New York, the largest handlers of dried and evaporated apples in the States. He said they could use quan-

ties of Nova Scotia dried at good prices if they were but properly put up. But in the shape in which they are now put upon the market, they could do nothing with them.

Dalton & Etter, of Amherst, have assigned to W. G. Colhoun. The preferred creditors are: Rupert Etter, \$528; Black Bros., \$20; Dunlap Bros., \$20; W. Colhoun, \$60.

C. & E. Macmichael have been appointed agents for Walker's candy and Paterson's biscuits. They keep these goods in stock, which is much appreciated by the trade.

Subscription lists have been opened in the different branches of the Bank of Nova Scotia in favor of the Children's Home, Aylesford, N. S., kept by Miss Sterling, and recently burned.

Large quantities of potatoes continue to go forward to the States, 5,647 bushels having been shipped from Wolfville by schooner to New York during the week. Markets there are weak.

There was some excitement in certain circles on account of a story that Chinamen were being shipped from St. John into the States in perforated coffins. But, as far as can be discovered, there was no foundation for the report.

Baldwin Bros., of Boston, the raiding of whose offices here was reported by THE CANADIAN GROCER, have failed. It is always so with that class of stock brokers when the markets advance. This in itself should be a warning to people.

The necessary repairs to the Exhibition buildings are being pushed forward, and everything points to a most successful exhibition. We would advise our Canadian friends to apply early for such space as they wish, as those first applying will get the best positions.

LATE BUSINESS CHANGES.

McGuire & Watson is the name of a new grocery firm at Chatham, Ont.—Robert Robertson, general store, Goring, Ont., has assigned to Henry Barber & Co., Toronto.—Angus McNaughton, general store, Huntingdon, Que., has compromised at 50c. on the dollar.—Mrs. Geo. Clarke, Montreal, is retiring from the grocery business, as are also J. A. Cloran & Co., grocers, of the same place.—Geo. H. and Geo. F. P. Matthews have been registered proprietors of the Montreal grocery house of Geo. H. Matthews & Son, grocers, Montreal.—D. McDonald is starting a grocery business at Montreal.—Antoine Brisette and Hector Drolet have been registered proprietors of Brissette & Drolet, cheese makers, St. Brigitte de Laval.—Ernest Clermont, general store, St. Narcisse, Que., has compromised at 50c. on the dollar.—The Virden Milling Co., Virden, Man., has rented its mills to Grant & Mainewright.—The fruit stock of C. J. Robson, New Westminster, B.C., is advertised for sale.

IN THE DOMAIN OF RETAILERS.

TEASDALE BROS. is the name of a new grocery firm at Teraulay and Walton streets. J. T. Cummings, who formerly occupied the store, has removed to 298 College street, where he has got a nice store. The store at Teraulay and Walton streets was occupied by the father of Teasdale Bros., who was also a grocer.

W. H. Sharp, grocer, George and Mutual streets, Toronto, has recently doubled the capacity of his store and otherwise improved it.

R. McMillan, general merchant, Listowell, has sold out to M. Schinbein.

Harry Heath, Huntsville, was in Toronto on Saturday last making purchases of groceries, boots and shoes, dry goods, etc., necessary for the equipment of a first-class general store, which is to be opened in Huntsville by himself and partner.

Preston & Playfair, have opened a large general store in the Burton block, Midland.

James Blain, of Gilford, and J. S. Boddy, of Boddy Bros., Bradford, were in Toronto a few days ago on a purchasing trip.

W. Gowdy has bought out the grocery business of Andrew Dancy, Guelph. Mr. Gowdy is a young man of varied experience, having "clerked" with the leading grocers of Guelph and Mr. Whitelaw, of Brandon, Man. He is well connected both in Guelph and the neighboring country, and he should do well.

Hutchinson & Hill and D. Rowntree, both Weston firms, have amalgamated, having formed a joint stock company under the style of the Weston Trading Company. The new firm has taken the store formerly occupied by Mr. Rowntree, which had been considerably enlarged for the purpose. A successful career is anticipated for the new firm.

J. S. Ireland, merchant, Mount Forest, entertained a number of his male friends one night last week. Friend J. Hayden, one of John Sloan & Co.'s travelers, was of course in the party.

PERSONAL MENTION.

Roberto Bevan, of W. G. Bevan & Co., Denia and Malaga, was in Toronto a few days. He was piloted around among the trade by J. L. Watt.

A. Forsyth, of the tea house of Delmege, Forsyth & Co., Colombo, Ceylon, was in Toronto on Friday and Saturday last.

A. H. Scott, of the firm of Scott & Watt, Toronto and Montreal, was a passenger on the Teutonic which arrived in New York on Wednesday.

Albert Irving, formerly in Sloan & Crowther's sample room, is now one of John Sloan & Co.'s city travelers. The other traveler is Charles Parsons.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,
HALIFAX, May 3.

WE are starting the month with a change for the better. The weather has been exceptionally dry during the past week, and travel is being resumed. Business has been fairly good, and we may look for a continuance with a greater improvement.

The announcement that the Government has decided not to make any changes in the tariff has caused some relief among importers, and a steady increase may now be looked for. Collections are reported as greatly improved. The retail trade is also reported good.

FLOUR—There is a good demand for flour of all grades, and sales are fairly large. The main feature this week is Ogilvie's rise of 25c. To-day's quotations are: Hungarian patent, Manitoban, \$4.50 to \$4.60; Manitoba strong bakers', \$4.35 to \$4.45; Canadian pastry, \$4 to \$4.10; 75 per cent. roller patents, \$3.90 to \$4: 80 ditto, \$3.80 to \$3.90; 90 ditto, \$3.70 to \$3.80; extra, \$3.25 to \$3.35.

FISHSTUFFS—The market remains depressed in fishstuffs. The demand is very unsatisfactory. A small vessel load of fresh cod was offered here this week at 1c. The small fish were given away. Shipments, however, are made. A small cargo cleared for Porto Rico on Monday. Quotations, to which are: Cod, shore, prime, \$2 to \$3; bank, \$2.75; large bank, \$3.75; bay, \$2.25; Labrador, \$2.25 to \$2.50; haddock, Cape Breton, \$2 to \$2.25; western, \$2.25; hake, \$1.75 to \$2; herring, Bay of Islands, split, No. 1, \$1.50; Labrador, No. 1, \$4; No. 2, none; shore, No. 1, large, split, fat, \$3.50 to \$4.40; do., No. 1 fall, split, \$1.50 to \$1.75; round shore, No. 1, \$1.75; alewives, No. 1, \$2.50; mackerel, No. 3, large, \$12; salmon, No. 1, none; No. 2, \$14; No. 3, \$12; pollock, \$1.75 to \$2.

GREEN FRUIT—A splendid trade is being done in green fruit. A large consignment of oranges has been received, which are selling at our last quotations. Lemons have stiffened somewhat, being quoted at \$3.50 to \$4. Pineapples are easier in price, owing to large quantities coming in. To day's quotations are \$2.80 per dozen for extra fruit. Cape Cod cranberries are being received, and are selling at \$3.50 per box of one bushel. Bananas are selling well at \$2 and \$2.50. The market is fairly well cleaned up of apples. There are some good Russets in stock, which are worth \$4. New American rhubarb is worth 5c.

ONIONS—There is a good demand for Egyptian onions at 2c. per lb.

PROVISIONS—Beef is stiffer, native being quoted at \$8.50 to \$9, and Canadian at \$7.50. Veal is coming in plentiful and is selling at 4 and 5c. Spring lambs are

worth \$4.50 to \$5. Mutton is quoted at 10c.

EGGS—Several consignments of P. E. Island eggs have been received, the first cost being 11½c. with ½c. for freight, and are selling to jobbers at 14c. Retailers are asking 16c.

PRODUCE—Oats have stiffened somewhat. P.E.I. are quoted at 46 and 48c; Nova Scotia, 44 and 45c, and Canadian, 44 and 46c. Barley is worth 75c; beans, per bushel, \$1.75; peas, round, \$3, do. split, \$3.90 to \$4. Hay is worth from \$10 to \$11. P.E.I. potatoes are worth 45c and Nova Scotia 50 to 52c.

BUTTER AND CHEESE—There is absolutely nothing doing in butter and cheese. The former can be bought at almost any price, according to quality, and there is a lot of inferior quality on the market. New factory cheese is quoted at 11 to 11½c.

SUGARS—The sugar market remains unchanged. Quotations are: Porto Rico, in hhds., 2¾c; refined, cut loaf, 5c; granulated, 3¾c; standard A, 3½c; white extra C, 3¾c; standard yellow C, 3c; extra C, 2¾c; yellow extra C, 2½ to 2¾c.

MOLASSES—The molasses market is stronger, with fair enquiries. To-day's quotations are: Porto Rico, 32 to 35c; Trinidad, 30c; Barbadoes, 34c; Demerara, M. R. brand, 39c; St. Kitts, 28c. There is no Cienfuegos, Antigua, or Demerara N brand in the market.

DRIED FRUIT AND NUTS—These lines remain steady, particularly the former, with no change in quotations.

HALIFAX MARKET NOTES.

The assignment of J. V. and J. H. Dexter, of Liverpool, N. S., affects several firms here.

The Provincial Government has sanctioned fifteen cheese factories and creameries. They secure a subsidy.

The ship Glooscap arrived on Monday from the Phillipine Islands with 2,000 tons of raw sugar for the Acadia refinery.

THE CANADIAN GROCER is taken as the leading authority on trade matters down here. Every week articles are reproduced from it in the leading local papers. The

Chronicle this week reproduced the articles, "Our Butter in England," and "Disease Germs in Milk."

The death occurred here on Monday of Mr. John O'Brien, grocer, corner of Duke and Grafton streets. He was only ill a few days.

Two of our leading wholesale fish exporters were elected to the City Council last week, viz., George Musgrave and W. J. Butler.

Sole leather has advanced 2 cents per pound. A dealer told me to-day that he was offered double what he paid for a recent purchase.

The steamer Numidian, the last mail boat to leave here this season, took 329 head of cattle to Liverpool, and the steamer Borderer took 600 head to London. The cattle came from Manitoba.

The Truro Condensed Milk Company is building an addition to its factory. The addition will be 100 by 45 feet, with two storeys. The factory has been using 2,000,000 lbs. of milk yearly.

The Cornwallis creamery has again commenced the manufacture of cheese. The company is considering the advisability of putting up butter in hermetically sealed tins, the size of an ordinary oyster can, principally for shipment to the West Indies.

THE COCOA MOVEMENT.

The remarkably full movement of cocoa this season all over the world has been a serious drawback to operators endeavoring to infuse strength into the market, remarks N. Y. Journal of Commerce. At London, in particular, have conditions been depressed, and the British Board of Trade returns for the first three months of the year again show a most plentiful supply, and, in spite of augmented deliveries, there was a surprising addition to the bonded stock. The following are the figures to April 1st:

	1895.	1894.	1893.
Imports..... cwt.	13,760,890	11,899,520	7,214,175
Home consumption.....	7,106,079	6,054,686	6,830,631
Exports.....	2,280,809	2,316,531	1,801,605
Stocks in bond.....	24,653,663	15,827,546	9,596,245

Are You Superstitious ?

Some folks who believe in signs will tell you that it is unlucky to fall overboard on Monday, or to take hold of a buzz-saw in motion on Tuesday, or to fall downstairs with the coal-scuttle on Wednesday, or to shoot yourself on Thursday, or to sit down to dinner with 12 others, and only food enough for 10, on Friday; but they all agree that it is unlucky and unwise to sit down to dinner, lunch, or tea any day without having a bottle of **PURE GOLD TOMATO CATSUP** on the table. This catsup is the real article, made from ripe garden tomatoes. Sold in bottles and gallon jugs.

PURE GOLD MFG. CO.
TORONTO

A BRIGHT BOY.

It was such a bright boy who applied to the grocer for a job that he thought he would give him a little talk, just for a guy.

"If I hire you," he said, "I suppose you will do what I tell you?"

"Yes, sir."

"If I told you to say the sugar was high grade when it was low, what would you say?"

The boy never turned a hair.

"I'd say it," he responded promptly.

"If I told you to say the coffee was pure, when you knew that it had beans in it, what would you say?"

"I'd say it."

"If I told you to say that the butter was fresh, when you knew it had been in the store for a month, what would you say?"

"I'd say it."

The merchant was nonplussed.

"How much will you work for?" he inquired very seriously.

"One hundred dollars a week," answered the boy, in a business-like tone.

The grocer came near falling off his stool. "One hundred dollars a week?" he repeated in astonishment.

"With a percentage after the first two weeks," said the boy, coolly. "You see," he

went on, "first-class liars come high; and if you need them in your business, you've got to pay them the price. Otherwise I'll work for \$3 per," and the boy caught the grocer at his own game and got the job at \$3 per.—Detroit Free Press.

CHICORY CULTIVATION.

The cultivation of chicory root now occupies an important position in Flanders. The present large trade in the commodity owes its beginning to the native demand for a substitute for coffee. Not only is chicory cheaper for home consumption, but the doctors have recommended it as a healthy drink. It is said to be especially beneficial to persons suffering from disorders of the stomach. Belgians use it almost universally for a mixture with coffee, as they consider that the result is a greatly improved flavor. The chicory root grown in western Belgium is considered to be superior to the French or German product. The conditions of its growth and the facilities for its preparation are in that country favorable. A sandy soil and an abundance of water for properly washing the root are essential. Both these requirements exist in West Flanders. A secondary quality grows in the Walloon provinces. Its inferiority consists in the fact that much earth clings to the root, it being impossible to thoroughly wash it

owing to the lack of water supply. The yearly chicory crop of Belgium amounts to 280,000 to 350,000 tons. In the preparation by washing and drying this total is reduced 25 per cent.—that is, to 70,000 or 80,000 tons of root. Of this quantity the greater portion is exported, and the remainder, about 25,000 tons, consumed in Belgium.—London Grocer.

ADVANCE OF FIVE PER CENT.

The May issue of The Canadian Dry Goods Review announces an advance of from 5 to 6½ per cent. in bleached sheetings.

This advance applies to all widths in two qualities sold by D. Morrice & Sons, and to both plain and twills. These goods have been sold to retailers at prices ranging from 15½ to 25 cents, which were very low, lower, perhaps, than at any other time in the history of Canadian cottons.

Grey sheetings remain the same. The last change in price affected both greys and whites, and was a drop of about 10 per cent. This occurred at the beginning of the year.

Every indication points to the fact that cottons are going to stiffen, and retailers should carry a fair stock. Overloading would, however, be foolish.

One jobber, west of Toronto, was very lucky. The advance took place to-day (Monday), and on Saturday he mailed an order for a dozen cases of these goods.

LOW SUGAR PRICES.

The subject of sugar values is an interesting one at the moment, especially as refiners' prices in Montreal have so far failed entirely in following the upward march of prices in other markets. On the contrary, while the latter have been tending upward refiners in Montreal shaded their prices $\frac{1}{8}$ c., and they are now as low as they have been at any time during the past four months. For instance, though refiners will not accept forward orders for any large quantities at the price, they are steadily doing business in car lots of granulated at $3\frac{1}{4}$ c. per lb.

This is $\frac{3}{4}$ c. below what granulated is selling in New York, and that market has been steadily tending higher of late, the most recent advance being on Tuesday last, when values advanced 1-16c.

Other advices are equally firm, and owing to all these conditions many buyers of sugar would not be indisposed to placing orders at the present level, but, as already stated, sellers will not book ahead to any extent, owing to the low level at which prices now are.

COLLECTED A BAD DEBT.

The biter is himself sometimes bitten, says a contributor to The Miller. I heard the case of a London miller who, having trusted an underseller with 10 sacks of flour,

was unable to get a penny back. But he did not despair, and gave his travelers particular instructions not to lose sight of the debtor. Presently it was reported that the latter had come to the end of his credit and was entirely without flour. Then our wily miller, calling a carman, bade him take 10 sacks to the defaulter's door. If payment were tendered for the 10 sacks supplied, the contents of the van might be left on credit. When the baker heard these conditions he first parleyed, and then, thinking of his empty loft, produced the price of the former delivery—about 12 or 15 months old—and greedily took in the sacks. But picture his face on discovering that each sack was full of 280 pounds of sweepings.

SULTANA RAISIN SITUATION.

The London Produce Markets' Review of April 20 has this to say of the Sultana raisin situation:

"As an abstract question, the fact of 600 or 700 tons of Sultanas being transferred from Smyrna to London alters to no appreciable extent the general position, unless the fruit is being brought here with the idea of unduly forcing the market, which is not thought likely to be the case. If the present position is compared with the same period of 1894 there is really nothing to fear. The stock at the end of April last year was 2,000 tons, and at the same period of 1893 was 3,000 tons. If the cargo in question turns out as large as is reported the stock at the end of the month will be

about 3,400 tons. It must be remembered, however, that last year a stock of something like 10,000 tons remained in Smyrna, and that very considerable quantities were at a later period brought to London. At the present time the stock is said to be between 1,000 and 2,000 tons, some of which is too low for the English trade; so that it is impossible that any further weight of importance can be sent to our market. Taking the present stock as 3,400 tons, with little or no chances of its being materially added to, and the probable deliveries for home trade and export for the remainder of the season as being from 2,000 to 2,500 tons, it will be seen that there should only be a moderate stock when the fruit of the new season is available, considerably less than was on hand on the eve of the current one.

EARLY VEGETABLES.

Imported new potatoes and early vegetables will soon be common on the Canadian markets. The first consignment of the kind was received by a Toronto firm the other day in the shape of a shipment of first-class green string beans.

The crops throughout the south are this season late, owing to the prolonged cold weather of a few weeks ago. There is no indication, however, that the yield will be light. It will not be long before Missouri potatoes and vegetables will be in, and, according to the latest advices, in Toronto the prospects for a tremendous yield in all lines is assured.

ESTABLISHED 1851.

"Seeking the Bubble Reputation"

Shakespeare in writing these lines evidently did not mean an enviable reputation of nearly half a century, acquired by honest methods and giving full value for value received.

Ours is no "bubble" reputation.

For years past there has been no well-grounded complaint against E. B. Eddy's Matches. A user will sometimes, to satisfy himself, try different brands, but if he knows what's what—and he generally does—will surely return to the use of the "old reliable."

TOILET SOAPS.

IN the manufacture of soaps, and more particularly of toilet and medicinal soaps, we should always remember that it is impossible to prepare a superior article from inferior materials, says a writer in a contemporary. Both the lye and the fat—or stock, as it is called—should be of the best the market affords. In many, if not in all, cases it is necessary to purify the fat by melting it upon salt water, and washing with a small amount of strong, salty lye. The soap which is formed tends to carry down most of the impurities to the bottom of the layer of melted fat, and may be drawn off with the water.

The fats most used for toilet soaps are tallow, lard, olive, palm, cocoanut and castor oils. Cottonseed oil should not be used, owing to the fact that soaps made from it, even when it has been carefully refined, are liable to turn rancid and dark-colored.

Toilet soaps may be divided into several classes with regard to their manufacture:

1. Cold process.
2. Boiled soaps: (a) milled; (b) re-melted.
3. Transparent soaps: (a) with alcohol and glycerin; (b) with glycerin; (c) without alcohol or glycerin.
4. Medicated soaps.

In general it may be said that the cold process soaps are the least desirable, as the finished soap contains whatever impurities were possessed by the original fat and lye; and again, in order to insure complete saponification, without which the soap would become rancid and ill-smelling, it is necessary to use an excess of very strong alkali, which, remaining in the soap, is injurious to the skin, even though it be disguised by the glycerin, all of which is retained by the soap. Cocoanut oil is the fat used in the preparation of these cold process soaps—because it can be readily saponified by strong lye at a low temperature, and because its soda soap becomes very hard even when it contains as much as 75 per cent. of water.

The better grades of these soaps are usually made from a mixture of fats; cocoanut oil is always the chief one, but a small proportion of lard or tallow, as well as the replacement of a few per cent. of the caustic soda lye by potash, has been found advantageous. A good cold-process soap should be almost transparent on the edges, and should not taste of alkali when a freshly cut piece is applied to the tongue.

The manufacture of a soap stock or of Castile is divided into four parts:

1. Saponification. Killing the stock and boiling smooth.
2. Breaking the soap, or salting out.
3. Boiling the soap upon strong lye, or graining the soap.
4. Pitching and drawing off the nigre.

Having prepared the various stock soaps,

the next step is to convert them into toilet soaps. The further manufacture may be divided into six parts:

1. Cutting or shaving the stock soaps.
2. Milling these shavings in order to thoroughly mix them with each other and the perfumes and coloring matter, if the latter be used.
3. Plodding or pressing the milled soap into bars of the desired form.
4. Cutting the bars into cakes.
5. Warming or drying the cakes.
6. Pressing these cakes between dies.

Transparent soaps containing glycerin owe their especial value, first, to the fact that they lather freely; second, to the beneficial action of their glycerin upon the skin, and third, to their neutrality.

The beauty of the soap depends, of course, upon its transparency; but this cannot be taken as a guarantee of value and purity. In order to make a first-class transparent soap, extreme care and the very best materials are necessary.

The materials used are tallow, cocoanut oil, castor oil, stearin, spirit (90 to 96 per cent. alcohol), glycerin, sugar, water and caustic soda.

In closing we may say a word about shaving soaps. Nearly all of these soaps contain cocoanut oil; and, besides this, one-third to one-half of the lye used in saponification is made from caustic potash, which renders the soap softer and more readily soluble than pure caustic-soda lye. These soaps are not salted out, but are made like cold-process or transparent soaps.

ADVERTISING COUNSEL.

Advertising is as sure as shooting—but results depend wholly upon the aim, writes Jed Scarboro. The hunter who aims at the clouds when the game is on the ground may make a lot of noise, but is sure to go home with a belt full of blanks and an empty bag.

The advertiser who spends ten dollars for advertising and expects one hundred in return is close kin to the fellow who casts his bread upon the waters and watched the waves next day for incoming cake.

An advertisement writer, like a doctor, can do his best and no more.

Nobody reads yesterday's paper when today's is handy. Few people will read a stale advertisement when there's a fresh one in the next column.

The man who makes his mark in the twentieth century will do it with printers' ink.

The advertiser who, through envy, stabs at his competitor invariably wounds himself.

The man who is on the highway to success, and drops his advertising because he

thinks everybody knows him and will remember him, is almost certain to tumble into the coal-hole of obscurity before he reaches the goal.

NEW GREEN PEAS.

GREEN peas usually commence to arrive from Florida about the first of March, followed by Charleston and Savannah early in April, and by this time North Carolinas are in market; but the season is so late this year that Charleston and Savannah peas have not been plenty until this week, and none have appeared from more northerly sections. A few Florida have been arriving for some time, and while of poor quality, have brought very fair prices in the absence of other stock; but now that Charleston and Savannah are quite plenty, the Florida offerings are neglected and hardly bringing expenses. Some few New Orleans peas have also arrived, but are no better than Florida and do not command enough to make shipments profitable. Peas are so perishable that they cannot stand shipment from a long distance, and even the Savannah and Charleston are not very desirable, and the first really good peas in this market are from North Carolina. After North Carolina peas appear the seasons follow so closely that the market is liberally supplied and prices rule low. The weather conditions have been so unusual this year—a severe freeze in Florida in February and a cold spring—that stock is much behind time, and from the more northern points may come in too close together, but under ordinary conditions the various seasons open about as follows: Florida, March 1st; Savannah and Charleston, April 10; North Carolina, April 25; Norfolk, May 15; Eastern Shore (Virginia and Maryland) and Maryland, May 20; Jersey, June 1; and Long Island, June 15. From this it will be seen how the seasons follow each other up, and they last only a short time, as just as soon as stock becomes plentiful from a nearer point the more southern is neglected and shipments gradually stop. After Long Island peas are over a few come from Western New York, but do not sell very well, as season is too late. From all sections shippers have a standard package. A half-barrel crate or a half-barrel basket would sell to the best advantage in this market.—N.Y. Journal of Commerce.

THEY CLOSE AT FIVE O'CLOCK.

The clerks and office hands in Toronto wholesale grocery warehouses are wearing a more than usually benign smile. The reason, forsooth, is that the heads of the different houses have subscribed to an agreement promising to close their warehouses at 5 o'clock during May, June, July and August.

WINDOW DRESSING DEPARTMENT.

Does the smallware department get needed representation in the windows? says an exchange. It is surprising, with the great variety of articles and good reserve stocks that are kept in so many stores, that this department does not receive more attention from the window dresser. Perhaps the windows are too valuable to be taken for a notion display, the argument being used that notions sell themselves and a window display won't help them any. This may be so, but there is no harm in trying.

Many a merchant is skeptical as to the results of advertising until he makes the experiment.

There is no gainsaying the fact that the notion department when rightly managed is one of the most, if not the most, profitable in the store, and that includes a notion display at occasional intervals.

IT WILL ATTRACT.

The following from a contemporary, while primarily intended for a dry goods window, may be utilized for a grocery window with some modifications:

"Although bicycles and dry goods have little in common, an exhibit seen last week contained so many good points that it calls for more than passing mention, as the main idea can be used effectively in many other displays. The entire window, a small one, was lined with black velvet, and in the centre of the background was a large, massive gold picture frame enclosing a bicycle, also with a background of black velvet. The wheels were ornamented with multi-colored incandescent lights and were revolving with great rapidity; as this was the only light furnished, the polished framework of the wheel stood out in strong relief. That the display was an attractive one was best attested to by the crowd that thronged the walk. This exhibit was shown in a large department store in a neighboring city.

"The gold frame and black velvet background could be used with splendid effect

in displaying single articles that will stand showing in bold relief."

WELL LIGHTED WINDOWS.

A dark, gloomy window is a very unattractive thing, and a great many firms lose the great benefit which they might secure from windows, by neglecting to have their windows properly lighted, remarks The Dry Goods Economist. This is particularly so at night. If your store is situated on a prominent thoroughfare, where a great many persons are likely to pass after sundown, it is well to have your windows well lighted, so that the goods in them may be viewed, and so that the advertising value of your window may go on while your store is closed.

There is also another value in having the front of your store well lighted up, or in having the street in front of your store well lighted. It is natural for persons walking about at night to walk on the side of the street which is best lighted, and if the lights in your windows, or in front of your store are kept burning, they will naturally pass your store many times, when if your side of the street were dark they might go on the other side.

It is a good plan to get people in the habit of passing your store, whether it be night or by day. It is natural for persons to use one side of the street in preference to the other, where they have to pass along a thoroughfare frequently, and if you can get them in the habit of passing by your store at night, they are very likely to also pass it in the daytime.

We know of one instance in a moderate size city where the entire course of the travel of people was transferred from one street to another on account of the lighting which was indulged in by several firms. The street most convenient for the large throngs of people to go up and down was usually dark, and a neighboring street had three or four enterprising merchants on it

who kept their stores lit up every night, and thus made their street light and pleasant to walk along. Finally, people began to make a passway of the well-lighted street, and as they become accustomed to going up and down this street at night, they also did so in the daytime, and finally the dark street was left in its gloom, and the enterprising merchants had the pleasure of knowing that their heretofore neglected street had become the principal thoroughfare.

RAW SUGAR IMPORT.

In the House of Commons on Monday Hon. Clarke Wallace, in answer to Mr. Fraser, said the total quantity of raw sugar imported into Canada duty free under 14 Dutch standard for the nine months ended March, 1894, was 221,218 780 pounds. From that time until June, 1894, duty having been remitted to No. 16 Dutch standard, the importations under 16 were 82,571,029 pounds, a total for the year of 303,789,809 pounds. The total quantity under 16 Dutch standard imported in nine months of 1894-5 was 220,712,442 pounds. He could not say whether this sugar had been refined in Canada. As the tariff admitted such sugar free without a proviso as to how it should be subsequently dealt with, there was no supervision over it.

CANNING FACTORY AT KAMLOOPS.

A meeting was held last week in Kamloops to discuss the question of establishing a fruit canning factory in that place. Mr. J. H. Falconer, of Victoria, explained the proposal he had to make in regard to it, in which he pointed out the benefit such an enterprise would be to the farmers. Lists for subscriptions to the capital stock were opened and good responses were made, some subscribing their amounts in vegetables or fruit to be supplied to the factory when in operation. A committee was appointed to secure further subscriptions and arrange for the necessary supply of the raw material. It is anticipated that the enterprise will be carried out. Mr. Falconer has asked the City Council of Kamloops to assist him in securing him a site for the factory.—Statistic News-Advertiser.

CHANGES.

J. A. Joly, grocer, Montreal, is moving to St. Rose, Que.

John Prescott, general store, Kent Bridge, Ont., has removed to Dawn Centre.

A. O. Skinner, general store, North Pelham, Ont., has been succeeded by Arch. A. McGlasham.

George Carton, grocer and pork packer, Peterboro', Ont., advertises that he is giving up business.

Henry Gildner, grocer, etc., Berlin, Ont., is giving up business there and moving to Grand Rapids, Mich.

Dame Amelina Charbonneau, wife of Alfred Renaud, has been registered proprietress of A. Renaud & Co., grocers, Montreal.

DEATHS.

Alex. Lindsay, grocer, St. Thomas, Ont., is dead.

Elisha Embree, flour dealer, Amherst, N.S., is dead.

John W. James, flour dealer, Lawrence-town, N.S., is dead.

FIRES.

Norman McAskill, general store, Framboise, N.S., has been burned out. Loss, \$6,000; no insurance.

A serious fire occurred on Sunday just north of Toronto Junction, Ont., in which the building and plant of the C. R. S. Din-nick Paving Brick Co. were totally destroyed. The damage amounts to between \$5,000 and \$6,000.

The man who deserves riches can be rich without them.

The man who can work and not worry, rest and not rust is not apt to be an object of interest to an undertaker.

PORK PACKING IN THE WEST.

The Cincinnati Price Current last week contained its annual statement of winter pork packing in the west. In brief it shows the total winter packing to be 7,191,000, an increase of 2,307,000; average weight of hogs was 232.73 lbs., a decrease of 15.47 lbs.

This total has been equalled in but two previous seasons, 1890-91 and 1891-92, when prices were reduced much lower than they were the past winter.

The western manufacture of product during the winter shows a gain of 258,000,000 lbs of meats and 65,000,000 lbs of lard. The exports for the same period, four months, showed a gain of only 4,000,000 lbs. of meats, while there was an increase of 32,000,000 lbs. of lard, in comparison with such distribution in the preceding winter season.

The returns of stocks of hog product on hand in the west on March 1 show a large total, having been exceeded in but two instances, with reference to meats, in 1891 and 1892. The stock of lard shown is moderate, much below the usual quantity, although 57,000 tierces larger than last year, when the stock was especially low.

The manufacture of barreled pork was considerably increased in comparison with the preceding year, but was short of various former seasons. The accompanying exhibits show comparisons.

The average cost of hogs in the west for the winter shows a decline of 98 cents per 100 lbs. compared with 1893-94.

The total amount paid out by western packers for hogs during the four months was \$71,698,000, and for twelve months ending March 1 an aggregate of \$172,679,000—which figures are suggestive of the enormous proportions of this interest in this country. In addition to this, the statistics of slaughtering of hogs at the seaboard and other eastern localities for the past year indicates an amount reaching about \$60,000,000 paid out for hogs—so that the aggregate, west and east, covered by the statement herewith submitted represents \$232,000,000 paid out for hogs, or a daily average of three-quarters of a million dollars.

A MAZAWATTEE ATLAS.

The Mazawattee Tea Company has issued and copyrighted a neat little atlas, containing sixteen full-page colored maps, specially prepared and compiled from the latest authentic sources. The divisions and countries shown are as follows: The World, England and Wales, Scotland, Ireland, Europe, Asia, India, Africa, South Africa, North America, South America, United States, Canada, Australia, New Zealand and Ceylon, from which last island the Mazawattee tea comes. Running through the atlas are illustrations showing the people of different ages and climes who drink Mazawattee.

CURRENT MARKET QUOTATIONS

TORONTO, May 2, 1895.

This list is corrected every Thursday. The prices are solicited for publication, and are for such quantities and quantities as are usually ordered by retail dealers on the usual terms of credit.

Goods in large lots and for prompt pay are generally obtainable at lower prices.

All quotations in this department are under the direct control of the Editor, and are not paid for or doctored by any manufacturing or jobbing house unless given under their name, the right being reserved to exclude such firms as do not furnish reliable information.

Solomon said,

"There is nothing new under the sun,"—but Solomon never saw the Dayton Computing Scale. Is there nothing new about a scale that weighs in money instead of pounds and ounces? Nothing new about a scale that absolutely prevents mistakes? If not, then Solomon spoke the truth.

Are you interested in goods that will save you time, trouble and money? The Computing Scale is open for your inspection, and we will gladly give you all particulars.

TANGLEFOOT

SEALED

... STICKY FLY PAPER ...

"Little" Tanglefoot

5¼ x 9 inches.

Particularly adapted
for Show Windows and
Fine Rooms. . . .

25 Double Sheets in a
box, 15 boxes in a case.

Retails for 30 cts. a box
Costs \$2.50 per case
PROFIT Eighty per cent.

WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

Notwithstanding the reduction in price the quality is improved in general. The paper is a little stronger, a little stickier, and will remain sticky a little longer.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, MAY 10, 1895

(\$2.00 per Year) No. 19

DROPS FROM THE EDITOR'S PEN.

Every clerk needs recreation, but recreation does not mean wasting time.

* * *

A merchant who has capital behind him has usually good prospects before him.

* * *

Cash leads to gold; credit to dust and ashes, commercially speaking.

* * *

Business must be won by diplomacy. The merchant should therefore be a diplomat.

* * *

People who own cold storage establishments appear to often have cold satisfaction.

* * *

Sour clerks should follow sour apples—to the cider mill. They do not "take" well in the store.

* * *

A London grocer who failed was indebted to his father. Most of us are indebted to our fathers.

* * *

The merchant who biteth off his customers' heads eventually becometh choked by the practice.

* * *

When merchants lapse into poetry, suspicious is one that the prose of business gets scant attention.

* * *

Because oil is down it does not follow that it has in its decline lubricated a way for other staples to drop.

* * *

"New Ideas in Waists." It is safe venturing that the old-fashioned waists are good enough for most grocery clerks.

* * *

Merchants and clerks who are being "worked to death," have consolation in knowing that they have not time to get miserable.

* * *

Petroleum is now declared to be a cure for diphtheria. A few weeks ago the specu-

lative poor were dreaming that it was going to cure their poverty.

* * *

This is probably about how future dictionaries will describe the noun Patron:

Patron: One who proposes to revolutionize politics and commerce; a man who sinks principle to court favor and emoluments from the majority; an egotist; an unco-guider.

* * *

The trade conditions are rather hard on the pessimists these days. They can now soliloquise upon their own misfortune instead of that of the country.

* * *

Gall has been put in somebody's cup by the increase in the duty on sugar. So there would have been had no increase been made.

* * *

The price of wheat is still the barometer to which we turn when looking for indications regarding trade prospects. The reading at the moment augurs well.

* * *

A Wrexham (Wales) minister forsook the Gospel for groceries in 1891. He was no more successful behind the counter than behind the pulpit. At any rate he is now a bankrupt.

* * *

Several New York grocers have been putting their wagons on the sidewalk, and each of them so doing has been taxed the sum of \$5. They evidently thought they were back in the old colonial days.

* * *

A good many people are laughing at the impracticability of a railway to Hudson's Bay. It may be impracticable, but it is dangerous to be too positive about the matter. It may be that he who laughs last laughs best.

* * *

If the late president of the Grand Trunk Railway Co. is able to make people believe that the unsatisfactory state of the company's affairs is not the fruit of his regime, he must be possessed of great hypnotic

powers, which it is unfortunate he did not develop before along the line of profit creating.

* * *

When lawyer members of Parliament undertake to dig canals with orations it is usually the impracticability of their schemes that is exposed and not the bottoms of the canals which they propose to excavate. Shoemaker, stick to your last.

* * *

An advertisement does something more than proclaim the wares the advertiser has for sale. It tells what manner of merchant he is: whether live or dead; dull or bright, passive or pushing. Advertisers should govern themselves accordingly.

* * *

"Now is the time for every grocer to become a champion of vegetarianism," enthusiastically remarks a contemporary. It is, eh? How about the canned fish and meats on his shelves? It is unwise for a man to cut off his nose to spite his face.

* * *

St. Louis has a grocer who, although he has been in business over 50 years and did a cash trade and never used tobacco, is no better off than the day he started. Herald it in Gath: He never advertised. He is now being advertised as a horrible example.

* * *

A merchant cannot be too careful from whom he buys. A New York grocer has learned this by experience. He bought from a stranger what was purported to be two barrels of granulated sugar, but which were two barrels of ashes with six inches of granulated sugar at either end.

* * *

It was stated before a committee of the British House of Commons the other day that the shop hours in the suburbs of Birmingham averaged 90 per week or 15 per day. There are apparently some stores in Toronto that are not much, if any, behind in this respect.

WINDOW DRESSING DEPARTMENT.

ONE of the most important subjects presented to every retailer for consideration and reflection, says an exchange, is that of display as a trade-maker, a business-bringer and a store-filler. This subject is continually being presented, more forcibly at some times than others. Display is ever proving its effectiveness. It is just as surely demonstrating its superiority over many apparently more favored methods. At the same time, the majority of merchants appear almost to ignore it.

* * *

A POINTER ON TICKETS.

When the store is large and covers much floor space, we would suggest that the location of the department selling the goods that are described by the ticket be mentioned. It would save many inquiries of the usher, and at once put the department in touch with anyone who had any intention of giving the goods a further examination, as the sign points out the way to the stock. These little things are all valuable in their way and exert a much larger influence on the trade at large than is usually supposed.

* * *

PREPARING A DISPLAY WINDOW.

The first step toward making an attractive and effective display window, remarks an exchange, is to see that the glass is thoroughly clean and bright. No matter how temptingly stock may be displayed or however superior it may be, if the glass through which it is to be seen is dull or muddy, much of the desired effect is spoiled. Whatever may be the methods adopted to clean windows, it will be necessary to give them a thorough washing periodically. In washing a window certain points should be observed, which will not only facilitate the process, but also greatly simplify it. * The window should first be thoroughly dusted and the wood-work cleaned. Water should never touch a window while the sun shines directly on it. Neither ought cold water or soap to be used. Warm water in which a small quantity of ammonia has been poured will be found best, and, when dried with a rubber or soft cloth and afterwards polished with a piece of soft, dry chamois, it will shine and sparkle like a diamond. Overcrowding is one of the worst things to do in arranging the stock in a display window. A few superior articles, artistically arranged to catch the eye, will not only make an effective impression with regard to the line of goods represented, but also with regard to the goods generally carried by the establishment.

* * *

A SCENE FROM VEGETABLES.

In one corner build a dwelling from packages of soap. Form a railing around this

dwelling by nailing carrots to a skeleton frame. Cover floor with parsley to imitate sod. Have potatoes mounted to represent animals, which may be imitated by using toothpicks for legs; clover for the eyes, and the tails made with a piece of stiff rope twisted into shape. A more animated appearance will be much increased when pieces of paper are cut and gummed on, to represent the ears.—Harry Harman.

* * *

A SEASIDE SCENE.

This is recommended by Harry Harman as a simple way for making a seaside scene:

Across the front of the windows is laid a strip of glass, to represent water. Running back from the edge of this is a strip of shore which can be easily manufactured of yellow or brown sugar. The drift that one can see along the shore can be simulated by sticks of cinnamon, or whole ginger and cloves. The sugar should be dug into holes, and show little heaps such as children make in their play. A brownie or two with a toy spade and bucket and a small toy boat, will make a sea shore scene that will be unique, and a sure attraction to every passer.

RETAILERS AND FIRE INSURANCE.

There was a large attendance of merchants and others connected with the retail trade of the city at the meeting of the Retail Association held in Delmonico hall last night. Mr. R. T. Riley and Mr. Jas. Ashdown, both leading promoters of the new local fire insurance company, were present for the purpose of explaining the nature of the project. Mr. Riley addressed the meeting at length, going fully into details, and urged upon the retailers the importance of supporting a home company and assisting in keeping a portion of the \$2,500,000 now annually sent out of the country in premiums. Mr. Ashdown made a few remarks on the subject, and the meeting then endorsed the scheme and gave assurances of hearty support from members of the Retail Association.

The regular business of the association was then proceeded with. The Membership Committee reported thirty-five new members enrolled during the past week.

The Early Closing Committee reported some infractions of the early closing by-law in the north end, and it was decided to notify the police, and ask them to take action accordingly.

After some other business of an internal nature had been transacted the meeting adjourned.

The association has now a membership of 200.—Free Press, Winnipeg.

SALMON PACKERS AGGRESSIVE.

IN view of what appeared in our columns last week regarding the canned salmon situation, the following from The N. Y. Journal of Commerce will be doubly interesting to readers of THE CANADIAN GROCER:

"In letters that have been received here very recently information is given that would warrant the inference that the combine of packers of Alaska salmon, properly termed the Alaska Packers' Association, is inclined to be aggressive, and it would not be surprising, in some quarters, if the management is endeavoring to control the salmon canning industry of British Columbia and the Columbia River. In other words, there are faint signs that the idea of concentrating the entire industry is seriously considered. We learn that British Columbia packers are somewhat disturbed by the fact that the Alaska Association, who have a factory of considerable capacity in a good locality, have latterly been paying extremely high prices for raw fish, making the cost so high that the British Columbia packers would find it difficult to figure out a profit at current selling prices for the canned article if the manoeuvre of the combine resulted in fishermen becoming excited and refusing to sell except at the high rates paid by the latter. There is an impression that the object of the Alaska Association is to assert their power in this way instead of doing anything that might seriously disturb the European market, and to either gain a stronger footing abroad by being the lowest sellers or induce the British Columbia canners to co-operate. While interesting, as far as it goes, the movement of the combine has no perceptible bearing upon the American market, and there is no sign that the European markets have been affected. That there is renewed effort to consolidate the Columbia River factories is a fact, however, and this is at least suggestive in connection with what has been done in the direction of influencing the British Columbia canners. The preparations made indicate that the Alaska Association will pack quite as much salmon this season as they did last year, and there is something more than faint indication that goods put up under the new labels of the association will be pushed for sale in the American market and probably in England."

NINE MONTHS' TRADE.

In the House of Commons, on Monday, Hon. Mr. Wallace, in answer to Mr. Davies, said the total value of goods imported for the nine months ended March 31, 1894, was \$94,341,482. The total value entered for consumption in the same period was \$86,370,739, and the amount of duty collected was \$15,303,862. The total value of imports for the nine months ended March 31, 1895, was \$80,987,079; the total entered for consumption was \$78,126,603, and the amount of duty collected \$13,278,856.

NO ADVANCE IN MOLASSES.

It is not likely that the increase of $\frac{1}{4}$ c. per gallon in the duty on molasses will have any immediate effect on spot values at Montreal.

At any rate, the Wholesale Grocers' Guild have not, up to the time of this writing, announced their intention of asking any advance. On the other hand, THE CANADIAN GROCER is given to understand that they are accepting orders for future delivery on the old basis of $30\frac{1}{2}$ c. in car lots and $31\frac{1}{2}$ c. in less than car lots.

The truth of the matter is that, even allowing for the slight increase in duty, these prices, considering the first cost at the Islands, allow them plenty of margin to work on.

With the exception of one cargo, all of

the shipments now on the way to Montreal were bought at 21 c., cost and freight at the Islands.

To lay these goods down plus the new duty means $28\frac{1}{2}$ c. net cash on the wharf Montreal, so that, even allowing for cartage, etc., 30 c. is a fair price for round lots of stock. On this figuring the Guild, at the prices they are now asking for future delivery, have a margin of from $\frac{1}{2}$ to 1 c. per lb. to work on. It is easy to understand therefore why they do not see the immediate necessity of asking an advance. On the other hand, it is understood that two of the commission men in Montreal have been caught by the duty. That is, they have two cargoes on the way, and, not expecting any changes, omitted to provide a clause to that effect. They stand to sell their goods, therefore, at practically what it costs to lay them down, or 30 c.

The extra revenue that the Government will derive from molasses by the recent change is inconsiderable. For the fiscal year ending June 30th last, the duties, at $1\frac{1}{2}$ c. per gallon, only amounted to \$54,000 odd.

Montreal is the leading port for molasses. Its importations for the twelve months ending Dec. 31 were only 963,413 gallons, so that from Montreal the Government will receive only an additional \$2,500 or so, based on the imports of 1894.

THE DUTY ON CANNED FRUIT.

The new duty of $\frac{1}{2}$ c. per pound on canned fruit should not seriously inconvenience the trade. Most of the canned fruit consumed in Canada is of domestic manufacture, and is generally far superior to any foreign goods that have been offered to the trade. Efforts have from time to time been made to work up a trade in California canned fruit, but they did not result successfully. For instance, last fall a selling agent visited Montreal to try and secure some orders, and was only successful in placing five carloads of goods in the aggregate. This was the sum total of Montreal's importations of foreign canned fruit last season.

LEMONS MAY BE DEAR.

Some of the fruit ships from the Mediterranean have arrived at Montreal and unloaded their cargoes of oranges and lemons. The stocks are reported to be extra fine, but it is the general opinion that lemons, at any rate, will be rather short in quantity. The effects of the storms in Sicily are now being seen. Judging from the arrivals and the cargoes reported to be on the way over, the supply of lemons will not equal the demand. The New York Fruit Trade Journal, commenting upon the situation, says that lemons to-day are selling at an advance of 33 per cent. on the prices ruling at this time last year, and that before June is over boxes of lemons now selling at \$3 a box will bring from \$6 to \$8.

Why do we advertise

PAN-DRIED OATS? Do we do it for fun or for business?
We advertise them because they are so superior to others that they will sell readily without boring the dealer to death with drummers. We send samples for examination to those who will ask for them. The downright GOODNESS of our oats pleads its own way into the dealer's heart.

E. D. TILLSON, - - Tilsonburg, Ont.

TEAS

FAN

BRAND

EDWARD ADAMS & CO. - London, Ont.

Our sales of Ram Lal Pure Indian Tea have doubled during the past few months.

WHY?

Owing to the heavy advance in all Indian Teas our competitors have been forced to choose between two alternatives. Advance price or reduce quality. The latter has been their choice.

Our choice has been to keep Ram Lal pre-eminently the King of Package Teas, exactly at the same high standard of unvarying excellence that it has always occupied, regardless of our profit. The increase in our sales is a satisfactory answer that our policy is correct.

Ram Lal towers above its competitors, not only a trade winner, but a trade keeper.

CULTIVATE AFFABILITY.

All the advantages do not accrue to the proprietor of the department store. This is evident in more than one respect. Take one example:

He has not the same advantage as has the ordinary retailer for cultivating the acquaintance of his customers.

First, his customers are of the transient order—here to day and somewhere else tomorrow. Then, out of the multitude that throng his store, to comparatively few has he the opportunity to extend a cordial greeting or give a warm shake of the hand, even if he so desired.

All this the retailer can do if he so will.

There is scarcely anything more necessary to successful trade than for a retailer to be on intimate terms with his customers.

The merchant who has a pleasant greeting for people—adults as well as children—when they enter his store, is sure to secure their good will. And if this affable manner is supplemented by honorable dealing and fair profits, their custom will follow.

Affability is one of the keys to success; cultivate its use.

A WARNING.

A WARNING to young men entering upon commercial or financial careers, and particularly to men occupying trusted positions, is the five-year sentence imposed upon Alexander Wilkie, the confidential accountant of W. D. Matthews & Co.

Entering the firm's employ as a boy, his ability for commercial pursuits developed as his years grew, and eventually he occupied the high and trusted position of cashier and general confidential man, with a big salary as his emolument.

Ample as was his salary for ordinary purposes, it was not large enough to support

Wilkie in the pace he eventually developed. Then he began to draw upon the funds of his employers.

At first, doubtless, he contemplated nothing worse than to borrow the sum he appropriated. Then, to theft he added fraudulent entries. The extent of his defalcations is not known to the public, but they are estimated all the way from \$40,000 to \$90,000.

Wilkie's life is ruined, and the worst of it is that a wife and several children have got to share the disgrace that his own dishonesty has brought upon himself.

The downward career of Wilkie really dates from the time when he began to live above his means. Unfortunately there are too many who are doing the same thing. Some have resorted, and others are doubtless resorting now, to the fraudulent practices that have sent this unfortunate man to the penitentiary. Still others, while not going to the length of pilfering their employer's cash-box, are obtaining goods on credit which they will never pay for. A sojourn in a prison cell would not do this class of people any harm. On the contrary, it might have a salutary effect upon them and all who are inclined to follow in their footsteps.

When we cut our garments according to our cloth, we are not so likely to surreptitiously take from our neighbor's web.

CLAP-TRAP POLITICS.

COLONEL F. C. DENISON, M.P., has given notice of his motion in Parliament favoring the deepening of the St. Lawrence canals to 20 feet.

The project is out of the range of common sense. It would cost many millions, and the debt of Canada is already large enough. It would not be fair to the Maritime Provinces to saddle the country with the cost of a 20-foot channel. The 14-foot channel now being constructed will call before completion for another \$6,000,000, and if Col. Denison wants to do something practical let him urge the hurrying on of the new Soulages canal, the missing link in the chain. A 14-foot depth from Port Arthur to the Gulf will enable vessels doing a coasting trade to ascend to the head of inland navigation, and will afford all the facilities we need for the next twenty years.

Who are advising the member for West Toronto in this matter? He is a lawyer—of course!—and cannot be expected to gauge the merits of a commercial undertaking. Canals with a depth of twenty feet would be useless unless the St. Lawrence itself were deepened in some places between Montreal and Kingston, and the vessels of that draught could not enter one-quarter of the lake harbors. The scheme is supremely

absurd. No important Board of Trade has endorsed it.

A necessary sequence of putting so many lawyers and so few business men in Parliament is, that to one grain of common sense legislate on, you get a cartload of nonsensical propositions.

Mr. Haggart, who, with Mr. Wallace, are the only representative business men in the whole Dominion Cabinet, very quickly shut down the discussion on a similar proposition a couple of years ago by showing its absurdity.

CANDIED PEELS STRONG.

Strong, indeed, appears to be the position in candied peels. Ever since the damage to the lemon and other crops by frost the tendency of the market has been upward. This tendency now appears to be more marked than ever.

Advices from Carl Neimack & Co., of Leghorn, state that not only are prices still gathering strength, but that next year's values in candied peels are likely to be still more affected, last month's frost having seriously damaged the plants as well as the fruit.

The situation is all the more interesting to Canadians in view of the recent change in the tariff, which imposes an additional half cent per pound on candied peels.

DEMORALIZED MARKETS.

Andrew Gunn, of D. Gunn, Flavell & Co., Toronto, who recently made a trip from the Queen City to Montreal, states that the provision market of the eastern metropolis is badly demoralized. He gathered while there that in Montreal alone between 20,000 and 25,000 packages (100,000 to 125,000 pounds) of last year's creamery and dairy butter are being placed in cold storage to be held over until 1896 in hopes of a better market. Some dealers place the amount being stored at 60,000 packages, but Mr. Gunn thinks his figures are about right.

The British butter market is even in a worse condition, according to all accounts, for Mr. Gunn learned that a Montreal produce dealer, who recently returned from England, while over there purchased about 1,000 packages of the best American creamery at 37s. per 112 lbs. (or 6½ to 7c. per lb.) and had it stored for carriage over to next season.

Notwithstanding the low prices, says Mr. Gunn, the prospects seem bright in Montreal, and now that navigation is open the produce dealers and business men generally are looking forward to a good season's trade.

THE NEW TARIFF---HOW IT AFFECTS GROCERIES.

MORE than a month ago THE CANADIAN GROCER intimated that if the Government undertook to provide in the revenue for the deficit sugar would be one of the articles upon which an increased duty would be put.

Abroad, however, this opinion did not generally obtain. Everybody knew there was a deficit which in some way or other would eventually have to be provided for, but nearly everybody thought that no material changes would be made in the tariff at all this session, particularly in the sugar clauses. In a word, they thought the Government was afraid to do so.

However, as far as the great majority of the people was concerned, it was the unexpected that happened. And not only was the duty on sugar increased, but that on a number of other lines as well.

The changes as announced in the budget speech brought down on Friday last were as follows, together with a comparison of the figures obtaining under the previous tariff:

ARTICLES.	NEW TARIFF.	OLD TARIFF.
Spiritous or alcoholic liquors—		
Ethyl alcohol, gin, rum, whisky, methylated spirits, brandy, etc.....	\$2.25 per gal.	\$2.12½ per gal.
Spirits and strong waters of all kinds.....	\$2.25 per gal. and 30 p.c.	\$2.12½ per gal. and 30 p.c.
Alcoholic perfumes and perfumed spirits, etc., when in bottles containing not more than 4 oz. .	50 p.c.	50 p.c.
Ditto, when in more than 4 oz. bottles, etc.....	\$2.25 per gal. and 40 p. c.	\$2.12½ per gal. and 40 p. c.
Nitrous ether, etc.....	\$2.25 per gal. and 30 p. c.	\$2.12½ per gal. and 30 p. c.
Vermouth, not more than 30 p. c., and ginger wine, not more than 25 p. c. .	80c. per gal.	75c. per gal.
Ditto, if containing more than these percentages.	\$2.25 per gal.	\$2.12½ per gal.
Condensed milk.....	3¼c. per lb.	3c. per lb.
Condensed coffee, condensed with milk, milk foods, etc.....	35 p. c.	30 p. c.
*Biscuits, sweetened.....	27½ p. c.	27½ p. c.
Fruits in air-tight cans or other packages, pairs or packages, included in weight.....	2¼c. per lb.	2c. per lb.
Fruits preserved in spirits.	\$2 per gal.	\$1.90 per gal.
Jellies, jams and preserves, n.e.s.....	3¼c. per lb.	3c. per lb.
Paints and colors ground in spirits, spirit varnishes, lacquers.....	\$1.12½ per gal.	\$1 per gal.
Sugar, above 16 Dutch standard in color, and all refined sugars.....	\$1.14	64c.
Sugar, n.e.s., not above 16 Dutch standard, package free.....	½c. per lb.	free
Glucose, or grape sugar.....	1¼c. per lb.	1c. per lb.
Sugar candy, confectionery, sweetened gums....	½c. per lb. and 35 p.c.	35 p.c.
Candied peel.....	½c. per lb. and 35 p.c.	35 p.c.
Pop corn.....	½c. per lb. and 35 p.c.	35 p.c.
Syrups and molasses, n.o.p.	¾c. per lb.	½c. per lb.
Molasses, 40 degrees or over.....	1¼c. per gal.	1½c. per gal.
†Molasses, less than 40 degrees and not less than 35 degrees.....	1¼c. per gal.	1½c. per gal.

*Under the old tariff the duty on biscuits of all kinds was 25 per cent.

†The duty for each degree or fraction of degree less than 40 degrees is still one cent.

The excise duty on distilled spirits is increased by 20c. per gallon to \$1.70.

From the duty on raw sugar the Government expect to realize \$1,200,000 or \$1,250,-

000, and another \$1,800,000 from the increased duty on spirits.

Coming, as they did, so unexpectedly, the changes caused some excitement in the trade; and there seems to be a surprising amount of satisfaction expressed. The only particular in which there is any criticism is that the Finance Minister, while amending the tariff, did not place a duty on tea. "There is nothing could have stood a duty better," is in effect practically what nearly every grocer who expressed an opinion in this respect said.

The protection accorded the refiners is practically the same as under the old tariff. For instance, although they have to pay ½c. per pound on the raw product they import, they have a protection of \$1.14 on the refined, and the half cent per pound deducted from this latter figure gives a remainder of 64c. per hundred pounds, exactly the same as before.

But the new tariff will, nevertheless, be much more advantageous to the Canadian refiner than was the old one.

The bane of the refiner's lot during last fall and winter was the German granulated sugar, which was imported into the country in large quantities, causing abnormal declines in the price of the domestic product. With the duty on refined sugars now \$1.14 per hundred pounds instead of 64c., obviously the imported article will have fewer terrors for him, which in turn naturally means a steadier market and better prices. Then the new tariff on syrups is 3½c. per gallon more favorable to the Canadian refiner than was the one it superseded.

There has not been a great quantity of syrup coming into the country of late—butter was too cheap—and there will be less now. The dark syrups are practically excluded altogether, for with the impost on the package the duty on these low grades would almost equal the original cost price of the commodity.

The increase in the duty on molasses and syrup will naturally be felt more by the people in the province of Quebec than by those in Ontario and the west, in the former province these two commodities being put to purposes for which sugar is demanded in the latter part of the country.

Although the change in the tariff was so unexpected by the trade, most of the large wholesale houses appear to be pretty well supplied with sugar, on which they are now reaping all the way from half to one cent additional profit. We hear of two houses that have each bought about one hundred carloads. The buying was induced by the low prices obtaining.

The sugar market is now strong and excited. Since the change in the tariff was

announced the refiners have, up to the time of writing, advanced prices about ⅝c. per pound. The outside markets are also strong, and as the sugar season will soon be here, wholesalers will be less likely to cut prices in order to induce trade. The wholesale price of granulated is now from 4¼ to 4⅝c. per lb., which is still ⅜ to ½c. per lb. cheaper than last year at this time.

The packers of canned goods appear to be pleased with the changes as far as they affect them. The protection the packers now enjoy is better than they have had for some years, and it comes at a time when it is more than usually welcome to them. Last year the pack of corn was enormous in the United States, many new packers having ventured into the field. Lately samples of this American corn have been shown on the Canadian market, and although no business appears to have been done, yet quotations were given that have caused the packers some concern. In fact, one of the reasons why they have within the last few days reduced the price on this commodity 2½c. per dozen was a desire to keep out the foreign article. Even with the lower prices and the higher duty the Canadian packers feel none too confident of their position.

The increase in the duty on condensed milk is insignificant, being only equal to about three cents per dozen. The changes relating to biscuits will not materially affect the imports of this commodity, it being the high-class article that is largely brought into the country.

Those who are likely to lose the most by the tariff changes are the liquor dealers. They never seem to have dreamed that there was likely to be any change, and many of them are said to have been caught short. We hear of one dealer in Western Ontario who received an importation which he might have passed on Friday afternoon, but he neglected to do so, and on Saturday, when he went to take out his goods, he was surprised to learn that the aggregate of the duty he had to pay was \$600 more than he would have been taxed the previous day. "Oh, well, I will have to make it up with water," he was heard to say.

The manufacture of candied peel in Canada has not, during the last year or two, been a profitable industry on account of the low price of the imported article, the wage item abroad being much cheaper than in Canada. We know of at least one house that has gone out of the making of candied peels because it had become unremunerative. It is not expected that the change in the tariff will prove much of a stimulus to the domestic industry.

What is to be hoped now is that the Government's mind is settled, and that there will not be a multiplicity of changes, as was unfortunately the case last year. As the tariff stands now it appears to be satisfactory, and it is wise to let well alone.

THE NEW SUGAR DUTIES.

SOME PHASES OF THE SITUATION—JOBBER AND SPECULATORS ON THE RIGHT SIDE—REFINERS SOLD AHEAD.

ON Monday, in consequence of the new duty of one-half cent per pound on raw sugar, both refiners in Montreal marked up their prices on granulated and yellow sugars. On the former the advance is $\frac{3}{4}$ c., to 4 c., and on yellows $\frac{3}{4}$ to $\frac{7}{8}$ c., to $\frac{3}{4}$ to $\frac{3}{8}$ c. On the other hand, the Montreal Wholesale Grocers' Guild, at a meeting held the same day, decided that they would sell their customers sugar for the time being practically at refiners' prices on the new basis—that is, granulated 4 c. and yellows $\frac{3}{8}$ to $\frac{3}{4}$ c., as to grade.

This peculiar situation of affairs can only be explained by the fact that the wholesale men placed orders ahead for a large quantity of refined sugars at the low prices which ruled up to Friday last, when the Government announced the new duty. That is, they will receive for some time to come from the refiners granulated sugar at a cost of only $\frac{3}{4}$ c. per lb. and yellows at $2\frac{1}{2}$ to 3 c. They are therefore in a position to compete at refiners' prices or less, if they care to do so, until their stocks of goods secured at the low cost are worked off.

It is understood, in this connection, that the jobbers, or a great many of them, have quite ample stocks on hand as well as large future contracts yet to be filled, and are in a position to make some handsome profits on the recent development.

Individual houses in Montreal are said to have future contracts for quantities away over 5,000 barrels of sugar, and it is a well-known fact that one or two speculators outside of the trade have not only secured several thousand barrels of refined sugar, but are large holders of the raw article as well, having imported largely via New York during the past two months, and are holding the goods in store on speculation.

Considering these circumstances, the assertion of the Montreal refiners that they had not the slightest inkling of the projected increase in the duty is surprising. Yet it seems difficult to believe that contracts would have been accepted ahead to the extent that is generally admitted if the manufacturers had thought that the change was coming.

No later than Friday evening last, between five and six o'clock, it is asserted that wholesale firms in Montreal succeeded in placing considerable orders on the old basis. Besides, not only have the refiners accepted these large contracts for future delivery, but they have a large quantity of raw sugar now afloat for Canada.

The St. Lawrence Co. has five cargoes aggregating 14,200 tons (5,200 tons of cane

and 9,000 tons of beet), and the Canada Refinery 9,900 tons (3,500 tons of beet and 6,400 tons of cane), making 24,100 tons in all, on which the Government will collect the new duty.

In fact, representatives of both refineries assured THE CANADIAN GROCER that the duty was a profound surprise to them, as they firmly believed, until the announcement was made, that no duty would be placed on sugar this session, having been given to understand that the deficit would be charged to capital account, which possibility was intimated in these columns some time ago. They were out in their calculations, however, and for this reason would have to do business on a narrow margin for some time.

In connection with these importations of raw sugar there is considerable speculation as to whether the Acadia people got any inside tip on the impending change in the duty. A broker said on Monday to THE CANADIAN GROCER that it was significant that they had no later than a week and a half ago cancelled orders for two cargoes of raw beet without giving any reason for it. If it should transpire that this inference is correct there may be some lively happenings in the ranks of the faithful who are among the largest subscribers of the sinews of war when campaign time comes around.

The exact effect of the change in the course of values of high and low grade sugars may be to curtail the consumption of the latter. The duty, a specific one, is imposed entirely irrespective of the percentage of saccharine matter. That is, a low grade sugar, testing only 60 per cent., costs as much to import, or nearly so, as a high grade raw testing up to 96 per cent. For this reason the new tax is somewhat annoying to the refiners, owing to the requirements of a certain demand in the province of Quebec, which consumes a cheap inferior yellow sugar. However, if it does tend to check the consumption of these cheap sugars it will be to a certain extent a blessing in disguise.

Intrinsically, such sugars are not only dearer to the consumer, but less profitable for the trade to handle than a granulated or high grade yellow. The reason is simple; they deteriorate if kept for any length of time, and should it happen that they are not promptly turned over the jobber frequently finds that they are unsalable, or nearly so, on his hands. On the other hand, a granulated or fine, dry yellow sugar can be kept in stock for an indefinite length of time without this defect arising.

MONEY AND STOCKS.

THE steadiness I noticed last week in bank stocks on the Toronto Exchange has been maintained with an upward tendency. Commerce is in the van in this movement, there seemingly being a demand for it for investment.

* * *

Fire insurance stocks are not quite so strong as they were. They did advance 1 to $1\frac{1}{4}$ per cent., but there has been a change in the opposite direction since then.

* * *

The feature of the market appears to be Commercial Cable. It is still gathering strength. There have been buyers at 147 but the last quotable price is $\frac{1}{4}$ above that figure. There are a few sellers, but everybody nearly seems to expect the stock to develop increased strength.

* * *

C. P. R. stock is advancing rapidly. This is induced by the gains the road has made in exchanging land in outlying districts adjacent to it; also to increased earnings and the purchasing of stock by foreigners.

* * *

The money market remains quiet, but rates are a little stiffer at $4\frac{1}{2}$ to 5 per cent. for call loans. Commercial paper is quoted at 6 to $6\frac{1}{2}$ per cent.

* * *

Bankers in the United States have been holding back funds in anticipation of getting better rates in connection with May 1 interest payments. But the desideratum was not forthcoming; and last week, instead of being firmer, rates were easier.

ARGUROS.

LOOKS LIKE REVIVAL.

The April Customs returns at Montreal show some marked increases in imported free raw materials for manufacturing purposes compared with those for April last year. Allowing for possible increase in values, and the limited period covered by the returns, there still remains substantial basis for the belief that we are on the eve of a brisker season in several of the most important industries in Canada. The figures show:

IMPORTS DURING APRIL.

	1895.	1894.
Raw cotton	\$ 67,884	\$ 14,227
Crude rubber	78,813	30,912
Hides	25,241	16,522
Jute	23,110	12,072
Raw silk	20,441	15,203
Sisal and hemp	32,984	3,118
Raw sugar	670,784	235,895
Wool	33,568	24,717

It is improbable that these all-round increases only mean accumulations of raw material. They likely mean increased output of made goods, and indicate hope of larger home demand.

HAS NOT SOLD TO DEPARTMENT STORES.

EDITOR GROCER,—I have just finished reading your article in THE CANADIAN GROCER of the 3rd inst. re Departmental Stores, and being a manufacturer, selling directly to the retail trade, and having on several occasions refused to sell to our departmental stores, because I felt they were an injury to the already established retail grocers, I am beginning to think I made a serious business blunder.

I fully expected trouble would arise if I sold the big places; I appreciated the trade I had with the grocers of Toronto, and looking at the question from all sides, as a business man, of course, who is in business to make money, I concluded I would stick to the grocers and leave my rivals the departmental stores, if they wanted them. I fancied I would gain the greater profit because I believed the grocers would not be inclined to buy from any manufacturer who would sell to the men who were cutting the ground from under their feet.

I have been mistaken. I find my rivals selling these big places enormous bills every month, and getting paid regularly, and the grocers have never once said nay. I have never, to my knowledge, received an order because I had declined to sell the big fellows. I have done what I could to avoid

my wares being slaughtered to crush the grocers, but have the grocers commended me for it? Not once.

I am now debating with myself whether it would not be wise for me to sell where I can, and let other people look after themselves. If the grocers of Toronto want to keep their trade to themselves they ought to at least help those who have tried to help them. If they do not do so then the manufacturers are going to bid for all the trade they can, and I will be compelled to follow suit.

FRONT STREET.

Toronto, May 6, 1895.

THE BEST CHEESE.

A PAPER was read before an agricultural society in Toulon, France, in which the author, a prominent authority, expressed the following opinions regarding the merits of the standard makes of cheese:

"Which is the best cheese? We do not wish to say which is the most palatable, because everybody has a right to have his own particular taste; but, which is the best as a food—in one word, the most nourishing? It is with cheese as with milk, each is a food complete in itself; that is to say, each contains azote and carbon. The question, then, must be looked at from two points of view:

- (1) Which cheese contains the highest percentage per pound of azotized substances?
- (2) Which cheese is the richest in fatty substances?

"The Parmesan cheese stands highest in its azotized substances: it contains 44 per cent. Then comes the Gruyere, 31 per cent. We would place Dutch cheese next on the list, 29 per cent. The Roquefort comes next, 26.5 per cent. Cheshire cheese ranks close to this, 26 per cent. All the other cheeses contain less than 20 per cent. of these azotized substances. On the other hand, those cheeses that contain the highest percentage of fatty substances are in the following order: The fromage double creme has about 60 per cent.; the Neufchatel has about 40 to 42 per cent.; the Roquefort, 30 per cent. The other mentioned cheeses contain less than 30 per cent. of fatty substances. Thus, Parmesan, Gruyere, Dutch cheeses, so high in azotized foods, are inferior to Neufchatel and Roquefort in fatty foods. Consequently, it is the Roquefort cheese that carries the palm. From the simple fact of its containing the largest amount of azote and carbon, it may be considered the most nourishing of all Dutch cheese. Then the Cheshire cheese, so much prized by English men and women, scarcely gives 26 per cent. of azote, and less than 20 per cent. of carbon, and as for Gruyere, if it is high in azote, 31 per cent., it falls short of all others in carbonized substances, as they are represented only by 24 per cent. of its own weight."

How is Your Stock

OF BREAKFAST FOODS In Packages

Or maybe you don't handle package goods at all. Don't you think, however, it might be worth while to look into the matter? We ship package goods all over the country, lots of them. Prices very reasonable. Wouldn't you like us to send you samples and quote you prices on our celebrated

Wholesale Grocers

TORONTO - - ONTARIO

LONDON RETAIL GROCERS.

LONDON Retail Grocers' Association held their regular meeting on May 7, with a fair attendance, the president, Mr. W. H. McCutcheon, in the chair.

One new member was admitted.

R. A. Jones reported that a special committee had been appointed at a meeting called for the purpose of going over the stock-sheet of Mr. D. MacWillie. The committee attended the sale in the interest of the trade, but the stock was sold at 65c. on the dollar, which was more than the committee considered advisable to bid. They did not, therefore, purchase. He recommended that representatives of the association attend at bankrupt sales and see that they were not sold at a sacrifice.

The action of the committee was endorsed.

The question of adopting a cash business, which was laid over from last meeting was taken up for discussion.

R. A. Jones said he would like to hear the question fully discussed. He had spoken on the question at the last meeting and would like to hear others express their views.

Several members spoke in favor of a cash business, but thought it would be a difficult matter for an old grocer who had been doing a credit business for years to break off. It was quite different with one making a fresh start.

It was suggested that the system adopted by members of the association of reporting all bad-pay customers, was a step in the direction of a cash business, and if the members gave it attention, and reported all delinquents promptly, and, when names were reported, the members refused to give credit to such, the credit system would soon be confined to those who would pay. The question will be further discussed at the next meeting.

The question was asked what means should be adopted to secure prizes for the annual picnic, and after some discussion it was moved and seconded that the secretary communicate with the wholesale grocers and manufacturers as usual for a portion of the prizes.

A committee was appointed to strike the various committees necessary to arrange and conduct the picnic, which it was decided to hold on July 24, the secretary reporting

that the City Council had granted the use of Queen's Park for that date.

The question of the effect of the duty recently put on sugar was discussed, and the general feeling was that as the wholesale price had advanced to $4\frac{3}{8}$ c., and likely to still advance, the retail grocer should not give more than 20 lbs. granulated sugar for \$1.

R. A. Jones remarked that he thought it would be well to take up the question of the limitation of time that an account or debt can be collected. The statutes placed it at six years, and there are many cases where accounts are outlawed, the debtor for several years not being in a position to pay, but later on came in possession of means to pay, and took advantage of the law. There should be some way of making such parties pay, even after six years. He gave notice that the question be taken up at the next meeting.

REFINED SUGARS ADVANCE.

In consequence of the fact that the refiners have advanced sugar prices to $4\frac{1}{8}$ c. on granulated, and $2\frac{3}{8}$ to $3\frac{3}{8}$ c. on yellows, the Sugar Committee of the Wholesale Grocers' Guild at a meeting held in Montreal on Wednesday morning, marked up the prices to $4\frac{1}{8}$ c. on standard granulated; 4c. on No. 2 granulated, and $3\frac{1}{2}$ to $3\frac{3}{8}$ c., as to grade, on yellows.

DO FOOD SHOWS PAY?

This is a question THE CANADIAN GROCER asked Mr. Stacy, of Huyler & Co., cocoa and chocolate manufacturers, New York, when that gentleman was in Montreal a few days ago, because he had a very extensive experience as an exhibitor:

"We have tried several experiments," said he, "at the general exhibitions throughout the United States and at some of the Food Fairs, all of which were largely attended. We watched the matter carefully for some years, and have come to the conclusion that it pays us best of all to get our goods into the hands of the retail trade and to make our exhibits in their stores. Buffalo was the last place where we went into a Food Fair. In point of attendance it was a great success, but our total sales of goods were not sufficient to pay the expenses of erecting a

booth. We served thousands of cups of cocoa free, but there has been no more than the natural increase in our trade in the Buffalo district. This was also the experience of others who exhibited at this and some other Food Fairs. I admit the theory on which we are induced to take part in a Food Fair is a good one, but it really does not bring any important returns."

SOMEONE HAD A TIP.

Recent imports of raw sugar convey their own story. On Friday, May 3, the putting of a duty upon raw sugar was announced in Parliament. Two days previously the imports for April closed, and the official returns will appear in The Canada Gazette in a few days. They will show an immense increase for the month of April, 1895, in the imports of raw sugar. THE CANADIAN GROCER has seen the figures for the port of Montreal, and the increase in sugar imports is marked, comparing last month with April of last year, and with March too.

The imported raw sugar for April, 1895, is valued at \$670,784; that for April, 1894, was \$235,895, or nearly three times as much.

This is a very suspicious inward flood of raw material just previous to the imposition of a duty upon it. Whoever brought it in free with a rising market for the refined article stands to make a fortune now that future imports of raw material will be taxed $\frac{1}{2}$ c. per pound. The refiners say they expected no duty, are surprised, and may not therefore be prepared. Who then laid in stock so luckily? Someone seems to have got a tip and profited richly thereby.

A COCOA MAN IN TORONTO.

F. J. Fry, representing J. S. Fry & Sons, Bristol, England, accompanied by his wife, was in Toronto a few days ago. It was his first visit to Toronto, and he was introduced to the trade by W. H. Tippet. He was on his way to Chicago, Philadelphia, Boston and New York, in all of which places Fry & Sons do a large business. He reported that the firm's trade was last year the largest in its history. J. S. Fry & Sons have over 3,000 hands.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, May 9, 1895.

GROCERIES.

PRACTICALLY all the interest of the trade during the past week has been centred upon sugar, and it is natural that such should be the case, for, in addition to the upward tendency that the change in the tariff naturally gives prices, there is the influence of stronger and higher markets outside. Up to the time of writing there have been about three distinct advances on the Toronto market, aggregating in all about $\frac{3}{8}$ c. per lb.; but the market is excited, and it is impossible to say whether there will be further advances or not. Most of the leading houses on the street appear to have had fairly good stocks on hand when the change in the duty was made. The general volume of business is much as before, except it be, perhaps, that the sudden advance in sugar has momentarily staggered country retail buyers of this commodity. In the city, however, there have been a good many sugars selling. In canned goods the feature is a decline of $2\frac{1}{2}$ c. per dozen in the packers' prices on peas and corn. The demand for canned goods continues fairly good. Syrups and molasses are both higher, although the advance is the most marked in the former. Other staple lines remain much as before, both in regard to volume of business and prices.

CANNED GOODS.

The Packers' Association have made a reduction of $2\frac{1}{2}$ c. per dozen in the price of canned peas and corn. The object was to satisfy the complaints of the trade, who asserted that the price was too high, and furthermore to keep out United States corn which has been offered lately. The wholesalers have made no changes. Tomatoes

are firm and unchanged. Gallon apples are gradually getting into smaller compass, and the association is nearly cleaned out of pumpkins. The demand for canned vegetables and gallon apples continues fairly good. No. 1 red salmon is getting scarcer, and further advances are anticipated before long especially as the heavy consumption season is near at hand. The demand is already fairly good. We quote: Tomatoes, 85 to 95c. for choice; corn, 85 to 95c.; peas, $82\frac{1}{2}$ to $87\frac{1}{2}$ c. for ordinary and $\$1.40$ for fancy; peaches, $\$2.75$ to $\$3$ for 3's, $\$1.75$ to $\$1.90$ for 2's; raspberries, $\$1.65$ to $\$1.80$; strawberries, $\$1$ to $\$2.10$; apples, 3's, $\$1$ to $\$1.10$, gallons, $\$2.15$ to $\$2.25$, and preserved fancy quarters at $\$1.35$ to $\$1.40$; salmon, $\$1.35$ to $\$1.45$, in tall tins, and $\$1.55$ to $\$1.60$, in flat tins; do., Cohoes, $\$1.05$ to $\$1.10$; canned mackerel, $\$1$ to $\$1.10$; lobsters, $\$1.70$ to $\$2$ for tall tins, and $\$2.25$ to $\$2.75$ for flat tins. Chicago canned beef, 1's, $\$1.75$ per dozen; 2's, $\$2.85$. Australian mutton, boiled, 2 lb. cans, $\$3.40$; ditto, corned and roast, $\$3.75$.

COFFEES.

There are just a few bags of green Rio coffee moving at unchanged prices. We quote green in bags: Rio, $20\frac{1}{2}$ to $22\frac{1}{2}$ c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to $22\frac{1}{2}$ c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

N. Y. Journal of Commerce, Tuesday: The interest of that portion of the trade representing a prompt movement of stock into the hands of consumers does not yet expand sufficiently to create animation in the market for Brazils, and remains as the important point lacking for a healthy make-up of trade. Receipts at Rio have been simply immense, showing 26,000 bags, of which 18,000 were coastwise, but in the face of that both Havre and New York underwent only a small fractional shrinkage. The effect of the movement was to check all bullish in-

clination and such business as took place was upon a slightly easier basis, but the surprise is that no greater break took place.

RICE.

Business is moderate at unchanged prices. We quote: "B," $3\frac{1}{2}$ to $3\frac{3}{4}$ c.; extra Japan, $5\frac{1}{4}$ to $5\frac{3}{4}$ c.; imported Japan, $5\frac{3}{4}$ to $6\frac{1}{4}$ c.; tapioca, pearl, $4\frac{1}{2}$ to 5c.

SPICES.

There has been no change either in regard to business or prices. We quote as follows: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to $11\frac{1}{2}$ c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to $14\frac{1}{2}$ c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, $\$4.50$ to $\$5$ per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, $12\frac{1}{2}$ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and $10\frac{1}{2}$ to 11c. for small lots; pecans, $10\frac{1}{2}$ to 11c.

SUGAR.

With stronger markets outside, and an increase of $\frac{1}{8}$ c. per lb. in the duty, the local sugar market has been much excited. The refineries have made three or four distinct advances, aggregating about $\frac{3}{8}$ c. per lb., or 1-16 to $\frac{1}{8}$ c. more than the increase in the duty. The market is strong, and further advances at any moment are not at all improbable. Some houses on the street are said to have had good stocks on hand at the time of the change in the duty; others, however, are said to have been caught short. Those who were on the right side are now making money on sugar. Granulated sugar now costs the wholesalers $\$4.25$, net, laid down,

MARKETS—Continued

and they are getting from retailers from $4\frac{1}{4}$ to $4\frac{3}{4}$ c. per lb., which is still $\frac{1}{4}$ to $\frac{3}{8}$ c. per lb. lower than they were obtaining last year at this time. The advances have temporarily checked the demand in the country, but a good many sugars are going out in the city. Stocks in the hands of consumers in the country are large, the low prices of the past few months having induced a great many farmers to buy barrel lots with more than usual freedom. We quote: Granulated—domestic, $4\frac{1}{4}$ c. to $4\frac{3}{4}$ c.; do., No. 2, $3\frac{3}{4}$ c.; yellows, $3\frac{3}{8}$ c. up. Raw—Demerara, $3\frac{3}{4}$ c. A cable received on Tuesday read: "London markets stronger; beets still advancing; May deliveries now 10s. 3d., and June 10s. $4\frac{1}{2}$ d." This is an advance of nearly 2s. from the lowest point.

SYRUPS.

In consequence of the change in the tariff on syrups, the refineries are asking and getting $\frac{1}{4}$ c. per lb., or $3\frac{1}{2}$ c. per gallon, advance. The price of 2 lb. tins has been advanced 1c. per tin, and there has been an increase in pails. We quote: Dark, 28c.; medium, 31 to 33c.; bright, 38 to 43c.; very bright, 48 to 53c.

MOLASSES.

Holders are asking about 3c. per gallon more in consequence of the higher duty on this article. We quote as follows: New Orleans, barrels, 29 to 31c.; half-barrels, 33 $\frac{1}{2}$ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

Ceylon teas are still attracting the most attention on this market. Japan teas, particularly low and medium grades, are scarce. Japan teas at about 17c. are what retailers are principally taking this week. The Foochow market will open about the 20th inst. Stocks of low grade Foochow teas are very low in London and Australia. Consequently there is likely to be a large demand for these teas at the opening of the market. The Hankow market will open in about ten days. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUIT.

Currents continue in fairly good demand at unchanged prices. We quote: Filiatras, half-bbls., 4 to $4\frac{1}{2}$ c., barrels, $4\frac{1}{4}$ c.; fine Filiatras, half-bbls., $4\frac{3}{4}$ c., barrels, $4\frac{3}{8}$ c.; Patras, $5\frac{1}{2}$ c., in cases; Casalinas, $5\frac{1}{2}$ to 6c.; Vostizzas, $6\frac{1}{2}$ to 7c. in cases and half-cases.

Valencia raisins are still selling fairly well at unchanged prices. We quote: Off-stalk,

$3\frac{3}{4}$ to $3\frac{3}{8}$ c.; fine off-stalk, 4 to $4\frac{1}{4}$ c.; selected, $5\frac{1}{2}$ to 6c.; layers, $5\frac{1}{2}$ to 6c. Advices received by P. L. Mason & Co. from James A. Hawkesworth, of New York, say: "Our market is nearly bare of off-stalk Valencia raisins, and when it is bare your buyers will have to look elsewhere for cheap raisins."

Prunes continue in good demand at unchanged prices. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 5 to $5\frac{1}{2}$ c. per lb.; "C," 85 to 90 to half kilo, $6\frac{1}{2}$ c. per lb.; "B," 80 to 85 to half kilo, 7 to $7\frac{1}{2}$ c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "Unicorn," 5 to $5\frac{1}{2}$ c.; Bordeaux prunes, $4\frac{1}{2}$ to $6\frac{1}{2}$ c.

A few odd boxes of sultana raisins are still going out at 6 to $6\frac{1}{2}$ c. for bright goods.

Dates are quiet and unchanged at from $4\frac{1}{2}$ c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; naturals, 6 to 7c.

Demand is fair for California dried fruits. We quote according to quality: Peaches, $10\frac{1}{2}$ to 13c.; apricots, $10\frac{1}{2}$ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 11c.

BUTTER AND CHEESE.

The butter market is still pretty well demoralized. Fresh summer creamery and dairy will soon be crowding in, and then lots of old stuff will have to be sold for grease, or not at all. One Toronto dealer this week disposed of a round lot of tub butter at 5c. A slight relief is being afforded by the purchases being made by the bakers, who want good butter at a low figure and can get it now. Prices have generally gone down a point since last week. Present quotations are: Summer dairy and store packed—Choice, 9 to 12c.; low grade baking butter, 5 to 6c.; fresh large rolls, 10 to 12c.; pound prints, 13 to 15c. Summer creamery, 8 to 12c. Winter creamery—Tubs, 18 to 19c.; pound prints, 19 to 20c.

Some cheese is being carried over till next season, and usual buyers are not making many offers. The prospects are that prices will be low this season. August and September makes of Canadian cheese bring 10 to $10\frac{1}{2}$ c., and new Canadian cheese is quoted at 9 to $9\frac{1}{2}$ c. Small Stilltons bring 12 to $12\frac{1}{2}$ c.

GREEN FRUIT.

Trade is reported brighter. At the Montreal fruit sales the fruit offered brought good prices. Bananas are scarce and higher; oranges show an upward tendency; lemons have advanced, and pineapples are declining. We quote: Messina lemons, 360's, \$3 to \$3.75; 300's, \$3.50 to \$4.50. Oranges—Messinas, half box, 80's, \$1.50 to \$1.75; 100's, \$1.75 to \$2.50; boxes, 160's, 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.50; Messina ovals, 80's, \$2; California seedlings, \$2.75 to \$3; Valencias, \$4.25 to \$4.50. Bananas, \$1.50 to \$2.75 for firsts and

seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. California dried fruit—Apricots, 11 to 12c.; peaches, $12\frac{1}{2}$ c.; cranberries, \$3.50 per box. Strawberries, 27 to 32c. a quart and 14 to 15 a pint; cocoanuts, \$4.50 a sack; pineapples, 7 to 20c.; green string beans, \$2.50 to \$3 per bushel crate.

COUNTRY PRODUCE.

BEANS—Choice hand-picked still bring from \$1.50 to \$1.65 a bushel.

DRIED APPLES—Are quoted at 6 to $6\frac{1}{4}$ c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: 7 to $7\frac{1}{4}$ c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.75 to \$3 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—A fair trade is being done in sugar and syrup, but prices remain pretty stationary. We quote: 7 to 8c. per lb. for sugar; syrup, in 5-gallon lots, 70 to 75c. a gallon, and in gallon tins, 80 to 85c.

POTATOES—Though not very plentiful are easier, owing to the expected arrival of new potatoes. They bring 60 to 65c. on the track, and 70c. out of store now.

EGGS—Are being bought for pickling purposes now. Consequently prices remain firm at $10\frac{1}{2}$ c. per dozen.

FISH AND OYSTERS.

Trade is perhaps slightly more active than last week, but stocks are still short and sales light. We quote: skinned and boned codfish, $6\frac{1}{2}$ c.; boneless fish, $3\frac{1}{2}$ to 4c.; haddock, 5 to $5\frac{1}{2}$ c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; yellow ditto, 7c. per lb.; pike, $4\frac{1}{2}$ to 5c. per lb.; flitch cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 7 to $7\frac{1}{2}$ c.; white fish, 8c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Georgian Bay herring, \$2 per 100.

PROVISIONS AND DRESSED HOGS.

Owing to warm weather packers have stopped buying hogs, and the tendency for the prices of their products will now be upwards for a while. Dressed hogs bring \$6.25 to \$6.50 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and $8\frac{1}{4}$ c. for small lots; breakfast bacon, 11c to $11\frac{1}{2}$ c.; rolls, 8c. to $8\frac{1}{4}$ c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs., $10\frac{1}{2}$ to 11c.; small hams, $10\frac{3}{4}$ to 11c.; pickled, $9\frac{1}{2}$ to 10c.

WRITE US—We are large dealers.

CLEMES BROS. - TORONTO**LARD**—Pure Canadian, tierces, 9c.; tubs, 9½c.; pails, 9½c.**BARREL PORK**—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.**FLOUR AND FEED.****WHEAT**—Continues advancing on the local market. Better prices are reported also in Chicago and England. We quote local prices: White, 84 to 84½c.; red, 83 to 83½c.; goose, 82c.**OATS**—Firm, at 39c.**BARLEY**—Firm, at the old price, 48c.**FLOUR**—Has advanced again strongly, but some dealers seem to think it has reached the upward limit, and cannot long maintain the present prices, which are: Ontario straight roller, \$3.60 to \$3.75; Manitoba, \$4.10 to \$4.15; patents, \$4.30 to \$4.40.**BREAKFAST FOODS**—Oatmeals remain firm in sympathy with oats, and rolled wheat has advanced in accord with the wheat market. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; corn meal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.**SALT.**

A fairly good business is the order of the day. Prices are unaltered. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

SEEDS.

The demand for clover and timothy seed is pretty well over in the earlier sections of country, but not much change to report in prices. We quote: Red clover, \$6.30 to \$6.60; alsike, \$4.20 to \$6.30; timothy, \$3 to \$3.50 per bushel.

HIDES, SKINS, WOOL AND TALLOW**HIDES**—Continue scarce and in demand. Prices are strong in sympathy with the Chicago market. We quote: Green hides, No. 1, 6½c.; No. 2, 5½c. Cured sell for 7½c.**SHEEPSKINS**—Not so plentiful at \$1 to \$1.10, an advance of 10c. over last week.**CALFSKINS**—Are in good supply and find a ready sale at prices quoted: 7c. for No. 1 and 5c. for No. 2.**TALLOW**—Is dull, jobbers quoting 5 to 5½c., and selling at ½c. higher.**WOOL**—There is no Canadian fleece on the market, and it is expected that new wool will open at from 17 to 18c. There are no changes in pulled wools, supers being quoted at 19 to 21c., and extras at 21 to 22c.**PETROLEUM.**

Both crude and refined oils are steady and look as though they would remain so for some time. A big demand is opening up for lubricating oils, and will increase when the agricultural season is well in. We quote for this week last week's prices: In 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 17 to 18c.; carbon safety, 19 to 19½c.; Canadian water white, 19 to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

James Turner & Co. report a nice trade in fine fruits.

Larger premises will soon be required by the Berlin Brush Co.

Davidson & Hay report large sales of Bardsley's sliced beef.

James Turner & Co. are offering bargains in California dried fruits.

Davidson & Hay are showing a very fine sample of imported Japan rice.

"Lion" flavoring extracts are fast sellers with T. B. Escott & Co., London.

John Sloan & Co. have received a shipment of Aylmer canned meats and corn.

The solid back patent brushes of the Berlin Brush Co. have a large sale this season.

W. H. Gillard & Co. are in receipt of a fine line of molasses, showing exceptional value.

"Grand Mogul" tea is said to be doing splendidly in British Columbia and Manitoba.

Wm. Paterson & Son report a continued heavy output of their high-class soda biscuits.

McWilliam & Everist call attention to their newly received stocks of fine oranges and lemons.

"Our sales of 'Kurma' tea are steadily increasing," report Davidson & Hay, wholesale agents.

A shipment of canned strawberries to hand with John Sloan & Co. This is a scarce fruit just now.

Salad oils (imported), in quarts, pints and half pints, also in one gallon tins, are in stock with Davidson & Hay.

The Eby, Blain Co. have received shipments of fine, high-grade Japan rice, free from oil, beautifully polished.

Dawson & Co. report the arrival of 3 cars of lemons, and large shipments of fine pineapples and California seedling oranges.

Wm. Paterson & Son have recently gotten out a handsome hanger, showing their 3lb. and 1lb. packages of soda biscuits.

W. H. Gillard & Co. report large sales of teas to arrive. Their stock this season they claim to be most complete in every department.

The Berlin Brush Co. is still very busy, being especially rushed in the whisk and whitewash departments. Brooms also are running strongly.

James A. Skinner & Co.'s liquidation sale is meeting with great success, for the reason that the prices offered will induce the most careful buyers to invest extensively.

T. B. Escott & Co. have some special offers in Bowlby canned fruits, the best packed canned fruits put up. Several hundred cases of corn, tomatoes and peas are offered at low prices.

P. M. Lawrason, London, Ont., has received from Germany a large assortment of lithographs of the most beautiful designs in flowers. These are given away with their "Supreme" and "Wonderful" soap. They are very fine works of art, and should please the most fastidious.

"Imperial Congou" is becoming a special favorite with the trade throughout the Maritime Provinces as well as in Ontario and the

Northwest Territories. W. H. Gillard & Co., the proprietors, have just received a large order from Halifax, where it has secured a firm footing with consumers.

James Turner & Co. report the largest lake trade this spring they have ever enjoyed, especially for "Mogul" and "Mascott" blends of tea. Of course, "Ram Lal's" sells itself. No pushing required there.

F. Hogarth, of Tilsonburg, is advertising in his local paper that he has got an order all the way from California for a box of "Salada" tea, from a lady who had moved there and was unable to get anything like it in San Francisco.

There is an intimation that prices for canned corned beef will be raised very shortly. Stocks in the east and at packing points are said to be unusually light.—N.Y. Journal of Commerce.

Wm. Paterson & Son wish to advise the trade that, in consequence of the rise in sugar duties, they have found it necessary to make an all-round advance on confectionery of from one-half to one cent per lb.

The shipments of coffee from Brazil during April were to Europe from Rio 19,000 bags, from Santos 65,000 ditto; to United States from Rio 114,000 bags, Santos 78,000 ditto, Victoria to United States 7,000 bags; Rio to other countries, nil.

MONTREAL MARKETS

MONTREAL, May 9, 1895.

GROCERIES.

THE week has been a somewhat unsettled one in the wholesale grocery market, owing to the tariff changes, which in the more important respects were a surprise to many people. However, the jobbing trade are pretty well protected and the changes in prices that the new duties have necessitated have not been as great as many expected. Refiners have advanced their price on sugar $\frac{1}{2}$ to $\frac{3}{4}$ of a cent, but the jobbing trade are selling to their customers this week at refiners' rates. Other particulars will be found elsewhere. The advance in the duty on molasses is slight and it is not expected that it will affect the jobbing price for some time to come. In canned fruits, jams, etc., the changes are also of a trifling character and have not resulted in any quotable change as yet. The volume of business passing this week is somewhat diminished as compared with last week, for the reason that most traders have been buying freely for future delivery of all staples and have their immediate wants supplied. This is especially the case with sugar, stocks of which in third as well as in second hands are large.

SUGAR.

Naturally, the chief feature of the week has been the developments in the sugar market, which are referred to fully elsewhere. At the present writing business is quiet, both from refiners' and jobbers' hands. It now transpires that the former have sold ahead, and, as a consequence of this, on Monday last the Wholesale Grocers' Guild fixed prices for jobbing business at practically the same level as the refiners had decided to ask, plus the new duty. In consequence of the fact that the refineries advanced sugar prices to $4\frac{1}{2}$ c. on granulated, and $3\frac{3}{4}$ to

$3\frac{3}{4}$ c. on yellows, the Sugar Committee of the Wholesale Grocers' Guild, at another meeting, held on Wednesday morning, marked up their prices to $4\frac{1}{8}$ c. standard granulated, 4c. No. 2 do., and $3\frac{1}{2}$ to $3\frac{3}{4}$ c. as to grade on yellows.

SYRUPS.

There has been no quotable change in syrups yet, but it is quite likely that some will result shortly in consequence of the new duties. Refiners are not doing much trade this week, and the same remark applies to jobbing business. We quote in a jobbing way $1\frac{1}{2}$ to $2\frac{1}{4}$ c., as to grade.

MOLASSES.

The change in the molasses duty is equivalent to an increase of $\frac{1}{4}$ c. per lb., but so far there has been no change in prices announced either by the importers or jobbers. On goods from stock for prompt shipment we quote $31\frac{1}{2}$ c. in carloads and $32\frac{1}{2}$ c. in less than carload lots. For forward shipment the prices are $30\frac{1}{2}$ c. in car lots and $32\frac{1}{2}$ c. in less than car lots. Advices from the Islands note continued easiness, and stocks can now be laid down in Montreal at $28\frac{1}{2}$ c. net cash on the wharf here.

RICE.

There is no change in the rice market, and business rules inactive on the whole. Mill quotations on lots are as follows: Japan standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

The spice market has been fairly active in a jobbing way at steady prices. We quote jobbing prices: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

The coffee market is without special change. Business is fair and prices are steady. We hear of no large lots changing hands. In a regular way we quote green coffee in bags as follows: Maracaibo, $21\frac{1}{2}$ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

This market has ruled very quiet since our last for business in a large way. Jobbers, however, are doing a steady distributing trade of a satisfactory character at steady prices. Advices continue firm from primary markets. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, $18\frac{1}{2}$ to 24c.; and choice, 25 to 31c.

DRIED FRUITS.

Business in Valencia raisins does not show any expansion, and what trading there is is restricted to a few hand-to-mouth sales. Prices are the same at $3\frac{3}{4}$ to $4\frac{1}{2}$ c., as to grade for off-stalk, and layers 5 to $5\frac{1}{2}$ c.

Business in Californias has been small both from first and second hands, and prices are somewhat easier at $6\frac{1}{2}$ to $6\frac{3}{4}$ c. for 4 crown loose muscatels, and $5\frac{1}{2}$ c. for 3 crown ditto.

The currant market is dull but steady. We quote: Filiatras and Provincials, bbls. $3\frac{1}{2}$ c.; cases, 4 to $4\frac{1}{2}$ c.; Patras, 5 to $5\frac{1}{2}$ c. and Vostizzas, 7 to $7\frac{1}{2}$ c.

Prunes are quiet and without feature at

THE BEST IN THE MARKET.

Ask your wholesale grocer for it.

THE FOAM YEAST CO., LTD. -:- TORONTO.
79 Esplanade.

4¹/₄ to 4¹/₂c. for Bordeaux; 4¹/₄ to 5c., for
Bosnia, and 8 to 9c. for Californias.

A few small lots of Eleme figs have been
secured and are offering at 10 to 12c.

Dates continue quiet and unchanged at
3¹/₂ to 4c.

There is nothing new to report either in
dried or evaporated apples. Some straight
lots were offered here by western sellers
this week and placed at a figure within our
range. We quote: Dried, 6 to 6¹/₂c., and
evaporated, 7¹/₂ to 8c.

NUTS.

There is a quiet jobbing trade in nuts
at steady prices. We quote: Brazils, 8
to 9c.; shelled almonds, 18 to 25c.; Tarra-
gona, 11 to 13c.; Grenoble walnuts, 13 to
14c.; shelled ditto, 25 to 26c.; filberts, 7 to
8c.; and pecans, 9 to 11c.

CANNED GOODS

There has been a fair jobbing trade doing
in canned goods. The new tariff will not
affect prices to any appreciable extent,
though it will tend to stiffen the tone of
values. With regard to new pack canned sal-
mon we do not hear of anything important yet
on spot. We quote: Lobsters, \$1.50 to \$1.90
per doz.; sardines, \$8.50 to \$9.50; salmon,
\$1.10 to \$1.45 per doz.; tomatoes, 80 to
90c. per doz.; peaches, \$2 to \$2.25 per doz.;
corn, 95c. to \$1 per doz.; marrowfat peas,
90c. to \$1 per doz.; strawberries, \$2 to
\$2.25; raspberries, \$1.75 to \$2; green
gages, \$2 to \$2.25; blue plums or damsons,
\$1.50 to \$1.75; pineapples, \$2 to \$2.25, and
3-lb. apples, 90c. to \$1.10.

GREEN FRUIT.

APPLES—The tone is steady and quiet
under a moderate trade at \$3 to \$5 per bbl.

ORANGES—In spite of the offerings of di-
rect cargoes, the tone of the market has ruled
firm. We quote: Messinas, \$1.75 to \$4, as
to brand and package.; do., bloods, \$2 to \$5;
do., ovals, \$4 to \$5.

LEMONS—The market rules firm, and all
the stock offered here has been well ab-
sorbed. We quote: \$2.50 to \$4, as to qual-
ity.

BANANAS—Rule steady and fairly active.
No. 1, \$2.50 to \$3; No. 2, \$1 to \$1.60.

PINEAPPLES—Stocks are small and prices
firmly held at 7 to 25c., as to quality.

COUNTRY PRODUCE

EGGS—The egg market has moved along
without any change. Business is fair and
prices steady at 10 to 10¹/₂c. per dozen.

MAPLE PRODUCTS—No change is to note
in these, which move along quietly. We
quote: Sugar 6 to 7c. per lb., and syrup 50
to 60c. per gal.

HOPS—No change in hops, which we
quote at 5 to 8c.

HONEY—A quiet trade, with prices steady
at 7 to 9c. per lb. for extracted, and 10 to
13c. for comb honey.

ONIONS, DOMESTIC — Rule firmer at
\$1.50 per bbl.

ONIONS, IMPORTED — Steady at \$3 per
crate for Bermuda, and \$3.25 for Egyptian.

PORT DOVER, ONT.

MONTREAL MARKETS—Continued

POTATOES—The potato market rules quiet and rather easier at 70 to 75c. per bag.

BEANS—Hand-picked beans are steady to firm at \$1.50 to \$1.75, and lower grades \$1.25.

PROVISIONS.

The demand for provisions is slow, and the market rules quiet and steady for pork and lard, while hams and bacon are meeting with a fair sale, owing to the warm weather. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

In flour a fair business is reported, the demand being good, and values show no change. We quote: Winter wheat, \$4 to \$4.15; spring wheat, patents, \$4.40; straight roller, \$3.75 to \$3.85; straight roller, bags, \$1.75 to \$1.80; extra, \$3.25 to \$3.75; extra, bags, \$1.55 to \$1.65; Manitoba strong bakers', \$4.25.

There is no change in the situation of the feed market. The demand is fair and values are steady. We quote: Bran, \$17.50; shorts, \$19; mouillie, \$22 to \$23.

In oatmeal, business continues quiet and of a jobbing character. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

BUTTER.

The heavy feeling in butter shows no sign of any change for the better, but the reverse, for there were sales on Monday at a decline from figures asked by sellers on Saturday. The fact of the matter is that the receipts of fresh creamery have been much larger than expected this spring, and the market has not only the weight of the large stocks of old goods, but is over-supplied at present with new goods. Sales of creamery were made at 16c., which is a decline of a full cent. We quote: Fresh made creamery, 16c.; old creamery, 10c.; Townships dairy, 15c.; Morrisburg and Brockville, 14c.; Western, 12c.; old dairy, 6 to 9c.

CHEESE.

The cheese market is heavy and unsettled under a slow demand and further depressing news from across the water. Buyers, in consequence, talk lower prices, and in the absence of any important business a reliable range cannot be quoted. The only fact which has tended to throw any light on the position was the receipts of the cheese from the sections down the river at the wharf on Monday last. Some 600 boxes were offered, and the indifferent disposition of buyers was evident, the only offer being a ridiculously low one. In fact, everything goes to show that there is no desire to speculate at present, and that exporters have little or nothing to work on. Last year at the same date some 500 boxes of these French cheese were offered, and they were all snapped up by speculators at 10¾c., quite a difference from the ideas now ruling. It is understood, however, that some of the best of the factories were not for sale, being sold privately beforehand. What the terms are is not known. The public cable declined another 6 l. both on white and colored, being now 10 full shillings below the lowest point touched during the early part of the month last year. In view of the situa-

tion of affairs we cannot quote a spot range, but 8c. is certainly an extreme figure.

ASHES.

There is no change in ashes, business ruling quiet. We quote: First pots, \$4.00 to \$4.05; seconds, \$3.70 to \$3.75, and pearls, \$6 to \$6.10 per 100 lbs.

MONTREAL TRADE NOTES.

Advices on California fruit to A. P. Tipet & Co. do not cite any new features.

No advices are yet to hand regarding new pack salmon. Old pack have been offered to buyers here at \$4 25 f.o.b. on the Coast.

Cables are firm on new crop Japans, but the fact fails entirely in spurring buyers into any activity on spot.

Freights on the first arrivals of new picked Japans will be on a 3c. basis.

Offers of round lots of Maracaibo coffee have been made to roasters on the market at 19c.

Laporte, Martin & Co. expect some choice champagnes and brandies ex s.s. Escalona, now on the way.

Jobbers have been accepting orders for sugar at refiners' prices since Monday, and some of them have sold ahead at the previous low rates.

Advices from Barbadoes on molasses are very easy in tone, and say that still lower values are probable. The quality is averaging very poor.

The fruit sale this week promises to be as largely attended by western buyers as that of the Astrid last Friday.

Ewing, Herron & Co. are sole owners of Herron's celery pepper. The firm is prepared to replace old shop-worn goods with new and much improved stock.

NEW BRUNSWICK MARKETS.**OFFICE OF THE CANADIAN GROCER.**

ST. JOHN, N.B., May 9, 1895.

ANOTHER month has gone and the spring trade is now well in hand. I am pleased to report that St. John merchants are finding it a very profitable one, except as regards produce and fish. Our merchants are feeling particularly well-pleased in regard to the duty on sugar, most of them being in a good position as regards the quantity on hand. In liquor the St. John merchants were not expecting a change, and large quantities were held here in bond. The molasses duty was somewhat of a surprise. In fact, not many were expecting a duty on sweets, and the stocks here were bought on the expectation of an advance in raw. There have been large quantities of fancy American biscuits coming into this market, but the change in the duty is so light that it will not effect this trade much. In spice and teas there is no change, though the markets are firm, as is the coffee market.

SALT—The cargo spoken of last week of some 6,000 bags is to hand and is finding a fair market. The price asked is 45c. for coarse at the ship's side. Ex-store prices remain as quoted. The Windsor Salt Co. are finding quite a demand for their special cheese salt. They lay it down rather lower than the dairy, and it gives splendid satisfaction. We quote: Coarse, ex-ship, 45c.;

out of store, 50 to 55c.; fine factory filled, 95c. to \$1.10; 5 lb. bags, \$3 per bbl.; 10 lb. bags, \$2.80 per bbl.; 20 lb. boxes, 20c.; 10 lb. boxes, 12c.; cartoons, \$2 per doz.

OIL—The demand for burning oil continues rather quiet. As noted in our last report, merchants were not in a way to lose by holding off in buying, and events have shown the correctness of our information, as prices are off from one to two cents. Lubricating, though higher in the United States, has as yet shown no change here. Demand is good. We quote: American, best quality, 23c.; Canadian, best, 21c.; Canadian, second grade, 17c.

CANNED GOODS—The demand is rather better, particularly for vegetables, which are finding a good sale. Jobbers will soon be buyers, as stocks held here are light. Oysters, though likely to be higher, are still quoted at low prices at Baltimore. In beef the price continues firm at the advance. One merchant, in speaking to THE CANADIAN GROCER, said he was finding a better demand for blueberries than for a long time. These goods are sold very low. The change in the duties will affect American canned fruits somewhat, making them cost about 10c. per doz. higher. Canned fruits are rather quiet. We quote: Corn, 95c. to \$1; peas, 90 to 95c.; tomatoes, 95c. to \$1.05; corned beef, 2 lb. tins, \$2.80 to \$2.90; 1-lb. tins, \$1.70 to \$1.75; oysters, 2's, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; lobsters, \$1.75 to \$2; haddies, \$1.40; salmon, \$1.30 to \$1.40; flat, \$1.65; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—Business has been more active during the past week, raisins showing more demand than at any time since the first of the year. In California loose muscatels, prices are lower in New York, and the direct buyers of last fall are rather at a disadvantage. This fruit, having better keeping qualities than Valencia raisins, is more in demand as the season advances. There is a California Valencia which is reported to stand age better than either of the above. In dried apples the market is easier, and holders are more anxious to sell, the local demand at this season being very light. Stocks are, however, small, and but very few are in Nova Scotia to come forward; evaporated are also rather easier. In dried, the New York market would take all offering at a fair price, but, owing to uneven quality, light weights and poor packages, the trade of the metropolis will have nothing to do with them. We quote: Sultana raisins, 6 to 7c.; Valencia, 4 to 4¼c.; layers, 5 to 5¼c.; London layers, \$2.10 to \$2.25; California loose muscatels, 5½ to 6c.; currants, bbls., 3¾ to 4c.; half-cases, 4¼ to 4½c.; evaporated apples, 8¼ to 8½c.; dried apples, 5¼ to 5½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.; Bermuda onions, \$2.50 per crate; Egyptian, 2c.; Californian evaporated peaches, 12 to 13c.; ditto apricots, 12 to 14c.; ditto pears, 12 to 13c.

GREEN FRUIT—Business during the past week has been large. Valencia oranges are still in the market in large quantities, though not in as good condition as earlier. Californians are about out, and Messinas are just getting in good condition and are finding large sale. Lemons are rather easier. The demand for bananas is such that one of our fruit dealers is handling between four and five hundred bunches per week. Apples are getting very scarce, with a light demand. Pineapples are now quite plentiful. Prices are: Apples, best, \$2 to \$3; seconds, \$1 to

\$2; Valencia oranges, \$4.50 to \$5; Messina, \$3 to \$3.25; California, \$2.75; bloods, \$2 to \$2.25; lemons, \$3.50 to \$4.50; bananas, \$1.50 to \$2.25; pineapples, 12 to 18c.

DAIRY PRODUCE—The market is very flat. Holders of butter have tried in every way to reduce stocks, but find themselves still overloaded. It is not a matter of price, but of selling. The stocks of held creamery are not large, but are more than enough for the demand. Fresh prints find a good sale, as does good butter. Cheese is working off at rather lower prices, but there is a good deal still on this market, and a fairly large quantity has been consigned to England. Eggs are more plentiful, and find a fair demand. We quote: New butter, 18 to 21c.; creamery, 17 to 18c.; dairy, 15 to 16c.; Cheese, 10 to 10½c. Eggs, 14 to 15c.

MOLASSES—Prices here are firm and expected to remain so, though in some cases goods have changed hands at very little over cost. There is some surprise among importers here that Montreal buyers are protected against shortage and sour molasses, while they have to take all risks. The shippers in Barbadoes will, no doubt, hear from their St. John buyers in regard to this before orders are again placed. The shortage on one lot of 100 casks by last steamer was fully ten per cent. Before our next report the steamer from the West Indies will be here, when there will be a good stock in the market for the first time for some months. There is but very little sale for any molasses at a higher price than Barbadoes in this market. The duty on syrup has again advanced. It is now 11 cents per gallon. This includes the duty on the package, and still American syrups are as low as Canadian. If this is a protection for revenue, it is not to be desired in many lines. We quote: Barbadoes, 28 to 30c.; St. Croix, 27 to 28c.; Porto Rico, 33 to 34c.; syrup, 35c.

SUGAR—St. John merchants are feeling fairly well satisfied, as stocks here make upward of 20,000 barrels bought and to arrive, one firm holding about one-third of this. But at best it is only the making up of past losses, if the last eighteen months or two years are taken together, as a number of times our merchants have bought ahead on a falling market. This is not the case with all. Stocks were largely bought owing

Wholesale Agents.

to the low prices at which they were obtained and the firmness in the raw market, so that many are hoping for further profits. We quote: Granulated sugar, 4 to 4¼c.; yellow, 3½ to 3¾c.; Paris lump, 5 to 5½c.; pulverized, 5 to 5½c.

FISH—Market is dull. Smoked have sold ex vessel as low as 4c., and there is no demand. Stocks are held here, costing 1 to 2c. above this price. Fresh gaspareaux are being caught in but small quantities, and are being largely sold for bait. A few shad are being taken, and some British Columbia salmon are in the market. It will be a month before our season begins. Except smoked herring but few fish are being received. We quote: Cod, \$2.80; large, \$4; small, \$3.25; pollock, \$1.65 to \$1.70; bay herring, \$1.40 to \$1.50; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50;

Canso, \$5; smoked herring, 6 to 7c.; Digby chickens, 10 to 12c.; Halibut, 8 to 8½c.; gaspareaux, 50 to 60c.; smoked, \$1; lobsters, \$6.

PROVISIONS—The market shows no change. Prices continue firm, with but light demand. We quote: Clear pork, \$18.50 to \$19; mess, \$16.80 to \$17; prime, \$13 to \$13.50; extra plate, \$14 to \$14.50; plate, \$13 to \$13.50; pure lard, 9½ to 10c.; compound, 8½ to 9c.; cottolene, 9¼ to 9¾c.; hams, 11 to 12c.; rolls, 9 to 9½c.; beef, half-barrel, \$7.

FLOUR, FEED AND SEED—In flour the market is still active, and all grades are up. Ontario millers are finding it hard to get wheat, and are very reticent, not pushing sales. Manitoba, though higher, can be bought almost as low as Ontario. W. Y. Ogilvie appears to have lots of wheat

ST. JOHN MARKETS—Continued.

is selling very large quantities of flour owing to his low prices. Stocks here are fairly large, but it is a case of making up losses of a year ago. In oats and oatmeal the market is firmer, with a fair demand. Cornmeal is very firm at 10c. advance. Seeds show strength. In hay the market is very dull. During the week a large export order was received, but prices were too low for even the dull market here. Middlings, though firm and scarce, have not, during the last advance, followed flour. We quote: Manitoba, \$4.65 to \$4.75; best Ontario, \$4.50 to \$4.60; medium, \$4 to \$4.25; oatmeal, \$4.25 to \$4.30; cornmeal, \$2.95; middlings, \$24 to \$25 on track; bran, \$22.50 to \$23; hand-picked beans, \$1.90 to \$1.95; prime, \$1.80 to \$1.95; split peas, \$3.70 to \$3.90; pot barley, \$4 to \$4.25; hay, on track, \$9; timothy seed, \$3.25 to \$3.40; red clover, 11½ to 12½c.; Alsike, 12½ to 13c.; buckwheat, \$1.40.

ST. JOHN MARKET NOTES.

Alonzo Staples, retail druggist, Fredericton, is in financial difficulty.

There is to be a cheese factory at Kinross Settlement, Westmoreland county.

Frank Beattie, late with Jardine & Co., has opened a retail grocery store on Charlotte street.

T. A. Tippet & Co. have removed from Prince William to Dock street, as have Arthur P. Tippet & Co.

It is understood that Ald. McGoldrick with Robert Anderson are to start to manufacture rope in this city on a large scale.

John Sealey received by the last West Indian steamer a consignment of St. Croix molasses, which he is prepared to sell at a right price.

R. W. Richardson, of Hartland, has associated with him W. D. Keith late with J. T. G. Carr. They will carry on business in the Tracy block, carrying a stock of general merchandise.

The Exhibition Committee are busy. It is now expected there will be a working dairy on the grounds. The Government have made the buildings a bonded warehouse for foreign exhibits.

The City of Monticello now transfers her mails, passengers and freight at Digby, taking to Annapolis only local matter, and it is said that in the near future she may not go to Annapolis at all.

The report of the Oak Bay Creamery, Charlotte county, showed that during the past season 18,500 lbs. of butter had been made, with very satisfactory results, considering the markets.

"Comet" stove stain has been added by Messrs. C. & E. Macmichael to the regular stock. They are always among the first to handle those goods which on account of their quality are in demand.

As noted in these columns, Geo. Robertson & Co. have retired from the retail grocery business. This firm had the reputation of keeping about the finest line of groceries in the Maritime Provinces. They will continue business in wholesale groceries in the Jardine building, Prince William street.

The important position which lumber occupied in the prosperity of this city and province is somewhat shown by the following: Alex. Gibson will during this month load one thousand tons of squared timber at this port for English market, beside which

he has chartered enough tonnage to carry 30,000,000 feet of lumber. And there are other large shippers from this port. Nearly every mill around St. John is adding new machinery this spring.

LATE BUSINESS CHANGES.

R. A. Dutton, grocer, Barrie, Ont., advertises his business for sale.—J. P. Ross, general store, Exeter, Ont., has been partially burned out.—W. F. Ritchie, general store, Gelert, Ont., has been burned out.—The creditors of C. & M. Mills, general store, Iroquois, Ont., have been called together.—M. T. Beaudry, grocer, Ottawa, has assigned to J. A. Brook.—George Gordon, grocer, Woodstock, Ont., has assigned to James Brady.—A. Lemieux, general store, L'Islet, Que., has assigned.—Geo. A. Archambault is commencing a grocery business at Montreal.—Louis Napoleon Dagenais and Dame Julie Mainville, widow of Joseph Dagenais, have been registered proprietors of L. N. Dagenais & Co., general merchants, Montreal.—There is a demand of assignment in the case of Annie Nolan, grocer, Montreal.—J. B. A. Payette & Co., traders, Montreal, have dissolved.—Joseph Verdon and William Seviere have been registered proprietors of Seviere & Co., fruits, etc., Montreal.—There is a demand of assignment in the case of Neron Basil, general store, St. Jerome, Chicoutimi County, Que.

AN INTERESTING TABLE.

Notwithstanding the favorable appearance of the growing crop of wheat, that cereal has had a steady advance for some time, and farmers are now receiving a higher price than for some years. It might be interesting to know that at the Tilsonburg mills the following prices were paid on this date for the past nine years:

1895.....	70 to	75
1894.....	54 to	56
1893.....	62 to	65
1892.....	80 to	83
1891.....	\$1 00 to	\$1 03
1890.....	90 to	95
1889.....	90 to	93

SHORT-WEIGHT FLOUR.

A correspondent of The American Miller writes: "We have been having a trouble lately which was quite new to us. It may be old to some, but others may not have had the experience. I have read and heard a great deal about millers shipping flour and finding it almost always short in weight when it reached its destination.

"We have had such an experience with our local trade. When the merchants stock up on flour they pile the bags in a store-

room close to a stove, or in a close corner where it is hot and dry. There it may lie for twenty or thirty days. When the customers find out that the flour does not hold out in weight and complain to the merchants, the merchants will go for us, claiming that we do not put enough flour in the sacks.

"To find out the cause of the shortage we took a 24-pound sack of flour and put it in the office by the stove. At the end of 10 days we found the flour had become so dry that it lost a half pound in weight. If a miller's customers are kicking on account of his not putting enough flour in his sacks, let him try this and he will probably find where the short-weight comes in."

NOVA SCOTIA MARKET REPORT.

OFFICE OF THE CANADIAN GROCER.

HALIFAX, May 9, 1895.

SUGAR is the question of the hour. The announcement of the re-imposition of a duty on raw, and a corresponding increase on refined, was unlooked for by the general public. But such does not appear to have been the case with the refineries. Since the first of the year 45,000,000 pounds of raw sugar have been entered at this port, to say nothing of a cargo of 792,771 mats, of which 24,000,000 pounds were entered within the last three weeks. As all this was for the refineries, it is safe to say they made a cool \$150,000. Some of our wholesale merchants have also profited by the turn of affairs. One firm made \$6,000, and others lesser amounts.

While it is generally understood that the refineries here and some dealers have made money by the re-imposition of the duty, it is also known that some people are out of pocket. One firm has a cargo on the way, which, it is understood, was sold to the refinery at a certain price, duty paid. That firm will be out of pocket at least \$3,000, apart from the question of duty, raw sugars have advanced from 6-16 to 2 7-16, cost and freight. This means that the refined market would have advanced 1/4 of a cent if there had been no duty. The Acadia Refining Co.'s quotations to-day are: Refined cut loaf, in boxes, 5 3/4 c.; do., in bbls., 4 1/2 c.; do., in half-bbls., 4 3/4 c.; granulated, 4 1/2 c.; white extra C, 3 3/4 c.; standard yellow C, 3 3/4 c.; extra C, 3 1/2 c.; yellow extra C, 3 1/4 to 3 3/8 c.

FLOUR—Markets continue very firm and, we may say, buoyant. Up to the close of last week almost every day marked an advance. A leading dealer, in conversation with THE CANADIAN GROCER, to-day said: "Our Canadian markets, no doubt, have been strengthened by the fact that we have scarcely sufficient wheat for our home wants, without export. Still, Canadians must take into account that none of our flour at these relatively higher rates than the American can go to Newfoundland or the Labrador coast either via Montreal or from Halifax. American flours will supply that demand, and the probabilities are that we have sufficient wheat in Canada for our absolute home requirements. I shall not be surprised, however, to see the markets forced up to \$5 on Ontarios, but will look for a break somewhere within that range of values." We hear of a sale of a first-class straight grade of flour at \$4.35 on this market. Quotations are: Hungarian patents, Manitoban, \$4.75 to \$4.85; Manitoba strong bakers', \$4.60 to \$4.70; Canadian pastry, \$4.50 to \$4.60; 75 per cent. rolled patent, \$4.40 to \$4.50; 80 per cent. \$4.30 to \$4.40; 90 per cent. \$4.25 to \$4.35; straight, \$3.75 to \$3.85; extra, \$3.50 to \$3.60.

CORNMEAL—Cornmeal is steady, even firm, as corn is higher, and we should say that \$2.90 is a reasonable price, excepting for very large purchases.

PROVISIONS—There has been a steady upward movement all the week in provisions. Native beef is worth, at the yards, Richmond, from \$8 to \$9.50, with Ontario at least \$1 higher. Mutton remains at 10c. Spring lambs are coming in freely, and are consequently lower in price, being quoted at from

\$3 to \$4. Veal is worth from 4 to 6c., according to quality. Dressed hogs have gone up, and are quoted at 7c.

POULTRY—The supply of poultry is not large. Fowls are quoted at from 60 to 90c. per pair, according to size and quality. Turkeys are quoted at 17c. per lb.

BUTTER—There is very little doing in butter. Retailers are offering two pounds of good Ontario creamery for 25c. The jobbing price is from 12 to 22c.

PRODUCE—Potatoes are worth from 40 to 50c., and 45c. is a good all round quotation for oats.

HIDES—There is an advance in hides. This time last year they could be bought for 3 1/2 c. per lb.; to-day they are quoted at 6c.

GREEN FRUIT—The market is well supplied with Valencia and Messina oranges, and the quality has very much improved since last report. The market remains steady at last quotations, but is liable to advance. The market is well supplied with lemons, choice Messinas and Palermos, and the quotations show an advance over last week. Prices to-day are from \$4.50 to \$5. The banana market is somewhat bare, but such is not likely to occur again this season. Prices remain steady. Apples are scarce. There are a few Nonpareils to be had, which are quoted at from \$4 to \$4.50. Pineapples are expected next week. The market is bare at present.

FISH STUFFS—The market in dried and pickled fish remains dull and inactive. Stocks in store have to be rebundled to avoid spoiling. The demand seems to have entirely stopped. Quotations, to-day, from vessel, are: Dry cod, prime, \$2 to \$3; do. small bank, \$2 to \$2.25; do. large bank, \$3.75; do. bay, \$2.25; do. Labrador, \$2.25 to \$2.50; haddock, Cape Breton, \$1.75 to \$2; do. western, \$1.75; hake, \$1.75 to \$2; pollock, \$1.75 to \$2; herring, Bay of Islands, split, No. 1, \$1.50; do. Labrador No. 1, \$4.50; do. No. 2, none; do. shore No. 1 large split, f.o.b., \$3.50 to \$4.50; do. No. 1 fall split, \$1.50 to \$1.75; do. round shore No. 1, \$1.75; alewives, No. 1, \$2.50; mackerel, none; salmon, No. 1, none; No. 2, \$14; No. 3, \$12.

HALIFAX MARKET NOTES.

Mill feeds are a little lower this week.

Our imports increased over \$13,000 last month.

New Bermuda cabbages are expected next week.

The schooner Gold Hunter landed 500 puns of molasses at Liverpool, N.S., this week.

Dalton & Etter, grocers, Amherst, have assigned to Wm. G. Calhoun. Their liabilities are small. Preferences are made amounting to slightly over \$600.

The latest Charlottetown market prices are as follows: Eggs, 12 to 14c.; butter, 21 to 23c. Wild fowl were as follows: Geese, 50 to 70c.; brant, 70 to 80c.; ducks, 40 to 45c. Beef by quarter, 5 to 7c., by small, 6 to 10c., oats, 38c.; pork, 6 1/4 c. Potatoes are about 30c. per bushel. Fresh herrings, 15c. per dozen.

Application has been made in the Supreme Court to wind up the affairs of the Vale Co-operative Company, at Thorburne. C. J. McKinnon and H. T. Sutherland are temporary liquidators. This firm did a good general business for some years, but the mines have not been working of late, and consequently the miners moved to other parts, leaving the store with few or no customers.

FRUIT BUYERS.

John A. Cooper, secretary-treasurer of the Canadian Fruit Buyers' and Exporters' Association, has issued a circular commenting on the successful nature of the society's work during the past year, and calling upon the members for renewed activity. At a recent meeting of the Executive the following resolution was passed:

In the opinion of the Executive, the date of the annual meeting should not be earlier than the first Tuesday in September, and no buying should take place prior to that date, when the views of the members could be fully ascertained, complete crop reports from the different sections be obtained, and that the secretary be instructed to ascertain the views of the members as to the propriety of the changing of the date of the next annual meeting as above suggested.

Each member of the association is asked to write the secretary as to what date he is in favor of.

THAT ESPLANADE SITE.

The Property Committee of the Toronto City Council now offer to lease the Cobban Manufacturing Co. 246 feet frontage of Block C. on the Esplanade at \$4.50 per foot per annum. The company is not willing to pay more than \$3.50.

DUTIES ON JAMS AND MARMALADES.

To recoup the domestic manufacturers of preserves, jams, marmalades, etc., for the extra 1/2 c. that their sugar is going to cost them, Finance Minister Foster has placed an equivalent duty on foreign goods of this description. Most of these goods imported into Canada are of English manufacture, and form a large proportion of the total goods consumed. Naturally, the duty will affect prices to a certain extent, but THE GROCER is informed by commission men who represent such firms as Crosse & Blackwell, Lazenby, Southwell & Co., Batty & Co., etc., that the chief inconvenience they will be put to will be in regard to their Customs entries.

Any change in price that does result will not be very appreciable to the consumer or retailer.

NO BILL AGAINST T. A. WELDON.

The Grand Jury at the York Assizes has reported no bill in the case of The Queen vs. Thomas A. Weldon. The information was originally laid against E. B. Eddy by one Allan Austin, traveler, Toronto, who charged Mr. Eddy with unlawfully offering for sale "a certain fibre-ware washbasin as a patented article, the same not being patented in Canada, with intent to deceive the public." The charge against Mr. Eddy was dismissed, but later a similar information was made out against Mr. Weldon, Toronto manager for the E. B. Eddy Co. At the special request of the Eddy Co., who wanted the point of law decided, Mr. Weldon was sent for trial by the Police Magistrate. The finding of the Grand Jury settles the matter.

STILL AGAINST CANADIAN CATTLE.

A WASHINGTON despatch says: The raising of the restrictions against the importations of cattle from Mexico has not, according to the Agricultural Department authorities, had much effect on the beef market of this country. Since the first of the year, including the period both before and after the raising of the restrictions, there have been brought over the line about 50,000 head of cattle, but almost all of these have been for grazing and have not gone into the market for conversion into beef at all.

The Department has not been officially advised of any attempt on the part of the Canadian Government to secure a removal of the quarantine restrictions on cattle imported from the Dominion into this country, although the matter has been broached privately by large shippers and the suggestion thrown out that the relaxing of the regulations would throw into New England prime fat cattle that would compete with the Chicago product, it being claimed that the cattle from Quebec and Ontario are the equal in quality of those that go to Chicago.

The United States now requires 90 days' quarantine against all Canadian cattle, and with regard to fat cattle for immediate consumption this amounts to a practical prohibition. Formerly we had no quarantine, but

when the former secretary, Mr. Rusk, found that the Dominion Government had ordered a quarantine he promptly did the same. The real reason is said to have been retaliation, but the cause assigned was the alleged existence in Canada of pleuro-pneumonia. Unless Canada should first remove her restrictions the United States will never do so, and it is doubtful if this Government would agree to do so anyhow in view of the fact that Great Britain has publicly announced as the reason why she will not raise her quarantine against her own colony the existence there of pleuro-pneumonia.

The Agricultural Department, however, is emphatic in its statement that neither in the United States nor Canada can this disease be found, and so long as Great Britain, Belgium and other Governments continue to keep up this fiction, the United States will maintain it as against Canada.

THEIR NEW PREMISES.

Rutherford, Marshall & Co., the newly-reorganized Toronto wholesale produce and commission firm, have removed from their old place of business to 62 Front street east. The new warehouse is large, airy bright and inviting, and is altogether, for appearance, convenience, and everything else, a great improvement on the old stand. The firm now enjoy four times the storage

capacity that they did before, and their refrigerators are to be doubled in size. The comfortable and spacious suite of offices which occupy a portion of the front of the building are being fitted up with the latest office fixtures, such as desk telephones, etc.

STAVING OFF A CREDITOR.

I like to hear the instances of boldness and originality in meeting the demands of exacting creditors, and when there is a dry humor in the turn of expressions the conditions of the superiority in the advantages of the parties are reversed, and the "hard eyed lender" is, for the time, made subordinate to the "pale lender," says a writer in The Boston Post. It is seldom that a lawyer has imagination enough to advise a client to assume a humorous attitude towards the demands of a creditor, and the following example here in Boston is the more interesting on that account. In that case the client had received a bullying letter, closing with the remark, "Unless the balance of your account is settled at once I shall proceed to extremities." The lawyer smiled as he read the letter, and suggested to his client that there was a good chance of making a hit at the writer's expense. "Write him," he added, as follows: "Will you tell me what authority you have for spelling balance with two Ls?"

THE FRUIT SALES.

THE sale of direct fruit, ex ss. Astrid, in Montreal on Friday last was more successful, both as regards attendance and the prices realized, than the opening sale last year.

The fruit generally was in excellent condition. Ordinary lemons sold at \$1.50 to \$2.50 per box, as to quality and condition; choice to fancy, \$2.50 to \$3, and a few lines of extra fancy fruit sold up to \$4. Oranges, boxes, sold at \$2 to \$2.80, and a few lines of extra fancy bloods and ovals sold up to \$3.60. Half boxes sold in proportion. The sale was largely attended and the bidding was brisk. Among those present were the following: John Dixon, of Dixon Bros., of Hamilton; McWilliam & Everist, of Toronto; John Bourse, H. A. Bourse and C. E. Plain & Co., of Ottawa; Dawson, of Toronto; Rublee, of Winnipeg; McPherson, of Winnipeg; Walker, of Guelph; Voisard, of St. Catharines; R. Barden, of Quebec; G. M. Emery, of Boston; A. Currier, of Boston; W. H. Spear, of Boston, representing Porter Bros., of Chicago; Mr. Jones, of Will & Jones, of Buffalo; A. Mountjoy, of A. Mountjoy & Co., London; J. Wood, J. F. Wood & Co., Sarnia; Ryerson & Co., Brantford; G. W. Hunt, Ottawa. The dealers who have imported lemons will realize handsome profits on them, as the

market has advanced considerably. The steamship Fremona has arrived in port with 4,000 boxes and 2,000 half boxes of Messina oranges and 800 boxes of Catania and 5,000 half boxes, and 37,500 boxes of Messina lemons and 2,000 Catania. The fruit is in good condition, and the prospects are that there will be a much larger attendance of American buyers. This cargo will be sold on Thursday of this week in the Long Room of the Mechanics' Institute.

MEN OF GENIUS AND MEN OF MONEY.

That is, one class of men, the thinkers, the men of science, the inventors; and another class, those whom God has endowed with a genius for saving, for getting rich, for bringing wealth together, for accumulating and concentrating money, men against whom it is now fashionable to declaim, and against whom legislation is sometimes directed. And yet, is there any benefactor of humanity who is to be envied in his achievements and in the memory and the monuments he has left behind him, more than Ezra Cornell? Or, to take another example that is here before our eyes, more than Henry W. Sage? These are men who knew how to get rich, because they had been endowed with that faculty, and when they had got rich they knew how to

give it for great public enterprises, for uses that will remain living, immortal, as long as man remains upon the earth. The men of genius and the men of money, those who prepare new agencies of life, and those who accumulate and save the money for great enterprises and great public works, these are the peculiar and the inestimable leaders of the world, as the twentieth century is opening upon us.—Charles A. Dana.

A NEW AND CHEAPER GELATINE.

Jelloine, or white flake, is a new article made in the States for making ice creams, custards, etc. It is cheaper, and is said to be more economical, than the German gelatine. It is made from vegetables. Kennedy, Greig & Co., Montreal, have secured the agency for Canada. They will import in bulk, and put it up in ounce packages. It will be ready for the market next week.

Mr. L. J. Forget, the vice-president of the Montreal Stock Exchange, was unanimously elected president in place of Mr. H. S. Macdougall, who retired owing to poor health. Mr. George W. Hamilton was elected vice-president, and Mr. W. R. Miller, of R. Moat & Co., was made secretary-treasurer. The executive committee includes, besides the newly-elected officers, Messrs. J. R. Meeker and H. Gordon Strathy, who were re-elected.

THE COURSE OF BEEF PRICES.

A SWORN statement, made by E. J. Martyn, of the Chicago firm of Armour & Co., concerning the profits and losses of that concern's beef slaughtering business for the past sixteen months, has been submitted to the United States Secretary of Agriculture. Referring to the share that the dressed beef business has had to stand in the commercial hardships of the past two years Mr. Martyn declares that during 1894 cattle were fairly plenty and the beef slaughterers pushed the business to the utmost, each trying to outvie the other in the manufacture of dressed beef and the opening of branch houses, until now there is hardly a town in the east capable of consuming a carload of beef per week, but which has two beef houses, while the larger towns have from four to six, where one-half the number would easily care for the business.

At the eastern markets, which are the principal outlets, the public were short of both money and work and dragged the prices of dressed beef down to the lowest possible point, and as dressed beef cannot be held any more than fresh fish they got it very cheaply. At the first of the year it became apparent that cattle were short and beef slaughterers were obliged to put their delivery houses on shorter commons. Cat-

tle and beef began to advance slowly, culminating in April, when live cattle were on an average \$1.50 per hundred higher than in January. Retailers got excited and pushed their prices up, fearful that the advance would continue, and their next supply cost them more money. This caused consumption to fall off and immediately dressed beef and cattle broke sharply during the second week in April.

One thing people could not understand was why dressed beef should advance more rapidly than the price of live cattle. The reason for this is that the value of the hides, horns and offal from a steer costing three cents per pound is applied to reduce the price of the dressed beef. If cattle advance a cent or two per hundred the offal does not catch the advance, and arguing further in this direction Mr. Martyn quoted the the market report, which shows:

"There is a shortage on average weight of cattle at Chicago for the period of the past week, as compared with the same week of 1894, of twenty pounds per head, and 20,000 cattle in number, equal to a decreased supply of 12,400,000 pounds, or 2,000,000 per day.

"At Omaha the decrease is even greater. The four principal cattle markets show a decrease since January 1 of practically 300,000 head, or 200,000,000 pounds from the receipts of the corresponding period of 1894.

Armour & Co. would be very glad to slaughter the cattle of any eastern or other butcher for a compensation of \$1 per head, paying full prices for the hides, tallow and offal, and continue the business as long as the other party desired."

Enclosed in the document presented by Mr. Martyn to Secretary Morton is an abstract from the books of Armour & Co., showing results on 421,720 cattle slaughtered and marketed in the year ending November 6, 1894, of an average loss per head of 17 4-10 cents. This includes the tabular memoranda showing: Live cattle, 421,720, weighing 479,917,360, dressed weight, 264,416,440, which, together with salaries, labor, fuel, refrigeration, etc., present a total of \$18,063,025 70.

A counter statement, giving the credit, with a deduction of all expenses, including bad debts, etc, shows a loss of \$73,230 43 and as above stated 17 4-10 cents per head. A similar showing on 54,344 cattle slaughtered and marketed during November and December, 1894, exhibit a loss per head of 16 7-10 cents, while better figures are given on 56,948 cattle slaughtered and marketed during January and February, 1895, in which a gain per head of 45.18 is recorded, with one of 21 cents per head on 44,352 cattle slaughtered during the period of February 25 to April 20.

ESTABLISHED 1851.

"Seeking the Bubble Reputation"

Shakespeare in writing these lines evidently did not mean an enviable reputation of nearly half a century, acquired by honest methods and giving full value for value received.

Ours is no "bubble" reputation.

For years past there has been no well-grounded complaint against E. B. Eddy's Matches. A user will sometimes, to satisfy himself, try different brands, but if he knows what's what—and he generally does—will surely return to the use of the "old reliable."

TRADE CHAT.

THE assessment of Belleville is \$4,083,600. The population has increased to 10,318.

The Empire tea store, Ingersoll, has reopened under new management.

The Ingersoll cheese market reopened for business on Tuesday afternoon.

The Lake-of-the-Woods Milling Co. will spend \$75,000 in new elevators this summer.

Wheat sold on the London market Saturday at \$1.32 per cental. It is not long since the price was below the dollar mark.

A flour mill in Minneapolis contains a belt 250 feet long and weighing over a ton. It required twenty cowhides to make it.

This week the merchants of Clarksburg and Thornbury began the early closing movement, to continue during the summer months.

The statement comes from St. John's, Nfld., that Canada has refused to assume the civic debt of that city as one of the terms of confederation.

L. J. Dickie, grocer, South Oshawa, has decided to open an uptown store in the new Dingle block. Mr. Will Gordon, formerly of Morgan's, will be manager.

N. Mills, of Tilbury, has applied to the Ontario Government for letters patent for the Peninsula Oil & Gas Co., of Tilbury, with a capital stock of \$20,000.

From Hon. Mr. Foster's refusal to say what he would do regarding the Hudson Bay railway Friday night in the House it is thought no legislation will be introduced this session.

Mr. McBain, grain dealer of Peterboro', has been suspended by the Board of Trade for seven days for using a cancelled inspection certificate in connection with a grain deal he had with E. P. McKay & Co., of Toronto.

Mr. Henry Birks, Mrs. Birks and Mr. Gerald Birks, have returned to Montreal from an extended trip in California, Mr. G. Birks having spent the early part of the winter at Colorado Springs.

The stock of McDonald & Co., Ripley, was offered for sale Wednesday by Auctioneer Jones, and withdrawn at 47 cents. It was afterwards sold privately to Mr. Henry Macklin. The stock amounted to \$4,600.

The fisheries in the Maritime Provinces are reported as follows: Lobsters good, cod and halibut fair; alewives, haddock, salmon and shad scarce; herring plentiful. All the grounds are clear of ice.

The Hillsburg Beaver, published in the metropolis of a great potato-growing section, says: "The farmers who held on to their potatoes, expecting to get a dollar a bag for them this spring, have been somewhat disappointed. While the price was

the highest, and the buyers anxious to purchase, the roads were so bad that it was impossible to get the produce to market. As soon as the roads became passable the price dropped to 50 cents a bag, and the demand got slack. They are now looking a little better and the demand is somewhat brisker."

The Customs returns for the port of London for April, 1895, were: Imports, \$211,272; amount of duty, \$43,036.12; exports, \$1,077.83. For April, 1894, they were: Imports, \$202,979; duty, \$34,383.98; exports, \$9,284.62.

A. J. King, of Toronto, returned to Canada last week, having while in England made inquiries on behalf of Canadian dairy producers with a view to direct shipments to Manchester via the Ship Canal.—Canadian Gazette, London.

Already the Collingwood Meat Canning Co. have found it necessary to enlarge their premises, and last week the contract was let for the building of a large brick annex to the buildings, which will cost, complete, about \$12,000. Other buildings in connection with the company's works are contemplated.

It is estimated that nearly 35,000,000 feet of Canadian pine will be rafted across the lakes to the Saginaw mills during the present season. In addition to this, the Michigan Central Railway will take at least 125,000,000 feet from points along the Mackinaw division, and the Flint and Marquette will carry 50,000,000 feet.

Mr. Will Harper, so well and favorably known to the commercial and importing public as head clerk in the office of C. W. Moin, customs broker, with whom he has been associated for upwards of ten years, has resigned and become partner in the firm of Harper & Gillespie, customs brokers, office, room 1, No. 34 Yonge street, Toronto.

Here is the first intimation, through a newspaper advertisement, of tea being sold in a grocer's shop. It is culled from The Mercurious Politician, of September 30, 1658: "That excellent and by all physicians approved Chinese drink, called by the Chinese Tsha, by other nations Tay, alias Te, is sold at the Sultane's Head Coffee House, in Sweeting's Rents, by the Royal Exchange, London."

Why do not some of our citizens go in for curing hides? Hardly any capital is required. Steer hides fetch, we are informed, 50 cents. All that is to be done is to liberally sandwich them in salt. Treated this way steer hides will realize 9½ cents a pound in Montreal unbranded; if branded 2 cents less. A steer hide will weigh 60 pounds, which is equivalent to \$5.70 in Montreal. It would cost a little over 30 cents to take it there. There is money in this, gentlemen.—Regina Leader.

THE VALUE OF VIM.

The Rev. Dr. John Hall, speaking of the value of "vim," mentioned three kinds which all young people especially should seek and cultivate:

"There is a physical 'vim,' which is not to be despised. A vigorous body is an important instrument for life-work. All proper means towards acquiring and retaining bodily capacity for effort are to be employed. In the pure country air, and with the regular, simple habits of country life, vigorous bodies often develop without much thought or care.

"Open air, moderate exercise, regular habits, healthy food, regularly and moderately taken, adequate sleep and abstinence from tobacco, and emphatically in its cheap cigarette form, and from intoxicants; these are the means to be used for obtaining, through God's blessing, and for preserving the physical 'vim' that will enable one to bear the burdens—physical and mental—of life. We say 'mental,' for a weak body tells, all too often, on the mind, producing depression, despondency and discouragement, and tempting to the use of artificial means for temporary invigoration.

"Turning to mental 'vim,' we are led to think of clear judgment, power of concentration, and ability to persevere. We all know what is implied in 'weak-minded' as a descriptive word. To discriminate between the reality and the 'sham,' to look for

and get the evidence on which an opinion rests, to weigh it and get to a sound and fixed conviction—this is the first form of intellectual vigor.

"There are some who are ready and acute, but their minds are 'here and there and everywhere,' when they should be fixed on one thing. To put all one's force into a thing that has to be done is a great step towards success. Some know a little of everything, but nothing thoroughly, and so some can run over a wide area, but they lack concentration. You fire a gun, and the smoke expands, and the sound travels around, but it is the bullet that represents the force in the matter. He who can put all his faculties into the work he has undertaken for the time, has an important help to success.

"And the power of holding on is a valuable element in 'vim.' 'Unstable as water,' which a breath of air ruffles, and a slight change of position puts into motion; the fickle, superficial, fluent, flimsy youth will not come to much. 'I have undertaken this deliberately; I'm bound to go through with it'—this is the final element in mental 'vim.'

"You have more than a body, more than a brain. You have an immortal nature, adapted and intended to note the difference between right and wrong. Moral elements are all around, and the Creator of you and

me sees all, controls all, and sooner or later deals judiciously with all. So we have to learn to discriminate, and to act on our convictions in the highest and deepest things.

"Here now is the verdict of the Divine Spirit through Daniel, 'The people that do know their God shall be strong.' They think of His will, and try to do it; of what He hates, and they try to shun it. Their judgments are directed; their forces are concentrated; they have the single eye; and they have the strongest reason for holding on to the end. Such become 'strong in the Lord.'

"One more divine word let me bring to you from the apostle John. He was old when he wrote, but he never lost his interest in the young. 'I have written unto you young men, because ye are strong, and the word of God abideth in you.' They had 'vim.'"

VISIBLE COFFEE SUPPLY.

The world's visible supply of coffee, just compiled by the New York Exchange, shows 3,115,990 bags, against 2,754,094 April 1—an increase of 361,896 bags; and compares with 2,206,280 bags same time last year.

The stock of coffee in Havre is reported by cable as follows:

	Last w'k.	This w'k

DOMINION COUNTER SCALE

With Patent Automatic
Scoop Balance

Simple in construction. Nothing complicated or liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long,
11 in. wide.

Nickel-plated Beam, Poises and Scoop Balance. Double Beam, marked on both sides. The Automatic Scoop Balance is now offered for the first time, and every grocer who uses it will find it a great saving in time, and it will also obviate liability to error. When scoop is placed on the platform, the ball on back end of beam automatically rolls to the right, thus balancing scale with scoop on, and when scoop is taken off scale, the ball rolls to the left, balancing scale without scoop. Scale with this latest device is assuredly the most complete and desirable scale for general use in the market.

Manufactured exclusively by

THE GURNEY SCALE CO.

Hamilton, Ont., Can.

MESSRS. MILLS & Co., Agents Computing Scale Co., Chicago :-

Dear Sirs,—I purchased one of your Computing Scales some seven months ago, and have used it in my retail grocery store since. It was very highly recommended to me, and I have now to say that it has proven to be all that was spoken for it, and I think more. For accuracy in weight and computing the value of anything it is perfect. It is the best Scale I have ever seen for my business.

Yours, etc.,

J. S. MAGEE.

"Reindeer Brand" CONDENSED MILK

"I am satisfied that the original milk from which the REINDEER BRAND is prepared is of unusual richness. In point of flavor, color, and consistency it leaves nothing to be desired."

DR. OTTO HEHNER

Hon. Sec of Soc'y of Pub. Analysts, London, Eng.

DR. ARTHUR HILL HASSALL, Analy. Sanit. Inst., London, Eng., says :

"THE REINDEER BRAND condensed milk must be pronounced of excellent quality, and in every way satisfactory."

PROF. JAS. W. ROBERTSON, Dom. Dairy Commission, says :

"The Truro condensed milk, REINDEER BRAND, has been analyzed by our chemist, and found superior to the famous SWISS products."

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, MAY 17, 1895

(\$2.00 per Year) No. 20

DROPS FROM THE EDITOR'S PEN.

Business without system is like a vessel without a rudder.

* * *

Jealousy is the "green eyed monster" in business as well as in love.

* * *

These warm spring days are fructifying the cause of early closing.

* * *

There is one thing that every man has—an excuse for being late to business.

* * *

There's nothing like leather, sure enough, these days—for appreciating in value.

* * *

There will be dampening of spirits by water as a result of the increase in the duty on liquors.

* * *

Cuba is proving a bad thorn in Spain's side, and the sugar crop promises to share in the suffering.

* * *

An elevator building epoch has developed in Manitoba. Thirty new elevators alone will be erected this year.

* * *

Fly specks destroy the respect of customers. Keep the flies therefore at a respectable distance by the aid of gauze.

* * *

A well written and attractively arranged "ad." planted in a good medium, will bring forth fruit in due season.

* * *

The man who says that advertising does not pay is twin brother to the man who avers that medicines do not heal.

* * *

The look of "surprise" on the faces of the sugar refiners when they opened their newspapers the other morning and saw what the tariff had done for them during the

night must have been a study; that is, of course, if they were as ignorant of the contemplated changes as we are led to believe they were.

* * *

Procrastination is the rock which has caused more business men to founder than any other evil that menaces trade.

* * *

United States congressmen already have an elastic conscience, and now some of them are seeking an elastic currency.

* * *

Union is not strength when the several parts composing the whole are aggregations of soreheads, pessimists and cranks.

* * *

Quality and not size is what should be the young business man's first concern. The largest apples are not always the best.

* * *

Weak butter and strong coffee is what ordinary mortals like; but it is weak coffee and strong butter that sometimes they get.

* * *

"Comfort" does not rhyme with "cash," but it is a cold fact in prose that cash brings comfort, which is, after all, the poetry most of us crave after.

* * *

Toronto's master bakers cannot rise to unanimity in regard to raising the price of bread. There is evidently a little leavening of some kind needed.

* * *

The parliamentary pressmen who last week took a tour of the Eddy mills at Hull were doubtless more Eddy-fied than at any time during the session.

* * *

A heading in an exchange reads: "New Potatoes Begging." Potatoes begging? Well, this is a peculiar age. A competitor with the tramp, no doubt.

* * *

The grocer who keeps his delivery wagon clean and well polished may not be "a ruler

in the Queen's navee," but he is a man who is likely to rule over many dollars some day.

* * *

American wheat is being brought into Canada from Detroit for the use of Ontario millers. This is bringing coals to Newcastle; but just now the "coals" are needed.

* * *

"Don't let up on the departmental stores," advises a contemporary. That's right. Keep pegging away at new ideas to counteract the influence of the department stores. That is the best kind of "not let up."

* * *

The Manchester and District Grocers Association is trying to stop Sunday trading. One grocer, however, told a representative of the association that he would not close "for any amount of money." The man may not be a sinner, but he is a fool.

* * *

Statisticians claim that the per capita consumption of bread in Great Britain is decreasing, while that of meat is increasing. Let us see, did not an orator once remark: "Gentlemen, what made England great? Why, beef, bread and the Bible." There was no mention of bread there.

* * *

While politicians at Ottawa are devoting their time to picking holes in the armor of their opponents the business of the country is allowed to lie on the shelf. This is what comes of sending so many men to Parliament whose business is political and whose concern is self and party.

* * *

It has ere this probably dawned on the Toronto speculators who lost by the collapse of a certain bucket shop that the financial hoops of said concern were weak. A pity it is that the faith of speculative young men in bucket shops was not as weak as the receptacles in which they put their savings. Occurrences like that of recent publicity would then be less frequent.

W. C. LATIMER.

BY W. L. E.

TWELVE years ago there landed in Canada a bright Irish lad, brimming over with honest ambition and well fortified with pluck and energy. His name was W. C. Latimer, the subject of this sketch, and now a prosperous merchant in Creemore, Simcoe County, Ontario.

"Willie," for that is how his friends familiarly address him, got his initiatory business lessons in Draperstown, County Derry, Ireland. This was in 1877, when he was nearly 14 years of age, and he was apprenticed for 5 years to Henry Leacock, a general merchant of that town. After spending nearly 6 years in Mr. Leacock's employ, he resolved to see Canada, arriving in this country in the fall of 1883.

His first employer in Canada was W. L. Coulter, Avening, now of Creemore, with whom he remained about eighteen months. Then he secured a situation with John Sharp, of Cannington, one of the shrewdest and oldest business men in Ontario. Here it was that Mr. Latimer got what may be termed his high school training in business. It was while he was with Mr. Sharp that I became acquainted with him. He was a quiet, unassuming fellow whom everybody got to like, but he had a goal and was steadily aiming for it. In business hours he studied to please his employers' customers, and after business hours he studied to fit himself for the business career he had mapped out for himself. While too many young men of his age were wasting their evenings, friend "Willie" was working out the mysteries of bookkeeping and business ethics generally, or reading, or—"tell it not in Gath," negotiating a life partnership with a certain estimable young lady of the town. And he was successful, too.

He was sixteen months in the employ of Mr. Sharp, and then he returned to Avening, to again enter the employ of W. L. Coulter, which he left nine months later to accept a situation with George Lawrence, of Creemore. It was while he was in the latter's employ that Mr. Latimer left one day for Cannington and returned with the young lady—Miss Holmes—of that place, whose heart he had won during his sojourn there.

After clerking nine years with Mr. Lawrence, he, together with his brother-in-law, J. J. Holmes, now of Beaverton, purchased the stock and good will of his employer. This business he still carries on, Mr. Holmes having retired a year or two later to begin business for himself in Beaverton.

It is a principle with Mr. Latimer never to misrepresent an article. He sells it for

what, to the best of his knowledge, it really is. He gives personal attention to the details of his business, and is ever on the alert to grasp opportunities for the extension of trade. His books he watches as carefully as a mariner does his compass, and he balances them at regular intervals. Living above his income he would as soon think of doing as flying.

Mr. Latimer takes a lively interest in local field sports, and is a member of a couple of benevolent secret societies.

A SUBSTITUTE FOR TEA.

A horticultural paper is responsible for the statement that an excellent substitute for Indian or Chinese tea has been found. The tea plant will not grow in England,

W. C. LATIMER.

save under very rare and exceptional circumstances, but the new plant, which is an acclimatised shrub, the "Chimonanthus Fragrans," first brought from Japan to England by Admiral Harvey, possesses all the essential requisites of tea. It has five varieties, all equally serviceable for "tea." The beverage made from them is quite as good as the best green tea with cream and sugar. At present, we are told, "the plant is growing very well at Buckhurst Hill, Essex, on a sandy soil, with a southern aspect. It will do equally well in Kent, Sussex, Hants, Dorset, Devon and Cornwall, where many thousand acres of land, now vacant, or yielding unproductive crops, may be used for a new and profitable industry."

ORIGIN OF CATSUP.

"THE discovery of catsup and how the odd-sounding name came to be applied to that common and important table garniture was, curiously enough, due to a blunder by a preserve maker many years ago, when the canning industry was in its swaddling clothes." This statement was made to a Chicago Times man by a veteran member of the Western Cannery and Packers' Association at the Tremont.

"It is only another illustration," he said, "how mistakes sometimes lead to important discoveries. In connection with this story, I may add that when I was a boy, tomatoes, from which catsup is made—or Adam's apples, as they were known in those days—were considered rank poison. They were looked upon only as beautiful and valuable additions to the flower garden as an ornament. No one dreamed what a delicious article of food they were.

"In the East, many years ago, a well-known preserve-maker, now dead, while boiling a huge caldron full of tomatoes for preserves one day, accidentally put the wrong spices and other ingredients into the boiling mass of vegetables. He did not discover his error until some time afterward, when, tasting the mixture to ascertain whether it had been boiled to the proper consistency, he saw that something was wrong. Tomato preserves never tasted like that. He smacked his lips, puckered his mouth and made a wry face as the bitter sweet and now familiar pungent flavor of the mixture made itself felt."

Some of the business men in Carberry, Man., are moving to establish a board of trade there. They have communicated with the Winnipeg Board as to organization, by-laws, etc. The latter has complied with their request.

We are giving

LARGE DISCOUNTS off allORIGINAL PACKAGES
.. OF ..Crockery, China, Glassware,
AND LAMPS

During our LIQUIDATION SALE.

Liberal inducements to all buyers
in order to wind up this business.

WITH RETAIL MERCHANTS.

A R. MORRELL has bought out Thomas Dunbar, of Harriston. Mr. Dunbar has carried on a successful grocery and crockery business for the past eight years. Mr. A. R. Morrell is a pushing, up-to-date young fellow, and his chances are good for doing a successful business.

J. G. Wing, of New Dundee, secured a car of granulated per wire same evening the Budget speech was delivered.

L. H. Yeomans, the "Sugar King" of Mount Forest, secured a car—an extra car—just before the duty went on.

Weber & Erle, of Elmira, were also among the fortunate ones to secure a car of sugar before the advance. Meno generally gets there.

It is understood that several of the Kindardine merchants in the grocery business "nearly" got a full supply of sugars before the duty went on.

The merchants of Arthur were pretty well supplied with sugars, but clubbed together and bought another car a day or two before the duty went on.

R. D. Ramsay & Co., Plattsville, carry one of the largest and best-assorted stocks in the county of Oxford, and do a large trade in dry goods, groceries, boots and shoes, and tailoring. They also have a branch

store at Haysville. Mr. Ramsay got in "on the ground floor" on the sugar deal, having secured a car before either the advance took place or duty was put on. Mr. S. Dodge is at the head of the grocery department just now.

P. Monaghan, grocer, Charlottetown, P.E.I., has sold out his stock to Daniel McDonald, who will conduct the business in the old stand.

Mr. J. West Bundy, manager for R. Y. Fish, Linwood, with his usual good luck and judgment, managed to get well loaded up with sugars at the lowest figures.

A. J. Sarjeant & Co. succeed A. Moyer & Co., of Mildmay, and are having everything rearranged and put in good shape for a big rush this summer. They will have their cellar full in a few days of sugar now on the way, bought before the advance.

R. E. Hicks has bought out the grocery and crockery business of A. R. Code & Co., Perth, Ont. Mr. Hicks is a young man with good experience in the retail trade. He served four years' apprenticeship in Perth and about six years in one of the best retail stores in Toronto. He is very well connected in Perth, his native place, and is bound to do well.

N. S. Bowman, of Conestoga, has a fine store, and carries a splendid assortment of goods—one of the finest general stores you

will find anywhere. Anyone that calls on Mr. Bowman will be glad to hear he was fortunate enough to secure an unusually large supply of all kinds of sugar at the bottom figures. Mr. Bowman always has a kindly word for travelers calling on him, and when he decides a thing is right will buy quickly and liberally. It is a pleasure to call on men of that stamp, even if they do not wish to buy anything. Mr. Bowman is ably assisted by his two sons.

ACTIVITY IN COTTONS.

Owing to the strong probability of a further advance in raw material, we would advise that our present prices are without engagement.

Yours truly,

STEVENSON, BLACKADER & Co.,
Agents Montreal Cotton Co.

This notice was sent to the dry goods jobbers on Tuesday, and in consequence there has been a very active market during the past few days. Considerable purchases have been made on retail account as well, in anticipation of a rise.

The Finance Committee of the Winnipeg City Council have received two tenders for Winnipeg local improvement debentures, one from O'Hara & Co., Toronto, for \$37,315 of fifteen-year debentures at 107.36, and the other from Hanson Bros., Montreal, for \$54,203 of seven-year debentures at 103.55. These are the highest prices ever obtained.

PERFUMES AND THE NEW TARIFF.

BY NO means satisfied with the changes in the Inland Revenue Act as far as they affect alcohol are those manufacturers who use this article as a raw material. We have reference particularly to the manufacturers of perfumes and extracts.

And it is not surprising that they are not satisfied. The changes mean to them, in the aggregate, an increase of something like 33 per cent. in the cost of their raw material. To the perfume and extract makers of the country, it is estimated that the loss will be something like \$25,000 annually; and it is averred that they will not be able to get higher prices for the finished product in order to recoup them for this loss.

With the general principle of increasing the inland revenue tax on alcohol they are not at variance. What they call into question is the indiscriminate manner in which the tax is levied.

They hold that some discrimination should be made between alcohol when used as a beverage and when for manufacturing purposes. And, they might have added, for scientific purposes.

The contention of the manufacturers appears to be reasonable. There should be some difference. Alcohol as a raw material should not be taxed as heavily as alcohol used as a finished product, as is the case when consumed as a beverage.

Were there more business men at the head of governmental departments these

and similar anomalies, irksome to the trade and commerce of the country, would not be as common as they are to-day.

Business men are gradually getting their eyes open, and we have faith that the desideratum will be forthcoming some day, and that at no great distant a day either.

IS THIS REBATE UNJUST?

No government, as far the power as in it lies, should grant privileges to one manufacturer that it denies to another, yet, if what one reputable firm alleges be true, the Dominion Government, or, to be more specific, the Inland Revenue Department, stands condemned on this count.

The alleged charge is that a certain soap and perfume manufacturing firm in Toronto is allowed a rebate of about 90 per cent. on alcohol used in its factory, while others who have sought these privileges have been denied them.

There may be some conditions underlying the privileges accorded that may extenuate them, but the firm making the charges is reputable enough, and the charges themselves are serious enough, to warrant an explanation, if such is possible.

Canada is a free country. All men are supposed to be equal before the Government, and it would be a lasting disgrace if designedly there has been a perversion of this equality.

The matter is respectfully submitted for the consideration of the Controller of Inland Revenue, who, it is to be hoped, will be able to satisfactorily explain the apparent anomaly.

PRIVATE DETECTIVE AGENCIES.

Private detective agencies are possible of being made valuable adjuncts to business. Some of them too often are blackmailing institutions. Obviously, then, under proper control, their office is to be commended rather than condemned.

To secure the desideratum is the object of a bill now before the House of Commons at Ottawa.

This bill provides that when a number of persons associate for the purpose of forming a detective or secret service business for pay, a sworn statement shall be filed with the Secretary of State giving the names of the members thereof, together with the style of firm. Then, thirty days later, a ten-thousand-dollar bond must be deposited with the same Minister of the Crown as a guarantee of the faithful performance of the duties prescribed in the Act, while upon this bond are to be endorsed the oaths demanded of those who are to engage in the detective business. A new bond and certificate is demanded every 25 years, while

both these are to be forthcoming every time a new member enters the association.

Those engaging as detectives without having complied with the regulations are liable to both fine and imprisonment.

The bill appears to be a step in the right direction, and if it becomes law persons engaging in the private detective business will require to have both reputation and money, in both of which some so-called detective agencies are lacking.

SUGAR TARIFF HELPS BEET.

New tariff conditions form quite a boom for beet root sugar. The duty on raw sugar is equivalent to a bonus on the beet root industry, which, of course, has no tax on its raw material. In addition, Mr. Foster, Finance Minister, announced that the cash bonus to beet sugar would be continued for two years, and THE CANADIAN GROCER is informed that the promoters of the industry are assured by those who claim to know the mind of the Government that, after the next elections, the bonus will be definitely fixed for a period of ten years, so that beet sugar production may have stable conditions to contend with.

The present bonus is 75 cents per hundred lbs., and 1 cent for every degree above 70 per cent. of sugar, but not to exceed \$1. This, and the tax on imported raw cane sugar, constitutes good protection, and the owners of the Berthier factory are contemplating the building of another factory, possibly in Ontario, but more likely on the island of Montreal.

The Liberal leaders are not opposed to this branch of the Government's sugar policy. Mr. Laurier is believed to favor it, and has instructed Messrs. Cartwright and Paterson, his financial critics in the House, that they might let this point alone, which they did in their speeches on the Budget.

FRAUDS IN MILK.

As THE CANADIAN GROCER not very long ago pointed out, a good condensed milk should contain 7 to 9 per cent. of fat. The sale of milks which have less than that should not be permitted, for it indicates that the fat—the most valuable portion—has been artificially removed.

The mothers who use this milk for the nourishment of their infants will be cruelly deceived, for they will be only partially fed and few of them will thrive as they should.

We have on our desk now the analysis of several brands now being sold in Canada, and it is sad to relate that two of them show that fully fifty per cent. of the cream has been removed from the milk.

When they put a practical business man in charge of the Inland Revenue Department, instead of a figurehead, it is probable

we shall have a Food Act that will prevent frauds of this kind, and an Act that will be enforced.

In Ontario, an ordinary milkman who sells skimmed milk as pure is liable to a fine and imprisonment, thanks to the good services of Dr. Ryerson, who had the Act put through.

The Controller of Inland Revenue is an able lawyer, but he knows nothing about the adulteration of foods. It is an able business man, like Mr. Haggart or Mr. Wallace, that should be over this department.

NO HIGH-GRADE RIO COFFEES.

THE coffee situation has reached an interesting stage. On several occasions lately THE CANADIAN GROCER has noted the growing scarcity of good green coffees of the Rio kinds. But according to a cable received this week by a Toronto importing firm, the scarcity is more pronounced than at first realized.

This cable was in reply to an order sent for high grade coffees, and stated that the order in question could not be filled, there being no coffees in Rio under No. 8. Now, No. 8 is a grade too poor for the Toronto and Western markets, and consequently is not imported. No. 4 is the coffee principally imported by the trade in those parts of the country. As the trade know, it is a well-colored bean, free from the black article, and imparts a peculiar odor, about which the Rio coffee buyer is particular. The No. 8 coffee, on the other hand, contains almost as high a percentage of black as of white beans.

A peculiar feature about the situation is this: Even should there be stocks of green Rio coffee in other countries, Canada will be compelled to pay enhanced prices for any she may import on account of the tariff, which imposes a duty of 10 per cent. on coffees when not imported direct from the country of production.

The new Rio crop is not harvested till June and July, and does not begin to arrive at the shipping points till September and October, being brought from the interior by mule trains. It is usually about the middle of October that shipments reach Canada.

DISPUTE OVER COFFEE ESSENCES.

SOME, at least, of the importers of coffee essences and the Customs Department are engaged in a little controversy over the duty on this article.

It had its origin some months ago, when the department decreed that coffee essences must be classified under clause 32 of the Customs tariff, and subject, therefore, to a duty of 30 per cent.

Hitherto the importers had been bringing in coffee essences under clause 87, which, in the 1894 tariff, read: "Extract of coffee, n.e.s., or substitutes thereof of all kinds, 3c.

per lb." This change was not known till importers were notified to amend their entries.

One firm, at least, protested, and the Customs department, in reply, stated that the Controller had ruled as described, and was guided in so doing by the clause in the Customs Act, which reads:

If an article is enumerated in the tariff under two or more names or descriptions, and there is a difference of duty, the highest duty shall be charged and collected thereon.

"The transference of the duty on coffee essence from clause 87 to clause 32 meant a large increase in the cost of the article," said an importer, who had been one of those compelled to amend his entry. "For instance, take the one-pound bottle. Under the duty of 3 cents per pound and 20 per cent. on the bottle, the duty aggregated 53c. per dozen, while under the 30 per cent. rate the duty was increased to \$1.28 per dozen. Now take the four-ounce bottle. When the rate was three cents per dozen the duty amounted to 11 cents per pound, and under the 30 per cent. tariff 33½ cents per dozen. This makes the importation of the article practically prohibitory; and it is worse, as you already know, under the revised tariff brought down the other day, for there the duty on condensed coffee is fixed at 35 per cent. As far as I know there are no coffee essences made in this country. What we cannot understand is why coffee essences should be taken from the clause dealing with coffee extracts and classified with that dealing with condensed coffee. The dictionary says that essences and extracts are practically one and the same thing."

From enquiries made by THE CANADIAN GROCER it was learned that coffee extract, as imported by Toronto houses, is a solid, and worth less than the liquid known as coffee essence.

Hon. Clarke Wallace, who appears to have ruled in the matter himself, is an experienced grocer, and consequently his ruling has naturally more weight than might otherwise be the case, and those in the trade who expressed an opinion appear to think he was right.

But notwithstanding, this and other rulings would be less subjects for controversy were there boards of appraisers composed of practical and independent men, such as THE CANADIAN GROCER has time and again, during the last few months, urged the Government to appoint.

The Ministerial Association has decided to co operate with the Toronto Retail Grocers' Association with a view to the earlier closing of stores on Saturday night. With the church helping them on one hand, and organized labor on the other, the grocers should be able to secure the desideratum. Then, of course, they are helping themselves.

AGAINST DEPARTMENT STORES.

The London (Eng.) Sun complains that while the great Army and Navy Stores in London pay an immense dividend to the stockholders, the employes are not fairly treated.

The Sun says: "This huge establishment is honeycombed with discontent; the big dividends are being earned by gross injustice to a large section of the employes, and the men are being degraded by a system of military discipline which is as needless and useless as it is merciless."

The grievances are summed up under the following five headings: (1) Promiscuous searching of employes; (2) espionage indoors and "shadowing" out; (3) summary dismissal without reason assigned; (4) reduction of wages of old employes; (5) administration of the provident fund.

UNITED STATES FIGURES STILL INACCURATE.

The United States official figures have always been faulty in recording the amount of goods exported by the republic to Canada. The Washington statisticians, to remedy this, used to copy our trade and navigation returns giving Canadian imports from the States, thus admitting their superior accuracy. Our figures always showed Canada to be an immensely better customer of the States than their own figures admitted. Two years ago Congress passed a law compelling the register of shipments by rail to Canada, hitherto neglected.

The latest Washington returns covering the fiscal year 1894 show an increase of \$14,000,000 in exports to Canada over 1893. The new law is thus proving partly satisfactory, but not wholly, because the American figures are still \$6,000,000 short of the Canadian record for the same period. Canada, therefore, does not get credit for the whole of her purchases from Uncle Sam, and Hon. George Brown found in 1874, when he tried to get Congress to accept his reciprocity treaty, that the Americans were utterly ignorant of the value to them of the Canadian market.

ADVICE TO BUTTER PACKERS.

As the grass butter is now beginning to come in, country merchants will cease sending rolls to the city markets and commence putting it in tubs.

In view of the existing state of the trade these packers will do well to be very chary about what they put away. A large quantity of old butter is being held over to next season, and the market is so crowded with inferior stuff that big lots of it are being disposed of as grease to Toronto soap makers at 2 and 3c. per pound.

It seems strongly advisable, therefore, not to pack any light-colored or fodder butter in tubs, as such butter would eventually have to come into competition with the old butter which is now selling at so low a figure.

LEMONS TWO DOLLARS HIGHER.

THE results of the sale of the s.s. Fremona's lot of lemons in Montreal last Thursday fully bears out the predictions made in THE CANADIAN GROCER over a month and a half ago. At that date it was pointed out that direct importations of lemons were apt to be less than those of the previous spring, and, besides, that everything indicated higher prices. The result of Thursday's sale fully bears this out, for there were sales as high as \$4.80 per box, and prices generally show an advance of \$1 to \$2 per box over the prices realized last year. Those dealers therefore who were far seeing enough to place orders for importation direct at point of production, stand to make a good turnover on their speculation. It may be remarked in this connection that only a few firms, a couple in Montreal and a couple in Toronto, took this chance. The bulk of the trade preferred to wait until the cargoes were landed in Montreal, and, as a result, their fruit has cost them more money. The Fremona's lemon cargo, which is not only the heaviest so far, but much larger than either of the two others now on the way comprised 37,500 boxes of Messina and 2,000 boxes of Catania fruit. The range on the entire lot was \$2 to \$4 per box. In addition to the lemons there were 10,000 packages of Messina oranges and 5,800 boxes of Catania fruit. These sold at a range of \$1.10 to \$2.35 for the half boxes and \$2.10 to \$4 for the boxes, as to the grade of the fruit. All the Ontario buyers present at the Astrid sale attended the Fremona's, and, in addition, a number of New York and Boston buyers attended on the expectation of gathering in some lemons, which, they say, are going to rule high this season. The competition was too keen, however, and the great bulk of the fruit will remain in Canada. The next cargo sale will be that of the Avlona, which lot comprises 13,000 boxes of oranges and lemons. These will be sold, it is expected, on the 20th inst.

THE FATEFUL FROST.

Advices from the leading Canadian fruit districts go to show that more or less damage has been done by the untimely frosts of the past few days. Telegrams from some quarters say that everything is gone, while from other points comes the encouraging news that the frost has done no harm, but, as a matter of fact, it is yet impossible to ascertain the amount of damage suffered by the crops. The worst feature of the frost is that it followed a period of spring weather unusually fine for this period of the year, which had forced all vegetation ahead at an unnaturally rapid rate, so that it was in a delicate stage of growth. On the other hand, it is considered fortunate that the frost

has been followed immediately by a period of cold, wet weather. A hot sun rising the morning after Jack Frost's visit would have withered and shrivelled the bitten blossoms and shoots to nothing, whereas the cold drizzle which fell instead has braced many of the delicate buds and plants, so that they have taken a new lease of life. Strawberries, cherries, early-planted tomato plants and early vegetables generally have been most seriously hurt. It is hard to say anything definite as yet regards the effects of the frost on peaches, grapes and the larger fruits in the Niagara district.

CANNERS WANT FREE SALMON.

A leading canners' agent in Montreal informed THE CANADIAN GROCER that his advices stated that representative canneries in British Columbia had forwarded a petition to Ottawa asking for an order-in-council, to enable them to import salmon free into that province. They have taken this action in consequence of a recent decision of the United States Board of Appraisers that salmon are a fresh water fish, and as such are entitled to free entry into the United States. Consequently, while American canners at Point Roberts, Blaine, and other points in Washington state, can now get salmon from British Columbia, Canadian canners under the law pay $\frac{1}{2}$ c. per pound duty, equal to 4 or 5 c. on each salmon, for any fish they get from the United States. This frequently means a decided advantage to the American canners, when the conditions of the respective runs in British Columbia and Washington state vary, one way or the other. Hence the desire of the Canadian canners to secure the same privileges as those across the line.

INSOLVENCY LAWS.

"I am opposed to an insolvent law," said J. P. Whitney, M.P.P. for Dundas county in the Ontario Legislature, to THE CANADIAN GROCER yesterday. "It would be a good thing for lawyers, no doubt, and as I am one perhaps I should not object. But retail merchants ought to know exactly what it means to them. Take a typical case: A young man will get \$500 or so together, will go to the city and get a stock mostly on credit. A country store will be started, and the young man, perhaps through inexperience, perhaps knowing that he has the Act to protect him in future operations, will grow careless, and then a breakdown ensues. His stock is taken into the neighboring town and sold off next door to the honest and hard working merchant, who is often ruined by this slaughter process, and driven himself into the Insolvent Court. Thus, the result of the working of this law is to bring grist to its mill and keep itself going. Yes, the lawyers and assignees will do well under this law, but the rest of the community will not."

MONEY AND STOCKS.

C. P. R. continues to gather strength. On Tuesday it sold up to 53½. This is an advance of 1¾ to 2 per cent. on sales of a week before. Continued increase in the earnings seems to be the principal reason for the appreciation.

* * *

Bank stocks keep fairly steady, although there are fewer transactions than a week ago.

* * *

Insurance companies' losses are not so heavy as they were, and, as is usual, they are expected to be lighter from now until the end of the year than they have been during the past four or five months. There is a better feeling in insurance stock as a consequence.

* * *

Call loans are unchanged at 4½ per cent., and there is not much doing. In Montreal the money market is firmer, owing to the natural tendency of the banks to husband their funds towards the close of the financial year.

* * *

Stock of the new local insurance company in Winnipeg is being snapped up. Already nearly \$200,000 has been subscribed in that city alone, and it is the intention to invite merchants from Portage la Prairie, Brandon, and other towns to join.

* * *

"The general feeling," remarked a broker, referring to the stock market, "is that prices will slacken off, and that it will be a little duller—unless something unforeseen occurs."

* * *

The Chicago and New York markets have all been strong, and there is a good deal of speculation going on among Torontonians.

* * *

The United States gold reserve gained about 3½ millions in one day last week. This was the largest increase since February. The reserve now amounts to nearly \$96,000,000.

* * *

Some changes have recently been made in the directorates of a couple of banks. James Scott has been elected a director of the Standard, and R. D. Ferry, of Toronto, and Dalton Elliott, of Peterboro', have been appointed to seats on the Ontario Bank Board. A gentleman who knew whereof he spoke intimated to me that there would be a change in the policy and management of the Ontario Bank as a result of the infusion of new blood into the directorate of that institution.

* * *

Commercial Cable took a weak turn on Monday, but it appeared to be recovering at the time of writing.

ARGUROS.

DRUGS IN CANES.

ACCORDING to The Montreal Star the United States Customs officials in that city have made some startling discoveries, which will cause arrests and a sensation among the smugglers of phenacetin and sulfonal not only in Montreal, but also in Toronto, New York and Boston. During the past year the authorities at Washington and elsewhere have known that vast quantities of the drugs referred to have been, and are now, smuggled through from Montreal to Boston. Special officers were sent from the headquarters of the United States Customs Department to trace if possible the gang operating, but without avail. The Montreal officers were on the alert and have succeeded in getting "the inside track" of what promises to give startling disclosures in the course of a few days. The headquarters of the leader of the gang has been located in Montreal, and he is now under the surveillance of a secret service officer, who, when the trap is ready to spring on the gang, will be arrested. He is watched night and day.

Phenacetin and sulfonal are two expensive German drugs on which there is a very heavy duty when imported into the United States. In Canada it can be purchased in large lots, at 32 cents and 45 cents per ounce respectively. In the United States it is sold, in the same quantities, at one dollar

per ounce. This leaves a profit of \$76.50 on every five pounds the smugglers succeeded in getting safely "across the lines." The men at the head of the gang are wealthy, having accumulated all their riches by the smuggling of these two drugs. Naturally there is a wide field for the smugglers to "work," and they get orders for more than they can, with safety, get across, so every day they grow bolder and invent new schemes to get the drugs through. The most ingenious yet tried is the one just brought to light by the Customs officers, and by which the smugglers are saved the trouble of long roundabout trips in order to evade the officers. The new scheme is to drill out thick walking-sticks and umbrella handles, leaving merely a shell. The drugs are then packed into the hollows, and the tops neatly replaced, defying detection. In some of these oak sticks as much as five pounds of sulphonal have been packed. By this new process hundreds of pounds of the drugs have been safely taken into Uncle Sam's territory and disposed of during the past month. Recently special agents from Boston seized a large quantity of the drugs at Vanceboro, Me.

SHIP-BUILDING IN CANADA.

The report of the Minister of Marine and Fisheries, just laid before Parliament, shows that the total number of wrecks in Canadian waters during the last fiscal year was 86, representing a loss of ten lives and \$322,225.

The value of the registered tonnage of Canada is \$26,088,720. Last year 326 vessels, having a tonnage of 21,243 tons, were built in Canada. There are now on the registry books of the Dominion 7,245 vessels, representing 869,462 tons. The shipping of Canada is thus larger in number than it has been for ten years, and smaller in tonnage.

WHO DEAL IN ASHES ?

H. Gilbert, Mansfield, Ont.—Please give me the addresses of some dealers in ashes in Toronto or Montreal, and much oblige.

[Reply: We know of no dealers in Toronto, but in Montreal H. Dobell & Co. and J. C. Sinton & Co. are about the only buyers. If any of our readers know of any others they will kindly let us hear from them.—THE EDITOR.]

THE SUGAR TARIFF.

Inquiry among sugar people on the street indicates a rather indifferent feeling in regard to recent imposition of an import duty by the Canadian Government. The principal comment is upon the sudden and unexpected announcement of change in tariff without previous notice, which afforded importers in the Dominion no opportunity to fortify themselves. The increase is ½c. per lb. on raws and refined. The effect as far as the United States refiners are concerned is to leave the lower grades of raws free from Canadian competition, as it is to their advantage to use only the highest testing sugars for refining.—N. Y. Journal of Commerce.

HAMILTON TRADE GOSSIP.

THE Dominion Vinegar Works, the new proprietors of the old vinegar firm of Doran Bros., Stuart street, have been making alterations in plant and machinery, since they came into possession a short time ago. "The old firm," said one of the partners, "had a good name and an extensive trade, but we shall naturally try to improve on what they have done." The new, like the old, firm will continue to manufacture both white wine and cider vinegars.

"Trade is improving," said one of the members of the Hamilton Biscuit and Confectionery Co., "although we have not done so bad all spring for that matter."

W. H. Gillard & Co. recently got in a shipment of canned carrots. They are said to be delicious, and I am rather surprised that some of our Canadian packers have not yet at least experimented with this vegetable. But it is not so much to canned carrots that I wish to refer, as to the precocity of a certain child, as exhibited in connection with them. The child in question is the four-year-old son of Mr. Beckett, the manager of W. H. Gillard & Co.'s sample room. The other day Mr. Beckett took home a can of these carrots for dinner. The carrots have a bright red look, and are small and somewhat like a heart in shape, and attracted the attention of the youngster.

"What are those red things, mamma?" he at last ventured.

"Carrots, my dear."

"Oh, I thought they were hearts."

"Hearts?"

"Yes, hearts that were broken after the ball."

Like father like son.

The sugar market here was advanced $\frac{1}{8}$ c. on Wednesday. Granulated is now selling at $4\frac{3}{8}$ to $4\frac{1}{2}$ c., and wholesalers vow they will not shade the inside figure. Yellows are quoted at from $3\frac{3}{8}$ c. up. Willett & Gray's Statistical says that according to Litch's estimates for the future there is a possibility of 1c. per lb. being added to the present price, and it does not think there are any circumstances that will warrant a reaction.

I had a talk with Mr. Steele, of Lucas, Steele & Bristol, a couple of days ago re-

garding the new tariff on sugar. "I am," he said, "positive that this change in the duty is really a popular one, and both wholesalers and retailers have found it quite easy to get the advance. The retailers tell me that they have had no kicking at all from their customers. You know, the changes that have been made in the past have given the refiners the big end of the stick, but in the last change the conditions are just the opposite, and I think that has something to do with it. For some little time past the refiners have been giving us a fair quality of sugar if they have not given us quite as good an assortment as requisite. During the last couple of weeks, however, there have been some complaints about the Montreal low grade sugars running very heavy and wet. Some of them go as high as 360 to 375 pounds. It would be a pity now that the hot weather is upon us to place such sugars on the market. It will only cause trouble to buyer and seller."

The tea trade has been quiet the past month, but it is beginning to revive again. Prices are quite firm on account of advices received from Hankow and Yokohama, announcing that the markets there had opened at higher prices than last year. In Japan and on the island of Formosa the labor market is poorly supplied.

A traveler of a Toronto house ran against a traveler of a Hamilton house the day before the Budget speech was delivered. Now, the Hamilton man's principles were known to hold a big stock of sugar, and the "Queen City" man knew it. "Say," he said, "your people are going to get it. Sugar is going to drop. There's no help for it." It is needless to say that the only "drop" was in the Toronto man's feelings. He probably also took a drop for his stomach's sake.

There is a fairly good movement in canned goods. "We have sold ten cases to one that we did last year," said one wholesaler to me. But I hear there is a good deal of cutting going on. The ordinary selling price is supposed to be from 85 to $87\frac{1}{2}$ c., but the range goes all the way from 80 to 90c. Salmon is in good demand at \$1.25 to \$1.35 for best sockeye. There has been quite a distribution of canned and potted meats, and higher prices are looked for.

There is some difference of opinion regarding the extent of damage done by frosts in this district. One gentleman told me that grapes, peaches, and early apples had suf-

fered badly. B. R. Nelles, the well-known fruit man of Grimsby, told a friend of mine that in his part of the country the grapes and everything else were all right. I hear that in the neighborhood of Simcoe much damage was done.

Syrups are scarce, while demand is good. Low grades are selling at 25c., medium at 30 to $32\frac{1}{2}$ c., and fine at 40c. per gallon.

Large quantities of off-stalk raisins have been sold here at from 80 to 85c. per box during the last few weeks, and now that the hot weather is setting in there is quite a demand for California raisins at from $5\frac{1}{4}$ to $5\frac{1}{2}$ c.

Starch is beginning to look up, and there is now a good demand for it.

"Since last fall," said a member of the firm of W. H. Gillard & Co., "we have handled one-tenth the total quantity of currants exported from Greece for Canada. I have obtained figures from three different sources, and if anyone doubts what we say, why we have money to back it."

"Baseball—Gillard's 'Pickles' vs. Dalley's 'Blackings,' May 18, at Ainslie Park. Opening game of the season. Dummy leaves Hamilton 2 10 p.m. sharp." This is the substance of a circular that is being distributed about the city, and explains itself. "Supposing they beat us," tremulously remarked a member of Gillard's team, as a circular was handed me. "Why, then the 'shine' will be taken out of us," facetiously remarked another.

James Turner & Co. report trade active in currants, prunes and Valencia raisins.

The F. F. Dalley Co. are putting a new stove polish, in paste form, on the market. It is in a deep box, to avoid the possibility of drying, and is named the "Gem." They report that their new pure fruit flavoring extract, in $2\frac{1}{2}$ -ounce round bottles, is meeting with enormous success.

The Toronto, Hamilton and Buffalo Railway will be opened some time next week. W. L. E.

Wm. Paterson & Son report extra heavy sales of their high-class soda biscuits of late.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, May 16, 1895.

GROCERIES.

SUGAR leads the van. There has been a further advance, but in spite of this the demand continues active, the feature of it being the enquiry for carload lots. Canned vegetables are meeting with a fair demand, but the feature in the canned goods line is the strength and increased movement in beef. Coffees are in much the same position as before, except it be that high grade kinds are getting scarcer. There are a good many teas moving, and the London, England market is cabled higher on Ceylon. Currants are in active demand. Other kinds of dried fruits are in moderate request only. Payments are fair, and although the unpleasant turn in the weather naturally tended to retard the movement of merchants, the bright trade prospects are not lost sight of. Consequently no complaining is heard.

CANNED GOODS.

Wholesalers are marking down their prices on corn and peas to correspond with the reductions made the other day by the Canners' Association. There has been no other change. There is a fairly good demand for canned vegetables, although there are not as many selling as the trade would appear to desire. The chief demand is for tomatoes and corn. For fruits there is just the usual demand. Meats are firm, and people seem at the moment to be stocking themselves up with them. Salmon continues to sell freely. We quote: Tomatoes, 85 to 90c. for choice; corn, 80 to 90c.; peas, 80 to 85c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries,

\$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.25 to \$1.35, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.50 to \$1.65; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

Green Rio coffees are getting scarce on the Toronto market, and there are no high grades to be had in the primary market. Demand here is moderate. We quote green in bags: Rio, 20½ to 22½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

Business is moderate at unchanged prices. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¼ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

The conditions are unchanged. We quote as follows: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

Further strength has been gathered by the sugar market during the week. Refiners' prices for granulated have been advanced another ½c. per lb, being now 4¾c. net cash laid down here, and their lowest yellows are 3¾ to 3 7/16c. There are hardly any yellows at the moment in refiners' hands. The demand is active in spite of the advance, there being a good many carload lots moving. We quote: Granulated, No. 1, 4¾ to 4½c.; do., No. 2, \$4.25 to \$4.30; yellows, 3½c. up; Demerara, dark, 3 to 3½c.; bright, 4c.

SYRUPS.

Another advance of ¼c. per lb. is announced by the Canadian refineries. Demand is just fair. We quote: Dark, 30c.; medium, 32 to 34c.; bright, 38 to 43c.; very bright, 48 to 53c.

MOLASSES.

Market is quiet and featureless. We quote: New Orleans, barrels, 30 to 32c.; half-barrels, 33½ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

A cable received on Tuesday from London announced another advance in the price of Ceylon tea. There was an advance of ½d. last week in low-grade Ceylons, which are scarce. Ceylon teas continue to attract the great part of the attention on the Toronto market. Japan teas are much about the same as before. Teas of this growth at about 16 to 17c. are exceedingly scarce, and, being a tea that is in good demand, holders are disposed to hold in the hope of getting better prices. Young Hysons are still scarce. Low grades are offering all the way from 4½ to 6d., but teas which sell at from 8 to 9d. are very scarce. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums,

MARKETS—Continued

and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUIT.

Currants are in active demand, everybody seemingly wanting them. Advices from Patras state that while the Russian demand has slackened, stocks there are not in an unsatisfactory condition, and that despite the fact that the growers are requiring money for cultivation of the forthcoming crop, the market remains very sensitive, and the slightest demand would cause an appreciation in values. We quote: Filatras, half-bbls., 4 to 4½c., barrels, 4¼c.; fine Filatras, half-bbls., 4¼c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 4½ to 5¼c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Valencia raisins continue in moderate demand at unchanged prices. We quote: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to 4½c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Prunes are still in active request. Lower qualities of "Sphinx" brand are slightly easier, 4¼c. being quoted for "U." There are a few Bosnia prunes in hogsheds on the market, at 3½ to 4c. per pound. We quote as follows: "Sphinx"—"U," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 6½ to 7¼c. per lb.; "Atlas," "D," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

Sultana raisins are in moderate demand, at from 5½c. per lb. up.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

Demand is fair for California dried fruits. We quote according to quality: Peaches, 10½ to 12½c.; apricots, 10½ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 10c.

BUTTER AND CHEESE.

During the warm weather of last week the receipts of large rolls were limited, but the sudden change in temperature has brought forward a better supply. But now that grass butter is coming in, the supply of large roll will cease, and merchants will begin putting their butter into tubs. The market is still crowded with a lot of old stuff, and large quantities of the most inferior kinds are being disposed of to the soap-makers for grease, as is stated in another column in this issue. Prices have a downward tendency. We quote: Summer dairy and store packed—Choice, 9 to 12c.; low grade baking butter, 5 to 6c.; fresh large rolls, 10 to 12c.; pound prints, 13 to 15c. Summer creamery, 8 to

12c. Winter creamery—Tubs, 17 to 18c.; pound prints, 18 to 19c.

Offerings of new cheese are large, with few buyers. Little or none has yet been taken for export purposes, and it is said that no remarkable offer would be refused by factorymen. August and September makes of Canadian cheese bring 10 to 10½c., and new Canadian cheese is quoted at 8½ to 9c. Small Stiltons bring 12 to 12½c.

GREEN FRUIT.

Trade on the whole is reported brighter. The sales at Montreal have brought better prices than were expected, and as a result lemons and oranges are very firm with a stiffening tendency. Bananas are firm, and pineapples are coming in freely, but holding their own. Dried fruit is getting scarce. Southern strawberries are cheapening. We quote: Messina lemons, 360's, \$3.25 to \$4.25; 300's, \$4.50 to \$5. Oranges—Messinas, half boxes, 80's, \$1.50 to \$1.75; 100's, \$1.75 to \$2.50; boxes, 160's, 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.50; Messina ovals, 80's, \$2; California seedlings, \$2.75 to \$3; Valencias, \$4.25 to \$4.50. Bananas, \$1.50 to \$2.75 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. California dried fruit—Apricots, 12½c.; peaches, 12½c.; cranberries, \$3.50 per box. Strawberries, 15 to 17c. a quart; cocoanuts, \$4.50 a sack; pineapples, 8 to 13c.; green string beans, \$2.50 to \$3 per bushel crate; Egyptian onions, \$2.25 per sack.

COUNTRY PRODUCE.

BEANS—Choice hand-picked still bring from \$1.50 to \$1.65 a bushel.

DRIED APPLES—Are quoted at 5 to 5½c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: 6½ to 7¼c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.25 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—Sugar and syrup are coming in freely, but the demand is falling off, and prices are a little lower in consequence. We quote: 7 to 7½c. per lb. for sugar; syrup, 60 to 65c. per wine gallon, and 75c. per imperial.

POTATOES—The bottom has for the present fallen out of the market, and some think there will be no revival before the arrival of new potatoes. This is doubtful reasoning, however, as six weeks must elapse before "news" are plentiful. Potatoes now bring only 50c. on the track, and from 55 to 60c. out of store.

EGGS—The demand for pickling purposes keeps eggs pretty firm at 10½ to 11c.

FISH AND OYSTERS.

Stocks are light, but lake fish are beginning to come in a little more freely and to become cheaper. Salt herring in barrels seem a little scarcer. Trade is generally improving. We quote: Skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; haddock, 5 to 6c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; pike, 4½ to 5c. per lb.; flitch cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 7c.; white fish, 7½c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Georgian Bay herring, \$2 per 100.

PROVISIONS AND DRESSED HOGS.

Since the advent of warm weather packers have ceased buying hogs, and any that come forward now are being taken by the butchers. Prices remain firm, with an upward tendency, as they likely will for some time to come. Dressed hogs bring \$6.25 to \$6.50 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8¼c. for small lots; breakfast bacon, 11c to 11½c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs. 11c.; small hams, 11 to 11½c.; pickled, 10 to 10½c.

LARD—Pure Canadian, tierces, 9c.; tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Continues advancing on the local market. We quote: White, 86½ to 87c.; red, 83 to 84c.; goose, 83 to 84c.

OATS—Advanced to 40c.

BARLEY—Firm, at the old price, 48c.

FLOUR—No changes are reported from last week, prices being maintained. We quote: Ontario straight roller, \$3.60 to \$3.75; Manitoba, \$4.10 to \$4.15; patents, \$4.30 to \$4.40.

BREAKFAST FOODS—Oatmeals remain firm in sympathy with oats, and rolled wheat has advanced in accord with the wheat market. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; corn meal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SALT.

Business is pretty good at unaltered prices. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

WRITE US—We are large dealers.

CLEMES BROS. - TORONTO**SEEDS.**

With trade in clovers and grasses now practically over, the market is quite lifeless, and there is no actual business to report. Prices unchanged and nominal. We quote: Red clover, \$6.15 to \$6.50; alsike, \$4.20 to \$6; timothy, \$2.90 to \$3.50 per bushel. The foregoing are jobbers' prices to the trade.

HIDES, SKINS, WOOL AND TALLOW**HIDES**—Are in good demand and bring better prices. We quote: Green hides, No. 1, 7c; No. 2, 6½c. Cured sell for 8c.**SHEEPSKINS**—Not so plentiful, at \$1 to \$1.10, an advance of 10c. over last week.**CALFSKINS**—Are in good supply and find a ready sale at prices quoted: 7c. for No. 1 and 5c. for No. 2.**TALLOW**—Continues dull, jobbers quoting 5 to 5½c., and selling at ½c. higher.**WOOL**—There is no Canadian fleece on the market, and it is expected that new wool will open at from 17 to 18c. There are no changes in pulled wools, supers being quoted at 19 to 21c., and extras at 21 to 22c.**PETROLEUM.**

Crude remains firm in the States and at Petrolea, and the markets for refined oils are steady. As most branches of trade are pretty well supplied, business is likely to be quiet for some time. Prices will remain quiet, it is thought. We quote, in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 17 to 18c.; carbon safety, 19 to 19½c.; Canadian water white, 19 to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

MARKET NOTES.

Hannah & Co. want to buy potatoes.

Ram Lal's tea is, as usual, on the main deck.

Clemes Bros. have a lot of pineapples in just now.

James Turner & Co. have a nice lot of "Albert" sardines.

Smith & Keighley report good sales of California dried fruits.

T. Kinnear & Co. are offering Demerara sugars at low figures.

Davidson & Hay are offering very good value in Austrian prunes in cases.

Clemes Bros. purchased \$11,000 worth of oranges and lemons at the Montreal sales.

A direct shipment of choice Darjeeling teas arrived this week for Davidson & Hay.

White & Co. are offering a fine line of lemons and oranges direct from the Montreal sales.

Whittemore's russet dressing for tan boots is offered by the Eby Blain Company. Boxes 2 doz.

W. H. Gillard & Co. have a consignment of New Orleans molasses which show splendid value.

Shipments of Crosse & Blackwell's pickles, vinegars, etc., are to hand this week with Davidson & Hay.

J. W. Lang & Co. have to hand shipments of "Sphinx" prunes, and Filiatra currants in half-barrels and half-cases.

Southwell's English marmalade, 1-lb. glass jars. The Eby, Blain Company have received a shipment of this brand.

W. H. Gillard & Co., of Hamilton, have again secured the wholesale agency of New York ginger ale and like summer beverages,

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

MARKETS—Continued

which they have successfully handled for the past two seasons. They refer the trade to their advertisement on another page.

Rutherford, Marshall & Co. now have the sole control of the "Maple Leaf" brand of creamery butter.

Advices from Japan to Lucas, Steele & Bristol say the market is higher than last season and labor is very scarce.

Exceptionally low prices are quoted by the Eby, Blain Company in domestic jams and jellies, all flavors, in 7-lb. pails.

Rutherford, Marshall & Co. are receiving a lot of fresh packed dairy butter, which they say is giving excellent satisfaction.

Graham, McLean & Co., agents for "Cream Cheese," report that that product is now being put on the market with new labels.

James Turner & Co. advise having received large consignments of choice goods, and they are in a position to sort up store-keepers for the spring trade.

Dawson & Co. are handling a lot of southern strawberries. Their purchases at the Montreal fruit sales were large and choice in lemons and oranges.

McWilliam & Everist report extra large arrivals of pineapples. They have lately received four cars of bananas, besides the shipments of their Montreal purchases.

Despite the severe frost which visited the Niagara Peninsula, greatly damaging the fruit, James Turner & Co. are offering their present stock of canned fruits at no advance.

Gallon apples, 3-lb. apples, and 2 and 3-lb. tomato catsup are being offered at very close figures by Lucas, Steele & Bristol. Get their figures before placing your order.

The \$5 assortment of imported fancy milled toilet soaps offered by the Eby, Blain Company is a very good line. Every cake can be retailed at 5c., with a very comfortable profit.

Having received a shipment of Messina lemons, H. P. Eckardt & Co. are prepared to offer special value in the following brands: Fine, Choice, Extra Choice, Fancy, Extra Fancy.

Intending purchasers would do well to get H. P. Eckardt & Co.'s prices on the following lines before buying: Off-stalk, Fine Off-stalk, Select, and Layer Valencia raisins.

The following brands of French plums in cases are for sale by Lucas, Steele & Bristol: Superior, Choice, and Extra Fine. The Superior are said to be equal to bottle goods, and sell at half the price.

The Eby, Blain Company are offering special prices in canned goods of all descriptions—corn, peas, tomatoes, pumpkins, squash, raspberries, gooseberries, pitted cherries, gallon apples, etc.

Mr. Fortier, of the Toronto Biscuit and Confectionery Co., has just returned from a trip north, and reports prospects for spring and summer trade very bright. Their sodas, he says, are leaders everywhere.

W. H. Gillard & Co. are having a great demand for Dixon's celebrated carburet of iron stove polish, for which they have the wholesale agency. It has been on the market for fifty years, which speaks well for its superior merits.

Enormous as is the extent and variety of their list of biscuits, Huntley & Palmers, the English biscuit manufacturers, are ever adding thereto. Among the latest additions

is what is known as "Dinner Biscuits." And appropriately are they named. They are oblong in shape, and about three-fourths of an inch long. "Dinner Biscuits" are pleasant, appetizing little things.

D. Gunn, Flavell & Co. are giving specially low prices on green rolls in pickle, and on shoulder hams. These are dried similarly to the Maple Leaf brand of hams and bacon. Merchants can write for quotations.

It would pay any large buyer of suspenders to write direct to the Dominion Suspenders Co., of Niagara Falls, for samples, stating the price they wish to pay. This is their season for clearing out all their spring patterns, to make room for their fall line, which they are now working upon.

D. W. Ross, general merchant, Parry Harbor, was in Toronto this week and reports trade in his town good, with prospects of a good summer. Having plenty of snow and a steady winter, a big business was done in their staple article, logs. They are looking forward to a good summer from the railroad, as the Parry Sound, Arnprior and Ottawa branch is being built through there now.

Following the well known R. R. advertisement the Toronto Biscuit and Confectionery Co. are making a household saying of the following:

We don't keep
The Toronto Biscuit and Confectionery Co.'s
Goods.
We sell them.
Their soda biscuits are the best on earth.

MONTREAL MARKETS

MONTREAL, May 16, 1895.

GROCERIES.

THE grocery market does not exhibit any notably new feature this week.

On the whole the volume of business since the first splurge after the opening of navigation has not been so large, but for all that a good steady trade is doing in all staple lines. An unsettled feeling in sugar is still a feature of the situation. Refiners here put up their price ½c. on Monday. Jobbers have not done so yet, but are expected to before the close of the week. In tea business rules on the quiet side, and the same can be said of spices and coffees. Dried fruits are featureless, and none of the jobbers here have yet entered into any contracts for new pack canned salmon. In green fruit the firm feeling in lemons is the leading feature.

SUGAR.

The sugar market is very unsettled, and at this writing it is possible that values may go higher before the close of the week. On Monday the refiners advanced their prices ½c. all round to ¼c. on granulated, and 3½ to 4c. on yellows. No change has yet been made in jobbers' prices, which remain at 4½c. for standard granulated, and 3¼ to 3½c. for yellows, as to grade. It is possible, however, that the Guild may advance prices before the end of the week. The volume of business doing owing to the unsettled feeling is very small.

SYRUPS.

There has been little change in the syrup market since our last report. Both refiners

and jobbers report business quiet, and we repeat our range of 1½ to 2¼c., as to grade.

MOLASSES.

Advices from the the Islands on molasses have been rather firmer in tone, but business on spot has been carried on at the old basis, and the demand at the moment is not very active. On goods to arrive jobbers are still accepting orders at 30½c. in car lots and 31½c. in smaller quantities, but for prompt shipment the range is steady at 31½c. in carloads, and 32½c. in less than carload lots.

RICE.

The mills report a rather better demand for rice at present, and a larger volume of trade is doing both from first as well as second hands. Prices from millers' hands are: Japan standard, \$4.25 to \$4.40; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.25 to \$5, and Carolina, \$6.50 to \$7.50.

SPICES.

There is a steady healthy demand for spices though the first splurge that followed the opening of navigation is over. We quote jobbing prices: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

The coffee market rules very quiet in a wholesale way, but the demand from jobbers' hands is of a steady character. In a regular way we quote green coffee in bags as follows: Maracaibo, 21½ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

The tea market has shown rather more life in a wholesale sense, quite a few good sized transactions being put through on behalf of country buyers in jobbing lots. No large business is spoken of. Japans have changed hands at 18½ to 20c, which were about the only stock moving. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUITS.

There is little change to note in dried fruit. Mediterranean stock is very quiet and values on old stock are somewhat lower here, as the jobbers are becoming desirous of working it off. Accordingly, we quote a range of 2 to 4c on off-stalk Valentias and 3½ to 5c on layers, as to grade.

There is little doing in California raisins, and prices are the same, 6½ to 6¾c. for 4 crown loose muscatels, and 5½c. for 3 crown ditto.

The currant market is quiet and unchanged. We quote: Filatras and Provincials, bbls. 3½c.; cases, 4 to 4½c.; Patras, 5 to 5½c. and Vostizzas, 7 to 7½c.

Prunes are quiet and rather easier on lower grades, at 4 to 4½c. for Bordeaux; 4¼ to 4¾c. for Bosnias, while Californias are unchanged at 8 to 9c.

Only a few figs are offering here at 10 to 12c.

Dates continue unchanged at 3½ to 4c. with little doing.

Dried and evaporated apples are quiet but steady at 6 to 6½c. and 7½ to 7¾c. respectively.

NUTS.

The nut market is featureless on the whole. The only change that we note is in

shelled Grenoble walnuts, which are 1c. lower than last week. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarra-gona, 11 to 13c.; Grenoble walnuts, 13 to 14c.; shelled ditto, 24 to 25c.; filberts, 7 to 8c.; and pecans, 9 to 11c.

CANNED GOODS.

The canned goods market continues much the same. The only change is somewhat easier values on corn and peas, but the decline does not induce any demand. In canned salmon there is still an entire absence of contracting to note. Cannery agents here state they are in a position to contract at \$4.40 to \$4.50 f.o.b. on the coast, but that buyers do not care to place orders at these figures from abroad. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.10 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 85 to 90c. per doz.; peas, 85 to 90c. per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, 90c. to \$1.10.

GREEN FRUIT.

APPLES—The apple market is quiet and steady, at a range of \$3 to \$5 per barrel.

ORANGES—The orange market rules fairly steady. Messinas sell at \$2.25 to \$4.50; ditto bloods, \$2.25 to \$5; and ditto ovals, \$2.25 to \$5, as to brand and size of package.

LEMONS—In consequence of the high figures realized at the sale last week, the tone of this market is very firm, and prices are 50c. to \$1 higher than they were last week, the range being \$3 to \$5, the outside being for very fancy stock.

BANANAS—There is a steady seasonable trade doing in these, but prices are rather easier, at \$1.25 to \$2.50 per bunch, as to quality.

PINEAPPLES—There is only a very limited supply here, and prices are firm at 7 to 25c., as to grade.

COUNTRY PRODUCE

EGGS—There has been no change in eggs, which rule quiet at 10 to 10½c.

MAPLE PRODUCTS—Are quiet and steady, at 6 to 7c. for maple sugar and 50 to 60c. per tin for syrup.

HOPS—Featureless at 5 to 8c., as to quality.

HONEY—There is no change in honey, which we quote at 7 to 9c. for extracted, and 10 to 12c. for comb stock.

ONIONS, DOMESTIC—Sales of onions are made regularly at \$1.90 per bbl. for red, and \$2.25 for yellow.

ONIONS, IMPORTED—Egyptian onions meet a steady trade, at 1¼ to 2c. per lb.

POTATOES—Sales of potatoes on the track are made freely at 65c. per bag by the carload. For jobbing lots buyers have to give an advance of 10c. per bag.

BEANS—Hand-picked beans are moving at \$1.50 to \$1.75, and lower grades \$1.25.

PROVISIONS.

There was no important change in the local provision market, business being quiet

THE DOVER VINEGAR WORKS
PORT DOVER, ONT.

MONTREAL MARKETS—Continued

at steady prices. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

The demand for flour from local and country buyers is fair, and the market rules moderately active and firm. We quote: Winter wheat, \$4.35 to \$4.50; spring wheat, patents, \$4.40; straight roller, \$4.10 to \$4.25; straight roller, bags, \$1.95 to \$2; extra, \$3.75; extra, bags, \$1.80 to \$1.85; Manitoba strong bakers', \$4.25.

In feed a good business is doing, the demand being fair at steady prices. We quote: Bran, \$16; shorts, \$19; mouillie, \$22 to \$23.

There is no important change in oatmeal, business being quiet at firm values. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

BUTTER AND CHEESE.

The cheese market continues dull and heavy in its tendency, and prices are as difficult to quote as ever. In fact, until the full grass make is offered there is hardly any possibility of fixing a price, as there is little desire on the part of British buyers to deal in the fodder make. At the wharf, Monday morning, some 1,400 boxes altogether were offered, received by boat and rail. The basis on which it changed hands, owing to the manner in which the transactions were put through, can only be surmised, but from 6½ to 6¾c. will no doubt cover the range except in the case of a few lots. The spot market in a nominal way can, therefore, be quoted at this range.

The butter market continues heavy and dull. Fine fresh creamery continues plentiful and is a free sale under a moderate demand at 16c. All other kinds of butter are neglected and nominal.

ASHES.

The ashes market has taken a rather sudden sway since our last report. Pots are meeting an improved demand for export and prices have stiffened 5c. all round, the range now being: First pots, \$4.10; second, \$3.75 to \$3.80. Pearls on the other hand have taken a regular slump, sales being made last week at \$3.65, and they are freely offered at this figure at this writing.

MONTREAL TRADE NOTES.

Rose & Laflamme note an active demand for Baiger's "Nonpareil" jellies.

Elme figs are almost all worked off this market. Hart & Tuckwell still have a few.

Strong bakers' flour was marked up to-day by local millers 10c. per bbl. to \$4.35 per bbl.

A. P. Tippet & Co. note a good, active demand from the trade for Lazenby's soup squares.

Sales of some round lots of Congou teas at 14c. are noted this week. The goods go to the west.

The next direct fruit sale will be held on May 20. The place in which it will be held has not been decided on yet.

A. P. Tippet & Co. have booked a large volume of orders for lime fruit juice cordial and other preparations this week.

Laporte, Martin & Co. call attention to the fact that molasses are firmer at the

Islands. They are still booking orders for future shipments on new stock at the old prices.

The sugar refiners, at a meeting held on Monday, advanced their prices ¼c. to 4¼c. on granulated and 3¾ to 4c. for yellows.

Private advices on Barbadoes molasses from the Islands state that the price had advanced 1 to 12c. first cost at the Islands.

The first direct cargo of new crop Barbadoes molasses is expected here by the first week in June. Two of the French wholesale houses control it.

Offers on new pack canned salmon are still indefinite. An agent said he was prepared to accept orders at \$4.40 f.o.b. on the coast, but buyers were not anxious.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., May 16, 1895.

BUSINESS has been good during the past week, and collections are more satisfactory. The weather has been very fine, but rather dry, and lumbermen are in some cases anxious about their logs. The most of them, however, are getting their output forward satisfactorily. Away from the coast it has been very hot for the season. In Fredericton, where a few weeks ago there was an ice jam in the river, it has been so hot people could not sleep, and Sussex and Moncton report midsummer heat. Sugar, flour and molasses continue to be interesting features in the market. Butter, cheese and smoked herrings are still the dull lines. In hops the market is very low. Some have been bought by the trade from Montreal houses at particularly low prices. These goods are, however, very slow sale.

OIL—The price remaining as last week and being very firm, the trade are finding business rather more active. The decline from the very high figures and the greater steadiness has created a degree of confidence. In lubricating oils, in which the demand is good, the prices show no change. We quote: Best American burning oil, 23c.; best Canadian, 21c.; second, 17c., no charge for barrels.

SALT—The market shows no change. Demand is quiet. The cargo reported landing was largely put in store. Ex store prices are: 50 to 55c.; fine factory filled, 95c. to \$1.10; 5-lb. bags, \$3 to \$3.25 per bbl.; 10-lb. bags, \$2.80 to \$3 per bbl.; 20-lb. wood boxes, 20c. each; 10-lb. boxes, 12c. each; cartons, \$2 per doz.; cheese salt, bbls. bulk, \$2.70.

CANNED GOODS—The demand is much better and fairly large quantities are moving. Jobbers are buyers, though no very large sales are reported. Prices are very firm. Stocks of canned salmon are light. New goods are expected to be higher than last season. We quote: Corn, 95c. to \$1; peas, 90 to 95c.; tomatoes, 95c. to \$1.05; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$2.80 to \$2.90; 1-lb. tins, \$1.60 to \$1.70; oysters, 2's, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; salmon, \$1.35 to \$1.40; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—Market continues quiet. Demand for loose muscatels, California, is

PUREST and BEST

The Windsor Salt Works have a process in use which guarantees PURITY, and from the time the brine leaves the wells till the PURE SALT reaches the packages, it is not handled except by machinery, which ensures CLEANLINESS.

That is the reason why

WINDSOR
DAIRY SALT

Is so highly recommended by such men as Prof. Jas. W. Robertson, Dominion Dairy Commissioner; Mark Sprague, Inspector of Creameries for the Ontario Creameries Association.

For Farm Dairy use it is put up in 50-lb. White Duck Sacks, and in Cotton Bags, 15 in a barrel; for Creameries in 200-lb. White Duck Sacks, and in Paper-lined Barrels, 280 lbs. net.

better. This fruit is low, prices being about $\frac{1}{2}$ c. below those of last fall. In cleaned currants in cartoons a better demand is also noticed. A good grade is being locally put up. It is a most satisfactory way to handle these goods. California evaporated, though cheaper than last year, are reported dull. Evaporated apples are easier. In dried demand is dull and prices are off. Holders are missing the good prices that were offered for export, and some are regretting not having sold. The stock, however, is light, but for some months demand will be the same. There is, however, a good fall demand here. In raisins some seedless California are being offered, but the quality is not extra. Some more Bermuda onions arrived by steamer this week. We quote: Cleaned currants, 7½c.; bulk, 6½c.; dried apples, 5¼ to 5¾c.; evaporated apples, 8 to 8½c.; Sultana raisins, 6 to 7c.; Valencia, 4 to 4¼c.; layers, 5 to 5¼c.; London layers, \$2.10 to \$2.25; loose muscatels, 5 to 5¼c.; currants, bbls., 3¾ to 4c.; half-cases, 4¼ to 4½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.; Bermuda onions, \$2.50 per crate; Egyptian, 2¼ to 2½c.

GREEN FRUIT—Apples are about out of the market. There is now, with other fruit so plentiful, but a light demand. In oranges prices keep low, the retailing price of good oranges being 15c. per dozen. Pineapples are cheaper and are of good quality. Bananas are arriving in large quantities. Strawberries have made their appearance, and rhubarb is now a staple. Blood oranges are easy in price, but the tone of oranges is firmer. We quote: Pineapples, 10 to 16c.; rhubarb, 4½c.; apples, hard fruit, \$3 to \$3.50; Messinas, \$3.50 to \$4; bloods, \$2.50 to \$2.75; Valencias, medium, \$4.75 to \$5; lemons, \$3 to \$4.50; bananas, \$1.75 to \$2.25.

DAIRY PRODUCE—New butter in tubs and rolls is now coming forward in quantities. The quantity of old yet in the market is large and keeps prices very low. Both creameries and cheese factories are now at work in this province. Large quantities of cheese will be made here this season, and unless some such way of placing it upon the market is used as that used by Canadian factories, there will be some trouble to get the best prices. There is yet a good deal of old cheese here, and with the new coming in at much lower prices than the old were

bought at, the old are hard to sell. And then new cheese is preferred. In eggs there is a fair demand, and prices are low. Quality at this season is good, and as the season advances buyers become more careful. Packers should take care and see that only good eggs are packed. Batter take a small price than hold the eggs and spoil the sale of all. Care should be taken to see that the fillers in the cases are clean. Fillers are cheap, and nothing spoils the sale of eggs more in warm weather than bad and dirty fillers. We quote: Old butter, dairy, 12 to 14c.; creamery, 16 to 17c.; new dairy, 15 to 17c.; rolls, 17 to 18c. Cheese, new, 9 to 9½c.; old, 9½ to 10. Eggs, 9 to 10c.

MOLASSES—Market is bare except for what arrived by the last steamer. Prices are firm though rather lower than the market warrants. Demand is very good. The importer of the cargo of 400 casks Barbadoes, before spoken of, has not only sold it, but all that he had by the steamer this week as well. Higher prices are looked for. Syrup is dull. We quote: New Barbadoes, 28 to 30c.; new Nevis, 28 to 29c.; Porto Rico, 30 to 34c.; syrup, 33 to 35c.; St. Croix, 27 to 28c.

The Approach of Summer

Always stimulates the demand for Condensed Milk. Every year sees more families using it. They commence its use in the hot weather, and appreciating its cleanliness, purity, and other advantages, continue to use it the year round. To help increase this sale you should sell and recommend the brand giving the most satisfaction. It is the

ST. JOHN MARKETS—Continued.

SUGAR—Jobbers here are not buyers to any extent. Stocks being large, prices are very firm, having advanced since last quotations. Quite large quantities are moving. It is reported that some who bought largely ahead at low prices are also sold ahead to some extent at the low prices. Some complaints have been made by jobbers, owing to the large grain of granulated which has been received lately. This market prefers the fine. Sales of sugar are not being pushed. We quote: Granulated, $4\frac{1}{4}$ to $4\frac{3}{4}$ c.; yellow, $3\frac{3}{8}$ to $3\frac{7}{8}$ c.; Paris lump, 5 to $5\frac{1}{2}$ c.; powdered, 5 to $5\frac{1}{2}$ c.

FISH—Demand in dried is fair. Receipts of all kinds are small. Pickled herring are dull, and in smoked the market is overstocked and the demand light. In fresh, a few shad are being taken. Gaspereaux are still a very light catch, so that few are being salted, the larger quantity being sold for bait. Halibut and lobsters are also light catches. A few salmon have been taken. Stocks of dry cod are light. We quote: halibut, 7 to $7\frac{1}{2}$ c.; gaspereaux, 50c.; smoked, \$1 per 100; lobsters, \$6 per 100; large cod, \$4; medium, \$3.80; small, \$3 to \$3.25; pollock, \$1.70; bay herring, \$1.40 to \$1.50 half-bbl.; Shelburne, No. 1, \$3.75 per bbl.; half-bbl., \$2.40 to \$2.50; shad, 15c.; smoked herring, $5\frac{1}{2}$ to 6c.; Digby chickens, 10c.

PROVISIONS—Sales during the past week have not been large. In prices where there is a change it is in favor of the buyer. Some Island pork has been offered here during the past week. We quote: Clear pork, \$19 to \$19.50; mess, \$16.50 to \$17; beef, \$13.75 to \$14.50; pure lard, $9\frac{3}{4}$ to 10c.; hams, 10 to 12c.; rolls, 9 to $9\frac{1}{2}$ c.; compound lard, $8\frac{1}{4}$ to 9c.

FLOUR, FEED AND SEED—In flour the market continues very firm, prices having advanced ten to fifteen cents during the past week. Manitobas are still very low as compared with Ontario. Some American wheat has been imported into Ontario and it is thought prices will be more steady. Owing to the high prices and large stocks already bought, but small quantities are now being bought by wholesale dealers. Feed shows no change, except that bran is rather lower. Oats are firmer, having advanced 2 to 3c. Demand is not large. Oatmeal is about 10 cents higher and fairly large quantities are moving. In cornmeal the price is also up another five cents with a fair demand. Hay continues very dull. In seed prices are firmer, with season largely over. We quote: Manitoba, \$4.80 to \$4.85; best Ontario, \$4.60 to \$4.65; medium, \$4.20 to \$4.35; oatmeal, \$4.35 to \$4.40; cornmeal, \$2.95 to \$3; middlings, \$24 to \$25 on track; bran, \$21.50 to \$22.50; handpicked beans, \$1.90; prime, \$1.75 to \$1.80; oats, local, on track, 44 to 45c.; Ontario, 45 to 46c.; hay, \$8.50 to \$9; pot barley, \$4.15 to \$4.20; round peas, \$3.75 to \$3.90; split, \$3.70 to \$3.90; American timothy seed, \$3.15 to \$3.30; Canadian, \$3.25 to \$3.40; red clover, $11\frac{1}{2}$ to 12c.; Alsike, $11\frac{1}{2}$ to 13c.

ST. JOHN MARKET NOTES.

Strawberries from American markets are now on hand.

Eggs retailed as low as three dozen for 25 cents during this week.

Large quantities of coal are going forward from Parrsboro to American ports.

The bank managers of our city are now making their rounds upon bicycles.

Mr. John Diamond, of Diamond & Onyx Philadelphia, blacking manufacturers, called

upon THE CANADIAN GROCER this week. He is an annual visitor to our city, he and his blacking being both popular.

Deposits in saving banks in New Brunswick for April, \$74,267. Withdrawals, \$83,146.

John Seely received a quantity of Bermuda onions by the last steamer, also a few tomatoes.

The law firm of McKeown, Barnhill & Chapman, has been dissolved. Each will look after his own business in the future.

C. & S. Goggin, of Elgin, Albert county, have made a settlement with their creditors at $33\frac{1}{3}$ per cent. cash, and $16\frac{2}{3}$ on time.

It is reported that one of our molasses importers is much disappointed. He thought he had a snap, but when the goods failed to pass the test, and he had to pay 7 cents per gallon duty instead of $1\frac{1}{2}$ cents, he changed his mind.

T. S. Simms & Co., the well-known broom and brush manufacturers of this city, have purchased the Sailors' Home building on St. James street, which they will fit up as a brush factory. It is a splendid building for this business.

The West India steamer arriving this week had some 900 packages molasses, there being about 800 of Barbadoes, 70 of St. Croix, 25 St. Kitts. There were also small quantities of cocoanuts, tamarinds and Bermuda onions, and a quantity of limes and lime juice for Boston.

St. John Customs' report for April show a better business than for this month last year. Total value '95—\$298,913, for '94—\$259,166. Duty collected, '95—\$72,635, for '94—\$61,890. Amount for free goods, '95—\$76,866, for '94—\$55,481. Exports, '95—\$271,201, for '94—\$197,259.

St. Stephen, the border city of the province, is a place of business, push and enterprise. C. W. Young, of the St. Croix Soap Co., has this season a fine steam yacht. He has also the finest residence on the St. Croix. Murchie Bros., grocers, are putting in a fine plate-glass front. The grocers and meat men in both Calais and St. Stephen, feeling that life should not be all work, are closing their stores at 6.30 o'clock on Tuesdays and Thursdays.

Northrup & Co. are offering their customers special low prices in smoked herring and boneless fish. For 25lb. boxes of the latter they report an increasing demand.

H. F. Sharp, retail grocer, has admitted as partner G. B. Huggard, and the firm name will be Sharp & Huggard.

BREADSTUFFS.

Stocks of wheat on passage total 44,240,000 bushels, as against 42,000,000 bushels a year ago. The amount of wheat in the United States and Canada, in sight, is 59,623,000 bushels, as against 63,488,000 a year ago. The "visible" decreased 2,573,000 bushels last week, as against 1,699,000 bushels in the same week last year.

PERSONAL MENTION.

Mr. Stuart, a merchant of Demerara, British Guiana, was married in Brantford, Ont., last week to Mrs. Isabella Stewart.

Much sympathy is felt for W. D. MacLaren, the manufacturer of "Cook's Friend" baking powder, who was seriously injured by a bicyclist who ran him down 2 week ago. He has many warm friends in business circles who wish him a speedy recovery.

A LAWYER'S BUNGLING.

IF fresh proof were wanted of the unwisdom of passing the national administration of affairs over to lawyers almost entirely, we have it in the purchase of rifles by Canada for the militia. The late Minister of Militia, Hon. J. C. Patterson, was — like the new Minister, Mr. Dickey — a lawyer. No doubt, in this business transaction he did the best he could, but, being a lawyer, and knowing little or nothing about the merits of the business affair entrusted to him, he made a complete botch of it. This is what Mr. Dickey, the new Minister, said at Ottawa, May 8, regarding the failure of the new Martini-Metford rifles to come up to expectations:

"The Dominion Government made an agreement with the Home Government to take a certain number of these rifles, and when they came out here it was found that the barrel was much heavier than had been anticipated by our authorities in making the purchase, but an examination of the correspondence which led to the contract satisfied me that the Home Government had been absolutely in good faith in the matter, that the rifle they supplied to us was exactly what they had contracted to deliver to us, and that the good faith of Canada required that it should carry out that purchase and take the rifles and pay for them. I felt that if any class in the country would resent anything like bad faith towards the military authorities of the Mother Country on the purchase of rifles, that class would be the riflemen of Canada. If we made a bad bargain, we should be men enough to stand by it and pay what that bargain would cost us."

No doubt we must pay the piper. Canada will not repudiate a just debt, especially one to the Mother Country. But it is hard that we should be out thousands of dollars in hard cash, simply because Mr. Patterson didn't know his business, or rather our business, for transacting which we paid him \$8,000 per year. This contrasts strongly with the successful management of business men in the Government, like Hon. Clarke Wallace and Hon. John Haggart. Mr. Patterson's bungling only accentuates what has been said in these columns about the necessity of having more men with commercial training and experience in our Governments. How long would we business men stave off bankruptcy if we continued to make wretchedly bad bargains like this wasteful purchase of useless rifles?

UNCHANGED ASSESSMENT.

The village of Rockland, Ont., furnishes an instance of unchanged assessment which some municipalities might find convenient. Rockland is near Ottawa, and contains the mills of W. C. Edwards, M.P., the lumber millionaire, who, with his employees, practically control the place. Sometimes the assessment will be unchanged for four or five years. This is not strictly in accordance with the assessment law, which provides for regular assessments, and once objection was raised to the validity of the voters' list on this account, but it is convenient and seems to do no injustice.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, May 16, 1895.

There is a general improvement in the tone of trade in most all lines. Collections are reported fair, and the volume of business is quite heavy.

FLOUR—In flour everything is booming. Almost every day marks an advance in prices. Goldie's "People's" was quoted on Monday at \$5.13. Some American flour is coming in bond for export to Newfoundland and the Labrador coast. Manitoba high grade patents are now pretty much on a level with Ontario patents, and ought to enter into general consumption, as they are relatively cheaper, and are as easily handled for family use as well as bakers. It looks doubtful to us if the \$5 limit can be sustained on flours for very long, as American wheat can be imported and the duty paid thereon.

OATS—Oats have again strengthened from the late reaction, and as a consequence oatmeal and rolled oatmeal are firmer. The demand for these, however, will slacken off some as the weather grows warmer.

MILLFEEDS—In consequence of the scarcity of wheat and the fact that a large number of the small mills in Canada are doing little or nothing, feeds, such as middlings and bran, keep firm and are scarce.

SUGAR—The most important feature in sugar is the deductions Mr. Licht makes in the sowings of the present year. He estimates a decrease of sowings in Germany of 10 per cent., Austria 14 per cent., France 5 per cent., and other countries 15 per cent., or an average decrease of 10 per cent. In consequence of this the sugar market is very strong, beet being quoted at 10s. 4½d. to 10s. 6d., f.o.b. A cable received by the Acadia Refinery to-day from Glasgow says sugar is very firm. Tuesday's refinery quotations were: Granulated, 4½c.; extra circle C, 3¾ to 3¾c.; standard C, 3½ to 3¾c.; yellow extra C, 3¼ to 3¾c. Locally the demand is small, while deliveries are large, in consequence, to parties having bought prior to the reimposition of the duty. The jobbers are now making their profits, and the refineries must work until stocks are somewhat cleared out.

PROVISIONS—A good trade is being done in provisions. The price of beef keeps advancing in sympathy with the English market. Canadian dressed beef is worth 8c. Native, sinking offal, is worth \$8.50 to \$9. The market was well supplied last week. There is enough on hand to meet all local requirements this week. Veal is in abundant supply, and sales are slow at 4c. Spring lambs are worth \$4 to \$5. Mutton is worth 10 to 11c., and dressed hogs, 7c.

POULTRY—Poultry is fairly scarce. Fowls are worth 65 to 75c. per pair, and turkeys 16 to 18c. per lb. No spring chickens are offering.

BUTTER—The butter market remains unchanged. Canadian, new, is offered at 14c., landed here, in 30 lb. tubs, and 60 lb. tubs are offered at 13½c. Native is offered at 16c. for choice, in small tubs.

ONIONS—Bermuda onions are worth \$1.50 per crate. Silver skins sell at 1½c., and reds at 1¾c.

CHEESE—There is a drop in cheese. Old is offering at 9½c.

EGGS—Eggs are selling at 10c. to jobbers.

PRODUCE—Potatoes are selling well at 45 to 50c.

GREEN FRUIT—The fruit market remains firm, with very little change in prices. Bananas are scarce and higher. Lemons are stiffer. Fresh cucumbers are selling at \$4 per box of 100.

FISHSTUFFS—There is very little sign of improvement in the fish trade. The volume of business still remains small. Old stocks are being constantly turned over and dried by holders to keep them from spoiling. A new feature in our export trade is the outlook for possible business to be done in Brazil. A shipment of about 4,000 packages leaves for there, via New York, this week. New alewives are selling at \$2.50—their full value—to-day. This price will not likely advance.

HALIFAX MARKET NOTES.

Two cargoes of sugar and molasses have arrived at Charlottetown from the West Indies.

E. Burnham, grocer, Digby, is making large improvements to his business premises.

George A. Pyke, wholesale grocer, has decided on the early closing movement. His premises will open at 7 a.m. and close at 5 p.m.

The preserving factory in what was formerly Scarfe's mill at Dartmouth, N.S., is now in operation. It is not a canning establishment, as stated in some papers, but the lobsters are simply boiled and then packed in crates, and are kept in a state of preservation by being placed in a cold storage room, where the temperature is kept at the freezing point. They are afterwards transferred to a similar place on board the steamers and conveyed to the old country in a perfectly fresh condition. Not only lobsters, but various kinds of fish, meats and fowls will be treated in the same manner.

FRUIT INDUSTRY.

Major Carpenter, M.P. for Wentworth, has, in an interview at Ottawa, announced his intention of recommending at a future meeting of the Agriculture and Colonization Committee, that the Government take hold of the fruit industry and give it a helping hand, as it has been doing in the case of the butter trade. "The fruit men," observed the Major, "especially those growing apples and grapes, think it would be a great advantage if fruit could be placed on the English market in the same way as butter has been during the past winter. When the ordinary shipper sends over fruit, it does not have the standing that it would if it went on the market under Government auspices. Our section is more interested in grapes and pears and the better varieties of fruit than in apples. The people in the northern peninsula grow grapes that they think could be successfully shipped to the British market. There are the better keeping varieties, for instance, such as the Niagaras and Concord, which are pretty thick-skinned, and are adapted for shipment. Our pears also, if picked a little on the green side and handled in the small package, ought to reach the English market in good shape. The members from fruit-growing districts to whom I have spoken all speak in the same way, and are of the

opinion that if the Government took hold of the shipments advantageous results would follow. I may say that when I left home the Niagara Fruit Growers' Association intended to move in the matter, and were on the point of sending out circulars to other associations to invite co-operation, the idea being contemplated of sending a deputation to the capital to urge the subject on the Government's attention."

A BAND CHALLENGE.

The band of the E. B. Eddy Co., of Hull, Que., has issued a challenge to any civilian non-professional band in Canada to a musical contest for \$500 and the title of "champions of Canada." The mentioned sum will be placed in the Jacques Cartier Bank, Hull, on receipt of the first intimation of the acceptance of the challenge by any band. The chief terms of the challenge are these:

The competition shall be held in Ottawa. No musician shall be allowed to play with any band who has not been a member thereof for at least three months previous to the date upon which this challenge is issued. A committee to be named by the hands interested shall fix the rules to govern this competition and appoint one or more judges. No entry for this competition shall be considered unless accompanied by an accepted cheque made to the order of the Jacques-Cartier Bank, Hull, for fifty dollars (\$50) as a deposit guarantee. This deposit shall be forfeited if the band on whose behalf it is made fails, within the proper time, to deposit the balance of the stake.

LOBSTER FISHERIES.

The Minister of Marine and Fisheries was asked on Tuesday by a deputation of members of Parliament from the Maritime Provinces to have the law amended so that the fee paid by lobster packers shall be more in proportion to the business they do. It was also proposed that more stringent measures be adopted to enforce the law. The same evening Mr. Costigan gave notice of a bill complying in part with the request of the deputation.

AID FOR CHEESE FACTORIES.

Nicholas Flood Davin will move in the Ottawa House of Commons that \$2,000 should be granted to aid in establishing creameries and cheese factories in the Northwest, and that the Government should at once take into consideration the propriety of giving a bonus on butter imported to the London markets, as is done by some of the Australian colonies, and also of raising the Customs duty from 4 to 6c. per lb. in order to enable the farmers of the Northwest Territories to compete with the Australian exporters in the British Columbia markets.

ANOTHER ADVANCE IN SUGAR.

At a meeting of the Sugar Committee of the Wholesale Grocers' Guild held at Montreal Wednesday the jobbers' price was advanced ½c. all round to meet the advance in the refiners' price of Monday.

Granulated now sells at 4¼c. and yellows at 3¾ to 4c.

Molasses was also spoken of, but no change was made. Cables from the Islands are excited, quoting prices 1c. higher. This means a rise of 2c. in eight days.

Wm. Paterson & Son can now give the trade conversation lozenges, with either French, German or English mottoes.

A DAINTY HANGER.

Wm. Boulter & Sons, canners, Toronto, Picton, and Demorestville, have gotten out a splendid advertising card in the shape of a beautiful hanger. It is a beautifully embossed affair, done with blue and purple and gold as the leading component colors. The card represents a series of Boulters' Lion brand of canned fruits and vegetables piled in the form of a pyramid. Peaches, pears, strawberries, apples, tomatoes, corn, peas, etc., are represented in all their natural colors and juicy lusciousness. One of these pretty "ads." is to be hung in every who'e-sale and retail grocery in the land, as well as in railway stations, steamboats, etc. In some cases it will be appropriately framed, and in others kept in shape by the simple device of a metal bar at top and bottom. The design is as unique as it is attractive, and Boulter & Sons are to be congratulated.

SMALL OLIVE OIL CROP.

The British Consul at Patras, Greece, reports that the olive oil crop of 1893 having been very abundant, was, as usual, followed by a small crop in 1894. Formerly large quantities of olive oil used to be exported from the Morea to all parts of the Levant; but of late years, owing to the increase of population, and to the ruthless cutting-down of olive groves to make way for currant vineyards, the produce of the Morea barely suffices for local consumption. One cargo, consisting of 110 tons of 1893 oil, costing £23 10s per ton, f.o.b., was shipped last year to Liverpool. This trade is increasing annually, but is confined almost entirely to shipments to the United States and the Levant. The large black olive, produced near Salona, in the groves under Parnassus, simply salted, is much esteemed in the east as a condiment, but there is no demand whatever for this article in the United Kingdom, where the taste runs on the French or Spanish green olive.

ORDINARY MILK MUST GO.

A STRIKING confirmation of what THE CANADIAN GROCER has been saying about the dangers of disease in ordinary milk is contained in the report of the Royal Commission on tuberculosis just made public in England. After careful investigation by the highest and most competent authorities this Commission reports that "an appreciable part of the tuberculosis that affects man is obtained through his food." This in itself is an important scientific verdict, and conclusively establishes the danger of catching consumption from food.

But what food? Here again the Commission pronounces definitely. Cows, it declares, are the animals most frequently afflicted by this disease. While the meat of cows so diseased may by cooking be rendered less injurious, it is made clear that the milk of these animals does the most mischief. We quote the very words of the report:

"There is no reason to believe that tuberculous matter, when present in meat sold to the public, is more commonly due to the contamination of the surface of the meat with material derived from other diseased parts, than to disease of the meat itself. The same matter is found in the milk of cows when the udder has become invaded by tuberculous disease, and seldom or never when the udder is not diseased. Tuberculous matter in milk is exceptionally active in its operation upon animals fed either with the milk or with dairy produce derived from it. No doubt the

largest part of the tuberculosis which man obtains through his food is by means of milk containing tuberculous matter.

This demonstrates that persons who drink ordinary milk do so at imminent risk to themselves, and the prevalence of consumption indicates that the risk carries with it fatal consequences in very many cases. In fact, ordinary cows' milk must go. That is the verdict of this Commission, because the report goes on:

"In regard to milk we are aware of the preference by English people for drinking cows' milk raw, a practice attended by danger, on account of possible contamination by pathogenic organisms."

No further argument is needed. The milk diet used by all classes of people cannot well be dispensed with. For young people especially it contains too valuable qualities to be abandoned, but it must first be properly treated. The condensed milk, which is now so much in demand, has been sterilized, and thus deprived of all disease germs; so that it behooves dealers, both for reasons of health and on commercial grounds, to lay the evidence collected by THE GROCER before the public, and see that raw milk is not used. Grocers, by recommending suitable articles of diet, can often do as much for the public health as chemists or doctors. In this case their duty is clear.

England imports \$5,000,000 worth of potatoes every year.

BEARDSLEY'S GOODS.

Attention is called to the advertisement of Lucas, Steele & Bristol, who are advertising the above make of seasonable delicacies. The shredded codfish has no offensive odor, the fibre and flavor are perfectly retained, and it can be got ready for the table in fifteen minutes. Their "Star" brand of boneless herring will keep in any climate, and is very carefully selected. The "Acme" brand of sliced smoked beef is from selected pieces of the choicest beef hams, and is always moist and uniform. This brand is cut into large slices, and is most delicious, economical and convenient for lunches, picnics, travelers, etc. Write Lucas, Steele & Bristol for figures. Their travelers are carrying samples of the goods.

SUSPENDER COMPANY.

The Dominion Suspender Co., of Niagara Falls, have established salesrooms at Elizabethport, South Africa, in charge of E. E. Carter, formerly of Simcoe, Ont.; and also on the English bracemakers' own ground—66 and 67 Milton street, London, E.C.—in charge of F. Edward Harrison. Mr. Harrison has charge of the West India trade, also, with headquarters at Kingston, Jamaica. They have obtained by keen competition, excellent and well-made goods, control of the home market, and in the near future their export trade will be considerable.

U. S. EXPORTS.

IMPORTS into the United States during March aggregated \$69,291,533, against \$66,031,689 the same month last year. The exports of domestic goods were \$63,617,390, against \$68,529,342 in March, 1894.

Among the items in the imports to show increases were animals, manufactures of cotton, earthen, stone and chinaware, glass and glassware, hides and skins, unmanufactured rubber and gutta-percha, manufactures of iron and steel, leather and manufactures of, rice, oils, seeds, manufactures of silk, tin in bars, blocks, etc.; wood and manufactures of, unmanufactured wools, manufactures of wools. A feature of the imports was a falling off in sugar, molasses and coffee of over \$12,500,000 worth, and an increase in manufactured and unmanufactured wools of \$5,304 756 worth.

In the exports, among the items showing decreases were animals, breadstuffs, oils, provisions, spirits, manufactures of copper. The items showing increase were agricultural implements, copper ore, iron and steel and manufactures of.

CUBAN SUGAR CROP.

Willett & Gray say: "The present Cuba crop shows no diminution of receipts beyond former anticipations, and the advance in prices will enable a considerable amount of

cane in the fields to be sold and ground into sugar, which would otherwise have remained over until the following crop. This will, we think, bring the present crop nearly or fully up to our estimates, but at the same time it will diminish somewhat the following crop."

NITRATE OF SODA.

The fortnight's arrivals of nitrate of soda for Europe reach about 70,000 tons, of which about 46,000 tons called for order. In the early part of the fortnight values collapsed in Hamburg to the equivalent of under 7s. 9d. on the spot, but the heavy deliveries during the first fortnight of April, and the moderate estimate of April shipments, reducing considerably the excess in visible supply, led to a steadier tone. About 12,000 tons of off coast steamer and sailing vessel cargoes are reported to have changed hands at 7s. 10½d. to 8s. 1d. per cwt. In due cargoes business at 7s. 10d. to 8s. per cwt., as in size and quality, has been reported, in March-May shipment at the equivalent of 7s. 10½d. to 8s., and in summer and autumn shipment at 8s. to 8s. 3d. per cwt. The close is steady, with rather more buyers in the distant positions. Cable quotations are: Cost 5s. 4d. to 5s. 7d. per quintal; Exchange, 16¼d., and freights firmer at about 23s. 9d. per ton, with about

35,000 tons register disengaged spot tonnage. The estimate of shipments in April is 47,000 tons to Europe, and 7,000 tons to the United States, with 50,000 and 5,000 tons respectively loading at end of April. The deliveries from European ports during the first fortnight of April reached about 84,000 tons in Continental and 15,000 in United Kingdom ports, against 50,000 and 15,000 tons for the same fortnight last year. Stocks on 15th instant were about 50,000 and 25,000 tons, against 45,000 tons last year. About 75,000 tons of arrivals direct and off-coast have since augmented supply, so that deliveries for second half of April may also exceed last year's, and to a large extent make up for the short deliveries in January and February. — British Trade Journal.

BET SUGAR INDUSTRY.

Michael Lefebvre & Co., of Montreal, proprietors of the beet sugar factory at Berthier, Que., are, through Mr. R. H. Lauder, of Whitby, Ont., distributing sugar beet seed, imported from Germany, at several points in Ontario for experimental purposes this season, with the view of establishing sugar factories in Ontario. A large quantity of the best seed has been received by Mr. F. H. Annes to be allotted to growers.

"Canadian Safety" Matches . . .

Attractively and safely put up in small sliding boxes to carry in the pocket. They light only on the box, and are fully equal in quality to the imported article.

In 5 gross cases.

"Safety" Matches

In patent boxes, which serve also as match safes, being made to hang on the wall; adapted specially to hotels. The hog who takes matches by the handful gets left here as "safetys" light only on the box.

In 1 gross cases.

"Favorite" Matches

Small parlor matches with blue heads, in compact sliding boxes; entirely safe from ignition by accident; a fit companion to a pipe and package of tobacco.

In 5 gross cases.

"Beaver" Matches

Parlor matches in a sliding box for house use; they are an improvement on the old parlor—ignite very readily and do not glow when flame is extinguished.

In 1 gross cases.

All our safety matches present the unique feature of immediately becoming cold and dead when the match is extinguished, thereby precluding all danger from fire by "droppings" or live embers.

The above brands of matches are all absolutely odorless, no sulphurous compound being used in their manufacture. We are sole makers of these kinds in Canada, and they are fully equal to any matches of foreign make.

Hull, Canada

TRADE CHAT.

CONSIDERABLE interest is being taken in the approaching Territorial Fair at Regina, and prospects are excellent for its success.

Arrangements are about completed for another cigar factory in Simcoe, which will employ a large number of hands.

Less than half a cent a pound is the cost of insurance, storage and freight on butter shipped from Montreal to Liverpool.

Mr. Neidray has removed his grocery establishment to Robinson street, Simcoe, in the store formerly occupied by the Singer Sewing Machine Company.

At the meeting of the Grand Trunk Board at London on the 10th inst., Sir Charles Rivers Wilson was unanimously elected president, and Joseph Price was made vice-president.

It was an Atchison colored girl who surprised the grocer by calling for twenty-five cents' worth of paralyzed sugar, three pounds of desecrated codfish and a can of condemned milk.

Mr. Armour, grocer, Myrtle, Ont., is under the doctor's care from the effect of being thrown from his carriage and badly hurt one day last week between that place and Port Perry.

The Inland Revenue Department has cancelled the licenses of Melfer Moses, cigar manufacturer of Galt, for having failed to render accounts and make returns as required by the Inland Revenue Act.

A paper devoted to the egg industry has just been started, and Edward Atkinson, who is upon the subject, contributes an article in which he estimates that there are 10,800,000,000 eggs laid in the United States annually, and that their value is about \$140,000,000.

John Gray, who for the last six years was head clerk with Robert Wanless, grocer, Sarnia, will leave shortly for Hamilton, where he has accepted a position in the wholesale store of Mr. John O. Carpenter. Mr. Gray was quite a favorite with all classes of citizens, and will be greatly missed.

The report comes from Deer River, the western terminus of the Duluth and Winnipeg, that the railroad company is preparing to build extensive sidetracks there. As there could be no other use for them, says a Duluth paper, it is believed to presage the early extension of the road, the new tracks being used for handling building materials.

Shortly before Ellis & Keighley, the Front street tea merchants, assigned to E. R. C. Clarkson, in December, 1893, they made an assignment of their book debts to J. F. Ellis and W. B. Newsome. The book debts amounted to \$2,500. Acting on behalf of the creditors W. R. Riddell, Q. C., is

seeking to-day, in the non-jury court, to set aside this assignment as a fraudulent preference.—Toronto Telegram.

TORONTO RETAILERS.

The regular monthly meeting of the Toronto Retail Grocers' Association was held on Monday evening, with Vice-President A. White in the chair in the absence, owing to illness, of President F. S. Roberts. There was a large attendance of members.

The following new members were admitted to the association: H. Britten, M. Scott, W. Bright, C. Whitelock, B. Parker and Brown Bros.

A. Hudgin and M. H. Young dropped out of the association.

The Excursion Committee reported progress in the arrangements for the annual outing, and promised to have all preparations made before the next monthly meeting.

On motion of H. B. Scott, seconded by A. Marmion, the Early-Closing Committee was authorized to meet the Ministerial Association, who desired a conference, and discuss the question with that body.

The bill recently passed by the Ontario Legislature, entitled "An Act for the Prevention of Fraud in the Sale of Fruit," was read and discussed.

On motion of D. W. Clark, seconded by J. S. Bond, it was decided to set aside a certain sum each month for stamps, stationery, etc., and on motion of D. W. Clark, seconded by F. W. Johnston, the sum was fixed at \$10.

Several cases of apparent violations by the wholesalers and manufacturers of the agreement existing between them and the retailers regarding direct sales to the consumers were noted, and the secretary was instructed to write the firms mentioned in remonstrance.

On motion of Mr. Western, seconded by D. Bell, it was decided to send the wholesale dealers a circular letter, asking them if they proposed to comply with the agreement to "sell to dealers only."

A discussion regarding Wednesday half-holidays resulted in nothing.

THE O. J. C. MEET.

As the spring days fly by, that event looked forward to for months by so many Canadians—the Ontario Jockey Club meet—approaches closer and closer. Already the stables and tracks at the Woodbine show signs of life, and horses and horsemen from all parts of the country are gradually concentrating towards Toronto. And while the men of our land devoted to the greatest of sports are preparing themselves for five days of solid enjoyment, the ladies are engaged in arranging elegant costumes, that they may appear in their fairest plumes when the beautiful, nervous candidates for the Queen's Plate draw up in line for the great annual struggle of the Canadian turf.

The O. J. C. meet, by bringing in great crowds of people to Toronto, always benefits all lines of city trade, while the trade of outside places is often affected for the better by the preparatory purchases of pilgrims to the grand stand which overlooks Ashbridge's bay. The meet opens on May 21, and the last event will be run on Saturday, May 25.

PRODUCE DEALER FAILS.

Grainger & Co., commission merchants, Church street, Toronto, have assigned to Henry Barber & Co., with liabilities totaling \$600, and assets amounting to \$10. The firm, which is composed of Sarah Grainger, with her brother Thos. W. Grainger as manager, was established about two years and a half ago, and for months past has been steadily approaching the end of its days, which has now come.

WANTS TO HANDLE BEANS AND PEAS.

E. T. Sturdee, mercantile broker, etc., of St. John, N.B., wishes to represent houses in beans, oatmeal, etc. Mr. Sturdee is agent for such firms as Reinach's Nephew & Co., London; Nelson, Morris & Co., Chicago; Blankenheym & Nolet, Rotterdam; Juan De L'ano, Valencia; The Canadian Packers' Association, etc.

THE NEW TEA CROP.

Developments in regard to new tea crops are becoming more interesting and important, says N. Y. Journal of Commerce. Hankow has been heard from this week, reporting an improvement in quality and an increase in cost of fifteen per cent. for Congous; the Japanese are getting their regular picking along, and securing a little more money than last year, but interest centres mainly upon Formosa. The settlements at Tamsui have considerably exceeded previous calculations and at rather easier rates than anticipated, but that is believed to be due to anxiety to get teas out of the island before its transfer to a new government, and causing depression under momentary haste to realize. Some of these teas have already been sent to a shipping harbor, presumably Amoy, and about the time this is printed a portion will start for the United States. It is, however, believed that when the Japanese take full possession of Formosa they will refuse to ship through Chinese ports, and, unless able to make a good harbor on the shores of the island, will send the teas to Nagasaki to load upon deep draught steamers. Fears are also entertained about ability to secure the entire crop in Formosa in consequence of indicated trouble with the ferocious "Black Flag" natives, who, it is believed, intend making a stubborn contest against submission to Japanese rule. It is

noticeable that none of the reports circulated have as yet served as a stimulant for speculative investment, and the great secrecy observed in regard to actual prices paid is commencing to create an impression that the late advices favor buyers.

FRUIT CULTURE IN MANITOBA.

The Horticultural Association met last evening in the city hall and enjoyed a talk by Mr. Franklin, an extensive fruit-grower from the Stonewall district, on his experiences in the cultivation of small fruits. Mr. Franklin has over 200 varieties of plums growing on his place, but his success in apple-culture has not been very encouraging. Gooseberries and other small fruits are very hardy and yield good crops. The paper was most instructive and interesting. Mr. McIntosh, of Kildonan, was in the chair, and fifteen market gardeners were present. The next regular meeting will be held on the first Monday in June.—Free Press, Winnipeg.

WHERE FIGS GROW.

Figs grow plentifully throughout Greece, but the species which is dried and exported is produced principally in Messenia. The crop of dried figs in the province amounted last year to over 9,000 tons. Opening prices were 9s. per cwt., f.o.b., in casks; they sub-

sequently declined to 6s., and now stand at 11s. 6d., f.o.b. The quality of the Messenian fig is very poor, and cannot compete in the English markets with the produce of Smyrna and Spain. Almost the entire crop is shipped to Trieste, where a small portion is sold for eating purposes, the remainder being roasted, ground into powder and sold as a substitute for coffee, under the name of "feigen kaffee" (fig coffee).—London Grocer.

A GOOD BUTTER PACKAGE.

Mr. A. L. Dent is introducing to the dairymen of Ontario Kneeland's Crystal Butter Package, which is manufactured solely by Whitney Bros. here. It is so good a thing that it is likely to find a large sale in private dairies and creameries. It is already used at the Bow Park farm, Brantford, and the Model Farm, Guelph, and the Kensington Farm, Toronto. The package is made in three sizes, 5, 10 and 25 pounds. It consists of a glass jar inside a galvanized iron casing conveniently made to be carried or shipped without the possibility of breakage. It seems to be a perfect butter package. As it supplies a long-felt want, it is not surprising that it finds a ready sale. Mr. Dent seems to have got a good thing in it, and he is just the man to introduce it successfully. We advise butter makers to see it.—Andrew Pattullo, president of the Western Dairymen's Association, in The Woodstock Sentinel-Review and Dominion Dairyman.

DOMINION COUNTER SCALE**With Patent Automatic
Scoop Balance**Simple in construction. Nothing complicated or
liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long,
11 in. wide.

Nickel-plated Beam, Poises and Scoop Balance. Double Beam, marked on both sides. The Automatic Scoop Balance is now offered for the first time, and every grocer who uses it will find it a great saving in time, and it will also obviate liability to error. When scoop is placed on the platform, the ball on back end of beam automatically rolls to the right, thus balancing scale with scoop on, and when scoop is taken off scale, the ball rolls to the left, balancing scale without scoop. Scale with this latest device is assuredly the most complete and desirable scale for general use in the market.

JOHN HILLOCK & CO.

Queen St. East, Toronto

SAVED THROUGH DISCOUNTS.

A writer in Grocery World inquired a day or two ago of a leading Philadelphia wholesale grocer as to the approximate amount which the average country retail grocer could save in the course of a year by embracing discounts which are made for cash. On a basis of one per cent., which represents the average discount on general lines, the wholesaler figured it up, and stated that the retailer who bought only \$10,000 worth of goods in the year, could save \$2 a week—fully enough to pay the wages of an errand boy.

The retail grocer who only buys \$10,000 of stock a year is not doing a very large business, to say the least, and the chances are that five out of ten grocers who read this are buying from half as much again to twice this figure. The man who buys \$15,000 worth, saves \$3 a week, and the \$20,000 man, \$4 a week. So that it comes down to the plain statement that every retail grocer who does business on the credit system is throwing away from \$2 to \$4 a week, which, in these days of close business, certainly amounts to quite an item.

The wholesale grocer who gave us this information related an instance in his own experience which illustrates splendidly the advantages in another direction of buying and selling for cash. When this wholesaler began business, he had a cash capital of about \$50,000. At the outset he resolved to do nothing but a strictly cash business, and by that method, discounting all bills, he did a business on sugar alone of \$300,000 in less than sixty days, making a clear profit in that time of \$12,000. This would have been absolutely impossible under a credit system. The retailer who pays \$50 cash for goods which he afterwards sells for \$75 cash, can replace the goods with \$50 thereof, expending the \$25 in another direction with the same results. The credit grocer has to find another \$50 to replace his goods, and possibly never gets the \$75 at all. Which would you rather do?

CREAMERY FOR CALGARY.

A Calgary dispatch says: "The creamery enterprise which for some time past seemed fated to fall to the ground has been restored to life again. McClelland and Smyth have bought out the interest of Messrs. Ratcliffe Bros., paying therefor the sum of \$1,300 and have accepted a loan from the city on the terms granted to Ratcliffe Bros. The buildings will now be pushed rapidly forward. Meanwhile the new proprietors are making arrangements with outside points for supplies of milk. They are in communication with Pine Creek, Red Deer Lake, Langdon, Spencevale, Springbank, Jumping Pond, Mitford and Ghost River and there seems no reason why in their hands the enterprise should not prove a success."

SEALED

... STICKY FLY PAPER ...

"Little" Tanglefoot

5¼ x 9 inches.

Particularly adapted
for Show Windows and
Fine Rooms. . . .

25 Double Sheets in a
box, 15 boxes in a case.

Retails for 30 cts. a box

Costs \$2.50 per case

PROFIT Eighty per cent.

WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, MAY 24, 1895

(\$2.00 per Year) No. 21

DROPS FROM THE EDITOR'S PEN.

This cold weather gives one the blues.

* * *

If Jack Frost cannot eat fruit he can kill it effectively.

* * *

Attention to business details brings ducats to the dealer.

* * *

An advertisement is like a kind word: Its influence is ever at work.

* * *

It is the bright advertisement that pays; the dull is about as profitable as a dead horse.

* * *

Usually men who know a "whole lot" about politics are dunces in business matters.

* * *

The cold snap is killing more than fruit blossoms: it is nipping budding spring poets.

* * *

Advertisements lasso more customers than most people ever dream of, much more conceive of.

* * *

Merchants who advertise in class trade journals are marksmen that hit the bullseye every time.

* * *

Men who live within their income may not become millionaires, but they seldom become mendicants.

* * *

It is asserted that John Bull does not know how to make coffee. He is a connoisseur at tea brewing, at any rate.

* * *

A contemporary discourses upon natural hot water. There are some people who naturally are always in hot water.

* * *

British imports from Canada during April were valued at £167,512, against £164,852 for the same month last year. For the four

months ending April last the imports were £551,702, compared with £494,757 the corresponding period last year. This is satisfactory to Canada.

* * *

A lawyer at the head of governmental departments where a business man ought to be is as a round peg in a square hole.

* * *

Merchants who can win the favor of children need not fear about winning the patronage of the parents. "Love me, love my dog."

* * *

He who acknowledges an error makes more friends by his confession than he did enemies by his mistake. A man is always respected.

* * *

With an individual in relatively the same financial plight as Newfoundland, there would be no question regarding the inevitable result.

* * *

Young clerks with small wages find it easy to get married, but discover it is hard to make both ends meet when house-keeping begins in earnest.

* * *

It must not be premised that the Frenchmen who propose to dig deep enough into the earth to find fire contemplate opening up a direct route to Hades.

* * *

The Fire Fiend appears to have transferred his headquarters from Toronto to Halifax. The "Queen City" is evidently too cold just now for his warm nature.

* * *

The increase of \$6,000 in the earnings of the C. P. R. for the second week in May, compared with the same period a year ago, is another evidence of the revival of trade in Canada.

* * *

The Grand Trunk's new broom would sweep much more effectively were it wielded in Canada instead of on the other side of the Atlantic. True reform in the affairs

of the Grand Trunk will begin when its headquarters are on the scene of operations.

* * *

Still thrusting and parrying over theories and fads are the champions of the respective parties instead of legislating upon matters of commercial value to the country.

* * *

John Butcher, grocer, Queen and Soho streets, Toronto, was swindled out of \$27.86 by a forged cheque a few days ago. It is to be hoped that the law will now forge chains for the forger.

* * *

Mr. Cutter is the name of a member of the Boston Retail Grocers' Association. Whether he is a "cutter" of prices we know not, but he cuts a figure in the movement for summer excursions.

* * *

An exchange talks about home-made oranges and lemons. We would not advise the trade to use the receipt. Manufacturing oranges and lemons had better be left to Nature.

* * *

The wish was evidently father to the thought when certain Toronto daily journals circulated the report that the "Queen City" was to be made the headquarters in Canada of the Grand Trunk railway system.

* * *

The merchant who did not reef his sails during the hard times squall and was overturned, is now kicking himself as he sees those skimming along under favorable breezes who did what he neglected to do.

* * *

Out of 3,352 mercantile steamers that passed through the Suez Canal last year, not one belonged to the United States. Behold how the mighty have fallen. Great Britain, of whose ships 2,394 passed through the canal, evidently is not in much danger of being dispossessed of the premiership of the sea by the United States—or any other nation, for that matter.

VALENCIA RAISIN CROP OF 1894-95

WILLIAM ROGERS & CO., packers of Valencia raisins, Denia, have issued their export list for 1894-95. In it they say:

The crop prospects of a very large production of Valentias at the outset of the season were distinctly favorable, but, owing to unseasonable weather which prevailed during the month of August, and the severe storm we experienced early in September, exactly at the time when a large portion of the crop lay in the drying grounds, caused considerable damage to be done and consequently the total yield only resulted in 32,600 tons.

Prices opened as usual at \$4, which price durated for a few days, as supplies from the early grounds were somewhat limited, subsequently they dropped to \$3 50, and shortly experienced a further decline to \$3, which price was maintained until the storm came, when they stiffened, \$4 being freely paid right up to the latter part of October for superior quality, of which there was a great scarcity. Meanwhile prices for good ordinary, gradually fell to \$2.50, and owing to the absence of an active demand \$2 was touched, and to-day the same raisin can be bought at 50c. less.

COLONIAL GOODS IN ENGLAND.

The Department of Trade and Commerce calls attention to two bills which the Imperial Parliament is being asked to enact. They would, if they became law, have an important bearing upon Canadian trade as well as all the foreign trade of Great Britain. One of the measures proposes that no foreign or colonial goods shall be imported into the United Kingdom which do not

bear a definite indication of the country in which such goods are made or produced. Every purchaser must, under the proposed law, be made aware that such goods have been imported and are not of home produce. The second measure contemplates the establishment of a system of inspection to ensure that the purchasing public shall not be deceived in the matter of imported meats. It proposes that the butcher who sells imported meats must have a conspicuous sign to that effect, and the meat must be labelled in large letters, "foreign meat." The framers of the measure evidently have the material interests of the British farmers in view, since they concede that the carcasses of animals that are fattened and killed in the United Kingdom may be classed as British meat. The proposed restrictions will not come into force until January 1, 1896. They are of an amazingly protectionist nature for a free trade country like Great Britain.

BALFOUR ON ADVERTISING.

At a dinner given by the London Newspaper Society last week, the Right Hon. A. J. Balfour made the following noteworthy assertion: "In my judgment, all the machinery used in communicating information to the public is not of really more importance to the community at large than the power of the people to communicate by advertisement and bring the buyer and the seller together and give them the machinery for communicating their wishes to one another."

The British people have been rather slower than the Americans and Canadians in seeing the advantage of the newspaper as an advertising medium. In the average British journal there is little attempt made to display the advertisements to make them catch the eye, and the announcements are made in the driest and most matter-of-fact manner. Nevertheless it has been discovered by the British merchant that the newspaper brings the buyer and seller together, and the advertising patronage of the better class of British journals is immense.

In Canada wonderful improvement has been made in advertising during the last few years. Merchants have learned how to write attractive, snappy advertisements that arrest the attention of the most careless turn-over of newspapers, and the result is that the newspaper is now looked upon by the up-to-date merchant as being a first necessity to his business. A few years ago the average advertisement stood all the year round, and read something like this:

"John Smith, dealer in dry goods, hardware, crockery, boots and shoes, ready-made clothing, hats and caps, glass, cutlery, lime, salt, nails, fish, pork and general groceries, begs to announce to his numerous customers in Hamilton and vicinity that he

has just opened a large and varied stock of new goods, which he proposes to sell cheap for cash or country produce. Give him a call before purchasing elsewhere."

Look at the bright, crisp, readable advertisements in this issue of The Spectator, and see the difference. And the difference between the advertisement of to-day and that of a few years ago is not all in the writing of it. Then the intelligent compositor set his advertisement according to a hard and fast set of rules which resulted in something that he considered to be "well balanced" and typographically perfect, but in which there was nothing striking to catch the eye. Now the compositor ignores all the old rules and seeks for effect. The result is that the advertisement is of much more value to the advertiser.—Hamilton Spectator.

PROVERBS FOR ADVERTISERS.

The tramp has an extensive circulation, but he is a poor advertising medium.

A good advertisement is like the merchant's ships—it bringeth abundance from afar.

He that payeth for advertisements with goods is a fool, for he raiseth up competition in his own market.

Every wise man advertiseth, but a fool speculateth on the Stock Exchange.

He that trusteth in a large circulation shall be wealthy, but he that believeth in cheap rates shall be busted.

The smallest circulation hath oft the loudest tongue.

A big advertiser leaveth an inheritance to his children's children's children.

A small advertisement is better than a bad traveler.

There is no worse robber than a journal that does not circulate.—Exchange.

Apprentice (to grocer)—"Master wants twenty-five cents' worth of ham sliced, and would you please wrap it in the continuation of the story as you sent him the first chapter of with the sausage yesterday."

MERCHANTS IN HALIFAX COUNCIL

The Toronto CANADIAN GROCER has a sensible editorial on the question of sending representative men to Parliament. It thinks there are too many lawyers and doctors and not enough business men at present in Parliament. That article caused me to look nearer home and I decided to dissect our own City Council, and see how it stood in that respect. First, there is Mayor McPherson; I am told that he is a ship builder by trade. Deputy Mayor Hamilton is a tailor. Ald. Outhit is a general fruit dealer. Ald. Mosher may be classed as a capitalist, Ald. Creighton is a general dealer. Ald. Eden and Redden are boot and shoe merchants. Ald. Foster is a tea merchant and gold mining speculator. Ald. McFartridge is an extensive junk dealer and real estate owner. Ald. Ryan is a provision dealer. Ald. O'Donnell is a mason by trade. Ald. Hubley is a general grocer. Ald. Mitchell is a general fruit and confectionery dealer. Ald. Lane is a hatter and furrier, and may, perhaps, be called the representative in the Council of the dry goods dealers. Ald. Butler and Musgrave are wholesale West India merchants. Ald. Geldert is the only lawyer in the Council. Ald. Dennis is a newspaper man and real estate owner, and Ald. Stewart is a wholesale and manufacturing jeweler. There we have the lot. How is that for a representative body? The

citizens of Halifax have evidently very little use for the professions.—Echo, Halifax.

AMALGAMATION OF TEA FIRMS.

Notice is to hand of the amalgamation of the three big English tea houses of Peek, Bros. & Co., and Francis Peek, Winch & Co., London, and Peek Bros. & Winch, of Liverpool. The three will be incorporated as Peek Bros. & Winch (Ltd), with a capital stock of £600,000. The three businesses thus to be united were founded as far back as 1810. The directors will be Francis Peek (chairman), Henry R. Ray, F. Saxham, E. Drury, Rowland Alston and Randall H. Pye. W. H. Halford, who has hitherto represented Francis Peek, Winch & Co, in Toronto, will continue as the representative of the new firm.

THE INTEREST OF A CLERK.

Every clerk, says a contemporary, who studies his own best interest should aim at all times to be improving himself, and not only able to do his present work in the right way, but prepare himself for future duties which may come to him. He not only should study to do what lies nearest to his hands, but be ever on the alert to gain information relating to the business with which he is connected. This information

will come in good play some time, and, besides, it will broaden his intellect and sharpen his ideas.

BENEFIT OF SMALL DEALERS.

The small store, with its single proprietor coming in close contact and sympathy with two or three employees, remains a natural factor in human and municipal life, writes Artemus Ward in American Grocer. Mutual failings are borne with; the employer seeks to instruct and elevate the employee, and the employee develops a condition of loyalty towards his employer by reason of the more direct contact. The shopkeeper cherishes his rights as a citizen regarding the street, the pavement, gas, sanitary rules, the police, protection against fire and robbery, and all the other privileges of citizenship. His power over his employees is not beyond reason, nor is his relation to the municipality exaggerated in its importance.

With the great owner of the department store the case is very different. Personal sympathy is largely out of the question; personal contact a very remote thing. He owns the policeman on the corner, and dictates terms to the firemen who approach his building. His relation to his employees is not a paternal one; it is that of an autocrat. His relation to the officials of the community is so commanding that they often sell or surrender their right to him.

UNBUSINESSLIKE LEGISLATION.

THE provision in the new tariff that all goods passed on the Friday previous to the time the Budget was brought down are subject to the new duties is hard to understand. It is in effect making the new tariff retroactive, for before they were submitted to the House the duties were, by this curious provision, actually in force.

If the authorities at Ottawa insist on enforcing this very unbusinesslike principle, they might just as logically enact that duties are to be collected on all goods passed a week or a month ahead of the date the Budget was submitted to the House.

The one is quite as unreasonable as the other. In the case in point it does a glaring injustice to several honest merchants in Montreal, and possibly in other places as well. On the morning of Friday, for instance, two well-known liquor firms passed valuable consignments of wines and gave delivery to their customers in entire ignorance of this ridiculous clause.

The goods were sold on the basis of the old duties, and now the Customs people step in and ask for the extra charges.

This means that the importers are so much out of pocket, as the goods, having been sold, are out of their control.

Other equally striking cases of injustice are cited. It is not surprising, therefore, that the Montreal Board of Trade passed strong resolutions protesting against the clause, and it is to be hoped that they will

have an influence in inducing the Government to remedy it.

Under the curious provisions of the new tariff, Controller Wallace had no option in the matter, his duty being simply to enforce the law.

The same cannot be said for the Minister who framed the bill, and it only emphasizes the fact that a department of such vital interest to the business world should be in the hands of a banker or business man conversant with all the aspects of the situation, and not a schoolmaster.

This is not intended as a reflection on Mr. Foster personally, for he is an able man and would make a very capable Minister of Education, but to impress upon the Government the necessity of filling such positions as this with men whose previous training fits them for it. There are men in the party who have had this training, and they should be given these Cabinet appointments.

As the Government stands to-day there are but three departmental heads filled by trained men. Mr. Wallace, Controller of Customs, is a successful general storekeeper; Mr. Haggart, Railways and Canals, is a large mill owner and extensive lumber man, who has shown his ability in his management of the Intercolonial, and Sir Hibbert Tupper, Minister of Justice, a very clever lawyer, whose only fault is that he knows it; but a few years' experience and a "turn down" or two, such as he has had recently, will not do him any harm. On a pinch, Mr. Ives, Minister of Trade and Commerce, might pass as an experienced business man; though a lawyer, he has been for many years a director in several companies, but he has yet to show that the department over which he has control has done any real service to the business interests of the country.

FLUCTUATION IN DRIED FRUIT.

The situation in European dried fruit has been a remarkably quiet one recently, and the value of import business that has been done is much smaller than the average. It is just possible that the easier tendency across the water may have something to do with this. Mail advices this week, for instance, note further easiness in currants, quoting them at 9s. 6d. cost and freight at shipping point. This is a decline of 2s. inside of four weeks, for on April 16 last Patras advices quoted currants at 1s. 6d. cost and freight. Another easy line is dates, which have declined 1s. 6d. recently. About a month ago they were 12s.; now they are offering at 10s. 6d. On the other hand, advices report that Sultana raisins are up 2s. on the European markets. This, however, is almost the only line which has recorded any advance abroad recently.

EXCITEMENT IN MOLASSES.

THE molasses market has furnished many surprises this spring, which THE CANADIAN GROCER has had occasion to refer to more than once. In fact, its frequent variations must have been oil and wine to speculators, providing there were any shrewd enough to take advantage of them.

When the season at "the Islands" first opened, advices to commission men here stated that there was a big shortage in the crop, which was reported at 26,000 to 30,000 puncheons, against 42,000 last year. This information was never contradicted, yet the market, after opening at Barbadoes at 11c., first cost, and advancing to 12c., fell back again to the opening figure, 11c.

It now transpires that the information was substantially correct, and the result of it has been unusual excitement at primary markets during the past ten days or so. As we noted last week, advices on Tuesday last stated that the first cost had advanced 2c., to 13c., and since that time it has jumped another 2c., to 15c., which was cabled to importers here on Friday afternoon last.

At present all quotations have been withdrawn altogether, for Montreal houses who tried to place orders on Monday and Tuesday of this week, could not do so, the agents not being able to quote a figure.

This excitement and fluctuation at primary points has had an unexpected effect on spot prices in Montreal.

In consequence of the lower offers which were being made at the time the new tariff was brought down, Montreal jobbers saw no necessity for advancing prices, but the radical advance on the first cost has made some change imperative, as the goods now on the way are not sufficient for the annual consumption.

The aggregate turnover of molasses in a season at Montreal may be approximated at about 15,000 puncheons, and only a little more than half this quantity has been contracted.

After the market at the Islands advanced to 12c. some 9,000 puncheons were settled on Montreal account. When it fell back to 12c. another 1,000 puncheons were settled, and 10,000 puncheons represents the sum total of what is now under contract to come forward to the metropolis. The Quebec importers also take around 7,000 to 9,000 annually, and they are also said to be short.

From 11c., as pointed out above, the market steadily advanced 1c. at a time to 15c., at which it was on Friday last, and now the planters are unwilling to sell at this price, but are offering Antigua molasses, an inferior grade, at prices equivalent to 29 to 30c., laid down in Montreal. This is no

doubt due to the shortage in prime Barbadoes mentioned above, and the total shipments from the Island, are not supposed to exceed 12,000 up to date. Where the remainder is, is a question: possibly in the hands of one or two strong holders.

As an evidence of the strong ideas of holders, it may be stated that an agent in Montreal was offered on Friday last \$25 per 100 wine gallons, cost and freight to Montreal, which is equivalent to 33½c. per imperial gallon laid down on the wharf, for a cargo of 1,000 puncheons, and the offer was declined.

In consequence of this condition of affairs the Molasses Committee of the Montreal Wholesale Grocers' Guild advanced their prices on the same day 3½c. per gallon both for prompt and future delivery, car lots now being quoted at 34c., and less than car lots 35c.

A CUSTOMS DIFFICULTY.

THERE have been some unpleasant complications between importers in Montreal and the Customs authorities as to whether goods passed or declared on the morning of May 3 are subject to the new duty or not.

It will be remembered that the Minister of Finance brought down the Budget at 3 o'clock on the afternoon of the 3rd. It now appears that the Department are enforcing the collection of duties on all goods, subject to the new tariff, which were passed at the Custom House in Montreal previous to 3 o'clock.

This is the keynote of the dispute, and in the aggregate the amount of money involved is considerable, for there was a regular rush of entries on Friday morning.

Raw sugar and liquor importers are among the people most heavily interested. The Canada Sugar Refinery, for instance, declared a whole cargo of raw sugar on Friday morning, and private importers also put through quite a lot. Three liquor firms also passed a large quantity of wines and spirits out of bond. The Customs officials have been instructed that all the goods are subject to the new duties, Controller Wallace, who visited Montreal on Saturday, the 11th, leaving explicit instructions to this effect.

As explained to THE CANADIAN GROCER by Deputy-Collector O'Hara, the Controller has no option in the matter.

The new tariff as submitted to the House had a special clause which ordered that "all goods passed on and after Friday, the 3rd of May, 1895," were subject to the new duties.

Mr. O'Hara, as early as Thursday, the 2nd, was notified by telegram from Ottawa to this effect, and early on Friday morning issued instructions to warn all importers

that goods passed on Friday were subject to the duty. Importers who passed goods on that day, therefore, were not in ignorance of the situation of affairs.

In the case of goods in bond the Customs people did not bother very much, as they had control of them, but where goods were released to an importer he was given clearly to understand the conditions on which he received them.

The Collector also explained, in the case of the raw sugar, that as a sugar refinery was under the bonding laws, being practically a bonded warehouse, the authorities had access to and control of all goods stored therein. No difficulty was made, therefore, about the release of the cargo of sugar on the wharf owned by the Canada Refinery.

LOWER POSTAGE WANTED.

The Boards of Trade are asking the Government to reduce the postage on city letters to 1c. The Montreal Board has sent forward a very strong letter on this subject.

The chances are that it will be shelved, as nearly all matters brought to the attention of the Government by Boards of Trade are.

Business men, as a rule, do not figure in a Government's calculations, and little attention is paid to their petitions, even when they take the Government by the throat to enforce their demands.

On the other hand, let a deputation of "walking delegates" from a trades union go to Ottawa and anything they ask is given them at once.

Private companies will deliver letters in any part of the leading cities at 50 to 80c. a hundred, and they make money at it. Business men ask the Government, which should do it very much cheaper, to make the rate \$1 per hundred, and they answer they would lose money.

If the present Postmaster-General cannot pay expenses with a rate 25 per cent higher than a private company makes money on we should get a man who can.

That is the way a business house would deal with an employe.

REMARKABLY PURE SUGAR.

Canadian sugar has a world-wide reputation for excellence, and it has been built up on a basis of from 96 to 98 per cent. of purity. An analysis made last month by John Baker Edwards, professor of chemistry and public analyst, Montreal, demonstrated, however, that there is at least one refinery in Canada that makes a sugar of a still higher percentage of purity. That refinery is the St. Lawrence, its granulated sugar, according to the analyst in question, containing from 99 to 100 per cent. of pure cane sugar. This is a remarkable showing.

A MENACE TO THE APPLE TRADE.

NATIONAL as well as individual shop-keeping must be conducted on business principles in order to success.

Canada, with her multiplicity of varied resources, must necessarily be an exporting country if she is ever to amount to anything among the nations.

Just then, therefore, as a storekeeper studies to please his customers, the Dominion should study to please her customers. Unfortunately, she does not always do this.

In some lines of products we sell to foreign countries we have a name above every other name; in at least one line we have lost the name we had. And unless we are careful we stand to lose our reputation in another line. We have reference to the export apple trade.

THE CANADIAN GROCER has been assured on good authority that "stuffing" has been practised during the past season to an alarming extent. To those who may not understand the term it will be necessary to explain that "stuffing" means a barrel of apples, with a few layers of choice fruit at either end and a centre filled up with inferior stock.

It is probable that when the barrels were "stuffed" that the people packing them did not know whether they would be consumed at home or abroad; and it is safe venturing that they did not care. Their conduct, however, is none the less reprehensible whichever way it was.

The only difference between the home and the foreign buyer of "stuffed" apples is that the former, knowing the superiority of Canadian grown apples swears at the packer but remains unshaken in his faith in the quality of the domestic article. With the foreigner it is different. He, on getting into the bowels of a barrel of "stuffed" apples, while he may associate the packer with the fraud, throws the onus chiefly on the shoulders of the country from which they came. "Well, if this is what you call Canadian apples I want no more of them," is, in effect, what he says.

If among apple packers there are men devoid of conscience, it is time the Government created a law that would provide a substitute in the shape of a severe penalty for fraudulent practices of the character cited. Men lacking in conscience should be regulated by a wholesome fear of the law.

Some scheme, it seems to us, could be devised whereby packing, with a view to defraud, could be traced back to the person guilty of the offence.

There is in this country an association of apple exporters, and it devolves upon them to move in the premises. They are practical men. Let them, therefore, draft some scheme or bill that will make it easier to trace up fraudulent packers, and that will mete out to them punishment so severe that once caught they will be twice shy.

WILL BE NO BOARD OF EXPERTS

IT IS not the intention of the Government to comply with the petitions of the various Boards of Trade to appoint a Dominion Board of Appraisers, but instead they will adopt a plan suggested in these columns some time ago.

The appraisers of the future will be experts if the business men in the Cabinet can carry out their programme.

At present appraisers are appointed, not because they have any special ability, but because they have rendered some service to the party. It is no wonder, therefore, that their decisions are sometimes peculiar.

It is now proposed that all these officials shall be experts in their various departments: When a vacancy occurs applicants will have to submit to a stiff examination, and only those who pass will be considered. Then the one having the most influence will get the appointment.

The Government would inspire still greater confidence if they would appoint the candidate passing the best examination. Previous business experience should also count.

We are not yet informed how the Department propose to conduct the examinations. It is to be hoped that they will follow the system used in the grain, flour, hides, and such trades. The examiners who test a candidate's knowledge in these departments are selected by the Boards of Trade from among the members of that particular trade. The result has been that in every case competent men have been found, and men, too, who enjoy the confidence of the trade.

It is not improbable that the present appraisers all over Canada will have to submit to this examination, and incompetent men thus weeded out.

These appraisers will form a Dominion Board, and when there is a difference of opinion on any point, the views of each appraiser will be obtained by correspondence, and an intelligent decision will be arrived at with practically no expense to the country. The plan proposed by some Boards of Trade would involve an expense of many thousands annually, and the work would not be as efficiently done.

A LIMITED OFFER OF SALMON.

A limited quantity—one or two cars—of new pack salmon was offered on the Toronto market this week. The figure asked was \$4.50 on the Coast, the same figure at which the holder is said to have sold in England.

The offer is the first made this season on the Toronto market, but as it was the only one made, and the quantity was small, offerings cannot be said to have practically opened yet.

Last year offerings were being regularly made two months earlier than this. The

opening figures then were \$4, but the bulk of the pack sold around \$3.60 to \$3.65 on the Coast, although sales were made at much lower prices before the season closed.

The condition of the English market is strong, with demand increasing, according to latest advices to hand; and it looks as if the canners are paying all their attention to that market just now.

Salmon imports into the United Kingdom during the past three years were as follows:

	Cases.
1892.....	547,000
1893.....	554,003
1894.....	647,190

SHOULD CONSULT BUSINESS MEN.

THE great majority of business men favor the union of Newfoundland with Canada. We reach this conclusion through numerous private expressions of opinion made to THE CANADIAN GROCER by leading business men, through letters to the daily papers, and published interviews.

The proper time to accomplish union is now. If the present opportunity is allowed to slip by, the Island's debt will grow larger with time, and when the next negotiation takes place—for union is inevitable some day—a bigger price will have to be paid.

The whole question is emphatically a business issue. The opinion of the commercial community should rule in the matter. Are they not infinitely better judges than the dozen lawyers who form the Ministry, and the dozen lawyers who lead the Opposition?

Steps should be taken to get at the real sentiment of the country. This is not an issue of party politics, and should be kept free from them.

Steps should be taken at once, by means of a popular vote, either in the form of a plebiscite or a referendum, to get at the popular wishes on this particular point. If Parliament rejects this mode of testing national opinion, a commission of business men to examine the position and resources of Newfoundland and report upon the wisdom of paying a larger sum as a commercial transaction, might be appointed. If a commission, so constituted as to carry weight with business men, were chosen, and it reported favorably, any Government could safely act, and justify itself before the country for adding \$15,000,000 to the public debt.

If, on sound commercial grounds, there is valid objection to union on a costlier basis than that involved in Canada's present offer we ought to know it definitely. No other obstacle than a business reason should be allowed to interpose.

It will be a lasting reproach to any Canadian Administration which lags behind pub-

lic opinion in so important a matter and is not fully fortified with proof that the business interests of Canada are unalterably opposed to union on a more expensive basis than ten millions.

WILL LIQUIDATE.

THE CANADIAN GROCER regrets to announce that Lightbound, Ralston & Co., wholesale grocers, Montreal, will go into liquidation. The firm has met with heavy losses through declines in prices and bad debts since 1890. It is one of the oldest in Canada, though the name has been changed as new partners came in.

Mr. Lightbound came into special prominence through his fight with the Dominion Wholesale Grocers' Guild on the sugar question. He conducted this in a fair and honorable way, and he made many warm friends among his most vigorous opponents. To-day there is probably no more popular man at the gatherings of the Guild. Great regret is expressed by the trade generally that he has found it necessary to close his business.

THE NEXT FRUIT SALE.

The ss. Dracona, carrying a direct cargo of about 15,000 boxes oranges and lemons, is due in Montreal about the end of the month. The consignment will be sold by auction, the date of which will be announced later.

Out of town buyers can arrange with some Montreal fruit commission house to buy for them.

ANOTHER ADVANCE IN COTTONS

The upward tendency in cotton prices was exhibited again this week, the trade being notified on Wednesday that one brand of grey cottons had gone up five per cent., and that pillow cottons had also advanced five per cent. The agents for all the mills have marked their goods at value, a sure indication of further changes at almost any moment.

WE WISH THEM WELL.

The marriage took place on Tuesday of this week of J. A. Laughran, the popular and energetic secretary of the Montreal Retail Grocers' Clerks' Association, to Miss Marie Gravel, St. Eustache. The ceremony was performed by Rev. Father Ouimet in the parish church in the bride's native town. The Mass was sung by the ladies of the parish. The church was filled by the many friends of the bride from the town, and there were many present from a distance. The bride looked very pretty, and those who know her well say she is as accomplished as she is charming. The happy couple left for a week's trip to Ottawa and other Ontario points. They will reside at 624 Sauginet Street.

THE CANADIAN GROCER extends its hearty congratulations.

PROBITAS : LABOR : JUSTITIA.

THIS is the motto of the Association of Grocers' Clerks of Montreal, which was organized in November, 1893, to promote the welfare of this important body of young men—many of them the merchant princes of the future.

The original aim of the society was to promote the early closing movement of retail stores in Montreal, and this is still the chief object the members have in view. They have worked energetically and intelligently since taking it up, and it now looks as if in a short time their efforts would be crowned with success.

A bill providing that all retail stores close at 8 o'clock every night, excepting Saturdays and holiday eves, is awaiting its third reading.

The grocers themselves are strongly supporting it, and so are the great majority of the citizens, but the opposition to it comes from the gas and electric light companies, who fear a reduction in their revenue.

It does seem hard that wealthy corporations such as these are, should, for the sake of the small profit derived from an hour or two of extra night work, stand in the way of hard-working merchants and their employes, and prevent them from enjoying the pleasures of society and home which even the poorest laborer has.

The society will also endeavor to put the

calling of its members on a higher plane, something after the system in Great Britain and France, where the average clerk has a much better knowledge of his business and is much more useful to his employer than his cousins in Canada and the States.

At present the Montreal society is doing the work of a benefit society. There is no entrance fee, but members pay a monthly fee of 30c., and when any one of them is ill he receives a weekly allowance of \$3. The members, however, are healthy, so far, they not having had a call on the benefit fund. At present an assessment of 25c. on each is made on the death of a member, and the total amount realized is paid to his wife and family. As the society grows this allowance will amount to quite a nice sum.

Next winter they hope to have a club-room open every night, where there will be a library stocked with the best books and papers. A course of lectures will be arranged on business subjects, all aiming to develop their abilities as assistants.

That they are taking up the matter in a thoroughly practical way is shown by the fact that they propose eventually to carry on a mercantile agency among themselves. A clerk is often blamed for giving credit to people who do not deserve it. Each clerk will report promptly a list of overdue accounts at the society's headquarters. With

this before them the members will make fewer debts.

The officers of the Association are :

President—J. B. Poirier.
 First Vice-President—J. P. Beauvais.
 Second Vice-President—O. Bergeron.
 Secretary—J. A. Laughran.
 Assistant Secretary—A. B. Desrochers.
 Corresponding Secretary—Paul Ethier.
 Treasurer—L. Abel.
 Assistant Treasurer—O. Legendre.
 Chief Marshall—G. H. Robert.
 Assistant Marshall—P. Labrecque.
 Committee—Albert Desrochers, M. Thivierge, J. Lareau.
 Chaplain—D. Bedard, P.S.S.
 Surgeon—F. X. Plouffe.

The Association gave an enjoyable and successful entertainment in the Monument National Theatre the other evening. The programme comprised the favorite play in five acts, "The Two Orphans" rendered in French. The chief roles were filled by Misses de Sombreuse and Daubrun, Mesdames Numa and Kleine, and Messrs. L. Labelle, V. Dubreuil, J. B. Tremblay, Jos. Charpentier and F. de Launay. Miss Wilshire, the noted soprano, sang several English solos, and an exhibition of fencing and sword exercise was given by a detachment of experts in uniform.

General Passenger Agent McNicoll denies the report from Chicago that a boycott had been inaugurated against the C.P.R. by the Trunk Lines Association.

TORONTO - - ONTARIO

NEW SEASON'S JAPAN TEAS.

A SMALL sample of new season's Japan tea was shown on the Toronto market on Saturday by W. H. Halford, representing C. P. Low & Co. This is so far the only sample shown. Mail despatches from Yokohama under date of April 26 say: "On the 23rd inst. a few piculs of new leaf were received, and up to to-day a total of 200 piculs have reached this market and have been purchased to go forward per ss. City of Peking, at an average price of \$46.50 per picul, as against an average of \$39.50 per picul for the first 200 piculs settled last season. We look for regular arrivals of new leaf about the first week in May. Settlements of new leaf at this time last year were 1,746 piculs, as against 55 piculs at the same date the previous year. The total settlements to date here and at Kobe during the past season were 371,000 piculs, as against 365,000 the previous year and 379,000 piculs in 1892."

New York advices to Warren Bros & Boomer report cable news under date of May 18 on Japan teas as follows: "The market is firm; choicest, 26c., c.i.f.; fine, 18¼c., c.i.f. Total settlements at the two ports from the opening of the season amount to 64,000 piculs, against 91,000 piculs for the same time last year. The outgoing steamer carried 6,600 packages of tea."

LATE BUSINESS CHANGES.

J. L. Mader, general store, Atwood, Ont., has sold out.—T. Carson, confectioner, Port Hope, Ont., is going out of business.—J. A. Forsyth, grocer, Teeswater, Ont., has sold out to Wm. Cammell.—The Duck Island Fishing Co., Windsor, Ont., is applying for a charter.—Norman Fraser has been registered proprietor of the Argyle Dairy Co., Montreal.—Gaumon & Co., general store, Ste. Anne de la Perade, Que., have made a voluntary assignment.—W. Delahay, general store, Balmoral, Man., has been succeeded by J. A. Frayne & Co.—J. Almoire, general store, New Denver, B.C., has assigned.—The British Columbia Grocery Co., New Westminster, B.C., have dissolved Minnie McKenzie retires.—McMillan & McLeod, grocers, Vancouver, B.C., have assigned.—Wm. Harlett, grocer, Victoria, B.C., will have his effects sold.

A FAT BERTH.

It is said that the grain inspector at Port Arthur, who is paid by fees, makes about

\$20,000 a year. Besides this, the talk in the trade is that he has about \$10,000 a year from other sources. All the grain he examines is Manitoban. Is not this a very heavy tax on our enterprising but struggling young province? The matter will probably be enquired about by Parliament, but the present inspector is understood to have a good friend at court.

OPENING CONGOU TEA MARKET.

Deacon & Co., Canton, to April 9th, report as follows: Macao Newmake Congou—The new season was opened about the 21st ultimo, but the supply has been even smaller than usual. Total purchases to date, for London, only amount to 2,100 boxes, at t/s. 13-20 per picul (equal 5½d. to 7½d. per lb.), as at these prices there is a large demand for native consumption and for the Ponchong trade. The quality shows a de-

A HOME RUN IN THE GILLARD-DALLEY BASEBALL MATCH.

cided improvement on last season's early shipments, both in liquor and appearance, and the crop generally may be described as a good average one. Prices are about on a level with last year's opening rates, but the more recent purchases show a slight advance, and the market closes firm. There is the usual demand for Australia, and some 600 half-chests have already gone forward, with a further quantity awaiting shipment. There is a great scarcity of common and medium teas; at the lower quotation—viz., t/s. 13—settlements do not amount to 300 boxes.

London consumes eleven tons of salt daily.

THE AVLONA'S FRUIT.

The sale of the cargo of fruit ex ss. Avlona took place Tuesday. The cargo was a small one, there being only about 13,000 boxes of fruit on her, consequently the attendance of American and western buyers was not as large as at the two previous sales. The bidding was brisk, but notwithstanding this fact, the prices realized were not so good as at the other sales. The fruit was in excellent condition. Choice to fancy Messina lemons sold at \$3.15 to \$3.70 per box, and common at \$2.10 to \$2.80. Oranges in half boxes sold at \$1.15 to \$2.05, and boxes at \$2.20 to \$3.35. The 1,700 boxes of Valencia oranges which were sold on Friday realized \$4.20 to \$6.90 per box. The principal out of town buyers were Mr. McWilliam, of Toronto; Mr. Shuttleworth, of London, Ont.; H. A. Brouse, of Ottawa; C. E. Plain, of Ottawa; the McPherson Fruit Co., of Winnipeg; Mr. Husband, of Toronto; Mr. Spear, of Boston; Mr. Emery, of Boston, and Mr. R. Barden, of Quebec. The principal Montreal buyers were Hart & Tuckwell, R. C. Barry, of John Barry & Son; J. J. Vipond, G. Vipond, of Vipond & McBride; O. & E. Hart, McBride, Harris & Co., J. R. Clogg & Co., Bowes & McWilliams, Montreal Fruit Exchange, L. Sylvestre, T. S. Vipond, W. Vipond, O. Laird, Jos. Grenier, Jos. Brown and W. Paul.

COLD STORAGE IN TRANSIT.

An announcement of much importance to the butter trade was made by Hon. Mr. Angers in the House of Commons on Tuesday. The Minister of Agriculture was interviewed by Mr. Beaubien, who holds the portfolio of Agriculture in the Quebec Government; Mr. Milton McDonald, M. P.P., and Mr. G. L. Tache, all of the Province of Quebec. They asked that arrangements be made for the cold storage of butter in transit. In reply Mr. Angers stated that the Government, through Prof. Robertson, had arranged that the Canadian Pacific Railway and the Grand Trunk Railway shall place refrigerator cars at the disposal of the butter trade, and that there shall be a fortnightly service by the Allan Line from Montreal in cold storage.

Mr. Clarke Wallace stated in the House on Monday, May 20, that collectors of Customs are not allowed to act as brokers in Custom houses except along the Northwestern borders, and there they are not allowed to charge for that service.

MARKETS AND MARKET NOTES

TORONTO MARKETS.

TORONTO, May 23, 1895.

GROCERIES.

COLD weather and a reaction in the activity of the sugar market have conduced to make the volume of business this week lighter. There is, however, still a fairly good trade doing, taking it all in all. The concern that is being felt regarding damage to the fruit crop naturally finds sympathy in the grocery trade. But then the fruit crop is not everything and the prospects otherwise are bright, so wholesalers are in anything but low spirits. Sugars, while not so active as a week ago, are still moving nicely, both in small quantities and in carload lots. In price sugar keeps steady. Teas are moving a little better in a sorting up way. The only staple which has really appreciated in price is currants, values being higher both in Greece and New York. The advance has not affected this market. An increasing and active demand is being experienced in Valencia raisins. Canned goods are in fair demand, but there is not the same confidence in prices that there was a short time ago. The demand for both rice and tapioca is improving. The tendency of payments is toward a more satisfactory condition.

CANNED GOODS.

There has been an active movement in some particular brands of canned vegetables during the week, one jobbing house selling 1,000 cases in two days in the city alone. Generally speaking, the movement is fair. The feeling regarding prices is somewhat unsettled, partly on account of another brand being forced upon the market. We hear of a limited quantity of new pack salmon being offered at \$4.50 on the Coast, but the quan-

tity was limited to a car or two. The holder is said to have sold in England at the price quoted. Wholesalers are experiencing an increasing demand for salmon at firm prices. We quote: Tomatoes, 85 to 90c. for choice; corn, 80 to 90c.; peas, 80 to 85c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.25 to \$1.35, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.50 to \$1.65; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

Demand continues much as before. Stocks here are light, and prices are steady and unchanged. We quote green in bags: Rio, 20 to 22c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

N. Y. Journal of Commerce, Tuesday: "For Brazils there is a continued uncertain market. Dependent lines of custom are showing ability to withstand temptation to invest except as immediate actual trade necessities may suggest, and demand in consequence is of broken, uncertain character and not sufficient in aggregate to make a satisfactory and fully testing business. In a desultory way some fair jobbing lots were placed, but no evidence of general animation developed."

RICE.

There is a nice movement to report. New Java rice arrived on the market this week. Tapioca is 2s. dearer, and there is a good

demand for it here. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Trade continues quiet and uninteresting. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The demand is scarcely as brisk as it was before the advance or as it was immediately afterwards, but there is still a fairly good movement nevertheless, both in carloads and small lots. The position, as far as prices are concerned, is unchanged. Low grade yellows are scarce, and it is said the Montreal refineries have none at the moment. We quote: Granulated, No. 1, 4¾ to 4½c.; do., No. 2, \$4.25 to \$4.30; yellows, 3½c. up; Demerara, dark, 3 to 3½c.; bright, 4c.

N. Y. Journal of Commerce, Tuesday: "Although not entirely free from evidences of slight irregularity, the general course of market for raw sugars appears to be in favor of sellers. No actual scarcity of sugar is apprehended during current season, but all original estimates of supply become modified with each successive instalment of advances from primal points, and the chances

MARKETS—Continued

for consumption continue generally promising."

Willet & Gray's Statistical says: "The European markets must be closely watched, as they direct ours. The European markets are improving, because there is thought to be visible a sensible diminution in the supplies of both cane and beet sugars during the next campaign. The sowings for the beet crop are virtually finished, and are not likely to be increased at all in consequence of the improved prices, as that would defeat the object of reduced sowings. Germany has sown 6 per cent. less and Austria 10 per cent. less, and the entire European beet crops should be $7\frac{1}{2}$ per cent. less than last year, even with as favorable weather. This reduction, in connection with a much smaller sugar crop in Cuba next season, is of sufficient importance to warrant the expectation of a very considerable advance of price during the coming twelve or eighteen months. The present Cuba crop shows no diminution of receipts beyond former anticipations, and the advance in price will enable a considerable amount of cane in the fields to be sold and ground into sugar, which would otherwise have remained over until the following crop. This will, we think, bring the present crop nearly or fully up to our estimates, but at the same time it will diminish somewhat the following crop."

SYRUPS.

It is understood that the Montreal refiners have nothing under 2c., and higher prices are consequently expected here as present supplies become depleted. There is not much demand, the season being about over. We quote: Dark, 30 to 32c.; medium, 33 to 35c.; bright, 40 to 42c.

MOLASSES.

Demand is light, and prices as before. We quote: New Orleans, barrels, 30 to 32c.; half-barrels, $33\frac{1}{2}$ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

There is a better enquiry than a week ago in a sorting-up way. Low grade and medium China blacks and Ceylons are having the chief call. There has also been a fair sorting-up demand for Japan teas at from ten to fifteen cents. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUIT.

Valencia raisins have been in active demand the past week at from 75c. per box up. We quote: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to $4\frac{1}{2}$ c.; selected, $5\frac{1}{2}$ to 6c.; layers, $5\frac{1}{2}$ to 6c.

Sultana raisins are quiet and without feature at 6 to $7\frac{1}{2}$ c.

Prunes are in better demand, the movement being quite brisk, principally at from 5 to $6\frac{1}{2}$ c. We quote: "Sphinx"—"U," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "C," 85 to 90 to half kilo, $6\frac{1}{2}$ c. per lb.; "B," 80 to 85 to half kilo, $6\frac{3}{4}$ to $7\frac{1}{4}$ c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "Unicorn," 5 to $5\frac{1}{2}$ c.; Bordeaux prunes, $4\frac{1}{2}$ to $6\frac{1}{2}$ c.

An upward movement has developed in the primary markets in currants, the cable on Monday announcing an advance to 8s. to 8s. 3d. As the result of this a speculative demand has sprung up in New York. The advances in Greece will not affect the Canadian market, as there will be no more direct shipments from there this season. Russia has been a fiercer buyer in Greece lately, and it is, no doubt, in part due to this that values have appreciated. The demand for currants on the Toronto market is light. We quote: Filatras half-bbls., 4 to $4\frac{1}{2}$ c., barrels, $4\frac{1}{4}$ c.; fine Filatras, half-bbls., $4\frac{3}{4}$ c., barrels, $4\frac{3}{8}$ c.; Patras, $5\frac{1}{2}$ c., in cases; Casalinas, $4\frac{1}{2}$ to $5\frac{3}{4}$ c.; Vostizzas, $6\frac{1}{2}$ to 7c. in cases and half-cases.

Dates are quiet and unchanged at from $4\frac{1}{2}$ c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; naturals, 6 to 7c.

Demand for California dried fruits has fallen off, the season being about over. We quote according to quality: Peaches, $10\frac{1}{2}$ to $12\frac{1}{2}$ c.; apricots, $10\frac{1}{2}$ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 10c.

BUTTER AND CHEESE.

The market for butter is being gradually cleaned up by the disposal at low prices of a lot of old stuff. Otherwise the situation is practically unchanged from last week. Considerable fresh creamery is coming forward and country merchants are putting dairy in tubs. Creamery is one cent lower than last week, although in fair demand. We quote: Summer dairy and store packed—Choice, 9 to 12c.; low grade baking butter, 5 to 6c.; fresh large rolls, 10 to 12c.; pound prints, 13 to 15c. Summer creamery, 8 to 12c. Fresh creamery—Tubs, 16 to 17c.; pound prints, 17 to 18c.

Buyers of new cheese still remain scarce, while the offerings are pretty free. Very little is being exported. August and September makes of Canadian cheese bring 10 to $10\frac{1}{2}$ c., and new Canadian cheese is quoted at 8 to $8\frac{1}{2}$ c. Small Stiltons bring 10 to 11c.

GREEN FRUIT.

The long-continued spell of cold weather has acted as a decided damper upon trade in green fruit, which three weeks ago was unusually brisk. The prospects that foreign fruits will be high this season are increased

by the fact that the sales of the Avlona's Mediterranean cargo at Montreal on Monday realized even better prices than the cargoes of the two previous boats. As soon as the weather becomes warm again, the prices of lemons will likely take another jump. Pineapples have advanced since the advent of the cold wave, and bananas are firm because they cannot be ripened fast enough to supply the demand. We quote: Messina lemons, 360's, \$3.75 to \$5; 300's, \$4.50 to \$5.25. Oranges—Messinas, half boxes, 80's, \$1.50 to \$2; 100's, \$1.75 to \$2.50; boxes, 160's, 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.75; Messina ovals, 80's, \$2; California seedlings, \$2.75 to \$3; Valencias, \$5 to \$6. Bananas, \$1.50 to \$2.75 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. California dried fruit—Apricots, $12\frac{1}{2}$ c.; peaches, $12\frac{1}{2}$ c.; cranberries, \$3.50 per box. Strawberries, 14 to 15c. a quart; cocoanuts, \$4.50 a sack; pineapples, 8 to 17c.; green string beans, \$2.50 to \$3 per bushel crate; Egyptian onions, \$2.25 per sack; cucumbers, \$3.25 to \$3.50 per crate; new cabbage, \$4.25 to \$4.50 a crate.

COUNTRY PRODUCE.

BEANS—Choice hand-picked still bring from \$1.50 to \$1.65 a bushel.

DRIED APPLES—Are quoted at 5 to $5\frac{1}{2}$ c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: $6\frac{1}{2}$ to 7c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.25 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—The season is about over, and the demand has fallen off also. Prices are unaltered. We quote: 7 to $7\frac{1}{2}$ c. per lb. for sugar; syrup, 60 to 65c. per wine gallon, and 75c. per imperial.

POTATOES—During the past week the market has been falling flatter and flatter, until now potatoes are being sold on the track at 45c. and out of store at 50 to 55c. One Toronto dealer, however, seems to expect a good advance shortly, and is buying what he can get.

EGGS—A good many are being pickled, and the price being paid is 10 to $10\frac{1}{2}$ a dozen.

FISH AND OYSTERS.

Trade is not much affected by the cold weather, although the low temperature rather facilitates transportation. No new lines of fresh are as yet remarked in the market. The supply for trout equals the demand, but more white fish are called for than can be supplied. We quote: Skinned and boned codfish, $6\frac{1}{2}$ c.; boneless fish, $3\frac{1}{2}$ to 4c.; haddock,

CLEMES BROS. - TORONTO

5 to 6c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; pike, 4½ to 5c. per lb.; flitched cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 6c.; white fish, 7c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Georgian Bay herring, \$2 per 100.

PROVISIONS AND DRESSED HOGS.

Packers are buying no more hogs, and hog products are firm. Dressed hogs bring \$6.25 to \$6.50 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8¼c. for small lots; breakfast bacon, 11c to 11½c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs. 11c.; small hams, 11 to 11½c.; pickled, 10 to 10½c.

LARD—Pure Canadian, tierces, 9c.; tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Continues advancing on the local market. We quote: White, 87 to 89c.; red, 87 to 89c.; goose, 83 to 84c.

OATS—Have shown a slight decline, nqw being quoted at 39c.

BARLEY—Has declined 1½c. since last quotations, and now sells on the street at 41½c.

FLOUR—Has taken another phenomenal jump in sympathy with the continued advances in wheat. The market is at present firm, but it is not apparent how long it will stay so. We quote: Ontario straight roller, \$4 to \$4.10; Manitoba, \$4.40 to \$4.50; patents, \$4.60 to \$4.75.

BREAKFAST FOODS—Oatmeals remain firm, as does also rolled wheat. We quote: Standard oatmeal, \$4.25; rolled oats, \$4.25; rolled wheat, \$2.20 in 100 lb. barrels; corn meal, \$3.40; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SALT.

Business is pretty fair. Prices are unaltered as yet, but an advance in rock is expected within a few days. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

SEEDS.

The season is practically over, and no trade is being done. The jobbers' prices quoted are merely nominal. We quote: Red clover, \$6.15 to \$6.50; alsike, \$4.20 to \$6; timothy, \$2.90 to \$3.50 per bushel

HIDES, SKINS, WOOL AND TALLOW

HIDES—Are scarce and in good demand. Prices for cured are purely nominal. We quote greens thus: No. 1, 8c.; No. 2, 7c.

SHEEPSKINS—Not so plentiful, at \$1 to \$1.25, an advance of 10c. over last week.

CALFSKINS—Are in good supply and find a ready sale at prices quoted: 7c. for No. 1 and 5c. for No. 2.

TALLOW—Continues dull, jobbers quoting 5 to 5½c., and selling at ½c. higher.

WOOL—There is no Canadian fleece on the market, and it is expected that new wool will open at from 17 to 18c. There are

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

no changes in pulled wools, supers being quoted at 19 to 21c., and extras at 21 to 22c.

PETROLEUM.

Oils seem to have steadied down after their activity of a while ago. No changes in the situation are reported this week. We quote, in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 17 to 18c.; carbon safety, 19 to 19½c.; Canadian water white, 19 to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

TORONTO MARKET NOTES.

Hannah & Co. want to buy potatoes.

Shipments of Congous and Ceylons are in this week for Davidson & Hay.

McWilliam & Everist report fresh arrivals of Tennessee strawberries.

Clemes Bros. bought two cars of oranges and lemons out of the Avlona's cargo.

Davidson & Hay are offering Keiller's marmalade in 1-lb. pots and 7-lb. tins.

Clemes Bros. report large arrivals of new cabbage and cucumbers from Baltimore.

Davidson & Hay are said to be offering California Muscatel raisins at a low figure.

A shipment of new Java rice, first this season, is in stock with Warren Bros. & Boomer.

Dawson & Co. are in receipt of large consignments of pineapples, strawberries and bananas.

Wm. Paterson & Sons write that travelers are showing a beautiful line of hand made chocolates.

H. P. Eckardt & Co. report large sales of prunes. "Our Bosnia, in barrels, is a sure seller," they say.

W. H. Gillard & Co. are offering a fine line of molasses in barrels and half-barrels at what are said to be low figures.

H. P. Eckardt & Co. are offering a line of pure jams in 1-lb., 2-lb. and 5-lb. tins, at what are said to be low figures.

D. Gunn, Flavelle & Co. say they are finding liberal sales for Wenger's creamery butter, which is giving good satisfaction.

John Sloan & Co. are in receipt of a shipment of codfish in quintals and half-quintals. "They are very desirable for summer trade."

Canned apples, in 3-lb. and gallon tins, are being offered by H. P. Eckardt & Co., and the trade is requested to write for prices.

D. Gunn, Flavelle & Co. claim to be offering special value in their sweet pickled green rolls, which they will quote on inquiry.

A shipment of tapioca, direct from Singapore, is to hand with John Sloan & Co. The purchase was made before the recent advance.

On Monday last W. H. Gillard & Co. received orders for 140 cases of New York

Ginger Ale alone, thus showing that this delicious summer drink is becoming popular with consumers.

Wm. Paterson & Son control the trade for the new confection called "Butter Creams." The line is a novelty, good seller, fine eater.

W. C. Bruton, of Napanee, writes that he has a carload of choice potatoes for shipment. Mr. Bruton says he would be at a loss without THE CANADIAN GROCER.

There is some talk of making a joint-stock company of the Berlin Brush Co., with \$50,000 to \$75,000 capital, to develop their new patent solid back brushes in Canada and the United States.

W. H. Gillard & Co. report a greatly increased demand for their standard line of black tea, "400 Select," which is particularly adapted to the alkaline waters of the Northwest and Manitoba.

The shipments for spring of Marshall's Scotch kippered and fresh herrings, bloaters, herrings in tomato sauce, etc., for Toronto, Hamilton and London, have been delivered. The standard of these goods is steadily maintained.

The new glassware articles, viz., pitchers, tumblers, sugar bowls and spoonholders, in which Adams & Sons Co. are at present packing their Tutti-Frutti and Pepsin Tutti-Frutti are handsome, and said to be splendid sellers.

Shipments of onions from Denia this season reached 130,000 crates, most of which came to the United States and Canada. The acreage planted this year is about the same as last. Orders for new crop are now being solicited by shippers in New York.

The Astorian says that while it is very early to attempt estimates of the total pack of Columbia River salmon from various local sources, it learns that the pack will probably be between 420,000 and 450,000, or a little less than last year.

It is reported that a syndicate has been formed in London for the purpose of controlling the canary seed market. The stock in Smyrna and Marseilles has been bought up, and a considerable advance in prices followed. All the cheap stock in New York, according to current reports, has been taken by speculative operators.

The advance in refined sugars has attracted attention of foreigners again, and during the week it is reported that some 900 tons have been shipped from the Continent to this country. It is believed to be sugar bought by shippers before the late rise and sold direct to custom in the interior, with a portion only coming here for forwarding, and balance to pass through other ports.—N. Y. Journal of Commerce.

T. B. Escott & Co., London, write: "Demand for 'Grand Mogul' tea is steadily increasing. Many Americans who have

tasted this tea send to Canada for their supplies. We have bought very heavily of Japan teas this season. 'White Bear' and 'Golden Star' will be our distinctive brands."

Combination cake cutters and dredge tin, with Lion Baking Powder, is said to be having a wide sale. This tin, with ¼-lb. powder, retails for 10c. Two cake-cutters and a salt or pepper sifter are included.

MONTREAL MARKETS.

MONTREAL, May 23, 1895.

GROCERIES.

THE volume of business in general groceries has not shown much expansion during the week, but a fair degree of activity is noticeable in all the staple lines in a jobbing way. The general tendency of values is firm, and noticeably so on some lines. The sharp advance that has taken place in molasses is the most striking fact in this connection. In consequence of the firmness at the Islands, where prices have jumped over 4c. inside of a week, local jobbers have advanced prices 3½c. Sugars act firm, the advance that was noted last week being well maintained. The jobbers are evidently still working on goods ordered previous to the advance in the duty, for there is still no difference in the price asked by them and that at which the refiners are selling. In tea there is not much change on spot, but the tenor of advices from primary markets on new is very firm. Advices from Yokohama state that the settlements since the opening of the season are 19,000 piculs less than they were in the previous year. Coffee generally are very firmly held, though demand is not active in a wholesale sense. Dried fruits are only in moderate request, but there is a firm feeling on currants. Canned goods are much the same. There have been more enquiries in regard to new pack canned salmon, but the news from the coast is as indefinite as ever. None of the leading canners are quoting any prices yet, except such figures as prohibit any business. Green fruit continues much the same, though the prices realized at the sale held on Monday last were not quite so good as those on the Fremona. The difference was not sufficiently great, however, to have any appreciable effect on local jobbing prices, especially as the quantity of fruit offered was not large.

SUGAR.

There has been no further change in the sugar market. As noted last week, jobbing prices here were put up in consequence of an advance at the refineries, and are ½c. higher. The trade here, however, are evidently satisfied with a moderate margin, for they are selling at identically the same figures as the refiners. The volume of business is not large, as stocks in the country are not depleted yet. The preserving season is close at hand, though, and should bring along a more active demand with it. We quote: Granulated, 4¼c. for standard, 4½c. for No. 2, and 3½ to 4c. for yellows, as to grade.

SYRUPS.

The market for syrups has also been quiet, but firm. A moderate demand is experienced on the basis of 1¼ to 2¼c. per lb., as to quality.

THE BEST IN THE MARKET.

Ask your wholesale grocer for it.

THE FOAM YEAST CO., LTD. -- TORONTO.
79 Esplanade.

MOLASSES.

The molasses market in a wholesale sense has been an active and excited one, in consequence of the radical advance in prices at the Islands. On Thursday last, a buyer offered as high as 33 1/2c. ex wharf, Montreal, for a lot of 1,000 puncheons, and was refused, the agents offering Antigua at 31c. in its place. The account of this change at the Islands, and its effect, are fully treated elsewhere. In the meantime it has created more demand on spot, and an advance of 3 1/2c. in jobbers' prices, as the latter are now asking 34c. for carload lots and 35c. for less than car lots, both for prompt and future delivery.

RICE.

There has been a fairly active demand at the mills for rice during the week, and the jobbing trade, though not extensive, is of fairly large volume. We quote jobbing prices: Japan \$4.25; crystal Japan, \$4.65 to \$4.75; standard B, \$3.45; English style, \$3.30; Patna, \$4.37 1/2 to \$5; and Carolina, \$7.50 to \$8.50.

SPICES.

There has been no change in spices, the market ruling steady. Demand is of a limited kind, but fully up to the average for the season of the year. We quote jobbing prices: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

The demand for coffee has not been active—at least in a wholesale sense—but prices generally are firm. Maracaibo continues to be the most active line for business in straight invoice lots. In a regular way we quote green coffee in bags as follows: Maracaibo, 21 1/2 to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

The week has been a quiet one on spot in teas, the volume of business doing being very moderate. Some enquiry has been noted from the country for small lots within the past few days, and also from local buyers for package lots of Japans at 16 to 17c. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18 1/2 to 24c.; and choice, 25 to 31c.

DRIED FRUITS.

There has been little change in the dried fruit market. Some enquiry has been experienced for Valencias, but it has been of a very moderate character, despite the fact that there has been a disposition to shade prices a trifle recently. We quote Valencia off-stalk 2 to 5c. as to grade, and layers 4 to 5 1/2c. as to grade.

The scarcity of Sultana raisins on this market has been again demonstrated. As noted in this column over a month ago only one house has any stock, and what they have they want for their own trade, for they refused to sell this week to other houses. They are asking 6c. for what stock they have got.

The demand for California fruit is moderate and prices are steady at 6 1/2 to 6 3/4c.

MONTREAL MARKETS—Continued

for 4-crown loose muscatels, and 5½c. for 3-crown ditto.

There has been rather more enquiry for currants during the week, and values rule firm. We quote: Filiatras and Provincials, bbls. 3½c.; cases, 4 to 4½c.; Patras, 5 to 5½c. and Vostizzas, 7 to 7½c.

There is no change in prunes this week, and business is quiet. We quote: 4 to 4½c. for Bordeaux; 4¼ to 4¾c. for Bosnias, while Californias are unchanged at 8 to 9c.

Figs are almost out of the market. The few here are held for 12 to 15c.

Dates continue quiet and unchanged at 3½ to 4c.

The advance of the season is leading to a desire to realize on evaporated apples, and prices have eased up in consequence to 6½ to 7½c. Dried apples rule about steady at 6 to 6½c.

NUTS.

There is only a very moderate demand for nuts. The only changes to note have been in Grenob'e walnuts, which are 1c. lower; also pecans and filberts. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 12 to 13c.; shelled ditto, 24 to 25c.; filberts, 6½ to 7½c.; and pecans, 8 to 10c.

CANNED GOODS.

There has been a fair demand for canned goods of all kinds during the week. Country buyers have taken quite a few small lots of vegetables and fruit, while on spot several fair-sized lots of corn, peas, tomatoes and apples have changed hands. Nothing definite is yet to report in connection with the catch of B.C. salmon. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.20 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.25 per doz.; corn, 85 to 90c. per doz.; peas, 85 to 90c. per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, \$1 to \$1.10.

GREEN FRUIT.

APPLES—The apple market is quiet and steady at \$3 to \$5 per barrel.

ORANGES—There has been a fair trade doing in oranges, and prices are steady. We quote: Messinas, \$2.25 to \$4.50; ditto bloods, \$2.25 to \$5; and ditto ovals, \$2.25 to \$5, as to brand and size of package.

LEMONS—There has been no change in this market. A good jobbing trade is doing and prices are steady at \$3.50 to \$4.50 per box.

BANANAS—A good jobbing trade is doing in bananas at last week's range of \$1.25 to \$2.50 per bunch, as to quality.

PINEAPPLES—There is only a small supply offering and they are firmly held at 7 to 25c. as to grade.

COUNTRY PRODUCE

EGGS—The egg market moves along quietly without any change from a week ago at 10 to 10½c. Values have been steady at this range for over a week past, to the surprise of the trade. The cold weather, no doubt, is the secret of this steadiness.

MAPLE PRODUCTS—Continue quiet and steady under a moderate jobbing call at 6 to 7c. for sugar per lb. and 50 to 60c. per tin for syrup.

HOPS—There is no change in hops, which rule nominal at 5 to 8c.

HONEY—The stock of comb honey here is worked down pretty low and is held firm at 12c. Extracted sells at 7 to 9c.

BEANS—Good hand-picked beans are firmly held at \$1.60 to \$1.75, and lower grades \$1.25 to \$1.50.

ONIONS, DOMESTIC—Red onions range from \$1.90 to \$2 per bbl., and yellows \$2.25.

ONIONS, IMPORTED—Bermuda onions are quoted at \$2 to \$2.75 per crate, and Egyptian \$1.75 to \$2 per bag.

POTATOES—Car lots of potatoes sell at 60 to 65c. on the track, and 70 to 75c. in jobbing lots.

PROVISIONS.

There is no improvement in the local provision market, business having continued quiet and principally of a jobbing character, at steady prices. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

The feature of the flour market is the strong feeling which prevails in Manitoba grades, patents now being quoted at \$4.90, and strong bakers' at \$4.75. We quote: Winter wheat, \$4.35 to \$4.50; spring wheat, patents, \$4.90; straight roller, \$4.20 to \$4.35; straight roller, bags, \$1.95 to \$2; extra, \$3.75; extra, bags, \$1.80 to \$1.85; Manitoba strong bakers', \$4.75.

In feed there was no change, prices being firm under a good demand. We quote: Bran, \$16 to \$16.50; shorts, \$19; mouillie, \$23 to \$24.

The market for oatmeal was quiet, but prices have an upward tendency in sympathy with oats. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

CHEESE.

There is no change apparent in the disposition of the cheese market. Buyers fail to show any great urgency about purchasing, and the tone is heavy in consequence. It may be remarked, however, that the tenor of private cables indicated a desire that exporters here should make offers. It is understood also that there were limits of 30s. on the market. These are rather too close, however, for any business to result, and it is doubtful if any was done in connection with them. At the wharf Monday some 2,000 odd boxes of French cheese sold at 6½ to 6¾c., the inside being the ruling. Another lot of the same goods also changed hands at a fractionally higher price, viz. 6¾c. In Ontario goods 6½ to 6¾c., according to quality, about covers the market here.

BUTTER.

Butter remains dull and heavy. The only business doing is a small jobbing trade in fresh creamery, which rules heavy at 15 to 15½c. There were creamery men in town this week trying unsuccessfully to sell, and they will have to consign their goods. No further business is spoken of in held goods, and there is no demand whatever for dairy stock, so that quotations are nominal.

ASHES.

There has been a fair business doing in ashes, at steady prices. We quote: Firsts, \$4.10; seconds, \$3.75 to \$3.80.

MONTREAL TRADE NOTES.

A wholesale grocer here tried this week to place an order for a round lot of 2,000

cases new pack canned salmon. The f. o. b. price asked on the coast by the canners he considered to be prohibitive.

Jobbers' and refiners' prices on sugar here are still identical.

A. P. Tippet, of A. P. Tippet & Co., is out of town on a business trip.

Practically all the comb honey in stock here has been exhausted. Only a few small lots remain.

Kennedy, Greig & Co. have just received a large shipment of Bryant & May's English matches.

Sales agents refused offers of 33½c., ex-wharf, for round lots of 1,000 puncheons of molasses on Tuesday.

Kennedy, Greig & Co.'s new jellatine, "Jelloine," will be ready for the market in the course of a few days.

A leading French house here tried everywhere on the market to get a lot of Sultana raisins, and could not do so.

A shipment of Huntley & Palmers' fine English biscuits has just been received this week by Rose & Laflamme.

Laporte, Martin & Co. are large holders of Barbadoes molasses. They call attention to the fact that the market is firm, with an advancing tendency.

Rose & Laflamme report the receipt of a large shipment of Patterson's goods, Eureka pickles, camp coffee and sauces, which went forward this week to Winnipeg.

Rose & Laflamme have been putting out a lot of sample packages of Fould's wheat germ meal. They are, as a result, experiencing a large demand for the article.

Kennedy, Greig & Co. call attention to their ad. this week regarding Perry's Liquid Rennet. It is a preparation they are putting up themselves for use in making dessert dishes of different kinds.

The season has opened well for Marshall & Co.'s Scotch fish products. Kipper and fresh herrings, bloaters, herrings in tomato and anchovy sauce, etc., are the popular fish. Marshall's lunch and ox tongues from the famed Aberdeenshire cattle find a ready sale.

Kennedy, Greig & Co. have received, among other shipments, French tinned goods of all kinds, and several new novelties in fancy lines of confectionery, both English and American. They report a good run on Pratt's Poultry Food, for which they are the agents.

J. Alex Gordon, who represents such leading brands of canned salmon as B. A., Sovereign, Red Star, Lynx, Clover Leaf, Queen, Phoenix, and Drysdale, says that none of them have given him a price on new pack yet. Last season nearly all of his large contracts were settled by this time.

A private cablegram from Smith, Baker & Co., of Japan, to J. Alex. Gordon & Co.,

says: "The total tea settlements, since the opening of the season, amount to 63,000 piculs, against 82,000 piculs on May 16, 1894. The ss. Victoria, sailing May 17, carries 7,400 packages, as follows: To New York, 4,100; Chicago, 2,800, and Canada, 500."

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., May 23, 1895.

BUSINESS during the past week has been active, though money continues scarce. Molasses has been the feature of the week, for, though the last steamer brought some 900 packages, the market (which was bare) soon took this up, and, in fact, importers were oversold. Then, the market advance of 2c. makes buyers more active. Flour and sugar continue to advance. Some of our merchants who had large stocks during the decline were caught bare, but, as a rule, our merchants are making money. Many were also found well stocked when oatmeal advanced. Some, however, find their stock of evaporated apples large for the present state of the market. In cream of tartar the quotations are at present very high. Spices show little change. In tea and coffee a fair trade is doing at firm prices.

OIL—The firmness in oil is not continued. American is off another cent this week, and Canadian remains at last week's quotations. There is a rather better demand, as during the high prices buyers held off. They are still somewhat careful, as prices are rather easier. We quote: American, best quality, 22c.; Canadian, best, 21c.; Canadian, second grade, 17c.

SALT—The demand continues only fair. Another cargo is to hand, or will be by the time this report is in the readers' hands. Stocks are now fairly large. The price of that to land this week will be about 45c. at the ship's side. We quote ex store prices: 50 to 55c.; fine factory filled, 95c. to \$1.10; 5-lb. bags, \$3 per bbl.; 10-lb. bags, \$2.80

per bbl.; 20-lb. boxes, 20c.; 10-lb. boxes, 12c.; cartons, \$2 per doz.

CANNED GOODS—Prices are firmer. Salmon is quite a feature this week. The stock last fall was light, and prices did not advance as was expected. Now, however, they are getting scarce, and the prospect being that the new will cost higher than last season, prices here have advanced. Enquiries from outside centres have been received, but holders are not anxious to sell as they will need the small stocks they have for their regular trade. In canned beef prices continue very firm. The Canadian, which is giving good satisfaction, is lower than American, and is finding a good market. Sales of canned fruit are light. We quote: Corn, 95c. to \$1; peas, 90 to 95c.; tomatoes, 95c. to \$1.05; corned beef, 2 lb. tins, \$2.80 to \$2.90; 1-lb. tins, \$1.70 to \$1.75; oysters, 2's, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.65 to \$2.75; 2's, \$1.90 to \$2; lobsters, \$1.75 to \$2; haddies, \$1.40; salmon, \$1.40 to \$1.50; flat, \$1.75; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—There is little new to report. Valencia raisins are low. Stocks of off-stalk are fairly large and of layers some small lots have been imported from New York during the week, where they are very low. In evaporated, holders are anxious to sell, as market is weaker, there being some held here that were bought $\frac{3}{4}$ c above prices now ruling. Prices are, however, not yet down to what the larger quantity held here cost. Dried apples are very light. Loose muscatels are arriving from New York. They are good sellers during the summer, and are low. Since the arrival of the last West India steamer Bermuda onions are much lower, being almost same price as Egyptian. There is some inquiry for London layers. Currants are firm. California evaporated have light sa'e, but are of good quality. We quote: Sultana raisins, 6 to 7c.; Valencia, 4c.; layers, 5c.; London layers, \$2.10 to \$2.25; California loose muscatels, $\frac{5}{8}$ c.; currants, bbls., $3\frac{3}{4}$ to 4c.; half-cases, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; evaporated apples, 8c.; dried apples, $5\frac{1}{2}$ to $5\frac{3}{4}$ c.; dates, 4 to $4\frac{1}{2}$ c.; prunes, $4\frac{1}{2}$ to $5\frac{1}{2}$ c.; figs, 11 to 18c.; Bermuda onions, \$1.60 per crate; Egyptian, 2c.; Californian evaporated peaches, 12 to 13c.; ditto apricots, 12 to 14c.; ditto pears, 12 to 13c.

GREEN FRUIT—Trade is very brisk. Owning to the very large demand in the States for bananas, they are rather scarce here. Oranges are firmer and lemons are marked up. Strawberries are firmer, fair quantities arriving. Rhubarb is lower and arriving in large quantities. We quote: Valencia oranges, \$5; Messinas, \$3 to \$4.50; lemons, \$4 to \$4.50; strawberries, 20 to 25c.; pine-apples, 10 to 20c.; rhubarb, 2 to 3c.; bananas, \$1.75 to \$2.25. Peanuts are firm and higher prices are expected.

MOLASSES—This has been the feature of the week. Many of our merchants were not prepared for the rather sharp advance at Barbadoes. Their limits at the islands were too low, and therefore stocks to arrive are light. Stocks here are light and importers even after the arrival of the last steamer in many cases found themselves oversold. Prices here are very firm. A small cargo of Porto Rico passed through here for Fredericton during the past week, and it is understood one of our importers has two small cargoes bought, on which if the market holds he will have a nice profit. It is very hard to sell any molasses here costing much over Barbadoes, no matter what the quality. We quote: Barbadoes, 32 to 33c.; St. Croix, 28 to 29c.; Porto Rico, 33 to 34c.; syrup, 35c.

SUGAR—Sales are somewhat lighter than last week. Prices are very firm. In this, as in flour, prices here are only equal to cost, and often below. That importers have faith in present prices, and are even looking for a further advance, is manifest from one sale of five hundred barrels during the past week. We quote: Granulated, $4\frac{3}{8}$ to $4\frac{1}{2}$ c.; yellow, $3\frac{3}{8}$ to $3\frac{3}{4}$ c.; Paris lump, 5 to $5\frac{1}{2}$ c.; pulverized, 5 to $5\frac{1}{2}$ c.

DAIRY PRODUCE—In cheese the markets are weaker, and some old will be carried over. Both new Canadian and our own province cheese are now in this market. Prices are easy. In butter the market is still unsatisfactory. Holders do not know what to do with the old. Creamery prints, new, are somewhat in demand, but at low prices. Good new butter finds a fair sale. In eggs the demand during the week has been rather better, so that prices are somewhat firmer, but are still very low. We quote: New cheese, $8\frac{1}{2}$ to 9c.; new butter, 16 to 17c.;

ST. JOHN MARKETS—Continued.

old creamery, 15 to 16c.; dairy, 12 to 14c.; cheese, 9 to 9½c.; eggs, 9 to 10c.

FISH—In dried prices are firmer. The demand is not large, but only a few are coming forward. Pickled herring show no change and are dull, as are smoked, which are very plentiful. Fresh are scarce in both shad and gaspereaux, not enough being caught to fill orders. Halibut and lobsters are still light catches. Smoked shad are now the most popular fish in city trade. We quote: Cod, \$3.80; large, \$4; small, \$3.25; pollock, \$1.65 to \$1.70; bay herring, \$1.40 to \$1.50; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; shad, fresh, 12c.; Canso, \$5; smoked herring, 6 to 7c.; Digby chickens, 10 to 12c.; halibut, 8 to 8½c.; gaspereaux, 50 to 60c.; smoked, \$1; lobsters, \$6.

PROVISIONS—The market shows no change. There is a fair demand. As the season gets warmer the trade do not care to handle much smoked meat. In pure lard there seems to be a large range of prices. We quote: Clear pork, \$18.50 to \$19; mess, \$16.80 to \$17; prime, \$13 to \$13.50; extra plate, \$14 to \$14.50; plate, \$13 to \$13.50; pure lard, 9¾ to 10½c.; compound lard, 8½ to 9c.; cottolene, 9¼ to 9¾c.; hams, 11 to 12c.; rolls, 9 to 9½c.; beef, half-barrel, \$7.

FLOUR, FEED AND SEED—In flour prices continue to be higher, though buyers are rather more careful, as there is a feeling that, at least outside of Manitoba, the prices are now well up. There is but very little difference in this market now between "Star" and Manitoba. In oatmeal prices are firm. Beans are rather lower. Prince Edward Island oats are being offered here, but prices are rather above buyers' ideas. Seeds are finding a light sale. Hay also continues very dull. Middlings and bran are now low when compared with flour, they showing no change. Demand is not active. There is only a light demand for feed flour at present prices. We quote: Manitoba, \$5.15 to \$5.25; best Ontario, \$5 to \$5.05; medium, \$4 to \$4.95; oatmeal, \$4.25 to \$4.30; cornmeal, \$2.95; middlings, \$24 to \$25 on track; bran, \$22.50 to \$23; handpicked beans, \$1.70 to \$1.75; prime, \$1.60 to \$1.65; split peas, \$3.70 to \$3.90; pot barley, \$4 to \$4.25; hay, on track, timothy seed, \$3.25 to \$3.40; red clover, 11½ to 12½c.; alsike, 12½ to 13c.; buckwheat, \$1.40; oats, on track, 44 to 45c.

ST. JOHN MARKET NOTES.

John Seely received another large consignment of Bermuda onions by the last steamer.

C. & E. Macmichael have just received a shipment of California loose muscatels from New York. They bought them at the low prices.

Exhibition matters are progressing favorably. Much space is already spoken for. It has been decided to judge produce and live stock by score card.

John Seely receives daily such quantities of fresh shad and gaspereaux as catch, which is light, permits. In all lines of fish he is always prepared to fill orders. Quality is always a feature.

We have now in port, chartered to load deals, the largest sailing ship ever here, she is 3,300 tons burden, or one-third larger than the largest ever here. She paid \$1,000

towage from New York to this port. It is reported that the charterer is finding some difficulty to, just at present, get enough deals to load her.

The first cargo of English orell coal which has arrived here for a long time is now discharging. For persons using soft coal, though the price appears high, there is, owing to quality, no cheaper coal to be had.

Jardine & Co. St. John, N.B., have just placed a large order with Messrs. Marshall & Co., Aberdeen, Scotland, for kippered and fresh herrings, bloaters, herrings in tomato sauce, etc.; also for lunch tongues and soups.

T. S. Simms, Geo. F. A. Anderson, Harry Hall Reid, John Sullivan and John M. Anderson, have applied for incorporation as F. S. Simms & Co., Ltd., to carry on the brush and broom making business heretofore carried on by T. S. Simms. Capital \$50,000.

Fred. C. Colwell & Co. is the name of a new firm now carrying on a confectionery manufacturing establishment in this city. Mr. Colwell is well known to the country trade, having been intimately connected with this line of business for a number of years, and having a most competent foreman at the head of his manufacturing department. The firm is in a position to give every satisfaction.

WOODSTOCK, N.B., MARKETS.

There is a fair business doing. The recent rains have done much good. The lumbermen are expecting that very few logs, if any, will be hung up this spring, and so are in good spirits. The continued dullness in butter is much felt, and the low prices at which the cheese market is opening has a dampening effect on what is now a large industry. Hay, which has been so very dull, is in a rather better position, there being a light demand in Boston at rather better prices than have been ruling. There is thought to be some 15,200,000 tons of hay in the country. Oats show but fair demand. The oat business is something to which our merchants should give more attention, as, owing to careless cleaning, our oats are never quoted as high as either Ontario or P.E.I. We quote: Potatoes, 60c.; yellow-eye beans, \$1.75 to \$2; peas, \$1.25 to \$1.35; eggs, 8 to 10c.; cheese, 9½c.; butter, 15 to 16c.; turnips, 50 to 60c.; carrots, 75c.; clover seeds, 12c.; seed oats, 40 to 55c.; timothy seed, \$3.65.

EGG PICKLE.

A correspondent writes: "I see by your paper that some of the business firms pack eggs in pickle. Please let me know receipt for keeping them; also what kept in, if barrels or tanks."

Reply—The various egg packers have different recipes for their pickle, which they all keep in profound secrecy. By paying from \$30 to \$50 you could secure a good recipe from the practical packer of some reliable firm.—THE EDITOR.

ALWAYS "WINDSOR SALT"

ORDER

Is there any reason why you should
order any other? As to quality

WINDSOR
TABLE SALT

Is superior to any other, imported or domestic, that is on the market. Ordinary salts become very hard, because of the dust and lime which they contain. The WINDSOR is perfectly granulated and free from dust and impurities, and you will find that it does not get hard. This is quite a point with housekeepers, as, when once they have used it on the table, and find it does not cake, they will not want to use any other. It helps you to keep good trade. Put up in fine cotton bags, 100, 60, 42 and 30 bags per barrel, and in air-tight cases, 3, 4 and 5 lbs. each, and can be ordered in any quantity from any wholesale house in Canada. The price is right, and the salt is the

THE NECESSITY OF THINKING.

I WAS talking with a young man this week, says "Eli," in The Commercial Bulletin and Northwest Trade, who holds a responsible position with a railway company, and he made this remark :

"Most men are content with having a few crumbs from the rich man's table, but I want to dine with the folks, and I'm going to."

There is a world of meaning in that sentence. The great weakness of young business men to-day, in store and out of it, is that they are too contented, or to put it in another way, too ambitionless. Look the field over and see for yourself how many there are who have made no headway in the world after working five years. What does this indicate? It indicates that young business men are not thinking, and in consequence they are not progressing, and, I may add, old men are not thinking either. One of the most foolish things a young business man can do is to settle down and not think. The world moves by thinking.

Does anyone suppose Edison discovered the secrets of electricity without thinking? Does anyone suppose that Edison stopped work at 6 o'clock—a ten-hour day—and played during the evening? Does anyone suppose that great results come by chance? Let us not deceive ourselves. Great results, or results in any form, come as the result of work, or as the result of no work. Business men must think if they will rise. But all cannot think, you say. This may be true in its large sense, but all can think a little, and that little may be the turning point of their life.

When the decree had gone forth in the kingdom of Ahasuerus that the Jews were to be banished on a certain day in the future, and Queen Esther, only a young girl, had set about the work of securing some favor for her people, a most important thing happened. King Ahasuerus could not sleep one night. What did he do? He thought. What was the result? The fate of the Jewish nation turned on that hour of thought. Great things come from thinking. The fate of nations is bound up in an hour of thought. History has proved it. Great inventions are bound up in thought. History has proved it. Then it pays to think.

What are you going to do about it, young man? Are you going to settle down and draw \$12 a week salary for the balance of your life, or are you going to think out a plan for yourself? The matter lies with you for solution, so don't make ready to lay it on the Government in the future because you did not succeed. The Government provides you with the greatest opportunity; there are schools and freedom within proper restraint; if you can't work out a future for yourself, the fault is with you and not with the Government. There are a good many "walk-

ing delegates" around the country to-day who are grumbling because someone else is comfortable and they are not. The fault is their own. They believed in an hour system, and on the strike of the gong they stopped work. No man succeeds on that basis, because no man can succeed and stop work on the minute. Success comes from doing more than you are hired to do.

There isn't a member of a labor organization who works according to schedule who is not a machine rather than an individual. No machine can make advancement, because it is fettered by rules. We don't want labor unions that provide a limit for a man's energy. We want the freedom of the man so that he can develop all the power that is in him. I say this with the greatest respect for the working man, but with no respect for the system that fetters him. Just as long as a man ties himself down to the behest of a "walking delegate," just so long will that man fail to rise. Advancement is contrary to the theory of the organization that prescribes the limits within which we must walk.

DAMAGE TO GROWING GRAIN.

James Carruthers & Co., Toronto, with a view of ascertaining definite information of the damage done to the growing grain by the recent frost, sent out circulars to many correspondents in Ontario. Replies have begun to come in. Of these replies fully 80 per cent. report serious damage to the wheat, barley, oats and peas. In the vicinity of Mount Forest, fields that were green before the frost came, now look as if nothing had been sown in them. Farmers in some places are resowing. In other places it is hoped the grain may recover. Very blue reports come from Minnesota and Dakota, but despatches from Manitoba and the Canadian Northwest are hopeful.

CHEESE MEN, ATTENTION !

An Ottawa despatch says that the following important notice to the cheese trade has been issued : Dr. Sproule, chairman of the Agriculture and Colonization Committee, desires it to be known that the committee, after consultation with the Minister of Agriculture, have decided to hear the views of the cheese salesmen and exporters in regard to the bill for branding cheese, on Friday, 31st inst. It is understood that the members of the various cheese boards are desirous of making known their opinions with respect to the bill now before the House by deputation or otherwise, and it is deemed advisable that an opportunity should be given for ventilating them before proceeding further with the measure. Montreal and Brockville are among the cities that have expressed a wish to be heard before the committee, and other boards in Ontario will, no doubt, follow their example.

FRUITS BADLY NIPPED BY FROST.

From what THE CANADIAN GROCER can gather from enquiries made in different sections of Ontario, extensive damage was done to the fruit crops by the recent frosts. In some districts the canners are afraid they will have to forego packing some kinds of fruit.

A correspondent in Norfolk County writes : "Apples, peaches, pears, plums, cherries, with us are as near a complete failure as it is possible to be, and strawberries, raspberries and other smaller fruits are so much injured that it looks as if they would be beyond the reach of canners this season. We spent a portion of last week examining the effect of the frosts on the orchards about Hamilton and vicinity, and from there to St. Catharines and neighborhood. And if we are anything of a judge in this matter, we predict that there will be so little fruit grown in these sections of country this year, that the price will be so high as to place it beyond the reach of canners."

MAKING BEDOUIN BREAD.

The process of manufacturing Bedouin bread is exceedingly simple. A few bricks are laid on the ground to form an enclosure, in which a small wood fire is kindled. A convex metal disc, somewhat resembling the lid of a saucepan, rests on the fireplace. The flour is mixed in a wooden bowl, with a little water, is rolled and jerked about until it appears to be about the consistency of a thin piece of cloth. It is placed on the metal disc, and in a few minutes it is baked into bread. Before it is quite baked, however, it is cut into large squares with an ordinary knife. This bread does not rise in the process of baking, probably because it is baked on a convex instead of a flat surface. No machinery is used, no slabs, no breaks, no sliding tables, and no moulds, the whole tendency of the process being simple to primitiveness. On account of its simplicity it is instructive, and is admirably adapted to give the modern Jew, who has not traveled in Arabia, an idea of the custom of preparing a hastily baked kind of bread, which has prevailed among the Bedouin tribes to the present day.

Be patient, kind and attentive to children; they grow up to be men and women, and may become purchasers.

The liquidators have paid another dividend of 10 per cent. to the creditors of the Commercial Bank of Manitoba. This makes 37 per cent. of the total creditors' claims paid up to date.

To clean marble, take two parts of common soda, one part of pumice stone, and one part of finely powdered chalk; sift it through a fine sieve and mix it with water; then rub it well all over the marble and the stains will be removed; then wash over with soap and water, and it will be as clean as it was at first.

CANADA'S APRIL FOREIGN TRADE.

THAT trade in the Dominion is reviving is clear from the evidences adduced from more than one source. There is this week to hand the official report of Canada's foreign trade for the month of April, and its evidence is corroborative of what has been apparent to every observing man for some weeks.

The subjoined table gives the imports entered for home consumption during April last, together with the same month in 1894 and 1893:

ARTICLE.	APRIL, 1895.	APRIL, 1894.	APRIL, 1893.
Groceries, etc.—			
Ale, beer, porter	\$10,197	\$9,923	\$9,958
Animals	9,340	12,035	15,733
Flour	7,573	7,417	18,726
Meal, corn and oats	9,534	10,795	11,936
Rice	11,279	10,083
Drugs and medicines	102,042	92,592	129,567
Fish and products of	35,639	53,810	28,761
Fruits and nuts, dried	37,411	43,421
Fruits, oranges and lemons	56,000	69,105
Fruit, all other	7,145	5,349
Leather, all kinds	83,809	54,678
Boots and shoes	34,191	26,023
Oils, mineral and products of	36,846	28,914
Flaxseed or linseed, raw or boiled	31,284	24,604
Oils, vegetable	10,079	9,770
Provisions, lard, meats, fresh and salt	42,474	38,589
Pickles, sauces, capers	5,800	8,135
Butter and cheese	11,462	52,885
Seeds and roots	165,621	130,746	127,049
Soap, all kinds	17,577	13,778	14,752
Spices, ground and unground	10,959	12,678	18,822
Spirits, all kinds	62,407	41,307	65,246
Wines, sparkling	7,307	6,790	13,309
Wines, other than sparkling	21,538	20,021	25,780
Molasses	54,878	50,686	53,432
Tobacco and cigars	20,870	17,231	27,034
Vegetables	11,815	18,135
Broom corn	4,848	17,702
Coffee	60,464	35,607
Bananas, pineapples, olives, etc.	43,788	88,463
Grease for soap-making, etc.	30,602	32,628
Hides and skins	212,092	134,967
Salt	13,573	14,822	10,555
Sugar (free)	1,088,924	272,464
Tea (free)	103,265	63,759
Tobacco leaf	102,384	204,919
Cotton manufactures	419,546	306,538	404,706
Fur manufactures	58,113	74,818	73,833
Hats, caps, etc.	101,758	114,941	115,137
Woolens	567,320	605,492	705,595
General imports—			
Total dutiable goods	4,848,156	4,919,852	5,350,936
" free goods	4,026,937	3,135,214	3,563,516
Coin and bullion	34,703	96,163	475,348
Total	\$8,909,796	\$8,151,229	\$9,389,800

The above figures demonstrate the consumptive demand of the nation, for while the aggregate of imports during 1893 were a little over 5 per cent. in excess of those of the past month, yet the imports during the latter were about $8\frac{1}{2}$ per cent. greater than

in April, 1894. And then it must be remembered that the range of values is lower than a year ago, and much lower than two years ago. As far, then, as the imports go, improved health in trade is evidenced.

It is, however, when we come to the exports of the produce of Canada for April, 1895, that we find the most food for gratification. Here is the table, with comparisons to prove it:

ARTICLES.	1895.	1894.	1893.
Produce of the mine	\$ 888,460	\$ 502,085	\$ 384,131
" " fisheries	330,440	298,814	341,270
" " forest	933,452	814,554	1,174,973
Animals and their produce	1,211,504	652,608	678,745
Agricultural products	422,996	463,647	621,254
Manufactures	552,179	609,919	605,111
Miscellaneous	11,452	11,173	11,721
Total	\$4,350,484	\$3,352,800	\$3,817,205

DID THEY GET A TIP?

The bulk of Parliament's time during the past week has been taken up with the Budget debate, which still continues.

The official statement of imports of raw sugar into Canada submitted to the House by the Government bears out the inference drawn in your columns last week that someone knew of the intended tax on raw sugar, and imported beforehand accordingly. At Montreal, between April 30th and May 2nd (May 2nd being the last day of the old tariff) 9,285,499 lbs. of raw sugar were imported. At Halifax, no sugar was imported between April 30th and May 2nd, inclusive, but 23,547,313 lbs. of raw sugar had been imported between February 23rd and April 26th, stored and entered free through Customs and delivered between April 30th and May 2nd inclusive. These figures show immense gains over the imports for the same dates in 1894.

Geo. Leary, Canadian immigration agent in Ireland, reports in favor of Canadian steamships calling at Irish ports. At the Royal Dublin Agricultural Show lately the only exhibits of Canadian goods were some agricultural implements from the Massey Co., a Peterborough canoe, and a road cart. No Manitoba wheat goes direct to Ireland, and very little indirectly, although raising wheat has been abandoned in Ireland. The

mills grind foreign wheat, and the flour on the market chiefly consists of United States brands. The agent says: "Should any future Canadian exhibit be made here, it would be well to show flour in the sack, and be able to quote prices, rates of shipments, and the names of good mills and operators."

United States cider is being largely advertised and sold in the west of England, and J. W. Down, Canadian agent at Bristol, reports that this is an opening for the Canadian article.

Ottawa, May 22.

NEMO.

DISEASE IN TORONTO.

The Toronto World recently published a diagram showing that there were more deaths from consumption in that city than any other in the province.

This seems to prove the theory advanced by the British Royal Commission that a large amount of consumption was due to people drinking milk from diseased cows, for frequent investigations showed that tuberculosis was present to an alarming extent in some of the dairies from which Toronto drew its milk supply.

With such evidence before them the Provincial Board of Health is neglecting its duty when it does not insist on a vigorous inspection of the milk cows in every part of the country, but especially in towns and cities where the greatest amount of disease lurks.

In the meantime the recommendation of many medical men is a good one: that well-known brands of condensed milks are the only safe form in which to use the lacteal fluid, especially in the case of children and invalids, who cannot throw off the disease germs as can strong, well nourished subjects.

If taken advantage of by the trade they can materially increase the sales of canned milk, for it is only in this form it should be used.

THE GERMAN SUGAR BILL.

A Berlin despatch says : The Sugar Bill, over which the Reichstag wrangled for two days, although slightly favoring the Agrarians, had not any party inspiration and the Government were therefore justified in their expectations that the measure would pass without any trouble. The bill simply aimed to relieve the present great depression in the sugar trade by maintaining high export bounties until some international agreement could be obtained with Austria and France regulating the export premiums or abolishing them altogether. Among other considerations pointing toward an international agreement the Government were of the opinion that it would lead to the establishment of an entente with the Government at Washington and prevent differential treatment of German sugar. Neither the Freissinige party nor the Socialists had any genuine reason for opposing the bill, yet party rancor incited them to tactics designed to block the progress of the measure.

Herr Von Kardorff, the free Conservative leader, caused a count out on Tuesday while the Freissinige motion in regard to secrecy at elections was being debated, and the consequence was that when the sugar bill was under discussion on Thursday Herr Singer, on behalf of the Socialists, caught the Government napping and retaliated with a vengeance. Discovering that

there were only 169 members present, while it was necessary that 199 should be in the Chamber in order to constitute a quorum, Herr Singer took advantage of the situation and caused the sitting to come to a close. The same tactics were repeated on Friday, with the same degree of success. Count Fosadowsky, the Imperial Minister of the Treasury, appealed to the members of the left not to demand a count, but his appeal was unavailing and the debate was adjourned until Monday, May 20, when, if there is no quorum present, the bill will be dropped and the session closed.

IMPORTATIONS OF SUGAR.

In the House of Commons on Monday Mr. Edgar asked how many pounds of sugar above number sixteen Dutch standard in color and of refined sugars were imported between the 27th day of March and the 3rd day of May, 1894, and between the 27th day of March and the 3rd day of May, 1895, both inclusive.

Hon. Clarke Wallace replied that between March 27 and May 3, 1894, the importation amounted to 70,677 pounds, and between March 27 and May 3, 1895, the amount was 552,181 pounds. Replying to Mr. Edgar, Mr. Wallace said that 20,528,012 pounds of sugar, not of Dutch standard, and other qualities of sugar classified as free goods,

were imported between March 27 and May 3, 1894. During the same period of 1895, the amount was 85,519,717 pounds.

CLOSE SEASON FOR BASS.

An order-in-Council has been passed, of special interest to fishermen. At present the close season in Ontario and Quebec for bass ends on the 30th of June. It has been determined that hereafter the close season shall terminate on June 15. This will give the fishermen fifteen days more fishing. The reason for the change is that the spawning of the fish is earlier in the year than it was considered to be when the first-named date was fixed.

CAUGHT IN THE ACT.

People living over J. W. Babcock's grocery store at Oshawa were awakened the other morning at 1.30 by someone trying to effect an entrance into the store. A watch was set at back and front and Constable Halnan sent for. On going inside he found two men, who were arrested. They had a large quantity of stolen goods in their possession. The prisoners, who gave their names as Henry Melose and Thos. Hyland, were brought before P.M. Grierson, and each sentenced to one year in the Central Prison with hard labor.

ST. STEPHEN, N.B.

EARLY CLOSING IN WINNIPEG.

According to The Manitoba Free Press, the early closing fight is now on in Winnipeg in earnest. Two merchants who have violated the recent legal enactment regarding the hours during which a retail store may be kept open, were some days ago summoned before a magistrate. These are Simon Ripstein and G. Frankfurter. The information against them was read, charging in effect that they kept open their establishments on North Main street for the transaction of business after the hour of seven in the evening, contrary to the provisions of the early closing by-law. A plea of not guilty was entered, Mr. Howden, of Hagel & Howden, appearing for the defence, and Mr. Isaac Campbell, Q.C., for the prosecution. Mr. Campbell asked that the technical objections that the day on which the information was laid was not a holiday, or a day preceding a holiday, be waived, and this was consented to by Mr. Howden. By consent an enlargement of the case was granted.

It is understood to be the intention to make test cases of these two. Mr. Ripstein will enter the plea that having an auctioneer's license he does not come under the provisions of the by-law, and, of course, all the city auctioneers are interested in this unexpected defence. There will be a series of

objections in addition. One of these will be that a sufficient number of merchants did not sign the early closing petitions, and another that the by-law is ultra vires in that it interferes with trade and commerce, and could only be passed by the Dominion Parliament.

"PICKLES" VS. "BLACKING."

On Saturday last, at Dundurn Park, Hamilton, W. H. Gillard & Co.'s "Pickles" defeated F. F. Dalley's "Blacking" in an interesting and hotly contested, though hardly scientific game—as the term goes—of baseball.

At 3 o'clock sharp these "aggregations of ball tossers" took their places to do "battle royal" for their respective colors—or rather respective merchandise. Throughout the early part of the day it had rained, only clearing up as the game was called, which may have had a dampening affect upon the "Blacking" and made it a comparatively easy matter for the "Pickles" to take the shine off them. At the end of the fourth innings, however, it looked as though the "Blacking" had determined to preserve their polish in spite of the weather and "Pickles," at which point the score stood 6 to 2 in their favor, but here Gillard's "Knights of the Diamond" called into play all the reserve energy in a first-class pickle,

and soon asserted the supremacy of their merchandise, the score at the end of the ninth innings standing 27 to 10 in their favor.

The features of the game were the exceptional catching of Huttly of the "Blacking," the splendid batting of Patton and the nifty base running of Armstrong, of the "Pickles."

Everybody combined in saying that an exceptionally pleasant afternoon had been enjoyed.

A WINDOW DISPLAY DEVICE.

One of the most extraordinary devices for attracting custom on record was that of a fruiterer in a midland town, says London Answers. Instead of the ordinary plate glass a large number of rough and magnifying glasses formed the window. Seen through one of these panes an orange looked as large as a pumpkin, and cherries as large as apples. A great disadvantage attached to the novelty was the fact that at the distance of a few yards from the window it was quite impossible to see into the shop. Everybody knows that you must hold a magnifying glass very close to the eyes to see anything through it. Nevertheless, for some time, at all events, the enterprising proprietor did a roaring trade.

"Canadian Safety" Matches . . .

Attractively and safely put up in small sliding boxes to carry in the pocket. They light only on the box, and are fully equal in quality to the imported article.

In 5 gross cases.

"Safety" Matches

In patent boxes, which serve also as match safes, being made to hang on the wall; adapted specially to hotels. The hog who takes matches by the handful gets left here as "safetys" light only on the box.

In 1 gross cases.

"Favorite" Matches

Small parlor matches with blue heads, in compact sliding boxes; entirely safe from ignition by accident; a fit companion to a pipe and package of tobacco.

In 5 gross cases.

"Beaver" Matches

Parlor matches in a sliding box for house use; they are an improvement on the old parlor—ignite very readily and do not glow when flame is extinguished.

In 1 gross cases.

All our safety matches present the unique feature of immediately becoming cold and dead when the match is extinguished, thereby precluding all danger from fire by "droppings" or live embers.

The above brands of matches are all absolutely odorless, no sulphurous compound being used in their manufacture. We are sole makers of these kinds in Canada, and they are fully equal to any matches of foreign make.

THE **E. B. EDDY** CO.

Hull, Canada

CANADIAN TRADE WITH AFRICA.

Mr. Alex. W. Murdoch, the well-known colonial agent, of Toronto, is in Montreal engaged in promoting trade relations between Canada and South Africa. Mr. Murdoch informed a reporter that he had received great encouragement from a large number of leading manufacturers, as well as from the Boards of Trade of Montreal and Ottawa. Mr. Murdoch will remain in Montreal until next week, when he will go to Ottawa to confer with the Government and to address the Ottawa Board of Trade.

"The prospects for trade between Canada and South Africa are splendid," he said. "In fact I regard them as more favorable than with any other colony in the British Empire. The total imports of South Africa increased from £3,304,132 in 1886 to £9,128,164 in 1891. The greatest increases were in machinery, furniture, hardware, cottons, fuel, leather and metals. There is not a single item on the whole list of imports that Canada cannot export to advantage, and a wonderful field will be open to Canadian enterprise through the direct steamship facilities which are being provided. Two vessels have been offered with a view to experimental trips from a Canadian port direct to Cape Town, and banking facilities are being arranged whereby people can value shipments conveniently. We have also received many overtures from representatives in various parts of South Africa offering to undertake the Canadian agencies, and expressing themselves as favorable to the Canadian trade."

DO YOU HANDLE VEGETABLES?

Summer is at hand, and the enterprising grocer can turn over a good profit in vegetables. In this warm climate there is too marked a desire to consume meat, and too little tendency toward vegetables. The grocer, therefore, can consistently push the sale of vegetables both on health grounds and for his own profit. A grocer's store is always brighter, cleaner and more attractive than a butcher's shop, and should be the natural mart for vegetables. See that they are the best obtainable of their kind, and well displayed. Don't put them in shabby old boxes or tattered baskets ranged around the floor. Place fresh vegetables before your customers with the same care displayed by the packers in presenting canned goods. One reason why canned fruits and vegetables find ready sale all the year round is because their attractive exterior is on a par with their intrinsic merit as food in taste and quality. The same should be true of the green fruit and vegetables.

Once thoroughly educate people up to the proper degree of attachment to a vegetable diet in summer and an increase in the demand for the packed article will naturally follow during the winter.

Safes and Ostriches!

A business man who crowds about one-fourth of his papers into his little *safe*, and thinks the other three-fourths (which the safe can't contain) are also protected, is like the *ostrich* which hides its head in the sand and imagines its huge body is also thus hidden.

Don't be an

The town of Orangeville is about to invest in a waterworks system to cost \$45,000.

Seventeen thousand cars passed through the Sarnia tunnel during the month of April.

Peterborough has now a population of 10,835, an increase of 167 during the past year.

Jno. Fairbairn, grocer, Woodstock, bought the Gordon bankrupt stock at 74c. on the dollar.

Thomas White, Margaree Harbor, N.S., has purchased the store lately owned by P. A. Gallant, and is now fitting it up for summer trade.

The office of Thos. Fraser & Co., Montreal, has been removed to their cold storage warehouse, 225 Wellington street, corner of Colborne street.

It is estimated that about 350,000,000 feet of Canadian pine will be floated down the lakes to the Saginaw, Mich., mills during the present season.

At a recent meeting of the licensed trades association of Halifax, N.S., it was decided to fight the "screen law" to the bitter end, and a committee was appointed to procure counsel and go ahead with the test case.

The creamery at Macdonald, Man., will be built at once, as the contract has been let and the stone foundation is in course of construction. The building will be 24x38 feet with an engine room 10x13 feet.

West Selkirk, Man., is to have a new station, and the citizens are jubilant at the prospects of having the old box car out on the prairie exchanged for a new station, near the business portion of the town.

Ald. Murray, of Toronto, died on Sunday night. He was engaged in the pork and provision business for twenty years, in which he amassed considerable wealth, a portion of which, however, he dropped after the real estate boom collapsed.

There are about a dozen United States Customs officers in Montreal in connection with the smuggling of phenacetine. It is

said a prominent doctor is to be arrested on a charge similar to the one on which John Lyons is now held in New York.

Lally & Cavanagh's fruit and confectionery establishment, Cornwall, Ont., was completely destroyed by fire early Friday morning. The Great Northwestern Telegraph Company's office was also destroyed. The total loss is about \$3,000, and the insurance is \$1,900.

The first Manitoba crop report for the season will be issued on June 1. It will show that the increased acreage this year is much larger than the average increase of past years. In fact, farmers in some parts of the province will find a difficulty in harvesting the grain if the crop is large.

John Burke, aged 34, was arrested in London on Monday for stealing goods from Fitzallen's grocery store, Market square. Burke kept an eating-house over the store, and is alleged to have been robbing it for some time by means of a trap door. A large quantity of groceries was found on his premises.

Count de Bouthillier, of St. Matthias, P.Q., has returned home. He reports gratifying success in connection with the St. John's Stone Chinaware Company. A French porcelain company, with an immense capital, are anxious to extend their manufacturing operations to Canada, and are well disposed to take up the potteries.

The Forbes drainage scheme, one of the greatest engineering feats that has ever been performed in Western Ontario, has been completed, and 8,000 acres of land in Tilbury East that but a couple of years ago was nothing but marsh, is to-day as fine land as could be wished for. There are eight miles of main drains, each twenty-seven feet wide, and the job cost nearly \$65,000.

By all appearances the Regina Council are going to have a hard time collecting any income tax this year. Town Clerk Secord received yesterday fifty appeals against the tax. The average citizen of Regina does not take very kindly to having his income taxed, when he already pays taxes on his

property. This is the first year that the Council have assessed incomes, and it will probably be the last.—Winnipeg Free Press.

R. W. Thomson, formerly of this city, latterly of Toronto, was in the city Thursday visiting some of his acquaintances previous to his departure for South Africa, for which place he departs from Toronto next Monday. Mr. Thomson attended the Collegiate Institute here, and was also in the employment of Mr. Thomas Davidson, produce merchant, some eight or nine years ago, but left to attend the University of Toronto, where he graduated as a civil engineer. Latterly he has been teaching in the Toronto Technical School. His many friends in this city will wish him success in his new field of labor.—Guelph Herald.

CANADIAN CHEESE.

Canada is growing quite accustomed to testimonials from her friends, her commercial enemies. At the Chicago World's Fair all the world was told of the excellence of Canada's dairy products, for Canadian producers pretty well swept the board of prizes, and now we learn from Sydney that analyses of samples of Canadian and New South Wales cheese have been made by Mr. F. B. Guthrie, analyst to the New South Wales Department of Agriculture, with results very gratifying to Canada. There were three samples—one of Canadian cheese, one of Bodalla prize cheese, and one of cheese recently made at the Hawkesbury Agricultural College. The chief features of the analyses were as follows:

	Water.	Fat.	Casein.
Canadian.....	34.80	34.15	27.31
Bodalla	38.01	30.44	27.60
College	31.06	34.08	27.31

Commenting on these results, Mr. Guthrie says the Canadian cheese proved to be very rich in fat, and in splendid condition. Its composition might well serve as a standard to the attainment of which the efforts of New Zealand should be directed. It is a pity, remarks an exchange, Mr. Guthrie did not report the exact origin of the Canadian cheese, though the factory system has, happily, levelled up the quality pretty well all round.

DOMINION COUNTER SCALE

With Patent Automatic
Scoop Balance

Simple in construction. Nothing complicated or
liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long,
11 in. wide.

Nickel-plated Beam, Poises and Scoop
Balance. Double Beam, marked on both
sides. The Automatic Scoop Balance is now offered
for the first time, and every grocer who uses it will find
it a great saving in time, and it will also obviate liability
to error. When scoop is placed on the platform, the
ball on back end of beam automatically rolls to the
right, thus balancing scale with scoop on, and when
scoop is taken off scale, the ball rolls to the left, balancing
scale without scoop. Scale with this latest device
is assuredly the most complete and desirable scale for
general use in the market.

Manufactured exclusively by

THE GURNEY SCALE CO.

Hamilton, Ont., Can.

BUSINESS CHANGES.**DIFFICULTIES, ASSIGNMENTS, COMPROMISES**

FRANK T. ALLAN, general store, Duart, Ont., has assigned to Henry Watson, Clearville, Ont.

JOHN HILLOCK & CO.

Queen St. East, Toronto

HE WOULDN'T WARRANT THEM.

THIS is a story of how a New York grocer grievously offended a customer, also of how the customer wounded the sensitive feelings of the grocer, and of the circumstances which led to this most unhappy estrangement. The customer was "every inch a lady;" the grocer, though he never wore a stove-pipe hat, was in other essentials a gentleman.

They met at the grocer's counter, and this is the conversation that placed between them a great yawning chasm:

"Are those eggs fresh?" she asked.

"Yes, marm," replied the grocer.

"You are quite sure?"

"No doubt about it, marm."

"Now, if there is any doubt about it, I should not care to buy any."

"You can depend upon it, marm. I wouldn't say they were fresh if they wasn't."

"There were three rotten ones in those I bought the other day."

"You won't find none of these that way."

"Now, you say you are positive these are perfectly fresh."

"That's what I said, marm."

"You'll take back the bad ones, if I find any, won't you?"

"You've got to take them just as they come, marm."

"You'll warrant that there are no bad ones among them, won't you?"

"No, I won't; I'd a warranted them when you came in, but they've grown old since then. You can't expect eggs to last forever, marm, and another thing"—

But the slamming of the door as the lady flounced out lost to the world the verbal pearls that continued to come from between the grocer's celluloid-filled teeth.

BIG FIRE DOWN EAST.

Fire on Sunday destroyed the Inter-colonial Railway terminal wharf at Richmond, N.S., causing a loss of about \$250,000. Since the destruction of the Deep Water Terminus some months ago, the railway has been depending on the facilities afforded by the Richmond property, and its destruction will greatly hinder shipping for some time. The wharf was 1,000 feet long, on which were built an extensive coal trestle and two freight sheds. Fifty-six head of cattle owned by J. A. Leaman & Co. were cremated, and twenty freight cars were burned. The coaling of ocean steamships will have to be done in the stream for the present, as this and the Deep Water Terminus fire have destroyed all such facilities.

Being Federal property, there was no insurance. Leaman's loss will be about \$5,000. There are indications of incendiarism.

It does all That is claimed for it

This is proved over and over again by those who have given our scale a trial. Here is a sample letter :

AMHERST GROCERY STORE,

AMHERST, N.S., April 26, 1895.

Gentlemen, —We purchased one of your Standard Counter Computing Scales several months ago and have much pleasure in stating that it does all that you claim for it. We have no hesitation in recommending it as decidedly the best grocery scale in the market.

Yours very truly, BLACK BROS.

We cannot enumerate all our claims in one advertisement, but will gladly mail you full particulars upon receipt of your address.

"GRAND MOGUL" TEA

Exhibit which received the highest award at the Western Fair, London, against all competitors.

The thousands who tasted "GRAND MOGUL" at this great fair pronounced it the best tea they ever drank, and demanded their grocers should sell it. We won trade thereby.

The many doctors who use "GRAND MOGUL" recommend it for its purity and comparative freedom from tannin. It is staple as sugar and exquisite flavor.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, MAY 31, 1895

(\$2.00 per Year) No. 22

DROPS FROM THE EDITOR'S PEN.

A gentleman never steals; he "borrows."

* * *

A grocer should have sand himself and not put it in his sugar.

* * *

The world is a workshop, but there is recreation ground in every concession line.

* * *

A bright advertisement is the badge of progress.

* * *

Verily, the hen is a bird of profit and industry.—Ohio Merchant.

Yes, when the bulls are tossing the hen's product.

* * *

The incendiary as well as the loyalist was apparently ebullient on the Queen's birthday.

* * *

Going into court to collect an account is like going fishing with whales to catch sprats.

* * *

The currency question is still the current topic of discussion in the United States. It will not down.

* * *

Not even room for burial is there in this country for the man who does not see "better times a comin'."

* * *

An umbrella-lending institution has been started in London, England. Somebody evidently has faith in humanity.

* * *

Queen Victoria's 76th birthday will be remembered as a year of returning prosperity over the Empire which she rules.

* * *

Some of Brooklyn's retail grocers have been getting into trouble for selling diluted milk, for the condition of which they were responsible, although not the cause thereof. Had they been selling the condensed in-

stead of the natural, but impure, article they would have been richer in both time and money.

* * *

Many clerks who lost hard-earned savings at the Woodbine races are now strong anti-betting men. It is to be hoped they will keep such.

* * *

Much more to be desired than genius is diligence. Genius without diligence induces poverty; diligence without genius bringeth riches.

* * *

A pedlar was injured the other day in Winnipeg. That's strange. It is usually the pedlar that does the injury. To the merchant, at any rate.

* * *

Some clerks who desire to have their salaries raised should first raise themselves in the estimation of their employers by being more assiduous in their duties.

* * *

"The old is giving way to the new," remarks a contemporary. It is, but it is not without a struggle, and it is the same in business methods as in everything else.

* * *

A man named Wood sold New York grocers cinders for flour recently. What else could the purchasers have expected? Flour does not come from wood, and cinders do.

* * *

In the bicycle races that are to take place at Hanlan's Point between city travelers and retail grocers there will be no attempt to hide the fact that the grocers are trying to "get ahead" of the travelers, and vice versa.

* * *

Two Chicago grocers recently engaged in a personal encounter, in which rotten eggs, decayed vegetables, etc., were utilized as munitions of war. A cabbage directed at the stomach of one of the combatants ended hostilities. The only satisfaction about the affair is that instead of their cus-

tomers spending money on the decayed products the combatants spent their undesirable supply on each other.

* * *

The time to test a man's belief in the maxim, "Honesty is the best policy," is when he is in financial straits, and when a dishonest act seems more likely to get him out than would adherence to the said maxim.

* * *

A young man in Winnipeg has lost \$10,000 speculating in Chicago wheat. He evidently expected to be tossed by the bulls, but unfortunately was hugged by the bears. Young men with either ten thousand or ten dollars should leave Chicago wheat alone.

* * *

It does not matter what kind of a national flag we have as long as we possess the right kind of people for nation building, but Sir Donald Smith's amended design for the Canadian flag does seem preferable to that which we now possess. A maple leaf in the corner would certainly be more discernable at sea than the insignia we now have.

* * *

An editorial that originated in THE CANADIAN GROCER a year or more ago on "The Best Place to Start Business," recently appeared as "original" in The Grocers' Review, of Manchester. We are, of course, glad to see our offspring, even if somebody else does claim fatherhood of them now and then.

* * *

Philadelphia wholesale grocers have come to an agreement whereby "cutting" in the price of sugar is to be no more. The desideratum is to be secured by doing away with the rebates. Originally these rebates were 10c. per barrel. Eventually, however, they got to be 40c. per barrel or ½c. per pound. Then it was thought time to stop, and this thought was the other day crystallized into action. The fruit is yet to be seen.

GROCCERS VS. TRAVELERS.

THE success of last year's bicycle races between the city grocery travelers and the retail grocers of Toronto was so marked that it has been decided to repeat the friendly competition this summer. The meet will be held at Hanlan's Point on June 5, at 1.30 o'clock. With the facilities afforded by the new bicycle track at the Island and the other splendid improvements, the event should prove a successful one.

This is the list of events: 1 mile, open to grocers and travelers; 2 mile, open to grocers' clerks; ½-mile, open to travelers; ½-mile, open to grocers; 1 mile, open to wholesale employes; slow race, ¼-mile, open to all in trade; ½-mile, open to grocers' clerks; 1 mile, open to all in trade; 2 mile, open to grocers; 2 mile, open to travelers; 5-mile team race, travelers against grocers.

Entries will be received on the track on the day of the races. A portion of the Grand Stand will be reserved for ladies and their escorts. No wheel under 23 lbs. will be allowed in any event. The committee reserve the right to handicap any particular race. Prospective competitors will have the privilege of the track between 7 and 9 a.m., and after 6 p.m. each day from now until the races, provided they hold tickets of admission and certificate from the committee.

A FRIENDLY TIP.

The "Quaker City" grocers have evidently not been waiting for the spirit to move them, but they have been moving the spirit. The hint to merchants in Canada is obvious.—Canadian Grocer.

Our Canadian contemporary makes this reply to our recent editorial in response to that journal's advice to its readers to organize and influence legislation. It will be remembered that we brought out the fact that in Philadelphia the grocery organizations were as active as any others anywhere in doing just this thing, and what is more, that they were successful. The grocery and provision trade of Pennsylvania has been immeasurably benefited by the bills which have been fathered by the organizations in that trade, and by the killing of the pernicious bills which would have injured it beyond repair. Organization is the only way nowadays that anything can be accomplished, and we give our Canadian friends a friendly tip to take advantage of that fact as soon as possible.—Pennsylvania Grocer.

FOSTER ON BUDGETS.

THE CANADIAN GROCER: "The increase in the duty on molasses and syrup will naturally be felt more by the people in the Province of Quebec than by those in Ontario and the west, in the former province these two commodities being put to purposes for which sugar is demanded in the

latter part of the country." Our contemporary has evidently never read "Foster on Budgets," and is consequently unaware that the foreigner pays the duty.—Toronto Globe.

EASILY MET COMPETITION.

The majority of retail grocers allow themselves to become too easily discouraged by competition which, while it seems impossible to meet, is really not so at all when actual figuring is done.

During the past week, says The Grocery World, a certain Philadelphia retail grocer issued broadcast a circular which gave a list of the groceries which one dollar would purchase. His first item was five pounds of sugar, which he listed at five cents, and when his competitors among the retail grocers saw the first item, the majority of them at once concluded that the cutting on the whole list was equally radical, and went no further, simply giving up from the start.

One member of the Retail Grocers' Association was not content with dismissing the matter after this fashion, so he took his circular home and sat down to figure up exactly what he could sell that same list for, taken as a whole. He made a report at the association meeting last Monday evening that he could sell for 99 cents exactly the same goods displayed on the circular as a big bargain at a dollar, and make money. The circular advertiser had simply started his list with a big drive on sugar, and charged normal and even excessive prices on the majority of the other articles.

This grocer, who was progressive enough to investigate this matter himself, got out a circular which made a comparison between his own estimate of prices on those articles and the prices quoted by the circular advertiser, and showing exactly the basis gone upon by the latter. This vigorous means of meeting the competition has saved the retail grocer from loss, while others who simply took the sugar at a cent per pound as the criterion for the whole list lost money by it.

OLD AND NEW INDIAN TEAS.

A Calcutta paper reports that the Indian tea crop of 1894 has now been disposed of, excepting, perhaps, a few small parcels which may be in shippers' godowns awaiting shipment to the coast ports. The total shipments up to March 31st have been 1,426,647 packages, containing 125,694,329 lbs., the declared value being Rs. 73,035,305, against 124,105,376 lb. crop, 1893, and 112,002,587 lb. crop, 1892, the declared values of which were Rs. 63,950,000 and Rs. 60,925,000 respectively. The tea of 1894 crop shipped by the line steamers represents a total of 116,597,519 lbs., of which the New India Mutual line secured a little over 39 millions, or one-third of the total, and had the crop come up

to the original estimate of the Tea Association, "there is little doubt but that the India Mutual line would have considerably exceeded the original quantity allotted to them." The City line secured about 25½ millions, the Clan line about 23 millions, and the Harrison line about 11½ millions. The Peninsular and Oriental steamers appear to have lost favor amongst the shippers. The new season's tea, says Grocers' Review, Manchester, will begin to arrive in small quantities during April. The season, however, is reported to be rather a late one in some districts, which may possibly benefit tea proprietors, as it will allow the stocks in this country to be reduced to a very low point before any large quantity of the new tea can arrive on the market.

CANADIAN V. U. S. SUGAR TARIFF.

The Canadians have never been considered high protectionists, and yet they concede that 64c. per 100 pounds difference between low and high grades is not an unreasonable protection for their refiners. The present United States tariff is unjust to American sugar refiners in not conceding a greater difference between raw and refined grades, and it is to be hoped that the next Congress will make a differential at least one-quarter of a cent a pound; and this would hardly cover the difference in cost of refining here as compared with other countries.—American Grocer.

THE NEW EGG PAPER.

Can any of our contemporaries or readers supply us with the address of the journal devoted to the egg industry recently issued in the United States? The request is made in behalf of intending subscribers.

VERY VALUABLE SUGGESTIONS.

COLD STORAGE FACILITIES.

The cold storage warehouse project in Montreal is advancing toward accomplishment. A sum of \$100,000 has been subscribed and the organization of the company will be completed at an early date. Plans for a six storey building, 200 by 120 feet, have been prepared. The site, between the canal and Windmill Point wharf will be connected with the railroad, and the prospects are that Montreal will, before long, be provided with ample facilities on the most modern plan for the preservation by cold storage of the many kinds of merchandise for which such care is profitably used.

An instance of the efficiency of cold as a preservative of perishable goods was noticed last week in connection with the sale by Hart & Tuckwell at \$25 a barrel for apples kept since last fall, though of course the figure quoted would hardly be the rule if cold storage was generally made use of. In connection with the work, which the warehouse will assist in, arrangements have been made with the Grand Trunk and Canadian Pacific railways for a regular refrigerator car service on dairy product account, and also for refrigeration on Atlantic steamers. The warehouse is designed to give, on modern scientific principles, properly organized facilities for freezing or cooling perishable products

promptly and skilfully and at such temperature as will best preserve the goods and put them in proper condition for shipment.

A GROCER'S WILD RIDE.

According to advices from Victoria, B.C., Henry Saunders, the well-known grocer of that city, recently passed through an experience that he will probably remember for all time. He has just returned from Alberni, a lumber settlement on the west coast of Vancouver Island, where he went to look up some gold quartz property. Mr. Saunders was in a hurry to get home, so he took a short cut over the mountains, which were covered with snow. About half-way across he trod on a soft spot and began to sink out of sight. While he was struggling to extricate himself a huge boulder broke loose from a cliff just above him and rolled down the mountain. Everything else thereabouts began to slide just at that time, and Mr. Saunders soon discovered that he was in the track of an avalanche. It was a desperate chance, but he decided to go with the avalanche. Before he really realized what had happened he was travelling down the mountain at express train speed. He estimates that he covered four miles in less than fifteen minutes. Finally he found himself, half stunned, in the Alberni River. He swam ashore and waited for a stage from

Nanaimo to come along. The passengers he met could scarcely believe his story, but his general appearance indicated that he had been having a troublesome time. "It was a very close call," he said, "and an experience that I am not likely to forget. I had barely stepped on the soft snow when off it started, carrying me with it. I hardly knew what was happening until I found myself struggling in the icy waters of the river."

MEAT CONSUMPTION IN ENGLAND.

The British Board of Agriculture publishes some startling figures to illustrate the extraordinary growth of meat consumption in this country, remarks The Canadian Gazette, London, England. In the years 1891-2-3 the home produce was 1,423 thousands of tons, and the foreign and colonial imports were 650, making a total of 2,073 thousands of tons, as against, in 1882-3-4, 1,726 thousands of tons. The consumption per head of the population has grown from 101.4 lbs. in 1867-8-9 to 121.8 lbs. in 1891-2-3, or an increased consumption per head of the population of no less than 27 per cent. Canada's exports of meat (including live cattle and sheep) increased from £920,000 in 1873 to £1,250,000 in 1883, and £2,300,000 in 1893. The value of Canadian flocks and herds has, in the same period, risen from 33,000,000 sterling to 68,000,000, an increase of 106 per cent.

MILK AND CONSUMPTION.

NOT for years has so important a scientific verdict regarding the public health been reached as the conclusion of the British Royal Commission on Tuberculosis which has established the danger to human life from disease germs in cow's milk. It was no hurried decision. The Commission sat for four years. It examined experts and authorities on the subject. Experiments of a practical kind were made to ascertain if animals fed with beef or milk from a tuberculous cow caught the disease. The evidence and the result of the experiments coincide in attributing to tuberculous food an "appreciable amount" of this fatal and prevalent disease in man. Scientists are proverbially cautious; they say an "appreciable" proportion, but the probability is that the great majority of deaths from consumption are due to this cause.

It would not surprise us to find the verdict of this Commission shortly greeted as one of the greatest medical discoveries of modern times. Tuberculosis, popularly known as consumption, is a scourge which doctors have been unable to successfully combat. Cures have been found for all other diseases when applied in time. Consumption alone defies the highest skill and the promptest remedies. By change of climate and by unremitting effort it is staved off for years in some cases. But it is only a matter of delay. Soon or late death comes, and the strongest constitution succumbs. Consumption was long thought to be hereditary only, and therefore usually beyond medical skill. In late years, especially since Koch, the eminent German scientist, in 1882, first discovered that consumption was caused by a bacillus, or

disease germ, which actively fed upon the human system, medical men have regarded the disease as a contagious one. Two years or so ago Koch thought he had found a cure for consumption by inoculating a lymph prepared by himself. He was hailed as the deliverer of the race, but his cure has failed in its hoped-for mission.

For the present, avoidance of the danger is the best course. Cow's milk is a convenient, healthy, and palatable form of food, and only in its raw state is there any danger from disease. When cooked it is free from the active, injurious properties which communicate tuberculosis to human beings, and, as in the condensed or sterilized article we get milk in a form which keeps perfectly even in hot weather, and is carefully prepared so as to avoid even the possibility of disease, this, we may certainly assume, is the kind of milk which must soon pass into universal use.

THE CANADIAN GROCER has taken the trouble to obtain from England the particulars of this Royal Commission in its relation to milk diet, and proposes to deal with the subject in a future issue. Meantime the trade might as well adapt themselves to circumstances and profit by the change in popular demand which must now gradually come about.

THE CHURCH AND EARLY CLOSING.

WHEN the Toronto Ministerial Association decided to aid the Retail Grocers' Association in the movement for early closing, it was indirectly acting in its own interest as well as that of the petitioners.

From time to time members of the ministry are heard complaining regarding the non-attendance at the services of the different churches of large numbers of citizens both old and young, and the latter particularly.

The cause of this non-attendance is not so much a want of desire for spiritual instruction as it is the want of fresh air and recreation that is denied such a large number of merchants, clerks, etc., during the ordinary week days on account of the long hours they are compelled to labor, particularly on Saturday, when many of them can be found plying their avocation past the midnight hour.

Men who labor 12, 14 and 16 hours five days in the week and 18 hours on Saturday naturally want to lie in their beds on Sunday morning and take to the open air for the rest of the day.

Naturally, many men who fall into this groove keep along in it when the cause that placed them there no longer exists, as far as they personally are concerned, but the onus is not so much upon them as it is upon the system of which the habits they have developed is the fruit.

Therefore the ministers, in aiding the

grocers to obtain shorter hours, are indirectly helping to remove a source of much concern to themselves.

But, aside from whatever benefit might accrue to the churches themselves from a shortening of the hours of business, it is their duty to lend their aid to humanitarian as well as purely Christian movements, for the one is the twin brother of the other.

INCREASED EXPORTS OF AUSTRALIAN BUTTER.

The competition that Canadian butter will have to meet in England this season promises to be keener than ever. The Australian colonies are making even greater efforts this season to enlarge their sales of dairy produce in the British market, and as the system in the Antipodes is a bounty-fed one, the Canadian farmer has to meet an unnatural competition.

A recent telegram states that the Victorian Government has made an arrangement for a tri-weekly service to England until September next, and a fortnightly service after that date.

It is anticipated, therefore, that some 100 tons of Australian butter will be offered monthly on the English market. This is equivalent to about 40,000 packages of Canadian, or heavier receipts in one month than the entire Canadian export for a season.

The worst of it, too, is that this flood of butter will all be consigned for what it will fetch, and, of course, this gives it a certain amount of preference.

FRAUDULENT CANVASSERS.

FIRMS at home and abroad cannot be too careful in the selection of men to represent them in territory where they desire to introduce a new article or push an old one. This was made plain to THE CANADIAN GROCER in both respects a few days ago.

One was an instance where a man, representing himself to be the agent of a scouring article made in the United States, solicited orders from consumers, said orders to be turned into near by grocers to be filled. He had a book of printed forms for the purpose. How many legitimate orders he got we know not, but some of the grocers to whom he handed the orders found that they were bogus when they undertook to fill them, the consumers averring that the signature to the order was not theirs.

The other instance was similar, the only difference being that the article canvassed for was soap, the product of a Toronto factory.

Now, both articles are the products of legitimate firms, and it devolves upon the latter to look after their "representatives," if ill-repute is not to come upon their products.

SHOULD BE A GOVERNMENT SHAKE-UP.

FROM the commercial standpoint the Canadian Government is not justified in letting the union with Newfoundland go by the board. This country is spending in other ways far more money than union on better terms would cost, and not reaping in return the direct trade which would flow from free commercial intercourse with the Island. Newfoundland imports \$6,000,000 worth of goods annually; of this Canada only now supplies \$2,500,000 worth. The United States captures \$1,500,000 or more, and Great Britain between two and three millions. The bulk of the American trade would be ours. Many of the goods sent from the United Kingdom would be replaced by those of Canadian make. The colony is an exceptional case, since it imports both food products and manufactured goods.

Granted that Canada would have to pay \$5,000,000 more than she counted upon to effect the union. The interest on that amount at 3 per cent. would be \$150,000 annually, it is true, but are we not spending more than that in other directions without getting the direct trade which would necessarily follow from the union? We say necessarily because free trade between the Island and the Dominion, with a common tariff against the rest of the outside world, would force trade to the mainland now going elsewhere.

It is costing Canada \$125,000 a year to subsidize a monthly steamship service to Australia, and \$75,000 a year subsidy to the China and Japan line; in all, \$200,000 per annum. What have we reaped for this amount? Our exports in 1894 to Australia, China and Japan combined were only \$864,000, while to Newfoundland in the same year it was \$3,000,000, or, to be exact, \$2,818,592. When the link in this ocean steam service is supplied across the Atlantic at \$750,000 per year, we shall be paying nearly \$1,000,000 annually, with commercial results that are clearly not adequate to the cost. Australian trade is a pet project with Sir Mackenzie Bowell, the Premier, who has also sent a Canadian Commissioner, Mr. Larke, to reside in Sydney. If this expenditure is justified, what can be said of the statesmanship and business sagacity which lets Newfoundland—a much more valuable trade centre and one near us, with opportunities immediately realizable—slip through the fingers?

In truth, the Government require a thorough shaking up on the Newfoundland question, and the sooner the commercial community administers the dose the better.

It is quite evident that the impression among business men generally is that the Government acted unwisely in not giving this important question greater considera-

tion. Instead of being taken up on broad business principles—as it would have been had the representatives of both Governments been in closer touch with the merchants and manufacturers of both countries, who are really the parties most vitally interested—it is felt that the conferences were more the affairs of politicians who figured how the terms would affect them as such. Until there are more business men among the leaders of both parties, business affairs will always take a secondary place.

It is also hinted that had Hon. Mr. Whiteway come to Canada himself, an agreement would have been more easily reached. Mr. Bond, it is said, is still smarting under the defeat of his agreement with Mr. Blaine, and has little, if any, sympathy with Canadian union.

QUEBEC WILL TAKE IT UP.

The Quebec Board of Trade is also taking the matter in hand, for the president, P. Garneau, head of the well known wholesale dry goods house, writes THE CANADIAN GROCER.

The Council of the Quebec Board of Trade will shortly hold a special meeting, at which will be discussed the advisability of urging upon the Government the necessity of reopening negotiations with the Newfoundland Government as to their forming part of the Dominion. In the meantime I may add that I consider that Canada should at least offer the same if not better terms than were offered some years ago. Are not their fisheries, their mineral products and timber as valuable as they were then?

It would never do for the Dominion, and far less for England, to allow a foreign country to take hold of Newfoundland, as nature seems to have placed her there as the natural guardian of the St. Lawrence, which, should it fall into foreign hands, might result in a great source of trouble for England and the Dominion.

From what we have learned from other sources we know that Mr. Garneau voices the opinions of the other members of the Council, of which he is the very able chairman.

HOW THE QUESTION IS REGARDED IN NEW BRUNSWICK.

The matter has not come formally before the St. John, New Brunswick, Board of Trade, but there is a strong feeling among the business men of New Brunswick in favor of the union. W. S. Fisher, the acting president of the Board of Trade, and one of the leading wholesale merchants and manufacturers of New Brunswick, writes, expressing his wish to see Newfoundland taken in, and says:

I trust that in the near future an arrangement satisfactory to both countries may be effected. There is an opening there for a good amount of Canadian produce and manufactured goods, and we want it if it can be had on reasonable terms, as well as for other more national reasons.

NO USE STICKING OVER A FEW DOLLARS.

Mr. E. B. Osler, the well-known financier and first vice-president of the Toronto Board of Trade, when approached for an opinion, said: "Well, I really have not studied the matter closely in order to ascertain what effect it would have on the revenue. But my impression is that in matters

of this kind it is no use sticking over a few dollars. If Newfoundland is worth taking in, it is worth paying a little more money in order that the other people to the bargain may be perfectly satisfied. From what I have heard regarding Newfoundland, I think the general trade of the Island could be very largely increased if it came into the Confederation. There is no doubt about it, Newfoundland has not been developed as it ought to have been."

FAVORED FROM A NATIONAL STANDPOINT.

"From a business point of view I do not think it would be a very good bargain," said Mr. Hugh Blain, last year's president of the Toronto Board of Trade. "Looking at it, however, from a national aspect, I would favor paying the additional \$5,000,000 asked. With Newfoundland in the Confederation we would then have a territorial area larger than that of the United States with Alaska included. Then it would place within our control problems that might arise in the future in Newfoundland's dealings with the United States. We are very seriously interested in what they do, and yet, as matters now stand, we have no voice in such questions except through the Imperial authorities. If we had control of Newfoundland and Labrador there would just be Canada and the United States to discuss international questions, which would be a great advantage."

Mr. Blain would not speak positively on the financial aspect of the question. "I have really not gone into the matter," he said, "but I assume that the revenue derived by Newfoundland coming into the Confederation would not, after the cost of management had been deducted, pay interest on the debt of the Island."

BUSINESS MEN ACT.

Taking our articles as their keynote, the Council of the Montreal Board of Trade discussed the question of the union of Newfoundland with the other provinces of Canada last week. Their conclusions are exactly in a line with the suggestions made by THE CANADIAN GROCER, for they adopted the following:

Resolved,—That the Council of the Montreal Board of Trade has watched with the keenest interest and with high hopes of their successful conclusion, the negotiations between the Governments of Canada and Newfoundland for the admission of that colony as a province of the Dominion of Canada;

That the Council notes with great disappointment that these negotiations are not now likely to result in the attainment of the object in view;

That the Council considers that the terms of Confederation offered to Newfoundland by the Dominion Government seem to be equitable and even generous, and such as the Newfoundland Government might well have accepted with honor to herself and advantage to that colony;

That as those terms have not been accepted, and as the union of Newfoundland with Canada is, the Council believes, of immense consequence to the future of this country, and is the proper destiny of Newfoundland, the Dominion Government is hereby earnestly urged to endeavor by conference with the Government of Newfoundland, or possibly, as the Imperial Government is profoundly interested in the matter, by arranging a confer-

ence in London, Eng., between representatives thereof and delegates from the Canadian and Newfoundland Governments, to endeavor to consummate the union of the two countries, which the Council trusts may yet be achieved by mutual concessions.

WHAT MEN AT THE CAPITAL THINK.

The Board at Ottawa exerts quite as much influence as the much larger institutions at Montreal and Toronto. When they express an opinion they mean it, and it receives every attention. It has an energetic secretary in N. S. Garland, and a shrewd business man in its president, Joseph Kavanagh. This is what Mr. Kavanagh thinks of the Newfoundland question:

I am in accord to a great extent with the action taken by the Montreal Board of Trade. I think that it would be much to be regretted should the union of Newfoundland with the Dominion be delayed, even for a time, and not consummated before the present negotiations are completely closed. The reasons are: the geographical position on the map of the Dominion of Canada; the adding to our population of 200,000 industrious, hardy and thrifty people, who require a great deal of what we produce, and the natural products which they can give in exchange will be very valuable to Canada. I am strongly of the opinion that the Dominion Government should concede everything in reason, while not jeopardizing Canada's future interests too much, to arrive at an amicable agreement. I may add that a large majority of the members of this Board will support me in these views.

GROCERS PLAY AT WAR.

MANY are the sunburned and blistered faces that are to be seen around wholesale grocery warehouses and brokers' offices in Toronto this week. The explanation of it is that many of those who sell teas, sugars and other commodities appertaining to the grocery trade, or keep day books and ledgers relating to the same, are members of the volunteer service, and, of course, went out with their respective regiments for the holiday outing. And daily can they be seen surrounded by a group of the unfortunates who have never been trained in the arts of war, while they describe some clever tactic of this or that body of men in the sham battles or rehearse camp fire anecdotes or yarns.

Capt. Mason, who led the bicycle corps in the clever flank attack at Queenston Heights, is one of the heroes of the hour, and query after query is he plied with as to how he did it.

Mr. George Musson, an ex-member of the Queen's Own, and now Brazilian consul at Toronto, went to Niagara with his old regiment to—tell it not in Gath—gather pointers on modern military tactics for his Government in order that it may be strengthened for the next civil war that breaks out.

But of all the men with experiences, Capt. Adams, manager of Smith & Keighley's sample room in peace, and commissariat of the 48th Highlanders in time of war, had the most unique. He died—was buried with military honors—and arose again the same day. The only men who will re-

member with regret the circumstances are the captain's companions-in-arms who carried his 250lb. "dead" body a mile through Windsor town. The next time the Highlanders undertake to "bury" a companion it is safe venturing they will select a man of less avoirdupois than Capt. Adams.

NEW SEASON'S TEAS.

Samples of new season's Japan tea, ex Empress of India, arrived on the Toronto market on Tuesday morning, and before the day closed nearly all the houses along the street had inspected them. They are teas that will sell wholesale at from 32c. to 35c. per pound. The tea itself will arrive in a few days.

The cup quality of the new season's teas appears to be, on the whole, superior to last year, and the crop is conceded to be a good one.

The first of the new season's teas that arrived in New York some two weeks ago, ex City of Pekin, comprised about 300 packages. They were all on United States account, and were picked up quickly at about 35c. per pound.

The ss. Empress of India, arriving at Vancouver May 21, was the first steamer with teas for Canada, some 700 packages, against 1,600 last year.

The Japan markets are about ten days later than a year ago, while the tea is costing about 15 per cent. more. Freights are, however, reasonable, there being a good deal of competition. They are being quoted at 1c. by steamer and $\frac{3}{4}$ c. by sailing vessel, and it is thought that prices will eventually reach about the same level as last season.

The Shanghai and Foochow markets have not yet opened, but the latter is expected to open in a few days.

FRUIT IN NIAGARA DISTRICT.

Mr. Fenton, a St. Catharines packer, was in Toronto on Tuesday. When I ran against him our conversation naturally turned on the fruit situation. "There is no question," he said, in reply to a query of mine, "that the damage by frost has been severe, but how it has affected the fruit crop it is hard to say until we get some warm weather to start the growing. The opinion is that the yellow peaches, such as Crawfords, have been all killed, but the early peaches, such as Alexanders and Rivers, have escaped fairly well. Pears do not seem to have been hurt so badly, but sweet cherries and plums appear to have been pretty well destroyed. Apples it is difficult to say anything about. Some say they are damaged. The most conservative say they cannot tell until we have had a few days of warm weather. My opinion is that they are seriously injured."

A GILFORD MERCHANT'S VIEWS.

James A. Blain, of Gilford, was in Toronto a few days last week on a buying trip. Mr. Blain, besides conducting a general store, buys large quantities of grain, apples and other products of the farm. He did not think much damage had been done in his neighborhood by the frost. "The early apples have probably suffered, but I would not be sorry if they had. They are a nuisance." When he began talking about the rise in wheat, I interposed with a reference to a farmer who, after holding five crops, had sold a few weeks ago at 60c., but could now have got over 90c.

"Well," remarked Mr. Blain, as he took his cigar from his mouth, "just as the market began to advance I bought wheat from a farmer who had been holding for three years. I paid him 48c., which was really 1c. above the market, but that same wheat to-day is worth 75c."

Mr. Blain had a fairly good winter and spring trade. "You know, we are not so much affected by trade changes as you people are down here." And then he went out to hunt up his old friend, J. H. Devaney.

FANCY PRICE FOR APPLES.

Fifty dollars for two barrels of apples is a price probably never realized, even for good Canadian fruit, in the great markets of London, where prices rule high. It can be said with safety that it was never paid in Montreal before Thursday, when Mr. Walter Paul, retail grocer, gave the amount to Messrs. Hart & Tuckwell for two barrels of "Longevitys," packed last fall by Dr. Young, of Adolphustown, Ont., and kept in cold storage till the present. The apples, a large red variety, of which Dr. Young probably possesses the only grafts, were, of course, in splendid condition, and a proof of the value of the combination of good fruit and cold storage. They had been packed only in the ordinary way in barrels. Mr. Paul has them on exhibition at his store.

ANOTHER DIRECT STEAMER.

Negotiations are in progress to bring over another direct steamer cargo of Mediterranean fruit to Montreal. The proposal seems feasible. If arrangements can be made the steamer will leave Mediterranean points about the middle to end of June, arriving here a month later. There has never been a midsummer direct steamer hitherto.

PERSONAL MENTION.

F. J. Gillespie, merchant, Uptergrove, was unanimously elected vice-president of the Barrie Cheese Board, which met at Newmarket recently. Honors are falling fast upon friend Gillespie these days. First, he was elected Warden of Ontario County, then he received the nomination of the Reform party for the House of Commons, and now he is head of the Barrie Cheese Board.

TRADE CHAT.

The Port Elgin brush factory is to be sold.

The tax rate of St. Thomas, Ont., this year is ten mills.

A co-operative bakery has been established in Stratford, Ont.

An Oxford farmer has realized \$800 for apples grown on seven acres of land.

Chatham Council will vote on a by-law to make tobacco dealers take out licenses.

In one week this spring two stores in Clifford, Ont., took in about 2,000 dozen of eggs in trade.

E. D. Tillson is receiving a consignment of 5,000 bushels of No. 1 Manitoba wheat, which was bought before the recent advance.

Mr. Allen, of Norwich, Ont., has decided to go into the making of vinegar from high wines, and has fitted up suitable machinery.

Andrew Henderson, a farm laborer, got \$70 worth of goods from Beamsville merchants by false pretences and then absconded.

It is estimated that \$1,000,000 worth of butter could be made from the whey produced annually in the manufacture of cheese in New York state alone.

An agreement has been arrived at by the Postmaster-General and the Allan Line by

which the fast steamers Labrador and Vancouver will carry the mails on their sailings. The arrangement is the same as existed last year.

Extensive alterations and improvements are being made in the Ingersoll pork factory. A large new singeing apparatus is being put in, together with other improvements.

Professor Robertson, of the Experimental farm, Ottawa, lectured in the theatre of the Normal School, Toronto, on Monday afternoon, on "The Educational Advantages of Bread and Butter."

The St. Thomas Board of Trade have been requested to elect a delegate to the Third Congress of Chambers of Commerce of the Empire, to be held in London, Eng., in June, 1896.

Hart & Tuckwell, of Montreal, sold to Mr. Walter Paul, retail dealer in fruits, on Saturday, two barrels of Cooper apples at \$25 a barrel. This, it is said, is the highest price ever given or asked for apples in Canada.

Simcoe suffered by fire to the amount of \$20,000 at an early hour of the 24th. The principal losses were K. G. Spain, museum of curiosities and relics, \$1,500; Mansion House, owned by Mrs. Cairns, \$5,000; contents, owned by J. H. London, \$3,000; Chas. Sihler, \$2,000; E. E. Collins, furniture and

agricultural implements, \$1,500. The other losses will total \$5,000 or \$6,000.

Dereham and West Oxford factory sold and shipped 1,509 lbs. March cheese and 19,431 lbs. of April cheese. Salford factory sold and shipped 575 lbs. March cheese and 3,666 lbs. of April cheese. Harris street factory sold and shipped 8,044 lbs. April cheese.

Bedford, Que., had a bad scorching on the Queen's Birthday, starting in Dupuis' wheelwright's shop, and destroying P. Chaussie's tailor shop and dwelling house, Eugene Cyr's carriage house and blacksmith shop, A. Farber's bakery and dwelling house, a barber shop adjoining, and Amerault's art studio.

COFFEE CONSUMPTION IN U. K.

The Chancellor of the Exchequer, in his report on "The Budget," stated that the consumption of coffee in the United Kingdom has been steadily decreasing. In 1885-86 the revenue from it was \$1,015,000; last year it was only \$850,000, compared with \$17,500,000 derived from tea. While the population has increased by 2,500,000, or 7.8 per cent., the coffee revenue has decreased by 16 per cent. Cocoa, on the other hand, is steadily growing in consumption. In the last year there has been an increase of 3,383,000 pounds, as compared with 1893-94, and an improvement of \$70,000 in the revenue.

Wholesale Grocers

TORONTO - - ONTARIO

HAMILTON TRADE GOSSIP.

THE holiday has somewhat interfered with trade, but there is on the whole a good business still doing. As one wholesaler remarked, "trade is as good as is usual at this time of year." The tone of confidence I noted in my last has increased rather than decreased. There is no doubt about this, and small stocks and continued stiffening in prices are largely the factors upon which this confidence is based.

Demand for sugars has slackened off on account of previous free buying, but there are still a good many moving, although I find on a canvass of the trade some appear to be doing more than others in this respect. The ruling figure is $4\frac{3}{4}$ c. and I fancy it is being fairly well maintained. Yellows run from $3\frac{3}{4}$ to $3\frac{1}{2}$ c. Some of the wholesale houses have liberal supplies of yellow sugars, but the refineries are still bare of stocks.

In all descriptions of canned goods there has been a fair sorting-up trade. "I think, in anticipation of the picnic and camping season, that canned goods have been going out well and at fair prices," remarked a jobber.

Samples of new season's Japan teas to hand show very nice liquor, but prices are quoted higher than last season. "These are, of course, the first shipments, and there is not much attention being paid to them," remarked one wholesaler, and then he added: "The standards we have seen would lead us to believe that there will be none of the good values that we were offered, say last July or August."

"I am positive that the damage to fruit by frost is not half so bad as reported," said a gentleman who had been driving in the neighborhood of Hamilton. "For instance, in Dundas we are told everything was ruined. Well, I was there a few days ago, and was talking with a grower. He took me out in his orchard, and, pulling down the branch of a tree covered with blossoms,

remarked: 'People are always crying Wolf!' And for the life of me I could not see any evidence of damage."

Recent quotations for new pack salmon that have been received here from the Coast are pretty high. They were \$4.75, f. o. b. That means \$5.45 laid down here, net cash. That is the lowest quotation we have had from the Coast this spring. All retailers that can buy last season's pack at \$1.30 per doz. should go in and do so.

I saw some nice French plums in Lucas, Steele & Bristol's shipping room. They were packed in cases of 56 lbs. "They are very fine goods, and can be retailed two or three pounds for 25c.," explained a member of the firm. "They are quite equal to the goods that used to be put up in 5-lb. jars and tins, and that retailed at \$1 to \$1.10"

W. G. Dunn & Co. report a good month's trade in baking powder. "It opened up poor, but improved wonderfully toward the latter part," said a representative.

W. H. Gillard & Co.'s baseball team, which the other day defeated the nine from the F. F. Dalley Co., play a match with McPherson, Glissco & Co.'s club on June 8. The Dalley team is now awaiting an opportunity to retrieve its lost laurels.

A wagon load of goods that went out from W. H. Gillard & Co.'s warehouse one day last week weighed 1,400 pounds. "A pretty good load for two horses, wasn't it?" said a member of the firm.

The most interesting subject to Hamilton merchants at the moment is the opening of the T. H. & B. railway, the first lot of freight on which went out on Tuesday. Hamilton merchants will now be able to ship their goods much more promptly than they have hitherto been able to do.

James Turner & Co. are in receipt of samples of new sea-on's Japan tea, April

picking. "Now, isn't that a beauty," admiringly remarked a member of the firm, as he threw a sample on a sheet of paper. "You know, May picking is about the first to arrive here, as a rule, but this is a little lot of April picking which we got. It is the finest tea we ever saw, and the brokers who have seen it say so, too. We call it the 'Mountain Top' brand. We expect the goods to arrive on Monday."

French prunes in kegs at $3\frac{3}{4}$ c. per pound are being offered by James Turner & Co. "Just imagine how cheap provender is," remarked one of the men in the sample room.

James Turner & Co. are making a new broom, which is as wide at the shoulder as at the top.

The Dominion Vinegar Works, Stuart street, report that vinegar is beginning to move briskly.

Balfour & Co. have just sold the last of their stock of Trinidad sugar to a Toronto firm for manufacturing purposes. It yielded them a nice margin. W. L. E.

SUGAR CROP IN CUBA.

The Cuba crop by our figures already reaches 850,000 tons visible supply, and it will be comparatively easy to reach our former estimate of 975,000 tons now that the higher prices make it expedient to grind cane that would at low prices have held over to next crop. But the same thing tends to lessen the size of the following crop, and there is very good data now on which to form an opinion that the next Cuba crop will be at least 200,000 tons smaller than the present, without bringing in the insurrection at all, notwithstanding some of our critics may think our views pessimistic. They largely underestimated the present Cuba crop, and now overestimate the next crop, in our opinion. We have no doubt also that a serious increase of the shortage of 200,000 tons from natural causes in Cuba will be caused by the insurrection which is so much belittled by Spanish authorities.—Willett & Gray.

MARKETS AND MARKET NOTES

TORONTO MARKETS

TORONTO, May 30, 1895.

GROCERIES.

PRACTICALLY the only new feature about the market is the arrival of samples of new season's Japan teas. Business itself is not as active as it was a week or two ago, partly on account of the intervention of the holiday. Another factor which has contributed to the decrease in the general volume of trade is the continued falling off in the demand for sugar, that article now receiving but comparatively slight attention, although steady in price. Notwithstanding, however, these deterrent features about the market, the wholesalers are by no means idle. On the contrary, they are fairly busy. Canned goods, although somewhat demoralized in prices on account of certain brands being forced upon the market, are moving briskly. Valencias raisins, too, are selling rapidly, and a good deal of attention is being paid to currants. There are still a good many prunes selling. Teas are in moderate request.

CANNED GOODS.

Although, on account of damage by frosts, the season for canned vegetables is likely to be from a month to six weeks later than usual, prices are somewhat demoralized on account of the cheap brands that are being offered. Peas, corn and tomatoes are in active demand, and there are a good many fruits, such as raspberries, cherries, plums, peaches, pears and pineapples, moving. There has been a particularly marked improvement in the demand for the last named. There was a further advance last

week in the price of Chicago canned beef. The demand, while fair, is not as good as it was last week at this time. Salmon continues in fair demand at unchanged prices. Some bids have been made for futures, but no transactions are reported. We quote: Tomatoes, 85 to 90c. for choice; corn, 80 to 90c.; peas, 80 to 85c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.25 to \$1.35, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.50 to \$1.65; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Canadian canned beef, 1's, \$1.65 to \$1.75; 2's, \$2.65 to \$2.75; 6's, \$8 to \$8.25; 14's, \$18 to \$19. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

B.C. Commercial Journal: "There is a good enquiry from England where buyers' ideas are about 19s. to 19s. 6d., while canner agents anticipate that with a lessened pack this season they will realize much better figures. A large line has been purchased at 20s. for Fraser River tolls. There is nothing doing with Eastern Canadian buyers, as they believe by holding off they will do better than the present market. The holders are offering in store at Montreal a line of old pack at \$4.60 per case. They are said to be of an inferior grade, presumably Cohoes. A fourth charter has been announced, that of the Mary Jose, 625 tons, for salmon from Fraser River to U.K. by H. Bell—Irvine & Co."

COFFEES.

It is still impossible to get really good coffees, of which a good many could be

sold if they were in supply. We quote green in bags: Rio, 20 to 22c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

Tapioca is still firm, and holders recommend the present as being a good time to buy. Rice continues in fair demand. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¼ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Pepper is higher in the primary markets, but no change has been made locally. There is not much doing in spices. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

Wholesalers are at the moment engaged in disposing of their present stocks. Consequently their purchases are almost nil. The retail demand exhibits a further falling off, but there is still a moderate turnover. An improved demand all round is looked for next month. The beet market has been a little easier in London. In New York, while raws have been firmly maintained, speculators are paying slightly higher prices than the refiners for centrifugals, but yellows, on the other hand, are slightly

and TORONTO
318 St. Paul St., MONTREAL.

easier. The Canadian market is steady, particularly on yellows, which are still scarce, and bids of 1-16c. less than the ruling figure were refused. The representatives of the refineries assert that, with an improved demand, yellows may be expected to go higher. We quote the same as a week ago: Granulated, No. 1, $4\frac{3}{4}$ to $4\frac{1}{2}$ c.; do., No. 2, $\$4.25$ to $\$4.30$; yellows, $3\frac{1}{2}$ c. up; Demerara, $3\frac{1}{8}$ c.; bright, 4c.

SYRUPS.

Prices are being firmly held at the advance, but there are not many syrups either offering or wanted. We quote: Dark, 30 to 32c.; medium, 33 to 35c.; bright, 40 to 42c.

MOLASSES.

Trade continues to be of a moderate nature only. We quote: New Orleans, barrels, 30 to 32c.; half-barrels, $33\frac{1}{2}$ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

There is a moderate demand only. As noted elsewhere, samples of new season's Japan teas were received on this market on Tuesday last. The shipments are now on their way between this and Vancouver. They are teas that will sell wholesale at 32 to 35c. The Shanghai and Foochow markets will be opened in a few days. According to advices received here this week, the Hankow market is getting down to the level of last year as regards prices. Business in old season's high-class Hankow teas is about finished. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades; 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades. Stocks of lowest to medium green and black teas are scarce on the Canadian market, and it is anticipated that there will be a large business done in these when the new season's crop arrives.

DRIED FRUIT.

Valencia raisins have advanced $\frac{1}{4}$ c. within the last week in New York. There is a large demand here, and the cheap fruit is being held a little higher, jobbers now trying to get 85c. per box for what they were getting 10c. less for a week or two ago. We quote: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to $4\frac{1}{2}$ c.; selected, $5\frac{1}{2}$ to 6c.; layers, $5\frac{1}{2}$ to 6c.

Sultana raisins are a little stronger outside, but there is no change here. Business is moderate at $6\frac{1}{2}$ to 7c.

Prunes are still in good demand, principally at about 5c. per lb. We quote: "Sphinx"—"U," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "C," 85 to 90 to half kilo, $6\frac{1}{2}$ to 7c. per lb.; "B," 80 to 85 to half kilo, $6\frac{1}{2}$ to 7c. per lb.

$7\frac{1}{4}$ c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "Unicorn," 5 to $5\frac{1}{2}$ c.; Bordeaux prunes, $4\frac{1}{2}$ to $6\frac{1}{2}$ c.

Currants are a little easier in both Greece and the United States. The demand for currants is very good, several buyers having placed orders in Patras for shipment, finding it impossible to await the arrival of new fruit. We quote: Filiatras, half-bbls., 4 to $4\frac{1}{2}$ c., barrels, $4\frac{1}{4}$ c.; fine Filiatras, half-bbls., $4\frac{3}{4}$ c., barrels, $4\frac{1}{2}$ c.; Patras, $5\frac{1}{2}$ c., in cases; Casalinas, $4\frac{1}{2}$ to $5\frac{3}{4}$ c.; Vostizzas, $6\frac{1}{2}$ to 7c. in cases and half-cases.

California evaporated apricots are cleaned out of this market, but some firms have ordered fresh shipments. As we stated last week, however, the season is over. We quote according to quality: Peaches, $10\frac{1}{2}$ to $12\frac{1}{2}$ c.; apricots, $10\frac{1}{2}$ to 12c.; pears, 10 to 12c. per lb.; prunes, 9 to 10c.

Dates are quiet and unchanged at from $4\frac{1}{2}$ c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; naturals, 6 to 7c.

BUTTER AND CHEESE.

Though a lot of the old butter has been disposed of for grease purposes the market does not seem to be cleaned up yet, and prices therefor continue low even for good butter. Cable advices say that the Old Country markets are still badly demoralized, and exporters will therefore be very chary about buying unless they can purchase at very low figures. Country merchants will do well to sell their butter this year while it is fresh or they may have to undergo a similar experience to that of last year. Fresh rolls and tubs are coming in pretty freely and selling well. There is a demand for grass butter. We quote: Summer dairy and store packed—Choice, 9 to 12c.; low grade baking butter, 5 to 6c.; fresh large rolls, 10 to 12c.; pound prints, 13 to 15c. Summer creamery, 8 to 12c. Fresh creamery—Tubs, 16 to 17c.; pound prints, 17 to 18c.

Very little new cheese is being bought for export as the Old Country markets are reported demoralized. Offerings continue large, and new Canadian is a little lower in price than last week. August and September makes of Canadian cheese bring 10 to $10\frac{1}{2}$ c., and new Canadian cheese is quoted at 8 to $8\frac{1}{2}$ c. Small Stiltons bring 10 to 11c.

GREEN FRUIT.

The volume of business on the local market seems to be rapidly increasing as the weather improves and early summer vegetables and fruits come in. Oranges, lemons, pineapples and bananas remain at last week's prices. Apricots are firm and scarce, and Egyptian onions are stiffer, owing to repeated advances on the other side of the water. Early vegetables are growing cheaper, but imported strawberries retain the

prices of a week ago. We quote: Messina lemons, 360's, $\$3.75$ to $\$5$; 300's, $\$4.50$ to $\$5.25$. Oranges—Messinas, half boxes, 80's, $\$1.50$ to $\$2$; 100's, $\$1.75$ to $\$2.50$; boxes, 160's, 200's and 300's, $\$3.50$ to $\$4$; navel, $\$4$ to $\$4.75$; Messina ovals, 80's, $\$2$; California seedlings, $\$2.75$ to $\$3$; Valencias, $\$5$ to $\$6$. Bananas, $\$1.50$ to $\$2.75$ for firsts and seconds. Apples, winter fruit, $\$2.50$ to $\$4$ per bbl.; common fruit, $\$1.75$ to $\$2$. California dried fruit—Apricots, $12\frac{1}{2}$ c.; peaches, $12\frac{1}{2}$ c.; cranberries, $\$3.50$ per box. Strawberries, 14 to 15c. a quart; cocoanuts, $\$4.50$ a sack; pineapples, 8 to 17c.; green string beans, $\$2.50$ to $\$3$ per bushel crate; Egyptian onions, $\$2.25$ per sack; cucumbers, $\$2.50$ to $\$2.75$ per crate; new cabbage, $\$3$ to $\$3.50$ a crate.

COUNTRY PRODUCE.

BEANS—Choice hand-picked are higher at $\$1.70$ to $\$1.75$ per bushel.

DRIED APPLES—Are quoted at 5 to $5\frac{1}{2}$ c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: $6\frac{1}{2}$ to 7c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, $\$1$ per small crate; Valencia, $\$3.50$ to $\$4$; Egyptian, $\$2.25$ a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

MAPLE PRODUCTS—The season is about over, and the demand has fallen off also. Prices are unaltered. We quote: 7 to $7\frac{1}{2}$ c. per lb. for sugar; syrup, 60 to 65c. per wine gallon, and 75c. per imperial.

POTATOES—A little reaction for the better occurred in the potato market this week, but potatoes still bring only 45 to 50c. on the track and 50 to 55c. out of store.

EGGS—Are firm at 10 to $10\frac{1}{2}$ c. per doz.

FISH.

The market is fairly active, but no new lines of fresh fish are yet offered here. Trout and white fish are a little easier. We quote: Skinned and boned codfish, $6\frac{1}{2}$ c.; boneless fish, $3\frac{1}{2}$ to 4c.; haddock, 5 to 6c.; Labrador herring, $\$3.25$ to $\$3.50$ per half barrel and $\$5.50$ to $\$5.75$ per barrel; Newfoundland herring, $\$2.50$ per half barrel, and $\$4.50$ to $\$4.75$ per barrel; fresh water salt herring, $\$3$ per bbl.; blue-back herring, 4c.; pike, $4\frac{1}{2}$ to 5c. per lb.; flitched cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, $5\frac{1}{2}$ to 6c.; white fish, $6\frac{1}{2}$ to 7c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Georgian Bay herring, $\$2$ per 100.

PROVISIONS AND DRESSED HOGS.

CLEMES BROS. - TORONTO

\$6.25 to \$6.50 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8½c. for small lots; breakfast bacon, 11c to 11½c.; rolls, 8c. to 8½c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs. 11c.; small hams, 11 to 11½c.; pickled, 10 to 10½c.

LARD—Pure Canadian, tierces, 9c.; tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Further advances are reported. We quote: White, 94c.; red, 91 to 91½c.; goose, 75c.

OATS—Have advanced to 40½ to 41c.

BARLEY—Has jumped 5c., to 46½c.

FLOUR—Maintains the high price quoted last week, and is firmer than ever. We quote: Ontario straight roller, \$4 to \$4.10; Manitoba, \$4.40 to \$4.50; patents, \$4.60 to \$4.75.

BREAKFAST FOODS—Both oatmeal and rolled wheat have advanced sharply in sympathy with the higher prices of wheat and oats. Cornmeal is also 10c. higher. We quote: Standard oatmeal, \$4.50; rolled oats, \$4.50; rolled wheat, \$2.75 in 100 lb. barrels; cornmeal, \$3.50; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SEEDS.

The season is practically over, and no trade is being done. The jobbers' prices quoted are merely nominal. We quote: Red clover, \$6.15 to \$6.50; alsike, \$4.20 to \$6; timothy, \$2.90 to \$3.50 per bushel.

SALT.

Trade the past week has been good, dairy and other salts moving quite freely. No change in price is noted. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

HIDES, SKINS, WOOL AND TALLOW

HIDES—Are scarce and in good demand. Prices for cured are purely nominal. We quote greens thus: No. 1, 8c.; No. 2, 7c.

SHEEPSKINS—Not so plentiful, at \$1 to \$1.25, an advance of 10c. over last week.

CALFSKINS—Have advanced a cent and are in good demand. We quote 8c. for No. 1 and 6c. for No. 2.

TALLOW—Still dull. Jobbers give 5 to 5½c., and sell ½c. higher.

WOOL—The market is bare of Canadian fleece, and 19 to 20c. are the figures at which it is expected new wool will open. There are no changes in pulled wools, supers being quoted at 19 to 21c., and extras at 21 to 22c.

PETROLEUM.

Oils remain steady and firm at last week's prices. We quote, in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 17 to 18c.; carbon safety, 19 to 19½c.; Canadian water white, 19 to 19½c.; American water white, 23 to 24c.; photogene, 24 to 25c.

TORONTO MARKET NOTES.

Clemes Bros. have some choice California apricots.

Dawson & Co. are importing strawberries direct from Maryland.

John Sloan & Co. have received a carload of canned vegetables this week.

Wm. Paterson & Son report large sales of their high-class soda biscuits last week.

"Trade in Ram Lal's keeps booming up all the time," write James Turner & Co.

Wm. Paterson & Son's travelers are showing a fine line of hand-made bon-bons.

Warren Bros. & Boomer have another shipment of California apricots on the way.

McWilliam & Everist receive a fresh car of strawberries from Maryland every morning.

Warren Bros. & Boomer assert that they have the cheapest canned vegetables on the street.

Dawson & Co. are in receipt of three cars of bananas and one car of new California oranges.

T. B. Escott & Co. advise that their "Bear" brand Japan tea will arrive early this year.

The Eby, Blain Co. reports the receipt of a good many orders for Adams' root beer this week.

A large shipment of "Acme" salt went to St. John, N.B., this week from the Toronto Salt Works.

P. C. Larkin & Co. have just received a large consignment of Ceylon teas direct from Colombo.

A pure olive oil soap, "Natali" brand, is being introduced on this market by the Eby, Blain Co.

Grated pineapple in 2 lb. tins is a delicious luxury and is for sale with Lucas, Steele & Bristol.

D. Gunn, Flavell & Co. have advices that the old country butter market is still very demoralized.

James Turner & Co. report they are offering a splendidly assorted stock of Crosse & Blackwell's goods.

The Pure Gold Manufacturing Co.'s "Sweet Tomato Catsup" is ready for the market this week.

T. B. Escott & Co. report that they have a consignment of whiting to hand at greatly reduced prices.

Smith & Keighley have been advised of the shipment of their new season's Japan teas from Yokohama.

Genuine imported English malt vinegar in 25-gallon packages is now in store with Lucas, Steele & Bristol.

Clemes Bros. have in a car of early vegetables, including beans, cabbages, cucumbers, peas and tomatoes.

Rutherford, Marshall & Co. report a large increase in business since they removed to

their new quarters. They find a good sale for fresh tubs and rolls, and advise dealers to send in promptly.

Graham, McLean & Co. find that their Chesley creamery butter is giving splendid satisfaction, and growing in demand.

H. P. Eckardt & Co. have a fresh consignment of Wagner's pineapple to hand, also "Tip Top" catsup.

The Toronto Biscuit and Confectionery Co. say their rusks and macaroons have sold like hot cakes lately.

The Berlin Brush Co. is getting a large number of mail orders, especially in the line of brooms and whisks.

T. B. & C. Co.'s sodas are made from the highest grade of flour manufactured. Their sale is said to be enormous.

J. W. Lang & Co. on Tuesday received a shipment of Filiatra currants in cases and half barrels. The quality is said to be fine.

The T. B. & C. Co., put up sodas in 1 lb. packages, which is a handy size for picnics, excursions and small families.

W. H. Gillard & Co. are receiving the celebrated "Golden" finnan haddies, and can now supply their numerous customers.

A shipment of canned goods has been received by T. Kinnear & Co., which they are said to be selling below the market price.

The Eby, Blain Co. is in receipt of 150 cases of fine Patras currants; also 100 of 50-lb. cases of fine "Imperial" French plums.

James Turner & Co.'s travelers are showing samples of fancy Patnas and Japan rice, which are reported to be giving good satisfaction.

T. B. Escott & Co. report that they are showing good value in brooms. "Our No. 8, to retail at two for 25c., is a great seller," say the firm.

James Turner & Co. report large sales in their Niagara canned fruits. "The boys know when they are offered a bargain," write the firm.

The Eureka Refrigerator Co. have been placing a number of refrigerators in the west, and have lately shipped some as far east as Halifax, N.S.

Samples of new season's Japan teas were received on Tuesday by Davidson & Hay and George Musson & Co. Shipments are now on the way.

D. Gunn, Flavell & Co. say they are having a special run on sweet pickled rolls, green and smoked. These are said to be giving good satisfaction.

F. W. Fearman, Hamilton, has in stock a very fine line of "gilt edge" September and October cheese, which he is offering to the trade at very low prices.

"As we claim to do fully one-quarter of all the imports of Ceylon teas into the Dominion of Canada, we are in a position to

show a very large line of samples, and will be glad to send same on receipt of post card," remarked a member of the firm of P. C. Larkin & Co.

Samples of Hillwattee tea will be sent on application to the agents, Lucas, Steele & Bristol. Some cases now on hand contain 1 lb., ½ lb. and ¼ lb. packets.

Toronto Salt Works report that a sharp advance will take place in rock salt, an agreement as to prices having been effected between the mining companies.

W. H. Gillard & Co. wish to advise the trade that they have just received a further shipment of 500 cases of Gillard's new pickle and Gillard's new sauce, which they offer to their friends.

"Perfection Taffy," made only by the Toronto Biscuit and Confectionery Co., has been, the firm says, the greatest seller ever put on the market. Taffy is the safest candy for children, and is pronounced by the medical faculty to be wholesome.

MONTREAL MARKETS.

MONTREAL, May 30, 1895.

GROCERIES.

THERE has been a fairly active week's business in general groceries of all kinds, though the volume of it has not shown any expansion. Values, as a rule, are firm, being notably so in the case of molasses and sugar, which rule firmer, if anything. Advices from the Islands with regard to molasses state that the price there has an advancing tendency, and now stands at 16c., or 1c. higher than it was last week. Jobbers are asking more for sugar here this week, but at this writing refiners' prices are unchanged. Offers of new pack canned salmon have been made here for the first time this season at \$4.50 to \$4.60 f.o.b. on the Coast. Canned peaches are stronger, prices being from 30 to 50c. higher. Tea, dried fruit, coffee, spices and all other lines continue much as they were.

SUGAR.

The only change in the sugar market has been the advance asked by the jobbers, who now ask ½c. per lb. more than they did last week. Aside from this no material change is to note, for as stocks generally throughout the country are large, few enquiries are to note. The feeling is firm, in sympathy with advices from abroad. We quote the jobbing range: 4½c. for standard granulated and 3½ to 4c. for yellows, as to grade.

SYRUPS.

There has been no striking change in syrups. The market rules steady in tone, but demand is slow at 1¾ to 2¼c., as to quality.

MOLASSES.

The strength displayed by this product last week has been fully maintained—in fact, intensified. Cable advices continue firm, the most recent stating that holders were firm at 16c., and that the crop was almost entirely disposed of. Porto Rico stock,

THE FOAM YEAST CO., LTD. -:- TORONTO.
79 Esplanade.

in consequence, has been enquired for, and some 1,000 puncheons or so have been settled at equivalent to 33c. laid down in Montreal. Holders of prime Barbadoes are firm at 34c. for round lots, and we quote car lots at that figure; with less than car lots, 35c.

RICE.

There has been a good seasonable demand for rice this week. Advices state that a considerable advance has taken place in foreign markets for the rough and cleaned article, and that a stronger market is looked for in the near future owing to the advance in breadstuffs. We quote jobbing prices: Japan \$4.25; crystal Japan, \$4.65 to \$4.75; standard B, \$3.45; English style, \$3.30; Patna, \$4.37½ to \$5; and Carolina, \$7.50 to \$8.50.

SPICES.

There has been a limited demand for spices, and the market is quiet and steady. We quote jobbing prices as follows: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

There has only been a quiet business doing in coffees, chiefly for small lots for immediate wants. In a regular way we quote green coffee in bags as follows: Maracaibo, 21½ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 23c.; and Mocha, 29 to 34c.

TEA.

There has been no special feature in the tea market during the past week. The demand from the country for small lots continues fair, but few large sales of importance have been put through. Japans, ranging from 11 to 19c., are the goods mostly enquired for. New crop Japans have, it is said, been placed at 30c., to arrive next month. We quote: Japans, low grades, 11 to 14c.; medium, 15 to 17c.; fine, 18½ to 24c.; and choice, 25 to 31c.

DRIED FRUITS.

There is little or no activity to note in dried fruit. Values in Valencia raisins are purely nominal at a range of 2 to 5c. for off-stalk, as to grade, and layers 4 to 5½c.

Sultanas are all concentrated in the hands of one firm, and held for 6c.

California raisins are dull and unchanged; 4-crown loose muscatels, 6½ to 6¾c., and 3-crown ditto, 5½c.

The currant market rules much the same as it was. We quote: Filatras and Provincials, bbls. 3½c.; cases, 4 to 4½c.; Patras, 5 to 5½c. and Vostizzas, 7 to 7½c.

Prunes are dull but steady. We quote: 4 to 4¼c. for Bordeaux; 4¼ to 4¾c. for Bosnias, while Californias are unchanged at 8 to 9c.

Dates are featureless, with prices steady, at 3½ to 4c.

There is nothing new in dried apples, and we quote 6 to 6½c., with evaporated 6½ to 7½c., as to quality.

NUTS.

There is no change in this market. Business rules quiet. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 12 to 13c.; shelled ditto, 24 to 25c.; filberts, 6½ to 7½c.; and pecans, 8 to 10c.

CANNED GOODS.

The only new features of the week have been the offers of new pack salmon at \$4.50 to \$4.60 per case, f.o.b. on the Coast, and the sharp advance in peaches, 2 lb. tins selling at \$1.80, or an advance of 30c., and 3 lb. tins \$2.75 or an advance of 50c. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.20 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.75 per doz.; corn, 85 to 90c. per doz.; peas, 85 to 90c. per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, \$1 to \$1.10.

GREEN FRUIT.

APPLES—The apple market is quiet and steady at \$3 to \$5 per barrel.

ORANGES—No change to mention, prices being well maintained. We quote: Messinas, \$2.25 to \$4.50; ditto bloods, \$2.25 to \$5; and ditto ovals, \$2.25 to \$5, as to brand and size of package.

LEMONS—In moderate demand and steady at \$3.50 to \$4.50 per box.

BANANAS—Meet a fair enquiry at \$1.25 to \$2.50 per bunch.

PINEAPPLES—In better supply, but prices continue steady at 7 to 25c. as to grade.

COUNTRY PRODUCE

EGGS—Receipts of eggs are not excessive and with a steady demand prices are maintained at 10 to 10½c per dozen.

MAPLE PRODUCTS—Maple sugar is quiet at 6 to 7c., and syrup at 50 to 60c. per tin.

HOPS—There is no change in hops, which rule at 5 to 8c.

HONEY—Is quiet and unchanged at 12c. for comb and 7 to 9c. for extracted.

BEANS—Hand-picked beans rule steady at \$1.60 to \$1.75, and lower grades \$1.25 to \$1.50.

ONIONS, DOMESTIC—Yellow onions are firmly held at \$2.25 and red at \$1.90 to \$2 per bbl.

ONIONS, IMPORTED—Bermuda onions sell at \$2 to \$2.75 per crate, and Egyptian \$1.75 to \$2 per bag.

POTATOES—Car lots are selling here on the track at 65c. and we quote 70 to 75c. in a jobbing way.

PROVISIONS.

The demand for pork and lard on spot continues slow, and the market is quiet, with only a small jobbing business doing at steady prices. Hams and bacon are meeting with a fair demand. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

The demand for flour is good and the market fairly active and firm, with a good business doing. We quote: Winter wheat, \$5.50; spring wheat, patents, \$5.15; straight roller, \$5 to \$5.25; straight roller, bags,

\$2.35 to \$2.40; extra, \$4.30 to \$4.40; extra, bags, \$2.25 to \$2.30; Manitoba strong bakers', \$5.

The demand for feed is good and the market active and steady. We quote: Bran, \$16 to \$16.50; shorts, \$19; mouillie, \$23 to \$24.

In oatmeal business was quiet, but values are very firm. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

BUTTER.

The butter market continues dull and narrow. The only business doing is a small jobbing one in creamery at a range of 14 to 15c., according to quantity.

CHEESE.

The cheese situation is rather mixed at present. Cables received on Monday by more than one exporter do not seem to warrant the higher price paid in the country on Saturday; in fact, several shippers protested that it was impossible to get any orders to work on. Yet, the buying in the country cannot be denied, and, in addition to the sales at the boards, it is asserted that two leading firms of exporters have been considerable purchasers of cheese at other points. At the wharf also on Monday morning higher prices were paid than on last Monday. Some 1,500 cheese were offered, and they sold at 6¾ to 6½c., the outside the ruling, while a pet combination brought, it is claimed, 1-16c. per pound more than the ruling. Is it that the speculative disposition cannot be restrained even after last season's scorching; or have shippers sold some grass cheese and got to fill their orders? Reports from the country indicate that the make is quite as large as that of last year, but that the factories are sending in fewer cheese than last year. If this leads to a better cured cheese their course is a wise one.

ASHES.

The receipts for ashes continue light, for which the demand is good and values are firm. We quote: Firsts, \$4.10; seconds, \$3.75 to \$3.80, and pearls, \$5.65 per 100 lbs.

MONTREAL TRADE NOTES.

Spot prices in canned peaches have advanced from 30 to 50c. per dozen.

D. H. Rennoldson is having a good demand for "Golden" finnan haddies.

"Golden" finnan haddies are being offered to their numerous customers by Hudon & Orsali.

J. A. Matthewson & Co. find a good sale for "Golden" finnan haddies. They have just received another lot.

Sugar refiners complain that stocks of refined are still ample in second and third hands throughout the country.

No large contracts for new pack canned salmon are yet settled, so far as can be learned. The prices asked—\$4.50 to \$4.60 f.o.b. on the Coast—are considered rather steep.

The handsome new warehouse of Hudon, Hebert & Co., De Bresoles street, had a narrow escape from ignition from the Boyd-Gillies fire on Sunday morning. The big plate glass windows of the building were split by the heat, and the paint all scorched and charred.

The cargo of bananas per steamship City of Kingston was sold alongside ship. The offerings were 14,000 bunches and 400 bags of cocoanuts. The attendance of local buy-

ers was large, and Ottawa and Quebec were fairly well represented. The fruit was in good condition and the bidding was fair. The prices realized were as follows: No. 1 sold at \$1.40 to \$1.55 per bunch; No. 2 at 70 to 77½c., and No. 3 at 45 to 55c. The 400 bags of cocoanuts were all disposed of at \$3.40 per bag.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., May 30, 1895.

"THESE are the days in which merchants count up their profits and look pleased," said one merchant to THE CANADIAN GROCER. "I sold a cask of molasses at \$11 profit; 100 bbls. Manitoba at \$120 profit; 30 bbls. at \$1.80 each profit, and I have 100 bbls. in stock on which I will make \$2.50 each." Another says he is getting 60c. on oatmeal and another that he has realized from ¼ to 1c. on sugar. There are quite a number who figure their profit on stocks now held in five figures without counting in the cents. Demand along all lines except butter and cheese and smoked herring is good, and prices are firm. In flour and sugar still higher prices are expected. During the week, they, with canned peaches and molasses, have advanced.

In oil, the excitement is over, and the week shows no change, but prices remain firm as quoted: American, best burning oil, 22c.; Canadian, best, 21c.; second 17c., no charge for barrels.

SALT—Demand continues light, with fairly large stocks. No change in quotations, which are: Coarse, 50 to 55c.; fine factory filled, 95c. to \$1.10; 5-lb. bags, \$3 to \$3.25 per bbl.; 10-lb. bags, \$2.80 to \$3 per bbl.; 20-lb. boxes, 20c.; 10-lb. boxes, 12c.; cartoons, \$2 per doz.; cheese salt, bbls. bulk, \$2.70.

CANNED GOODS—Demand continues to improve. During the last week quantities of vegetables have been moving. Stocks continue light and jobbers are buyers. In salmon the price is slightly higher and very firm. In beef the price has again advanced and is held firm. The late advices of frosts in the west have caused firmness in a number of lines, particularly peaches, which have been advanced 25 cents per dozen. Quite large quantities of vegetables are canned in New Brunswick and Nova Scotia. We quote: Corn, 90c. to \$1; peas, 90 to 95c.; tomatoes, 95c. to \$1.05; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$3 to \$3.10; 1-lb. tins, \$1.70 to \$1.75; oysters, 2's, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$3 to \$3.15; 2's, \$2 to \$2.10; salmon, \$1.40 to \$1.50; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—Last week's report was a very full one, and as at this season of the year there is but little movement in dried fruit, there is but little to be said this week. Some buyers of Valencia layers find they did not buy quite low enough, as prices are off another ¼c., and holders are anxious to sell. California loose are rather firmer, though still low. Some very good samples, via New York, are shown, but though prices and quality are both satisfactory, sales are limited. Dates and prunes show but light demand. Dried apples are lower on account of the demand being light. We quote: Cleaned currants, prices in 1-lb. cartoons,

VICTORIA, B.C.

R. V. WINCH, Manager.

7½c.; bulk, 6½c.; dried apples, 5¼ to 5¾c.; evaporated apples, 8 to 8½c.; Sultana raisins, 6 to 7c.; Valencia, 4 to 4¼c.; layers, 5 to 5¼c.; London layers, \$2 to \$2.25; loose muscatels, 5 to 5¼c.; currants, bbls., 3¾ to 4c.; half-cases, 4¼ to 4½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.; Bermuda onions, \$1.60 per crate; Egyptian, 2¼ to 2½c.

GREEN FRUIT—Trade continues very large. The demand quickly takes up what strawberries are arriving, and prices are lower than quoted last week. Bananas continue firm and scarce. Large quantities are, however, being handled. Rhubarb is now cheap, and large quantities are in the market. Cucumbers are also being received from the States, but there is no active demand. Pines are being sold low, as they will not keep as well as earlier in the season. Some few good California oranges are still to be had. Lemons are firm. We quote: Pineapples, 10 to 18c.; rhubarb, 2½c.; strawberries, 12 to 15c.; Messinas, \$3.50 to \$4; bloods, \$2.20 to \$2.50; Valencias, medium, \$5; lemons, \$3 to \$4.50; bananas, \$1.75 to \$2.50.

DAIRY PRODUCE—There is little life as yet in these lines, though in eggs there has been a good demand at rather firmer prices. The season is now here when shippers of eggs should be very careful as regards the quality of those sent to market. They should be shipped promptly. In butter there are still quantities of old on the market, which is sold at offer, held creamery being as low as 14 to 15c. In cheese some few new are in the market, but most dealers have still a supply of old which they are anxious to sell. No N. B. cheese are yet in the market. It is difficult to get our factories down to Ontario prices. We quote: Old butter, dairy, 12 to 14c.; creamery, 14 to 15c.; new dairy, 15 to 17c.; rolls, 17 to 18c. Cheese, new, 9c.; old, 9½c. Eggs, 9 to 10c.

MOLASSES—This continues to be a feature in the trade. Stocks are so far short, with prices from 1 to 2c. higher than last quotations, and very firm. The trade was quite surprised to learn that one importer had two cargoes of Porto Rico, some 800 casks in all, one cargo of which is now due, and the other of which will be due the latter part of June. There are no other large quantities bought. Such stocks which have arrived here have been quickly bought up, so

that importers have at present very little on hand. We quote: Barbadoes, 34 to 35c.; new Nevis, 30 to 31c.; Porto Rico, 34 to 35c.; syrup, 33 to 35c.; St. Croix, 30 to 31c.

SUGAR—Demand is fair, but a better demand is expected shortly. Markets are rather higher and very firm, with higher prices expected. Our merchants are, with one or two exceptions, well fixed in the matter of sugar. And owing to good profits in this, as well as other lines, are doing business with good heart. We quote: Granulated, 4½ to 4¾c.; yellow, 3½ to 3¾c.; Paris lump, 5 to 5½c.; powdered, 5 to 5½c.

FISH—Demand in dry and fresh, particularly the latter, is good. Stocks are light and prices firm, with a rather upward tendency. The catches of gaspereaux and shad continue very light, with now and then a better day. Dry comes in slowly and finds a good demand. Stocks of pickled fish are not large, but the demand is light. In lobsters prices show no change, all that come to hand finding quick sale at quotations. In salmon fishermen begin to take large numbers, and soon this trade will be in full swing. Halibut is firm at quotations. Quotations on salmon are nominal, as prices will soon be lower. We quote: Halibut, 7 to 8c.; gaspereaux, 50c.; smoked, \$1 per 100; lobsters, \$6 per 100; large cod, \$4; medium, \$3.80 to \$3.90; small, \$3 to \$3.25; pollock, \$1.70; bay herring, \$1.40 to \$1.50 half-bbl.; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; shad, 12 to 13c.; smoked herring, 5½ to 6c.; Digby chickens, 10c.; salmon, 18 to 20c.

PROVISIONS—Demand fair, with prices firm at quotations, beef being particularly firm at the advance. We quote: Clear pork, \$18 to \$18.50; mess, \$16.50 to \$17; beef, \$14.50 to \$15; pure lard, 9 to 10½c.; hams, 11 to 12c.; compound lard, 8 to 9c.; rolls, 9 to 9½c.; cottolene, 9¼ to 9¾c.

FLOUR, FEED AND SEED—In all lines except feed, which is very scarce, prices are higher. Markets are very firm, and higher prices are looked for. Some flour held in this city is paying up to 100 per cent. profit, and except a few merchants who are well stocked in flour, retailers are active buyers. Oatmeal and oats are higher. There are no New Brunswick oats offering, but some are being offered from P.E.I. at rather better prices than Ontario. Cornmeal is firm-

Only the choicest roots, barks, herbs, etc., are used in the preparation of

Hires' Rootbeer

T. J. COOKE & CO.

Wholesale Agents, Toronto.

er at 10 to 15c advance. Beans show no change. In hay the market is very dull and it is a question what will be done with stocks still in first hands. Bran is rather easier. We quote: Manitoba, \$5.60 to \$5.75; best Ontario, \$5.25 to \$5.50; medium, \$5.10 to \$5.25; oatmeal, \$4.35 to \$4.40; cornmeal, \$3.05 to \$3.10; middlings, \$24 to \$25 on track; bran, \$21 to \$22; handpicked beans, \$1.90; prime, \$1.75 to \$1.80; oats, local, on track, 44 to 45c.; Ontario, 47 to 48c.; hay, \$8.50 to \$9; pot barley, \$4.15 to \$4.20; round peas, \$3.75 to \$3.90; split, \$3.70 to \$3.90; American timothy seed, \$3.15 to

\$3.30; Canadian, \$3.25 to \$3.40; red clover, 11½ to 12c; alsike, 11½ to 13c.; P.E.I. oats, 46 to 47c. With American wheat and flour higher it looks like very firm prices.

ST. JOHN MARKET NOTES.

Woodstock reports large quantities of butter still in farmers' hands, which will have to be sold at best offer, which at best will be much below prices which they might have got. In maple sugar, the season for which is about closed, the output has been small. But there is maple sugar and maple sugar. Hay is dull. Prices quoted are: Butter, old, 11c., new, 14c.; hay, \$5.50 to \$6; oats, of which there is small quantity, 38 to 40c.; maple sugar, 10c.; seed oats, 45 to 50c.

Our local tanners report good profits on held stocks up to 100 per cent., with good demand, and after rather quiet business for some time are feeling in much better spirits.

Carleton County is expecting a much larger output of cheese this season than last. The output last season was about 175 tons, while it is expected this season to reach 250. There are some thirteen factories which have already begun running.

THE CANADIAN GROCER regrets to have to report the death of C. Fred. Stewart, of St. Stephen. He was one of the most popular commercial travelers coming into the city. Though travelling for the cigar house of J. Bruce Payne, he was neither a user of tobacco or liquor. At one time he was in the candy business with W. Thieckens, under the name of Stewart & Co. He was unmarried. His death, at the early age of 36, is regretted by many friends, who will long remember his kind and genial friendship.

It caused much surprise to see a good brick building, with stone front, being taken down when so many poorer buildings are left standing. The cause was to make room for a more modern building to be put up by Dr. James Walker. It is understood it will be occupied by one of our local fruit dealers.

Word has been received from the Hon. John Costigan to the effect that oysters legally taken during the open season, may be sold during the close season.

Messrs. C. & E. Macmichael continue to receive weekly consignments of Paterson's biscuits, which grow more popular from week to week.

Reports from Nova Scotia and Prince Edward Island are that the cheese factories are now all at work and that large outputs are expected.

The following changes are noted in the fishery regulations: (1) The river fishermen may fish up to 6 o'clock Saturday nights; also St. John Harbor fishermen. (2) Between St. John and Jemseg deeper nets are allowed. This includes the Kennebecosis.

During 1893 the fog whistle at Halifax blew 1,232 hours; at St. John, 1,013. During 1894, at Halifax, 1,458 hours; at St. John, 1,131. What has Halifax to say?

Northrup & Co. say: "Every week orders from new customers are being received for the Golden Finnan Haddies," and naturally think that "quality tells."

THAT FLY PAPER CASE AGAIN.

The United States Circuit Court of Appeals of Boston has granted O. & W. Thum Co., a rehearing on each of the seven points asked for in their suit against Boston parties who imitated the salient features of their "Tanglefoot."

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, May 30, 1895.

THERE is a decided improvement in trade all along the line. Travelers report business brisk throughout this province and Prince Edward Island. Flour, corn, meal, oats and mill feeds are the interesting lines just now. Cornmeal is worth \$3, landed here; oats are slightly higher. Oatmeal and rolled oats are not up in this market in proportion to other markets. Oats are selling for 46c and there is no margin at that figure. Mill feeds are scarce and firm. Bran is costing \$20 and upwards in bags, and middlings, \$23 and upwards.

FLOUR—The market is strong and higher in sympathy with the trade in general. Enquiries are being received freely from country districts. Anything like a good family article is worth \$5. Quotations to-day are: Hungarian patent, Manitoban, \$5.40 to \$5.50; Manitoba strong bakers', \$5.30 to \$5.40; Canadian pastry, \$5.25 to \$5.35; 75 p.c. roller patents, \$5.15 to \$5.25; 80 p.c. do., \$5 to \$5.10; 90 p.c. do., \$4.90 to \$5; straight, \$4.75 to \$4.85; extra, \$4.50 to \$4.60.

MOLASSES—The demand for molasses is not heavy, and quotations remain: Porto Rico, 32 to 35c.; Trinidad, 30c.; Barbadoes, 34c.; Demerara, M.R. brand, 39c.; St. Kitts, 28c.

HIDES—There is a good demand for green hides, at 5 and 6c.

SUGARS—The demand for sugars at the refinery is slow for new business, but large deliveries are being made on contracts. There is no change in prices, granulated being quoted at 4¼c. and yellows from 3¾ to 3¼c.

GREEN FRUIT—The green fruit market to-day was very good. Oranges remain at about last week's figures, with the market well supplied. Lemons are scarce, and higher in price in consequence, being quoted to-day at \$4.50 to \$5. Pineapples are quoted from \$2 to \$2.25. The arrivals to-day were of very poor quality, about half being spotted. Bananas continue high, being quoted at \$2 to \$2.75.

POTATOES—The potato market is draggy and prices are low, 38c. being a fair quotation.

EGGS—If the P. E. Island dealers wish to hold this market, they must send better stocks and not cullings. Prices are away down, dealers not being able to secure 9c. to-day.

BUTTER—The butter market is more depressed than ever. Best native in large tubs is quoted at 16c., and in small tubs at 17 to 18c., which are outside figures. A recent shipment to Newfoundland netted 5c. for tub and 13c. for creamery.

PROVISIONS—There is no advance in beef. Native is quoted at \$9 to \$9.30 for extra, and Canadian (dressed) at 7 to 7½c. Mutton is higher, native being worth 10c. and Canadian 8c. Spring lambs are lower, being sold at \$3.50 to \$4. Veal is a little sharper, being quoted at 4 to 4½c. Dressed pork is a little higher, being quoted at 7½c. for Canadian. There is no native or P.E.I. offering. Hams and rolled bacon have advanced, hams being worth 10¼c. and bacon 8¼c.

ONIONS—This line is a little stiffer at \$2.25 per crate.

CABBAGES—American cabbages are plentiful at \$3 per barrel.

BEANS—American string beans, received to day, are worth \$2.50 per basket.

PEAS—American string peas are beginning to come in freely and sell at \$2.50 per basket.

FISHSTUFFS—New cod are coming along very freely and buyers are not anxious to take hold, as old stocks are still large and moving slowly. As would naturally be expected under such circumstances, prices are ruling very low. As the bulk of the Newfoundland shore catch will come to this market this season, a scarcity of fish is not anticipated at any time. The market is still over supplied with herring. Alewives are arriving in fair quantities. Grocery fish are not in great demand. Quotations, tol. quol., are: Dry cod, shore, prime, \$2 to \$3; do., small bank, \$4 to \$4.75; do., large, do., \$3.75; haddock, Cape Breton, \$1.75 to \$2; pollock, \$1.75 to \$2; herring, Bay of Islands, split, No. 1, \$1.50; Alewives, No. 1, \$2.50

LATE BUSINESS CHANGES.

J. F. Davis, baker, Fonthill, Ont., advertises his business for sale.—J. E. Moore, general store, Ruthven, Ont., has assigned to C. B. Armstrong.—There is a demand of assignment in the case of J. B. Derochers, grocer, Montreal.—L. P. Forest & Co., grocers, Montreal, have dissolved.—E. D. Fontaine is commencing a confectionery business at Montreal.—Arthur Talbot has started butter-making at Trois Saumons,

L'Islet County, Que.—Philius Cote is starting business as a general storekeeper at Stoctane, Rimouski County, Que.—The stock of Joseph Pelletier & Fils, general store, St. Jean Port, Joli L'Islet County, Que., has been sold at 49c. on the dollar.—Sarah Desbecquets, wife of Ferdinand Beauchamp, fruit dealer, Quebec, has been registered proprietor of Mde. F. Beauchamp's fruit business.—R. S. Grogan and James Huston, who keep general stores at Beinfait and Manitou, Man., respectively, are going out of business.

FIRST SHIPMENT OVER T., H. & B.

From a commercial point of view, unquestionably the most important event that has occurred in Hamilton for many years has been the opening of the Toronto, Hamilton and Buffalo Railway for passenger and freight traffic. The line at present is completed from Hamilton to Waterford, a point on the Michigan Central, providing increased shipping facilities for Hamilton merchants and connecting them with all the Lake Shore points from Niagara Falls to Amherstburg on the Canada Southern system.

The first shipment of freight out of Hamilton was made on Tuesday last by W. H. Gillard & Co., wholesale grocers, and comprised upwards of two carloads of groceries for points on the Michigan Central Railway.

Precisely at 10 o'clock the cartage agent of the company, Major Armstrong, had four

of his handsome new lorries, drawn by gaily decorated horses, line up at the warehouse of W. H. Gillard & Co., and, after loading, a photograph was taken of what will be handed down in history as the first shipment of freight from the city of Hamilton over the Toronto, Hamilton and Buffalo system.

W. H. Gillard & Co. have, from the first, strenuously and persistently advocated the building of this line in the face of very severe criticism and opposition, and it must be a cause of great congratulation to that firm that time has vindicated the soundness of their judgment in promoting this important additional railway service.

The shipment, which left Hamilton at 5:15 p.m., arrived at Ridgetown at 6 a.m. Hitherto it has taken two or more days to reach this point from Hamilton. This evidence of prompt despatch should be an influencing factor in increasing the trade of Hamilton merchants with their friends on the Michigan Central system

MOLASSES AGITATED.

Molasses was excited in Montreal on Wednesday.

A thousand puncheons of Porto Rico sold at 33c. laid down, and 35c. was refused for round lots of Barbadoes, holders wanting 36c.

By the end of the week an advance of 2c. per gallon is expected.

PURE GOLD MFG. CO.

TAKING CARE OF CUSTOMERS.

THIS is the time of the year, writes Jacob Furth, in *The Interstate Grocer*, when the practice of taking care of their customers by salesmen reaches its climax and becomes a nuisance well-nigh unbearable. The system applies principally to sugar, and is made use of by very many salesmen to the utter disregard of the interest of their house and at the risk of their character and self-respect. The practice of taking care of a customer is well enough in its way, and is a laudable one when carried on with a view of doing equal justice to buyer and seller. To take care of a customer means to advise him promptly not only as to changes that have taken place, but as to the probable changes of the market. To give him all the information that may be in our possession, to advise him if necessary or if he so asks, is the province of all who value their customers, and who have a personal interest in the success of the retailer. To go beyond that means treachery to the employer. To take care of a customer by simply holding an order in abeyance to be entered after the market has advanced means to rob the jobber of money that is rightfully his own. It is doing business on the theory of "heads you win, tails I lose." The proper way to do is to keep your friends posted and then let them take the chances on the market and let them act

in accordance with the dictates of their own judgment, if they have any.

To entice a salesman into this practice is to act dishonestly and is an act of cowardice. To do this is an act of treachery and perfidy on the part of the salesman and means the loss of respect of the employer as well as of self-respect. No honest man who thinks would ask a salesman to do this, no honest salesman who thinks would be a party to such a bargain when once its enormity and iniquity is explained to him. Take care of your customers by all the honorable and legitimate means at your command; take care of yourself and of your honor by abstaining from practices that bear the stamp of meanness on their face and that must reduce you in the estimation of your customers as well as of yourself.

When goods go up, the man who risks his money is entitled to make the advance. He who is too cowardly to invest in five or ten barrels of sugar can take his chances on the market and buy from hand to mouth as he may need the goods, but he is not entitled to reap the benefit of the jobber's investment and brains. This is particularly true when handling sugar. The goods are sold for cost and even below cost; why, then, when there is a change in the market should the jobber not receive the benefits thereof? By what process of reasoning, by virtue of what right is anyone entitled to

reap the benefit of speculation when he has not a cent at stake or risk? This taking care of customers on the part of salesmen has developed to such an alarming extent as to break of its own weight, and will in the end carry with it in its downfall the name, fame and reputation of all salesmen who are a party thereto.

LIGHTBOUND, RALSTON'S STOCK.

Quite a round lot of the goods of the firm of Lightbound, Ralston & Co., in liquidation, were turned over on Thursday of last week. Carter, Galbraith & Co. on that day closed a purchase of stock worth in the vicinity of \$10,000 or so, at, it is said, 75c. on the dollar.

The stock in question was the goods not reserved by the banks, and the figure realized is generally considered by the trade to be a very good one.

This sale yet leaves, it is understood, some \$60,000 to \$70,000 worth of stock to realize upon; and this is being done by Mr. Lightbound, who has been appointed liquidator by the banks.

FRUIT CROPS IN CALIFORNIA.

The Grocer and Country Merchant, of San Francisco, states that there will be a big crop of California peaches, a smallish one of apricots, a fair one, on the average, of prunes, and it would be an extraordinary stroke of good luck if there were anything but an over-supply of raisins.

PREVENTION OF SEA-SICKNESS.

ANYTHING that is calculated to relieve the minds of those who look forward to a sea voyage with absolute horror and dread must be considered in the light of a boon to the traveling community. It is true that almost every imaginable remedy has been suggested for the malady of sea-sickness—chiefly narcotics, it may be said—and some persons never can overcome it. In most cases it lasts three or four days, and then the nervous system gets accustomed to the motion, and the symptoms disappear. The most effective preventive, says The Family Doctor, appears to be the prone position, and the application of ice bags to the spine and back of the head. When there is much pain, after the stomach has been cleared, a few drops of laudanum may be taken, or an opium plaster may be applied over the region of the stomach. Persons about to proceed to sea should put their stomachs and bowels in proper order by the use of mild aperients, and even an emetic, if required, when it will generally be found that a glass of warm and weak brandy and water, to which 15 or 20 drops of laudanum, or, still better, one or two drops of creosote, have been added, will effectually prevent any disposition to sea-sickness, provided the bowels be attended to, and excess in eating and drinking be at

the same time avoided. A spoonful of crushed ice in a wineglassful of water, or weak brandy and water, will afford relief when all other means fail. Smoking at sea is very apt to induce sickness. It has been asserted by a well-known medical authority that drawing in the breath as the vessel descends, and exhaling it as it ascends on the billows, by preventing the movements of the diaphragm acting abnormally on the phrenetic nerves, prevents sea-sickness. Mr. Atkinson, at one of the meetings of the British Medical Association, observed that if a person seated on board ship, holding a tumbler filled with water in his hand, makes an effort to prevent the water running over, at the same time allowing not merely his arm but also his whole body to participate in the movements, he will find that this has the effect of preventing the giddiness and nausea that the rolling and tossing of the vessel have a tendency to produce in inexperienced travelers. If a person is suffering from sickness at the commencement of his experiment, as soon as he grasps the glass of liquid in his hand, and suffers his arm to take its course and go through the movements alluded to, he feels as if he were performing them of his own free will, and the nausea abates immediately, and very soon ceases entirely, and does not return so long as he suffers his arm and body to assume the postures into which they seem

to be drawn. Should he, however, resist the free course of his hand, he instantly feels a thrill of pain, of a peculiarly stunning kind, shoot through his head, and experiences a sense of dizziness and returning nausea. A Vienna physician has given it as his opinion that an ordinary dose of of chloral hydrate is an unfailing remedy for sea-sickness. In various cases recorded by him it seems to have been of the greatest service even during long sea voyages, ensuring a good night's rest, arresting violent sickness when it has set in, and preventing its return.

A COSTLY EXPERIENCE.

A grocer of Malden, Mass., had, according to The New England Grocer, a bill of \$9.86 which he could not collect, so he entrusted the job to a Boston lawyer. The lawyer failed to collect the bill, but he managed to run up a bill of \$61.15 against his client. The client refused to pay this amount, and the lawyer sued him, necessitating his hiring another lawyer to defend the suit in court. How much the last counsel will charge for his services is not stated, but no doubt it would have been money in the grocer's pocket had he sent a receipted bill for \$9.86 to his debtor in the first place, with 14 cents in cash to make up an even \$10. The lawyer didn't get his \$61.15—the judge awarded him some \$10. But 'twas a costly experience. It's quite often the same way with collection agencies. It costs more to collect of them than it would of the original party.

"Canadian Safety" Matches . . .

Attractively and safely put up in small sliding boxes to carry in the pocket. These light only on the box, and are fully equal in quality to the imported article.

In 5 gross cases.

"Safety" Matches

In patent boxes, which serve also as match safes, being made to hang on the wall; adapted specially to hotels. The man who takes matches by the handful gets left here as "safetys" light only on the box.

In 1 gross cases.

"Favorite" Matches

Small parlor matches with blue heads, in compact sliding boxes; entirely safe from ignition by accident; a fit companion to a pipe and package of tobacco.

In 5 gross cases.

"Beaver" Matches

Parlor matches in a sliding box for house use; these are an improvement on the old parlor—ignite very readily and do not glow when flame is extinguished.

In 1 gross cases.

All these matches present the unique feature of immediately becoming cold and dead when the flame is extinguished, thereby precluding all danger from fire by "droppings" or live embers.

The above brands of matches are all absolutely odorless, no sulphurous compound being used in their manufacture.

We are sole makers in Canada, and these matches are fully equal to any of foreign make.

VACUUM DOES THE BUSINESS.

A GERMAN invention for sealing preserved fruits, vegetables and fish has been introduced into the California canning industry and it is believed will work an important revolution in the trade. Its principal effect will be the substitution of glass jars for the cans, though the new system is adapted for each.

It is a simple tin cap, which is held in position by the exhaustion of the air in the can or glass. So firm is its hold that it cannot be removed by force without breaking the receptacle, but punctured with a knife or other instrument it is lifted off with perfect ease. The invention is known as the vacuum perfection jar. It has been in use in Germany for several years and more recently has been adopted by Crosse & Blackwell, of London. Its introduction here is due to the San Jose Fruit Packing Company, which sent an agent to Europe to examine the invention, with the result that it purchased the right for the United States. If on trial it is found to work well it will mean the substitution of glass jars for cans in this country.

This in itself would mean a great deal to this country, as every year we import nearly \$40,000,000 worth of tin plate from abroad. Nine-tenths of the tin is employed for canning purposes, and the cans once opened serve only for waste. Glass jars, on the other hand, are manufactured at home, and, after being used, may be added to the permanent stores of the house wife.

After the jar has been filled with fruit or vegetables the tin cap is placed over the orifice, and is held in place by a steel spring that can serve its purpose for years. The jar is then placed in a retort, and as the air expands the cap is pushed up sufficiently to allow the escape of the steam. When the cooking operation is complete, if any air remains in the jars it is extracted by an air pump. By this means a perfect vacuum is obtained. The retort is then opened, and as the atmosphere from the outside rushes in it causes the cap to close down firmly on the valved necked jar that it cannot be removed except as stated, by puncture through the cap, thereby destroying the vacuum, or the air pressure from outside. It is a case of suction, and is simplicity itself. By the new invention the expense, annoyance, damage and danger from soldering are done away, and the trouble of opening the tin cans with a knife or cutter is abolished. Instead, the fruit is preserved in more perfect shape, and when glass jars are employed is presented in more presentable form than under the present method. A great saving in the time of putting up the fruit, vegetables, fish, etc., is also claimed for the new device. The concern which has purchased the patent for this country uses 5,000,000 tin cans annually, and this season

proposes to do away with them entirely, and such may be the ultimate result with nearly all of the 50,000,000 tin cans used on this coast every year. It has entered into arrangements with the San Francisco and Pacific Glass Works to supply as many jars of the necessary pattern as it can turn out. The remainder will be ordered at Pittsburgh, Pa., but with the demand on this coast for glass jars it is believed that other glass plants will spring into existence, and that the home supply will come to meet all of the needs. Fruit men generally are taking great interest in the new device, which it is believed will come into general use.—San Francisco Examiner.

BRITAIN'S CHEESE IMPORTS.

To what colossal figures, remarks The Canadian Gazette, London, England, the import trade of the United Kingdom in dairy products has attained! Of cheese, butter, and margarine, close upon 6 million cwt., of the value of 22 millions sterling,

were imported in 1894, and that represents an increased value of 3½ millions sterling as compared with 1890. There has been no check to the progressive increase in the quantity of butter imported during the five years, and though such is not the case with either of the two other products, yet last year's import of cheese is the largest of the series, whilst the import of margarine was greater in the last than in the first of the five years concerned. The aggregate value steadily increased year by year. To the imports of butter in 1894 Denmark contributed 43 per cent., France 16 per cent., Sweden 10 per cent., and all other countries about 30 per cent. Canada is simply nowhere in the comparison. The margarine trade is almost monopolised by Holland, which sent us 93 per cent. of the total import of this article. Of the imported cheese Canada supplied 50 per cent., the United States 30 per cent., and Holland 13 per cent., leaving a balance of only 7 per cent. from all other sources.

DOMINION COUNTER SCALE

With Patent Automatic Scoop Balance

Simple in construction. Nothing complicated or liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long, 11 in. wide.

Nickel-plated Beam, Poises and Scoop Balance. Double Beam, marked on both sides. The Automatic Scoop Balance is now offered for the first time, and every grocer who uses it will find it a great saving in time, and it will also obviate liability to error. When scoop is placed on the platform, the ball on back end of beam automatically rolls to the right, thus balancing scale with scoop on, and when scoop is taken off scale, the ball rolls to the left, balancing scale without scoop. Scale with this latest device is assuredly the most complete and desirable scale for general use in the market.

ANOTHER MODERN STORE.

THE past few years have been notable for a marked improvement in the standard of style in Canadian retail grocery stores. Both as regards exterior appearance and interior arrangement the shops where the public buy their provisions and groceries are a distinct advance on those of a short time ago. And only lately another addition has been made to the list of modern grocery establishments which Canada boasts.

On May 1, M. S. Bradt & Co., of Hamilton, Ont., threw open their splendid new store at 133 and 135 King street east. In response to printed invitations previously sent out, the matrons and daughters of the city, and many business men besides, turned out to the opening, which assumed the form of a food exhibit.

The interior arrangements of the store are excellent, and advantage is taken of every facility afforded by the establishment for the display of goods. The great rows of shelves, running down either side of the big place, are laden with household necessities, and the counters fairly groan with the weights of fruit, both green and canned, which they carry.

On the opening day the shelving was draped with graceful festoons of plush, while beautiful tropical plants and potted flowers in bloom, peeping out here and there from the bright fresh stock, lent a charm to the scene. From the elegantly carved ceiling to the polished and shining floor, every portion of the establishment was attractive.

Souvenirs were given to all visitors, and every little girl who turned out carried off a toy broom.

On the whole, the display was a splendid one and well worthy of the enterprising firm who made it.

The house is supplied with every modern convenience, and to show the volume of business which the firm are handling it need only be stated that it takes five horses to deliver the orders they are given.

We give herewith a cut showing the handsome interior of M. S. Bradt & Co.'s store.

From this picture it can readily be seen that the establishment is exceptionally well lighted, excellently appointed, and tastefully embellished. The up-to-date grocer will also recognise the master hand in the arrangement of the goods displayed.

THE CONSUMPTION OF COCOA.

The British House of Commons recently appointed a committee to enquire into the efficiency of the Food and Drugs Act. One of the witnesses examined the other day was Mr. Fry, a member of the cocoa-manufacturing firm of that name. His evidence was of interest to grocers generally, and we herewith give a summary of it:

In reply to questions he stated that in 20

was not done for the purpose of making additional profit. As a rule, the manufacturer would prefer to sell pure cocoa if he could find a market for it. It would be the article, as a rule, on which the larger profit would be made. He was of opinion that the cocoa was, by the addition of arrowroot, rendered more digestible as an article of food. He thought the question between mixed and unmixed cocoa was not one of adulteration or of honesty, but simply one of the public demand. He did not remember a single customer who had complained of being misled or deceived by the combined article. Each label on the packets they sent out of mixed cocoa bore a distinct declaration that it contained other ingredients than cocoa.

They guaranteed them as wholesome, but they did not distinguish the ingredients. He did not see any reason or necessity why they should be called upon to distinguish the ingredients. It might be the case that there would be an easy way of dealing fraudulently by increasing the proportions of their ingredients. He did not think they should be required to put the proportions on the labels. He did not see there was any more reason to compel them to do so than there was the vendors

INTERIOR OF M. S. BRADT & CO.'S STORE, HAMILTON.

years the consumption of cocoa had increased from 8,300,000 pounds to 22,000,000 odd pounds. Cocoa nibs were only used to a small extent; the cocoa was used in its manufactured form almost entirely. Pure cocoa, or cocoa essence, was largely sold for domestic use. The ordinary cocoa of commerce was an article that did not contain all pure cocoa, but had certain ingredients mixed with it. In such an article as he produced a sample of there would be 50 per cent. of ground cocoa nibs, 25 per cent. of arrowroot, and 25 per cent. of added sugar. He considered that the arrowroot or other farinaceous subject employed to some extent took the place of milk. The addition of these articles in the manufactured product did not in any way constitute adulteration. He regarded it simply as a means of preparing cocoa for use, and it

of other kinds of articles of food. It was rather a different thing with coffee and chicory. He did not make any reflections whatever, but in the one case the mixture was made by the manufacturer, and in the other it was generally made by the grocer. The analyses of the same cocoa had in their experience varied considerably. It might be due to want of accuracy on the part of analysts in some cases. He objected to the arrowroot which was mixed with the cocoa being called starch. It produced a prejudice in the mind of the public, who at once thought of washing starch. It was no more fair to call it starch than it was to describe the gelatine used in making blanc mange as glue. Chemically cocoa contained about 50 per cent. of oil or butter. They extracted about 33 per cent. The extraction of the oil was a comparative innovation. He heard of it first in France. The object was to obtain the cocoa butter for the purpose of chocolate creams.

ALWAYS "WINDSOR SALT"

FOR
FARM
AND
DAIRY
USE

Grocers will find that $\frac{1}{4}$ sacks (50 lbs.) of

WINDSOR DAIRY SALT

Will give buttermakers better satisfaction than any other brand, because of its purity, evenness of crystal and freedom from taint. A good selling size is our 15 bags per barrel (280 lbs. net.) These can be ordered in any quantity from any wholesale grocer in Canada.

CARE IN BUYING EGGS.

There are few things used in food that vary more in quality than eggs do, and, therefore, there are few things that require more care in buying, says an exchange. The ordinary grocery store exercises no care at all in selecting its eggs, excepting in the matter of cheapness, which means that the eggs sold at such places not only will not produce a dish of delicious flavor, but that many eggs procured there are not fit for human food. But, stopping far short of such an extreme as the disgusting experience of breaking a bad egg, there is a whole world of difference in eggs generally counted as good. Nor should we stop in our carefulness in the selecting of eggs to be used for boiling, as if anything were good enough in the shape of an egg, for other purposes, where high seasoning is often relied upon to conceal staleness. For example, how is any skill going to make a palatable salad out of stale eggs? So delicate is the flavor of pure olive oil, and so essential to the salad is it that all this delicacy of flavor be retained, that only the freshest egg is fit to use for such a purpose. Nor is a sound egg and a fresh egg exchangeable terms. The flavor of the egg undergoes great change in a few days after it is laid. And many a dish that otherwise would tickle the fastidious palate of a modern Lucullus, turns out hardly fit for a gluttonish stomach; and all because the eggs that went into its preparation were not strictly fresh.

Buy your eggs at stores that have repute for carefulness in furnishing these goods of the highest grade in the market. There is no department of your store to which more skill and care should be directed than to the egg department.

JAVA COFFEE.

The British Consul at Batavia reports that the cultivation of the Liberian bean, both in Mid and West Java, is rapidly increasing, and the satisfactory results obtained from its introduction become year by year more apparent as the principal difficulties attending the preparation of this coffee for the market are gradually being successfully surmounted. As a result, a marked improvement in the appearance and quality of coffee is noted, and its favor is becoming more and more assured. The continued recurrence of the so-called "leaf" disease in the Java coffee on low-lying lands, from which the Liberia still preserves comparative—though by no means entire—immunity, causes more confidence to be felt in the latter, and many lands which have suffered most severely from the ravages of this disease in the Arabian plant are being replaced with Liberia. It has been decided to give up the Government cultivation of coffee in the Krawang Residency, and on January 1, 1895, the law rendering the delivery in that district to Government obligatory was repealed.

Adams'
TUTTI FRUTTI

Recommended by the very highest medical authorities as a wonderful aid to digestion. Allays thirst in warm weather. The public call for it. Send for beautiful advertising matter to decorate your window.

STANDARD COUNTER SCALE

To operate, you pull down the curved handle on the left, and set the scale at the required price per pound, as quickly and easily as you can set an ordinary poise. Then proceed in exactly the same manner as ordinary scales. The figures on the upper part of the beam represent so many dollars and cents, showing the value of the article being weighed.

For price lists and further particulars write

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, JUNE 7, 1895

(\$2.00 per Year) No. 23

DROPS FROM THE EDITOR'S PEN.

Clean hands, figuratively as well as literally, should every clerk possess.

* * *

Enervating weather is no excuse for dirty stores or ill-displayed windows.

* * *

It was gall and wormwood, and not money, that was in wheat until recently.

* * *

Business is a pleasure as long as the merchant is master of it and not slave to it.

* * *

When a Toronto retailer can pay \$26.50 for a barrel of apples he cannot be Barron of funds.

* * *

Advertising is like everything else: If it is only half done, a full fruitage cannot be expected.

* * *

The man that does not believe good times are returning should see a physician, and at once.

* * *

There are business dyspeptics as well as physical dyspeptics, and the one, like the other, is never well.

* * *

Summer is a little too exuberant for our comfort at being released from the clasp of an unseasonable spring.

* * *

"Trade moves," remarks a contemporary. It does when business men put their shoulder to the wheel.

* * *

It is possible to drive business with antiquated methods; it is also possible to drive a nail with a broomstick.

* * *

A Pittsburg grocer has adopted a diamond as his trade mark. It does not mean, we hope, that he is a "cutter."

* * *

There is one thing the frost recently did besides killing fruit: it released the tongues

of a good many who fancied it paid better to lie than tell the truth regarding damage done by it.

* * *

The merchant who is unjust to his clerks is usually unjust to everybody else — his customers and himself included.

* * *

Clerks who exercise not their brains will not be required to exercise responsibility, if that is any consolation to them.

* * *

"I can get along alone now that I have secured a loan," is the way Newfoundland feels, if she does not so express herself.

* * *

When bacon dropped 10s. in England the other day, a good many people were there that were unable to save their "bacon."

* * *

Merchants who do business without reading a paper specially devoted to their trade, like mariners at sea without a quadrant, do not know "where they are at."

* * *

Experience is not a free gift; it must be bought with a price. And a pretty good price some of us have had to pay for the little experience we have obtained.

* * *

Sugar King Claus Spreckles and one of his sons are at loggerheads, and court proceedings have been instituted. Some "sweet" revelations may be expected.

* * *

Had the Dominion Cabinet as much foresight as it has hind-sight Newfoundland would be drifting toward, instead of away from, confederation with the Dominion.

* * *

This is a nice free country, we must say, with the heat during the last days of May month and the first of June denying weary Torontonians the right to sleep.

* * *

A new warehouse in Paris has been built with glass floors. The feasibility of walls built with glass bricks has been discussed

for some time. People who live in glass houses will evidently soon be able to throw stones.

* * *

Canned salmon on the Coast may as well have followed the buffalo into oblivion as far as the eastern market and the new pack is concerned. The commodity is not in evidence.

* * *

You cannot judge how many frogs there are in a pond by the noise they make any more than you can the extent of a merchant's business by the bluster he exhibits.

* * *

People who two months ago declared that fortunes would never again be made in a day or so, did not count upon the chickens that were being hatched for the grain dealers.

* * *

Now that the Budget is disposed of it is to be hoped that members of the House of Commons will give serious attention to the budget of business matters that is awaiting their consideration.

* * *

"The Patrons should be free," says an exchange. Yes, they should be. But whether they are free or not they deny the right of others to be so. For instance, they arrogate to themselves the sole right to manage both the business and politics of the country.

* * *

The reputable trade paper is a gun that is always aiming straight for the buyer. All, therefore, that the manufacturer or wholesaler has to do is to supply the shot in the shape of a "catchy" advertisement. The publisher pulls the trigger and sends home the shot.

* * *

The man who three months ago would have prophesied that wheat would reach a dollar within the next five years would have been accounted a fool. But wheat has reached a dollar and the people who are calling themselves fools are the farmers who sold some two months ago their holdings of three or more crops.

BULKING TEA FOR CANADA.

THE following, from P. C. Larkin & Co., of Toronto, recently appeared in The Overland Ceylon Observer, and explains itself:

DEAR SIR, — Since we last addressed you we had the pleasure of a visit from Wm. Mackenzie, Esq., in the interests of the Ceylon Planters' Association, and we were glad to have had the opportunity of discussing verbally with a gentleman who has such a practical knowledge of matters concerning the Ceylon tea industry and, evidently, is so capable of forming correct conclusions as to the best manner of furthering their interests.

We had occasion to bring before him a matter on which we now take the liberty of addressing you in the hope that through your paper you will allow us to draw the attention of the tea planters of Ceylon to it, viz., bulking. It is a matter which we consider of great importance in the development of a direct business with Ceylon generally, and vital, as regards exports to this country.

Our actual experience has been, that when we import teas from Colombo, even of large and well-known gardens, the shipments, although marked "Factory Bulk," are not regular in quality as regards each individual lot. For instance, samples drawn from five or ten chests of a single shipment of pekoe, will draw more or less irregularly, and in some instances the difference will be so marked as to suggest a decided money value.

This makes it impossible to offer such teas for sale to the retail trade on samples drawn from any particular chest, and even from a bulk sample from several chests, and necessitates the bulking of the teas here, where we have no proper facilities for doing it.

The London trade, evidently recognizing this as a serious defect, have found it necessary to re-bulk teas before putting them up for sale; but this, while it may to some extent suit their local market, is a serious objection when the teas are sold for export, as the leads being torn, and the tea in a great measure left exposed to atmospheric and other objectional influences in transit, and often remaining in this country a long time after landing before sale, the deterioration is so important that importers, in operating in Ceylon teas as compared with China teas (which are hermetically sealed and remain in perfect order for any reasonable length of time,) have to consider the condition as an important element against the Ceylon article.

We are sure that if anything can be done to remedy this state of affairs, it would be highly appreciated by the importers and remove a serious obstacle to the free sale of Ceylon tea on this side. We hope you will consider this of sufficient importance to your Ceylon planters and merchants, to give it of your valuable space.

Commenting editorially upon P. C. Larkin & Co.'s letter, The Observer urges the Planters' Association to issue "a note of warning and advice on the matter."

SCARCITY OF OYSTERS.

A year ago the stock of oysters in Baltimore was estimated at 300,000 cases, but by October 1st last it had about all gone out at

prices higher than those now ruling. A recent Baltimore report places the present supply at less than 75,000 cases, a decrease of 75 per cent., and intimates that higher prices may be expected by September 1st.

KEEP AT IT.

If you expect to conquer
In the battle of to-day,
You will have to blow your trumpet
In a firm and steady way.
If you toot your little whistle
And then lay aside the horn,
There's not a soul will ever know
That such a man was born.

The man that owns his acres
Is the man that ploughs all day;
And the man that keeps a humping
Is the man that's here to stay.
But the man that advertises
With a sort of sudden jerk
Is the man that blames the printer
Because it didn't work.

But the man that gets the business
Uses brainy printers' ink,
Not a clatter and a sputter,
But an ad. that makes you think;
And he plans his advertisements
As he plans his well-bought stock,
And the future of his business
Is as solid as a rock.

FIXED PURPOSE TO DO RIGHT

MUNKACSY'S face of Pilate pictures the vexation and perplexity of a man "letting I dare not wait upon I would" at a most trying moment, remarks Golden Rule. We cannot help pitying the judge so poorly fitted to give, all unconsciously, the decision on which the world's future was to hang. We recall his ignorance of truth, the obstinate people that were clamoring before him, the cruel ruler that was over him. We pity him the more, as we can enter into his position, through ever having had to settle, in the midst of conflicting considerations, questions that were of great weight for ourselves.

Yet, throughout the whole, one thing stands out perfectly clear. We could forgive him if, between two courses, he had made a mistake as to which was the more expedient, or if, after long hesitation as to the side on which right lay, he had at last failed to hold the balance true. But from the first it is plain that as to the one question of duty he had no hesitation. He was a judge, and the man before him was innocent. About that he never wavers. The dream of his wife, the judgment of Herod, the unmistakable motive of the priests, the words of Christ—all agree with his own conviction, instead of shaking it. His whole debate with himself was an effort to confuse the one issue that was as clear as noonday. Of course perplexity followed. The same will happen to anyone that, into questions of belief, or of amusement, or of choice of a calling, or of conduct in any line, allows some other elements to enter when conscience has given a plain answer. It is easy

to multiply mysteries about the simplest matters; but light enough to show which is our road is all we have a right to ask. While we wait for more the fog will shut us in.

This Roman's life was wrecked on this decision that meant so much for him, because impulse and not principle had been the rule of his life. In some matters, success seems at times to hang on the shrewdness that is ready to turn either way with equal ease. In matters of right and wrong, success belongs to him that is so fixed in purpose that he can go in but one direction. Whoever does not so burn the bridges of evil behind him as to make retreat impossible, will make no valiant fight. If the past makes it equally easy to choose either right or wrong, there are sure to be circumstances that will always make it easier to choose the wrong.

JAVA EXPORT SUGAR DUTY.

Commenting upon the suspension of export duty on sugar in Java, which went into effect June 1st for one year, an English trade journal says: The Java sugar planters have been going for the last ten years through a very severe struggle in competing with the beet sugar industry. They have none the less increased their production from 6,390,000 pikols in 1884, when the cultivation was still partially in Government hands, to 8,443,000 pikols in 1893, entirely raised without Government intervention. Falling prices, however, reducing more and more the margin of profit, have brought the growers to great straits. Five factories have already closed, shortly to be followed by four more, and it is reported that a further number of these costly establishments may have to disappear before long. Under such circumstances the Government felt bound to try the experiment of relieving the sorely tried industry for a time from a tax which, only levied at a low rate (nine cents per pikol), could only be defended on sound economic principles, and will in all likelihood be suppressed as soon as means are found of substituting for it some other item of taxation which cannot be dispensed with for fiscal reasons.

THE CASH SIDE OF THE QUESTION.

IT is a mistake to suppose that the people of Newfoundland are not able to make money under the normal conditions on their island, simply because they have been financially paralysed by the fierce grip of disaster. Take the evidence of the people's deposits in the saving banks as a sample. Canada in '93 had deposits in her Government savings banks amounting to \$11.02 per head. In the same year, the deposits in the Newfoundland savings banks amounted to nearly \$15.00 per head. This does not seem to indicate merely a land of fish, fog and a superior breed of dogs. Again, the imports and exports of Newfoundland in '91—to take a year of normal prosperity—were larger in proportion to population than the imports and exports of Canada. These are not absolute signs of prosperity, of course, but they constitute a fair quality of circumstantial evidence to the effect that the people of Newfoundland under normal conditions can wring an encouraging amount of wealth out of their island home. It is no icy desert, but a wealth-bearing province that we will get. These people will take their stand at our side and lift with us the burdens of our common Dominion. At the present time we only supply them with about three-sevenths of the goods they import; after union, we ought to be able to sell them nearly all. Then union would lift

their securities and increase their prosperity so greatly that they would be better customers of all comers than they now are. From a financial point of view, union would be a mutual blessing, bringing benefits to both sides.

Business men realize this fact. The action of the local Board of Trade shows how promptly the members of that body—specialists in trade and commerce—perceive where the business interests of the country lie. Yesterday, the Quebec Board of Trade took similar action. THE CANADIAN GROCER, a trade paper, declares that "the great majority of business men favor the union of Newfoundland with Canada." It proceeds to argue that "the whole question is emphatically a business issue. The opinion of the commercial community should rule in the matter. Are they not infinitely better judges than the dozen lawyers who form the Ministry, and the dozen lawyers who lead the Opposition?" it asks. It wants a plebiscite on the question, or some other means of getting beyond the politicians to the people. One plan it suggests is pure business. It says:

A commission of business men to examine the position and resources of Newfoundland, and report upon the wisdom of paying a larger sum as a commercial transaction, might be appointed. If a commission, so constituted as to carry weight with business men, were chosen, and it reported favorably, any Government could safely act, and

justify itself before the country for adding \$15,000,000 to the public debt.

It would undoubtedly pay the people of Canada to admit Newfoundland to the Dominion, just as it would pay the people of the New England states to get the trade of the island. The main difference between ourselves and the New Englanders seems to be that they fully appreciate the value of Newfoundland trade, while we do not. Consequently they are after it, hot foot; while we hesitate over the building of a railway that will bring St. John's very much nearer to the port of Montreal.—Star, Montreal.

PERSONAL MENTION.

Mr. Turner, of James Turner & Co., Hamilton, Ont., was in Toronto on Tuesday.

Mr. W. H. Gillard, of Hamilton, president of Dominion Wholesale Grocers' Guild, was in Toronto Wednesday. He reports business very satisfactory. It was not necessary for him to make such a report. This could be taken for granted, as Messrs. Gillard & Co. are one of the most enterprising and pushing houses in the grocery trade. There are no cobwebs on their feet.

Mr. S. S. Forrest, of the Forrest Canning Co., leaves this week for a trip to British Columbia to look after their increasing business in that section.

COLLAPSE OF THE CANNED GOODS AGREEMENT.

WHEN a year ago last March, the Canadian Packers' Association formulated the scheme whereby the pack of the different members was to be sold through what was termed a Selling Committee, THE CANADIAN GROCER pronounced it unworkable. What was then predicted has come to pass.

The Selling Committee of the Canadian Packers' Association is no more.

For some time it has been alleged that the agreement was being violated. And, it will be remembered, this journal some weeks ago pointed out that rebates were being given by at least some of the members of the association.

Attached to the agreement was a penalty clause. What this clause was we have never been able to fully ascertain. Rumor said it was \$500, but a member of the association declared that it was a complicated affair "and would require a great deal of space to explain." At any rate, there was a penalty, drawn up by a lawyer, and declared to be legally intact. In some instances the penalty was enforced and collected, but lately the infractions of the agreement became so general that no attempt was made to tax those who failed to keep their obligation.

Last week a special meeting of the association was held with a view to patching up the agreement. But instead of being a resurrection of the agreement it was its official burial, for each of the old subscribers to it was given carte blanche to sell at what price and in what manner he chose. The Selling Committee was also dissolved, and in a few weeks the central office in the Toronto Board of Trade building will be closed. In fact, it is already closed as far

as new business is concerned, its office now being to wind up old business.

The Canadian Packers' Association is still in existence, and if its members so will it can be made an influence for much good to the canning industry of the country.

The association made a mistake when it formulated the scheme which recently died and was last week buried. It was as crude as it was unbusiness-like. It was fallacious for one moment to think that any scheme could be anything more than ephemeral that compelled the buyer who wanted a certain quantity of, say canned tomatoes, to take some of "Z's" when it was "Y's" he wanted. Yet this is what the now defunct agreement decreed must be.

And what was nauseating to the buyer proved to be the evil genius of the agreement, for as the packers of the not so well-known brands saw the more popular packs going off, while they were withholden from stepping in and pushing their own stocks, they naturally chafed under the yoke. When other brands were being forced on the market by the banks their irritation became all the greater. Eventually, by various devices, they broke the agreement. After that the dissolution of the association's scheme of selling through a committee soon took place.

Further back, however, than the weaknesses of the agreement in question is another cause for the disintegration: The members have not confidence in each other; and where this is lacking no agreement will be long-lived, however binding the conditions surrounding it may be. As long as this obtains the association will always be crippled in the good it might do.

Where there is not union of sympathy there cannot be union of interests.

SAD LACK OF FORESIGHT.

LEAVING aside altogether the question of diplomacy, it must be acknowledged that the Cabinet of the Dominion exhibited a lamentable lack of business foresight in its recent negotiations with Newfoundland.

It saw merely a bankrupt colony and the price it was asked to pay for taking it into the confederation.

Looking at the matter from these standpoints, \$15,000,000 does appear to be an outrageous sum to pay. So similarly might argue the capitalist who proposes to invest in a new industry and who considers what is and not what is to be. The world of commerce is what it is to-day because men with capital saw by the eye of faith what there was to be. We would have had no Canadian Pacific Railway and the distant parts of the earth would not have been

brought so near as they are to-day by cable and swift steamships, had men never looked beyond the to-day.

And had the Dominion Cabinet been composed of practical business men, instead of practical lawyers, Canada would not have allowed this, the best chance for many years and, it is feared, the best for many to come, of adding not only another province to the Confederation but of another member to her list of home customers to pass.

Of all customers, the home customer is the best, and whether we agree or not with the methods it has employed, that has been the avowed policy of the party now in power ever since it was handed the reins of Government by the people in 1878. But now the best chance for developing the home market it has had for many years has been allowed to slip through its fingers.

National aspiration alone, one would have thought, would have been sufficient to have consummated the union. In the days to come, with our nationality more developed, we shall recognize the value and importance of Newfoundland as a gateway from the Atlantic to the Dominion, whether the island is a member of the Confederation or not. If she is not, so much the worse for Canada.

But, dropping the national idea, and looking at the question from the dollar point of view, the case becomes all the stronger.

As Canada and Newfoundland are now situated each says to the other: "You cannot get your goods into this country unless you pay a certain tax." But in spite of that, our aggregate trade with Newfoundland last year amounted to \$3,633,154, the largest since 1873. And if this can be done with a Customs barrier in the way, what may be possible with the exchange of commodities unimpeded by any such barrier? Most of us have not begrudged the money spent in subsidizing steamship lines to the Orient and to the Antipodes, but here is an investment right at our very doors that offers infinitely better inducements.

The proof: For the \$864,000 worth of goods that we last year sold to Australia, Japan and China combined, we paid out 23 per cent. in subsidies; while for getting Newfoundland into the Confederation and securing a customer that even now buys annually from us nearly \$3,000,000 worth of goods, we would be paying only a little over 19 per cent., capitalizing at 3½ per cent. the \$15,000,000 asked by Newfoundland. In other words, it would cost us 4c. less to sell a dollar's worth of goods to Newfoundland than it now does to the three distant parts of the world above mentioned, not even allowing for the marked increase that would naturally take place with the island a part and parcel of the Dominion.

IS NEWFOUNDLAND UNION OFF ?

AT the last meeting of the *Chambre de Commerce*, Montreal, the important organization of the French-Canadian merchants, Mr. H. Laporte, the president, moved that the *Chambre* take action on the question of Newfoundland. The motion was not seconded, and the whole matter was referred to a committee. THE CANADIAN GROCER'S representative subsequently called on Mr. Laporte to enquire what action was likely to follow. "You can see from my course at the meeting that I was then in favor of union, but I must say," he replied, "that the utterances of Hon. Mr. Bond, in interviews with the newspapers since, put a somewhat different face on the question. He represents Newfoundland, and he tells us that the confederation proposals are dead. The island has now succeeded in floating its loan, and if they don't want to join us, of course that alters the situation considerably. I am not prepared to say what action will now be taken in the *Chambre* owing to Mr. Bond's declaration."

THE CANADIAN GROCER agrees with Mr. Laporte that the views of Secretary Bond are not encouraging to the movement, and until some other explanation is forthcoming as to Newfoundland's attitude, it is difficult to pass over his announcement.

That differences of opinion are now likely to develop among the French Canadian mercantile community was inferred from the remarks of another prominent member of the *Chambre de Commerce*, spoken to by THE CANADIAN GROCER, who said: "You will not find a movement in favor of annexing Newfoundland amongst our people. It would cost too much and add another needy province to the Dominion. We have enough of that kind already, and we do not want a dozen more members in Parliament seeking favors from the Government. Quebec is not in sympathy with such a thing. It would require too much money."

"But would not the increase of trade warrant it?"

"No, certainly not. Besides, there is the French Shore question. Do you want Canada to have a dispute with France on its hands? Canada could make no better settlement of that issue than England has unsuccessfully tried to effect. In fact, France will never give up her treaty rights there. After being dislodged from the whole continent this is her only remaining hold, and she will always retain it. Any forcible attempt to wipe out the treaty would bring on war, and how do you suppose the province of Quebec would feel in a war with France? It would be unsafe to precipitate such a condition."

THE CANADIAN GROCER, however, believes this is not the view of the majority of

the members of the *Chambre de Commerce*, who favor Canadian unity and growth of commerce just as strongly as the rest of the country.

It looks as if our Government of Lawyers, to whom business is a secondary matter, were going to lose the chance of adding a couple of millions to the trade of the country. No doubt Mr. Bond, himself a lawyer, has contributed to the difficulty by indiscreetly announcing in a Montreal paper that union was now dead. The Canadian commercial feeling was certainly in favor of paying a little more than Newfoundland was worth in order to promote union, to help a sister colony in need, and extend home trade. But the expectation was that the island would appreciate and meet this cordial feeling in the proper spirit. Canada does not want to thrust union on the island, and Mr. Bond, who does not share the enthusiasm of his chief, Sir William Whiteway, for union, has certainly done much to becloud the situation. This, however, does not shift the responsibilities of our Government to other shoulders. They must bear the stigma of signally failing, as yet, to carry out the opinion of the business community. We do nearly three millions in exports to Newfoundland already, and might with free intercourse do two more, but the Government neglects this chance, and proposes sending a commissioner to South Africa to which Canada sent last year just \$45,000 worth of goods! Could folly further go?

HAVE THE CHEESE BRANDED.

A COMMITTEE of the House of Commons at Ottawa has had a conference with representatives of the Montreal Butter and Cheese Association and the different Dairymen's Boards of Trade regarding branding, and is to have another this week. The opinion given at this conference was of a conflicting kind. On the one hand it appears that the makers of cheese object to any compulsory law on branding, while on the other hand the Montreal exporters want the cheese branded. The chief objection of the manufacturing interests to the proposed Branding Act is that it will militate against their make of July cheese. They contend that there is a prejudice in England against the make of that month, and that if the goods are branded they will not fetch as much money, though as a matter of fact the quality of the July goods is frequently better than that of June. If this is the case, it appears to THE CANADIAN GROCER that the best way to do away with this prejudice is to honestly show the English buyers that the July cheese are really fine, and quite as good, in a proper ratio, as the cheese of other months. For this reason, to brand the cheese would be the honest method, and, we venture to think, pay better in the long run than to

palm off Julys, even admitting that they are all right as to quality, as the make of another month. Another argument that can be adduced in favor of branding is that it would be apt to prevent the storing and holding of summer cheese until late in the fall by speculators, which is a very unhealthy practice.

SUGAR IN SECOND AND THIRD HANDS.

THE CANADIAN GROCER is assured that more than two of the leading wholesalers' grocery houses in Montreal gave their first new orders for refined sugar since the new duty was imposed this week. This means that for over a month past they have been turning over granulated sugar which cost them 3¼c. per lb. at a profit of over 1c. per lb., and the same in the case of yellows. It is not surprising, therefore, that jobbers' prices in Montreal until a week ago ruled practically on the same level as the first cost at the refineries. The wholesaler evidently considered a profit of 1½c. per lb. sufficient and sold right along, irrespective of what the refiners were doing. Now, however, the increase in country orders to jobbers, and the fact that refiners also, as shown above, are receiving more enquiry, go to show that stocks are becoming exhausted. It is quite possible, therefore, that some change in the position of the Canadian sugar market may result shortly as a consequence of the alteration in the conditions. As to the profits that jobbers have made, of course, no reliable idea can be gathered. It is understood, however, that while some were not contracted ahead to their customers, others were, and were therefore unable to take advantage of the position.

THE FIRMNESS OF MOLASSES.

The excitement in molasses in Montreal last week has resulted in strengthening holders' views on that market materially, and occurrences since then have only tended to accentuate this feeling. Briefly, no high grade Barbadoes can now be had in Montreal for less than 35c., and sellers are not at all urgent to do business on this basis. It is their opinion that molasses is good property to hold for higher prices, and some of the sanguine ones predict that there is to be 40c. molasses inside of a month or so. The fact that a leading French house are known to have paid 25¾c. cost and freight at the Islands for a cargo lends support to this view, as these goods cost at the very least 35c. laid down on the wharf in Montreal. Besides, the stock is not heavy and it has been depleted by the sale of a large portion of a cargo lot by a leading commission man in Boston at a better figure than he could realize in Montreal.

GOOD AND BAD CREDIT.

CREDIT is the pivot upon which business men turn either toward success or failure. Therefore, as carefully guarded and watched should it be as one's personal character.

A good many do not, apparently, realize this. At any rate, they take no pains to keep it inviolate. When their accounts fall due it gives them no qualms of conscience if they are unable to meet them. If they do develop any energy in the search for the "wherewithal," it is merely of a passive order, and, of course, ineffective.

A business man with lost credit may not necessarily go down in the sea of bankruptcy, but he is, forsooth, so badly weighted down that it is only by a perpetual struggle that he can keep his head above water. And it is no more pleasant struggling along under such conditions than it would be were he swimming in the pure aqua with leaden shoes on his feet.

The merchant or manufacturer whose credit is at a low ebb is compelled to pay "through the nose" for nearly everything he buys. Consequently, he is handicapped from the very start in the race for business.

In order to success in business there must be close buying. Where one's credit is dead this cannot be done any more than can a bird fly without wings. When a merchant cannot buy right he cannot sell right; and not long will it take his customers to learn the fact. When that stage has been reached, the character of a man's business is obvious.

It is, perhaps, well in this connection to cite specifically how directly merchants and manufacturers with poor credit are made to pay more for their goods.

We do not know how many firms have adopted this system, but we know that at least one manufacturing concern in Toronto has, and briefly it is this: A customer, as long as he pays promptly, is placed in a certain class, say "A." If he deteriorates he is placed in a lower class. All in this class are charged a fraction more for their goods than those in class "A." And in proportion as every customer's credit gets worse he goes down in the classification, while the prices he is charged rise fractionally as his credit goes down. All the classifications are kept in a systematically indexed book.

The firm never refuses to sell any man, whether his credit be bad or good. The only discrimination is in the matter of prices. At one time the firm in question did, as most business men do, refuse credit to a merchant or manufacturer known to be bad pay. In this way they offended people whose business, after their financial position had improved, they subsequently sought in vain. It was the realization of this fact that induced the firm to perfect the scheme above outlined. And the senior partner assured

THE CANADIAN GROCER that it had worked admirably, the losses that had been entailed having been more than covered by the extra prices charged.

By this way, although a customer may be lost on account of price, yet he is not offended, as is often the case with a blank refusal.

What this particular firm is doing is being done by hundreds of manufacturing and wholesale concerns throughout the country, although in a less systematic manner, and emphasizes the necessity of being jealous regarding one's credit.

It is better to do a business in keeping with one's capital, limited as the capital may be, and have a good credit name, than essay to do a business beyond one's capital and earn a bad credit name.

DISCOUNTS.

TOO little attention is paid by retailers and even jobbers to the profits there are in discounts. One or two per cent. off for cash looks small, but in reality it is very considerable. If a man buys \$10,000 worth of goods and gets 2 per cent. off for cash, he saves \$200. Would he like to go out and pay \$200 for \$10,000 for 20 days or \$20 for \$1,000 the same time? No, he would say that it was bad financing, and yet that's just what hundreds of business men are doing every day all over the country. To put it thus: "Nine dollars, 1 per cent. 10 days; 30 days net. Does it pay to discount such a bill? At first glance you would feel inclined to say no, but did you ever stop to figure? Of course, it's only 9c. Suppose I come to you and say, 'Will you oblige me with a loan of \$9 for 20 days, provided I pay you interest at 18 per cent.?' You would not hesitate to comply with my request, that is, if my credit was good.

"Well, this is exactly what a jobber offers you when he says 'One per cent. 10 days; 30 days net.' Yes, he offers you 18 per cent. for the use of \$9 for 20 days, and, what's queer about it, you ignore his offer, preferring to pay him 18 per cent. for the use of that amount for 20 days. You may say, 'Had I the money I would discount all my bills.' Why, you don't need the ready cash to do so. Now, let me ask you another question: Suppose I sell you a bill of goods with terms 1 per cent. 10 days, 30 days net, and you were prepared to pay at the end of 30 days. Now, suppose I offered you a discount when the bill became due, would you take it? Yes? Then, why don't you?

"To be brief, why don't you on the tenth day go to your banker and get the required amount for 20 days at 10 per cent., so that in reality you profit 8 per cent., as you pay the banker 10 per cent. and the jobber pays you 18 per cent."

SPECULATION AGAIN IN CHEESE.

THE course of the export cheese business during the past week makes it appear very evident that the bane of speculation is again to be an evil this season, despite the heavy losses that were made this spring on last season's cheese. Without anything in the tenor of English advices to warrant it, prices in the country last week advanced over 1c. above the first cost of the previous week, and now stand at the equivalent of 8 to 8½c. laid down in Montreal. There is no scarcity of season's to advance, showing that these prices are illegitimately high. In the first place, the great difference in the prices paid at various country points proves clearly that the buying was purely speculative. For instance, at Cowansville, in Quebec, 7¾c. was paid, while at Brockville, where it is a generally accepted fact that the quality is better, only 7¼c. was made, or ½c. per lb. less. Again at Montreal on Monday good cheese laid down on the wharf cost only 7½c., or fully ¾c. less than the spot equivalent for the Cowansville purchase. All these inconsistencies show that there is a pretty dusky speculator in the fence somewhere, and the fact that best offers from England up to Tuesday last for June cheese were only equivalent to 7½c., only clinched it. For if, in the opinion of the Britishers, fine June cheese is worth only 7½c. in Montreal, they are hardly likely to pay 8 to 8½c. for a mixture of fodder and grass made, which is what recent country purchases were.

AN AFTERNOON WITH THE CLERKS.

At the meeting of the Montreal retail grocers' clerks this week, J. B. E. Poirier, president, was in the chair, and in the absence of Mr. Laughran the duties of the secretary were performed by Arthur Desrochers. Two new members—R. Archambault, of Hudon, Hebert & Co., and J. La Forest, of A. J. Clement—were elected. Two more were nominated.

It was decided to suspend the medical examination which clerks must pass before being admitted to membership until the association is incorporated.

The Entertainment Committee presented a partial report on the recent affair at the Monument Nationale, but they have more work to do before making their final report. There was some talk of arranging a concert on St. Nicholas Day, in September next, for he is the patron saint of the society.

WANT CHEAPER WATER.

The manufacturers of London, Ontario, have sent a petition to the water commissioners asking that the rate for water be made five cents per hundred feet, instead of the present grade scale of fifteen cents per hundred to consumers of 10,000 feet per quarter down to eight cents to those who use 100,000 feet.

VANCOUVER A "SUBURB" OF MONTREAL.

[From The Hardware and Metal Merchant.]

AMUSING are some of the blunders made regarding Canada's geography by those whose ignorance is inexcusable. The authors are usually English or United States newspaper men, or platform speakers. For instance, an English paper announced that a railway bridge was to be built across the St. Lawrence from Montreal to Port Huron. Another said that a steamship service was to be inaugurated between Halifax and Vancouver. But the most egregious and inexcusable mistake of all was that made by a New York house whose travelers make periodical trips into Canada.

Its Mr. Blank was due in Montreal on a certain date, and, as customary, circulars were sent out announcing the fact to customers and likely customers in the vicinity of the "Commercial Metropolis"—remember, in the vicinity of Montreal—and stating that all expenses in connection with the trip would be refunded or paid by the traveler.

Among the prospective customers in the "vicinity" of Montreal to receive one of these invitations was C. & L., of Vancouver, B.C. C. & L. were of course delighted with the magnanimous offer, and in due time the

authors of it received the following note of acceptance:

Gentlemen,—Yours addressed to us at Victoria, B.C., received, and in which you kindly offer to pay our expenses to Montreal. As the distance from this point to Montreal is something over 3,000 miles only, the expense per head will be light. There being but seventeen of us in all—ourselves and our families—we thought you might consent to our inviting a few of our friends. In view of the wisdom of presenting ourselves in good shape upon our arrival in Montreal, we will not deny ourselves of our accustomed luxuries. With your consent we will draw on you for \$19,747. Respectfully, C. & L.

Whether the Vancouver firm ever had the nice little junketing trip to Montreal I know not. I can only guess they did not. Nineteen thousand dollars was in all likelihood too large an expense item to risk on a merely prospective customer.

GIRL'S VIEW OF THE CASH SYSTEM.

By IDA LEIGHTON, AGED 14, ORANGEVILLE.

There is little doubt which is the better, cash or credit, and that it would be a grand thing if the cash system was the only one in practice. It would make less work and expense for the merchant, so that he would have more time to give to his business, while the customer would be happier for not being in debt. If the people would only think so, it would be far better for themselves and everyone else. They would not be always getting into debt and having to mortgage their farms and property, and eventually lose them, as they are seized by a man's creditor to pay his debts. It seems less to pay a dollar now and then

than to pay a large bill at the end of the year. The wholesale merchants will not wait for the retail merchants, as the latter have to wait for their customers. How then can the retail merchants be expected to pay for their goods unless they have private means! As everyone cannot have that, I think it only fair to everyone concerned that the cash system be established and practised and the credit system be condemned.

OPENING TEA SALES IN INDIA.

Latest advices from Calcutta report the first auction sale of the season, amounting to 10,000 packages, against 6,000 packages same time last year. Broken and Pekoe Souchongs were 1d per lb. higher than last season's opening rates, but common Pekoes and broken Pekoes neglected, and fine teas in small supply. The season was reported as late, in view of colder weather having retarded growth of plant in districts ordinarily very forward.

PAID \$26.50 FOR APPLES.

As THE CANADIAN GROCER stated last week, two barrels of apples were sold in Montreal the other day for \$50, or \$25 apiece.

But Dawson & Co., Toronto, claim to have broken the record. Last week they sold a barrel of choice fruit for the fancy figure of \$26.50. The purchaser was Robt. Barron, the Yonge street grocer.

TORONTO - - ONTARIO

HAMILTON TRADE GOSSIP.

TRADE, which had fallen off a little during the past couple of weeks, is again reviving. "There is a distinctive improvement in every line as far as the grocery trade is concerned," remarked a jobber with whom I was in conversation. "People have got over the idea that big damage was done the fruit crop by the frosts, and they are showing their belief by buying more freely, particularly sugar. Two weeks ago the owner of a vineyard near here told me that his vines were black and that his crop was ruined. To-day I came down the street with him, and he said that the outlook was for a good crop. People are now finding that the damage was much over-estimated."

"There is a big sale of jams, currants and raisins, and merchants are stocking up in the faith that the better times are coming," was the agreeable salutation I got from one merchant.

The collapse of the canned goods agreement is gradually getting noised abroad, and all to whom I have spoken say in effect: "I told you so!" There is an active and increased demand for tomatoes, peas and corn at 75 to 80c., "and of course they are bargains at these prices," remarked a jobber. "The canners who have stock on hand are, I believe, financially able to hold it, and they are very foolish if they sacrifice prices."

Retailers who purchase their sugars in Hamilton are again beginning to purchase more freely, much to the satisfaction of the wholesale trade. The jobbing price rules at 45-16c. for Acadia and 43½c. for Montreal granulated, and yellows range from 3¼c. up.

The steam shovel began work in earnest Monday, on the cut to the entrance of the tunnel for the T. H. & B., and business men are stealing half an hour occasionally to go out and see the machine scoop up two yards of earth at every lift and dump it into the cars waiting alongside.

Even if Fearman's pork-packing factory was visited by a \$20,000 fire it does not prevent them doing business as of yore. That is the kind of enterprise that people admire. "Never say 'die' while there is a shot in the locker."

During the past week Japan teas here remained quiet, people expecting lower prices with the advent of new goods. "But I think," said a dealer, "that they are going to be disappointed. The early goods are all higher priced, but I don't think they show at the money as good liquor as last year, while freights have advanced

within the last few days. On Saturday last we made an offer for a big line to duplicate last year. It was one that cost us 16c.; and do you know that the closest figure at which we could buy it at to-day was 18c. That gives you an idea what Japan teas are like." In Young Hysons the assortment offering is very small, and there are no snaps to be picked up by anyone. Some good values are offering in Indian and Ceylon teas lately put upon the market at from 19 to 20c. Good drawing China blacks are scarce, but there are quite enough medium and high grades to supply the demand.

Through the courtesy of W. Stewart & Son, the architects, I was permitted to take a peep at the plans of the station that is to be erected at James and Hunter streets for the Toronto, Hamilton & Buffalo Railway Co. It is to be of brown stone and pressed brick. It will have a frontage of 50 feet on James street and 165 feet on Hunter street. There will be four floors. The style of architecture is Romanesque, and the structure will be handsome and imposing. The arrangement of the building is excellent, access to each department of it being most convenient. The general waiting room will be 40 by 45 feet, while in the tower, which is to grace the southwest corner, will be the ladies' retiring room. But to the men the most interesting feature is the smoking room. This is an unusual thing for a Canadian railway station, but I understand that it is now the "proper thing" in the United States. The station is to be finished by August 23.

My eye caught sight of a couple of attractively colored pictures in W. H. Gillard & Co.'s warehouse the other day. One depicted a keenly contested horse race, around which in letters of gold and black were the words, "Queen's Plate. Fancy April leaf Japan tea." The other showed a big giraffe with these explanatory words: "Extra fancy new season's Japan tea." "These," explained Mr. Beckett, "are new brands of Japan teas which are arriving shortly. We did expect to have them here by May 24, but our calculations were knocked out on account of the late opening of the market."

Lucas, Steele & Bristol, it seems, recently bought a certain factory's stock of canned beef in 14 lb. tins. The price which they paid has enabled them to make a specialty of this particular line, the result of which is that they have sold large quantities.

The F. F. Dalley Co. are putting some attractive new package goods on the market. "French Cream" package coffee is one of them. This article is in one pound round tins. The label is red, varnished, with white and green letters. It is a handsome package. "I have not seen anything to touch it," admiringly remarked a member of the

firm, as he held a package before him. Bird seed they are putting up in two new styles. One is called "Dalley's Recleaned," and is, as its name implies, pure. Each package contains cuttlefish bone and the new bird improver. The other package is cheaper, but it too contains cleaned seed. It is named Spanish.

The T. H. & B. Ry. Co. are now running two trains daily from Hamilton, carrying freight to Brantford, Watford, and all points on the M. C. Ry., and next week four trains will be put on, so that all shipments will be delivered next day. This gives Hamilton quick access to the trade covered by this system, and should be a great boon to the mercantile and manufacturing interests of the city. This new entrance into Hamilton has had great difficulties to contend against, notably the depression of the railway business the world over, and the difficulty in financing any scheme of this magnitude. That, however, is now fully overcome and the completion of the road an assured success. The continuation to Welland will be completed this fall, and the branch to Toronto next year, and possibly this. Through all the ups and downs of the difficulties the projectors had to contend with no firm in Hamilton deserves so much praise as the enterprising firm of W. H. Gillard & Co., wholesale grocers, who, from the inception, have stuck loyally to the enterprise against all opposition and who are now being complimented by their fellow merchants for their courage and support given to a scheme now acknowledged to be exactly what Hamilton wanted, viz., better railway facilities.

Aside from the permanent benefits that are likely to accrue to Hamilton from the entrance into the city of the T. H. & B., there are the immediate gains that are in prospect on account of the sums of money that the new railway will necessarily be compelled to spend in effecting an entrance. One prominent business man with whom I was conversing regarding the matter ventured the opinion that the cost would be at least \$700,000. "The tunnel will cost in the neighborhood of \$300,000. Work on this will begin about June 10. Then, besides the property that will have to be expropriated, there is the station, which is to be on Hunter street, between James and John. It will cost in the neighborhood of \$30,000 or \$35,000, and will greatly improve the city and vicinity. Besides the money the T. H. & B. will lay out there is the work that is to be done by the Hamilton Grimsby and Beamsville Electric Railway. They are to build a station at Catherine and Main streets, and in connection with the station they intend to have a market for the wholesale sale of fruit, where merchants from the east and west can come, make their purchases and have them shipped in first-class shape. This is going to be a great town yet. We have been asleep, but we are awake now," he concluded.

Mr. H. Beckett, of W. H. Gillard & Co., left on Thursday for Port Arthur. He will be away about ten days and, besides visiting a number of his customers, expects to have a good time.

W. L. E.

MARKETS AND MARKET NOTES

ONTARIO MARKETS.

TORONTO, June 6, 1895.

GROCERIES.

NOTHING of a new or striking character has developed during the week. The general volume of business is good, and better than a week ago, in spite of the fact that the turnover of sugar is lighter rather than otherwise. The development of a healthier tone to trade continues to be in evidence. Some shipments of new season's Japan teas reached this market on Monday. Teas generally are in fair demand, particularly Ceylons. Prices in canned vegetables are rather demoralized, but there is a large and active trade doing. We hear of a little salmon being offered at almost equal to \$5.40 to \$5.45 per case laid down here. There is a good demand for rice and spices. Valencia raisins continue active, and a good many prunes and currants are still going out.

CANNED GOODS.

Prices in tomatoes, peas and corn in wholesalers' hands are demoralized and lower. Peas and corn are selling as low as 75c. per dozen and tomatoes at 77½c., but it is only the poorer or not so well-known brands that are going out at these low figures, and standard goods are going out at 80 to 85c. The collapse of the agreement of the Packers' Association, as noticed elsewhere editorially, and the forcing of some lines on the market by the banks, are the factors which have brought about the demoralization of prices. The salmon situation is very strong. One canner has been offering a little fish this week equal to about \$5.40 to \$5.45 per case laid down here. This was for standard red fish, and mail advances

from the same canner state that the spring catch has been very small and that there will be none for this market. We quote: Tomatoes, 80 to 85c. for choice; corn, 75 to 80c.; peas, 75 to 80c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.75 to \$1.90 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, \$1 to \$1.10, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.35 to \$1.45, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.45 to \$1.50; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Canadian canned beef, 1's, \$1.65 to \$1.75; 2's, \$2.65 to \$2.75; 6's, \$8 to \$8.25; 14's, \$18 to \$19. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

The local market remains much as before. We quote green in bags: Rio, 20 to 22c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

In New York the market for Rio and Santos growths is dull and unsatisfactory.

RICE.

Demand continues fair for both rice and tapioca. We quote: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5½c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 4½ to 5c.

SPICES.

Pepper continues strong in the primary market. The local trade in spices is on the whole good. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 20 to 25c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The market is dull, with prices steady and unchanged. Yellows are in better supply. There is a little movement in Demerara, but it is mostly on confectioners' account. We quote the same as a week ago: Granulated, No. 1, 4¾ to 4½c.; do., No. 2, \$4.25 to \$4.30; yellows, 3½c. up; Demerara, 3¾c.; bright, 4c.

In London there has been a little easier feeling. The N.Y. Journal of Commerce of Tuesday said: "With dull trading there is, as usual, rather more discussion over the merits of the market for raws, but practically no new features of decided character came into notice. The bearish view is based mainly upon an assumption that the world has more sugar than it needs, Europe in particular, with a possibility that previous speculative holdings may at any moment be unloaded, and the opposition claims simple temporary quietness, to be succeeded by good consuming demand with progress of warm weather. The current movement was slow and indifferent all round, holders asking about former rates and buyers showing an apparent willingness to meet them. In matter of business accomplished we note only a small lot of 48 hhds. Muscovado at 2 15-16c. for 89 test, but at the close there were evidences of better undertone and holders offered supplies somewhat indifferently."

SYRUPS.

25 Front St. East.

and TORONTO
318 St. Paul St., MONTREAL.

MARKETS—Continued

prices are being firmly maintained. We quote: Dark, 30 to 32c.; medium, 33 to 35c.; bright, 40 to 42c.

MOLASSES.

Trade continues to be of a moderate nature only. We quote: New Orleans, barrels, 30 to 32c.; half-barrels, 33½ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

The most interesting feature of the market this week is the arrival of the first shipment of new Japan teas. There is only a package demand, however, for these teas, the trade preferring to wait for the later and cheaper shipments. The ruling price to the retail trade is from 29 to 35c. per lb. The chief demand on this market is still for Ceylon. Mail advices from London say the better grades of Ceylon teas sold higher. In China teas, blacks are quiet and greens are still scarce. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades, 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

Yokohama mails to May 9, received in New York, say: "New teas began arriving in quantity about the 1st inst., since when there has been a steady increase in the volume of receipts, although the total quantity received and marketed to date falls very largely short of last season. The demand has been active at full prices throughout, and the bulk of the business has been transacted at figures ranging from \$35 to \$60 per picul. Total receipts to date at Hiogo and this port are 24,824 piculs, against 42,085 piculs received at same period last season; and the total settlements since the opening of the market amount to 21,846 piculs, which is less by 15,211 piculs than was the case at even date last year."

DRIED FRUIT.

Valencia raisins continue in active demand. The demand appears to be particularly good for bulk selected and layer selected fruit. We quote: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to 4½c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Sultana raisins are quiet and unchanged, with 6½ to 7c. as the ruling idea as to price.

Prunes are still in demand at the old figures. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 6¾ to 7¼c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

Currants are in fair demand at unchanged prices. We quote: Filatras,

half-bbls., 4 to 4½c., barrels, 4¼c.; fine Filatras, half-bbls., 4¾c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 4½ to 5¾c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

R. L. Mason & Co.'s advices re growing crops are as follows:

VALENCIA RAISINS—Owing to the poor quality of the 1894 crop, the season was a most difficult one for packers whose reputations would not allow of their meeting the competition of poor fruit by packing similar qualities. On May 1st about 150,000 quintals remained in Spain, all unfit for packing, which are being used for distillation, for which purpose there is a demand for the entire quantity. The vineyards promise well for the coming crop, which is likely to be about the same size as last year's. First shipments are likely to take place about August 1st—15 days earlier than last year.

MALAGA FRUIT—Early rains have done the vines good, and, barring unfavorable weather, a heavy crop of fine large raisins is expected. The almond crop has suffered severely, and it is doubtful if it will exceed one-third of last year's production.

ELEME FIGS AND SULTANA RAISINS—C. Whittall & Co. report crop prospects favorable. They write: "The vines are showing well in all districts. The fig trees are also doing well. It is further expected that the Vourla district will have an exceedingly good yield of sultanas and raisins."

TURKISH PRUNES—Messrs. J. & U. Liebman & Co. send us very unfavorable reports, so far, of the coming crop, which is certain to be a very short one. The percentage of large size fruit, however, will be greater than usual.

FRENCH PRUNES AND PLUMS—J. S. Todd & Co., Bordeaux, report that prunes will not be more than a medium crop. Plum crop will not be nearly as large as last year's.

SICILY FILBERTS AND ALMONDS—The supply of Sicily shelled almonds will be less by over 50 per cent. than last year's. In filberts, prices are expected to advance, in sympathy with almonds.

BUTTER AND CHEESE.

Advices from the Old Country state that the markets there are still in a very demoralized condition. The finest fresh Canadian makes of creamery butter would not net more than 14 or 15c. a pound. As Canadians have to look to the Old Country as a market for the bulk of their butter, the prospects would seem to be anything but encouraging for creamery and dairymen this season. Locally nothing but the finest

butter can be handled profitably, as there is still a large quantity of old stuff lying around which will supply the bakers for some time to come. The weather has been so warm that large rolls have practically ceased to come forward, and all butter is being packed in tubs. As the market is so full packers will do well to be particularly careful in grading colors. They should also sell and ship while fresh. Prices are in some cases lower. We quote: Summer dairy and store packed, 5 to 7c.; fresh large rolls, 10 to 12c.; prints, 13 to 15c. Fresh creamery—Tubs, 15 to 16c.; pound prints, 16 to 17c.

The market for cheese has somewhat improved. The make is likely to be very large this season, but there seems to be no prospect of higher prices. The last season was rather disastrous to dealers, and the large make this year will surely keep quotations down still. August and September makes of Canadian cheese bring 10 to 10½c., and new Canadian cheese is quoted at 7¾ to 8c. Small Stiltons bring 10 to 11c.

GREEN FRUIT.

A good trade is being done, especially in early fruits and vegetables. Strawberries remain firm, but pineapples and bananas are plentiful and easier. Lemons have risen somewhat in price, as a result of the keen demand during the recent hot spell. We quote: Messina lemons, 360's, \$4.25 to \$5; 300's, \$4.50 to \$5. Oranges—Messinas, half boxes, 80's, \$1.50 to \$2; 100's, \$1.75 to \$2.50; boxes, 160's, 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.75; Messina ovals, 80's, \$2.25 to \$2.50; California seedlings, \$2.75 to \$3; Valencias, \$6. Bananas, \$1.25 to \$2 for firsts and seconds. Apples, winter fruit, \$2.50 to \$4 per bbl.; common fruit, \$1.75 to \$2. California dried fruit—Apricots, 12½c.; peaches, 12½c.; cranberries, \$3.50 per box. Strawberries, 15c. a quart; cocoanuts, \$4.50 a sack; pineapples, 8 to 14c.; green string beans, \$2.50 to \$3 per bushel crate; Egyptian onions, \$2.25 per sack; cucumbers, \$2.25 to \$2.50 per crate; new cabbage, \$2.25 to \$2.50 a crate.

COUNTRY PRODUCE.

BEANS—Choice hand-picked are higher at \$1.70 to \$1.75 per bushel.

DRIED APPLES—Are quoted at 5 to 5½c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: 6½ to 7c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.25 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

POTATOES—Old potatoes have taken quite a slump. A car of Manitobas sold in Toronto this week did not bring enough to pay the freight here. New potatoes are be-

ginning to come in from the South. We quote: Old, on track, 45c.; old, out of store, 50c.; new, \$4.50 to \$6 a barrel.

EGGS—Remain firm at 10½, 11c. being quoted occasionally.

FISH.

Trade has been slow during the hot spell, and dealers would not carry much stock. Things are looking up now. Restigouche salmon is the newest fish on the market. We quote: Skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; haddock, 5 to 6c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland and herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; pike, 4½ to 5c. per lb.; flitch cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 5½ to 6c.; white fish, 6½ to 7c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Georgian Bay herring, \$2 per 100.; Restigouche salmon, 17c.

PROVISIONS AND DRESSED HOGS.

The market is much the same as that of last week.

Packers are buying no more hogs, and hog products are firm. Dressed hogs bring \$6 to \$6.25 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8¼c. for small lots; breakfast bacon, 11c to 11½c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs., 11c.; small hams, 11 to 11½c.; pickled, 10 to 10½c.

LARD—Pure Canadian, tierces, 9c.; tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Steadily going up. We quote: White, \$1.01; red, \$1.01; goose, 85c.

OATS—Have advanced rapidly to 45 and 46c.

BARLEY—Has made another advance to 50c.

FLOUR—Has advanced rapidly in sympathy with wheat. We quote: Ontario straight roller, \$4.50 to \$4.75; Manitoba, \$4.90 to \$5; patents, \$5.15 to \$5.25.

BREAKFAST FOODS—The continued advances in grain give rise to a very firm feeling in breakfast foods, which have a strong tendency to higher prices. Oatmeal has advanced 10c. within the last few days. We quote: Standard oatmeal, \$4.50 to \$4.60; rolled oats, \$4.50 to \$4.60; rolled wheat, \$2.75 in 100 lb. barrels; cornmeal, \$3.50; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SEEDS.

The season is practically over, and no trade is being done. The jobbers' prices quoted are merely nominal. We quote: Red clover, \$6.15 to \$6.50; alsike, \$4.20 to \$6; timothy, \$2.90 to \$3.50 per bushel.

SALT.

Trade is brisk at unaltered prices. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

HIDES, SKINS, WOOL AND TALLOW

HIDES—Stocks are light, and the demand is active, but there are no change in prices.

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

MARKETS—Continued

Greens are quoted at: No. 1, 8c.; No. 2, 7c.

SHEEPSKINS—The supply is falling off and lambskins and shearlings are more plentiful. Sheepskins are worth \$1 to \$1.25, lambskins 25c. and shearlings 15c.

CALFSKINS—Unchanged. We quote 8c. for No. 1 and 6c. for No. 2.

TALLOW—Still dull. Jobbers give 5 to 5½c., and sell ½c. higher.

WOOL—Is coming in freely at country points. Seventeen to eighteen cents in some sections and 18 to 19c. in others are the ruling prices. For round lots of selected wool 19 to 20c. are the top prices.

PETROLEUM.

For the first time since the recent period of rapid advances a halt has been called in petroleum, and prices are now down a cent on all lines. The decline is due to the easing up of crude both in Canada and the United States. There is no evidence that the market is likely to break, dealers holding that prices will not go lower, and may go higher. The high prices have stimulated production, which in a slack season results in a lowering of prices. We quote, in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 16 to 17c.; carbon safety, 18 to 19c.; Canadian water white, 18 to 19c.; American water white, 20½c.; photogene, 21½ to 22c.

TORONTO MARKET NOTES.

Clemes Bros. have some new Baltimore potatoes.

Wm. Paterson & Son report pickles moving out rapidly.

Dawson & Co. are bringing in four cars of strawberries a week.

Clemes Bros. have a consignment of fancy Florida tomatoes.

Perkins, Ince & Co. are in receipt of a shipment of Knox gelatine.

Smith & Keighley have just received a carload of fine English dairy salt.

P. C. Larkin & Co. are in receipt of a consignment of tea right from Colombo.

John Sloan & Co. expect a shipment of Sangalla package teas in the course of a few days.

Wm. Paterson & Son's travelers carry samples of all the leading lines of chewing gums.

James Turner & Co's "Mountain Top" brand, April pickings Japan, are selling first rate.

James Turner & Co. have a nice line of Patterson's camp coffees, pickles and sauces just coming in.

We would advise our readers to pay attention to the advertisement of Laporte, Martin & Cie.

Davison & Hay have a line of Japan teas in 10-lb. caddies which they are selling at what are said to be bargain prices.

H. P. Eckardt & Co. announce the arrival of their new season's Japan teas. They are early pickings and show good value.

Davidson & Hay have received two lines of new season's May pickings Japan teas, which are said to show exceptional value.

Graham, McLean & Co. say they find the demand for creamery cheese rapidly improving with the advent of the warm excursion weather.

Davidson & Hay have in stock canned raspberries, red and black, in 1-lb. tins,

which they are offering at low prices; also 2-lb. Bartlett pears.

D. Gunn, Flavell & Co. report short cut heavy mess pork in good demand.

Wm. Paterson & Son's employees are arranging for a monster picnic at Mohawk Lake, a pleasure resort near Brantford, on Saturday, June 15.

Odart's pickles, put up by Gillard & Co., of London, Eng., also Paris, France, are a most delicious relish and are for sale by Lucas, Steele & Bristol.

Lime juice in quart bottles is being offered by Davidson & Hay. This firm is also handling three lines of root beer, for which they report good sales.

A mistake crept into the advertisement of the Toronto Salt Works last week, in which 4 doz. 2-lb. boxes were quoted \$4.10 per case instead of \$1.40.

The Pure Gold Manufacturing Company shipped six and a half tons of ground coffee to B.C. this week. Reception coffee in milk pails is a great seller.

The Eby, Blain Co. have new season's Japan teas in store which are showing good value. They have also received another shipment of "Orient" tea.

Pure Gold sweet tomato catsup, a most delicious article, is ready for the market. This firm is to be commended for the fine quality and style of its goods.

The Eby, Blain Co. have received a shipment of Cunningham and DeFourier's sardine paste; also shipment of Batger's "Nonpareil" table jellie in pints.

Attention is called to the custard powder offering by Lucas, Steele & Bristol, in packets to retail at 10c.; also to Fruit Saline, a very pleasant effervescing invigorant.

The Eby, Blain Co. are putting a new pickle on the market. It is called the "Gladstone." It is in 2 oz. bottles and can be retailed at 10c. per bottle. It is put up in barrels of 6 doz. and in cases of 3 doz.

The best food for dogs is said to be Spratt's patent dog biscuit. It is cheaper than any other dog food on the market, and much more healthy for the canine. W. H. Gillard & Co. are the Hamilton agents.

Manager Roberts, of the Pure Gold, is busy with a gang of carpenters, re-modeling the interior of the firm's premises to meet the demands of their growing business. New coffee machinery is being put in.

According to D. Gunn, Flavell & Co., their sweet-pickled green rolls are having a big run, and their stocks are getting into small compass. They say, however, that a few orders can yet be filled at special prices.

The "Queen" tea and coffee pot is a new line going on the market this week. The Pure Gold Manufacturing Company have placed a very large order for these pots, which will be supplied to the trade filled with coffee.

W. H. Gillard & Co. are advertising a new line, viz., "Sicilian Lemonade Tablets," put up in glass bottles, one dozen in a bottle, to retail at 10 cents. One tablet is sufficient for a glass of lemonade, thus costing the consumer less than 1 cent per glass.

J. F. Austin, representing Shingluff & Co., Baltimore, stated, when in Toronto a few days ago, that the leading shoe-black proprietors of that city, employing a large number of shoe-blacks all over the city, told him they found that the English Army blacking had given them better results than

any other blacking, either foreign or domestic, they had ever used.

In France the Government seems to intend to bring a change into the sugar duties. The projected change has been sent to the Bureau of Deputies, but the contents are not yet published. It seems, however, that it only contains some small alteration and not a fully renewed bill.—Willett & Gray.

New York ginger ale and other summer beverages, handled by W. H. Gillard & Co., Hamilton, who are the sale agents for the grocery trade, are particularly fast sellers during the hot weather. They show the retailer a handsome profit, and those not handling the line would do well to order a five case lot from the above firm.

MONTREAL MARKETS

MONTREAL, June 6, 1895.

GROCERIES.

THE grocery market has not shown any striking change in the matter of business during the past week. There are signs, however, of more activity in sugar, as stocks are becoming exhausted and refiners will for the first time resume business on the new basis. In tea new crop Japans have sold at 35c., while in molasses the excitement that we referred to last week has continued, and holders look for even higher prices. In dried fruits matters are much the same as they were, and the same can be said of canned goods, coffees, spices, nuts, etc. In lemons there has been a moderate boom and a sharp advance in price, but other green fruits are unchanged in their position.

SUGAR.

The sugar market is showing more activity in a wholesale sense. Stocks in both second and third hands are becoming exhausted, and for the first time since the new duties refiners will begin to operate extensively on the new basis. This week jobbers are having a large increase in the volume of orders from the country, and are buying more heavily in a corresponding degree from the refineries. The range of values exhibits no quotable change, but the tone is firm and prices are more apt to advance than decline. In a jobbing way we quote granulated at 4½c. and yellows 3½ to 4c. At the refineries the basis for straight wholesale lots is 4¼c. for granulated and 3½ to 4c. for yellows.

SYRUPS.

The syrup market is quiet, but the feeling is firm in sympathy with the strength of molasses, and prices are apt to go higher in the near future. Demand rules slow at a range of 1¼ to 2¼c. for domestic in the wood in fair sized lots.

MOLASSES.

The molasses market has ruled strong and active in line with the situation described in these columns last week. Prices are now firmly held at the advance noted last week by the majority of holders, and no strictly prime Barbadoes stock can be had under 35c., though we understand that some inferior grades have been placed at country points at the equivalent of 33½c. Montreal. Owing to the light supplies of Barbadoes Porto Rico stock is receiving attention, and there have been good sized sales of it at a

price closely approaching that for Barba-
does, viz, 34c. for jobbing lots of less than
a carload, and even more than that, or 35c.
has been asked in some cases.

RICE.

There has been no change in the rice
market, demand continuing good at firm
prices. We quote jobbing prices: Japan,
\$4.25; crystal Japan, \$4.75 to \$5; standard
B, \$3.45; English style, \$3.30; Patna,
\$4.37 1/2 to \$5; and Carolina, \$7 to \$7.50.

SPICES.

The steady feeling in spices is fully main-
tained, and values show no material change.
Demand is of a moderate character as usual
at this season of the year. We quote job-
bing prices as follows: Penang black pep-
per, 9 to 10c.; white pepper, 13 to 15c.;
cloves, 15 to 20c.; cassia, 12 to 20c.; nut-
megs, 65 to 90c.; Jamaica ginger, 20 to 25c.,
as to grade.

COFFEES.

There has been no new feature in the cof-
fee market, business ruling on lines of a
quiet jobbing character. In a regular way
we quote green coffee in bags as follows:
Maracaibo, 21 1/2 to 23c.; Rio, 19 to 21c.;
Java, 25 to 30c.; Jamaica, 20 to 23c.; and
Mocha, 29 to 34c.

TEA.

First arrivals of new crop Japans arrived
here at the beginning of the week, but little
can be said in regard to them, as business
has not been of any extent. So far any that
have sold have been on the basis of 35c.
here, but only about 300 packages or so
have been disposed of. In old stock me-
diums have changed hands at 15 to 16c.,
and we quote: Japans, low grades, 11 to 14c.;
medium, 15 to 17c.; fine, 18 1/2 to 24c.; and
choice, 25 to 31c.

DRIED FRUITS.

The dried fruit market has been affected
to a certain extent by the firmness in sugar
and molasses, but there are sellers of
Valencia stock here who are still willing to
concede in the case of a turnover of Valencia
raisins. Prices on them have a wide range
owing to difference in quality, viz., from 2 3/4 c.
for common off-stalk up to 5c. for fine and
4 3/4 to 5 1/4 c. for layers.

Sultanas are scarce and firmly held, only
one firm having any quantity. These are held
at 5 1/2 to 6c., and no better prices are pos-
sible, for some fresh supplies coming for-
ward cost 4 1/2 c. net cash laid down in Mon-
treal.

There is no change in California raisins,
3-crown selling at 5 1/2 c., and 4-crown ditto,
6 1/2 to 6 3/4 c., duty paid in Montreal.

Currents continue much the same as they
were, and prices are unchanged. We quote:
Filatras and Provincials, bbls. 3 1/2 c.; cases,
4 to 4 1/2 c.; Patras, 5 to 5 1/2 c. and Vostizzas,
7 to 7 1/2 c.

The market is becoming bare of prunes,
there being only one large lot of Austrian
stock on the market, which is held firm at
4 1/4 to 5c., and there are only a few hundred
boxes of French goods here, which are held
at 4c.

Prices very low. Send for quotations to

THE DOVER VINEGAR WORKS
PORT DOVER, ONT.

MONTREAL MARKETS—Continued

Dates are firm in tone and higher under diminishing stocks, at 4 to 5c., as to quality.

Dried apples sell at 6c., and evaporated 6½ to 6¾c.

NUTS.

There is only a moderate jobbing trade doing in nuts. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 12 to 13c.; shelled ditto, 24 to 25c.; filberts, 6½ to 7½c.; and pecans, 8 to 10c.

CANNED GOODS.

There is nothing new to report in the canned goods market of a striking character. The general tone is steady and values rule as they were last week. There has been a fairly good demand for vegetables, peas, corn and tomatoes receiving attention. In canned salmon nothing new is spoken of in addition to the bids that we noted the other week, and canners are still asking in the vicinity of \$4.50, f.o.b. on the coast. We quote: Lobsters, \$1.50 to \$1.90 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.20 to \$1.45 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$2.75 per doz.; corn, 85 to 90c. per doz.; peas, 85 to 90c. per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, \$1 to \$1.10.

GREEN FRUIT.

APPLES—The apple market rules quiet but firm. Fine stock is very scarce and dear at \$5 to \$6 per barrel, while medium are held at \$3 to \$4.

ORANGES—The orange market is quite active in a jobbing way and prices fairly steady. In half boxes they range from \$1.50 to \$2, and in boxes, \$3 to \$4.50, as to brand.

LEMONS—There is a regular boom in lemons, which have advanced sharply, and are now held at \$4 to \$5 per case.

BANANAS—The market is glutted with this fruit and they sell for almost anything. We quote: 45c to \$1.50 per bunch.

PINEAPPLES—Large receipts have overwhelmed the demand and prices have declined sharply to 3 to 8c each, as to quality.

COUNTRY PRODUCE

EGGS—The egg market is quiet and steady at 10 to 10½c per dozen.

MAPLE PRODUCTS—Syrup sells at 50 to 60c, and sugar at 4½ to 5c., as to quality.

HOPS—Dull and unchanged at 5 to 8c.

HONEY—New extracted ranges from 7 to 9c., and comb stock 10 to 12c.

BEANS—Dull and unchanged at \$1.60 to \$1.75 for hand-picked, and \$1.25 to \$1.50 for lower grades.

POTATOES—Sell on the track in car lots at 60c., and in jobbing lots, ex store, 65 to 70c.

ONIONS, DOMESTIC—Are quiet and steady; yellow, \$2.25 and red \$1.90 to \$2 per bbl.

ONIONS, IMPORTED—Bermuda onions are unchanged at \$2 to \$2.75 per crate, and Egyptian \$2 per bag.

PROVISIONS.

The demand for local provisions continues slow, and the market rules quiet and without any new feature to note. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

The demand for flour has been good and prices firm. We quote: Winter wheat, \$5.50; spring wheat, patents, \$5.15; straight roller, \$5 to \$5.25; straight roller, bags, \$2.35 to \$2.40; extra, \$4.30 to \$4.40; extra, bags, \$2.25 to \$2.30; Manitoba strong bakers', \$5.

In feed the feeling is steady. The demand continues good and millers state they are kept well sold up. We quote: Bran, \$16 to \$16.50; shorts, \$19; mouillie, \$23 to \$24.

The market for oatmeal is firm, but business rules quiet. We quote: Standard, bbls., \$4 to \$4.05; granulated, bbls., \$4.10 to \$4.15; rolled oats, bbls., \$4.10 to \$4.20.

BUTTER.

Nothing new can be said about the butter situation. The market continues dull and heavy, business to-day being confined as usual to a small jobbing trade. We quote: Creamery, 14 to 15c., and fresh Townships dairy, 13 to 14c.

CHEESE.

The cheese market has been an excited one since our last, and speculative buying in the country sent the first cost of cheese 1c. above what it was a week previous. On spot the market is slow to follow suit, and the same can be said about the English market, which is fully ½c. below the ruling price in Montreal. English offers are 36c. c.i.f. for prompt shipment, or about 7½c., and 38c. for June cheese, or 7½ to 7¾c. These offers mean that either the British buyers have to advance their views or that sellers on this side will have to concede. If the latter happens last Saturday and Monday's purchases are not likely to be profitable ones. The ruling price at the wharf Monday morning was about 7¾ to 7½c., for only a few were bought at 7¼c., and the outside price of 7½c. was made only for one pet combination. Based on these purchases spot values are now 7¾ to 7½c. on Quebec cheese, with Brockville nominal for the moment. It is understood, however, that some Ontario makes sold at 7¾c., but it is hardly likely that a buyer will be able to get them at this price again.

ASHES.

Receipts of ashes are small and the market quiet and steady at \$1.10 for first pots, and \$3.75 to \$3.80 for seconds, and pearls \$5.65 per 100 lbs.

MONTREAL TRADE NOTES.

About the only large holders of Austrian prunes on this market are Vipond, McBride & Co.

Kennedy, Greig & Co. have just received a large consignment of Carr & Co.'s English biscuits.

Another shipment of Bryant & May's matches were received this week by Kennedy, Greig & Co.

Hart & Tuckwell have been the largest receivers of pineapples this week. Stocks of these are heavy at the moment.

A line of some 3 500 packages new crop Japan tea is anticipated this week, and is offering to arrive around 35c. per lb.

There are only a few French prunes left on this market, possibly, at the outside, 200 boxes. The holder wants 4c. for them.

The Dracona's cargo which sold on Friday last comprised 12,000 pkgs. lemons and oranges. The oranges brought \$1.50 to \$2.50 per box, and the lemons from \$1.50 to

\$4, according to quality. The only out-of-town buyers present were Mr. John Dixon, of Dixon Bros., Hamilton; R. Barden, of Quebec, and H. A. Broue, of Ottawa. The principal local buyers were Hart & Tuckwell, R. C. Barry, of John Barry & Son; J. J. Vipond, G. Vipond, of Vipond & McBride; O. & E. Hart, McBride, Harris & Co., J. R. Clogg & Co., Bowes & McWilliams, Montreal Fruit Exchange, L. Sylvestre, T. S. Vipond, W. Vipond, O. Laird, Jos. Grenier, Jos. Brown and W. Paul.

Two of the leading wholesale grocery houses placed their first order for refined sugar since the new duties on Tuesday morning last.

Kennedy, Greig & Co. have been appointed by the Albany Caramel Co. Canadian agents for their caramel paste used in making high-class confectionery.

Laporte Martin & Co. are large holders of fine Barbadoes molasses. They call their friends' attention to the fact that the market has an advancing tendency.

The advance in lemons this week of over 50c. per case is in sympathy with the small sized boom which set in in New York early in the week. Holders here are very firm.

There have been sales of car lots of Barbadoes molasses at Berthier, Que., at the equivalent of 33c. in Montreal. The goods in question can hardly have been strictly prime A1 stock.

It is understood that a cargo lot of molasses has been sold in Boston by Jno. Pender & Co. on very advantageous terms. This draws upon Canadian stock.

A. K. McCullough has been admitted to partnership in Kennedy, Greig & Co. The style of the firm is unchanged. Mr. McCullough is connected with the Philadelphia branch of the firm.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., June 6, 1895.

WE have now entered upon the last month of the half year, and unless something unlooked for happens, it will have been the best half year in the grocery trade for a long time. The way business is now conducted it is hard to make money on an even market. And to make money on a falling market doing straight business is next to impossible; but all must make some money and many a great deal when one month shows an advance such as the last. And the improvement is not only in grocery lines, but our cotton manufacturers and tanners, and what is of great importance to St. John, our lumbermen and even in some cases our ship owners feel the influence, though in the case of the latter it is largely confined to owners of small vessels. In lumber there has been as much advance as in other lines; spoken of, but the demand is good at fair prices and the lumbermen have, to a much larger extent than usual, got their logs forward and but a small quantity will be hung up. Ocean freights continue very low, but there is a demand for small vessels to bring lumber to St. John from outside mills, and particularly to take lumber to the States. The freights are not high, but so much better than has been the rule that owners are

pleased. An advancing market, however, presents this difficulty to the correspondent: He finds his quotations old before they are in the hands of the readers, but then the principal thing is obtained. The readers see the tendency of the market, and as long as the movement is upward we have not a word to say. Still there are some who are unfortunate holders of old butter and cheese, and it is learned that some of our farmers have hay three years old in the barn, with prices lower than ever, in fact with no demand at all. And with many it is a question where to put the new.

OIL—The American market has somewhat recovered from the reaction of a few weeks ago, and has again advanced $\frac{3}{4}$ c. In Canadian, though the price is firm, there is no change. The demand at this season is very light in burning oil, and even in lubricating, the mills having got their spring supplies, there is little moving. We quote: American, best quality, $22\frac{3}{4}$ c.; Canadian, best, 21c.; Canadian, second grade, 17c.

SALT—During the past week a cargo of some 6,000 bags were landed and found fair demand. The price is about 46c., from the ship's side to the wholesale trade. There are fair stocks, but the market is quite firm, as, what is most unusual at this season, there is not a cargo afloat from England for here. So that for some time any further supply wanted will have to be brought from Boston. It will on that account cost higher. The reason of no salt coming here from England at present is the low freight offered on lumber from here to the other side. We quote ex store prices: Coarse, 50 to 55c.; fine factory filled, 95c. to \$1.10; 5-lb. bags, \$3 per bbl.; 10-lb. bags, \$2.80 per bbl.; 20-lb. boxes, 20c.; 10-lb. boxes, 12c.; cartoons, \$2 per doz.; bbls. bulk, dairy, \$2.80; bbls. bulk, cheese, \$2.70.

CANNED GOODS—Though prices do not show the advance which other lines do, some goods are higher, such as peaches and beef. All lines are firm and ruling higher. Demand is good, while the stock is not large. Vegetables rule high, buyers finding holders less inclined to shade prices than they have been. Salmon are very firm, and oysters, though no higher here, have advanced slightly in Baltimore. We quote: Corn, 90c. to \$1; peas, 95c.; tomatoes, \$1 to \$1.05; corned beef, 2 lb. tins, \$2.90 to \$3; 1-lb. ins, \$1.75 to \$1.80; oysters, 2's, \$2 to \$2.25;

1's, \$1.60 to \$1.65; peaches, 3's, \$2.95 to \$3; 2's, \$2 to \$2.10; lobsters, \$1.75 to \$2; haddies, \$1.40; salmon, \$1.40 to \$1.50; flat, \$1.75; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—This is a quiet line at this season. Prices are not active, and are ruling low, though rather firmer than at last quoting. Prunes, which were thought to be rather firmer, are dull, and are selling low. Some cask prunes of not very good quality which have been sold here have hurt the market. Evaporated and dried continue dull at the lower figures. Raisins are, perhaps, firmer, but holders are anxious to sell, and low prices rule. California loose muscatels are favorites, and, though low, are firm. Peanuts have advanced $\frac{3}{4}$ c. during the month. We quote: Sultana raisins, 6 to 7c.; Valencia, 4c.; layers, 5c.; London ayers, \$2.10 to \$2.25; California loose muscatels, $5\frac{1}{2}$ c.; currants, bbls., $3\frac{3}{4}$ to 4c.; half-cases, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; evaporated apples, 8c.; dried apples, $5\frac{1}{4}$ to $5\frac{1}{2}$ c.; dates, 4 to $4\frac{1}{2}$ c.; prunes, 4 to 5c.; figs, 11 to 18c.; Bermuda onions, \$1.60 per crate; Egyptian, 2 to $2\frac{1}{4}$ c.; California evaporated peaches, 12 to 13c.; ditto apricots, 12 to 14c.; do. pears, 12 to 13c.; cleaned currants, bulk, $6\frac{1}{2}$ c.; do. 1 lb. cartoons, $7\frac{1}{2}$ c.

GREEN FRUIT—Demand is very active. In oranges prices rule higher, as also in lemons. Bananas are costing higher and dealers complain of two light profits. In pineapples not many are arriving, prices ruling too low here to pay to import. Strawberries are rather firmer. The demand is good and the quality fair, but improves from week to week, which is one reason for better prices. Rhubarb is now in active demand and prices are low, quantities coming forward. We quote: Valencia oranges, \$6 to \$6.50; Messinas, \$3.50 to \$4; lemons, \$3.50 to \$4.50; strawberries, 15 to 17c.; pineapples, 10 to 15c.; rhubarb, 1 to $1\frac{1}{2}$ c.; bananas, \$1.75 to \$2.25; California oranges, \$3 to \$4; extra Valencias, \$7.50; blood oranges, half-box, \$2.50.

MOLASSES—This still remains a matter of interest. Perhaps no line is in better shape, for while the percentage of advance is not as high as in some other products, stocks here are light and not large enough for the demand, nor can they be replaced as easily as other goods. Many importers think it

odd that while when prices were at their limits there was no stock, at advanced prices there is stock, and are inclined to charge dealers at the islands with treating them unfairly. Prices are very firm with dealers and buyers, and higher prices are expected. In quotations of St. Croix it should be remembered there is a difference in quality, some being very good. A cargo of Porto Rico is daily expected and another is on the way. We quote: Barbadoes, 34 to 35c.; St. Croix, 32 to 34c.; Porto Rico, 37 to 38c.; syrup, 35c.

SUGARS—Demand from wholesalers is good. They are not in many cases buyers, as stocks are still large, and this is not a market where one can unload quickly, as there is just so much sugar sold, and when a certain quantity is bought there is no demand. Holders who bought for speculation are not pushing sales. In some cases they are not offering. The market is firm and higher prices are expected. The season for the largest consumption is just about to hand. We quote: Granulated, $4\frac{1}{2}$ to $4\frac{5}{8}$ c.; yellow, $3\frac{1}{2}$ to $3\frac{3}{4}$ c.; Paris lump, 5 to $5\frac{1}{2}$ c.; pulverized, 5 to $5\frac{1}{2}$ c.

DAIRY PRODUCE—The market is in rather better condition with the new goods to hand. Old dairy butter is still a drug but new is in fair demand for good quality. It is strange how blind some are to their best interests. Some new coming to the market is found to be mixed with old, which, in place of working off the old, as shippers blindly think, is killed itself. Creamery prints are in good demand at fair prices, and tubs could also be sold were creameries willing to sell at market rates. Creameries should be careful and not, for the sake of a small saving, put their butter up poorly. Some splendid new cheese are in the market. New Brunswick factories have sold at $7\frac{1}{2}$ c., but only a few cheese as yet; the most in the market are either from Quebec or Ontario. There are still a good many old cheese. Eggs are in fair demand, with stocks light. It is hoped shippers will not hold for higher prices. We quote: New cheese, $8\frac{1}{2}$ to 9c.; new butter, 16 to 17c.; old creamery, 15 to 16c.; dairy, 12 to 14c.; cheese, 9 to $9\frac{1}{2}$ c.; eggs, 9 to 10c.; fresh creamery prints, 18 to 20c.

FISH—Market in dried, pickled and smoked is easy, with light demand, particularly for small cod and smoked herring. The principal interest is in fresh. In gaspareaux

ST. JOHN MARKETS—Continued.

the catch continues but fair, while in shad it is light, as is the supply of halibut and lobsters. Salmon are coming in more freely, and those interested are making all arrangements to handle the large quantities which are soon expected. Mackerel are not caught here. We quote: cod, \$3.95; large, \$4; small, \$2.75; pollock, \$1.65 to \$1.70; bay herring, \$1.40 to \$1.50; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; shad, fresh, 8 to 10c.; smoked herring, 6 to 7c.; Digby chickens, 10 to 12c.; halibut, 7 to 8c.; gaspereaux, 50 to 60c.; smoked, \$1; lobsters, \$6; fresh salmon, 14 to 15c.

PROVISIONS—Demand is only fair. Beef is firm, having advanced during the past week. Rolls are also quoted higher. The movement in smoked meat at this season is not large. We quote: Clear pork, \$18.50 to \$19; mess, \$16.50 to \$17; prime, \$13 to \$13.50; extra plate, \$14.50 to \$15; plate, \$13.50 to \$14; pure lard, 9½ to 10½c.; compound lard, 8½ to 9c.; cottolene, 9¼ to 9½c.; hams, 11 to 12c.; rolls, 9½ to 10c.; beef, half-barrel, \$7.

FLOUR, FEED AND MEAL—In flour there has been another slight advance during the week. Demand continues good. On account of stocks held dealers are not now buyers. Feed is very scarce and rather higher. In oatmeal the price here is below millers' figures, and just why it is hard to say, as everything points to further advances; but this is a feature of our market, perhaps because it is small. Prices are much higher than last week, as they are in oats, which have advanced 4 to 5c. Cornmeal is firm at advance. We quote: Manitoba, \$5.65 to \$5.75; best Ontario, \$5.50 to \$5.55; medium, \$5 to \$5.25; oatmeal, \$4.50 to \$4.60; cornmeal, \$3 to \$3.10; middlings, \$25 on track; bran, \$22.50 to \$23; hand-picked beans, \$1.90 to \$2; prime, \$1.80 to \$1.85; split peas, \$3.70 to \$3.90; pot barley, \$4 to \$4.25; hay, on track, \$8.50 to \$9; oats, on track, 48 to 52c.

ST. JOHN TRADE NOTES.

There is talk of a central winter creamery at Charlottetown.

The Amherst Boot and Shoe Company have declared a dividend of 10 per cent.

The popular Hotel Dufferin is again open, having been entirely refitted throughout.

Mackerel are being taken in large numbers near Yarmouth. During last week the value of the catch was \$15,000.

Port Elgin, Westmoreland County, has a drug store. It is carried on by Frank A. Sharpe, late with Messrs. S. McDiarmid & Co., of this city.

The cargo of Porto Rico spoken of is to hand. Price while landing, 34 and 35c. Baird & Peters are the importers.

Chatham has a new market under the suggestive name of Cash and Co. The clean and attractive manner in which things are kept is having its effect upon the other stores.

The factory of the Havelock Mineral Spring Company is a total loss through fire. The company are at present putting up their goods at Petitcodiac, the water used being taken there by rail.

A number of our merchants are showing business enterprise in the handsome delivery wagons they have. Two new ones are to be seen this week. Messrs. Dearborne

& Co. have perhaps the handsomest wagon ever seen here. It was imported from Ohio. The horse and harness are in keeping, and it is said the goods sold are also of the best. They divide the city into three divisions, visiting each twice a week. Messrs. F. C. Colwell & Co. have also a handsome new delivery team.

There is a report that Truro is to have another condensed milk factory. This is one of the most alive towns in Nova Scotia, and has already a widespread reputation as a condensed milk centre.

While some lobster canning factories say they will have to close if they cannot get more lobsters, the report from some twelve, situated along about four miles of coast at Cape Traverse, P.E.I., is that they find the catch better than usual.

WOODSTOCK, N.B., MARKETS.

June 6, 1895.

Business during the week has been more satisfactory, and with the fine weather and in many lines new goods, and with the country looking splendid, there seems to be new confidence as well. Old butter, though still a drug, is not seen in such large quantities, and good new is finding a fair demand. Quite a few oats are being brought in, which sell at fair prices, and with such strong markets they should be good value. Even hay appears in better condition. The Boston market is firmer and shipments show good results. Potatoes are bringing better prices than across the line. Cheese are lower owing to quite a number of old being put on the market. We quote: Hay \$5.50 to \$6; old butter, 10 to 11c.; new, 14 to 15c.; oats, 36 to 28c.; yellow eye beans, \$1.75 to \$2.; potatoes, 60 to 75c.; maple sugar, 9 to 10c.; cheese 8½ to 9c.; eggs, 9 to 10c.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, June 6, 1895.

THE week has been marked by a dullness in trade in the city, but a fairly good business throughout the province.

FLOUR—Markets remain much the same as last report. Choice 70 to 80 p.c. patents are quoted at: from \$5.20 to \$5.50, but here an offer of \$5.10 to \$5.25, according to the grade, is not refused, whilst we have heard of some 90 p.c.'s being sold as low as \$5. We quote: Hungarian patent, Manitoban, \$5.60 to \$5.75; Manitoba strong bakers', \$5.50 to \$5.60; Canadian pastry, \$5.40 to \$5.60; 75 p.c. roller patents, \$5.25 to \$5.35; 80 p.c. do., \$5.15 to \$5.25; 90 p.c. do., \$5 to \$5.10; straight, \$4.90 to \$5.10; extra, \$4.65 to \$4.75.

CORNMEAL—Sales of cornmeal were made last week at \$3, \$3.10 and \$3.15, and towards the close of the week as high as \$3.25. The latter is the extreme price to-day.

OATMEAL AND ROLLED OATS—A carload of oatmeal and rolled oats on the spot here was sold as low as \$4.25 to \$4.35.

MILLFEEDS—Millfeeds are not much in demand, but are scarce and high in price.

PROVISIONS—The provision market is extremely dull, and prices in most lines are

DELHI, ONT.

down. Canadian beef is steady at last week's quotation. Native beefs is quoted at \$8 to \$8.50. Mutton is down to 8c. Spring lambs are worth \$3, a drop of \$1. Veal is worth 4c. Dressed pork is quoted at 7½c. Bacon has stiffened and is quoted at 8¼c., an advance of ¼c. Hams have advanced ½c., being quoted at 11¼c.

POULTRY—The poultry market is dull and stocks are low. Fowls are worth 50 to 55c. per pair and turkeys sell at \$1 to \$1.38 each.

FISHSTUFFS—There is very little to report in fishstuffs. Mackerel are being taken freely on the coast, and are large and fat. They are shipped on ice to Boston. Quotations, tol. qual., are: Dry cod, shore, prime, \$2 to \$3; do., small bank, \$2 to \$2.75; do., large do., \$3.75; haddock, Cape Breton, \$1.75 to \$2; pollock, \$1.75 to \$2; herring, Bay of Islands, split, No. 1, \$1.50; alewives, No. 1, \$2.50.

SUGARS—The refineries still report business slow on new orders, but a large quantity of sugar moving. Prices remain unchanged. Raw sugars are reported stiffer.

BEANS—There is only a fair trade being done in beans, at \$1.85 to \$1.95.

CHEESE—The cheese market remains depressed. New cheese is arriving, although the supply of old is large. Old September was offered to-day at 9½c. New Quebec was also offered in small lots at 8½c.

PRODUCE—The potato market is flat, and 35c. is a good price to day. Oats are firm and scarce, western being quoted at 48c.

EGGS—The market is well supplied with eggs, but the trade is wretched, dealers declining to pay over 8½c. Retailers are only asking 10 and 11c. To ship eggs to this market at the present time means to lose money.

BUTTER—There is little or no change in the butter market. Good dairy is selling at from 15 to 16c. Extra good creamery is offered at 18c. Provincial creamery prints are offered at 21c.

CANNED GOODS—This line is a little stiffer, especially in fruits, but while there is an advance in Ontario, merchants are selling at about the old figures here.

GREEN FRUITS—The green fruit market is very quiet this week and prices remain unchanged.

DRIED FRUIT—There is only a fair demand for dried apples. Prunes are in fair demand. Valencia layer raisins, off stalk, are offering at 4½c.

HALIFAX MARKET NOTES.

J. A. Leaman & Co., who lost so much stock at the recent fire, have just received over 100 head of cattle from Guelph, Ont.

A good fruit crop is expected from the Annapolis valley.

Summerside, P.E.I., market prices are as follows: Beef, carcass, per lb., 5 to 7c.; beef, cut, per lb., 3 to 12c.; mutton, per lb., 8c.; lamb, per quarter, 50 to 60c.; pork, per lb., 5½ to 6c.; ham, per lb., 10 to 12c.; eggs, per doz., 8 to 9c.; butter, per lb., 14 to 16c.; oats, per bush., 36c.; hay, per ton, \$6.50 to \$7; potatoes, per bush., 20c.; turnips, per bush., 15c.; hides, per lb.; 5c.

Sunday was the hottest day experienced in Hamilton for many years. The mercury went up to 97½. Monday the thermometer registered 95.

WILL BE NO INSOLVENCY LAW.

Discussion in the Senate last week and the tenor of press despatches from Ottawa indicate that the Insolvency Bill will be smothered ere it is brought forth.

When the bill was laid over last session, the late Sir John Thompson, the then Premier, declared that it was merely for the purpose of giving those most interested in the measure an opportunity of acquainting themselves with the provisions before it finally became law, which would be at the ensuing session. This was to all intents and purposes a direct pledge that the session of 1895 would see an Insolvency Law placed on the statute book. And it was so understood.

In the assurance that this would be the case, the different Boards of Trade in the country and business men generally interested in the passage of the bill did not concern themselves in the matter.

But the results show how little is the confidence business men can place in the promises of a Government, which does not feel the needs of the mercantile community because of the lack of the sympathy born of a lively connection with the same. Where there is not knowledge there cannot be sympathy, and where there is no sympathy legislation in the interests of the trade and commerce of the country is not to be expected. This peculiarity is no more characteristic of the Conservative than of the Reform party. They are both weak in mercantile material.

And the fact that those who memorialized for an insolvency law last session of Parliament did not do so this is being used as an argument against the passage of the bill now before the Senate. Could anything be more absurd? It is patent to everybody why they did not memorialize. But had the advocates of an insolvency law been aware that any such card would have been played they would have shown a hand that would have compelled the opponents of the measure to play something better than they did if they hoped to win the game.

Had the Government been as earnest in the matter as it should have been the chances for the passage of the bill would be as strong as they are now weak. The pledge of Sir John Thompson was bequeathed to his successors, and if they possess that honor which men in their position should they will stand firm for the passage of the bill, as is the custom with ordinary Government measures.

BIG ADVANCE IN LEMONS.

The change in the weather has not affected the demand for lemons, which continues active in spite of the steady advance in prices. This week's auction sale was the first of consequence since last Wednesday, and realized prices from \$1 to \$1.50 higher than those paid then. Jobbers have been very

busy for the past few days, and claim to be far behind their orders. The demand from the West is particularly large, and the local trade is also buying freely. Jobbing prices were advanced 50 to 75c. on choice and \$1 on fancy fruit to-day.

The supplies of lemons on the way to this port are reported to be much lighter than the average shipments for this season of the year.—N. Y. Journal of Commerce, June 5.

This advances noted above will naturally affect the Canadian market.

HOW TESLA CREATES LIGHT.

Between us and the sun, says a writer in April Century, stretches the tenuous, sensitive ether, and every sensation of light that the eye experiences is caused by the effect of five hundred trillions of waves every second impressed on the ether by the molecular energy of the sun travelling along it rhythmically. If the waves have a lower frequency than this 500,000,000,000,000, they will chiefly engender heat. In our artificial methods of getting light we imitatively agitate the ether so poorly that the waves our bonfires set up rarely get above the rate at which they become sensible to us in heat, and only a few waves attain the right pitch or activity to cause the sensation of light. At the upper end of the keyboard of vibration of the ether is a high, shrill and yet inaudible note—"light"—which we want to strike and keep on striking; but we fumble at the lower bass end of the instrument all the time, and never touch that topmost note without wasting the largest part of our energy on the intermediate ones, which we do not at all wish to touch. Light (the high note) without heat (the lower notes) is the desideratum.

Now, Mr. Tesla takes his currents of high frequency and high potential, subjects the incandescent lamp to them, and, skipping some of those intermediate wasteful heat stages of lower wave vibration experienced in the old methods, gets the ether-charged molecules more quickly into the more intensely agitated condition necessary to yield light. Using his currents, produced electromagnetically, as we have seen, to load each fugitive molecule with its charge, which it receives and exercises electrostatically, he gets the ether medium into a state of excitement in which it seems to become capable of almost anything.

The Brantford Board of Trade has recommended that aldermen in cities and towns be elected by the municipality at large, and that the city should not be divided into wards.

Traffic to all points from Revelstoke, B.C., has improved greatly during the past three weeks and the lake steamers are fully occupied. Revelstoke, as the distributing point of supplies, shares in the general improvements.

WINDOW DRESSING DEPARTMENT.

A VERITABLE piece of Chinese miniature landscape work is to be seen these days in one of the big plate-glass windows which front MacWillie's Yonge street grocery emporium. It represents a section of land and water at some quiet summer resort. In the background is seen a green hillside, sloping towards the little island-dotted lake which fills the foreground. At the summit of the grass-covered, wooded height is perched an inviting cottage; midway down the slope stands a rustic garden house, and from amidst the trees in the distance peeps out a white tent. A canoe half drawn up on an island lends additional reality to the whole. The scene is intended to draw attention to the fact that campers' and tourists' supplies are kept within, and, from the window, great piles of canned goods, fruit and confections are espied. The whole affair is gotten up in great taste at little expense, and with the crude materials ready to any grocer's hands.

KEEP BULK WINDOWS DECENT.

For the love of business, says Grocery World, keep your grocery windows well and cleanly displayed. If there is anything above another which demonstrates a retail grocer's progressiveness or the reverse, it is the appearance of his bulk windows. A great many grocers think too little of this feature. They neglect it under the false impression that people, as a rule, don't expect to see much of a display in a grocery window.

If this is true, it demonstrates more clearly than anything else how much of a hit a live grocer could make by instituting a radical departure in this line and making his windows so unusually attractive that passers by would stop in the street to look at them. It is not true, however, in the sense in which it is usually taken. People may not, as a rule, expect to see elaborate displays in grocery windows, but they do expect to see them kept clean, and, if they are not so, insensibly will cherish that in

their minds as a criterion of the grocer's entire business methods.

We have no hesitation in asserting that at least seven out of ten retail grocers' windows throughout the country need cleaning at this moment. They very probably contain an antique collection of fly-blown articles, built upon a quarter-inch layer of dust, the accumulation of long years of neglect.

In one grocery store the writer knew of, the bulk window was the regular loafing place of the store cat, who calmly basked amid open boxes of raisins and other eatables of like character. In the season when cats shed their fur the spectacle of this window was a magnificent advertisement for the competitor who kept his windows clean, and the writer positively knows of business which was lost through this inexcusable carelessness.

Rather have your own hands soiled than dirty windows. But there's no excuse for either.

TURNED DOWN AGAIN.

THE CANADIAN GROCER backs up the agitation inaugurated by the Board of Trade in favor of a 1-cent delivery rate for city letters. "Private companies," it says, "will deliver letters in any part of the leading cities at 50 to 80 cents a hundred, and they make money at it. Business men ask the Government, which should do it very much cheaper, to make the rate \$1 per hundred, and they answer they would lose money. If the present Postmaster-General cannot pay expenses with a rate 25 per cent. higher than a private company makes money on, we should get a man who can." THE CANADIAN GROCER predicts that the petitions and letters on the subject, though coming from the most influential merchants in Canada, will be pigeon-holed, because "business men, as a rule, do not figure in a Government's calculations."—Montreal Herald.

Our prediction was correct. The Postmaster-General has announced that he will

not pay any attention to these petitions. He is a lawyer, and therefore not in sympathy with the business community. Is it not time the Boards of Trade gave the Government to understand they mean what they say? Until they do so business interests must suffer.

GERMAN SUGAR BOUNTY.

The Berlin correspondent of The London Economist writes: "The Reichstag has voted the maintenance of the existing export bounties on sugar after July 1st until July 31st, 1897. In the course of the debates, the Secretary of the Treasury pointed out that this action was necessary because of the depression in the sugar trade, which affects, in a large measure, the interests of agriculture, and chiefly because of the export bounties in France. The export bounties in France were in 1893-94, 5.85 marks; in Austria, 1.92 marks; and in this country, 1.25 marks. At present the abolition of the export bounties would kill the German sugar export. The interests of agriculture are closely connected with this question. The sugar establishments produce but 12 per cent. of the beets they use; 33½ per cent. are produced by the shareholders of the sugar companies, and 54½ per cent are produced on agricultural estates. At present, one centner beets brings but 70 pfennig, which leaves no profit. The argument that some sugar companies pay very well is inadmissible, for they are exceptions. About eighty companies have paid no dividend at all during recent years. The production of raw sugar is reported on as follows: August 1, 1894, to April 30, 1895, 16,592,281 double cwts., against 12,482,658 double cwts. in the corresponding period last year, which is an increase of about 25 per cent. The year 1893-94 produced 12,705,075 double cwts.; 1890-91, 12,844,850 double cwts. The production of refined and common sugar, from May 1, 1894, to April 30, 1895, is reported at 7,432,705 double cwts., against 6,427,603 double cwts. last year. The total production last year was 8,196,290 double cwts., a figure which is sure to be exceeded this year. Sugar exports have also risen; up to April 30 they amounted to 7,040,974 double cwts., against 5,442,654 double cwts. last year. The increase of exports amounts to 36 per cent."

TRADE CHAT.

THE Chatham Water Works Company are now asking \$150,000 for their plant. The city recently offered them \$125,000.

The fire insurance adjusters have arranged all claims for the late fires in Simcoe.

In Toronto on Friday, Saturday and Sunday the thermometer stood at 94, 92 and 94 deg. respectively.

The Customs collections at Brantford for May were \$9,960.42, and in the corresponding month last year, \$7,557.92.

The demand for Tillson's Gold Dust cornmeal is so great as to necessitate the running of the mill night and day.

Twenty thousand bushels of wheat were sold in the Winnipeg Grain Exchange on Saturday at one dollar per bushel, afloat at Fort William.

The Kamloops, B. C., City Council will offer the Electric Lighting Co. \$4,000 for its property subject to ratification of a by-law by the people.

The Hamilton station of the Toronto, Hamilton & Buffalo Railway will cost about \$30,000, and must be completed by August 23rd next.

The St. Thomas Board of Trade has chosen officers as follows: W. H. King, president; John Campbell, vice-president

J. W. Stewart, secretary-treasurer; council, J. H. Hill, R. Potts, J. M. Green, J. Mickleborough, W. H. Murch, McDonald Fraser, and the president and vice-president; auditors, S. H. Palmer and W. E. Leonard.

The Ogilvie Milling Co., instead of building at Winkler, Man., as previously announced, have, it is reported, bought out McMillan's elevator there.

At Sau't Ste. Marie the operators of the Canadian canal have been ordered to report for duty this week. The Government have decided to open the canal on June 13.

Beginning on June 1 the millers of Western Ontario put up their flour for sale locally in barrels and half-barrels, and instead of a bag containing 100 of flour, it will contain 98 pounds, or just half a barrel. This is in conformity with the custom of millers east and north of Toronto.

On Friday at midnight the St. Mary's Falls canal closed the greatest month's business in its history. The total number of passages for the month was 2,441, an average of 77 a day. When the new lock is completed the tonnage will be almost doubled.

The British Columbia Oil and Guano Co., Limited, which is erecting and equipping a factory on the Fraser river for the manufacture of oil and guano from the fish offal of the canneries, is well advanced in

its enterprise, so that Mr. T. Watts, the manager of the company, states that there is no doubt it will be ready for business at the opening of the canning season.

Owing to a cut in prices by some of the bakers, the price of bread has dropped again to 5 cents in London, Ont.

Chas. B. Thompson, formerly of Ingersoll, Ont., and a nephew of Warren and Ben Marr of this city, lately entered the employ of Thompson & Taylor Co., the largest spice and coffee house in America. The young man is ambitious and wide-awake and will doubtless make excellent progress here.—Chicago Canadian American.

The Smiley-Hemstreet Company, of Otterville, Limited, has been constituted, with a capital of \$24,000, to buy, sell and deal in bankrupt stocks, those constituting it being Samson Smiley, R. H. Hemstreet, Robert Paxton and R. A. Hawes, of Otterville, and George Yull, of Windham Township.

The Molsons Bank has notified all agencies that bicycles will be supplied managers and clerks at lowest rates and monthly payments accepted therefor. It is understood that the bank officials will make special arrangements with manufacturers of four or five of the best makes of wheels and give clerks the choice. There can be no other object in the new departure on the part of the bank managers than to provide their employes with the means of securing healthful exercise and a pleasant pastime free from the temptations of the saloon.

ST. STEPHEN, N.B.

THE PRODUCTION OF TEA IN JAPAN

THE United States Consul at Nagasaki says that in that Ken, tea cultivation is conducted as follows. On inclined ground the tea is planted in furrows, but on level ground the plants are grown separately. The space between each row is about three and a half feet. On the hill sides it is planted in rows, but on the plains and near the houses it is grown in circular patches. After the first and second leaves are picked the branches are cut with shears. The object in cutting is mostly to make the plant round or semi-circular. Formerly the plant was cut down to the ground every three years. The ground is cultivated three or four times in the spring, summer, and autumn. The grasses are cut, and manure applied twice a year—in spring and in autumn. For manure, night soil, green weeds, accumulated soil, oil cakes, and fish are used. These manures are used only for plants near people's residences ; for those on the hill sides, weeding is performed twice a year, in spring and in autumn, and the weeds are used as manure.

The season for gathering first tea buds or leaves begins on the first or second of May, but in some localities first leaves are gathered about the twentieth of May. Second buds or leaves are generally allowed to grow, unless the market price is very high,

or the first leaves gathered are found much smaller than usual. In the vicinity of Omura and Hirado, however, they gather both first and second leaves. In picking leaves for the best tea, three tender leaves are picked together ; for the middle and lower classes of tea, five leaves are picked at once ; and for the lowest, all the young leaves are gathered. In picking leaves women are usually employed. The average quantity of the three leaves picked by a woman is from ten to thirteen catties a day (a catty is equivalent to 1.31 pounds avoirdupois).

The manufacture was formerly conducted in two ways, namely by drying in the iron pan or in the sun ; then drying in paper utensils was introduced, and, more recently, drying in bamboo baskets came into vogue. The method of drying in the iron pan is still extensively used. For manufacturing black tea, the Indian method was formerly followed, but at present the Chinese method is adopted. For sorting tea leaves, heated in paper utensils, round and square sieves are used, and for rolling utensils, either case or bag is used. Night soil, oil cake, dried fish, green grass, and weeds, are considered the best manure for tea plants. The hours of labor are from five in the morning until six in the evening. The daily product per man is as follows : With the iron pan, about thirty catties ; with the paper utensil, about

twenty catties ; with the bamboo basket, about forty-five catties. The women are employed only at steaming the tea leaves, and are paid only half the rate of the payment to the men. When the season arrives, the workmen are hired daily, the farmers helping each other. In Omura, contracts are made beforehand by advancing money about January or February.

FIRE INSURANCE PROFITS.

According to the returns which the fire insurance companies doing business in Canada have made to the Government, the year 1894, like its two immediate predecessors, was one of heavy losses. There are thirty-four companies doing business here, of which six are Canadian, twenty-one British and eight American. The losses paid during the year aggregated \$4,591,149. But when this is contrasted with the premiums received it will be observed that the business was highly profitable. The premiums aggregated \$6,711,369, or \$2,120,220 more than the losses. Thus, the companies had 33 per cent. of their receipts to pay cost of management and interest on investment. Since Confederation the fire insurance companies have received in premiums the enormous sum of \$112,024,078, and paid out in losses \$77,804,225, leaving a favorable balance of \$34,219,853.

"Canadian Safety" Matches . . .

Attractively and safely put up in small sliding boxes to carry in the pocket. These light only on the box, and are fully equal in quality to the imported article.

In 5 gross cases.

"Safety" Matches

In patent boxes, which serve also as match safes, being made to hang on the wall; adapted specially to hotels. The man who takes matches by the handful gets left here as "safetys" light only on the box.

In 1 gross cases.

"Favorite" Matches

Small parlor matches with blue heads, in compact sliding boxes; entirely safe from ignition by accident; a fit companion to a pipe and package of tobacco.

In 5 gross cases.

"Beaver" Matches

Parlor matches in a sliding box for house use; these are an improvement on the old parlor—ignite very readily and do not glow when flame is extinguished.

In 1 gross cases.

All these matches present the unique feature of immediately becoming cold and dead when the flame is extinguished, thereby precluding all danger from fire by "droppings" or live embers.

The above brands of matches are all absolutely odorless, no sulphurous compound being used in their manufacture.

We are sole makers in Canada, and these matches are fully equal to any of foreign make.

ANOTHER FIRST FOR THE GROCER

At the Montreal Dog Show Friday and Saturday the MacLean Publishing Co.'s famous Irish terrier, "The Canadian Ambassador," added another to his many victories on the bench. This breed is rapidly coming into favor, for there were thirty-two entered. "Pat," as he is called for short on other than state occasions, took the first prize. His companion, Biddy, was not shown. He will now spend a few days at home in the Montreal office, and after that will accompany one of the staff on a tour among the retail merchants in Quebec, for he understands French quite as well as English or Irish and Scotch Gaelic.

In its report of the show The Gazette says of the Irish terrier: "Hardy, faithful unto death, seldom quarrelsome, the red Irishman is the Bayard of his race, sans peur et sans reproche. It is really marvelous what a combination of all doggy virtues is found in his little head and body. Watch him at home on the hearth-rug with the children tugging him by ears or tail, never a whimper or a protest; see him on the street following at his owner's heels, trotting along contentedly, minding his own business; and in the quiet of the study observe our little friend as he timidly pushes his nose into the partially opened hand of his master. What a wealth of love, fidelity and devotion gleam in those dark brown eyes! It is difficult to realize that, on occasion, at the 'set on' they can prove they have the courage of a lion, and will fight on to the last breath in their bodies. There is a heedless, reckless pluck about the Irish terrier which is characteristic, and, coupled with the headlong dash, blind to all consequences with which he rushes at his adversary, it has earned for the breed the proud epithet of 'the dare devils.'

"In our own Canada the Irish terrier is rapidly coming to the front as an all-round useful dog, whose warm, rough jacket and naturally hardy constitution peculiarly fit him for the inclemency of our northern winter. Neither the hard, gray weather of England nor the snows of Canada have any terrors for him, and on one of these days when the mercury descends below zero, and it would be positively cruel to take the average dog out of doors, our Hibernian friend is perfectly comfortable."

NOTES.

J. F. Ramsay & Co. are this week in receipt of their new Japan teas for the season's trade.

The wife and daughter of A. White, the College street grocer, have returned from a trip to Europe.

J. F. Ramsay & Co. report large sales of their now famous "Club-house" blend of

India and Ceylon teas. They are making large shipments to the States as well as to Canadian points.

George Sfinway & Co., of Toronto, have been appointed agents for the Simcoe Canning Co.

A. R. Williamson, grocer, Queen and Esther streets, Toronto, is holidaying in the Old Land.

Sir Casimir Gzowski has ordered a special scale from C. Wilson & Son, of the Toronto Scale Works, for testing the strength of patients at the Convalescent Home of Toronto. It shows whether the sick are improving or getting worse.

The Buttercup Dairy Company, of Toronto, have ordered a 6 x 6 improved Wilson refrigerator, with regulating dampers and patent ice-saving attachments, same as the one shown at the World's Fair, Chicago, made by C. Wilson & Son, of Toronto.

Jas. D. Webster, assistant superintendent of the Grand Trunk Railway, has placed in one of the C. Wilson & Son patent refrigerators, it has all the 1895 improvements for preserving meat and vegetables.

The Detroit River and Erie Railway have ordered a 50 ton railway track scale from C. Wilson & Son, of the Toronto Scale Works. The scale will weigh to a fraction of a pound, up to full capacity of a loaded car.

Mr. W. E. Eardley, one of T. B. Escott & Co.'s travelers, is about to join the ranks of the Benedicts. Wise man.

WATER AND ITS COST.

THE first water works for the public supply of water in the United States were built at the city of Boston in the year of 1652, and nothing further was done in this direction for more than 100 years, suggests a writer in Cassier's Magazine. At the present time, for not less than 25,000,000 of Americans, the question of water supply presents no difficulties. For domestic use, for business purposes or for fire protection, an abundant supply is to be had at the turning of a valve. Not only is the supply abundant, in most cases, but the use of it reaches extravagant figures. In the year 1894, Chicago used 283,000,000 gallons of water per day, and Philadelphia 197,000,000 gallons. All the water was pumped from the source of supply to reservoirs or standpipes for distribution. The city of New York has a gravity supply of water, and uses 183,000,000 gallons per day. On the basis of these figures it appears that every man, woman and child in Philadelphia requires 160 gallons of water for daily use, in Chicago about 150 gallons, and in New York about 95 gallons. In some of the smaller cities the per capita consumption reaches even higher figures. Thus Buffalo is on record, in 1890, with a daily consumption per capita of 186

gallons, and Allegheny, Pa., at the same time with a daily per capita of 238 gallons. If these figures are compared with the per capita consumption of the city of London—40 gallons per day—it will be seen what lavish use of water is made in American cities, and some conception will be formed of the great system of works required to supply such demands.

The cost of waterworks of the United is estimated to be nearly, if not quite \$550,000,000, to supply the needs of about 2,100 cities and towns. In mains alone there are something like 35,000 miles of pipe, laid chiefly in the beds of the streets and highways. If we consider, besides, the great systems of laterals, branches and service pipes, and the enormous number of valves, branches, tees and other special castings required to complete these works, we begin to get some adequate idea of the extent of these waterworks systems, and to appreciate what enormous bodies of water are safely conducted under the beds of the streets and distributed over areas of many square miles. Much the greater part of this water is pumped, some of it to elevations as great as 500 feet, and it often passes through miles of pipe before its discharge through a spigot.

THE INTEREST OF A CLERK.

Every clerk, says a contemporary, who studies his own best interest should aim at all times to be improving himself, and not only able to do his present work in the right way, but prepare himself for future duties which may come to him. He not only should study to do what lies nearest to his hands, but be ever on the alert to gain information relating to the business with which he is connected. This information will come in good play some time, and, besides, it will broaden his intellect and sharpen his ideas.

On the potato patch job the old cry of "Ho! every one that thirsteth," will be changed to "Thirst every one that hoeth."

DOMINION COUNTER SCALE

With Patent Automatic
Scoop Balance

Simple in construction. Nothing complicated or
liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long,
11 in. wide.

Nickel-plated Beam, Poises and Scoop
Balance. Double Beam, marked on both
sides. The Automatic Scoop Balance is now offered
for the first time, and every grocer who uses it will find
it a great saving in time, and it will also obviate liability
to error. When scoop is placed on the platform, the
ball on back end of beam automatically rolls to the
right, thus balancing scale with scoop on, and when
scoop is taken off scale, the ball rolls to the left, balancing
scale without scoop. Scale with this latest device
is assuredly the most complete and desirable scale for
general use in the market.

SODA FOUNTAIN HINTS.

A GREAT many people don't seem to know how to draw a glass of soda, says Canadian Baker and Confectioner. We had an experience of this kind a day or two ago in an establishment in London, Ont., where, on asking for an ice cream soda with coffee flavor, we were served with a glass of the worst slop we ever attempted to down. The store is one of the principal ones on Dundas street, too. The best results, provided the soda syrup and ice cream are properly made, are obtained by putting the syrup into the glass first, and turning in the fine stream, then the coarse, until the glass is half full. Then add the ice cream and fill to the top, alternating the streams. This keeps the ice cream from sticking to the sides or mushing, and ensures the syrup being thoroughly mixed with the soda. Try this plan.

We give herewith a few recipes from the pen of one of the most successful dispensers, Mr. Saxe.

FOR A SIMPLE SYRUP.—Take six pounds granulated sugar and one gallon of filtered water, and allow the sugar to dissolve in the cold water. Strain into cold jars.

RASPBERRY SYRUP.—Twelve ounces raspberry juice, three-eighths of an ounce fruit acid, one ounce gum foam and enough simple syrup for one gallon. Add a few drops of fruit color and mix.

STRAWBERRY SYRUP.—Extract the juice from a quantity of dead-ripe strawberries through thin canton flannel. Place it immediately in a porcelain-lined kettle, and bring almost to the boiling point. Add cut loaf sugar in proportion of one and one-half pounds sugar to twelve ounces juice, and allow it to dissolve. Seal in champagne-shaped bottles and use in proportion of one quart concentrated syrup to three quarts plain syrup for dispensing.

CHOCOLATE SYRUP.—Rub thoroughly one pound of Hance Bros'. powdered soluble chocolate with a little hot water, until a fine smooth paste is formed. Put with this enough water to make one gallon, and add twelve pounds granulated sugar. Heat over a slow fire until dissolved and strain through flannel. When cold add one ounce vanilla extract.

COFFEE SYRUP.—Into a gallon percolator, having a little absorbent cotton in the bottom, put one pound of the best Mocha and Java coffee, mixed (coarse). Put twelve pounds granulated sugar in a porcelain-lined kettle directly under the percolator. Pour boiling water on the coffee and allow to percolate through into the sugar, while hot, until two gallons syrup have been made. Stir this with a wooden spoon until all is dissolved. Add two ounces gum foam, and syrup is ready for use.

BANANA SYRUP.—Mix one ounce banana

extract, one-half ounce fruit acid, one gallon simple syrup, and one ounce gum foam.

PINEAPPLE SYRUP.—Take the peel off two ripe ordinary sized pineapples and slice in small pieces. Put this into a large mortar with about one-half pound cut loaf sugar and rub together with pestle. Transfer to a porcelain-lined kettle and add one pound more cut loaf sugar. Bring almost to a boil, and after sugar is all dissolved strain through cloth, and bottle same as strawberry.

EGG PHOSPHATE.—Shake well together one ounce lemon syrup, one teaspoonful acid phosphate, one egg, and a lump of ice, to mix the egg with the syrup. Add the plain soda and pour from glass to shaker three or four times. Add a small quantity of nutmeg.

CRUSHED PINEAPPLE SYRUP.—Mix and stir with spoon one ounce pineapple syrup, one teaspoonful powdered sugar, one teaspoonful lemon juice and cracked ice. Put in enough plain soda to fill glass nearly full. Stir with spoon and add more fine shaved ice until glass is heaping full. Add a small quantity of grated pineapple, a thin slice of lemon, sprig of fresh mint and two straws; serve.

VANILLA ICE CREAM.—Prepare and cook two quarts cream, twelve eggs, one and one-half pounds sugar and one and one-half ounces vanilla sugar, adding the vanilla while cooking. When sufficiently cooked, freeze.

CHOCOLATE ICE CREAM.—Put a gill of boiling water on one teaspoonful Ceylon cinnamon, cover and let it steep for half an hour in a warm place, after which pour off the clear liquid and work it smoothly into ten ounces chocolate and keep warm. Prepare and cook twelve eggs, two quarts cream and one and one-half pounds sugar. While it is hot work into it the spiced chocolate, and cool and freeze. Serve with whipped cream spread on it.

COFFEE ICE CREAM.—Grind four ounces Mocha coffee very fine. Put one quart of cream into a farina boiler and set on the fire. When the water in the pan boils put the coffee into the cream and cover it. Cook it

for ten minutes, stirring occasionally, and put into a wide mouthed glass jar, and let it settle in a warm place. Pour off the clear portion into the farina boiler and add three pints more of cream. Cook twelve eggs, one and one-half pounds sugar, and the cream, and freeze. Serve same as chocolate.

PISTACHIO ICE CREAM.—Take two quarts cream, twelve eggs, one and one-half pounds sugar, eight ounces shelled pistachio nuts, two ounces shelled bitter almonds and one ounce vanilla sugar. Put the blanched nuts into the mortar with four ounces each of cream and sugar, and a few drops of rose water to flavor. Bruise the nuts to a fine paste and mix with the cream. Cook all materials and strain through fine muslin, or freeze in case you prefer the nutty paste in the cream. Mix coloring of green with a little water, rub it to a smooth paste, and strain into the cream at the first beating. Do not use more than will give it a pale pea-green tint. Fine almonds make an excellent substitute if pistachio nuts cannot be obtained.

CARAMEL ICE CREAM.—Cook in a farina boiler three quarts cream. Add one and one-half pounds sugar, six tablespoonfuls caramel and one tablespoonful vanilla sugar. After mixing, cool and freeze. Several beatings improve and lighten this cream. Serve with whipped cream.

MONEY STAKED ON LIVES.

From figures compiled by the Inspector of Insurance, it appears that Canadians are carrying more life insurance than ever. The total risks in force in this country in 1894 represented \$375,774,906, or about \$31,000,000 more than was carried in 1893. This does not take into account the business done by fraternal societies, which is enormous. The premiums paid to the old-line companies aggregated \$9,909,284, whereas the claims paid by them amounted to \$4,079,451. An enormous amount of their insurance lapses annually. Last year this phase of the business represented \$10,546,727, or \$3,894,731 more than it reached in 1893. The companies doing business on the assessment plan have policies aggregating \$67,713,470 in force. The members paid in \$892,126, of which \$613,193 went to pay claims.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES

THE first and final dividend of 45c. on the dollar on the estate of B. Cote, general store, Hebertville, Que., is payable on June 17.

Clement Frechette, grocer, Quebec, has assigned.

Louis Feick, baker, Berlin, Ont., has assigned to Geo. Feick.

A. Leblanc, grocer, Montreal, has assigned to A. Lamarche.

C. May, grocer, Dunnville, Ont., has assigned to Alfred White.

E. O'Callaghan, general store, Cornwall, Ont., is asking an extension.

Margaret Kelsey, crockery, etc., Toronto, has assigned to Richard Tew.

B. Neron, grocer, St. Jerome, Que., has compromised at 30c. on the dollar.

Guimond Guillaume, general store, St. Angele, Rimouski Co., Que., has assigned.

J. B. Derochers, grocer, Montreal, has assigned. The creditors have been called together.

Moise Duguay, general store, Gentilly, Que., is offering to compromise at 25c. on the dollar.

Marcel Tardif, store and mill, Ste. Jovite, Que., is offering to compromise at 45c. on the dollar.

Kent & Turcotte have been appointed curators of the general store of J. A. M. Davignon, Farnham, Que.

E. R. C. Clarkson has been appointed receiver of the estate of W. O. Whitney & Co., general merchants, Toronto.

PARTNERSHIPS FORMED AND DISSOLVED.

Lafleur & Bernier, fish, Montreal, have dissolved.

Berthelet & Frere, grocers, Montreal, have dissolved.

Clark & Potts, general store, Mission City, B.C., have dissolved.

Eaton & McGowan, grocers, Toronto, have dissolved. W. J. McGowan continues.

The Union Produce Co., Prescott, Ont., have dissolved. Mary J. Thompson continues.

Stanislas Payette and Phileas Cote have been registered proprietors of Payette & Co., fruits, Montreal.

Pinkos Goldenburg & Samuel Ritner have been registered partners of the firm of Goldenburg & Ritner.

Jos. Carrier, jr. and Isidore Pelchat have been registered proprietors of Carrier & Pelchat, traders, Quebec, Que.

August Langelier and Victor Guestin have been registered proprietors of The Hermitage Creamery, St. Johns, Que.

Letters patent have been issued incorporating James Noble, Chas. Noble, Thos.

Noble and Jno. G. Noble, all of Collingwood, Ont., Chas. Noble, jr., of Killarney, Ont. and James Noble, jr., of Cook's Mills, Ont., as "The Noble Bros. Company, Limited," for the purpose of carrying on a wholesale and retail fish business at Killarney.

Wm. H. F. Jones and Miss Mary E. Lloyd have been registered partners of Jones, Lloyd & Co., sauce manufacturers, Montreal.

Jos. Papy dit Lafleur and Onesime Beauchamp are the registered proprietors of Lafleur & Beauchamp, fish dealers, Montreal.

Roy, Alphonse & Co., grocers and confectioners, Sherbrooke, Que., have dissolved. Delvina Morin continues under the same style.

Oscar P. Boulard, Theophile Notebaert and Cyrille Notebaert have been registered proprietors of the Dominion Chicory Co., Montreal.

Carvell Bros., wholesale grocers, Charlottetown, P. E. I., have dissolved. Lewis Carvell retires and the business is continued under the old style.

SALES MADE AND PENDING.

R. Walton, general store, Clarkleigh, Man., is selling out.

McCammon & Pilkey is the name of a new grocery firm at Trenton, Ont.

The stock of Rae & Lamb, grocers, New Westminster, Que., is advertised for sale.

H. Burwell, general store, Lawrence Station, Ont., advertises his business for sale.

CHANGES.

R. Dowsley, grocer, Carleton Place, Ont., has been succeeded by Edward Bros.

W. E. Raymond, grocer, St. John, N.B., has been succeeded by J. T. Raymond.

Cox Bros., general store, Upper Stewiacke, N.S., has been succeeded by A. A. Grant.

Nathalie Emond, wife of Grigene Ranger, is carrying on a bakery business as Mrs. G. Ranger.

Angus D. Gillis, general store, Margaree, N.S., has consented that his wife, Maggie, do business in her own name.

The Fruit, Spice and Botanic Extract Co., of Plantagenet, Ont., has been succeeded by the Plantagenet Fruit and Syrup Co., Ltd.

Arthur T. Boutillier, confectionery and fruits, Halifax, N.S., has consented that his wife, Deborah J., do business in her own name.

FIRES.

Mary B. Hall, grocer, Toronto, has been partially burned out.

F. W. Fearman's pork factory in Hamilton, Ont., caught fire on Sunday. The building and machinery were damaged to the extent of \$2,500 and the stock to the extent of \$5,000.

The large store and storehouse of W. A. Charlton & Company, Lynedoch, Ont.,

with nearly all of the stock and many valuable books and papers, were destroyed by fire on Tuesday. Loss on stock and buildings, about \$18,000; insurance, \$11,000.

MONEY TALKS.

A curious inconsistency

I've noticed in our maxims olden,
For one declares that "money talks,"
While one considers "silence golden."

Yes, "money talks," because the way
In which designers all have drawn them,
Coins can't keep still, you see, since they
Have woman's profile stamped upon them.

Oakville, Ont.

A BOYS' "CLEARING HOUSE."

THEY have what is called a "clearing house for boys" in New York. Its formal title is "The Business Men's and Schoolboys' Alliance." Eight hundred firms belong to it, and places are readily found for boys who are well qualified, whose conduct has been good, and whose school record in the special knowledge required can be recommended. So far the demand for boys has been greater than the supply. The system insures boys with special talents getting places suited to them, while the business houses are supplied with exactly the kind of material they want. The one who is quick at figures is placed where this quality will push him on; another, whose handwriting is excellent, and who is wanted for that purpose, gets a place where he can give satisfaction. The business men so far report themselves well pleased with the idea.

A downtown banker a few days ago sent word that he wanted a bright boy, quick at figures, thoroughly honest and truthful, and living with his parents. A small salary was promised until the boy advanced in the details of the business; then his pay would be increased from time to time. Two lads, who stood nearly equal in merit, were sent to the banker, and, after putting them both through an examination, he selected the one who was just a bit quicker at figures.

A mercantile firm not long afterward wanted a good, strong lad who could write a good hand. That was absolutely all that was required. They received such a lad, but he couldn't do a sum in simple fractions to save his life. That made no difference, however. Equipped as he was, he met the needs of his employer and received \$10 a week. Then there was a boy who was a frightful writer and who couldn't spell, but who was a mathematical wonder. A firm who wanted a wonder in mathematics gave him a good salary.

The idea is impressed upon the pupils that in their school deportment they are really building the foundations of their manhood, in both a moral and a business sense, and the effect of this upon their deportment has been most marked. Many boys who have committed infractions have asked to have their records blotted out, and expressed a desire to do better in future. The records are not blotted, however, but are simply pasted over with a sheet of paper. Thus held in abeyance, they can be disclosed should the pupils be guilty of further offences.

This clearing house for boys is rapidly extending its influence, and it is not improbable that the business firms interested may soon number three thousand.

The early-closing by-law will be strictly enforced in Berlin. Of late many merchants have disregarded it.

Adams' TUTTI FRUTTI

Recommended by the very highest medical authorities as a wonderful aid to digestion. Allays thirst in warm weather. The public call for it. Send for beautiful advertising matter to decorate your window.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, JUNE 14, 1895

(\$2.00 per Year) No. 24

DROPS FROM THE EDITOR'S PEN.

California navel oranges will wind up their season in about one or two weeks.—Ex.

A naval review will soon then be in order.

Bogus goods are often really good specimens—of impurity.

A well-displayed “ad.” with few words, speaketh volumes.

A holiday to a weary man is as a warm rain to thirsty ground.

A sure-paying investment: Amount spent in subscribing to a trade journal.

A pleasant-faced merchant is to consumers what clover is to bees—inviting.

Peace of mind is one of the fruits that come of cultivating the cash system.

Some young clerks, like coffee, have to be “roasted” because they are “green.”

People do not “go” by the advertisement of the lying merchant, but they go by his store.

From selfish motives alone a business man should be honest. It pays in the long run.

Selling below cost is like pulling the cork from a barrel of liquor in the hope that more liquor will flow in.

The successful merchant is often known by the appearance of his store as well as by the size of his bank account.

Cutting prices is a practice that cutteth him who wieldeth the weapon more than him whom it is aimed to injure.

Montreal's retail grocers propose holding a picnic shortly. We trust that the outing

may really prove a “picnic” to all those who attend.

He who tries to handle more lines than he should is twin brother to the man who has two many irons in the fire.

The diligent man shall never want for his bread and water, even if he may not always get the fare of a rich man.

An advertisement in a live trade paper is the forerunner to the traveler, proclaiming what goods his firm has in stock.

Impure groceries are said to be on the increase around New York. The millennium is evidently not drifting towards Gotham.

He who thinks he is sometimes getting something for nothing frequently finds that he has something that is worse than nothing.

The Winnipeg retailer who broke the early closing by-law will perhaps yet be compelled by law to observe it.

The Manitoba wheat crop is said to be the most promising in the history of the country. Let us rejoice with those who rejoice.

People smile a great deal oftener when they are prosperous than when things are going against them. This remark does not apply to teetotallers alone.

Judge Townsend, of the United States Circuit Court, has decided that citron is a dried fruit. We never thought citron or any other kind of peel was very wet.

New York merchants have found one bier for the shoulders of department store-keepers in that city. There is a law against selling silverware for pure silver when it is not in accordance with a certain standard. With this law it is alleged the department

stores have not been complying, and now twelve of them are figuring as defendants in Gotham's courts.

Travelers take orders, but they give information. The merchant who gleans nothing from his contact with the “drummer” is not likely to glean information from any source.

The products of the three kingdoms—animal, vegetable and mineral—are all developing bullish tendencies these days. Better Times is clearly here the origin of the species.

“Electricity on the Farm” is the heading that graces an article in a daily paper. We always thought there was very little magnetism about the farm—for the farmer's sons, at any rate.

The Grocery World says that Philadelphia wholesale grocers are “to get into line.” When merchants of all sorts and conditions get into line we may depend upon it the millennium is around the next corner.

It was so hot at the Toronto Retail Grocers' bicycle meet at Hanlan's Point on Wednesday that some of the contestants thought they were going into liquidation. In fact, we are afraid a few of them did liquidate.

It is said the Japanese have never acquired a taste for butter and cheese. They are to be commiserated. But they were probably never tempted with Canadian cheese. That would conquer them as easily as they conquered the Chinese.

Canning horse for the French market is a new industry that is developing in the American Northwest. There is evidently hope for the horse yet. He has been driven out of the street car business, but the canning industry is opening up to him.

AN INTERESTING RECORD.

A RECORD of the consumption from 1861 up to the present time of tea, coffee, cocoa and chicory, of alcoholic beverages, and of tobacco, compared with the increase of population, should be of interest, says The Lancet, to all classes; to the social reformer, because he may be able to form some estimate of the moral progress of the community based on the figures dealing with the consumption of intoxicating drinks; to the economist, because he may find interesting information on the revenue accruing from duties; to the hygienist, because he may make some valuable deductions bearing upon the relation to health of the increased or decreased consumption of alcoholic and non-alcoholic drinks and of tobacco; and lastly, to the intelligent public, because, to some extent, the return is a gauge, so to speak, of the moral, social and financial condition of the people as a nation, as well as of its prosperity.

The most striking feature in the purely diagrammatical return, which has recently been issued, and which has been ordered by the House of Commons to be printed, is that, while an enormous increase in the consumption of tea, coffee, &c., has taken place—the line illustrating this extending as a diagonal across the diagram till it reaches the top right hand corner (1893)—there has been a steady diminution in the consumption of both beer and spirits, the lines indicating the last two being practically parallels not only with one another, but approximately with the base of the diagram also.

Between 1861 and 1862 the total consumption of tea, &c., was 120,000,000 lb.; it then steadily rose, until in 1893 it stood at 265,000,000 lb. In the same period the population increased from 28,500,000 to 38,500,000, so that while in 1861 the consumption of tea, &c., per head was 4.38 lb., in 1893 it was 6.90 lb. In regard to wines and spirits, the consumption in 1861 was equal to 35,000,000 gallons with the population at 28,500,000, and in 1893, with the population at 38,500,000, the consumption was 52,000,000 gallons, so that per head it was equal to 1.22 gallons in 1861 and in 1893 to 1.35 gallons, the highest record being 1.80 gallons in 1876, since which the consumption has steadily diminished.

The consumption of beer exhibits a similar rise and fall. Thus, in 1861 the amount consumed per head was 24.3 gallons, in 1874 34 gallons, and in 1893 29.6 gallons, the total consumption varying from 20,000,000 gallons in 1861 to 31,000,000 gallons in 1876 and 32,000,000 in 1893, the population having increased by 10,000,000. Coming to tobacco, in 1861, when the duty was 3s. 18-10d. lb., the total consumption was 34,800,000 lb., being equal to the use per head of 19¼ oz.; in 1863 the duty on cigars was

reduced from 9s. 5 4-10d. to 5s per lb., and the consumption then rose to 21½ oz. in 1865 to 23¾ oz. in 1877. In the following year (1878) an increase of 4d. per lb. on all tobacco was made, and an extra 2d. per lb. on cigars in 1879, with the result that after that date the consumption fell to 22½ oz. From this time it gradually recovered, till in 1877, when the duty on tobacco being reduced 4d. per lb., and on cigars 6d. per lb., the consumption quickly rose till it attained to 26 oz. per head of population in 1893. The total consumption in 1893 was 62,000,000 lb., while in 1861 it was 34,000,000—i.e., an increase of 28,000,000 lb. for an increase in the population of 10,000,000.

To sum up, this interesting return shows that there is a decided diminution in the demand for intoxicating stimulants, whilst there is a very considerable increase in the demand for non-intoxicating stimulants, principally tea and coffee. There would appear, therefore, to be a distinct and steady reaction setting in against general alcoholic imbibition—a fact which lends support to the view that the evil of intemperate drinking, as its wretched consequences become more and more painfully manifest, will finally work out its own remedy. It is beginning to be recognized—if we interpret the return correctly—that the effect of alcohol is comparable to the flick of the whip, which for a brief period urges on the horse, while the rational use of tea and the allied beverages, of which theine is the base, is more like the corn out of which a more real and lasting energy is derived. It is idle to argue, however, that both sources of energy and stimulation have not their use as well as their abuse. Finally, the enormous increase in the amount of tobacco consumed is noteworthy, and would seem to indicate a growing demand for a substance which, when temperately indulged in, doubtless affords a source of comfort and relief to many in the increasing struggles and worries of modern existence.

VERMONT'S MAPLE SUGAR CROP.

The returns from the maple sugar district of New England are not reassuring, according to N. E. Grocer. There has been a backward spring, a light crop has been harvested, and the season has closed.

Vermont stands at the head of all states in the amount of maple sugar produced yearly—9,000,000 pounds—and with the sugar 100,000 gallons of molasses. Following Vermont comes New York with 6,000,000 pounds, Ohio with 2,500,000, New Hampshire with 2,000,000, Pennsylvania with 1,800,000, Indiana with 1,500,000, and Massachusetts, Virginia, Kentucky, and West Virginia high on the list. Under the McKinley law the Government paid a bounty on maple sugar. During the fiscal year of 1894 the amount so paid was \$116,000, and

it was distributed among 4,600 producers. In the same year the number of cane sugar producers was 3,246, though the amount of cane sugar produced, and upon which bounty was paid, was 612,000,000 pounds. The total bounty was \$11,000,000.

Vermont, for a small state, having a somewhat unproductive soil, is not without certain points of pre-eminence. The fame of Vermont maple sugar is known everywhere, and, to a minor extent, so are the products of the Vermont marble quarries. These yield in a year an average of \$2,000,000 worth of marble. The Green Mountain State stands second in the amount of slate produced. Pennsylvania is first with 104 quarries, and Vermont follows with 63, having an output in a year of 1,000,000 cubic feet. But many a person who is indifferent to the beauty of Vermont maple, or the durability of Vermont slate, will regret to know that the maple sugar product of 1895 is not up to the average."

SUGAR IN BARBADOES.

Barbadoes advices to May 18th to a New York firm are as follows: During the fortnight we have had some light showers, and the young canes are looking well; the reaping season is drawing to a close, and the crop does not promise to exceed earlier estimates. Sugar has improved, and is now worth \$1.75 per 100 lbs. and \$5 for hhds., \$1.85 for bags. The molasses market, which closed firm on Thursday evening at 14c. and \$4, became very much excited yesterday, when our neighbors advanced the price to 15c. and \$4. Owing to the rapid rise in values from 13 to 15c., our planters, under the impression that it will go still higher, are not inclined to let go their small holdings. Following are the comparative shipments of produce:

	Sugar.		Molasses.

time of the year so good. The recent frosts did grain no harm, but rather good, by stopping its rank growth and strengthening the tender growing stalks.

CANDLE YOUR EGGS.

Recent receipts of eggs have shown considerable losses because of the lack of freshness. As the weather is now warm, and eggs are difficult to keep fresh, we would caution country merchants to use all care in selecting purchases, and to candle every egg before buying and before shipping.

BUTTER SITUATION.

As there is still a great deal of last summer and fall butter in the country it will be necessary for dealers to use double vigilance in selecting their purchases, as anything that is not right up to the mark will have to go into competition with the old butter, which is now being sold at 5 to 6c. per pound. In fact, many bakers prefer old butter, as it goes further for their purposes than the new.

At the same time, we advise our friends to dispose of their butter at market prices regularly instead of holding for a rise in price, as the experience of the past season has proven the policy of this mode of

procedure. We have heard of a number of dealers who are now selling at from 4 to 5c., butter for which they were offered 14 to 15c. last fall. Those who were caught thus will not likely fall into the same trap again.

WHY HE LIKED THE BUSINESS.

A young real-estate agent, not long since, made this interesting and suggestive statement: "There is one reason why I like the real estate business; it is necessary to be cheerful in order to succeed in it." Of course a gloomy, long-faced, despondent real estate man would fail; so would he fail, also, in almost any other business—excepting, possibly, that of undertaking.

Cheerfulness is always an important factor in producing success. Who cares to deal with a man whose face is sour, morose, or solemn? Who likes a teacher or preacher whose face always wears a scowl or frown? Who will employ a physician that is despondent and hopeless?

A WINNIPEG STOCK MARKET.

An effort is being made by the Winnipeg Board of Trade to establish in that city a recognized stock market, where competition would ensure the best values for various grades of animals. An open meeting has been called at the Board of Trade building at 4 p.m. on June 18 to consider the question.

THE FRENCH TREATY.

IN another column will be found a full resume of the Montreal Chambre de Commerce's report on the French Treaty. It is a carefully prepared and valuable document, full of practical suggestions to our merchants. The committee went into the merits of each detail, and have got together a mass of facts which does credit to the Chambre's earnestness and sagacity. The report is by far the ablest and most exhaustive deliverance on this Treaty yet published in Canada. The discussions in Parliament, mostly by lawyers, were largely a series of wrangles over the political issues involved. Now that the Treaty has got into the hands of practical business men, we see at once the greater value of their investigations, and are shown at once the commercial possibilities opened up by the Treaty. The Montreal Chambre de Commerce is to be congratulated on its labors in this matter. The Chambre has incidentally proved most conclusively the correctness of the arguments used in these columns from time to time, that business men, in handling public affairs, are infinitely wiser and more practical than the legal windbags who form too large a proportion of our parliaments.

Sir Charles Tupper's policy in pushing this Treaty is now better understood than when the arrangement he was able to effect was being pulled to pieces in Parliament by critics who knew very little of what they were discussing. The principal difference between Sir Charles and his critics is that he has the vision of a statesman while they pride themselves greatly on their acuteness as ward politicians. That an important business arrangement like this should ever have been at the mercy of small minded wire-pullers is a public calamity. Fortunately, Sir Charles Tupper triumphed in this case, and a promising trade development is opening before us in France.

We might mention, incidentally, that the chief antagonist in the Dominion Govern-

ment to the French Treaty was a leading member of the committee which recently considered union with Newfoundland. No wonder that in hands like these proposals which involve extensions of Canadian commerce fare very badly. Sir Charles Tupper saw the advantages of Newfoundland union years ago, and paid a visit to the island in 1888 to effect it. But our business interests seem to be in less vigorous hands now.

A VIEW OF OURSELVES.

Canada employs 300 members of Parliament, a dozen Cabinet Ministers and about 100,000 noisy politicians to keep up a continuous squabble concerning her trade policy. And yet all they can say and all they can do is of very little moment.

To explain. If the National Policy were the best thing in the world, Canada's trade would be always on the up grade. If this self-same National Policy were the worst thing Canada could have, her trade would be growing beautifully less. But, in fact, trade is neither steadily growing nor steadily diminishing. Last year it went down month after month, and the merchants of this country became beautifully disgusted. Since January 1st, 1895, trade has shown a tendency to expand, and April imports increased three-quarters of a million over April, 1894, while the exports increased a million. The April circulation also showed a substantial increase, which was accentuated in May.

Canada's prosperity depends on the world's markets and the feelings of her citizens. Wheat has advanced in price, floated past the dollar mark in Montreal and Toronto, and Canadian holders have been enriched by a couple of millions of dollars. The National Policy neither caused it nor prevented it. Horses bring from \$50 to \$75 each more than they did a year ago. The National Policy neither caused it nor prevented it. The farmer is getting three cents a pound more for his wool than at this time last year. The National Policy neither caused it nor prevented it. And so one could go on enumerating the rises, and showing that Canada's trade policy is not the prime factor in determining the prices received for her productions, or in determining whether or not she shall be prosperous.

Just now prices in the world's markets are on the upward turn. Wheat is advancing. Cotton and wool are doing likewise. European manufacturing centres are filled with orders at good prices. Bradstreet's of June 8 says: "The feature of the week, as heretofore, is the continued long list of advances in prices, notably those for iron and steel, and the upward movement of bank clearings." Canada is sharing in the general firmer and more confident feeling.

What deduction must be drawn from this statement of circumstances? The deduction is that Canadian merchants must

not look so much to Governmental free trade and protective policies for prosperity, but more to the world's markets and themselves. By studying the prices in primary markets they will know when and where to buy, when and where to unload. They will recognize when trading at present prices is dangerous and when safe. In the second place, as we have said, they must look to themselves. They must be cheery and confident, full of buoyancy and hope. A nation of dyspeptic growlers would be a sorry place to live in, for the few years it would exist. Canada's lands are broad and fertile, her sons are true and strong. Why then should confidence not always exist?

In conclusion, it may be said that present prospects should beget every confidence in a prosperous year. Money is moving freely, and all agricultural products are at a much higher price than at this time last year. Moreover, an abundant crop is assured and improved prospects are expected from every province in the Dominion.

DO NOT BE TOO INDEPENDENT.

"IT does not pay to be too independent in business," said a retailer a few days ago to THE CANADIAN GROCER.

"There is — the soap manufacturer. Six or eight years ago he did the bulk of the trade in Canada. He thought he owned us retailers body and soul. When I protested about something in his way of doing business which was not fair to the retail trade, he told me he did not care whether it was or not. That made me angry, and I said we would handle no more of his soap. He laughed and said we could not get on without it, for he was advertising it and people would have no other.

"I never sold another bar, but took up a brand advertised in your paper. Occasionally people asked for the old brand, but I said I did not keep it, and strongly recommended the new soap, giving the points in its favor which I gathered from the advertisement. Now, I sell that soap almost exclusively. The other soap maker must have treated other members of the trade as he did me, for now you will find his brand in very few places in Toronto. When it is a toss up with dealers which of several equally good brands to handle, it is that of the maker who is generous in his dealings that we give the preference to every time.

"I believe in advertising, but all the advertising in the world will not force me to keep articles I do not want to, when there are others equally good on the market."

Our subscriber's remarks are very much to the point. Too frequently manufacturers get a "big head," and become indifferent to the trade. This may do when they have a monopoly, but not when there is, or may be, competition. The great aim should be to keep in constant touch with the trade. Endeavor to meet their suggestions, for they are just as much interested in selling goods as the manufacturer.

ADVANTAGES OF THE FRENCH TREATY.

THE report of the committee appointed by the Montreal Chambre de Commerce begins by stating that a certain number of sub-committees were chosen to enquire thoroughly into and report upon: 1. Each article in the Treaty; 2. Articles, not in the Treaty, but which we could profitably export to France; 3. How French demands are already supplied, their extent, and the means of transportation; 4. The trade we now do with France. The Treaty, it says, has been unfairly attacked, since it provides extension of trade with 38,000,000 of people, and is, at least, as important as proposed arrangements with the West Indies, the Cape, or Australia. While France enjoys certain advantages under the Treaty, principally on wines, that country's sales to us, even if she supplied us with all we consume of the articles in the Treaty, would only amount to \$700,000 or \$800,000 a year.

Canada, on the other hand, has a larger prospect. First, as to wood, France imports two hundred million francs per year. We could supply two-thirds of this wood. One-half of this will, under the Treaty, enjoy the minimum tariff, that is, an advantage of from \$1.25 to \$1.95 per M feet, board measure. Already, without this tariff advantage, we sent \$100,000 in deals and boards to France. The Maritime Provinces will be able to increase trade in wood.

Next, as to lobsters. France imports annually over a million dollars' worth. Canada exports \$1,800,000 worth, of which \$125,000 went to France in 1893-4, and \$200,000 in 1894-5. The minimum tariff will reduce the duty from 30 francs per 100 kilos to 25 francs. This trade should be increased by the Treaty. So should exports in fresh salmon, canned fish and fresh water fish. In these cases the duties will be reduced from 15 to 10 francs, 30 to 25 francs, and 10 to 5 francs per 100 kilos respectively. France imports at least a million dollars' worth of these kinds of fish. The report continues:

"Canada exported double that value; in 1894 our exports even reached three million. Salmon are sent to England and fresh fish to the United States. But we are not aware that any serious attempt has yet been made to place 'directly' these products of Canada on the European continent. With the improved means of preserving fish, it would be surprising if our exporters did not succeed in establishing a trade in France for fresh trout and salmon, for example, as they have succeeded in supplying the English market with fresh meat.

"As to canned salmon, it is interesting to know that two-fifths of French imports are from England, the value being \$300,000. As Great Britain herself is supplied almost wholly from British Columbia (\$2,327,000 in

1894), it is very probable that the article imported by France would bear a Canadian trade mark. It is evident that the exporters of the Pacific coast would find great advantages in dealing with France directly.

"Next we find on the Treaty the article of canned meats. There are years when France buys millions of this meat, mainly for the army. In 1893 the imports were thirteen million francs. The United States furnish two-thirds of these imports, England coming after them. We have excellent reason to believe that a large part of the meats sold by the latter were originally imported from Canada, so that here again the Canadian producer suffers from the want of direct relations with the French consumer. Indeed, we send 95 per cent. of our canned meats to England, that is, a million dollars' worth, while we only exported \$1,300 to France in 1893. Although the importation of these canned meats has decreased apparently in France lately, the reduction from 20 to 15 francs per 100 kilos, equivalent to nearly one-half cent per pound, will naturally induce our exporters to open a direct and more profitable business with the consumer, inasmuch as direct exports only will be entitled to the advantages resulting from the Treaty.

"It is the same with fruits. If we have not a great variety of these products, our apples are nevertheless an excellent article for export. Our exports to Great Britain, which reach two millions, are sufficient proof of that fact. The Ontario producers will find in France a ready market for their apples at very remunerative prices, provided that the article be always of the first class. The United States export 25,000 barrels of apples a year to France. The treaty with France will give the Canadian the advantage of a reduction from 3 to 2 francs per 100 kilos. The imports of apples "for the table" in France in 1893 were valued at 1,253,000 francs. There is also a good demand for dried apples and for cider apples. They are included in the Treaty, the reduction of the tariff being from 2 francs to 1.50 francs for the cider apples, and from 15 to 10 francs for the former. Our exports of dried apples to France last year amounted to \$3,660.

"We have but meagre information as to preserved fruits. Our statistics seem to include them with dried fruits. Our exports in any case do not exceed \$50,000 per annum. In 1894 mention is made of 99 sales of canned fruits for St. Pierre-Miquelon. Still this article is included in the Treaty and deserves consideration.

"To close the list of food products, we find in the Treaty that pure condensed milk will enjoy the minimum rate of tariff. Without advising farmers to give up or neglect the making of butter or cheese, your committee consider that in these days of severe competition, when there is danger that the English market may become con-

gested, it would be wise and even necessary to come to the assistance of the dairy industry by opening up a new outlet for the milk products. The imports of condensed milk in France in 1893 were valued at 2,743,000 francs. The reduction of duty for pure condensed milk is from 10 to 5 francs per 100 kilos under the treaty. Here, then, we have a market for an absolutely new industry, which may be productive of great advantages to the farmers of Quebec, Ontario, Manitoba and of every section of the country.

"Last come the manufactured or partly manufactured articles. Let us begin with wood pulp. France imports of this product, according to the report of the sub-committee, not less than 100,000 tons, of the estimated value 22,000,000 of francs, principally from Sweden. Canada's exports to France are nil and very small to Great Britain; that is, about 5,000 tons in 1893 and 20,000 tons in 1894. Our powers of producing are such that we could easily increase our output of this product to supply, in a large measure, the wants of France and Great Britain without losing our hold on the American market. The advantage resulting from the Treaty is important, a reduction of duty from 75 to 50 centimes per 100 kilos, equal to 50c. per ton, for wet machine pulp.

"From pulp to paper the transition is natural. Of this latter article, affected by the Treaty, France imports annually nearly 5,000,000 of francs. More than one half is supplied by Great Britain, while Belgium and Germany are the next largest sources of supply. Heretofore Canada has not exported paper, but with the natural advantages for raw material and cheap power which we possess, and with the further advantage of a minimum tariff, which would give us a preferential treatment of 3 francs per 100 kilos, it would be surprising if this rising industry did not gain a footing on the French market.

"Apply the same to the manufactured products of wood, such as furniture, floorings, pavements, barks, extracts of barks, and especially staves and staff-woods, the imports of which alone into France amount to 32,000,000 francs. All these are to be admitted under the minimum tariff after the Treaty is in force. The report of our sub-committee on wood gives full information. Even ocean-going wooden vessels are included in the list, a fact which cannot but bring great profit to the Maritime Provinces.

"Then there are prepared and manufactured hides on the list. The great variety in this class of products may perhaps at the outset be a source of some confusion in the application of the minimum tariff. Nevertheless, the consumption of hides in France is enormous. In 1893 the imports of prepared hides were valued at 45,000,000 francs, and of prepared or manufactured furs at

3,870,000 francs. That indicates an outlet for the product of our tanneries and even for a part of our furs, the importance of which cannot be disputed. The manufacturers of Ontario and Quebec, who are doing a paying trade with Great Britain, and who have already commenced to export to France with some success even in the face of the general tariff, will not be slow in taking advantage of the minimum tariff which reduces the duties by one-quarter or one half."

The report goes on to say that boots and shoes from Canada are favored by the Treaty. France imports half a million of dollars worth annually, one-third of them from England. The quality is of the ordinary kind, about \$1.50 per pair. As Canada can export boots to England, she should be able to export them to France, which buys them from England. Our tariff advantage under the Treaty ranges from 60c. to \$2.40 per dozen pairs. Already Canada sends to St. Pierre-Miquelon \$6,000 worth yearly.

France imports largely of fodder and cereals, rubber goods, agricultural implements, etc., which Canada is able to export. France also, says the report, "imports 13,000,000 of francs of ordinary Dutch cheese, which our cheese could easily replace; 200,000,000 of francs of raw hides and furs; 300,000,000 of wools; a large quantity of cattle and sheep, and an average of 50,000,000 or 60,000,000 of bushels of wheat; and that graphite, mica, nickel, phosphates, asbestos and other mineral products of Canada are in demand in France and on the free list. In 1894, as an experiment we shipped 50 tons of asbestos to the French market."

The trade of the French Republic with the United States is largely in western products. These might be shipped by the Canadian route, as also the raw silks that come from China and Japan. Canada might also do a better cattle trade owing to the exclusion of American cattle. The committee reports in favor of a direct steamship service, and urges the appointment by the Dominion Government of a deputation of competent business men to visit France and open up direct communication with all French Chambers of Commerce and other commercial corporations.

ANOTHER ADVANCE IN MOLASSES.

The firm position in molasses at Montreal that THE CANADIAN GROCER referred to last week has had the anticipated result of a sharp advance in jobbers' prices. These are now 2c. higher on both Barbadoes and Porto Rico stock than they were a week ago. This advance was decided upon at a meeting of the Wholesale Guild on Monday last, when the price of Barbadoes in jobbing lots was fixed at 37c. and Porto Rico at 36c. The demand for the latter is one of the new features of the market. In previous years the wants of con-

sumers have been supplied mainly with Barbadoes stock. This spring and summer, however, the great scarcity of this has compelled buyers to fill wants with Porto Rico. It may be interesting to note that advices indicate that the quantity of the former that is to come to Canada this season will be smaller than was anticipated in these columns about a month ago. It is now claimed that there is not over 8,000 puncheons for Canada, or about half our consumption.

ENFORCING EARLY CLOSING.

The Winnipeg Retailers' Association are experiencing considerable difficulty in enforcing the early closing by law which the City Council at their instigation some time since enacted. A week ago Simon Ripstein refused to comply with the regulations, and the police, urged on by the association, sought to force him to close his store. The attempt failing, Ripstein was charged next day in the Police Court with an infraction of the by laws, and the magistrate fined him \$10 and costs. The defendant says he will test the validity of the law in a higher court.

HIGH PRICES ON CANNED SALMON.

One of the leading features of the week in Montreal has been the high opening prices for business in new pack canned salmon. As THE CANADIAN GROCER has pointed out before, business in this respect has been very backward this season, for, whereas last spring the great bulk of the contracts were settled before the beginning of May, the first business in this connection this year was put through toward the close of last week. The contracts in question so far booked comprise some 9,000 cases of salmon, and have been placed as follows: 5,000 at \$4.35, f.o.b. on the Coast, and 4,000 at \$4.50. These prices are from \$1 to \$1.50 higher than the opening prices last year, and canning agents contend that there is every prospect of the price going to \$5, for, though they are offering salmon at \$4.50 their principals insist that they shall be wired previous to the closing of every important sale. As a result of the high figures on new pack, holders of the small remaining quantity of old fish in Montreal are firmer in their ideas, and are now asking \$1.50 per dozen for an inside price. One selling agent told THE CANADIAN GROCER this week that last year at this time he had contracts for over 30,000 cases booked. This year he has only got about 3,000, on the basis of \$4.50. He has orders for over 6,000 more cases, but the canners will not accept the bid of \$4.25 made by buyers here. Another sales agent states that the cannery he represents will not talk business under \$4.75 f.o.b. on the Coast.

TORONTO RETAIL GROCERS.

THE regular meeting of the Toronto Retail Grocers' Association was held as usual in St. George's Hall on Monday evening. In the absence of President F. S. Roberts, Vice-president White took the chair.

The Committee on Early Closing reported that they had waited upon the Ministerial Association in reference to this matter, and that the clergy had promised to read the early closing circular from their pulpits. It appeared, however, that only a few individual ministers had complied with the undertaking. A resolution thanking the clergy who had made the announcement from their pulpits was moved by D. W. Clark, seconded by A. G. Booth, and carried.

In reference to fruit inspection, it was moved by D. W. Clark, and carried:

That a committee, consisting of the president, vice-president, secretary, and Messrs. Booth and Clark, wait upon the proper authorities to secure the appointment of an inspector, and that the secretary be instructed to write the Fruit Dealers' Association of our action and ask for their co-operation.

Messrs. Booth and Clark, of the Excursion Committee, reported having visited Hamilton to see what arrangements could be made for the outing to be held there later on. Several leading Hamilton grocers had promised to do all they could to help make the excursion a success.

On motion of Mr. Waite, seconded by Mr. Marmion, the committee was given full power as regards providing games and other kinds of amusement for the trip.

Attention was called to the methods of delivery followed by the express companies, and a committee, consisting of Messrs. Marmion, I. Kelly and Johnston, was appointed to wait upon the companies' agents, asking that covers be provided for their wagons, and that separate deliveries of butter, etc., be made during the hot weather.

WINNIPEG WANTS A TANNERY.

The Winnipeg Board of Trade is endeavoring to have a tannery established in that city. Secretary Charles N. Bell has sent out the following circular calling attention to the matter:

The city has a population of 38,000, and supplies, largely, the goods consumed between the Red River and the Rocky Mountains; and in this vast area there is not any tannery which attempts to meet beyond a small fraction of the demand for leather. The hide inspector at Winnipeg estimates that about 50,000 cattle hides were exported last year and sold in the United States, Eastern Canada and Great Britain. Practically all the leather, boots and shoes, harness and saddlery and other leather goods distributed from Winnipeg are first imported from Eastern Canadian and foreign markets, indicating the extent of a market for the products of an extensive tanning establishment if located in Winnipeg. Investigation will show that any surplus leather produced could be exported at a profit. While tanning would have to be done by extracts of bark or other concentrates, there are no climatic causes to adversely affect tanning operations, as is demonstrated by the operations of the one or two small tanneries now existing.

The capital of the Prairie Province from the above recital would seem to be just the place to establish a successful tannery.

MONTREALERS TO PICNIC.

At the regular monthly meeting of the Montreal Retail Grocers' Association, held in the Monument National on Friday, John Johnston, president, occupied the chair. The main topic was the question of the annual picnic, and it was decided to hold it on July 17th at Iberville. This was carried unanimously, and no time was lost in forming committees, so that arrangements can be entered into at once, and have everything done to hold the outing on an equality, so far as success is concerned, with its predecessors, and they are known to have been of the best. The members are enthusiastic, and it is well known what the grocers can accomplish when they put their heads together.

The committees were appointed as follows:

Games—Messrs. W. Willison (chairman), B. Taylor, W. Carignan, J. P. Dixon, T. Gauthier, J. E. Manning and A. Tremblay.

Music and Dancing—Messrs. V. Raby (chairman), J. A. Drouin, W. Duckworth, S. Demers, J. H. Howard, L. H. Goulet and Ald. R. Turner.

Printing and Advertising—Messrs. A. D. Fraser (chairman), R. B. Hall, ex-Ald. Gauthier, S. D. Valliers and J. E. Manning.

Refreshments—Messrs. Joseph Levesque (chairman), Thos. Gauthier, John Scanlan,

J. E. Manning, N. Lapointe and W. Carignan.

Reception—Messrs. John Johnston (chairman), A. D. Fraser, S. Demers, John Scanlan, M. P. Lafferty, S. D. Valliers, Joseph Levesque and Ald. Turner.

Railway—Messrs. S. D. Valliers (chairman), John Scanlan, S. Demers, N. Lapointe, J. E. Manning, ex-Ald. Gauthier, W. P. Beaudoin, H. C. Larose, R. B. Hall and Jas. O'Shaughnessy.

Finance—B. Connaughton (chairman), with the chairmen of the different committees.

Ex-Ald. Gauthier has promised a gold medal for a hundred yards dash for the chairmen of the several committees. It is expected to be one of the events of the day.

A "RECORD" IN LOW FREIGHTS.

As an instance of the lowness of sea freights, it may be mentioned, says The Westminster Gazette, that a steamer has secured about 2,000 boxes, of 500 oranges each, from Valencia, in Spain—a distance of 1,650 nautical miles—at the magnificent rate of sixpence per box. Oranges have been wonderfully cheap in the past season, in places where no railway carriage was entailed on this side, such as London, Liverpool and (now) Manchester; and the low freight we have named is said to be due to

the fact that the growers are not offering much for shipment, owing to the poor prices ruling for the fruit in Great Britain, though there are equal to 1,000,000 boxes yet on the trees in Valencia. It may be added that beef is being transported and refrigerated from Australia—11,000 to 12,000 miles—for a freight not exceeding $\frac{3}{4}$ d. per lb., whilst the English farmer would have to pay equal to one-third of that sum to transport his meat 200 miles by rail. And live cattle have been brought all the way from the Antipodes at £6 to £6 10s. per head, rates which a few years ago were obtained for a voyage not one-fourth the distance, say, from the United States.

INSPECTION OF GRAIN.

The fees collected by the grain inspectors at Fort William were the subject of discussion in the House a few weeks ago. Since then a return was brought down giving the facts. It seems that the fees in 1885 amounted to \$474, but in 1894 they reached \$10,024. There are two inspectors. For last year the assistance they required cost \$3,875. This leaves \$3,074 each for the year's work. The inspection of grain is voluntary, and costs five cents per hundred bushels. To show the growth of the trade it may be mentioned that in 1885 half a million bushels were inspected, whereas in 1894 ten and a half million were examined.

The Ideal and Most Successful Breakfast Foods of the Nineteenth Century

ARE

THE IRELAND COMPANY'S

DESICCATED ROLLED OATS

— AND —

DESICCATED ROLLED WHEAT

In Handsome
Packages of
Convenient
Size. They
Sell at sight.

They have a Delicious Flavor not found in any other Cereal Foods; they are Absolutely Pure; they are Trade Winners; they are Profitable goods to handle.

We are pleased to mail Samples and full particulars. Let us hear from you now.

The Largest and Most Complete Breakfast
Cereal Food Mills in the Dominion.

CHOICE CEREAL BREAKFAST FOODS

YOU MAKE MONEY

Selling Chase & Sanborn's "**SEAL**" Brand Coffee, 1 lb. and 2 lb. tins. A rare combination of **Private Plantation Java and Arabian Mocha**. Cases 30 tins. Price—2 lb. tins, 36c. per lb.; 1 lb. tins, 37c. per lb.

Pickles .

GILLARD'S (London, Eng.) **NEW PICKLE**—Unquestionably the finest pickle in the market. You shouldn't be without them. Everything used in their preparation is of the choicest and purest quality.

Jelly . . .

Batger's "**Nonpareil**" Solidified, pint tablets. New stock just received, the following flavors: Lemon, Strawberry, Orange, Pineapple, Vanilla, Noyeau, Raspberry, Calvesfoot. Price—\$1.20 per dozen.

Salt

Higgins' "**EUREKA**" is the best. It is endorsed by all leading Dairy and Agricultural Scientists. Put up in 224 and 56 lb. sacks, and sixteen 14 lb. bags (for households). We are agents for western Canada. Write for price list.

Tea

The purest and most perfect Package Tea in the market is "**ORIENT**" brand **Pure Indian and Ceylon**. Put up as follows: 1 lb. and ½ lb. lead packages, and 5 lb tins, 35c. per lb.

THE **EBY, BLAIN COMPANY** LTD.

Wholesale Grocers

TORONTO - - ONTARIO

GROCERS ON WHEELS.

A BICYCLE meet under the auspices of the Toronto grocery travelers and retail grocers may now be looked upon as an annual event. The success of Wednesday's races at Hanlan's Point assured this. About 1,000 people took the Toronto Ferry Co.'s steamers to the Island, and filled the new grand stand to watch the struggle for prowess in the circular arena below. Between the races the spectators strolled around the cool promenades, enjoying the fresh breezes from the lake.

The prizes contested for were donated by a number of manufacturers and wholesalers whose names were mentioned in these columns two weeks ago. Some of the awards of merit were particularly fine—such, for instance, as a silver water pitcher valued at \$25, and a set of bicycle tires worth \$20.

In most of the events the entries were few, but this was made up for by the fact that nearly all the races were closely contested.

Following is a list of the winners in each race :

1st Race—One mile, for grocers and travelers—1, S. H. Moore ; 2, B. Panter.

2nd Race—Two mile, open to clerks—1, Geo. Rogers ; 2, Jas. Ringer.

3rd Race—Half-mile, open to travelers—1, J. Pearson ; 2, S. H. Moore.

4th Race—Half-mile, open to grocers—1, B. Panter ; 2, W. Davidson.

5th Race—One mile, open to wholesale employees—1, W. F. Crowley ; 2, Thos. Tulloch.

6th Race—Quarter-mile slow race, open to all in trade—1, F. West ; 2, J. Pearson ; 3, W. A. Manning.

7th Race—Half-mile, open to clerks—1, L. H. Bonsall ; 2, J. H. Ringer.

8th Race—One mile, open to all in trade—1, Thos. Tulloch ; 2, F. W. Crowley.

9th Race—Two miles, open to grocers—1, B. Panter ; 2, W. Davidson.

10th Race—Two miles, open to travelers—1, J. Pearson ; 2, S. H. Moore.

11th Race—Five-mile team race between travelers and grocers—1, B. Panter (grocer) ; 2, W. Phillips (traveler) ; 3, J. Pearson (traveler) ; 4, W. Davidson (grocer) ; 5, C. Wilson (traveler). Points : travelers, 8 ; grocers, 7.

In this last event it will be seen that though a grocer got first place, the race really goes to the travelers, who secured three out of the first five places.

The officers of the meet were : Judges, H. E. Trent, W. D. Wilson, Jas. Lumbers ; timer, Thos. Meaney ; starter, W. J. Parks ; referee, H. D. McKellar.

Jerry Burns, the energetic secretary of the meet, deserves credit for the good work he did to make it a success.

The Lake of the Woods Consolidated Fish Company, Rat Portage, Ontario, have opened an office at the wharf, and have a spur track laid on the dock so that fish may be loaded direct from the boat to the cars.

TRADE CHAT.

FRANK HUTTON, of Windsor, has changed the arrangements of his store, and has one now much more attractive and convenient.

Pineapples bring 25c. a hundred in Madagascar.

In the South two crops of potatoes are often grown the same season.

Postmaster Clarke, of Thornhill, lost \$200 worth of goods by a burglary perpetrated on June 4th.

The Hamilton retail grocers have decided to hold their annual picnic on July 17th at Niagara Falls.

H. P. Toms, of Francis & Toms, grocers, Winnipeg, was married to Miss Muriel Redmond on June 4th.

Burford, Ont., had a fire which did \$2,000 damage. Slater, the tailor, and Clement, baker, were the losers.

Ald. Maguire, an old St. Catharines, Ont., merchant, died from an overdose of laudanum on Monday last.

According to Bradstreet's, the crop prospects and business outlook in Nova Scotia and New Brunswick are excellent.

Crowe & Co.'s general store at Stewiacke, N.S., was broken into and the safe broken open. The robbers secured about \$100 in cash.

The confectionery business of Mr. Paterson, of Brant, was rated in 1878 at \$6,000 to \$10,000. Now it is placed at \$75,000 to \$125,000.

J. A. Francis, of Essex, reports trade beyond his expectations, which cannot be a surprise, as he carries a well assorted stock of general goods.

The St. John, N.B., authorities have decided that tobacco and small fruit shops shall henceforth be closed on Sunday, and the law enforced, which is now a dead letter.

W. E. Van Every, of Woodslee, has increased the size of his store and added hardware, having now one of the most commodious stores on the Michigan Central.

The British Board of Trade returns for May show that imports increased £620,000 and exports increased £860,000 as compared with the corresponding month last year.

The death of Robert McLarty, sr., contractor, of Strathroy, Ont., at the age of 73 years, removed one who had done much towards the advancement of the town of Strathroy.

The Lake of the Woods Milling Co. will erect 16 new wheat elevators in Manitoba at once. Each of these will have a capacity of 40,000 bushels. Besides these several warehouses, to contain from 6,000 to 10,000 bushels will be erected at different points.

S. A. McGaw, the general manager of the company, estimates the Manitoba crop of this year at 25,000,000 bushels.

The man who thinks he will advertise as soon as his business indicates that he can afford to spend money for that purpose very likely finds that it never reaches that stage.

The Moncton Leader says : P. McManus and T. B. Leblanc have been awarded the contract for rebuilding a portion of the deep water terminus at Halifax, recently destroyed by fire.

About 44 per cent. of the foreign trade of Japan is with England, and more than half the exports and imports of China now pass through the hands of British merchants at Hong Kong.

News from all parts of Canada is to the effect that crops are looking very well. Even from districts where the May frosts were thought to have wrought ruination come reports full of hope.

The contract for supplies for the London, Ont., camp has been awarded as follows : Groceries, Scandrett Bros. ; bread, Mr. McGinn ; wood, Mr. Walls ; straw, Mr. Percival ; meat, Mr. Lockyer.

The Port Arthur Sentinel wants the Dominion Government to give good assistance to the Ontario and Rainy River Railway as a competing line to the C. P. R., instead of bonusing a line to the Hudson's Bay.

At a meeting of the London Township Council it was moved by R. Dreaney, seconded by J. R. Hodgins, that the Council will do nothing to obstruct the carrying on of the Canadian Pork Packing Co.'s factory so long as the provisions of the Public Health Act are complied with. Carried.

One man in Montreal has made a million dollars out of the recent rise in wheat, a company has cleared half this sum and several individuals have scooped in from fifty to one hundred thousand dollars each. The profits from the advance have practically all gone to the speculators and middlemen ; the farmers have got very little of it.

The first crop bulletin of the Manitoba Department of Agriculture for 1895 has been issued, and is most encouraging, over three hundred correspondents being unanimous in stating that Manitoba crop prospects have never been better than at present. The light frosts during May did not damage the wheat, but rather checked rapid growth and made the wheat start out. To day the fields have thick, luxuriant coverings, giving promise of a great crop. The total estimated acreage under cultivation this year shows an increase of 295,380 acres over 1894, the increase in wheat being 130,090 acres. The total acreage under crop is distributed as follows : Wheat, 1,140,276 acres ; oats, 482,658 ; barley, 153,859 ; flax, 82,668 ; rye, 2,835 ; peas, 970 ; buckwheat, 125 ; corn, 1,004 ; potatoes, 16,716 ; roots, 6,685 ; total, 1,887,776 acres.

MARKETS AND MARKET NOTES

ONTARIO MARKETS.

TORONTO, June 13, 1895.

GROCERIES.

GENERAL trade is in a pretty fair condition. In sugar the situation is very strong. Although only a small quantity is moving the refiners will make no concessions, and of course when the demand sets in their position will be better than ever. In canned goods only small lots are being moved. The coffee market is very good and some grades of teas have first class demand. Spices are generally on the upward trend. Some nice new stocks of rice are to hand. Lemons still advancing in prices. This week has seen the first arrivals of California green fruit, some nice samples of cherries, peaches and apricots now being on the market.

CANNED GOODS.

The demand is not so good as last week, and only a small quantity is moving. Prices are still somewhat demoralized owing to the collapse of the Packers' Association. We quote: Tomatoes, 80 to 85c. for choice; corn, 75 to 80c.; peas, 75 to 80c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.85 to \$2 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, 90c to \$1, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.35 to \$1.45, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.45 to \$1.50; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Canadian canned beef, 1's, \$1.65 to \$1.75; 2's, \$2.65 to \$2.75; 6's, \$8 to \$8.25; 14's, \$18 to \$19. Chicago canned beef, 1's, \$1.75 per

dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

The local market is very good at unchanged prices. We quote green in bags: Rio, 20 to 22c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

A London, Eng., despatch says: The market seems to be cleaned out of good Rio coffee and it is impossible to get orders filled at the primary markets, where there is a great scarcity of the finer grades. Some common Rios are offering here.

The New York Commercial Bulletin says: Agents of many Brazilian houses, it is said, are scattered throughout the west, and some local importers, following the same practice, are soliciting and obtaining direct orders from roasters and jobbers at interior points; and it is now getting to be a common occurrence to find that when a cargo arrives a large proportion of it is at once landed and passes directly to transportation lines for conveyance to various portions of the country without affording local jobbers an opportunity for even examining a sample. In general there is enough coffee in sight, the visible supply of the world on June 1 being 3,086,491 bags, against 2,189,988 bags one year ago.

RICE.

There is a fair demand for rice and tapioca. The new stocks which have arrived are nice bright goods. We quote: "B," 3¼ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¼ to 6¼c.; tapioca, pearl, 3¼ to 5½c.

SPICES.

All spices are firm, and future shipments have advanced. Cream of tartar, which is up on the primary market, has advanced 2 to 3c. locally. We quote: Pure black

pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15 to 45c.; pure mixed spice, 25 to 30c.; cream of tartar, 22 to 28c. per lb.

NUTS.

Trade is quiet and unchanged. We quote as follows: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The market is very strong. Canadian refiners are making no concessions. They won't shade prices at all. Just now trade is quiet, and when the demand sets in the refiners will probably be more independent than ever. We quote prices: Granulated, No. 1, 4¾ to 4½c.; do., No. 2, 4½ to 4¼c.; yellows, 3¼ to 3¾c.; Demerara, 3¾c.; bright, 4c.

SYRUPS.

There is not much business doing, but prices are being firmly maintained. We quote: Dark, 30 to 32c.; medium, 33 to 35c.; bright, 40 to 42c.

MOLASSES.

Trade is on the dull side. We quote: New Orleans, barrels, 30 to 32c.; half-barrels, 33½ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

Ceylon and Indian teas of low grades are in good demand, and bring good prices in England. The samples of the new Japan teas that have arrived show a quite cup quality and first-class style. It is quite probable that both in style and draw this tea may equal last season's. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c.

W. WILSON

BAY STREET

TORONTO

We Invite

any Grocer handling

"SALADA"

CEYLON TEA

To return any he has in stock if it is not giving the greatest satisfaction to his trade; we will refund him the amount paid for it. There are nearly two thousand grocers now handling "Salada" in Canada. This invitation is always open to them.

Is any other TEA in the World
sold on like terms?

P. C. LARKIN & CO.

25 Front St. East.

and **TORONTO**
318 St. Paul St., MONTREAL.

MARKETS—Continued

for low grades, 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUIT.

The cheap raisins sold in New York are about exhausted, and it is probable that higher prices will rule before the new come in. Valencias are in good demand. We quote: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to 4½c.; selected, 5½ to 6c.; layers, 5½ to 6c.

Sultana raisins are quiet and unchanged, with 6½ to 7c. as the ruling idea as to price.

Prunes are still in demand at the old figures. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 4¼ to 5c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 6½ to 7¼c. per lb.; "Atlas," "D," 110 to 115 to half kilo, 4¼ to 5c. per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

Currants are in fair demand at unchanged prices. We quote: Filigras, half-bbls., 4 to 4½c., barrels, 4¼c.; fine Filigras, half-bbls., 4¼c., barrels, 4¾c.; Patras, 5½c., in cases; Casalinas, 4½ to 5¾c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Dates are quiet and unchanged at from 4½c. up.

Figs are dull and nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

J. L. Watt & Scott's last advices from Spain stated that the vineyards had an abundance of buds, and that a good large yield was expected. Later advices still say that the vines have gotten safely through the blossom stage, and that shipments may begin three weeks earlier than usual.

MALAGA FRUIT—According to advices the raisin crop will be good, while almonds will show a small yield.

ELEME FIGS AND SULTANA RAISINS—Good crops are looked for, according to last advices.

TURKISH PRUNES—The coming crop is likely to be small, but of good quality.

FRENCH PRUNES AND PLUMS—Neither is expected to be more than a medium crop.

SICILY FILBERTS AND ALMONDS—The supply of Sicily shelled almonds will be less by over 50 per cent. than last year's. In filberts, prices are expected to advance, in sympathy with almonds.

BUTTER AND CHEESE.

The offers of butter from the country have been very large during the past few days, but very little seems to have changed hands.

We learn so far of only one lot having been exported, and that was not a large one. In one or two cases, it is said, new grass butter has been offered at 10c. without a buyer. Even at this low price there seems very little prospect of an export trade, as the British markets are still reported in a very demoralized condition. Some buyers may feel inclined to take a few cases at these prices purely on speculation. We do not look for much activity for some days to come. Prices are unchanged. We quote: Summer dairy and store packed, 5 to 7c.; fresh large rolls, 10 to 12c.; prints, 13 to 15c. Fresh creamery—Tubs, 15 to 16c.; pound prints, 16 to 17c.

The cheese market stands much the same as last week. August and September makes of Canadian cheese bring 10 to 10½c., and new Canadian cheese is quoted at 7¾ to 8c. Small Stiltons bring 10 to 11c.

GREEN FRUIT.

Trade is active, especially in the new seasonable fruits and vegetables. Strawberries from the south are plentiful and a little easier, and a few domestic of fine quality are beginning to come in. Some consignments of green California fruits have arrived in the local market. These include apricots, peaches, and cherries. Bananas are plentiful and lower in price. Lemons are, as THE CANADIAN GROCER some weeks ago predicted, still rising. They are quoted \$1 higher in New York than in Toronto now, and therefore local prices are likely to keep on advancing. We quote: Messina lemons, 300's, 360's, and 420's, \$5 to \$6; Oranges—Messinas, half boxes, 80's, \$1.50 to \$2; 100's, \$1.75 to \$2.50; boxes, 160's, 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.75; Messina ovals, 80's, \$2.25 to \$2.50; California seedlings, \$2.75 to \$3; Valencias, \$6. Bananas, \$1.25 to \$2 for firsts and seconds. California dried fruit—Apricots, 12½c.; peaches 12½c.; Strawberries, 12c. to 15c. a quart; cocoanuts, \$4.50 a sack; pineapples, 8 to 14c.; green string beans, \$2.50 to \$3 per bushel crate; Egyptian onions, \$2.25 per sack; cucumbers, \$2.25 to \$2.50 per crate, \$1.75 per basket; new cabbage, \$2.25 to \$2.50 a crate; tomatoes, \$4 per crate; green California apricots, \$3.25 to \$3.50 per box; peaches, ditto; cherries, \$2.25 per box.

COUNTRY PRODUCE.

BEANS—Choice hand-picked are higher at \$1.70 to \$1.75 per bushel.

DRIED APPLES—Are quoted at 5 to 5½c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: 6½ to 7c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.25 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

POTATOES—A few southern new are coming in, and the old are weak at 40c. on the track and 50c. out of store. Some dealers will buy at this price still. New bring \$4.50 to \$6 per barrel.

EGGS—Eggs are slightly easier at 10c., some bringing 10½c.

FISH.

The market is only middling, a fairly quiet trade being done. Prices are not much altered. We quote: Skinned and boned codfish, 6½c.; boneless fish, 3½ to 4c.; haddock, 5 to 6c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; pike, 4½ to 5c. per lb.; flitched cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 6c.; white fish, 7c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Lake Erie herring, \$2.25 to \$2.50 per 100.; Restigouche salmon, 14 to 16c.

PROVISIONS AND DRESSED HOGS.

The situation is absolutely unchanged.

Packers are buying no more hogs, and hog products are firm. Dressed hogs bring \$6 to \$6.25 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8¼c. for small lots; breakfast bacon, 11c to 11½c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs., 11c.; small hams, 11 to 11½c.; pickled, 10 to 10½c.

LARD—Pure Canadian, tierces, 9c. tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Has advanced a couple of points the last few days. We quote: White, \$1.03; red, \$1.02; goose, 83c.

OATS—Quoted at 43½c.

BARLEY—Maintains the half-dollar figure.

FLOUR—More is being offered, but the market is still firm at last week's quotations, viz.: Ontario straight roller, \$4.50 to \$4.75; Manitoba, \$4.90 to \$5; patents, \$5.15 to \$5.25.

BREAKFAST FOODS—Trade is rather quiet. Oatmeal is a little weaker, in sympathy with oats, and cornmeal is firm, because of an advance in corn. We quote: Standard oatmeal, \$4.50 to \$4.60; rolled oats, \$4.50 to \$4.60; rolled wheat, \$2.75 in 100 lb. barrels; cornmeal, \$3.50; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SEEDS.

The season is practically over, and no trade is being done. The jobbers' prices quoted are merely nominal. We quote: Red clover, \$6.15 to \$6.50; alsike, \$4.20 to \$6; timothy, \$2.90 to \$3.50 per bushel

SALT.

Trade is brisk at unaltered prices. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

HIDES, SKINS, WOOL AND TALLOW

HIDES—With an active demand, and stocks fairly light, prices are still for greens: 8c. for No. 1 and 7c. for No. 2.

SHEEPSKINS—Sheepskins bring \$1 to \$1.25, lambskins 25c., and shearlings 15c.

CALFSKINS—Unchanged. We quote 8c. for No. 1 and 6c. for No. 2.

TALLOW—Still dull. Jobbers give 5 to 5½c., and sell ½c. higher.

WOOL—Dealers are paying 19 to 20c. for farmers' lots, and the demand is active. Local competition seems to be the trouble, as prices in England are the same as last year, and woolen goods are as dull as ever.

PETROLEUM.

Trade is very good considering the season. A good trade is being done in lubricating oils for farmers' purposes. We quote, in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 16 to 17c.; carbon safety, 18 to 19c.; Canadian water white, 18 to 19c.; American water white, 20½c.; photogene, 21½ to 22c.

ONTARIO MARKET NOTES.**TORONTO.**

Dawson & Co. have new potatoes in from Tennessee.

Hannah & Co. are willing to buy a few cars of potatoes.

"Dandy" can openers are for sale by Davidson & Hay.

John Sloan & Co. are in receipt of fresh pack "Thistle" haddies.

New pack canned haddies are being offered by Davidson & Hay.

Perkins, Ince & Co. are offering new season's pack of "Thistle" haddies.

New pack '95 "Thistle" haddies are now being offered by T. Kinnear & Co.

Dawson & Co. have received this week a large consignment of Florida tomatoes.

Eby, Blain & Co. have received a shipment of Batger's "Nonpareil" table jellies.

At James Lumbers' are to be found a quantity of this season's "Thistle" haddies.

Davidson & Hay report heavy sales of Ceylon Pekoes, advertised in our last issue.

Eby, Blain & Co. have just received a shipment of standard brand "Thistle" haddies.

McWilliam & Everist are doing a big trade in strawberries, pineapples and early vegetables.

H. P. Eckardt & Co., Smith & Keighley, and F. Humphrey have some fresh pack "Thistle" haddies.

According to D. Gunn, Flavelle & Co., Wenger's Ayton creamery butter is meeting with liberal sales.

McDonald's Tobacco Works, which were destroyed by fire some time since, will start up again about the second week in July, if not a week earlier than that.

brated pickle relish ; also some of Crosse & Blackwell's and Lazenby's pickles.

"Bon Ton" is the name of a new biscuit, out this week, made by the Toronto Biscuit and Confectionery Co.

The hot season being on now, the Canadian Specialty Co. are reporting good sales for Adams' root beer.

Eby, Blain & Co. have just received the first shipment of new milled rice. It is a fine, bright, clean quality.

Rutherford, Marshall & Co. say they have enquiries from outside for butter and are exporting some good size lots.

"The repeat orders for Bryant's root beer speak well for this brand, which is a first-class article, at a popular price," say H. P. Eckardt & Co.

D. Gunn, Flavell & Co. report large sales of their smoked meats, lard and long clear bacon. Their Maple Leaf brands are still their leaders.

H. P. Eckardt & Co. have a fresh consignment of the following brands of canned pineapple to hand : Wagner's sliced and grated ; also whole Singapore.

Davidson & Hay are in receipt this week of a shipment of fine selected layer Valencia, which they are offering at a very low figure. This fruit is in excellent condition.

HAMILTON.

"Queen" olives, a very superior brand, is being offered to the trade by W. H. Gillard & Co.

The snap offering by Lucas, Steele & Bristol in 14 lb. corned beef is being taken advantage of by the trade all over.

W. H. Gillard & Co. are offering bargains in peach, red currant and strawberry jams, 6 7-lb. pails in a crate. Ask for quotations.

Lucas, Steele & Bristol claim to be offering exceptional value in Ceylon and Japan teas. They will mail samples on application.

"Mallawalla" package tea, advertised in this issue by W. H. Gillard & Co., agents for Canada, is claimed to be excellent value. It pays the retailer a handsome profit at 50c.

"Yes, our tea trade has been very satisfactory this year," say Lucas, Steele & Bristol. "We find our sales of Indian and Ceylon teas increasing all the time."

W. H. Gillard & Co. are offering to the trade "Andrews'" clam extract, one of the most nutritious and meritorious foods, a valuable adjunct to the sick room and a superior table delicacy.

The Sicilian lemonade tablets which Lucas, Steele & Bristol have been offering for the past few weeks are packed 1 dozen bottles in a box and retail at 10c. There are 12 tablets in each bottle.

KINGSTON.

A large consignment of Patterson's sauces and essence of coffee was put through at Montreal this week for Geo. Robertson & Sons, of Kingston.

BRANTFORD.

Wm. Paterson & Son are placing some new lines of marsh mallows on the market. Travelers have samples.

It is expected some very fast time will be made in the ladies' 100 yard race at Wm. Paterson & Son's employees' picnic on Saturday. The prize is a handsome mirror.

QUEBEC MARKETS.

MONTREAL, June 13, 1895.

GROCERIES.

THE grocery market has been a moderately active one during the week. Among the prominent features have been the high opening prices on new pack canned salmon and the strength of molasses. Sugar also has moved with more freedom from first and second hands, and there has been some business in the small lot of new crop Japan teas that was referred to as having arrived last week. Spices and coffees have ruled quiet, and there has been another sharp advance in the price of lemons. Dried fruit continues much the same, with, however, rather more doing in Valencia raisins.

SUGAR.

The sugar market has presented a fair degree of activity during the week, for, as noted in our last, stocks in first and second hands are becoming exhausted, and, as a result, the volume of enquiry is increasing. There has been little change, however, as regards values, which rule much as they were a week ago. At the refineries we quote: Granulated, 4¼c. and yellows, 3¾ to 4c., as to quality. In a jobbing way granulated is held at 4¾c. and yellows at 3½ to 4c.

SYRUPS.

Demand for syrups has been slow, but prices are well maintained in sympathy with molasses and sugar. We hear of business at a range of 1¾ to 2¼c. per lb. on domestic, as to quality.

MOLASSES.

The firm tone of the molasses market already noted is fully maintained, and prices have advanced sharply both from first and second hands, as specially noted elsewhere. In fact, in consequence of the scarcity of prime Barbadoes there is quite a movement in Porto Rico at firm figures. We quote prices firm and 2c. higher at 37c. for Barbadoes, and 36c. for Porto Rico. There have been sales of round lots ex wharf for less money, but they could hardly be repeated.

RICE.

There has been a good demand for rice at steady values. We quote jobbing prices : Japan, \$4.25 ; crystal Japan, \$4.75 to \$5 ; standard B, \$3.45 ; English style, \$3.30 ; Patna, \$4.37½ to \$5 ; and Carolina, \$7 to \$7.50.

SPICES.

Spices rule quiet and steady as quoted last week. We quote jobbing prices as follows : Penang black pepper, 9 to 10c. ; white pepper, 13 to 15c. ; cloves, 15 to 20c. ; cassia, 12 to 20c. ; nutmegs, 65 to 90c. ; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

Demand for coffee has been rather slow and the market rules quiet for business in a large way. In a jobbing sense there is a quiet demand at steady prices. In a regular way we quote green coffee in bags as follows : Maracaibo, 21½ to 23c. ; Rio, 19 to 21c. ; Java, 25 to 30c. ; Jamaica, 20 to 22c. ; and Mocha, 29 to 32c.

TEA.

The tea market continues much as it was last week. The arrivals of new crop Japans, referred to last week, were not large enough

to cause any great flutter in the market. Prices on them have ranged from 34 to 35c., as to grade. In old teas business has been done at previous prices. On the whole the market can be called about steady, and prices are not expected to go higher, for advances from primary markets, coupled with lower freights, tend to create a tendency in the opposite direction. We quote : Japans, low grades, 14 to 14c. ; medium, 15 to 18c. ; fine, 18½ to 24c. ; and choice, 25 to 31c.

DRIED FRUITS.

There has been rather more enquiry during the week for Valencia raisins, but stocks are ample and prices are unchanged. We quote from 2¾c. for common off-stalk up to 5c. for fine and 4¾ to 5¼c. for layers.

Sultanas continue scarce and firmly held by the one house who possess any at 5¼c.

California raisins are moving along in a quiet way at 5¼c. for 3-crown and 6½ to 6¾c. for 4-crown.

There has been no change in currants, which rule quiet at 3¼c. in barrels and cases, 4 to 4¼c. for Filatras and Provincials, Patras, 5 to 5½c. and Vositzas, 7c.

Supplies of prunes are diminishing, the only kind available in any reasonable quantity being Austrian, which are held at 4½ to 5c.

There is no change in dates, which are firmly held at 4 to 5c. as to quality.

Dried apples are steady at 6c. and evaporated 6½c.

NUTS.

A quiet jobbing trade is to note in nuts at steady prices. We quote : Brazils, 8 to 9c. ; shelled almonds, 18 to 25c. ; Tarragona, 11 to 13c. ; Grenoble walnuts, 12 to 13c. ; shelled ditto, 24 to 25c. ; filberts, 6½ to 7½c. ; and pecans, 8 to 10c.

CANNED GOODS.

The chief feature since our last has been the business in new pack canned salmon, which have opened much higher than last spring. Quite a number of contracts have been settled, amounting to over 9,000 cases, at equivalent to \$4.35 f.o.b. on the Coast, and now packers want \$4.50 to \$4.85. Stocks of old salmon here are very light, and holders are not pushing sales. We quote : Lobsters, \$1.50 to \$1.90 per doz. ; sardines, \$8.50 to \$9.50 ; salmon, \$1.50 per doz. ; tomatoes, 80 to 90c. per doz. ; peaches, \$2 to \$2.75 per doz. ; corn, 85 to 90c. per doz. ; peas, 85 to 90c. per doz. ; strawberries, \$2 to \$2.25 ; raspberries, \$1.75 to \$2 ; green gages, \$2 to \$2.25 ; blue plums or damsons, \$1.50 to \$1.75 ; pineapples, \$2 to \$2.25, and 3-lb. apples, \$1 to \$1.10.

GREEN FRUIT.

APPLES—The apple market is firm at \$5 to \$6 per bbl. for fine and \$3 to \$4 for medium fruit.

ORANGES—The hot weather is increasing the demand for these, but prices are steady at \$3 to \$4.50, as to brand.

LEMONS—These have ruled very strong, and prices have advanced still further over those quoted last week, and we now quote \$5 to \$5.50 per case, as to quality.

BANANAS—The market is glutted with these and prices are heavy at 20c. to \$1 per bunch, as to quality.

PINEAPPLES—The same remarks apply to pineapples, which are dull and easy at 3c. to 10c. each, as to quality.

COUNTRY PRODUCE

EGGS—The egg market is quiet and steady at 10 to 10½c.

MAPLE PRODUCTS—These are quiet and unchanged at 4½c. to 5c. per lb. for syrup in tins, and sugar, 6c. to 7c.

HOPS—Dull and unchanged at 5c. to 8c., as to grade.

HONEY—Market sales quiet and unchanged at 7c. to 9c. for extracted, and 10c. to 12c. for comb stock.

BEANS—No change to report. We quote: \$1.60 to \$1.75 for hand-picked, and medium, \$1.25 to \$1.50.

POTATOES—These sell on the track at 55c., and in a jobbing way 65c. to 70c per bag.

ONIONS—Bermuda onions are quoted at \$2 to \$2.75 per crate, and Egyptian \$1.75 to \$2 per bag.

TOMATOES—New tomatoes are coming in freely and selling at \$3.50 to \$4.

PROVISIONS.

This market shows no important change. The demand continues slow for pork, but hams and bacon are moving freely. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

There is a good demand for Manitoba grades at steady prices, both on city and country account. Ontario grades, on the other hand, are dull but steady. We quote: Winter wheat, \$5.50; spring wheat, patents, \$5.15; straight roller, \$5 to \$5.25; straight roller, bags, \$2.35 to \$2.40; extra, \$4.30 to \$4.40; extra, bags, \$2.25 to \$2.30; Manitoba strong bakers', \$5.

An easy feeling prevails in the feed market, and prices have a downward tendency, but no actual change has taken place. We quote: Bran, \$15.50; shorts, \$17.50; mouillie, \$22 to \$23.

The demand for oatmeal is slow, and the market dull and easy in sympathy with oats. We quote: Standard, bbls., \$4 to \$4.10; granulated, bbls., \$4.20 to \$4.25; rolled oats, bbls., \$4.20 to \$4.25.

BUTTER.

There is absolutely no improvement in butter, which continues slow, and there appears to be little chance of any. Creamery, which sells at 15c. for the very finest, and Townships dairy at 14c., is the only kind wanted. Western dairy is not quotable.

CHEESE.

As expected, the speculative splurge of last week in cheese has entirely fizzled out and prices are now ½c. lower than they were. We quote: Quebec grades, 7¼ to 7½c., and Ontario, 7½ to 7¾c. Some 4,000 boxes of Quebec goods left first hands on the basis of 7¼ to 7¾c. laid down in Montreal.

ASHES.

The ashes market is quiet and steady. We quote: \$4.10 for first pots, and \$3.75 to

QUEBEC MARKET NOTES.

MONTREAL.

The market continues glutted with pine-apples and bananas.

The first large arrivals of fresh new tomatoes were received this week.

Vipond, McBride & Co. were large receivers of bananas this week.

Geo. Childs & Son have just landed a round lot of Stephens' pickles.

The first large contracts in new pack canned salmon were settled here this week.

Camphor on this market has jumped from 40 to 65c., and holders are firm at that price.

Fraser, Viger & Co. are landing this week a large shipment of Lazenby's preparations.

There have been English enquiries for hops during the week. This may affect prices.

Advices to A. P. Tippet & Co. state that California fruits are very steady at primary markets.

A large shipment of Spanish olives was put through port this week for Bate & Son, of Ottawa.

Large shipments of Rowntree's cocoa and other goods were bonded this week by Kennedy, Greig & Co.

A. P. Tippet & Co. are having a brisk trade with Stowers' lime juice cordial during the existing hot weather.

Advices state that tea freights are lower, being ½c. on sailing vessels and 1c. on steamers. This is apt to affect prices.

G. F. Benson, the president of the Edwardsburg Starch Co., left this week to take in the Adirondacks, accompanied by his mother.

Laporte, Martin & Co. have a large assortment of canned vegetable of all kinds, fish, salmon, sardines, etc. They can give bargain prices to any buyer wanting a lot.

Canary seed has taken a big jump. It sold at 3c. last week, and to-day holders here are refusing to accept 4c. Liverpool cables quote it firm at 53s., while it was only 38s. a fortnight ago.

Kennedy, Greig & Co. are putting up their new jellatine, "Jelloine," in packages this week, and now have them ready for the trade. They have it also in bulk, suitable for stiffening ice cream.

Cables to Rose & Laflamme state that new crops of French prunes promise to be backward, and the same advices come from Bosnia and California. In Bosnia prices are 35 per cent. higher than they were last season. Sales have been made of 1895 crop, 104 to 108's, at 18s.

QUEBEC.

A large number of shipments of Batger's "Nonpareil" jellies are landing in Quebec this week for T. Davidson & Co., N. Turcotte & Co., N. Rioux & Co., and Langlois & Paradis, all of this city.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER.

ST. JOHN, N.B., June 13, 1895.

BUSINESS continues active. Money is still scarce, and though paper is promptly met in many cases, smaller amounts are hard to collect. There is not the amount of business there was last

month, but that is the rule in June, beside which, the markets tended to cause people to buy earlier. There has been a more steady feeling in prices during the past week than for some time. Still, in all lines, except, perhaps, evaporated apples, in which there has been an advance during the past few weeks, the markets remain very firm. Butter continues to be the duldest feature, though smoked herring, hake and small cod are not far behind for lack of demand. In the business houses the clerks are beginning to take their holidays, and throughout the city a great many residences are closed for the summer, the people having gone to the many popular resorts near by. American visitors are becoming more plentiful, and the hotels are having their harvest. Last year there was said not to be enough first-class accommodation, but this year there is no lack of the best. The one great question with the visitors is why the St. John people leave their delightfully cool city for the hot country.

OIL—Shows no change, but there is a light demand in both burning and lubricating. Castor oil rules higher. In burning oil the market is very firm, and holders are rather expecting higher prices. We quote: American, best burning oil, 22¾c.; Canadian, best, 21c.; second, 17½c., no charge for barrels.

SALT—This has been rather scarce during the week, particularly fine, which was, in fact, out of the market, but for the arrival of some from Boston. There is no coarse due here except from the same port. The demand is fair. There is quite a demand for Canadian cheese salt during the past few weeks, the Windsor being the most largely used. We quote: Coarse, 50 to 55c.; fine factory filled, \$1 to \$1.10; 5-lb. bags, \$3 to \$3.25 per bbl.; 10-lb. bags, \$2.80 to \$3 per bbl.; 20-lb. boxes, 20c.; 10-lb. boxes, 12c.; cartoons, \$2 per doz.; cheese salt, bbls. bulk, \$2.70.

CANNED GOODS—There is little change in these lines as regards prices. The demand is good, particularly for tomatoes. One merchant, speaking to THE CANADIAN GROCER, said he had handled over twice as many tomatoes this season as ever before. Beef continues very firm, as do salmon, which are likely to open much higher than last year. Oysters and vegetables are all firm. We quote: Corn, 90c. to \$1; peas, 95c.; tomatoes, \$1 to \$1.05; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$3 to \$3.10; 1-lb. tins, \$1.70 to \$1.75; oysters, 2's, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$3 to \$3.15; 2's, \$2 to \$2.10; salmon, \$1.40 to \$1.50; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—As last week, there is little to be said. The demand continues quiet. Raisins are low, with fair stocks. Evaporated apples are lower and quiet. In dried the stocks here are light. Five cents was offered for a car by outsiders, but holders would not sell. It is understood a car could be bought for 5¼c., though many holders are asking higher prices. There are very few, if any, held in Nova Scotia. The demand for Bermuda onions is quiet. Some are expected to arrive by steamer this week. We quote: Currants, 1 lb. cartoons, 7½c.; bulk, 6½c.; dried apples, 5½ to 5¾c.; evaporated apples, 7½ to 8c.; Sultana raisins, 6 to 7c.; Valencia, 4 to 4¼c.; layers, 5 to 5¼c.; London layers, \$2 to \$2.25; loose

muscatels, 5 to 5½c.; currants, bbls., 3¾ to 4c.; half-cases, 4¼ to 4½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.; Bermuda onions, \$1.60 per crate; Egyptian, 2 to 2¼c.; California evaporated peaches, 12 to 13c.; do. apricots, 12 to 14c.; do. pears, 12 to 13c.

GREEN FRUIT—Business continues very active. In California oranges the goods are not keeping, while Valencias are becoming scarce. This leaves Messinas the orange of the day. As the warm weather comes on lemons advance. Strawberries are lower, as is rhubarb, which is coming in from the country in large quantities. Bananas are easier, and at this season are favorites. We quote: Pineapples, 10 to 18c.; rhubarb, ½ to 1c.; strawberries, 10 to 12c.; Messinas, \$4 to \$4.50; bloods, \$2.20 to \$2.50; Valencias, \$6; lemons, \$4.50; bananas, \$1.75 to \$2.50.

DAIRY PRODUCE—The markets are not very active, though a fair quantity of cheese is arriving, so far, largely from Ontario. A few came from Quebec and some from our own province. In a few weeks we shall have enough of our own province to supply the demand, and in quality they are second to none, though some very fine Ontarios have been here this season. In butter the demand is light and prices are low. With new coming in freely a great many buy in the market, which makes it the quieter at both wholesale and retail stores. Creamery prints are coming in freely and find a

fair demand. Old butter can be bought at any price. Eggs continue firm, finding good demand. It is hoped shippers will be very careful of quality. We quote: Old butter, dairy, 12 to 14c.; creamery, 14 to 15c.; new dairy, 15 to 17c.; rolls, 17 to 18c.; new creamery prints, 18c. Cheese, new, 8½c.; old, 9½c. Eggs, 9½ to 10c.

MOLASSES—The demand is active. The cargo of Porto Rico spoken of last week turned out nice goods and splendid packages. It was all sold off the wharf, finding quick sale. The price off the wharf to the wholesale trade is understood to have been 32c. A large quantity of the Barbadoes which has arrived here has not been extra. Stocks of molasses here are still light. The West India boat arriving this week has replenished the stock of Barbadoes. Prices are very firm. We quote: Barbadoes, 33 to 34c.; Porto Rico, 34 to 35c.; St. Croix, 32 to 34c.

SUGARS—There is a fair demand from the retail trade. Prices are very firm, and when it is remembered that ½c. of the price is duty, the figures are still very low, and many look for a further advance. Stocks here are fairly large. The largest demand comes in about next month. We quote: Granulated, 4½ to 4¾c.; yellow, 3½ to 3¾c.; Paris lump, 5 to 5½c.; powdered, 5 to 5½c.

FISH—The fresh fish business is active. Salmon, in which a large business is done here is just beginning. So far the catch is light. Shad are about done. The catch has been very light. Nothing is nicer than smoked shad. It is a great favorite with our American visitors. Gaspereaux are still being caught in fair quantities. Lobsters continue very scarce and halibut is the same. In dry the markets are easy. Small cod are low with a light demand. Hake are dull and quiet, and large stocks are held here. In the West Indies, where they are sold, the market is unusually low. Smoked continues dull with fair stocks. We quote: Halibut, 8c.; gaspereaux, 50c.; smoked, \$1 per 100; lobsters, \$6 per 100; large cod, \$3.75; medium, \$3.60; small, \$2.75 to \$3; pollock, \$1.70; bay herring, \$1.40 to \$1.50 half-bbl.; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; shad, 9 to 10c.; smoked herring, 5½ to 6c.; Digby chickens, 10c.; salmon, 11 to 12c.

PROVISIONS—The markets remain firm. In beef, plate is scarce in Chicago. There has been a large quantity of Canadian barrel beef sold during the past year, giving good satisfaction. In smoked meat the demand is light, rolls being rather easier. Lard is firm. Beef is very firm, but the demand is light all round. We quote: Clear pork, \$18 to \$18.50; mess, \$16.50 to \$17; beef, \$14.50 to \$15; pure lard, 9 to 10½c.; hams, 11 to 12c.; compound lard, 8 to 9c.; rolls, 9 to 9½c.; cottolene, 9¼ to 9¾c.

FLOUR, FEED AND MEAL—In flour, the market has been quieter this week than for some time. But little advance has been noticed. In oatmeal, prices here are below millers' prices, and, when the price of oats is remembered, millers' prices do not look high. An advance is looked for. Oats are higher. Ontario oats are out of the question, the demand being supplied from Prince Edward Island. Hay is very dull. Feed is scarce, but is only in light demand. Cornmeal and beans are firm. We quote: Manitoba, \$5.65 to \$5.75; best Ontario, \$5.35 to \$5.50; medium, \$5.10 to \$5.25; oatmeal, \$4.60 to \$4.70; cornmeal, \$3.10; middlings, \$25 to \$25.50 on track; bran, \$22 to \$22.50; hand-picked beans, \$1.90; prime, \$1.75 to \$1.80; oats, Ontario, 51 to 52c.; hay, \$8 to \$8.50; pot barley, \$4.15 to \$4.20; round peas, \$3.75 to \$3.90; split, \$3.75 to \$3.90; P.E.I. oats, 47 to 48c.

NEW BRUNSWICK MARKET NOTES.

ST. JOHN.

Reports from Nova Scotia are favorable to a large fruit crop.

Canadian exhibitors at our coming exhibition would do well to speak for space required at once.

The barque Kalstad is at Point du Chene from Liverpool with a cargo of coarse and fine salt for Merritt Bros. & Co.

Lumber shipments from this port for the past week were very heavy. Shipments during May exceeded those of May last year by \$19,000.

Messrs. C. & E. Macmichael have received a full stock of Hogarth & Co.'s concentrated fruit drinks. During the hot weather they find large sale.

THE CANADIAN GROCER hears with regret the death of G. F. Calkin, of the firm

of Calkin & Davidson, commission merchants, city market.

Imports into St. John, May, 1894, \$294,257; 1895, \$267,228. Duty collected, 1894, \$66,514; 1895, \$57,584. Exports, 1894, \$290,375; for 1895, \$350,151.

In the savings banks in this province the improved feeling is noticed, the deposits for May exceeding the withdrawals. The figures are: Deposits, \$101,631; withdrawals, \$94,876.

THE CANADIAN GROCER regrets to have to report the death of J. S. Turner, Esq., who has for a great many years been closely connected with the fruit and grocery business of this city.

There is not a week but the report of some store through the country being burglarized reaches the city. There must be neglect somewhere among the authorities. This week it is the store of A. E. Frazer, Springhill.

Of the 28 cheese factories and two butter factories on Prince Edward Island, 12 cheese factories are new this year. The island has a splendid reputation for the quality of its cheese output.

Report from Summerside, P.E.I., now that the oyster fishing season has closed, is that the catch has been a small one. Lobsters are reported plentiful. Reports from this province also favor large crops of hay and fruit.

THE CANADIAN GROCER extends its congratulations to Alexander P. Patterson and bride. Mr. Patterson is the popular accountant of Messrs. Baird & Peters. Among the handsome presents received were: An onyx table from the firm, and a handsome table and lamp from the bicycle club.

DIGBY.

G. T. Stone will put a plate-glass front in his grocery store. He was in St. John this week ordering the glass.

FREDERICTON.

Fredericton shows an increase in the value of its imports during May, 1895 over May, 1894, of \$20,000. The exports are rather lower.

The merchants of this city have taken up the early-closing movement.

HAMILTON TRADE GOSSIP.

ALTHOUGH the volume of business is probably not as large as a week ago, yet a nice steady trade is being done and the general situation continues to develop more encouraging features. There is less disposition to cut prices, which is a good sign, especially in view of a slightly decreased volume of business. Sugar appears to be still less wanted than a week ago, but the price remains steady at 4½c. for granulated.

While for sugar there is a decreased volume of business, quite the contrary is to be noted in regard to canned goods. They are selling freely. One dealer in one to twenty case lots informs me that during the past week he disposed in the aggregate of no less than one thousand cases. The ruling figure for tomatoes, peas and corn is around 80c. per dozen. There are, however, what is termed off brands, which 75c. per dozen will procure.

Syrups and molasses are naturally not occupying much attention at the moment, but for the little that is going out in both these lines retailers do not appear adverse to paying the recent advance.

Quietness still predominates in the tea market. There is no particular anxiety on the part of anyone to secure the early pickings of new season's Japan teas. Regarding other teas, the information so far to hand has been too meagre in order for one to ascertain with any degree of reason what they may bring forth.

Mr. Dallas, the Japan tea man, New York, was in Hamilton on Tuesday. I did not run against him myself, but a friend of mine did. "He told me," said this friend in reply to a query of mine, "that there is very little prospect of any quantity of tea at from 15 to 17c. being in the market for the next six weeks, and that when they do come in they will not be anything like as good value as last year. He was furthermore under the impression that those who sold Japan teas in July and August last year at 15 to 17c. must have lost from 1½ to 2c. per pound."

As soon as the summer months well set in, Hamilton becomes a sort of Mecca to country merchants, who make this the centre for their supplies. In a word, they come on business as well as pleasure. In conversation with a member of the firm of Lucas, Steele & Bristol regarding this matter, he said: "We are always very glad to see these merchants, and to give them the use of our office as headquarters. If they want to do any letter-writing, or have their correspondence addressed here in our care, they are most welcome. People visiting us

in this way are not necessarily looked upon as customers. We consider these visits, first of all, as being actuated by a friendly spirit. What I mean is, that we don't want to get country merchants into our sample-room in order that we may sell them goods. No, we want to get acquainted with them, and be of some service to them, if possible."

"Here is something that should interest you," remarked Mr Mewburn, of James Turner & Co., as he handed me a letter. It was from Wharnock, B.C., and read something like this: "Please send me a sample of Ram Lal's tea, which I see advertised in THE CANADIAN GROCER." "That paper of yours has quite a circulation out through the west," remarked Mr. Mewburn, as I handed him back the letter.

Hamilton is to have another big store, or at least an already large store is to have its dimensions materially extended. The store is A. Murray & Co.'s dry goods establishment in King street, and the proposed enlargement will be made by taking in the Oddfellows' hall.

Mr. D. Pasqua, of Smyrna, was here on Tuesday. This is his second visit to Hamilton, he having been here two years ago. "He is just visiting his friends in this country," explained my informant, "and is making his way eastward."

Prospects for local trade are particularly good just now; better, in fact, than they have been for some years. This is, of course, largely owing to the opening up of the Toronto, Hamilton & Buffalo Railway, the Hamilton, Grimsby & Beamsville Electric Railway, the Smelting Works, the proposed Radial road, and various other undertakings.

The rendezvous during the summer for Hamiltonians who can afford it is Burlington Beach. Last week quite a number of families moved their bag and baggage there. In consequence of this, Lucas, Steele & Bristol report that quite an increased local demand has developed for campers' supplies.

Payments have improved wonderfully within the last few weeks. "They were very poor this spring," remarked one wholesaler, "but they have lately shown a marked improvement, and may now be accounted fairly good."

W. L. E.

BASE BALL.

W. H. Gillard & Co.'s "Pickles" defeated Macpherson, Glassco & Co.'s "Lights of Asia" in a game of base ball at Dundurn Park, Hamilton, on Saturday last, in a score of 9 to 2. Both teams had been practising for some weeks, and each felt all confidence

in their ability to uphold the standard of their respective firms, but as the game advanced it soon became evident that the "Pickles" by their excellent fielding and the uniformly good work done by their battery would win, and at the end of the seventh innings the Macpherson, Glassco combination surrendered the game to the victorious "Pickles."

NEW COMPANIES.

The Compressed Fodder Company of Ontario has been organized, with capital stock of \$50,000 in \$100 shares, the incorporators being H. Bunker, W. R. Wallace, J. H. McKeggie, A. W. Wilkinson, A. E. H. Creswicke, all of Burrie, and W. P. Chapman, of Hamilton.

Notice is given of application for letters patent to incorporate the Dominion Cold Storage Company, limited, headquarters Montreal, capital \$300,000. Applicants—Patrick James McNally, merchant; George Perry Sylvestre, doctor of medicine; William Morris Burden, gentleman, all of Toronto; James McGregor, manager of Cold Storage, of Chicago, Illinois; Colin McArthur, manufacturer; Archibald Dunbar Taylor, advocate, and Duncan Alexander McCaskill, merchant, all of Montreal, all of whom are to be provisional directors.

The Perce Fishing Company has been incorporated with \$25,000 capital.

ANOTHER ADVANCE IN HORSE NAILS.

The Horse Nail Association held a meeting this week and decided to make a further advance in prices. There were present the representatives of the Canada Horse Nail Co., Montreal Rolling Mills Co., Peck, Benny & Co., Montreal; James Pender & Co., St. John, N.B. The plan under which the association are now working seems to be a successful one, as they are able to fix and maintain prices. Previous to their organization the competition cut prices to a low basis. The present advance is part of the plan to gradually work them up to a profitable standard.

The association, in accordance with the decision come to at this meeting, has issued this circular to the trade:

We beg to inform you that the following prices, terms and discount for the sale of horse nails in Canada have been adopted by us, and shall take effect this day:

STANDARD LIST.

No.	1	2	3	4	5	6	7	8
Length	1½	1¾	1¾	1¾	2	2½	2½	2½
Price	\$1.50	1.00	.75	.50	.30	.27	.24	.23
No.	9	10	11	12	13	14	15	
Length	2½	2¾	2¾	2¾	3	3½	3½	
Price	.22	.22	.22	.22	.22	.22	.22	

Trade discount: 55 per cent.

Terms: Four (4) months, net, or three (3) per cent. discount for prompt cash settlement in 30 days.

Delivered: F.o.b. Montreal.

The trade discount up to date has been 60 per cent., and the change to 55 per cent., therefore, increases the cost to the trade by just 5 per cent.—Hardware and Metal.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, June 13, 1895.

WITH the exception of butter, cheese and fish, business is good throughout the province. There is very little doing in the lines just named—there is absolutely nothing doing in cheese. It looks as if butter would become a drug on the market. A large number of new creameries throughout the province will be putting their products on the market and they are all looking Halifaxward. Up to the time of the crash at St. John's, Newfoundland, our butter makers managed to dispose of large stocks in that market. Antigonish did a large business there, but has lost it all. It is now hoped that as Newfoundland has secured its loan, the market may again be available. The provincial creameries are now looking up agencies in this city and it looks as if we will have far more native butter than we can handle. The want of a cold storage is being felt in this particular. There are large stocks on hand and already the slaughter season has set in. One firm advertises three pounds of butter at 25 cents. I made some enquiries and ascertained that it came from a factory in Hantsport—a new creation.

The flour market remains firm. In regard to the break reported by a Montreal trade paper, Messrs. J. A. Chipman & Co., the largest and most reliable dealers here, say: "We beg to say that our markets have never broken here, that they are firmer to-day than they have been at any time in the past; that we have always been below western markets; that we never asked as high a price for straights as \$5, and that we knew Montreal and the western markets were a good deal higher than we were here. Neither have the Ontario millers broken prices. We mean those who moved along steadily with a uniform advance as the markets advanced. All such leading millers are at the top of their highest prices to-day, without the slightest inclination to yield. We might just add that there are some erratic millers, and holders, too, perhaps, who ran away with the idea of squeezing \$6 per barrel. Such people have had to break away."

SUGAR—The sugar market is dull, and prices remain unchanged. Business is dull at the refineries, as buyers are still taking delivery of goods purchased before the duty was imposed.

FISHSTUFFS—Nearly all the different grades of new fish are now obtainable. Cod are not wanted at all by the exporters. The new catch is very hard to keep from spoiling, and old stocks are quite sufficient for present needs. The price continues very low, ranging from \$2 to \$3. Haddock are quoted at \$2 and hake at \$1.75. New salmon will open at \$20 for 1's, and decline rapidly until the proper value (\$13) is reached. The catch of spring mackerel is fairly good, and receipts during the next ten days will be more than sufficient for all requirements. The price will likely decline until \$6 is reached, and then remain steady at that.

FLOUR—The flour market remains decidedly firm, with good enquiry. Considerable stocks are moving at the following quotations: Hungarian patent, Manitoban, \$5.60 to \$5.75; Manitoba strong bakers', \$5.50 to \$5.60; Canadian pastry, \$5.40 to

\$5.60; 75 p.c. roller patents, \$5.35 to \$5.50; 80 p.c. do., \$5.25 to \$5.35; 90 p.c. do., \$5 to \$5.25; straight, \$4.90 to \$5.10; extra, \$4.75 to \$4.85.

PROVISIONS—There is no change in beef, except for extra choice, which is quoted at \$9.50. Lambs have dropped, being quoted at \$2.75 to \$3. Mutton is also down to 7c. Veal remains at 4c. Dressed hogs are quoted at 7c. American clear pork is quoted at \$20, and mess pork at \$18. P. E. Island pork has advanced, mess being quoted at \$18, and thin mess at \$16.50. Smoked hams are worth 11½ to 12c.

POULTRY—There is very little doing in the poultry line. Fowls are worth 55c. per pair and turkeys from \$1 to \$1.50 each.

BUTTER—The butter market remains about the same as last week. A number of provincial creameries are looking for city agents. Extra is quoted at 16 to 17c., and creamery at 20c.

CHEESE—This line remains dull. May is quoted at 8½c.

EGGS—Eggs, good stock, are worth 10c. to-day. Charlottetown quotation to-day is 9½c., and to this must be added ½c. for freight, which includes return of boxes.

CABBAGES—Southern cabbage are arriving in excellent condition.

CUCUMBERS—Southern cucumbers of an extra good quality are being received.

GREEN FRUIT—The market is well supplied with green fruit to-day. Valencia oranges are arriving in good condition and prices are advancing, as the season is about over. New Jamaica oranges, the first of the season, arrived to-day and are quoted at \$7. With the warm weather the demand for lemons increases and prices are advancing, \$5 per case being asked for choice fruit. American strawberries are arriving in moderate quantities and in fair condition. It is expected native strawberries will be on the market in about 10 days. Southern tomatoes are arriving in excellent condition. Ripley pineapples are to hand in fine order and are excellent fruit. The prices of bananas continue steady, but are expected to be lower in the near future.

ONIONS—Egyptian onions are still supplying the market. New American will arrive shortly.

MOLASSES—There is only a fair demand for molasses. Several cargoes have arrived at provincial ports, and the supply is fairly large—large enough for present requirements. To-day's quotations are: Antigua, 30c.; Porto Rico, 32 to 35c.; Trinidad, 30c.; Barbadoes, 34c.; Demerara, M. K. brand, 39c.; St. Kitts, 28c.

HALIFAX MARKET NOTES.

The Ceylon Tea Company secured the contract for supplying H. M. dockyard with tea for one year. A. Hobrecker is the agent here.

Baker Bros. have gone into the produce and commission business, at the stand formerly occupied by P. M. Jenkins & Co., Water street.

Eggs were selling here this week at "three dozen for 25 cents." They came from Cape Breton and were ancient stock. Housekeepers took to the "snap" readily, but they are yet to be heard from.

A Charlottetown paper says: Kensington cheese factory opened a day earlier this season than last, and notwithstanding losses by other factories placed near it, this season

the amount of milk in the first seven days is 21,600 lbs. larger than the first seven days of last year.

M. O. Wier & Co. is the name of the new grocery firm on Argyle street. L. O. Neily & Co., Aylesford, who were burnt out some time ago, are rebuilding.

SHOULD HELP CURRANT MARKET.

A STIMULUS to the currant industry of Greece and a hardening tendency on prices should be the effects of the new commercial treaty between Russia and Greece, whereby currants from the latter country will be admitted free by the former.

It is less than two years, if our memory serves us right, since Russia became a purchaser of Grecian currants. She was induced to buy on account of the low prices then obtaining. The steadiness the appearance of this new customer gave to the market is no doubt remembered by the trade.

Although previously an unknown quantity in the Grecian currant market, from the day she did step in Russia has been an all-important factor; when she has eased off in her purchases the market has eased off; when her demands increased the market tightened.

With the Customs barriers removed in Russia, we may naturally look for further development in the Grecian currant trade with that country.

And anything that will tend to develop the currant industry of Greece will doubtless be welcomed by the vineyard owners in that country. During the last few years this industry, through a variety of circumstances, has been gradually becoming less and less profitable. Two years ago it was asserted that at the price at which the grower had to sell he was not much more than remunerated for the labor expended in merely harvesting the crop. And so deplorable had the conditions become that the question of turning the vineyards into wheat fields was seriously discussed. Some, probably, put the consideration into practice, although what hope they could have of bettering their condition by going into raising wheat instead of currants it is difficult to conceive.

Russia, it is understood, uses the currants she imports largely for sweetening purposes in wine-making.

PERSONAL MENTION.

Mr. Fred. J. Ward, of John P. Mott & Co., Halifax, N.S., spent Wednesday in Toronto.

Mr. Theo. O. Leonard, representing Kingsford's Oswego Starch, was on the Toronto market this week.

Thomas & Wilcox, Teeterville, have dissolved. H. E. Thomas continuing.

HIS MOTHER MADE HIM.

A SUCCESSFUL merchant, not long ago, says Trade Magazine, paid a short visit to his native town, a thriving little place, and while there he was questioned by his friends on the general subject of success in life.

"But I don't know that I have anything to say except that industry and honesty win the race," he answered.

"Your very example would be inspiring, if you would tell the story of your life," said an acquaintance. "Are you not a self-made man?"

"I don't know about that."

"Why, I've heard all about your early struggles. You went into business with Mr. Blank, when you were about seventeen years old —"

"So I did, so I did. But my mother got me the place, and while I was there she did all my washing and mending, saw that I had something to eat, and when I got discouraged, told me to cheer up and remember tears were for babies."

"While you were working for Mr. Blank, you studied at night and educated yourself, —"

"Oh, no, not at all. My mother heard my lessons every night, and made me spell long words every night while she did her

work. I remember, one night, I got so discouraged, I dashed my writing book into the fire, and she burned her hands in pulling it out."

"Well, it was certainly true, wasn't it, that as soon as you were able to run about you bought some fruit and began to sell it at the railroad station?"

The successful merchant's eyes twinkled and grew moist over the fun and pathos of some old recollections.

"Yes," he said slowly, that was the way I first began to be a business man, and I should like to tell you a story connected with that time. Perhaps that might do someone good to hear it. The second lot of apples I bought for sale were speckled and wormy. I had been cheated by the men of whom I had bought them, and I could not afford the loss. The night after I discovered they were unfit to eat, I crept down to the cellar and filled my basket as usual.

"They look very well on the outside," I thought, 'and perhaps none of the people who buy them will ever come this way again. I'll sell them, and as soon as they are gone I'll get some sound ones.'

"Mother was singing about the kitchen as I came up the cellar stairs. I hoped to get out of the house without discussing the subject of unsound fruit, but in the twinkling of an eye she had seen and was upon me.

"Ned," she said in her clear voice, 'what

are you going to do with those speckled apples?'

"Se—sell them," stammered I, ashamed to advance.

"Then you'll be a cheat, and I shall be ashamed to call you my son," she said promptly. 'Oh, to think that you could dream of such a thing as that!' Then she cried and I cried, and I've never been tempted to cheat since. I have succeeded because I had energy and industry, and I have always acted on the square, not only with my employer and patrons, but with myself. That's the hardest part of the battle to learn. No, my friends, I have nothing particular to say about my early struggles, but I wish you'd remind your boys and girls that their mothers are doing far more for them than they do for themselves. Tell them, too, to pray that their mothers may live long enough to enjoy some of the prosperity they have won for their children, for mine didn't."

Tears glistened in his eyes as he walked away.

A WINNIPEG CANNERY.

It is said that Winnipeg, Man., is to have a canning factory. Tomatoes, corn, and other vegetables, which are plentiful in the Prairie Province, will be chiefly canned. Several local men with ample means are reported to be behind the scheme.

GOOD STOREKEEPING.

THE store occupies a corner, and both front and side are fitted up with ample window accommodation, says Trade Magazine. The dead walls are fitted with all the shelving they will bear, and the centre is provided with several stands of various shapes and varying size. All the goods in the store are out in plain sight, from the pile of flour sacks in one corner and that of potato sacks in another, to the bottle of extracts and other small shelf goods behind the counter. The windows are all filled with all sorts of the nicest things on sale. Everything is classified. Everything is free from dust. Every article looks as if it had just been unpacked from a case or other original package. There is no appearance of rusty goods, of stuff that has been carried over from year to year for a decade. Then all the goods are marked with selling prices so neatly done that at once the customer can see just what is to be paid for anything needed. With goods that change frequently in value, most pains are taken. Fruit and vegetables are all marked so many pounds for 25 or 50 cents, or so much per box or basket or sack. In the window bottles of olives, of pickles, of chowchow, of extracts and all that sort of thing are carefully marked with the price.

A good deal of labor was put upon this stock of goods; but it was labor very well

expended. Merchants do not always realize what a comfort it is to customers to be able to look over a number of things this way and see what they are worth without asking the prices. Merchants are handling everything in the store every day and they know what each article is worth. They are prone to forget that their customers buy once a week or so, and do not buy some things oftener than once a month, or, perhaps, once a year. "It is easy to ask." Perhaps it is and perhaps it is not. People often come to a store intent on making a small sum of money go as far as possible. It is more or less embarrassing to some of us to go over a long list and ask the prices of all on it. We do not care to price this basket of peaches and that basket of apples and this of pears or grapes. We do not care to enquire how many pounds of rolled oats are sold for 50 cents and how many of rice for a dollar. When it comes to luxuries, which many of us do not buy frequently, we get a notion that they are much more expensive than they really are. On one occasion we heard a nicely dressed and intelligent appearing woman exclaim: "Why, see that bottle of olives! Only 50 cents. I will buy one."

The merchant should remember that the great city bazaars get a great deal of their custom by means of their price lists, which they send out. When one of these comes through the mails in many instances all the

female members of the family, and not infrequently some of the sterner sex, too, may be seen perusing its pages, and many are the exclamations of "you can get ten tins of this, or thirteen pounds of that for \$1. That is cheap."

No money and no time is spent to more advantage in the store than that which goes to put in plenty of show window, plenty of shelving, and to putting the prices on goods in figures so plain that they can be read all over the store. Let the customer know what there is to be had and what it will cost, and, depend upon it, your sales will greatly increase. Such a course of itself will steadily draw you new customers, no matter what your line of business.

MAKING HIS MARK.

"I alwuz said John wuz a-goin' to make his mark in this worl'."

"Whit's he been a doin' of now?"

"Why, he's gone an' wrote a piece for the papers!"

"Do tell!"

"Hit's a fac'!"

"An' what does he say in it?"

"Well, the fust line says his name, in big letters, and the next says as how he's the best butcher in town, with his prices the lowest, and hanged if any of 'em kin sell cheaper 'n what he kin!"—Atlanta Constitution.

"Canadian Safety" Matches . . .

Attractively and safely put up in small sliding boxes to carry in the pocket. These light only on the box, and are fully equal in quality to the imported article.

In 5 gross cases.

"Safety" Matches

In patent boxes, which serve also as match safes, being made to hang on the wall; adapted specially to hotels. The man who takes matches by the handful gets left here as "safetys" light only on the box.

In 1 gross cases.

"Favorite" Matches

Small parlor matches with blue heads, in compact sliding boxes; entirely safe from ignition by accident; a fit companion to a pipe and package of tobacco.

In 5 gross cases.

"Beaver" Matches

Parlor matches in a sliding box for house use; these are an improvement on the old parlor—ignite very readily and do not glow when flame is extinguished.

In 1 gross cases.

All these matches present the unique feature of immediately becoming cold and dead when the flame is extinguished, thereby precluding all danger from fire by "droppings" or live embers.

The above brands of matches are all absolutely odorless, no sulphurous compound being used in their manufacture.

We are sole makers in Canada, and these matches are fully equal to any of foreign make.

MOGUL TEA.

THE following verses were sent in to T. B. Escott & Co., London, by a person to whom they had submitted a sample of "Mogul" tea.

Some people praise the young Hyson,
And some the uncolored Japan,
But now all the rage is the "Mogul,"
And we drink it as fast as we can.

It was named for a great king of India,
The Mogul great, glorious and grand,
And whenever he sat at his table
He would have the best in the land.

To his merchants he'd send in his orders,
The best tea in the land for to bring.
And whenever they brought him the "Mogul"
He'd say it was fit for the king.

They say he would send invitations
To all his great nobles of rank,
And many would go to his banquets
Just to see all the tea that he drank.

And when he'd get praising its flavor
He'd look happy as happy could be,
And he'd rattle his big cup and saucer,
And call for a little more tea.

It's no wonder it soon grew in favor,
And counted the best in the land,
When the king would be praising its flavor,
And say that that tea tasted grand.

Mr. Escott he sent me a sample,
It seemed to be healthy and strong,
I suppose that he thought it was ample,
But I tell you it didn't last long.

It was very fine as a sample,
But if he had made it ten pound,
I'd have all the tea drinkers singing
Its praises for twenty miles round.

ADARE.

TWO PRESENTATIONS.

IN response to an invitation given by Mr. T. B. Escott, the employes of the firm of T. B. Escott & Co., wholesale grocers, London, assembled at his home last Tuesday evening, June 4. The desire of the firm in having their employes gather in this social way was to show their appreciation and deep regard to one of their most popular travelers, Mr. Wm. E. Eardley, who was about to be united in marriage to one of London's fairest and most winsome daughters, Miss Susie Belle Wilkins.

After the inner man had been thoroughly satisfied, Mr. Escott, in proposing the health of "Our Guest," spoke in very high terms of the sterling character and marked ability of Mr. Eardley, and held him up as a pattern to the younger employes of the firm to copy. He had risen from invoice clerk to be their most trusted and honored traveler. By strict attention to the details of the respective departments he had been called upon to fill, he had proved himself worthy of the fullest confidence of the firm, and had thus gained the high place he occupied to-day.

Mr. Eardley, in reply to the toast, thanked Mr. Escott for the flattering terms in which he had referred to his services during the nine years he had been associated with the firm. He attributed his success as a traveler

very largely to the fact that he endeavored at all times to treat his customers' interests as his own, and to be fair and square with each and every one. It was certainly gratifying to him to know that he had the confidence and esteem of his employers.

Mr. J. C. Hazard, the junior member of the firm, before proposing the toast of "Our travelers," wished most heartily to endorse all Mr. Escott had said in regard to Mr. Eardley. In traveling through the country he came across many of Mr. Eardley's fellow-travelers, and he must say he had yet to meet one who had a word to say disparagingly of Mr. E., but on every hand he was spoken of in high terms, not only as a successful traveler, but as a thorough gentleman. Certainly he was the soul of honor, and true to the core.

Mr. Thomas W. Nash very ably represented the "Mercantile Interests." As bookkeeper to the firm, he was very much pleased to notice the large quantities of Grand Mogul tea that were being shipped from their warehouse, and was satisfied that it was largely through this favorite tea being placed in the hands of merchants throughout the country from the far east to Vancouver that the firm of T. B. Escott & Co. had become so well known of late years.

Mr. Vaughan L. Jenkins very humorously spoke to the toast and interests of "The Lion Manufacturing Company."

After Mr. Eardley had proposed the health of the firm, referring in very grateful terms to the consideration shown him at all times by each member of the firm, he was presented by Mr. Hazard, on behalf of the firm, with an address and two fine carved oak chairs. After Mr. Eardley had acknowledged the gifts, Mr. Thomas W. Nash, on behalf of the employes, presented him with a case of pearl handle tea knives and forks. The evening was spent in song and games, and the guests departed at midnight.

City Agents for Windsor Salt Works.

DOMINION COUNTER SCALE

With Patent Automatic Scoop Balance

Simple in construction. Nothing complicated or liable to get out of order.

Capacity, 210 lb. by Oz.

Size of Platform, 14 in. long, 11 in. wide.

Nickel-plated Beam, Poises and Scoop Balance. Double Beam, marked on both sides. The Automatic Scoop Balance is now offered for the first time, and every grocer who uses it will find it a great saving in time, and it will also obviate liability to error. When scoop is placed on the platform, the ball on back end of beam automatically rolls to the right, thus balancing scale with scoop on, and when scoop is taken off scale, the ball rolls to the left, balancing scale without scoop. Scale with this latest device is assuredly the most complete and desirable scale for general use in the market.

BUSINESS CHANGES.

DIFFICULTIES, ASSIGNMENTS, COMPROMISES

WS. CUTHBERT, grocer, Montreal, has compromised with his numerous creditors at 40c., and is giving up in disgust.

Buettner & Johnston, grocers, Winnipeg, have fallen behind, and an assignment has been found necessary. The assignee is S. A. D. Bertrand.

A. J. Limin, grocer, of Hamilton, has assigned.

A. Lemieux, general merchant, of L'Islet, Que., has compromised at the popular figure of 40c.

That officious person, the sheriff, has taken possession of the general stock of Geo. Tapp, of Barachois de Malbaie, Que.

The Tiger Tea Co., Montreal, have offered 45c. on the dollar, cash.

E. W. Bickle & Co., general merchants, at Wellington, B.C., are asking for a longer time than usual to pay their claims.

A. A. McDonald, general merchant, at Plake's Station, P.E.I., is offering the magnificent sum of 25c. on the dollar.

P. Slaven & Co., general merchants, have assigned to John Ferguson, Toronto.

The creditors of J. White & Co., liquors, Windsor, have been called together.

Chas. May, general merchant, Dunnville, has assigned to A. White.

SALES MADE AND PENDING.

A. Charlebois & Co.'s stock of groceries at La Prairie, Que., has been sold at 61 cents.

The general stock of Thomas Stiles, Wingham, will be sold to-day (12th).

So will that of M. Duguay, Gentilly, Que.

P. Murphy & Co.'s Montreal grocery stock was a valuable one, bringing 87 per cent. at a forced sale.

Among those who have sold out is T. Sturrock, general merchant, Laggan, Ont.

Another of the same—George Palmer & Sons, grocers, Toronto.

Wm. Stratton, general store, Frankville, has sold out to B. Crate.

F. J. Byrne, fruits, Ingersoll, has sold out to A. T. Frezell.

PARTNERSHIPS FORMED AND DISSOLVED.

Dansereau Bros., Montreal, have found plastering and grocery businesses do not go well together and have dissolved.

Fortin Alphonse & Co., grocers of that city, have also dissolved.

McDonald & Leslie, grocers, Souris, P.E.I., have dissolved partnership.

CHANGES.

L. A. Houle is a new grocer at Belle River, Que.

E. L. Liddicott, grocer, London, is with good and sufficient reasons giving up business.

H. Cusson is successor to George Couture in the grocery business at St. Boniface, Man.

Bergan, Peter & Co., general merchants, Gretna, Man., is the name and address of a brand new firm.

Mrs. A. Cameron, drugs, Lanark, has been succeeded by G. J. Hunt.

FIRES.

Smoke and water played havoc with C. H. Gerbig's, Ridgetown, stock on 10th inst.

DEATHS.

Jean Laberge, grocer, Quebec, Que., is dead.

HOW TO SUCCEED AS A GROCER.

Rules serve a good purpose in the store, as they enforce correct business habits and maxims, so that the rising young men of the trade grow up with good business habits formed and which, by the time they are ready to embark in trade for themselves, are second nature. Some of the correspondents of our esteemed contemporary, The London Grocer, have been formulating rules such as they deem requisite for success in the grocery business, as follows:

Soon as able, discount all purchases.

Keep windows clean and nicely dressed.

Never allow due prompts to remain unpaid.

Attend well to business during business hours.

Keep everything in shop neat, tidy and orderly.

Give just weight to everybody—no more, no less.

Rise early and be at business when the shop is opened.

Have all parcels neatly wrapped and use good paper.

Mind your own business; leave other people's alone.

Never practise deceit, trickery or tell lies, even white ones.

Buy from best firms, and don't open too many accounts.

Look well after warehouse to see there is no waste or leakage.

Have a place for everything and keep everything in its place.

Never buy what you don't want, importunate travelers notwithstanding.

Cultivate a ready-money trade, and under no circumstances give long credit.

Make your business a source of pleasure. If you cannot, seek another business.

Be as polite to the customer who spends a shilling as to the one who spends a pound.

Be steady, industrious and careful. Remember the good motto: "Waste not, want not."

Keep yourself smart and neat, and don't wear dirty aprons when attending to the counter.

Give the best possible value in all things, and be scrupulously particular as to cleanliness.

A SPECIMEN OF CHIROGRAPHY.

It is not within the possibility of every man to attain proficiency in the arts and sciences. But it is possible for every one to write a clear, legible hand, and to write an intelligent letter. That all cannot is well understood. And, unfortunately, among those who cannot are those who pose as business men. Here is the proof of it:

Cone, Spet. 10, 1888.

Dear Ser,—I vone rite a Fure Lines to you bout tis Letter. i gan not make out wot as men, i wch you woot rite as blane. i am bate reter ven is rote pat you but Dava you wood rite as blane to me mine dot now. Now i vone Lat you no tat i will Bay you sune that I gat ten i sent sum to you and be not a frate for me, vot i say tat i to, dat is all. yours Respectfully.

The above letter was received by another business man in Western Ontario, who in forwarding it to us, fearing that The Hardware and Metal Merchant would be unequal to the task of translation, supplied the following interpretation thereof:

I want to write a few lines to you about this letter. I cannot make out what you mean. I wish you would write as plain (as he does). I am a bad reader when it is wrote bad. You but Dava (I think he means by that that I should write as plainly as my brother David, or that I should write as plain as he does), you would write as plain to me. Mind that now. Now I want to let you know that I will pay you as soon as I get first money. When I get it I will send you and be not afraid for me. What I say that I do. That is all.

The account is still unpaid. The debtor is perhaps too much occupied in the study of chirography and composition to remember his obligation.—Hardware and Metal Merchant.

THE WINDOW MUST EXIST.

Something for nothing never has been business, isn't business, and never will be business.

That which costs nothing in advertising, and in everything else, is worth about as much as it costs.

The nearest approach to something for nothing, or advertising at the minimum of expense, is the practical advertisement possible for a store window to present to its owner.

A store must have a window, and that window must be upon the street front.

The window must exist, and will exist no matter how it be used; the window is without cost to the retailer.

The necessary paraphernalia for proper window dressing consists of boards, boxes, frames, figure, cloth, etc.

The merchant simply loans to the window what the window needs for its proper dressing, and beyond the expense of the loan, the time of the trimmer or clerk in dressing the window, and some accessories required, a properly dressed window does not mean additional expense to anybody.

It is obvious that window space had better be used to advantage than not used at all. It is obvious that it had better be curtained up than improperly dressed, for a perfectly plain thing is far more artistic than inharmonious elaborateness.—Harry Harman.

Adams' TUTTI FRUTTI

Recommended by the very highest medical authorities as a wonderful aid to digestion. Allays thirst in warm weather. The public call for it. Send for beautiful advertising matter to decorate your window.

WINDOW GLASS. [To find out what break any required size of pane comes under, add its length and breadth together. Thus in a 7x9 pane the length and breadth come to 16 inches, which shows it to be a first-break glass, i.e. not over 25 inches in the sum of its length and breadth.]

Perfectly Satisfied

That's saying a good deal, but just remember the article under discussion is the Dayton Computing Scale.

JAMES CURRIE, Dealer in Groceries, Provisions, etc.

AMHERST, N.S., April 20, 1895.

MESSRS. MILLS & Co, Chicago, Ill. :

Dear Sirs,—In reply to your favor of the 14th inst. regarding the scale purchased from your agent some time ago, would say that I am perfectly satisfied with the investment; it gives first-class satisfaction, saves time and money. I would not sell it to-day for what it cost me, and I cheerfully recommend it to anyone in the grocery business.

Yours respectfully, JAS. CURRIE.

Let us send you further particulars.

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, JUNE 21, 1895

(\$2.00 per Year) No. 25

DROPS FROM THE EDITOR'S PEN.

Two and two make four, but two wrongs do not make a right.

* * *

Flies come from everywhere, but merchants wish they were nowhere.

* * *

Musquitoes, like burglars, do their best work at night. We speak whereof we know.

* * *

Discounted is the clean record of a merchant if dirty is himself, store and all his belongings.

* * *

A salesman that never sleeps is the advertisement that graces the columns of a good trade paper.

* * *

Many things harmless in themselves have become synonymous for evil because unwise people have abused them.

* * *

The sweat of the brow by which man earns his daily bread puts muscle in his arm and health in his body.

* * *

Business men who do not take a holiday in the woods may be compelled to take a "holiday in bed" ere long.

* * *

Now that the "match" is apparently off with Canada and Newfoundland, we sigh as we think "it might have been."

* * *

Tea and onions side by side on the table are all right, but all wrong are they when side by side in the merchant's store.

* * *

Young clerks in the A B C's of business should not, like children who have mastered the alphabet, imagine they know everything.

* * *

We who live in the cities and laugh at the "greenness" of farmer, discover when we go into the country that white almost in

comparison with our "greenness" is the verdure of the woods and fields.

* * *

York County Council has at last decided to abolish the toll gates. And thus is another of mediævalism's relics to be razed.

* * *

The merchant who imagines that the maxim, "Slow but sure," gives him license to slothfulness will be sure to quickly become a bankrupt.

* * *

If the bulls would toss or the bears squeeze to death the speculative manipulators, wheat would have an opportunity of really showing what it is worth.

* * *

Those who fail to recognize returning good times must be blind indeed if they fail to see them in the regular trade and navigation returns of the Dominion.

* * *

The people of Hamilton, Ont., will have their heads worse swelled than ever now, for someone has praised the Mountain City's public library and called it a "model."

* * *

A Montreal milk dealer has been fined for selling milk that was too thin. Had he used Toronto Bay water to dilute the lacteal fluid he would never have been discovered.

* * *

A \$12,500,000 ice trust has been formed in Boston. A little of the warm sun of competition is evidently wanted at the "Hub" to thaw out this gigantic combination.

* * *

Unequal to the task of coping with the ups and downs of every-day life are men who have been spoon-fed all their days. Young men starting out in life should digest this fact.

* * *

The Dominion Government may guarantee that its decision not to now furnish a guarantee to the Hudson Bay Railway Co.

will earn the "well done" of the people of the country.

* * *

Commissered with, and not vilified, is to be the merchant who these balmy summer evenings fancies it pays better to keep his store open and put cents into his till than close up and put fresh air into his lungs.

* * *

The Pharmaceutical Association of the province of Quebec are considering a proposition making for the extension of the poison schedule. If the movement is successful, grocers may be still further restricted in the sale of drugs.

* * *

According to the Dominion Fisheries Department, the amount of capital, and the number of people engaged in the industry, have largely increased since last year. Sir Richard Cartwright doubtless thinks there is something "fishy" about their report.

* * *

When concern for the commercial interests of the country are even as important with the average parliamentarian as party exigencies, sessions of Parliament will be shorter, and the list of Acts of real benefit to the country longer than they now are.

* * *

A good opportunity now has the canned goods packer for showing what kind of business material he is made of. This applies particularly to him who still has a stock on hand for which the recently defunct Selling Committee could not find a customer. Remember that an advertisement is the most efficacious medium through which to secure the desideratum.

* * *

Is the Dominion Department of Trade and Commerce making, or proposing to make, any special effort to secure for Canada a share of the increased trade with China, which is likely to develop with civilized countries in consequence of that nation's experience with Japanese soldiery. If it proposes to move, it cannot move any too quickly.

THE ESSENTIALS OF GOOD MANAGEMENT.

EVERYTHING nearly to day requires to be conducted on a scientific basis in order to ensure success. In the management of business, particularly, this is demanded. The day when slipshod business methods could be practised, and the merchant still keep his head above water, has vanished. It went out with big profits.

Not infrequently business ventures suddenly collapse which were doing a large and apparently profitable trade; and when the estates came to be examined it was found that the canker worm was bad management.

A vessel can navigate with safety amid the Thousand Islands, or the myriads of islands that dot the Muskoka lakes, as long as the watch is on the alert. It is much the same with business; as long as there is good management and precautions are taken to guard against the multiplicity of evils that menace trade on every hand, there is not much danger, other things being equal, of failure.

Whether the business is small or large efficiency in the management is essential.

The man who always works and never takes relaxation from business eventually develops into a poor specimen of humanity, from a mercantile as well as a social point of view. But relaxation does not mean neglect of business. The ideal manager will be "on deck" when duty demands it, and he will "go below" when that duty has been performed or when danger is past. I have known excellent businesses to be ruined simply because the proprietors would fly off with a fishing, shooting or carousing party when their presence in their respective stores was really necessary. "Business first and pleasure afterwards" should be the motto of everyone who aims to succeed in life.

Good management in business and office work entails system, or method, just as you choose to term it. System is the means whereby four times as much work can be accomplished as can be without it. It is as necessary in its way as it is in the solar system; and its absence means chaos in the one as well as in the other particular. Where there is no system there cannot be success. There are some men who are always on the rush, and yet accomplish practically nothing—except spending themselves. Those who, on the other hand, accomplish much are often men who appear to be doing little. It is because they are methodical. Nature, the greatest of all workers, quietly develops the seasons in their turn, only exhibiting energy when she undertakes to split or overturn a mountain.

A proprietor or manager should not allow his love of work or desire to economise to

induce him to undertake too much. That is, he should not essay to do other people's work besides his own, any more than is imperatively necessary. And the larger the affair to be managed, the more rigidly should this rule be followed.

In these days, probably more than at any other time previously, the head-centre of a business requires to give all the attention he can to purely matters of management. There are plans to be laid, new ideas to be developed, and financial and a multiplicity of other details that require watching. A manager cannot do all this and at the same time perform the duties of an establishment down to those of a message boy, as some almost essay to do.

Of all the essentials to good management none is more important than the matter of accounts, both those receivable and those payable.

Accounts receivable are often the main intake. Consequently they need to be carefully superintended. When an account is rendered and payment is not forthcoming, an effort should be made to induce the debtor to stipulate a certain date when he will meet it. A memo should then be made of the day so fixed, and when it comes around he should be again called upon. This operation should be repeated as often as necessary.

Promptness in the payment of accounts is as necessary as promptness in the collection of accounts; and even more so, for remissness in this respect means loss of credit as well as loss of reputation. The management of every business enterprise, whether it be small or large, should possess a book wherein is kept a record of both bills payable and bills receivable. And if this book is consulted regularly a merchant will, if he can, pay or collect his accounts when they are due.

Of all the evils that afflict humanity, none are probably greater than procrastination. The ideal manager will choke it as soon as it makes its appearance. Failure to do so has caused the loss of untold golden moments and millions of money. "Do it now," or "Never put off for to-morrow what you can do to-day," are mottoes which every merchant or manager should keep before him, either posted on his desk or inscribed in his brain.—W. L. E. in The Hardware and Metal Merchant.

GOLD IN ONTARIO.

O. R. Sprague, of Buffalo, claims to be in possession of the mining rights to more than 3,000 acres of land in the province of Ontario, containing the most valuable deposits of gold yet discovered in Canadian soil. These mineral lands are mostly in the county of Hastings. The discovery of gold, Mr. Sprague says, was accidental. He was in quest of simple mineral paint

clay last fall, and during his search came upon nuggets of gold-bearing quartz. These analyse about \$5,000 in gold to the ton. Mr. Sprague immediately began prospecting for gold on a large scale, while preserving strict secrecy, and associated with him Mr. Dewitt C. Blackman, also of Buffalo. As a result of their investigations the mineral rights to more than 3,000 acres were quietly picked up, the farmers who owned land being, according to Mr. Sprague, too ignorant to suspect that they owned anything but the commonest common stones. Messrs. Sprague and Blackman have been working holdings in a modest way since the snow left the ground this spring, and now intend pushing operations on a more pretentious scale. A stamp mill will be built near the principal mine, and further machinery will, they say, be introduced without loss of time.

OVERCHARGING CASH BUYERS.

A Kinmount (Ont.) grocer writes us asking whether "the plan of overcharging credit customers (or undercharging cash customers) would be suitable for the retailer." He adds: "It does not seem fair to make the cash customer pay the bad debts, but to me it seems that to charge one price and to refuse bad customers is our only plan."

Will some of our readers give their experience in this matter? It will help this Kinmount grocer and his 7,000 confreres in this Dominion.

To open the game, the writer gives his opinion. Have one price only, and that the cash price. Send all your credit customers to your opposition, and you will bust his business to smithereens in two years. Sell for cash only, and your grey hairs will not come so soon; your friends will be more numerous and your life more enjoyable. Sell for cash only, and you will set an example to help the business world to higher and better methods.

Children into men and women grow. It is well for merchants to remember this.

AGENTS FOR TORONTO

H. P. ECKARDT & CO.

GOVERNMENT AND BUTTER.

MR. MCMILLAN asked in the House of Commons a day or so ago: "What was the weight per package of the packages of creamery butter purchased by the Government last winter for shipment to Great Britain? What sales have been made, and what prices have been realized per pound since the statement made by the Secretary of State on the 16th of May? Have all the packages been sold, or do any remain at present in the hands of the Government? Was any of this butter sold in Montreal not for shipment to Britain? If so, for what reason, and how much was thus sold, and what price per pound was realized for it?"

Hon. Dr. Montague, Secretary of State, responded in these words: "Nine hundred and fifteen packages of butter shipped from Montreal weighed 48,937 pounds net, making an average of 53.48 pounds of butter per package. No account sales have been received since the statement made by me to the House on the 16th of May. Some 246 packages of butter were sold in Montreal, which were paid for by an advance of 20 cents per pound by the Government. Payments have been made on three lots of butter at 20 cents a pound which were not included in the former return and payments are to be made on two lots. The reason

why the butter was not sent to England was because it was not in packages which appeared to be suitable for export to Great Britain to enhance the reputation of the packages of our butter there. The following lots of creamery butter received at Montreal, intended by the consignees to be shipped to Great Britain by the Dairy Commissioner, were sold in Montreal on account of being in packages unsuitable for export :

No. of packages.	Pounds.	Per lb.	Cents.
21	1 294	22	
9	490	22	
19	961	21	
56	2,938	21½	
43	2,244	21	
2	56	21½	
4	224	21½	
5	274	21½	
1	56	21	
7	392	21½	
21	621	21½	
21	620	20	
21	1,067	21½	
16	874	21	
40	1,970	21½	
5	280	(4 at 23	
		and 1 at 22)	
6	330	(5 at 21	
		and 1 at 21½)	

There are also 21 packages totalling 93c pounds, and 28 packages totalling 1,438 pounds, of which the returns have not yet been received. The Dairy Commissioner has received information from some of his correspondents in England stating that there would be no difficulty in doing a steady trade in butter similar to that contained in the packages already forwarded."

EGG DUTIES.

An order-in-Council has been passed reducing the duty on eggs from five cents a dozen to three cents a dozen. The tariff as adopted last year provided that whenever it should appear that eggs may be imported into the United States from Canada at a rate not exceeding three cents a dozen, the import duty into Canada shall be three cents a dozen. Inasmuch as the attention of the Department of Customs has been called to the fact that the United States import duty is only three cents, the Canadian duty has been lowered to that figure. British Columbia is the only province that imports eggs largely. Its importations last year were 78,853 dozens.

A suit recently brought by a member of a business in a United States court to dissolve the partnership between himself and his associate, on the ground that the associate was drinking too much for the welfare of the firm, discovers an old agreement made by the two men when they went into the plumbing business. In the articles of agreement was a clause to the effect that should either member of the firm become addicted to the use of intoxicating liquors to an extent that made him unfit for conducting his share of the business with credit to the firm, the other should have the right to demand a dissolution of partnership. Acting upon this clause, the plaintiff recently brought suit in the Superior Court, praying for a dissolution of the firm and the appointment of a receiver, on the ground that his partner had violated the liquor clause.

Young men who read this should take warning and not include such a clause in their partnership papers.

In future the annual subscription price of this paper, mailed to British and other European places, and to China, Japan, South America and Africa, will be \$3 a year.

MAY TRADE RETURNS.

APRIL trade, it will be remembered, showed an increase of nearly 25 per cent. over April, 1894, and a slight increase, about 6 per cent., over April, 1893.

May returns are to hand. During May, 1895, goods to the value of \$9,439,957 were imported, as compared with \$9,161,161, an increase of 3 per cent. The exports were \$8,898,932, as compared with \$7,863,960 in May, 1894, an increase of over 12 per cent. Unfortunately, this increase was all in the products of other countries and thus was not so profitable as it might otherwise be.

In looking over the classes of goods imported some peculiar changes are noticeable. The importation of corn and oatmeal in May, 1894, amounted to \$17,736, while this year it was only \$5,275. Drugs and medicines show an increase of about \$19,000 for the month. Earthenware, stone and china-ware declined 25 per cent. in the value of the goods imported. The imports of glass declined from \$197,000 to \$124,000, but this is mostly in window glass, although there is a considerable decline in bottles, jars, decanters and tableware. Pickles, sauces and capers declined over 20 per cent. Provisions, lards and meats were valued at \$44,333, as against \$55,803 in May, 1894, but the imports of butter and cheese ran down even farther, viz., from \$20,364 to \$7,866. Spices and molasses were about stationary, the latter increasing 10 per cent. There is

a large increase in the value of imported cutlery, hardware, tools, implements, machines and engines. Cottons and woolens show a considerable increase.

In the free imports, the value of coffee imports declined from \$94,527 to \$39,242 or over 50 per cent. Fruits increased from \$108,273 to \$114,220. Hides and skins increased from \$150,963 to \$307,023 or 50 per cent. Salt declined from \$67,149 to \$47,140. Sugar increased from \$369,837 to \$978,238, owing to possibility of a change in duty. Tea increased from \$90,441 to \$136,152.

In exports there were increases in the produce of the mine, produce of the fisheries, animals and their produce, manufactures and miscellaneous. Produce of the forest declined slightly, but the greatest decline was in agricultural products, which were valued at \$1,562,794 in May, 1894, and at 1,013,574 this year, a decline of over one-third.

On the whole trade may be said to be very encouraging, and prospects for a good fall trade are very bright.

THE DANGERS OF FRESH MILK.

THE CANADIAN GROCER has received from England the particulars of the Royal Commission on Tuberculosis which has condemned the use of new milk as an article of food. The enquiry is of supreme value, and must take its place among the great medical verdicts of modern times. The results arrived at fully confirm the views set forth in these columns some months ago that if milk was to continue as an article of common diet it must be used in a condensed state.

The Commission was composed of eminent men, such as Professor Brown, C.B.; Sir Geo. Buchanan, M.D., chief medical officer of the Local Government Board; Dr. Payne, and Professor Burdon Sanderson, the noted scientist. The number of witnesses was sixteen, eleven of these being medical men and five being representatives of the meat trade. The evidence was supplemented by practical experiments. Dr. Martin was instructed to investigate the effect of tuberculous food on animals so as to obtain information that would bear on the results of human beings using similar food. Professor McFadyean enquired into the possibility of discovering symptoms of tuberculosis in living animals. The duty of examining the effect of cooking upon tuberculous food was committed to Dr. Woodhead. It will be seen, therefore, that there was nothing amateurish or irresponsible about the men who set to work to discover the truth. They were all competent authorities whose investigations supply conclusive testimony.

The actual details of these experiments may conveniently be left for another occa-

sion. Meantime, it is well to rehearse briefly the results of the enquiry, as set forth in the report of the Commission. The cow was found to be the animal commonly affected by the disease germs of tuberculosis, popularly called consumption. The disease was found to exist to a very large extent, and to be easily communicated to man. This could be done through the meat, but the greatest source of danger was uncooked milk. The cow is very liable to diseases of the udder. The disease germs readily pass into the milk, and the individual who takes it in this state plants the germ of consumption in his system. The way to avoid the danger is to boil the milk or use the condensed article.

The number of children who freely drink fresh milk is practically limited only by the number of children in the world. We may say they all drink it. Evidently they do so under imminent risk of catching consumption. The prevalence of this disease amongst the human race has long baffled medical skill, and the day cannot be far off when the use of fresh milk, owing to the extreme difficulty of discovering the presence of disease germs, must come under the ban. It behooves grocers, who are usually men anxious to keep abreast of the times, to note the new discovery and effect the substitution of condensed milk for the dangerous quality. In Canada there are several brands of the highest merit; it pays to sell them, so that there is no commercial obstacle in assisting the change.

TAX ON PEDLARS IN MONTREAL.

The Montreal City Council have at last decided to take definite steps toward the imposition of a tax on farmers and others who peddle butter, cheese, eggs and fruit through the streets of the city. This is a reform that THE CANADIAN GROCER has been urging for some time, and it is to be hoped that the Council will enact the necessary legislation protecting legitimate grocerymen and traders from this unfair competition. The report sent to the Council by its Market Committee advises the imposition of a fee of 35c. for the first fifteen packages and a half cent additional for every extra package above that number. Several of the trade said they would prefer not to discuss the charge, as it was a step in the right direction, but at the same time many considered it too low.

Other retailers, besides grocers, claim to have grievances against some of the jobbers of the trade. The retail furniture men of Canada last week submitted a series of demands to the furniture manufacturers of the country, at the same time gently hinting that unless their petition was granted they would take the whole matter into their own hands and force the situation.

HOLDING BACK CHEESE.

THE cheese market, so far this season, has been a decidedly unfavorable one for producers of the product. Values have been unusually low, but though they are fully 3c. per pound below the figure ruling at the corresponding period last year, the reaction, considering all the circumstances of the case, was not surprising. Last season speculators operated on an extensive scale, with the result that while the price of all other farmers' produce was low, values on dairy produce, owing to this unhealthy cause, were disproportionately high. The result was apparent when business was wound up during the winter and spring. Losses of over \$3 per box were made in England on a vast quantity of Canadian cheese, and there is still at present a large quantity of old Canadian cheese to be absorbed. It is only natural, considering all these conditions, that prices should be low, and for this reason THE CANADIAN GROCER considers it unwise to hold back early cheese in the prospect of obtaining a higher price later on. Yet this is being done not only in Canada but in the State of New York. In Canada it is approximated that fully 30,000 boxes of a mixture of fodder and grass make are in cold storage at various points in the country and in New York State 30,000 more. This storing of May make is unheard of in the history of the trade, and the only explanation that can be offered is that the owners of this cold storage cheese expect another speculative June boom again this summer. In other words, if the Britishers start in to buy June's, this cold storage cheese will be fraudulently mixed up with the genuine June make, and sent forward as the output of that month. This is the only way to account for it, for no one is foolish enough to believe that it is being carried to be sold honestly on its merits as fodder make in competition with fine, cool, full grass June make. It is just such practices as these that take away from the claim of the factorymen that no branding law is necessary. It is, to use a sporting phrase, too true that if this cheese was branded with the date and month it would not now be in cold store.

CUTTING PRICES ON CIGARS.

Retailers in Montreal are agitating in regard to what they claim to be the unfair competition of some other cigar dealers who are selling 10c. domestic cigars for 5c. A deputation was appointed to wait upon the manufacturers to request their aid in securing a settlement of the matter. It is questionable, however, provided the dealers in question pay cash for their goods, if any practical steps can be taken to prevent them cutting prices. In the long run the matter will adjust itself, for they are certain to find

it a losing game. Still, the annoyance to retailers who do business in a legitimate way is easily understood.

LARGE SALES OF NEW PACK SALMON.

In consequence of further advices from the Coast regarding the new pack and the news that one of the leading canneries, the Windsor, has been burned down, the advance to \$4.50 f. o. b. on the Coast has been firmly established and prices point higher. Several large contracts for about 7,000 to 8,000 cases were settled with wholesale grocers in Montreal this week on the above basis, and on Tuesday a leading firm on the Coast advised its agent in Montreal that it could not do business for anything under \$4.75 for its brands.

HOW HALIFAX VIEWS IT.

The articles in THE CANADIAN GROCER on the subject of union with Newfoundland have received the consideration of the commercial authorities in different parts of Canada, and in no case has our advocacy of union been received with anything but favor. There may be disagreements as to details, but the general policy of union is approved of everywhere. At the last meeting of the Council of the Halifax Board of Trade THE CANADIAN GROCER'S views were considered and a committee was appointed to deal with the matter. The secretary, Mr. Charles M. Creed, writes us this week as follows:

"I am instructed to say that the general consensus of opinion in the mercantile community here is distinctly favorable to the admission of Newfoundland into the Canadian Confederation on the basis of satisfactory terms, which, it is earnestly hoped, will be arranged at no very distant date."

That the Halifax Board is sincere in this matter is further proved by the concluding paragraph in its last annual report, which says:

"In spite of the errors and shortcomings of trusted financiers in our sister city of St. John's, Nfld., the sympathies of the merchants of Halifax can hardly fail to be extended towards the business community and in fact the whole population of the adjoining colony, in the monetary crisis which has unfortunately eclipsed their progress. The curtailment of the resources of many of the mercantile establishments in that quarter will undoubtedly tend to an increase in the volume of trade between Halifax and the adjacent outports on the western coast of Newfoundland, which had already reached considerable proportions."

Most of the leading statesmen of Canada since 1867 have anxiously desired to add Newfoundland to the Dominion. Some have actively worked to accomplish it, such as Hon George Brown, Sir Charles Tupper, Sir John Abbott, etc., but none had opportunities as favorable as the present. It is a great pity the present Ministers do not put themselves in closer touch with the business interests of Canada by carrying this policy out.

THE COLD STORAGE PROJECT.

The large cold storage warehouse in Montreal, the necessity for which has been referred to before by THE CANADIAN GROCER, for the care of perishable produce and groceries, is now in the way of becoming an accomplished fact. An excellent site has been secured on Mill street, so that one side of the warehouse will front on Mill street and another on the river. The railway track from the docks runs right alongside the building, so that the refrigerator cars can be run right into the warehouse, unloaded, and the goods transferred to the cold storage compartments of the sea-going vessels without ever being subjected to the summer heat. The stock of the proposed enterprise is now being offered to the public for subscription, and it would appear to be a good investment. This new enterprise will put Montreal in line with New York and Chicago in regard to cold storage facilities for dairy produce, fruits, and such classes of goods that have to be kept in a certain temperature to prevent deterioration or decomposition. The new concern has its business office at 218 St. James street, Montreal.

OUR VIEWS ENDORSED.

The Halifax Chronicle endorses the stand taken by Hardware and Metal on the appointment of Mr. Hawthorne, of the Welland Vale Manufacturing Company, as a special commissioner on scythe duties to the States.

In the same issue The Chronicle reprints THE CANADIAN GROCER'S views on the Newfoundland question, and backs them up in no uncertain terms.

THE INSOLVENCY BILL.

A leading wholesale merchant was this week asked what he thought about the failure of Parliament to pass the Insolvency Bill.

He replied that so far as the members of Parliament were concerned his opinion of them had not improved. "They are a selfish crowd," said he, "and have not the true interests of the country at heart."

He blamed the bankers also. They had stuck out for a double ranking in the case of commercial paper. In Ontario, when a bank holds commercial paper, it must value these securities and then rank only for the balance of its claim. The bankers wanted the opposite to this in the Insolvency Bill, and the merchants wouldn't agree.

"If Nova Scotia passes a bill for the proper distribution of an assignee's estate and for the abolition of preferences—and such a bill is promised at the next session—we can snap our fingers at the Government

and at the banker's. We will work steadily along at having the provinces improve their laws of this character, and thus obtain from the provinces what the Dominion will not give us, although it is their place to do so."

In conclusion, he remarked that some day the bankers might want the aid of the Boards of Trade, and then their present action would not be forgotten.

EFFECT OF THE DROUGHT.

FOR some weeks past the greater portion of Ontario and Québec have suffered from a continuous drought, to the more or less serious injury of the growing crops. In fact, unless rain comes soon the damage is likely to assume large proportions.

The most immediate result of the lack of heavenly moisture is seen in the small arrivals of rather poor Canadian strawberries that are coming in.

In western Ontario the hot weather is burning up the hay crop, and farmers are cutting their grass now, though it is only half grown. As a consequence, hay has advanced \$6 a ton (from \$12 to \$18) within the past week on the Toronto market.

A leading produce dealer who recently returned from an extended tour of the country remarked to THE CANADIAN GROCER that the pastures were being parched to death, and that unless rain came the production of butter and cheese would show a decided fall off. This may relieve the strained situation in dairy products and enable some of the holders of old stock to get rid of it.

THEY HAD A GOOD TIME.

An occasional correspondent writes us the following letter:

PORT ARTHUR, June 12, 1895.

H. C. Beckett—not Beckett's boy, but the old man himself—came to Port Arthur to see his friends, and to try to capture a little health and pleasure, and some of the speckled trout for which the country is famous. His friends determined that he should have some, so at the matutinal hour—for him—of 7.30 a m. yesterday the pleasure yacht Minnehaha, Capt. Sydney Smith, might have been seen steaming out of the harbor, her prow pointing northeast, half-east, with C. A. Leaney, that tried old salt, at the helm. McKenzie River was the destination, distant fifteen miles. The time during the run was taken up by the passengers—Tom Penfold, Esq., governor of the jail; W. C. Dobie, police magistrate, and W. J. Hasking, of the Palace Grocery—in admiring the scenery, pound nets, loons, etc., that were passed on the trip, and by monkeying with the "cost you ten cents to come in" business. At last Pilot Leaney

sung out, "Land on the port beam," the engine slowed up, and the boat gently touched the place of landing. Then there was a wild hurrying to and fro—a la "The Eve of Waterloo," fishing gear was got out and put together, and the slaughter commenced. After some exciting catches it began to rain, and the fish evidently thought they had better go in out of the wet. The members of the party thought they had better go, too, for awhile, and as "Poles" seemed to produce no fun they tried "Chips," which seemed to produce the desired result. I would venture to remark here that Messrs. Beckett and Leaney may not be able to catch as many fish as some people, but they can catch the "fleeting" nickel just about as well as anyone I know. I wonder if they learned that in the village of Hamilton. I have always been under the impression that the people of that place went to church on Sunday. At 4.37½ p m. sharp the anchor was hoisted, and the ship's head pointed for home, and at 7 o'clock the party landed with a nice lot of fish, some of two pounds weight, and feeling that they had passed a most enjoyable day.

If there are any more chaps like H. C. Beckett and C. A. Leaney in Hamilton, they can send them along. They are good whole souled fellows, and the best we have is none too good for them, and therefore we feel like shouting "Gillard's Pickles Forever," especially the two "Pickles" above mentioned.

PISCATOR.

DID YOU SEE THE BOOM?

Did you see it?

We refer to the increase in trade last week.

As a proof read the following paragraph from Bradstreet's:

"For the Dominion of Canada the clearings were: Montreal, \$12,294,656, increase 14.1; Toronto, \$7,040,456, increase 41.7; Halifax, \$1,367,170, increase, 36; Hamilton, \$736,203, increase 7.9. Winnipeg, \$860,503, increase 19.2. Total, \$22,622,088, increase 22.8."

MR. MACMICHAEL'S PROMOTION.

Business men generally will join us in congratulating S. W. MacMichael on his promotion to the rank of Chief Inspector of Customs. No officer of the Department has enjoyed the confidence of merchants as he has. His long experience and his knowledge of business has enabled him to deal intelligently with many matters that are constantly in dispute between importers and the officials of the Department. His aim has always been to assist importers wherever possible. When, as is frequently the case, he has had to decide against them he has always been able to explain his reasons in such a way that they agree that the ground he takes is a fair one.

He has worked his way up from the lower

ranks of the service, and his knowledge must be invaluable to his chief, Hon. Clarke Wallace.

RETAILERS AND JOBBERS.

REGARDING the relations of wholesale and retail grocers The Minneapolis Commercial Bulletin has this to say: "There is a movement under way in the east that cannot be too strongly stamped on, for it has for its objective feature the unfair treatment of the jobber. It is surprising that retailers of groceries can be so short-sighted as to think it for their interest to oppose the jobber. The jobber and the retailer should stand together, and schemes that propose to ignore the jobber in the retail trade should be stamped out at once."

"Some of the New York retailers propose to organize in syndicates of say 100, and buy directly from manufacturers where it can be done in carload lots, and thus ignore the jobber. This is cutting off a nose to spite a face. Why ignore the jobber?"

"Who is it that carries the credit of the retailer when he wants accommodation, the jobber or the manufacturer? Who is it that pays local taxes so that the retailer will not have as much to pay, the jobber or the manufacturer in another city? Who is it that keeps a stock on hand for the accommodation of the grocer, the jobber or the manufacturer? We need to be a little less short-sighted in this matter, and exercise a little more common sense, or we will 'put our foot in it,' to express it vulgarly."

"The advocates of the buying exchanges say a card price cannot be sustained, and then they proceed to enforce what amounts to that, in this way. The club of retailers make their purchase and proceed to retail at a supposedly uniform price. It is discovered that one or two are making a liberal cut in price. The result is that when the syndicate arranges to buy goods the second time, the dealers who have broken faith are left out. What is this but seeking to enforce card rates."

"This will never do. The jobber is a factor in the retail business, and it is decidedly of more importance to have him ranged on the side of fair profits for the retailer, through his support of price agreements, than it is for him to obtain a slight concession from a manufacturer and lose an ally in the jobber. The consumer admits the retailer is entitled to a fair profit, and the card agreement enables him to get it; the jobber supports the agreement by refusing to sell to any retailer who is cut off by the association for price cutting, and this refusal holds until the association notifies the jobber that the dealer has been reinstated. Then he can again buy supplies at home."

"The jobber is the retailer's friend, not his enemy. Stand by him, and devise no plan for the regulation of the retail trade that would leave him out."

COFFEE SITUATION.

DURING the year ending May 31, 1895, according to The American Grocer, the visible supply of coffee increased 896,503 bags, in spite of an increase in the deliveries of Europe and the United States. Prices of Brazil, June 1, vary from those of the same date last year $\frac{1}{4}$ to $\frac{3}{8}$ c. per pound, and from June 1, 1892 a year of big crops, 2 1-5c. The deliveries of coffee for May were 397,217 bags of all kinds, a gain over the same month last year of 46,970 bags; total for eleven months of the trade year, 4,020,556 bags, against 3,958,304 bags for the same time in 1893-94.

The deliveries of coffee in eight principal ports of Europe were 6,270,458 bags, against 5,685,219 bags in 1894. The stock in the United States, June 1, was 534,609 bags, against 454,066 bags June 1, 1894, an increase of 80,543 bags; stock in Europe, 1,556,882 bags, against 1,286,922 bags corresponding date last season.

Until the crops of the world average over 12,000,000 bags annually, for export, there cannot be a recession in prices to the former era of low prices. The greatest crop ever harvested was in 1891-92, when 11,858,000 bags were produced. In this connection we reproduce below the exports from crops for eleven years, which figures reveal the fluctua-

tations in the yield and show that, as a rule, a year of large crops is followed by smaller out-turns:

Year.	Bags.
1884-85.....	11,440,000
1885-86.....	9,488,000
1886-87.....	10,313,000
1887-88.....	7,077,000
1888-89.....	10,598,000
1889-90.....	8,658,000
1890-91.....	9,297,000
1891-92.....	11,858,000
1892-93.....	11,283,000
1893-94.....	9,202,000
1894-95.....	11,129,000
Total, 11 years.....	100,343,000
Annual average.....	9,122,091

If crop disaster should cut down the export capacity of producing countries below 11,000,000 bags, there is no chance of a return to an era of low prices; if maintained at the average of four years, there must result a fairly steady market. On that basis there is only a difference of two or three hundred thousand bags between supply and demand.

Leading operators and importers regard the situation "clouded," and difficult to forecast. A clique of French operators are engaged in a big speculation, the outcome of which cannot be foretold. As a rule, such operations end in disaster to the manipulators.

It is generally conceded that the enormous profits accruing to producers is placing a

premium upon the setting out of new plantations, and has so acted for five or six years. The result is seen in the steadily increasing yield of mild growths, and less of dependence upon Brazil for supply. In a few years there ought to be crops more than adequate to the world's requirements, and thus force lower prices. The Rio and Santos crops of 1895-96 are not expected to equal the heavy out-turn of 1894-95, which will approach 7,000,000 bags. The 1895-96 out-turn of all countries is estimated at 10,270,000 bags.

The present position is favorable for a steady market during the next three months, subject to the influence of the Havre speculators.

AUSTRALIAN IMPORTS.

Hon. N. Clarke Wallace stated, in answer to a question in the House of Commons, that the total importations from Australia from June 30, 1894, to March 31, 1895, were of the value of \$53,012. The chief items were: Bananas and pineapples, \$1,346; hides and skins, \$1,458; wools, \$12,460. These are the free items. The dutiable imports were: Eggs, \$4; oranges, lemons and limes, \$2,874; butter, 36,907 pounds, \$5,926; lard, \$187; salted beef, \$161; canned meats, \$7,413; mutton and lamb, 16,052 pounds, valued at \$576; poultry, \$96; sausage casings, \$366; tallow, \$43; honey, \$93.

Breakfast Food "Don'ts"

- 1.—**Don't** stick your breakfast food packages out of sight in some dark corner and then say, "my customers won't buy package goods. No use keeping them on hand."
- 2.—**Don't** let some drummer overstock you. Better buy in small lots and buy often.
- 3.—**When** a customer asks for a particular breakfast food, don't try to substitute another variety. If he has ever had the original, he will recognize the difference.
- 4.—**Don't** imagine that people can't tell the difference between cheap and first-class breakfast foods. Most people don't kick when they are imposed upon, they merely **change their grocer**.
- 5.—**Don't** forget that The Ireland Co.'s are the most wholesome, the purest, the most attractive and the best advertised foods anywhere, and that all orders from reliable grocers receive prompt and immediate attention.

The Ireland Co., Toronto.

CHOICE CEREAL BREAKFAST FOODS.

MARKETS AND MARKET NOTES

ONTARIO MARKETS.

TORONTO, June 20, 1895.

GROCERIES.

TRADE for the past ten days has not been very brisk, but on the whole it has been very satisfactory, payments being met well. It is noted that in many lines the markets are firming up. Sugars are stronger than ever, refiners refusing to shade prices on any consideration whatever. There are indications that Japan teas will be higher, and coffees maintain old prices. In green fruit trade is active and prices are fluctuating from day to day, especially in early fruit and vegetables. In produce lines butter is still in a weak condition, while eggs remain pretty firm at old prices.

CANNED GOODS.

Trade is on the quiet side, the arrivals of new fruit and vegetables largely interfering with the demand. Prices remain the same as last week. We quote: Tomatoes, 80 to 85c. for choice; corn, 75 to 80c.; peas, 75 to 80c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.85 to \$2 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, 90c. to \$1, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.35 to \$1.45, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.45 to \$1.50; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Canadian canned beef, 1's, \$1.65 to \$1.75; 2's, \$2.65 to \$2.75; 6's, \$8 to \$8.25; 14's, \$18 to \$19. Chicago canned beef, 1's, \$1.75 per

dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

There is no change in the situation since last week. We quote green in bags: Rio, 20 to 22c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

The new arrivals of rice are taking well with the trade. Tapioca is in fair demand. We quote unchanged prices: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¾ to 6¼c.; tapioca, pearl, 3¾ to 5½c.

SPICES.

Spices continue firm, but are without further advance. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15c.; pure mixed spice, 25 to 30c.; cream of tartar, 22 to 28c. per lb.

NUTS.

The situation is unchanged from last week, the prices being: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted and 7 to 10c. for green; coconuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The market maintains its strength in full. Large jobbers who have made special offers to the Canadian refiners have met with a definite rebuff. The refiners feel secure in their position and absolutely refuse to shade prices. They are satisfied they will yet

obtain the figures they are asking, if they do not do even better than that. Their position is strengthened by the fact that sugar is selling more freely. We quote prices: Granulated, No. 1, 4¾ to 4½c.; do., No. 2, 4½ to 4¼c.; yellows, 3¾ to 3¾c.; Demerara, 3¾c.; bright, 4c.

SYRUPS.

Trade is quiet at unchanged prices. We quote: Dark, 30 to 32c.; medium, 33 to 35c.; bright, 40 to 42c.

MOLASSES.

Firm on a slow market. We quote: New Orleans, barrels, 30 to 32c.; half-barrels, 33½ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

Reports from Japan say that growers are asking higher prices for their teas, and it is, therefore, likely that bigger figures will be demanded on the arrivals of coming shipments to this country. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades, 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUIT.

Raisin stocks seem to be short. An advance in price is looked for before the new crop comes in. We quote present figures: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to 4½c.; selected, 5½ to 6c.; layers, 4½ to 5½c.

Sultana raisins are quiet and unchanged with 6½ to 7c. as the ruling idea as to price.

Prunes continue to enjoy a fair demand. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 4¾ to 5c. per lb.; "C," 85

We Invite

any Grocer handling

"SALADA"

CEYLON TEA

To return any he has in stock if it is not giving the greatest satisfaction to his trade; we will refund him the amount paid for it. There are nearly two thousand grocers now handling "Salada" in Canada. This invitation is always open to them.

Is any other TEA in the World
sold on like terms?

P. C. LARKIN & CO.
25 Front St. East.
and TORONTO
318 St. Paul St., MONTREAL.

MARKETS—Continued

to 90 to half kilo, $6\frac{1}{2}$ c. per lb.; "B," 80 to 85 to half kilo, $6\frac{3}{8}$ to $7\frac{1}{4}$ c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, $4\frac{3}{4}$ to 5c. per lb.; "Unicorn," 5 to $5\frac{1}{2}$ c.; Bordeaux prunes, $4\frac{1}{2}$ to $6\frac{1}{2}$ c.

Currants are in fair demand at unchanged prices. We quote: Filiatras, half-bbls., 4 to $4\frac{1}{2}$ c., barrels, $4\frac{1}{4}$ c.; fine Filiatras, half-bbls., $4\frac{3}{4}$ c., barrels, $4\frac{3}{8}$ c.; Patras, $5\frac{1}{2}$ c., in cases; Casalinas, $4\frac{1}{2}$ to $5\frac{3}{4}$ c.; Vostizzas, $6\frac{1}{2}$ to 7c. in cases and half-cases.

Dates are quiet and unchanged at from $4\frac{1}{2}$ c. up.

There is not much doing in figs. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, $4\frac{1}{4}$ to $4\frac{1}{2}$ c.; naturals, 6 to 7c.

MALAGA FRUIT—No new advices regarding coming crops.

ELEME FIGS AND SULTANA RAISINS—Good crops are looked for, according to last advices.

TURKISH PRUNES—Crop outlook fair.

FRENCH PRUNES AND PLUMS—Medium crops looked for.

BOHEMIAN PRUNES—Are quoted at 3 to $3\frac{1}{4}$ c. in casks, and $3\frac{1}{2}$ c. in barrels.

P. L. Mason & Co.'s latest advices from Denia, Spain, say that the prospects for a good crop of Valencia raisins continue excellent.

BUTTER AND CHEESE.

The dry weather that has prevailed throughout the greater part of the country for some weeks is playing great havoc with the pastures, and unless rain comes speedily there will be a great falling off in the supply of dairy products. But it's an ill wind that blows no one good, and one class, viz., the holders of big stocks of old butter, would probably be greatly benefitted by a long continuance of the drought. Meantime, however, the situation is as bad as ever for dairymen. The old country markets are fearfully demoralized, and in New York thousands of pounds of old butter are being held in store. Locally trade is dull, although one or two dealers report enquiries from the eastern provinces. We quote prices little altered: Summer dairy and store packed, 5 to 7c.; fresh large rolls, 10 to 12c.; prints, 13 to 15c. Fresh creamery—Tubs, 15 to 16c.; pound prints, 16 to 17c.

CHEESE—There is no change in the situation, the outlook for an export demand for Canadians being still poor. August and September makes of Canadian cheese bring 10 to $10\frac{1}{2}$ c., and new Canadian cheese is quoted at $7\frac{3}{4}$ to 8c. Small Stiltons bring 10 to 11c.

GREEN FRUIT.

The regular summer fruit market opened up at the old Yonge street depot yesterday, and presented quite a busy scene for an

hour or two. Trade is now very active. Lemons have an active enquiry, are short in stock, and very firm, but unchanged in price. Oranges maintain last week's quotations, and bananas are firm. American strawberries are now off the market, and a fair quality of Canadian is coming in. Imported early vegetables are generally easier and lower. There are few, if any, dried California fruits on the market, their place having been taken by the green. We quote: Messina lemons, 300's, 360's, and 420's, \$5 to \$6; Oranges—Messinas, half boxes, 80's, \$1.50 to \$2; 100's, \$1.75 to \$2.50; boxes, 160's, 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.75; Messina ovals, 80's, \$2.25 to \$2.50; California seedlings, \$2.75 to \$3; Valencias, \$6. Bananas, \$1.25 to \$2 for firsts and seconds. Strawberries, 10 to 14c. a quart; cocoanuts, \$4.50 a sack; pineapples, 10 to 15c.; green string beans, \$2.50 to \$3 per bushel crate; Egyptian onions, \$2.25 per sack; cucumbers, \$2.50 to \$3 per crate, \$1.75 to \$2 per basket; new cabbage, \$2 to \$2.25 a crate; \$1.75 to \$2 a bbl.; tomatoes, \$4 per crate; green California apricots, \$2.25 to \$2.50 per box; peaches, ditto; cherries, ditto.

COUNTRY PRODUCE.

BEANS—Choice hand-picked remain at \$1.70 to \$1.75 per bushel.

DRIED APPLES—Are quoted at 5 to $5\frac{1}{2}$ c. per lb.

EVAPORATED APPLES—In 50-lb. boxes: $6\frac{1}{2}$ to 7c. per lb.

ONIONS—We quote: Domestic, 75 to 80c. per bag; Spanish, \$1 per small crate; Valencia, \$3.50 to \$4; Egyptian, \$2.25 a bag.

HONEY—We quote: Strained, in bulk, 6 to 7c.; comb, 14c. for clover and 10c. for wheat.

POTATOES—Old are selling on the track at 40c. Some of poor quality were offered at 30c., but did not find a purchaser. Fifty cents is quoted out of store. New potatoes are coming in more freely and are down to \$3 a bbl.

EGGS—Receipts have fallen off a little, keeping the price firm at 10 to $10\frac{1}{2}$ c.

FISH.

The market is quiet. In fresh fish the trade is not brisk, and hardly any salt are selling, the prices quoted for the latter being almost purely nominal. We quote: Skinned and boned codfish, $6\frac{1}{2}$ c.; boneless fish, $3\frac{1}{2}$ to 4c.; haddock, 5 to 6c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; pike, $4\frac{1}{2}$ to 5c. per lb.; flitched cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to

13c.; Georgian Bay trout, $5\frac{1}{2}$ to 6c.; white fish, 7c.; Lake Erie white fish, extra fine, 12c. per lb.; Lake Erie herring, \$2.25 to \$2.50 per 100.; Restigouche salmon, 14 to 17c.

PROVISIONS AND DRESSED HOGS.

The market is firm, with a fair demand and steady prices. Dressed hogs bring \$6 to \$6.25 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and $8\frac{1}{4}$ c. for small lots; breakfast bacon, 11c to $11\frac{1}{2}$ c.; rolls, 8c. to $8\frac{1}{4}$ c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs., 11c.; small hams, 11 to $11\frac{1}{2}$ c.; pickled, 10 to $10\frac{1}{2}$ c.

LARD—Pure Canadian, tierces, 9c. tubs, $9\frac{1}{4}$ c.; pails, $9\frac{1}{2}$ c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Remains a little above the dollar mark. We quote: White, \$1.02; red, \$1.02; goose, 83c.

OATS—Are quoted considerably lower at 39 to 41c.

BARLEY—Still quoted at 50c.

FLOUR—Not so active, but still firm at old prices, viz.: Ontario straight roller, \$4.50 to \$4.75; Manitoba, \$4.90 to \$5; patents, \$5.15 to \$5.25.

BREAKFAST FOODS—Foods, in sympathy with grains, are a little easier but lower. We quote: Standard oatmeal, \$4.50 to \$4.60; rolled oats, \$4.50 to \$4.60; rolled wheat, \$2.75 in 100 lb. barrels; cornmeal, \$3.50; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SEEDS.

The season for seeds is over, and no trade is being done. The jobbers' prices quoted are merely nominal. We quote: Red clover, \$6.15 to \$6.50; alsike, \$4.20 to \$6; timothy, \$2.90 to \$3.50 per bushel.

SALT.

Trade is brisk at unaltered prices. We quote: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

HIDES, SKINS, WOOL AND TALLOW

HIDES—Are getting rather scarce, the few that are coming in finding ready sales at 8c. for No. 1 and 7c. for No. 2.

SHEEPSKINS—Few are offering, the season being nearly over. Sheepskins bring \$1 to \$1.25, lambskins 25c., and shearlings 15c.

CALFSKINS—Still quoted at 8c. for No. 1 and 6c. for No. 2.

WOOL—Still bringing 19 to 20c. on the Toronto market, but the competition is not quite so active. Receipts from country

Wholesale Grocers

TORONTO - - ONTARIO

MARKETS—Continued

points are coming in freely, and the aggregate of wool moving is large.

PETROLEUM.

Trade in illuminating is not very good, but in lubricating oils business is rather brisk. Prices are unchanged and firm. We quote in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 16 to 17c.; carbon safety, 18 to 19c.; Canadian water white, 18 to 19c.; American water white, 20½c.; photogene, 21½ to 22c.

ONTARIO MARKET NOTES.

TORONTO.

Reports from St. Louis say that new potatoes are very firm.

Dawson & Co. have some shipments in of green California fruit.

Clemes Bros. receive frequent shipments of green California fruit.

D. Gunn, Flavelle & Co. are offering smoked rolls at special prices.

McWilliam & Everist are in receipt of two carloads of Florida tomatoes.

Hannah & Co. will sell 10,000 bushels of first-class oats at a low price, f.o.b., Orangeville.

Davidson & Hay are offering this week fine Patras and Filiatra currants at low figures.

White & Co.'s advices say that the domestic supply of strawberries will be a very poor one.

Davidson & Hay report large sales of root beer and lime juice during the past two weeks.

Perkins, Ince & Co. have to arrive a general assortment of Marshall's Scotch fish products.

Graham, McLean & Co.'s "Chesley" creamery is keeping up its reputation and selling rapidly.

Dawson & Co. report the arrivals this week of 1 car of cabbage and 1 car of Florida tomatoes.

Hannah & Co. have just received the first car of new potatoes to arrive in Toronto this year for one firm.

Rutherford, Marshall & Co. say they are in a position to dispose of two carloads of good butter at once.

Shipments of currants, Japan teas and Crosbe & Blackwell's goods arrived this week for Davidson & Hay.

The Eby, Blain Co., Ltd., report numerous sales of "Holdfast" sticky fly paper; also of "Star" poison fly felts.

The Eby, Blain Co. have received a shipment of Lea & Perrins' Worcestershire Sauce and Lazenby's Harvey Sauce.

The Pure Cold Manufacturing Co. report that their "Queen" coffee pot is taking immensely with the trade and they are looking for a large run on it.

The Eby, Blain Co., Ltd., have received a shipment of 100 cases of Bendorp's Royal Dutch Cocoa, ¼'s, ½'s, and 1's. They report the demand for this increasing steadily.

Watt & Thomas' very fine new season's pack finnan haddie, "I. G. W. T." brand, is for sale by the Eby, Blain Co., Ltd. This is very fine and put in a larger tin than any other brand.

The new glassware packages with Tutti Frutti, put up by Adams & Sons Co., are great sellers. This well-known firm is also

putting out a very beautiful advertising hanger sign and sends one to every retailer who applies. It is well worth seeing and makes a nice decoration for the store window.

The Toronto Biscuit & Confectionery Co. have a new line, "Victoria Loaf." It is a fancy bread, wrapped in clean white paper, and sells for 10c. It is one of the nicest things on the market.

The increase in price of salmon and the prospect of yet higher figures has caused the trade to place large orders for Marshall's Scotch kippered and fresh herrings, herrings in tomato, shrimp and anchovy sauce, etc.

During the heated spell there is always an improved demand for infants' food. The agents of Robinson's Patent Barley and Patent Groats report that the sales of these articles have more than doubled since the 1st of June.

The "Mandarin" fancy Japan rice offered by the Eby, Blain Co., Ltd., is claimed by them to be the finest in the market. It is beautifully milled, very even and polished, and free from paraffine. Good judges of rice should order a sack.

Bryant's root beer—five gallons for ten cents—wholesale from Messrs. H. P. Eckardt & Co., Elliott & Co., Lyman, Knox & Co., for Toronto; Masuret & Co., London Drug Co., A. M. Smith & Co., for London; Geo. Robertson & Son, for Kingston; D. H. Renoldson, Lyman, Knox & Co., for Montreal.

Messrs. Frank Magor & Co., Montreal, have recently brought out a shipment of summer drinks, orange squash, lime juice, etc., which they are placing on the market. Messrs. Chas. Southwell & Co., London, Eng., are the manufacturers, and the goods are fully up to the high standard maintained by this firm.

Rutherford, Marshall & Co., produce dealers, Toronto, are sending out this card to their customers, being open for consignment on commission or straight purchases: "We can use tub butter now, as there is a limited demand, so please say quantity of good quality and color, and your lowest price. Sell while fresh. A little later large quantities will be offered; then it probably will not be wanted. Future prospects are anything but bright for butter. Waiting reply."

HAMILTON.

James Turner & Co. have great value in prunes.

Lucas, Steele & Bristol report a good sale for their XXX sugar, for icing, and XX for berries.

Henderson's Wild Cherry summer drink is said to be selling like hot cakes with James Turner & Co.

An attractive little show card is being distributed by Lucas, Steele & Bristol, with the queen of teas, "Hillwattee."

James Turner & Co. report doing a large trade in canned fruits and vegetables, the best they have done for many a day.

New hard cured codfish, in 112 lb. quintals, is being offered by Lucas, Steele & Bristol. The quality is said to be first class and the fish are the largest size.

W. H. Gillard & Co. are offering fine values in Ceylons, Assams and China blacks. Intending purchasers would do well to correspond with them.

The list of canned fruits and vegetables offering by Lucas, Steele & Bristol is a very

varied one and some very big bargains are available.

W. H. Gillard & Co. are in receipt of a large consignment of those celebrated goods, Gillard's New Pickle and Gillard's New Sauce, among the most piquant and toothsome relishes offered.

LONDON.

Edward Adams & Co. carry Marshall's Scotch fish products and have also imported largely of their lunch lambs' tongues.

Elliott, Marr & Co. have arrivals of Marshall's Scotch fresh herrings and lunch tongues.

KINGSTON.

W. R. McRae & Co. have placed a good order for Marshall's Scotch lunch tongues, which are finding a ready sale everywhere.

WOODSTOCK.

R. Barker, representing D. Richards, of this town, has just returned from his spring trip to the coast. He reports a successful trip and a growing demand for Richards' Pure Soap, as it gives every satisfaction.

QUEBEC MARKETS.

MONTREAL, June 20, 1895.

GROCERIES.

THE grocery market has presented quite a few interesting features during the week, and in one or two of the leading staples business has given signs of more activity. The approach of the preserving season, for instance, is giving more backbone to the sugar market, while in canned salmon the execution of some large contracts of new pack for forward delivery at an advance has stiffened holders' views. Canned peaches also have shown firmness, while the strength that has characterized the molasses market for several weeks back is unabated. In other lines no special feature is to mention, but a fair trade has been doing.

SUGAR.

The sugar market has shown considerable activity during the past week, both from first and second hands, but prices are unchanged. Refiners report a better enquiry from jobbers, and the latter assert that supplies in third hands are becoming depleted, and that the demand in anticipation of the preserving season will soon be felt. There has been little change in the raw market since our last. Prices are unchanged. At the refineries we quote: Granulated, 4¼c. and yellows, 3¾ to 4c., as to quality. In a jobbing way granulated is held at 4¾c. and yellows at 3½ to 4c.

SYRUPS.

The syrup market continues quiet on account of the limited demand, but prices are steady at 1¾ to 2¼c. for Canadian as to quality at the refinery, with an advance of ½ to ¼c. on this basis for jobbing trade.

MOLASSES.

The strong feeling in molasses that was reported last week has been fully maintained, and Barbadoes in less than car lots is now firmly held at 37c., while car lots are

ST. CATHARINES, ONT.

quoted at 36c. Porto Rico stock is held for 35c. in car lots and 36c. in less than car-load lots.

RICE.

The rice market continues steady under a fairly active demand. We quote jobbing prices: Japan, \$4.25; crystal Japan, \$4.75 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.37½ to \$5; and Carolina, \$7 to \$7.50.

SPICES.

There has been no new feature in the spice market, business ruling quiet and prices steady. We quote jobbing prices as follows: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

Business in coffee has been quiet, and confined solely to small lots for actual wants. We quote: Maracaibo, 21½ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 22c.; and Mocha, 29 to 32c.

TEA.

The tone of the tea market rules firm, though the fact has not as yet spurred importers here much in the transaction of new contracts for supplies. In a distributing way a fairly good trade has been put through, chiefly in medium Japans, which seem to have run down pretty low in all hands. Stocks of old tea in first hands here are very small which explains the steady feeling. The second direct shipment of new Japans to this market arrived in Vancouver at the close of last week. They comprise 600 packages and are now on their way here.

DRIED FRUITS.

There has been a fair quiet jobbing trade in Valencia raisins at steady prices. Prices range from 4 to 5c. according to quality.

Only a few Sultanias are left and they are held at 5½ to 6c.

There has been more enquiry for California raisins this week, but prices are steady and unchanged. We quote: 3-crown loose muscatels, 5½c., and 4-crown do., 6½ to 6¾c.

The currant market is steady and unchanged. We quote: 3½c. in barrels and cases, 4 to 4½c. for Filiatras and Provincials, Patras, 5 to 5½c. and Vostizzas, 7c.

Prunes are in diminishing supply, and held steady at 4 to 5c. as to grade.

Dates are dull and unchanged at 4 to 5c., as to quality.

Dried apples continue quiet and steady at 6 to 6½c., as to grade.

NUTS.

There is a quiet jobbing trade doing in nuts with nothing special to mention. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 12 to 13c.; shelled ditto, 24 to 25c.; filberts, 6½ to 7½c.; and pecans, 8 to 10c.

CANNED GOODS.

The execution of several heavy contracts for new pack canned salmon at an advance has been the leading feature of the week. The quantity involved has been about 4,000 to 5,000 cases, and they were all placed on the basis of \$4.50, f.o.b., on the coast. A rather active demand for canned peaches has been another feature, business being put through at \$2 for 2-lb. and \$2.80 to \$3 for 3-lb. In old salmon holders of the small quantity remaining here

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

CLEMES BROS. - TORONTO

are very firm at \$1.75 per dozen. We quote: Lobsters, \$1.75 to \$2.00 per doz.; sardines, \$8.50 to \$9.50; salmon, \$1.50 per doz.; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$3.00 per doz.; corn, 85 to 90c. per doz.; peas, 85 to 90c. per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, \$1 to \$1.10.

GREEN FRUIT.

ORANGES—The orange market rules very steady under a fair demand at unchanged prices. We quote: \$3 to \$4.50, as to brand.

LEMONS—The lemon market has ruled fairly active and steady during the week, but the tone is not quite as firm as it was a week ago. We quote \$4.50 to \$5.50.

BANANAS—The banana market has ruled rather firmer in tone this week and prices are rather better at 75c. to \$1.50 per bunch, as to quality.

PINEAPPLES—Are quiet and firm, ranging from 10 to 20c. each.

CALIFORNIA PEACHES—Sell firm at \$2 to \$2.50 per box.

CALIFORNIA APRICOTS—Range from 90c. to \$1.10 per box.

CRANBERRIES—First receipts of these are offering at \$2.50 to \$3 per box.

STRAWBERRIES—Are coming in quite freely and rule easy at 12c. per box.

CALIFORNIA CHERRIES—Sell at a range of \$2.15 to \$2.25 per box.

COUNTRY PRODUCE.

EGGS—There is no change in the situation of the egg market. Demand is fair and prices steady at 10 to 10½c.

MAPLE PRODUCTS—Quiet and unchanged, at 4½ to 5c. for syrup per lb. and 6 to 7c. for sugar.

HOPS—Dull but steady at 5 to 8½c., as to quality.

HONEY—No change to report, business ruling quiet at 7 to 9c. per lb. for extracted and 10 to 12c. for comb stock.

BEANS—Quiet and steady, with prices as before. We quote: Choice hand-picked, \$1.75 to \$1.80, and inferior \$1.25 to \$1.50.

POTATOES—Prices are easier, sales on the track having been made at 40c. per bag and in a jobbing way at 55c.

ONIONS—Bermudas are quoted at \$2.25 to \$2.50 per crate, and Egyptian \$1.75 to \$2 per bag.

TOMATOES—Sell easier under larger receipts, at \$3 per carrier.

PROVISIONS.

The demand for smoked meats continues good on account of the warm weather, and fair-sized lots are changing hands at steady prices. There is no change in pork. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

Owing to the continued weakness in the American markets and the steady decline in prices during the past three or four days, the tone of the flour market is much easier, and holders of Ontario grades would, no doubt, shade prices in order to effect sales. In Manitoba grades millers state there is no change, except that the decline in wheat has checked the demand some, as buyers have now got good stocks on hand, and

business will probably be quiet until the wheat market improves. We quote: Winter wheat, \$5.50; spring wheat, patents, \$5.15; straight roller, \$4.90 to \$5; straight roller, bags, \$2.35 to \$2.40; extra, \$4.30 to \$4.40; extra, bags, \$2.25 to \$2.30; Manitoba strong bakers', \$5.

There was no important change in oatmeal, business being quiet at steady prices. We quote: Standard, bbls., \$4.10 to \$4.20; granulated, bbls., \$4.20 to \$4.30; rolled oats, bbls., \$4.20 to \$4.30.

The demand for feed is fair and prices are steady. We quote: Bran, \$14; shorts, \$16; mouillie, \$22 to \$23.

BUTTER.

The prospects for butter continue as discouraging as ever. The only demand experienced is on a local jobbing account, and it restricts itself to creamery on the basis of 15½c., and fine fresh townships dairy at 14c. Western dairy stock does not appear to be wanted here at any price. The export advances are very blue, and there is little prospect of any immediate outlet in this connection. In the meantime stocks are accumulating rapidly here.

CHEESE.

The cheese market continues dull and heavy and prices are from ½ to ¾c. lower than they were last week. Shippers preferred to take the loss to holding their purchases. It is understood, however, that quite a quantity of early makes are being held back in cold store. The evils that this course is apt to lead to are dwelt upon specially elsewhere. In the meantime we quote 7 to 7½c., as to quality.

ASIIES.

There is no change in the ashes market, business ruling moderately active and prices steady at \$4.10 for first pots, and \$3.80 for seconds, and \$5.50 for pearls, per 100 lbs.

QUEBEC MARKET NOTES.

MONTREAL.

Stocks of green apples here are practically exhausted, and no price is quotable.

Kinloch, Lindsay & Co. have just landed a carload of Griffin & Skelly's well-known raisins.

A number of shipments of Lazenby's goods consigned to various firms were landed here this week ex Rosarian.

D. H. Reynoldson, Common street, has just got in a shipment of Batger's "University" marmalade and lemon squash.

The first auction sale of new California fruit took place Monday. Apricots sold at 90c. to \$1.10 and peaches \$1.80 to \$2.

The Edwardsburg Starch Company's works at Cardinal are rushed with work at present, and have a large batch of orders ahead.

Kennedy, Greig & Co. have just landed a large lot of Patterson's sauces, in pints and half pints. These sizes ought to sell well.

A large shipment of Batger's "Nonpareil" jellies and "University" marmalade was received this week by Hudon, Hebert & Co.

Buttermilk toilet soap is a great seller with the trade. Rose & Laflamme have booked a large number of orders for it this week.

Rose & Laflamme have been appointed selling agents for Wm. Forsyth, the celebrated fruit packer, of Fresno, Cal. This firm is one of the largest packers of raisins

and dried fruit on the Coast, and are also the only growers and packers of cluster table fruit which is the equal of Malaga, and can be laid down for a lower price.

Agents here have had to cable a repeat order for Stower's lime juice cordial and other preparations on behalf of Lucas, Steele & Bristol.

Ewing, Herron & Co. note an active demand from the jobbing trade for spices of all kinds. They are fully a fortnight behind with their orders.

A. P. Tippet & Co. have loading a large shipment of Cox's jelatine. They report that the demand for this specialty is unusually good this year.

The stock of green apples have been practically cleaned off the market. Hart & Tuckwell have a few in cold store, which they are holding firm at \$6.50 to \$7.

THE CANADIAN GROCER has seen a large number of letter orders for Lazenby's preparations. Many of them from individual houses were for assortments of over \$1,000 worth.

Kennedy, Greig & Co. have landing, ex Sarmatian, this week, a large shipment of Carr's biscuits. They also note a good demand for Crown brand extracts and mustards.

Canned salmon and other canned goods are on the firm side. Laporte, Martin & Co. have a large stock of all kinds of canned supplies. For lots they can offer special inducements.

George Childs & Co. find that Fould's Germ Meal is a quick selling line. They are receiving this week a large shipment of it, which is the third repeat in a short space of time.

Ewing, Herron & Co. have on hand at present a fine lot of Penang cloves. The goods are a bargain, as the firm are open to sell them for less than the equivalent price in New York in case lots, plus the duty and freight.

Chas. Southwell & Co., London, Eng., have just made another shipment of their high-class jams, jellies and marmalades to their agents, Frank Magor & Co. These will be distributed all over Canada, from British Columbia to Halifax, N.S.

Frank Magor & Co. are putting on the market some very fine summer drinks, in the shape of lemon squash, lime juice and cordials, manufactured by Chas. Southwell & Co., London, Eng. These goods are handsomely packed in decanters and square glass-stoppered bottles.

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER

ST. JOHN, N.B., June 20, 1895.

THE past week has been quiet in markets. Oils show strength, but in those goods which have shown the greatest amount of advance there is a greater tendency to sell, though there is no sign of decline, except perhaps oats, which are rather easier. In lumber demand continues good, deal particularly being needed and fair prices are offered. Ocean freights, however, continue low. A large number of steamers are loading. They carry very cheap, only expecting to clear expenses. In tea demand is very good and prices firm. Where deal-

ers have to replace they have to pay higher prices for equal value. Farmers are pleased at the turn hay has taken, for though the price is still low there is a demand which there has not been for some time. It is said something like one hundred cars have been shipped out of Carleton county, largely for Boston.

OIL—Market continues strong at advance, and dealers are not expecting any change. At present demand for burning oil is light, though in some cases orders are taken for future. In linseed oil market is more active, and shows an advance of about 3c. We quote: American, best quality, 22¾c.; Canadian, best, 21½c.; Canadian, second grade, 17½c..

SALT—There is fair demand at steady prices. As reported last week, there are no cargoes afloat for here, which makes prices firm. Supplies can, however, be drawn from Boston, and some have been shipped here, largely fine, of which this market was quite bare, from a cargo landing at Shediac. Coarse, 50 to 55c.; fine factory filled, 95c. to \$1.10; 5-lb. bags, \$3 per bbl.; 10-lb. bags, \$2.80 per bbl.; 20-lb. boxes, 20c.; 10-lb. boxes, 12c.; cartoons, \$2 per doz.; bbls., bulk, dairy, \$2.80; bbls., bulk, cheese, \$2 70.

CANNED GOODS—The interest at present is in canned salmon, which, on account of small stocks and high figures for new, are very firm at advance. One car of old came into this market during the week from Montreal, and the sale of a car or two of new is reported at about \$4.20 to \$4.25 at the coast. As far as can be learned at the writing of this, but one broker has as yet received prices. Parties on the coast appear to be backward, as though they expected higher prices, though just why is not known. The break in the association was not unexpected here. As held by THE CANADIAN GROCER, the mode of doing business was not considered good. Prices show no change, and demand is good. Beef continues firm. We quote: Corn, 90c. to \$1; peas, 95c.; tomatoes, \$1 to \$1.05; corned beef, 2 lb. tins, \$3 to \$3 10; 1-lb. tins, \$1.70 to \$1.80; oysters, 2's, \$2 to \$2.25; 1's, \$1.60 to \$1.65; peaches, 3's, \$2.95 to \$3; 2's, \$2 to \$2.10; lobsters, \$1.75 to \$2; haddies, \$1.40; salmon, \$1.40 to \$1.50; flat, \$1.75; clams, \$5 50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—In cleaned currants two grades are now being put up by a local dealer. The lowest are good quality, while the best are extra. They are very largely taking the place of the American, which have been quite largely imported during the past two years. Demand continues light in all lines. Peanuts continue to advance, extra hand-picked being one cent and a quarter above lowest price, and fancy 1c. In California Valencias, of which none have yet been used here, nice samples are being shown at low figures. They, like the California loose muscatels, do not sugar. We quote: Sultana raisins, 6 to 7c.; Valencia, 4c.; layers, 5c.; London layers, \$2 10

tured from the celebrated Norfolk County
apples—the finest flavored fruit in Canada.
Prices very low. Send for quotations to

THE DOVER VINEGAR WORKS
PORT DOVER, ONT.

ST. JOHN MARKETS—Continued.

\$2.25; California loose muscatels, 5 to 5½c.; currants, bbls., 3¼ to 4c.; half-cases, 4¼ to 4½c.; evaporated apples, 8c.; dried apples, 5¼ to 5½c.; dates, 4 to 4½c.; prunes, 4 to 5c.; figs, 11 to 18c.; Bermuda onions, \$1.60 per crate; Egyptian, 2 to 2¼c.; California evaporated peaches, 12 to 13c.; do. apricots, 12 to 14c.; do. pears, 12 to 13c.; cleaned currants, bulk, 6½c.; do. 1 lb. cartoons, 7½c.

GREEN FRUIT—Business is very good. In oranges and lemons, particularly the latter, the market is very strong, and price is marked up 50c. Strawberries, which continue to arrive in better quality, are firm. Some few native wild are to be seen. They will, it is expected, be plenty this season. In oranges, keeping quality is now had. Rhubarb continues very plenty, low and of good quality. Bananas are finding steady sale. Some fine sugar loaf pineapples arrived by last West India steamer. We quote: Valencia oranges, \$6 to \$6.50; Messinas, \$3.50 to \$4; lemons, \$4.50 to \$5; strawberries, 12 to 15c.; pineapples, 15 to 20c.; rhubarb, 1 to 1½c.; bananas, \$1.75 to \$2.25. California oranges, \$3 to \$4; extra Valencia, \$7.50; blood oranges, half-box, \$2.50.

DAIRY PRODUCE—With the advance of cheese in the west our factories are also asking firmer prices. There will be a large quantity made here this season and the need of a cheese board is much felt. It was attempted last year, but the factorymen would do nothing and prices were kept here much below Ontario. United action between factories is much needed, but they are so jealous of each other it is most difficult. There are quite a number of old cheese yet in the market. New twins find fair demand. Butter continues very dull. In eggs price is rather easier. We quote: New cheese, 8½ to 9c.; new butter, 15 to 16c.; old creamery, 15 to 16c.; dairy, 12 to 14c.; cheese, 9 to 9½c.; eggs, 9 to 10c.; fresh creamery prints, 17 to 18c.

MOLASSES—The steamer did not have a large quantity this trip, so stocks continue very light, and the quantity to arrive is not large. It is said, so far, not quite half as much has arrived as at this time last season. A splendid molasses is now being offered in this market in 40 gallon bbls. A cargo of Porto Rico is expected shortly. Some very good quality St. Croix continues to arrive. In syrup demand is very light. We quote: Barbadoes, 34 to 35c.; St. Croix, 32 to 34c.; Porto Rico, 35 to 36c.; syrup, 35c.

SUGAR—There is good demand from retail trade. It is expected during the next month a large quantity will be sold. Prices, though rather easier, and though some wholesalers are selling rather lower than just after late advance, the market cannot be said to be weaker, and those who bought for speculation are still holding, expecting further advance. With the quantity held, bought before the rise, and the rather limited outlet, it is impossible, except, perhaps, on a rising market, to keep prices as they should be. We quote: Granulated, 4¼ to 4½c.; yellow, 3½ to 3¾c.; Paris lump, 5 to 5½c.; powdered, 5 to 5½c.

FISH—Fish continue to hold the interest, particularly salmon. The catch during the week has not been large; quality is, however, extra, our fish being much better than those from the north shore; but it is from there the price is governed. In shad the catch is about over and

the run has been light. Gaspereaux are also a small catch; it is said about one-third that of last year. Dried are steady, smoked very dull, and the movement in pickled is so light that it is hard to make a price. We quote: Cod, \$3.75; large, \$4; small, \$2.75; pollock, \$1.65 to \$1.70; bay herring, \$1.40 to \$1.50; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; shad, fresh, 10 to 12c.; smoked herring, 6 to 7c.; Digby chickens, 10 to 12c.; halibut, 8 to 9c.; gaspereaux, 50 to 60c.; smoked, \$1; lobsters, \$6; fresh salmon, 11 to 12c.

PROVISIONS—Demand continues light. Lard is firm, but shows no advance. Beef is the strongest article in this market. Smoked meats are being handled as lightly as possible, they being unsatisfactory, as a rule, at this season. We quote: Clear pork, \$18.50 to \$19; mess, \$16.50 to \$17; prime, \$13 to \$13.50; extra plate, \$14.50 to \$15; plate, \$13.50 to \$14; pure lard, 9¼ to 10½c.; compound lard, 8½ to 9c.; cottolene, 9¼ to 9¾c.; hams, 11 to 12c.; rolls, 9 to 9½c.; beef, half-barrels, \$7.

FLOUR, FEED AND MEAL—Though prices may be said to be firm, and while in some cases millers quote higher, there is a feeling that the very highest point has been reached, and a number of millers are pushing sales. In oatmeal prices here continue below millers' prices, which are perhaps not as firm as a week ago. Oats are easier and demand light. Market is being supplied from Prince Edward Island below the Ontario figures. Hay is more active and has advanced \$1 per ton. Large quantities are moving through the country. The farmers, though price is still low, are much pleased, as they were beginning to wonder where they would put the new. We quote: Manitoba, \$5.60 to \$5.70; best Ontario, \$5.40 to \$5.50; medium, \$5 to \$5.25; oatmeal, \$4.50 to \$4.60; cornmeal, \$3 to \$3.10; middlings, \$25 on track; bran, \$22.50 to \$23; hand-picked beans, \$1.90 to \$2; prime, \$1.80 to \$1.85; split peas, \$3.70 to \$3.90; pot barley, \$4 to \$4.25 hay, on track, \$9.50 to \$10; oats, on track, 48 to 52c.

NEW BRUNSWICK MARKET NOTES. ST. JOHN.

J. Hunter White has been appointed agent for Messrs. Park, Blackwell & Co.

C. & E. Macmichael, Est. V. S. White and C. D. Trueman received shipments of Maconochie's pickles by the last English steamer.

The people of Petitcodiac are much pleased by the result of the examination by analysts of the plaster now being quarried there. The present company have had a number of offers to sell, but they are in no hurry.

From Prince Edward Island, though there are a large number of cheese factories, they report a better supply of milk than last year. This is a growing industry through the Maritime Provinces.

The following letter shows it is unnecessary for eastern people to go either to Montreal, Boston or New York to secure pleasant and safe passage between here and London:

Steamer St. John City,
Off Halifax Harbor, N. S.,
June 7, 1895.

DEAR CAPTAIN HARRISON,—The passengers on the steamer St. John City, from London to Halifax and St. John, desire unanimously to thank you for the exceeding care you have taken of their safety through the tedious and hazardous voyage now happily ending. We know the

hindrances the ship has encountered from the winds and fogs, especially the severe gale of June 3 and 4, have not been without their actual danger, and we beg to express our gratitude for the caution with which you have watched over us and brought us safely to our journey's end.

Wishing a long and increasing prosperous career not only to yourself but to the staunch vessel you command, and that this may not be the last time we may sail together, we are, dear Captain Harrison,

Yours very truly,
(Signed) A. TOWNEND, Chaplain.

Among the imports by the last West India steamer were 150 crates Bermuda onions, 70 casks St. Croix molasses, 50 barrels Antigua, 600 casks Barbadoes, and 500 bags cocoanuts.

THE CANADIAN GROCER received this week from W. G. MacFarlane a copy of the Illustrated Guide to St. John, Fredericton and other places of interest through the province. To anyone coming to our province, either on business or pleasure, it is both a practical guide and handsome souvenir.

NOVA SCOTIA MARKETS.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, June 20, 1895.

The past week has been a very quiet one, and the volume of business has not been large. Large shipments of dried and iced fish are being made to the West Indies and United States, but prices show no inclination upward. Lobster factories are sending large shipments of canned goods here, which are being re shipped, principally to Europe. Most of the Nova Scotia factories are doing well, but reports from the eastern section of Prince Edward Island are discouraging. There will not be more than half a catch there. The tendency of prices on flour, oatmeal, cornmeal, oats and feeds is decidedly upward.

GREEN FRUIT—The fruit market is fairly good. There is an advance in oranges and lemons. New tomatoes are coming in, and are reasonable in price, as well as being excellent fruit. American gooseberries, the first of the season, arrived this week, and are selling for 50 and 60c. per basket. Apricots and cherries, in limited quantities, are being received for city consumption. American strawberries are very plentiful, but poor fruit. They are retailing at three boxes for 25c.

SUGAR—There is nothing doing in sugar at the refinery. Prices remain unchanged. Dealers who purchased before the rise in duty are doing all the trade. The refineries are patiently waiting for stocks in dealers' hands to be worked off.

MOLASSES—The situation in molasses is stronger for holders, and a sharp advance is looked for in the near future. Some dealers predict a reduced supply here.

DRIED FRUIT—The demand for dried fruit is poor. Quotations remain unchanged.

CANNED GOODS—Stocks in canned goods are not large, and the demand is reported

fair for fruit and vegetables. Libby's beef, 2's, is quoted at \$3, and lunch tongue, 1's, at \$4.

EGGS—Eggs have advanced and stocks are low. Good stock is quoted to-day at 11c.

CHEESE—The cheese market remains quiet. There is no demand for new Canadian. Old September is quoted at 10½c.

BUTTER—There is nothing doing in butter. Small tubs of native are offered at 16 and 17c. There is no Canadian offering. Provincial creameries are looking for cold storage here, and by all appearances they will flood the market.

PROVISIONS—In provisions the market is very dull. Very little Ontario beef has been received, and provincial dealers find it hard to find a market. Native is quoted to-day at \$8.50 to \$9, sinking offal. Lambs are selling at \$2.75, and sheep at \$3.50 to \$4. Veal is stiffer, being quoted at 4 and 5c. Dressed pork is also a little stiffer, being quoted at 7½c. P. E. Island mess pork is worth \$17 to \$17.50.

FISHSTUFFS—Locally there is no demand for fish of any kind and prices rule low. The catch on the coast is fairly good.

FLOUR—There is no let-up in the price of flour, and most dealers predict a further advance. Quotations are: Hungarian patent, Manitoban, \$5.60 to \$5.75; Manitoba strong bakers', \$5.50 to \$5.60; Canadian pastry, \$5.40 to \$5.60; 75 p. c. roller patents, \$5.35 to \$5.50; 80 p. c. do., \$5.25 to \$5.35; 90 p. c. do., \$5 to \$5.25; straight, \$4.90 to \$5.10; extra, \$4.75 to \$4.85.

NOVA SCOTIA MARKET NOTES.

HALIFAX.

W. H. Woodill has opened a general grocery on Argyle street, on the premises formerly occupied by Mr. H. Ruggles.

Work at Woodside refinery is about to be suspended for an indefinite period.

The Dominion Government have decided to begin work at once on the rebuilding of the deep water terminus on a large scale. The plans have been submitted to the Board of Trade and approved of. They will give the much needed freight accommodation for the W. & A. R.

TAUNTON.

A NEW DIET WANTED.

A member of the "Contributors' Club" of The Atlantic Monthly expresses alarm at the number of fatal diseases that we are liable to contract by eating the things that form our daily repast. He notices that one high authority on dietetics says that lemons will prolong one's life. Another says that tomatoes will shorten life; that the insidious cancer lurks in every ovule of this fruit. He goes on to say:

"And now the learned savants tell us that even in the succulent and delicious oyster grim death lies concealed. That bivalve, after all these years, has been found by science to be infested with the deadly typhoid bacillus, which lives and thrives inside the shell. The clam, the prawn, and the lobster vie with one another in tormenting the inner man, so to speak, and the shrimp inspires visions that are hideous. * * * Too much meat, says one, makes men vicious and cross. Tripe and onions produce in some the bovine quality; and tho' sausage possesses a distinct charm of its own, it too has power to make disturbances in otherwise happy homes. Its twin brother, the humor-producing bologna, may be eaten cold without alarm; but imprisonment makes him restless, and gives one that tired feeling. Pork, tho' one might preserve a yardful of mo'y as a safeguard, suggests trichinosis and the trick of Circe. The haggis is shrouded in mystery, but, fortunately, we are condemned to make a dish of it only once a year. Fish will stimulate the blood. Even with the king of the tribe, salmon, we are never quite safe. The eruptive qualities of the rash oatmeal are too familiar to be questioned.

"A new diet, surely, is sorely needed, if we must keep pace with the progress of science and the results of the investigations of the doctors. The old foods must go. They have killed too many. An appeal to the Grand Diet of Worms might be made for succor, but do we not know that even the worm will turn?"

To the above we would add the remark of the old darkey: "Dar ain't nuthin' nowadays but what's spotted afore it begins for to kermence, and dar's sumpin' new bein' hunted up an' shot off at us ebery day."

HAMILTON TRADE GOSSIP.

TRADE remains much about the same as a week ago. The demand for sugar has commenced again, quite a few carload lots having gone out during the past week or ten days. Some of the sales have been made at concessions, some of the houses preferring to do this than put their sugar in store. The ruling prices are still $4\frac{3}{8}$ to $4\frac{1}{2}$ c. for granulated, and, in carload lots, 4 5-16c.

Large sales of canned goods, particularly fruits, are reported. One house informs me that it has sold quite a few carloads to go to the Northwest. Ruling prices for tomatoes, peas and corn are still 80 to 85c. Among the fruits, canned peaches are attracting a good deal of attention. Strawberries are a scarce commodity. An order received here from Winnipeg for 300 cases had to be refused.

New season's canned salmon has been offering rather freely the past week. The ruling figure asked is \$4.50 on the Coast, but the range is from \$4.20 to \$4.75. The representative of one packer was notified on Wednesday to withdraw prices. The general feeling is strong.

There are a good many cheap Valencia raisins moving at from 85 to 90c. per box. No more of this class of goods are to be had at primary markets.

The Hamilton, Grimsby & Beamsville electric railway is daily demonstrating its usefulness to Hamilton wholesale merchants who have goods to ship to merchants in the different villages on the route, and convenience to the merchants at those places who want quick delivery of the goods they buy. The utilitarian property of the road for passenger traffic is, of course, well understood. Cars run every hour. The other day I took a run over the road from Hamilton to Grimsby, and a most delightful trip it was. There is not the same food for excitement as on the Niagara River electric line, but one gets on the Hamilton line what he fails to get while skirting the Niagara River, namely, a peep into the fruit garden of Canada, while comparatively close at hand during the whole route, to feast the eye upon, is the Niagara formation, which, by courtesy, is called The Mountain when it reaches Hamilton.

I have been interviewing a number of fruit growers in the neighborhood of Grimsby during the last few days regarding the fruit crop. Peaches and plums, it is the general opinion, will be light. Apples, on the whole, promise good. Grapes, in some instances, appear to indicate better even than last year. The drought has caused a

much diminished strawberry yield. While cherries and currants are likely to be a small crop, small fruits generally promise an average yield.

There has been a little more tea of medium and low grade Japans and Ceylons moving this week, the former at 16 to 18c., and the latter at 19 to 23c. Young Hysons at 17 to 18c. are very scarce. Good liquoring teas of this description are almost impossible to get.

W.L.E.

MEETING OF LONDON RETAIL GROCERS.

THE London Retail Grocers' Association met in Sherwood Hall on Tuesday evening, June 18th. There was a fair attendance and the meeting was interesting.

The president, W. H. McCutcheon, opened the meeting at 8.30.

The first question taken up was "Cash Business," discussion of this question having been laid over from last meeting.

R. A. Jones, the promoter of the question and mover of the motion to discuss the question at this meeting, requested that the discussion be again laid over, as there would be considerable business in connection with the picnic to come up, and it would take up considerable time, and the question of the grocers adopting a cash business required more time for discussion than could be devoted to it this evening.

Moved by R. A. Jones, seconded by P. McGlade: That discussion on "Cash Business" be laid over until next meeting. Carried.

Discussion on limitation of liability of debtor by statute was also laid over.

Geo. McNeil was proposed for membership in the association and accepted.

R. A. Jones reported that the committee appointed to strike the various committees necessary to get up and conduct the picnic had met and arranged the committees.

The secretary was instructed to make out a list of the different committees and hand each chairman or convenor a list of the names of their respective committeemen, and that the committees get to work, as it will require all the time between now and the date fixed for the picnic to get everything in good shape.

The president remarked that any suggestions that the members might make for the benefit of the different committees would be in order.

The question of providing picnickers with coffee was discussed, and it was decided that hot coffee be provided free of charge.

It was decided that a fee of 10c. be charged for the open grand stand and 15c. for the covered stand; children under 8

years of age, when accompanied by parents, will be admitted free.

Moved by Jas. Fitzgerald, seconded by R. S. Wood: "That we have a procession as usual."

Moved by J. Fitzgerald, seconded by J. McKee: "That a prize of \$1 be given the driver of each decorated grocery delivery wagon belonging to members of the association and in the procession, this to be in addition to the prizes on the programme."

The secretary was requested to read over the list of those who had been requested to contribute to the prize list, also those who had responded up to date.

The secretary reported that while there were some who had not replied to the communication sent out asking for contributions for prizes, a good number had replied and contributed liberally, and no doubt replies would be received from others yet.

The contributors all wished the picnic to be a grand success, and quite a number signified their intention of enjoying a day's outing with the London retail grocers and their friends at the picnic.

The report of the Striking Committee was adopted on motion of F. Harley, seconded by R. W. Ralston.

R. A. Jones reported that the trades and labor associations and the Ministerial Association of the city were agitating the earlier closing of stores on Saturday night, and he had been requested to bring the question before the members of this association, asking co-operation. He had attended one or two of those meetings, and informed them that in his opinion they were not working the movement from the right or proper point. He suggested that the citizens be requested to do all their purchasing on some other day as far as possible, and that all employers of labor pay their employees on some other day than Saturday. The grocer was not usually fond of keeping his store open late on Saturday nights, and would not do so if he were not compelled to do so in order to get out orders left until 10 or even 11 o'clock before being given by the purchaser. He was in sympathy with earlier closing on Saturday nights, and suggested that a committee be appointed to confer with the associations mentioned and co-operate with them in the movement. The question was not further discussed, as it was getting late in the evening.

Meeting adjourned at 10:30 p.m. to meet again on Tuesday, July 2nd.

T. SUTTON, Secretary.

GROCERS TO PICNIC.

London retail grocers will hold their annual picnic on July 24, and THE CANADIAN GROCER is requested to extend an invitation to the trade in all outside cities and towns to attend this outing. The wholesale grocers and manufacturers should make an effort to be there or send their representative.

OIL FIELDS ACTIVE.

THE American Manufacturer has an article to show the increased activity which has been shown during the month of May, 1895, in the Appalachian and Lima-Indiana oil fields. It says: From a comparison of the last two months, April and May, the increased activity in these fields will be manifest. The Appalachian oil field includes the districts in New York, Pennsylvania, West Virginia, and southeastern Ohio; the Lima-Indiana, the Trenton rock oil fields of Western Ohio and of Indiana. In the Appalachian field the number of wells completed increased from 462 in April to 658 in May, an increase of 196 or 42 per cent.; the initial daily production increased 1,471 barrels, or some 23 per cent.; the number of drilling wells at the close of May was 824, at the close of April 635, an increase of 189 wells, while the number of rigs building at the close of May were 599, at the close of April 457, an increase of 142.

In the Lima-Indiana field the number of completed wells increased from 427 in April to 534 in May; of initial daily production from 9,681 barrels in April to 11,196 barrels in May; of drilling wells from 351 in April to 414 in May, and of rigs building from 334 in April to 407 in May.

Consolidating these for the entire field it will be seen that the number of wells complete in the Appalachian and Lima-Indiana fields, we have the following:

WELL RECORD OIL FIELDS UNITED STATES FOR APRIL AND MAY, 1895.

	April.	May.	Increase.
Wells completed.....	889	1,192	303
Initial daily product, bbls.....	16,069	19,055	2,986
Wells drilling.....	989	1,238	249
Rigs building.....	791	1,006	215

This shows a remarkable activity, the cause of which is not far to seek. An examination of the detailed tables will show that the chief activity is in lower Pennsylvania oil fields in Butler and Southwest Pennsylvania 514 of the 849 wells drilling at the close of May being in these districts.

A comparison of the well records for May of the current year with those for the same month, 1894, will still better indicate how great is the present activity.

WELL RECORDS FOR MAY, 1894 AND 1895.

	Appalachian Field.		Lima, Indiana.		Tntal.	
	1894.	1895.	1894.	1895.	1894.	1895.
Wells completed..	324	658	358	534	682	1,192
Initial daily production.....	7,430	7,859	11,741	11,196	19,171	19,055
Wells drilling....	410	824	187	414	597	1,238
Rigs building.....	237	599	120	467	357	1,066

The most interesting feature about the above table is that though nearly 80 per cent. more wells were completed in May, 1895, than in May, 1894, the total initial daily production was a little less in 1895 than in 1894. The average of the May, 1894, producing wells in New York, Penn-

sylvania and West Virginia was 29.3 barrels; of the May, 1895, but 12 barrels; of the South-Eastern field in May, 1894, 20.05 barrels; in May, 1895, but 15.6 barrels; of the Buckeye in May, 1894, 32.8 barrels, in 1895, 21.9 barrels, and of the Indiana district in May, 1894, 45.9 barrels, and in 1895, 30.35 barrels.

All this would indicate that the production of 1895, even with the greatly increased activity, would not equal that of 1894, when the total production in the United States was a little over 49,300,000 barrels, of which about 48,000,000 were produced in the fields named. Unless some more productive territory is struck than is indicated in the well records, the new production will not be sufficient to compensate for the natural decline of old wells. The average daily production in the New York, Pennsylvania and West Virginia field in 1894 was 79,388 barrels. It is estimated that the average life of a well is six years. The initial daily production of new wells will not keep up the loss.

ENCOURAGING REPORTS.

Hon. John Costigan the other day laid on the table of the House of Commons the annual report of the Fisheries Department for last year. The total value of the fisheries is placed at \$20,719,573, which is an increase of \$32,912 over last year. This is the highest mark reached by the fisheries since Confederation. The value of vessels, boats, seines, and other materials used in the fisheries amounts to \$9,430,116, which is the highest ever known, being \$717,559 over last year, which was the highest. The total number of fishermen is placed at 70,719, an increase of 2,966 over last year, which was the highest.

HAY EXPORTS.

Hon. Clarke Wallace, Controller of Customs, has stated in the House of Commons that the quantity of hay exported from Canada to the United States and to England, respectively, in the following years, was:

Year.	—Great Britain.—		—United States.—	
	Tons.	Amt.	Tons.	Amt.
1891.....	11,825	\$15,291	50,000	\$375,813
1892.....	14,969	167,604	67,067	598,567
1893.....	50,892	515,461	94,282	854,958
1894.....	175,559	1,700,409	87,847	753,575

POISON SCHEDULE.

At the annual meeting of the Pharmaceutical Association of the Province of Quebec a ballot was taken for the election of six new members to the council board. The following were chosen: R. W. Williams, Three Rivers; J. Emile Roy, Quebec; Alex. Manson, C. J. Covernton, A. D. Mann, and C. G. Scarff, Montreal. These, with Jos. Contant, Henry R. Gray, David Watson, S. Lachanec, W. B. Chapman, and W. A. Dyer,

SILICO

VERSUS

"THE MERCHANT."

IN THE issue of "The Merchant," a trade journal published at Toronto, under date of May 27th, there appears an article headed, "Alleged Bogus Orders for Soap." "IT DOES NOT SCRATCH," but leaves its mark.

In said article the writer, actuated by spleen because SILICO has been advertised in THE CANADIAN GROCER and not in "The Merchant," attacks (1st) the article itself, SILICO; (2nd) the methods employed in introducing it to the public. The resident representative of SILICO at Toronto is Mr. Jas. A. Hewitt, 92 Lansdowne avenue. His methods of doing business are legitimate and honorable; he does not get the SIGNATURES of every householder ordering any more than the retail grocer requires the signature of his customer to whom he sends daily his goods; the orders are usually verbal, in good faith, and filled by the retail grocers satisfactorily to themselves and to their customers, because Silico is just what is claimed for it, the best scouring soap on the market, and good value for the price asked (3 large cakes for 25 cents).

The article speaks for itself, and out of some 150,000 orders taken from the people during the past 18 months there has been hardly a complaint. Knowing the value of SILICO, and the fact that the consumer should be the judge, the proprietors have gone directly to the public and only ask a fair judgment at their hands and the privilege of introducing SILICO as they deem best, without being bulldozed by some trade journals. SILICO is the best article of its kind, and the proprietors refer the retail trade to Eby, Blain Co., Ltd., Perkins, Ince & Co., H. P. Eckardt & Co., T. Kinneer & Co., Sloan & Crowther, J. W. Lang & Co., Davidson & Hay, James Lumbers, and Rice Lewis & Co., of Toronto, who handle SILICO, and can most of them attest its value, and to nearly all the wholesale grocers in Canada.

will compose the council of the association for the year 1895-96.

The financial statement presented by the treasurer shows \$2,884 to the credit of the association. The new council was instructed to consider the scope of the poison schedule.

THE DRY GOODS TRADE.

THIS week is about the meeting point of the spring and fall seasons in the dry goods trade, and hence it is an opportune moment to glance backward and forward. The first of July should really be the ridge between the seasons, but as a matter of fact the seasons overlap. That is, while a man is still buying goods for the spring and summer trade, he is receiving his fall goods. While he owes \$1,500 on sorting goods, he receives \$1,500 worth of fall goods. He thus has \$3,000 credit where he is only entitled to and only rated for \$1,500. This overlapping of seasons is an evil the wholesale trade would like to eradicate. Progress towards this end is mighty slow, however.

The year's wholesale dry goods trade opened up very poorly, and January, February and March were months in which nobody did very much blowing about the volume of business. Inquiries for all lines, except a few specialties, were very slow and colorless. March, April and May were much better, and by the end of that month considerable confidence had been infused into the trade. The business done was larger than last year, and nearly equal to the business of 1893. Moreover, it was larger than people expected, and hence all the more exhilarating. The first two weeks in June were productive of still further surprises. The sorting trade seemed to have been unduly prolonged, and instead of turning their attention to the ordering of fall goods, retailers maintained their attempts to sell spring and summer goods. This was a splendid thing for those wholesale houses who aim to do a sorting trade, and they have done exceedingly well.

Last week and this week have developed a brisk trade in all summer-weight goods. Men's straw hats, belts, negligee shirts and flannels have been selling well. Retailers have gone wild over ducks, of which white are good but dark colors are better. Every shipment that arrives is distributed within a few hours. Prints, zephyrs, gingham and chambrays are much in demand. Swiss spot muslins are moving very freely, while fancy blouse silks and double faced satin ribbons are meeting with considerably more than average attention.

Another feature is that retailers have looked less for job lots and have been buying more regular goods at regular prices. This means a much more profitable season for the wholesalers and retailers, although a dearer season for consumers. The price-slashing of the past two or three years is fast passing away.

It is reported on the street this week that the Montmorency Cotton Co. will pass out of the control of the combine on August 31st. These mills have been making cottons for the China trade only, and will put

only greys on the market. It is not expected that prices will be affected.

A drop of one cent a yard in Campbellford flannels has been announced. All other lines of flannels remain firm, kept so by the high price of wool.

A leading wholesaler, when asked what he thought of the sorting trade, remarked: "It is the best sorting trade I have ever seen." This sentiment was also expressed by others, but one or two, while admitting it was better than last year, were not willing to say it was the best in their experience.

Fall orders have been quiet. This is a natural result of a brisk sorting season. Retailers have not the time to bestow on fall samples.

CRANBERRY SEASON OVER.

A good part of what The N.E. Grocer says about the cranberry crop applies to Canada. This journal remarks: The cranberry season of 1894-95 has closed in a manner generally satisfactory to producers, stocks being now quite exhausted as far as growers are concerned, with only scattered parcels in the distributive markets. Climatic conditions the last six months have been favorable in the main, and indications point to a good crop in Cape Cod and Jersey districts. Secretary A. J. Rider, of the American Cranberry Growers' Association, believes that the west will not figure conspicuously in production for several years to come, owing to the disastrous fires and unpropitious elements generally which damaged and destroyed many plantations in Wisconsin last year.

The crop of 1895 resulted in materially higher prices than for a number of years past. Fine fruit sold up to \$12 to \$13 per bbl., or \$4.75 to \$5 per bushel, and demand was sufficiently steady to prevent any relapse of consequence throughout the entire season just closed. Large yields of other fruits do not necessarily curtail the consumption of cranberries, which seem to occupy a field of their own. The foreign market possesses great possibilities. The high prices the past season served to limit the business to small proportions, but moderate prices, which are requisite for the successful introduction of cranberries into England, may do much another year.

The following table shows the crop and movement of prices with comparisons:

Year.	Estimated crop.	Market prices.		
		October.	January.	May.
1894	410,000	\$2 00 to 3 00	\$3 50 to 4 00	\$4 00 to 5 00
1893	1,000,000	1 25 to 1 50	2 00 to 2 50	2 00 to 3 00
1892	600,000	1 25 to 1 50	1 75 to 2 25	2 00 to 3 00
1891	760,000	1 50 to 2 00	1 25 to 2 25	1 25 to 2 00
1890	800,000	2 00 to 2 25	2 50 to 3 00	3 00 to 3 50
1889	620,000	1 50 to 2 00	2 50 to 3 00	4 00 to 5 00
1888	585,000	1 35 to 2 00	2 00 to 2 25	75 to 1 00
1887	612,000	1 75 to 2 00	2 75 to 3 00	2 75 to 3 00
1886	540,000	1 25 to 1 50	2 50 to 2 75	3 75 to 4 00
1885	743,000	1 50 to 1 70	1 20 to 1 40	50 to 75

JAMAICA WILL NOT BUY OUR GOODS.

DEAR GROCER,—Some time ago Mr. G. Cecil Brown went to Kingston, Jamaica, and in a letter just to hand he says:—

The prospects of doing much of a business are not encouraging. The American houses have a big hold, and their prices are somewhat lower than ours, so I am told. The Americans deliver goods here as cheaply as they are sold in New York. Freight rates are against Canadians, and altogether there seems to be a strong prejudice against Canadian trade of any kind. As to freights, a box from New York to here costs 15 cents, the same package from Halifax costs 36 cents and 6 cents wharfage, so you see we Canucks get it where the chicken got the axe.

Canada and Canadian manufacturers have a hard name, and several good houses here have made it a rule not to handle Canadian goods at all. Some goods shipped here from Canada arrived in bad shape, such as flour, pork and cheese, and this has given these people the idea that Canadians were no good, but even if we were able to get away down in prices, etc., and deliver our goods in decent shape, the freight arrangements would knock us out. Canadian manufacturers want to explain a few points to their Government about this matter. The whole trouble is just here. Our reputation down here is bad. Freight arrangements from Canada to Jamaica are bad. Our dealings in the past have not been O.K., and it will need a lot of time to rearrange affairs.

H. C. F.

A grain warehouse situated near the G.T.R., Chesley, Ont., owned by John Adolphe, and leased by Wenger Bros., of Ayton, was totally destroyed by fire on the 14th inst., with the contents. Loss on the building, about \$1,700. There was about 5,000 bushels of peas and oats destroyed. Fully covered by insurance.

Do You Handle Hardware?

If so, you will want full and reliable reports on the state of the wholesale trade and the prices that are ruling. The only place you can get it is in **The Hardware and Metal Merchant**. Sample copies will be mailed on application. Address

THE Talk of the Trade

When we get out something new we sit in anxiety till we know how it is going to take.

The "Queen" tea and coffee pot is now fairly on the market, and we have no time for further anxiety regarding it—we are too busy filling orders. Everybody seems to want it at once.

Contains 1 lb. net of the finest "Queen" Plantation Coffee.

1 and 2 Dozen in Case.

\$4.00 per Dozen.

Pure Gold Manufacturing Co. TORONTO

TOTTENHAM FIRE-SWEPT.

THE village of Tottenham, Ont., was subjected to almost total destruction by fire on Tuesday. About 3 o'clock in the afternoon the flames broke out in McKinney's foundry, in the south-easterly part of the village, and, as a strong south-westerly wind was blowing at the time, the flames spread rapidly towards the east and north. Everything being so dry, fires started simultaneously in dozens of places, so that while the fire engine was doing good work in one direction scores of places elsewhere were in flames, which spread so rapidly that citizens could do little more than helplessly look on. About 80 buildings were burned, including the foundry, Mercer's store, Potter's block, Lyon's shop, Verney & Co.'s furniture rooms, Sanford's drug store, and the Methodist church. The loss is estimated at \$125,000; amount of insurance not yet known. Allandale sent down a fire engine, which did good work. A large number of Beeton and Alliston citizens came over with a quantity of hose, which was badly needed, also some 300 volunteers from the camp in Beeton came on a special train, and all, citizens and soldiers, worked like Trojans, and to their unsparing efforts may be attributed the fact that even so much of the town was saved.

On the list of business places burned are: D. McKinney, foundry; D. C. Fraser, shoe-

maker; W. & C. Brown, woolen store; T. G. Wolfe, two implement shops; P. Garrity, pumpmaker; J. A. Mercer, flour and feed; J. V. Childs, woodworker; J. C. Anderson, blacksmith; D. Martin, bake shop; J. Henderson, shoemaker; W. Dillane, barber; J. Riddell, shoemaker; Verney & Co., furniture; F. Brawley, blacksmith; W. H. Sanford, druggist; H. Stone, insurance agent; J. Anderson, butcher; S. Windsor, shoemaker; T. J. Turner, tailor; T. Moffatt, factory.

Besides these a number of dwellings were destroyed and several other places of business were damaged by the flames.

PERSONAL MENTION.

W. H. Gillard, of Hamilton, left on Thursday last for a trip to British Columbia. Mr. Gillard intends taking in all places of interest en route and returning by way of San Francisco.

Mr. H. C. Beckett, of Hamilton, has just returned from a most enjoyable trip to Port Arthur, where he says his old friends entertained him right royally. He reports business in that district in a healthy shape—and the fishing excellent.

Mr. J. D. Roberts, of the Pure Gold Manufacturing Co., Toronto, left on Monday's steamer for Montreal, where he will

spend some days, and will sail on July 3rd for Liverpool to spend a few weeks in the old land in search of health and recreation. While there he will endeavor to institute a Pure Gold agency in London, Eng. In his absence Mr. Anderson will take over his duties.

EARLY SHOPPING AND CLOSING.

It is as easy, says The Toronto Telegram, for each one of the two hundred thousand people to resolve to shop early as it is for each one of two hundred merchants to close early.

Each individual's share in the mental labor of forming a resolution which will govern the actions of two hundred thousand people, is no heavier than each individual's share in the labor of reaching a resolution which will close two hundred stores.

The early shopping habit will not become universal until the world is nearer the millennium than it is now. But if early shopping should become general, the change will supply the advocates of early closing with their strongest argument.

It is all right to say that if the merchants close the stores the people would learn to shop early, but when the people shop early the merchants will learn to close the stores.

PEANUTS.

THE same causes that have produced the advance in cotton and wheat, remarks The New York Journal of Commerce, are said to have been at the bottom of the recent improvement in peanuts. Prices had reached about the lowest point on record this spring, but a turn has come, and within a comparatively short period the quotations have been twice advanced, each time a quarter of a cent. However, present prices are still about a cent per pound below the figure ruling at this time a year ago. The decline set in last fall when it was found that the crop of 1894 was fully a million bags in excess of that of the preceding year, when the yield amounted to 2,000,000 bags. The general commercial depression affected sales seriously, and the demand during the fall and winter months was below the average, leaving on hand a supply of new nuts which, in conjunction with the stock carried over, gave a supply which, under ordinary conditions, would be in excess of probable requirements up to the time of marketing the 1895 crop. The continuous decline, resulting from this state of affairs, discouraged growers, and they made preparations for this spring's planting in a half-hearted manner. The acreage under cultivation in Virginia was much curtailed. Cold rains at

the time of planting and some time thereafter were reported to have caused a good deal of the seed to rot in the ground, some estimates placing the probable loss from this cause at least a third. Next week the farmers will plant again, and under favorable conditions the estimated loss from bad weather may be made up.

The reported unfavorable crop prospects have attracted speculative interest to peanuts, and the principal dealers in all parts of the country have been quietly securing such stock as they could obtain on favorable terms. It is also stated that some of the larger Virginia growers have been buyers. The upward movement has, also, stimulated the consuming demand. There is said to be quite a large stock in Virginia, the bulk of which, however, consists of old goods, some of it having been carried for two or three years.

A good deal of speculative interest has been manifested in Spanish and Virginia shelled, and it is intimated that an effort is making to corner supplies. In fact, the stock of the former is now pretty closely controlled, two strong holders being credited with having the bulk, if not all of it. Last year at this time the stock of Spanish shelled aggregated about 45,000 bags, while today's visible supply is estimated at not over 12,000.

IN MEMORY OF CABOT.

"John Cabot," remarks The Canadian Gazette, "is at last to have his due. Next year will be the quadri-centennial of his discovery of the North American continent, and Canadians mean to make the occasion one for national rejoicing. At the Chicago Fair, they say, nothing but the Columbian discovery was thought of, and it is now Canada's turn to show that the real discoverers of America were the Genoese-Bristol adventurer and his sons. Seeing that Cabot landed at Bonavista, in Newfoundland, it seems rather a far cry to hold the celebration at Toronto, in the heart of the continent—as is, we see, proposed; but, wherever held, the occasion should be made one for hearty co-operation. Perhaps a Cartier celebration could be combined with it. Canada owed far more to Cartier and those brave French adventurers who followed him than to John Cabot and his West County pirate-traders."

The excessive drain of whitefish and pickerel fry from the Detroit river, for use in stocking waters in the Maritime Provinces and elsewhere, and Government hatcheries, has given rise to a protest by the Essex County Council. It will represent to the Fisheries Department that few of these eggs reach maturity, and request that steps be taken to practically demonstrate the truth of this assertion.

Abraham Lincoln once said:

“You can fool some people all the time, you can fool all the people sometimes, but you can't fool all the people all the time.”

Your regular customers may upon your recommendation accept inferior matches “just to try,” or because it is a cent or two cheaper.

The chances are they will be fooled.

E. B. Eddy's Matches have sustained and added to their reputation—not by putting forth good matches at spasmodic intervals, but by offering matches always serviceable in use, unvarying in good quality, and moderate in price.

Don't fool your customers and you won't be fooled.

TRADE CHAT.

SPECULATIVE purchases, based upon short supplies, have pushed up prices of tapioca abroad, and the market is still advancing.

England imports \$5,000,000 worth of potatoes every year.

Belleville merchants have granted a Friday half holiday to their employees.

The Burrard Inlet Red Cedar Lumber Co. have opened a lumber yard at Oak Bay, B.C.

Mr. Henderson, tinsmith, Mount Brydges, is building a fine dwelling adjoining his store.

When you go gunning for frauds be sure you are at the right end of the gun when it goes off.

An application was made in court last Thursday to quash the Winnipeg early closing by-law.

L. MacAlpine's general stock at Lockport, N.S., was burned on the 15th inst. Insurance \$2,000.

Berlin has a mysterious new malady which Prof. Virchow attributes to the use of milk from diseased cows.

An electric railway, eight miles in length, connects Fort William and Port Arthur. The fare is 5 cents.

Grocer Hogarth, of Norwich, Ont., lost \$200 by fire on June 14th. Fortunately he carried \$1,000 insurance.

Last Thursday a new creamery building at Shoal Lake, Man., was destroyed by fire. Loss \$8,000; insurance \$4,000.

J. F. Philbin, a Rat Portage (Ont.) baker, was found dead on Friday, death being the result of tripping over a live electric wire.

The funeral of Wm. Dempster, of Gananoque, took place Saturday. He was well-known to the cattle people between Toronto and Montreal.

Mr. Craig, the horticulturist at the Experimental Farm, thinks that Canadian tomatoes could be placed with profit on the London market.

Chicago's proposal to lower the level of the great lakes in order that she may float her sewage away is just like Chicago. She doesn't want the earth. The water will do.

The funeral of Ald. Daniel B. Ouellette, of Windsor, Ont., was one of the largest ever seen in that city. Nearly every business place in Windsor was represented by one or more persons.

The California fruit crop has increased seven-fold in ten years and its value, last year, was fifty million dollars, or ten million dollars more than that of the gold mined in that state.

It is reported from British Columbia that lobsters, mackerel, herring and sardines are

more plentiful this year than last, and the Atlantic seal fishery has resulted in an increase of 117,237 skins in the take.

"Why don't you wind that clock and set it going?" asked a bad customer at a country grocery store. "That clock is a sign," said the grocer, and the customer studied it out for himself before he left the store.

The Newfoundland Government propose wholesale retrenchment by cutting all salaries from 10 to 20 per cent., and to reduce appropriations to the extent of \$486,000 within a year. Duties will be increased.

Col. Tisdale's bill to amend the Act incorporating the St. Clair and Erie ship canal which gives it power to increase its bonding limit from \$5,000,000 to \$8,000,000 has passed the House Railway Committee at Ottawa.

A business house in Nelson, B.C., last week took a \$10 bill of the Imperial Bank of Canada. On its back the following words were written: "Beware of fast women and strong drink. This is the last of a large fortune."

The California orange crop this year amounted to 5,300 carloads, 50 carloads being the average daily shipments. That is a pretty lively infant industry for a state that a few years ago scarcely raised enough oranges to supply its own needs.

The "Soo" Canal is not open and not likely to be for some time yet, perhaps not before August. The dredging and blasting of boulders is still going on. There are still defects in the opening gear of the locks to remedy.

Henry Arkell, postmaster at Aylmer, Ont., is dead, aged 70. When at Port Stanley deceased carried on an extensive shipping and mercantile business. Retiring, he became postmaster there. He was a friend of Sir John Macdonald.

By the provisions of the will of Hiram Walker, Mayor H. A. Walker, of Walkerville, will become owner of the Labadie farm above Walkerville. E. C. Walker will become owner of the Essex farm of 15,000 acres, worth many thousand dollars.

The bakers of Union Mines advanced the price of bread June 1 to 14 loaves for a dollar. The bakers of Victoria and other British Columbia cities have, it is said, not yet increased their rates in sympathy with the price of flour.

Mr. J. A. Proctor, barrister, Toronto, has been appointed by the Ontario Government to the position of official arbitrator of the city of Toronto, and Mr. J. S. Withrow has been appointed official assessor to the arbitrator's court.

One of the Newfoundland Government's retrenchment proposals is the abolition of the Allan Line ocean mails between Philadelphia, Halifax, St. John's and Liverpool, and the substitution therefor of a special

service between St. John's, Halifax and Boston by local steamers. This, it is estimated, will effect a saving of \$25,000, and will largely increase the trade between Newfoundland and New England. This new scheme is said to be approved of by business people on the island.

John Spencer, the man who was charged with setting fire to Creighton's block, Owen Sound, Ont., causing damage to the extent of about \$4,000, some time ago, pleaded guilty, and was sentenced by Judge Creasor to 14 years in Kingston Penitentiary.

Mr. Geo. A. Stimson, the Toronto debenture broker, has just purchased the \$12,800 town of Tilsonburg bonds. They bear 5 per cent. interest, and mature in 1915. It is said that the premium paid was the largest the town ever got for its bonds.

It is rumoured that a cold storage factory on a large scale will soon be started in town, and that a local medical man, who intends to accept the honor of president, this morning received the first consignment of the stock which will be preserved.—Galt Reformer.

SOLID BACK BRUSHES.

An improvement in brushes, which is becoming more and more appreciated as it becomes known, is the "Solid Back," manufactured by Charles Boeckh & Sons. It is used in scrubbing brushes, in stove and shoe brushes, as well as in horse and dandy brushes of all kinds, and it makes not only a very handsome and saleable brush, but the back being dovetailed into a solid block, it cannot warp or become detached as in the old style of tacked or screwed backs.

These goods are manufactured only by this firm, they having obtained letters patent for said improvement, and their name and brand is a sufficient guarantee that the goods are right in quality, and sold at the right price, that is, as low as is possibly consistent with good quality and workmanship.

The trade will serve their own interests by handling these goods, as their customers are sure of getting good satisfaction and full value for their money.

U. S. GRAIN CROP.

The Washington Government estimate for winter wheat is higher than most in the trade expected, due to the favorable position on the Pacific Coast, but the average condition is a low one, 71.1 per cent., and not likely to prove much if any better than this in the ultimate reckoning. The spring wheat condition is high, averaging 97.8. The official figures suggest a promise of about 245,000,000 bushels for the winter grain, and 175,000,000 for spring, or a total of about 420,000,000 bushels.

DOMINION COUNTER SCALE

With Patent Automatic Scoop Balance

Simple in construction Nothing complicated or liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long,
11 in. wide.

Nickel-plated Beam, Poises and Scoop Balance. Double Beam, marked on both sides. The Automatic Scoop Balance is now offered for the first time, and every grocer who uses it will find it a great saving in time, and it will also obviate liability to error. When scoop is placed on the platform, the ball on back end of beam automatically rolls to the right, thus balancing scale with scoop on, and when scoop is taken off scale, the ball rolls to the left, balancing scale without scoop. Scale with this latest device is assuredly the most complete and desirable scale for general use in the market.

Manufactured exclusively by

OIL STORING.

By SCOTT MCKERROW.

THERE are many things in the everyday life of the retail hardware man that do not tend to make "his lot a happy one."

The handling and storing of oils and varnishes is perhaps the biggest thorn in his side for several reasons, viz: It is dirty and nasty to handle. Loss by evaporation and leakage makes a big item (when it can be estimated, which is seldom) on the wrong side of profit and loss account. The accumulation of drippings makes an almost uncontrollable start for a fire in the accidental falling of an ignited match.

How often have you decorated your clothes and "barked" your shins climbing over barrels to get at "Damar varnish" that comes in gulps from its ventless can? How often have you wished that coal oil was never heard of, as with aching arms you pumped it from barrel to tank, meanwhile calculating how much you are going to lose on the lot? How often has your clerk (you never did) left the tap half closed, and the profits were soon "spreading themselves"? Oh, I've been there!

Presumably it was with a memory of these experiences vividly impressed on them that caused Messrs. Robertson & McKay, Ingersoll, in building their new store to carefully enquire for a solution of the difficulty, and which, for the benefit of their suffering hardware brethren, I give in detail.

Tanks of ninety gallons' capacity are let in from the floor above, running down straight half-way, and then tapering four-square to a point. The advantage of this will be seen at once in not allowing any sediment to gather, as the feed pipes are attached at this point. Also at this elevation oils are easily kept warm in winter, thereby preventing their thickening.

Above, each tank has a separate trap door, below which is the intake pipe, having an outside cup, so to speak, which is filled with water, so that when the cap is placed over the mouth of the pipe it becomes "air tight." Each cap has a pet cock, to give the tanks vent, or to shut tight for coal oil and turpentine. In the intervening space between the base of the tanks and the fawcets shelves for the storing of prepared paints and five-gallon tanks for expensive varnishes, etc., are placed.

Fawcets only take up quarter the space of tanks, supply pipes are therefore run diagonally, the thinner oils occupying tanks furthest away. Below said taps is a tray "V" shaped, sloping towards the wall, and in the end of the tray a hole is made to allow the drainings to run into a square vessel placed in the cellar below. Similar traps are supplied above, on which a barrel

is rolled. The oil does the rest. They have also iron gratings to stand measures on.

The tanks are made of galvanized iron, cased in 1½ inch pine, and covered with ash and varnished, and behold in this arrangement you have oil storing which is, to the majority, a vexation and an eye sore, converted into a compact, ornamental and economical branch of our industry.

I understand that Messrs. Sanderson Percy & Co. have tanks similar to above in use, and merchants who realize the value of proper oil storing cannot do better than see these when in Toronto. And I am sure that the above renowned firm will gladly do all they can to put the handling of oils and varnishes on a more economical and pleasant basis.

BARBADOES SUGAR.

THE New York Journal of Commerce prints a very interesting Associated Press despatch on the Barbadoes sugar trade. The item is dated Barbadoes, W. I., and says: "The West Indian sugar trade is now passing through a serious crisis. In Barbadoes the crop which is being reaped is very far below the average yield—some of the plantations yielding less than half the return obtained in former years. The result is that a large number of estates are in the hands of the official assignee, in chancery, and the number is being daily increased.

With very few exceptions the class of sugar manufactured here is a very ordinary muscovado, and as the ruling market prices here of late have averaged \$1.50 for hogsheads and \$1.60 for bags, a short crop was all that was required to give the death blow to many whose sole interests were wound up in the sugar trade. That short crop has come this year, few of the estates obtaining a yield of two hogsheads to the acre, and which means less than working expenses. Many of the planters had obtained advances in cash against the present year's crop, and as that is generally throughout the colony a failure, a large number of estates have been put into chancery.

The present deplorable condition of affairs is generally accepted as only the beginning of the end. The outlook is indeed gloomy. The colony is over-populated; money is scarce; the number of unemployed alarmingly great, and where employment can be obtained the remuneration is small. The seriousness of the situation will be readily understood when it is stated that agricultural laboringmen are being engaged at 20 cents and women at 12 cents per day, with thousands of both sexes unable to find employment at even these rates.

It is the general opinion that the colony is only now entering upon the more critical stages of trade stagnation and distress, and

what the outcome of these may be it is difficult to anticipate.

The Government of Barbadoes appears to be alive to the importance of the situation and have taken the initiatory steps for assisting emigration and have dispatched commissioners to inspect several of the neighboring colonies in connection with a Government scheme of colonization.

Advices from St. Lucia and Trinidad report the abandonment of a large number of estates in these colonies formerly manufacturing muscovado sugar.

At Antigua, Dominica, St. Kitts, St. Vincent and generally through the islands of the Greater and Lesser Antilles the same unsatisfactory state of affairs exists, and the position is accepted as being purely one of "the survival of the fittest."

In some of the islands public meetings have been held and the situation discussed. Resolutions have been adopted for transmitting to the Right Hon. Secretary of State for the Colonies calling attention to the imminent ruin of the sugar industry in the British West Indies, and praying for the intervention of the Imperial Government to avert the impending ruin of the West Indian staple industry.

The Secretary of State for the Colonies has been asked to approach France and Germany with a view to their withdrawing their system of bounties to the growers of beet sugar, and, failing in this, that the British Government impose a duty upon all sugars imported into England from bounty-fed countries. The petitioners have pointed out that the planters in the British West Indies were driven out of the English markets, being unable to compete with the bounty-fed sugars and the heavy charges for freights, etc., to England, as compared with those to the United States; that in the latter markets, since the formation of the American Sugar Trust, they have been compelled to deal with one customer—an erratic one at that—and are compelled to accept the prices offered by "that customer."

If the British West Indian Islands are to retain even a modicum of the prestige they formerly enjoyed as sugar producing colonies of England something practical must be done, and that speedily.

BUSINESS CHANGES.**DIFFICULTIES, ASSIGNMENTS, COMPROMISES**

JEREMIE MORAND, grocer and baker, Charlesbourg, Que., is offering 50c. cash.

S. Z. Labœuf, grocer, Montreal, has assigned to Chas. Desmarteau.

L. McKinnon, grocer, St. William's, Ont., has assigned to Robt. Steven.

Hugh Loveless, tobacconist, London, Ont., is offering to compromise.

Geo. W. Holdenby, general store, Islington, Ont., has assigned to Alex. Fleming, Toronto.

C. & M. Mills, Iroquois, Ont., are general merchants, and they have compromised at 50c. cash.

H. Legault has assigned to Bilodeau & Renaud. He has been running a grocery business in the city of Montreal.

SALES MADE AND PENDING.

The general stock of Moise Duguay, Gentilly, Que., has been sold at 60c.

The sheriff is advertising the general stock of Alfred Jackson, Thornhill, N.W.T.

J. W. Moore & Co., grocers, Peterboro', are advertising their business for sale.

The general stock of A. Daoust, Jr., Ste. Timothe, Que., has been sold at 50c.

The grocery stock of Hugh McReavy, Montreal, is to be sold by auction on the 25th.

The general stock of Leakey & Co., Calgary, N. W. T., is advertised for sale on the 19th.

The general stock of J. Menzie & Co., Burk's Falls, is to be sold by auction on the 25th inst.

PARTNERSHIPS FORMED AND DISSOLVED.

E. Clermont & Co., have started a general store at Gentilly, Que.

Blouin & Croteau, having a hotel and a grocery at Quebec, have dissolved partnership.

A. Daoust & Co. are a new firm at Ste. Timothe. They will continue the general store formerly run by A. Daoust, Jr.

The B. C. Grocery Co., consisting of George Cunningham, Jr., and Bertha V. Johnston, New Westminster, B.C., have dissolved, the latter retiring.

Henderson Bros., general merchants, Chilliwack, B.C., have dissolved, A. C. Henderson having bought the interest of J. C. Henderson, who will open a grocery and feed store on his own account.

CHANGES.

Mrs. L. E. Gordon, teas, etc., New Westminster, is succeeded by J. H. Woolliams & Co.

Wm. J. Christie, general merchant, Little

Glance Bay, N.S., has had his estate reconveyed to him by the assignee.

W. A. Maguire, grocer, Regina, N.W.T., has been succeeded by H. Armour.

S. K. Colquhoun, general merchant, is removing from Gainsboro', Man., to Hartney.

D. McGillivray, general merchant, Chilliwack, B.C., has been succeeded by Joseph Farr.

Henry J. Crowe is now a partner in the grocery firm of W. E. Crowe & Co., Halifax, N.S.

British Columbia has a new cannery company with a capital of \$100,000; style, "Malcolm & Windsor, Ltd."

FIRES.

British Columbia has been visited with several fires. Among the sufferers are: Costello & McMorran, salmon canners, Steveston; Youdall & Sinclair, grain, and Western Fisheries and Trading Co., New Westminster; B. C. Canning Co., Aberdeen.

DEATHS.

Mrs. M. Rioux, general store, Bic, Que., is dead. So is Wm. McCumber, of Bouchette.

CALIFORNIA RAISINS.

Messrs. A. P. Tippet & Co., of Montreal and Toronto, are sending out the following circular to the trade in regard to California raisins:

The California loose muscatel raisin has become a distinct factor in the Canadian market, the poor quality of Valencia fruit, combined with low prices for Californias last year, having brought the latter into prominence and shown Canadian buyers what excellent qualities they possess. The coming season will, without doubt, witness a very largely increased consumption of California fruit, more particularly as the present prospects all indicate a good yield. Representing, as we do, the largest handlers and shippers in California, as well as the oldest house in the trade, we shall be able to give our customers the best value with absolutely reliable brands—those of the Griffin & Skelley Co.—which are already so well known to the trade and stand at the very top of the list throughout the United States, where best known. Many poor raisins were shipped from the coast and dumped both in Chicago and New York, but such goods were invariably shipped by the smaller dealers and packers, and fortunately but few reached Canada. The Griffin & Skelley Co. never put their name on fruit below 3 crowns, nor that will not stand the closest inspection, nor on second crop goods. We are prepared to make contracts for "first shipments" of new crop as usual. In '94 fruit we can still offer a few 3 and 4 crown

goods, but the supply of standard goods of reliable quality will barely last until new fruit is ready.

A source of satisfaction must it be to the sound money people of the United States to learn that the free silver advocates in the new Congress are well in the minority. But then, the United States Congressman is an uncertain quantity, and the silver kings have much money.

THE NAVEL ORANGE.

THERE have been more navel oranges in the market this winter than ever before, says Chicago Grocer. The fruit is doubtless gaining in popularity, the flavor being exceptionally fine, though the skin is much thicker than that of the Indian river orange. Inasmuch as all sorts of theories are in circulation as to the origin of the variety, a few words of accurate information on the subject may not be amiss.

To begin with, the first navel orange was doubtless a freak or "sport," as horticulturists say. To make such a fruit by artifice would be impossible, according to The Washington Star. It is abnormal, even in the bud. The navel shows in the bud as early as the latter can be examined under the microscope. It may even be traced back to the flower, which is double—though that word does not express the idea very well—each blossom having a secondary blossom within it. In the developed fruit the navel is itself a secondary orange, in some specimens having a distinct skin surrounding it.

This two-story orange is no novelty. A book on horticulture, published in 1642, gives a picture of a navel orange, and calls it "pomum Adami foetum." This is the earliest reference known. The blossoms rarely have any pollen, and the fruit is usually, though not always, seedless. The variety is reproduced by budding. Where it originated is not known with certainty, but it was probably in Southern Asia. Thence it was brought to the region of the Mediterranean, and eventually diffused over the world. A lady, who had traveled in Brazil, told Mr. Saunders, chief gardener of the Department of Agriculture, about the orange, which she had seen in that country. Acting on this information, Mr. Saunders told a Star reporter that he sent to Bahia and secured a dozen young budded trees. These reached the United States in 1870, being the first navel orange trees known here.

From these trees others were propagated. One of the first batch thus obtained is now in the orange house of the Department of Agriculture. In 1873 two of the trees were sent to Mrs. L. C. Tibbetts, of Riverside, Cal. At the same time others were sent to Florida. But those planted in California fruited more quickly, and were the first to attract attention. It soon became evident that the climate of that state was better suited to the cultivation of this variety. In Florida it is not sufficiently productive—i.e., does not bear freely enough to be profitable. Nevertheless, the finest navel oranges come from Florida, though they are not so handsome as those from California.

First Employer—I hear you have yielded to the demand for eight hours' work at ten hours' pay. How can you afford it?

Second Employer—You see, my men promised to work, while they are at it, instead of standing around and chaffing about capital and labor.

TANGLEFOOT

SEALED

... STICKY FLY PAPER ...

"Little" Tanglefoot

5¼ x 9 inches.

Particularly adapted
for Show Windows and
Fine Rooms. . . .

25 Double Sheets in a
box, 15 boxes in a case.

Retails for 30 cts. a box
Costs \$2.50 per case

PROFIT Eighty per cent.

—
WILL BE A GOOD SELLER

ALL TANGLEFOOT is now made with the New Corrugated Border. This Border is an improvement on any of its predecessors—it restrains the sticky composition more securely, it opens more readily, and remains on the sheet. Always acts the same under all conditions. It is the perfection of Borders. (Patented Feb. 19, 1895.)

THE CANADIAN GROCER

Vol. IX. (Published Weekly)

TORONTO AND MONTREAL, JUNE 28, 1895

(\$2.00 per Year) No. 26

DROPS FROM THE EDITOR'S PEN.

Perseverance is the plow which opens up the furrow along which success is to follow.

* * *

Be politic, but not political, in business matters.

* * *

It is the live advertiser who is "in it" these days.

* * *

A bright advertisement denotes a healthy advertiser.

* * *

Renewed tenure of life is relaxation from business cares.

* * *

The advertising dodger is about as unreliable as the artful dodger.

* * *

Push, perseverance and policy are the three "p's" of success in business.

* * *

It is the studious clerk that becomes the merchant with a stupendous business.

* * *

Business is not a lottery: it is an arena where those who would win must fight.

* * *

Money makes the mare go, but it requires push, as well as money, to make business go.

* * *

Many of our desires go ungratified because we do not will to go and appropriate them.

* * *

"Cleanliness is next to Godliness." This applies to the store as well as to the individual.

* * *

Cobwebs in the store and mustard in the wheat field have their origin in one cause—laziness.

* * *

The ancient Lacedæmonians must have been pushing business men. Lycurgus compelled them to use iron money, in order

that its weight might deter them from over-much trading; and all the rulers who would put barriers in the way of trade are not dead yet.

* * *

Politics and religion are strange bedfellows, but they often sleep together on the same couch.

* * *

Good times are coming. But it is just as well not to go to sleep. They may pass before you wake.

* * *

The man who tries to go through business with slipshod methods usually finds that business goes through him.

* * *

"A salesman should be trained" remarks a contemporary. Where he is not, trade will be maimed, that is sure.

* * *

Several New York grocers have had their push-carts stolen lately. An abnormal development of "push" evidently.

* * *

Those who cannot see an improvement in the trade of the country must have their eye to the wrong end of the telescope.

* * *

The mosquito bores for blood and the merchant for business. The latter should not, however, like the former, be a "bore."

* * *

The whiteness of the fields does not necessarily mean that they are white unto the harvest. It means they have a large crop of daisies.

* * *

An enterprising Yankee has begun the evaporation of potatoes. It remains to be seen whether his capital will evaporate or not.

* * *

The Dominion Agriculture Department has been notified that the medals of award for the World's Columbian Exposition are expected to be ready about the latter part of

August. There is evidently, then, a glimmer of hope that the children of the winners of these awards will yet receive the fruits of their fathers' prowess.

* * *

It is well to give the store the appearance of life whether business be good or bad. A dead store is almost as repulsive as a dead man.

* * *

It is the young man who has faith in himself, and possesses the industry to make the best out of his ability, who makes business a success.

* * *

A Philadelphia grocer has substituted female for male clerks. This is a case where the male went. It is well to have a mail that will go.

* * *

Because a pleasant countenance fails to thaw all frigid customers, it is no reason why the pleasant countenance should go down behind a cloud.

* * *

Merchants who cannot see the advantage of saving the discounts are not necessarily color blind. The seat of their trouble is in their appreciative faculties.

* * *

It may not be like locking the stable door after the horse is stolen to stop extravagance when necessity compels it, but it is a very near relation to it, at any rate.

* * *

Political questions will now have to give way to educational questions, and legislation of import to business men's and still less chance of receiving attention.

* * *

It is not by giving the coffee mill a few turns, or wrapping a pound of sugar, that a young man becomes a grocer. It takes years of hard work and hard thinking.

* * *

A contemporary desires the address of every grocer "who wants to do a cash business." They all want to do a cash business, but the question with them is—How?

H. LAPORTE.

THE activity and prosperity of the French Canadian element in the commercial life of Montreal have formed a prominent feature of business there in the last ten years. In the wholesale trade especially they have made great advances. Their leading men have not only done well individually, but through the organization of the *Chambre de Commerce* they have become a decided force and influence as a body.

The Canadians of French origin possess all the requirements of success in business. They are industrious, energetic, intelligent, readily acquire both languages, and possess, as a rule, kindly and courteous manners. A typical French Canadian merchant is Mr. H. Laporte, of Laporte, Martin & Cie. He is still young, only about 45 years of age, and is at the head of a large and successful wholesale grocery firm. He was born at Lachine, where his parents resided at that time, and, as they were not wealthy, his own efforts were required to gain position and means. He left school at 15, and struck out for himself. Desiring to get more education than school-boys of that age usually acquire, he attended night school classes for some time. Here he got instruction in the English language, and in order to increase this knowledge became a diligent reader, as so many of his fellow-Canadians are, of the English papers. He made it a rule to read them first and the French papers second. This is a capital method of familiarizing one's self with another language. As the years went by Mr. Laporte was brought more and more into contact with his English fellow-citizens, and now speaks the language well, with an accent, it is true, but correctly and fluently. For a number of years he was in the retail grocery business, learning thoroughly the practical details of a merchant's career, and acquiring knowledge of goods and prices. For fourteen years he has engaged in the wholesale trade, and is the senior partner in the firm. His leisure is fully employed. He has always taken a great interest in all political and municipal contests, and has served repeatedly as president and vice-president of organizations interested in such work.

He is a member of the Board of Trade. He is the president of *L'Alliance Nationale*, the society insurance organization which in two years has grown to a membership of 3,000, with 81 branches throughout Quebec. The society is now seeking incorporation over the whole Dominion from Parliament, having thus far confined its efforts to one province. He is a director of the *Monument National* and vice-president and director of the *Washington Trust Company*. He is

H. LAPORTE,
PRESIDENT LA CHAMBRE DE COMMERCE, MONTREAL.

also a director of the new Imperial Brush Company, and belongs to the Good Government Association of Montreal.

Mr. Laporte's connection with the *Chambre de Commerce*, of which he has been for two years the president, dates from its formation in 1887, he having been one of the original promoters, serving since 1888 as a member of the council, then as vice-president for two years, and latterly as president. Mr. Laporte has taken a warm interest in the excellent work done by the *Chambre* for promoting trade. Its latest achievement, the preparation of a valuable report on the possibilities of trade with France under the new Treaty, had his hearty support, as he

believed that before urging the appointment of a commercial deputation to France, it would be better first to have a ground work of knowledge to proceed upon.

HE'S A SOLDIER, TOO.

C. A. Smylie, of Young & Smylie, the American licorice manufacturers, who has made himself deservedly popular in Canada during his semi-annual trips in the interests of his firm, devotes his spare time to military matters. He commands a company in the 12th Regiment, New York. That he is as successful there as in business is proven by the report of the annual inspection of his regiment, which appeared in a recent issue of the "*Army and Naval Journal*." It specially refers to the creditable condition in which the Inspector-General found Capt. Smylie's company, which obtained 100 per cent. of the points. The 12th is looked upon as the most reliable regiment in New York. It is always the first ordered out, and is always given the hardest work to do in riots, strikes, etc. It is so thoroughly disciplined that it is more like a regular than a militia regiment.

The master bakers and bread drivers of Montreal hold their annual picnic at Ormstown early in July.

Mr. and Mrs. W. H. Gillard, of Hamilton, Ont., have gone to Port Arthur, where Mrs. Gillard is the guest of Mrs. George Marks, Mr. Gillard going on to Vancouver and Victoria, returning by Tacoma, Portland, San Francisco, Ogden, Denver, Salt Lake City and Chicago.

FINANCIAL OUTLOOK.

THE address of President Byron E. Walker at the annual meeting of the Canadian Bank of Commerce shareholders has an interesting bearing on the present financial situation of this country and the neighboring republic. Among other things Mr. Walker said :

"The activity of the last month or two would seem to indicate that the tide of trade is already rising, but we want many evidences, still lacking, before we are quite convinced of this. One of the most hopeful and significant of the changes between April and June is in the employment of labor. We learn from Bradstreet's that in the United States 227 establishments, closed during the depression, opened up for work, that 53,400 wage-earners obtained work who were before idle, and that the wages of 178,000 employees were advanced. During this period about 36,000 employees joined various strikes, and of these about 25,000 demanded higher wages, but on the whole there has not been serious trouble from that source. The next most significant change has been the improvement in both gross and net railroad earnings. This has already been experienced to a satisfactory degree, but if the tide has really turned a much greater increase will develop during the ensuing year. Excessive competition by railroads may be a very good thing for trade,

but the other result in the shape of inadequate earnings is ruinous to the financial credit of all North America, and indirectly does far more harm than the benefit by competition to trade. There is some ground for hope that the era of free railroad building in the United States, that is, building under a general railroad Act, and without reference to public requirements, may be gradually checked. An Act passed in 1892, in New York state, intended to prevent the paralleling of lines or the building of railroads in localities where they are not required in the public interest, has been in one case actually put into force."

Coming to agricultural interests the president delivered himself thus :—

"I am sorry that for the first time we cannot speak with positive encouragement of the dairy interests of Canada. We have had rapid growth in volume and satisfactory prices for cheese for many years, but it looks as if we are to have something in the nature of a check. Owing to the severe drought of last summer, the shipments, which for the first half were much larger than for the former year, fell off in the last half so that we only scored a total of 147,039,000 lbs., against 146,595,000, with a value of \$14,683,000, against \$14,647,000, a very trifling increase. In the United States a slight increase, the first in some years, is shown, but they evidently still eat nearly all the cheese they make, as the total value of their export was only \$6,609,000. Our success has caused the building of many new cheese factories during the past year, and

in several districts where cheese was not made heretofore. This will ensure a large product, but it will be very disappointing if in these new districts lower prices should bring about discouragement. The farmer did well enough last year, as to price, but the English buyers lost heavily, and still have large stocks of old cheese on hand. We are also destined to meet serious competition from New Zealand. At the moment quotations have recovered somewhat, and the dry weather in England and here may improve the price at the cost of the quantity manufactured. In cheese and pork the farmers must have prospered last year. In almost all other products the experience was very disappointing, but the changes of the last month or two have caused a feeling of great cheerfulness throughout our farming community, notwithstanding the damages by frost and dry weather. In the fruit districts the frost has certainly done very serious damage, but as far as we can learn there is likely to be no such general failure in yield as was at one time feared. Our people, however, are apt to overlook the great money value of the fruit crops in this province as a whole, and the extent to which it exceeds all other agricultural interests in the district specially adapted to fruit-growing. The outlook in this province is not uniformly good, even apart from fruit, frost having done damage to fall wheat and some other crops, but it is too early to form a definite opinion as to the general results of farming in Ontario. At the moment the prospect for hay is not good in many parts, and hay and grass are perhaps our most valuable crops. In Quebec and in the parts of our province which were not advanced too much by the early warm weather, the whole outlook is excellent."

A CURSE AS WELL AS BLESSING.

PARADOXICAL as it may seem, great blessings are sometimes accompanied by great curses. The building of railways and canals is an evidence of this.

Ordinarily the construction of railways and canals tends to benefit the localities through which they run even before they are in operation: There is material to be bought and food for man and beast demanded.

But, unfortunately, in supplying these necessities much evil is wrought to the manufacturers and farmers who supply them.

And the reason is that unbusinesslike and unsafe methods are employed in carrying on the transactions.

Two instances, one of recent and the other of somewhat remote date, will serve to illustrate.

The recent instance had its cause in the construction of the branch of the Toronto, Hamilton and Buffalo railway from Hamilton to Brantford.

The contractors of this line were Americans with much ambition but little money. At any rate, some of those from whom they bought both labor and products got little or no money. The navvies of course could not exist without food, raiment and shelter. As a Hibernian once put it, "God knows you can't work unless you ate." In order, therefore, that their employes might have the necessities the contractors issued scrip

which would be acknowledged on presentation. With this scrip the navvies paid their board, if single, and for their rent, clothing, provisions and other household and personal necessities, if married.

Before the road was finished the contractors failed, with the result that to-day there are large quantities of scrip floating around in search of a resting place, while many retail merchants are unable to collect accounts due them, boarding-house keepers are bemoaning scores of unpaid board bills, and employes are lamenting unpaid salaries. Some of the scrip is being taken by speculators at 50 cents on the dollar, it is said.

The other and remote instance is the construction of the Welland Canal. There, on account of the loose methods employed, comparatively large numbers of merchants were ruined. One well-known wholesale merchant, who was during that time a traveler, declared to THE CANADIAN GROCER that of all the merchants along the route of the canal that catered to the trade which developed owing to its construction, only one was in business to-day.

The lesson is obvious: Unless merchants can secure payment in the legal tender of the country, they should abstain from catering for a species of trade that has, in both recent and remote periods, wrought so much injury to business communities.

UNHEALTHY SPECULATION IN CHEESE.

With the Englishmen offering limits of 36s. to 37s. for fine June cheese, or about 7¼ to 8c., Montreal, the recent advances in the country prices on the article to those on the outside seem hard to understand. The reason is plain, however, being due, to a very large extent, to short sales.

Toward the end of May several of the large exporting houses in Montreal conceived the idea that June cheese was a sale at 36s. 6d. to 37s. Acting on this belief, they sold short to buyers in Great Britain to a large extent. In fact, some houses are said to be short over 40,000 boxes, so that the aggregate amount must be considerable, possibly 100,000 boxes or so.

Towards the end of the week before last these speculative sellers became frightened, and sent out "best terms" orders to their country agents. In other words, they ordered these agents to buy cheese no matter what they paid for them, and entirely irrespective of what the shippers had sold for.

The result was a prompt advance in the country price, representatives of Montreal houses in the country putting the cost up on themselves. The strange spectacle, therefore, is witnessed of shippers paying over 8c. in the country for cheese which they will have to ship to England at 7¼ and 8c.

Montreal, or, in other words, at a loss of ¼ to ½c. per lb.

Naturally, these tactics have completely unsettled the cheese market, making it difficult for conservative shippers to trade on a legitimate basis.

ONTARIO GROCERS' ASSOCIATION.

We, the undersigned grocers of the city of St. Thomas, think that the time has now arrived when the grocers of Ontario (if not the whole Dominion) should have a national association for the protection of ourselves against the many abuses that exist in the trade, which the grocer only knows, to say nothing of the ones that the public are aware of, such as the farmers' supply stores, Patrons' department stores and bankrupt stocks; also so-called wholesale grocers, who sell doctors, lawyers (their own friends), etc., which is the cream of the trade. We think it desirable, and would suggest, as the best means to the end, that a monster picnic be arranged, to take place at some central point, between Toronto and Windsor, to be held some time in July, and an invitation be extended to all retail grocers and associations, also general storekeepers, from Toronto west to Windsor and Sarnia, to attend.

The above is the preamble to a document which is being circulated for signature among the grocers of St. Thomas, and explains itself.

The object sought is most commendable. It is not bred of any desire to have a "good time," such as will of necessity accrue from the interchange of ideas resultant upon the foregathering of the leading merchants from the cities, towns and villages of the province. There is a cause for it, and this cause is manifold. The abuses cited above are but a fractional part of the whole. Some of the existing abuses are within the power of merchants themselves to remove or ameliorate. To remove others it will be necessary to operate upon the will of others.

The idea of holding a monster picnic is novel, and much good would in all probability result from the same. But for discussing trade questions a picnic is hardly the thing, unless it be a means to an end, and that end a deliberative convention, where there would be nothing present to detract from the subjects under discussion. Have a picnic by all means, but have one or two more days for business pure and simple; and have the place of meeting as central as possible.

If the promoters of the scheme were to confer with business men's associations in other places, they would no doubt receive assistance in the premises.

A SHORT PRUNE CROP EXPECTED

The first authentic advices regarding the new European prune crop were received by a leading commission house in Montreal on Monday last. It was to the effect that everything pointed at present to a crop one-half what it was last year, both in France and Austria.

If this expectation is fulfilled, values are apt to rule higher than they did last season. Of course no quotations have yet been received by importers or commission men in

Canada, and none are expected for a month or so yet. Still, if the Austrian and French crops turn out to be only one-half what they usually are, prices are almost certain to be higher than 11s. 6d., c.i.f., the opening price last season.

MORE LARGE SALES OF SALMON.

MONTREAL jobbers have been free buyers of new pack canned salmon ever since they made up their mind a fortnight ago that they could not secure any better terms by holding off.

In addition to the large sales that we noted for future delivery last week, two further round lots, aggregating 3,000 cases each, have been placed, on the basis of \$4.50 f.o.b. on the Coast.

This makes up the aggregate transactions to over 30,000 cases, at prices ranging from \$4.30 to \$4.50 f.o.b. at point of shipment.

Two agents have done a large share of this business, one of them having sold about 10,000 cases at \$4.30, and the other 15,000 cases at \$4.50, the balance being contributed by one or two other agents.

At this writing there is no fresh news from the Coast, except that one of the leading selling agents still expresses his willingness to book orders at \$4.50, and is said to be doing so.

In consequence of these purchases of new pack salmon at comparatively high prices, the few holders of old pack salmon are now holding their property firm at \$4.75 to \$5 per case on spot in Montreal. Advices from the States are equally firm, one agent showing THE CANADIAN GROCER a letter in which it was stated that some of the Columbia River packers were turning down orders, as they had sold all they cared to at present for future delivery.

"THE GROCER'S" SUGGESTION ADOPTED.

THE CANADIAN GROCER drew attention some weeks ago to the enormous fees made by the grain inspector at Port Arthur, amounting to about \$20,000 a year, and we suggested that immediate steps should be taken to reduce the fees, or to pay the inspector a salary and divert the surplus fees to the revenue of the country.

The Controller of Inland Revenue, Mr. Wood, has evidently taken the hint, for he introduced a bill in the House of Commons this week to amend the present Act and put into effect the suggestion made by THE CANADIAN GROCER. The Act provides that when the fees at any point exceed the amount necessary to pay fair salaries the Governor in Council may make such disposition of the fees in excess as he thinks proper.

EXCITEMENT IN TOMATOES.

Considerable excitement has developed in canned tomatoes on the Toronto market during the last few days.

The cause was a sudden realization of the fact that the commodity was scarce.

At the time of writing the ruling wholesale figure for standard brands is 85c per dozen, but there are some not so well known which can be had at lower prices.

There are, it appears, but one or two packers that have any stock. One of these advanced his price 5c. per dozen to 85c. on Tuesday, and he specifically instructed his Toronto agent to only take that figure when an order for corn was also given. "Unless there is also an order for corn we are not disposed to book orders under 90c," he wrote.

Stocks on the street are light, and four or five houses are understood to have bought at 80c. early on Tuesday. Stocks in Montreal and Hamilton are understood to be in much the same condition as in Toronto.

It will, of course, be September before the new pack will come in. Between this and that some people expect to see one dollar tomatoes, but that extreme bullish view does not find many sympathisers.

LARGE ARRIVALS OF MOLASSES.

There have been some heavy receipts of new crop molasses in Montreal since our last, and nothing illustrates the firmness of the market better than the rapid way in which it has been absorbed and distributed.

The arrivals comprised 2,500 puncheons, ex Sicilia, two other cargoes of 800 puncheons each, and one of 500 puncheons, making 3,800 puncheons in all.

These large lots had not the slightest effect on prices, for the good reason that they were all sold and distributed long before they were loaded on the dock at Montreal.

Among recent important sales of molasses from first hands in Montreal were: 300 puncheons of Barbadoes at 35c., and 400 puncheons of Porto Rico at 34c. In single puncheons no Barbadoes can now be had under 37c., and Porto Rico, 38c.

EGG CHANCES IN NEW ENGLAND.

The fact that the duty on eggs imported into the United States has been reduced to 3c. per dozen is attracting attention from egg dealers in Montreal.

The egg market in Canada this spring has worked along slowly on the basis of 10 to 10½c. spot Montreal, and the chief demand has been on local account, for the exports to Great Britain have been a bagatelle. It is expected, therefore, that this reduction in the American duty will benefit the egg market, as it will lead to demand from the

eastern American market. In fact, the impression seems to prevail that both in eggs and poultry Canadian dealers will be expected to supply considerable wants in the New England States this season.

This is the light in which The Boston Herald looks at the matter, and it is a good authority.

THE PREMIER AND NEWFOUNDLAND.

DURING a brief speech in the Senate last week, Sir Mackenzie Bowell, the

Premier, dwelt upon the recent negotiations for the union of the Dominion and Newfoundland, and, in terms whose meaning there was no chance of mistaking, he animadverted upon the trade advantages that would accrue to Canada with the consummation of this union.

It is well. The Premier is evidently a stronger advocate of the union than a good many supposed. But why was he not a more ardent champion of the idea when the prospect for its consummation was more auspicious than it is at the moment? The price that Canada was asked to pay was undoubtedly the wet blanket that dampened his ardor. It should not, however, have obscured his business acumen.

Reading between the lines of Sir Mackenzie's recent speech on the subject, a suspicion arises that he now regrets the turn the negotiations took, although he, of course, does not acknowledge as much. He evidently thought that the Newfoundlanders were so anxious to enter Confederation that they would soon be hurrying back with amended terms more favorable to Canada.

Where the Dominion Government erred was in the imperative manner in which it declined to entertain the propositions of the Newfoundland delegates.

Deficient as it is in the business sense, it should first have consulted the business men of the country. Had it done so, it is safe venturing that negotiations, instead of being broken, would at least be in a pending condition.

For proof of this it is only necessary to refer to the opinions of the leading merchants of the country as voiced in the columns of THE CANADIAN GROCER.

Fifteen millions is undoubtedly a great deal to pay for the privilege of taking a new province into the Dominion. but, as this journal has already pointed out, it is cheap when we consider the money we are paying in steamship subsidies in order to induce trade with countries thousands of miles away.

In purchasing Newfoundland we would be securing a permanent customer for our products, and a customer which would naturally improve when affiliated with the Dominion, while our trade with foreign countries, and even with our sister colonies, will naturally be more or less fickle.

It is to be hoped the Premier's ardor will lead him to reopen negotiations with the colony down by the sea.

INDIAN AND CEYLON TEA.

THE development of trade in Indian and Ceylon teas is an interesting subject, and the study of it has been made all the more interesting, because less arduous, by the diagrams which have from time to time been furnished by Gow, Wilson & Stanton, of London, England.

Another of these interesting diagrams has just been issued, an advance sheet of which is now before us.

This diagram shows the Indian and Ceylon tea taken by countries outside the United Kingdom during each of the past five years. The diagrams, which are colored, show the quantities thus taken to be as follows: 1890, 13,400,000 lbs.; 1891, 19,100,000 lbs.; 1892, 19,300,000 lbs.; 1893, 27,000 lbs.; 1894, 28,400,000 lbs. The diagrams are in two colors, red blocks representing India, and yellow, Ceylon tea. Each block represents 100,000 lbs. of tea. Last year Canada had eight blocks of Indian tea to her credit and eleven blocks of Ceylon, against eight blocks of each respectively last year and six and two in 1890.

The approximate quantities, in pounds, of British grown tea used outside the United Kingdom last year, together with that of 1893, were as follows:

	1894	1893.
Australasia	12,300,000	13,200,000
United States.....	3,300,000	2,500,000
Turkey and Persia	4,300,000	4,200,000
Canada	1,900,000	1,600,000
Russia and Germany	2,500,000	2,000,000
Other places	4,100,000	3,500,000
Total.....	28,400,000	27,000,000

The most striking result shown is the rapidity with which the demand for Indian and Ceylon tea is increasing in Australasia. In these colonies the annual consumption of tea aggregates about 30,000,000 pounds, or 7.66 pounds per head of population. Five years ago India and Ceylon contributed some 25 per cent., while at the present time they supply about 45 per cent of the total consumption.

Tea culture in India has a history of over 50 years, and has never been attacked by any serious blight. Its production has continued to increase until at present about 380,000 acres are under tea culture, and a capital of some \$75,000,000 is embarked in the enterprise. The coming crop is estimated at 140,000,000 pounds. In Ceylon, although the industry only dates back some 15 years, its progress has been so rapid that about 280,000 acres are at present under tea while the capital invested is in the neighborhood of \$55,000,000. The next crop is estimated at 91,000,000 pounds.

LARGE SALES OF SALMON IN ENGLAND.

According to advices by wire received by several agents in Montreal on Tuesday last, representatives of English houses have

largely increased their purchases of canned salmon during the past few days.

This is not only the case on British Columbia but on the Columbia river as well, and the belief is expressed that it would not be surprising if canners quotations were withdrawn if the demand keeps up.

NEW MONING AND INDIAN TEAS.

New season's teas are continuing to arrive, or at least the samples of them.

This week samples of Moning Congous and Indian teas are to hand.

Not many of the former are offering, either on this market or in the United States, on account of their high price, especially of the finer kinds, values having been appreciated by the keen demand which is being experienced on Russian account. The quality of the Monings shown is generally accounted to be nice.

The Indian teas shown are of medium quality, but they are not receiving much attention. They are good liquoring teas.

BREAK IN THE COTTON COMBINE.

The report current, as mentioned in last week's issue, that the Montmorency Cotton Company will withdraw from the Canadian Cotton Combine at the end of the period of agreement, August 31st, is correct enough, so far as it goes. The company have issued a circular to the trade that they will be prepared to furnish goods on their own account after September 1st.

The Montmorency mill has hitherto been making exclusively for the Chinese trade, and its output of grey cottons has not increased the competition in the Canadian market at all.

If it breaks loose from the combine a new element would be introduced into the situation. It is not, however, thought probable that the Montmorency people will cut prices, and there is just a possibility that the agreement may be renewed.

WILL BE OPEN ALL WINTER.

Travelers will be pleased to learn that the Northern Hotel, at Port Arthur, will hereafter be kept open all the year round, instead of during the summer months only, as formerly. A new manager, in the person of Mr. O'Kelly, is in charge, and he has already received letters from Americans who anticipate sojourning at his hostelry for a season.

HOW CANADA IS GOVERNED.

A new book on Canada, by Dr. Bourinot, will shortly be issued. It is entitled "How Canada is Governed," and gives in plain, simple language a short account of the executive, legislative, judicial and municipal

institutions of the country, together with a sketch of their origin and development. The book will be illustrated with numerous engravings and autographs, and, being the work of so eminent an authority as Dr. Bourinot, will be indispensable to those who wish to be well informed about the affairs of the Dominion.

SECOND CROP CALIFORNIA RAISINS.

Sales agents in Montreal report that several forced sales of second crop California raisins have been made in the last week at very low prices.

It was absolutely necessary, however, that these should be realized upon, as this grade do not have the same keeping qualities as first crop, a fact which the agents claim the trade will very soon learn.

It is understood also that another shipment of second crop Californias have been made to Montreal, and are now being offered.

PUNISHMENT FOR ADULTERATIONS.

The way in which persons are punished in the Old Country for selling adulterated stuff is indicated in the following paragraph from The London Grocers' Gazette: "Esther Carr, grocer, Quarrington Hill, was summoned before the County Petty Sessions on May 30, for selling adulterated ground ginger. Mr. Scott Elder stated that the sample contained nothing but exhausted ginger, which had been used in the manufacture of aerated water. He had often had ginger adulterated to the extent of 10 or 12 per cent., but never previously 100 per cent. The price paid was 1d. per ounce. Defendant was fined 5s. and costs. At Blackburn Petty Sessions on Monday, Mr. John Wm. Herd, grocer, 208 Audley range, and Mr. Stephen Tattersall, grocer, 66 Chester street, were summoned for selling adulterated ground ginger. Inspector Withers stated that in one case the sample contained 30 per cent. of spent ginger, and in the other 18 per cent. He believed the defendants, like some others, were innocent and the victims of circumstances. Grocers should insist, when purchasing ginger, on getting a written warranty. On defendants paying the costs the cases were withdrawn."

LATE BUSINESS CHANGES

John Gorman has started a fruit business at Ottawa.—Roche, Danford & Co., general store, Newmarket, Ont., are moving to Woodstock.—J. W. Johnstone, general store, Lacombe, Man., has sold out to D. G. Stewart.—Turnoth & Dagg, general store, Belmont, Man., have dissolved. Geo. Turnoth continues.

WINDOW-DRESSING DEPARTMENT**MOVABLE LIGHTS.**

Where electric lights are employed, a little persuasion, remarks a contemporary, might induce the proprietor to allow the use of a few movable incandescent lights for service in the windows.

These can be had with small shades, the detached insulated wire allowing them to be placed anywhere in the window at will.

Many novel effects can be introduced with these, and by hiding them under folds of goods they will throw a strong steady light on almost every part of the window, without the source of illumination being seen from the outside. By covering the globes with heavy tissue paper, such as is used for making lamp shades, startling and novel light effects can often be originated.

A WINDOW POINT.

We are all agreed nowadays that we must take all we can out of the window, says a contemporary. No more stuffing it with goods and allowing them to get faded and dusty there. No more lolling in the office chair while people are rushing past and never giving a glance at the window because it is so stale, flat and (consequently) unprofitable.

The window is to be dressed often, very often, and never without some real attraction, either in the marked character of the

goods, the unique method of their arrangement, or the crisp and fascinating phrases on the card.

On the card? Yes, yes, the card must be a strong element in the combination. It used to be the fashion in old London, the London that was even so late as the Stuarts, it was the fashion, we say, for shopkeepers of all trades and their apprentices to stand at the open end of their bazaars and accost the passers, urging them to buy. Lots of trade was got that way, but now that method has but a narrow acceptance, not likely to be imitated.

In place of the miscellaneous salute is the silent window. Let its printed words be eloquent with that eloquence which both arrests the eye and convinces the judgment. What line of attack shall we use? Here is one line—hitch on to the current thought of the people. Seize whatever is uppermost in the newspapers or in local talk and make some allusion to it that everybody will instantly grasp, then attach a reference to the contents of the window that will be sufficiently reasonable, even in its absurdity, to tickle the popular fancy. When you get started you will find the subject popping up in many directions.

EXPORTS OF BREADSTUFFS.

Exports of wheat and flour as wheat at both coasts of Canada and the United States last week, as telegraphed Brad-

street's, amounted to 2,857,307 bushels, against 1,781,000 bushels the previous week, when the movement was exceptionally small, 1,927,600 bushels in the third week of June, 1894, 3,553,000 bushels in 1893, 2,457,000 bushels in 1892, and 1,906,000 bushels in the corresponding period in 1891.

LUMBER EXPORTS.

The Manufacturers' Gazette says: "It is a somewhat singular fact that Canada exports several million dollars worth of lumber each year more to the United States than to Great Britain. Thus, in 1893 Canada's total export of forest products to Great Britain figured \$11,105,482, while to the United States that aggregate showed \$14,841,455 worth. Yet with this enormous export of lumber to the United States and to Great Britain, the value of Canada's forest products is about \$80,000,000 per annum, leaving a balance for local consumption of about \$55,000,000 nearly 70 per cent. of its forest products, and equaling more than \$11 per head of population. It is somewhat surprising to note that Canada uses twice as much lumber at home as she ships abroad. This is a similar fact to that which we have noted concerning the largely increasing local consumption of lumber in the New England states."

Warmer Weather

Always Stimulates Breakfast Food Trade

This naturally brings up the question to the mind of every grocer:
"Am I handling those Breakfast Foods that pay best?"

Not the cheapest, but the most saleable kind—the kind that people ask for, after having tried them. In a word,

Such good sellers as

**Desiccated Rolled Wheat

MARKETS AND MARKET NOTES

ONTARIO MARKETS.

TORONTO, June 27, 1895.
GROCERIES.

INTEREST is this week centered around the increased strength that has suddenly been assumed by canned tomatoes. In sugar, there is practically nothing doing, but the market keeps fairly steady, the refiners refusing to shade prices. Wholesalers, however, are being more easily induced to take lower figures. Coffees are in moderate demand. Spices are quiet, but the general tendency of them as to prices is still upward. Syrups are quiet and steady. Increased firmness has developed in nearly all lines of foreign dried fruits. Outside sugar, trade generally is fairly active, and future trade is looked forward to with confidence.

CANNED GOODS.

The realization that there is a scarcity of canned tomatoes, as noted in our editorial columns, has caused an advance in the price of this article. For good standard brands that were quoted at 80c. a few days ago 85c. is now demanded, and packers who have any are firm at the same figure. The demand for all kinds of vegetables is good. Gallon apples is still a good selling line. Salmon are in fair demand and firm in price. Owing to the scarcity of first-class red fish there have been a number of transactions in Cohoes during the week, and, it is said, at prices which would not have been paid a short time ago. Although generally speaking there do not appear to be many transactions in futures, yet some of the canners' agents claim that they have sold their allotment for this market at from \$4.30 to \$4.60 per case. Contracts are subject to pack. Canned beef is strong, but the high prices appear to have checked the demand.

We quote: Tomatoes, 85 to 90c. for choice; corn, 80 to 85c.; peas, 80 to 85c. for ordinary; sifted, 90c. to \$1; extra sifted, \$1.40; peaches, \$2.75 to \$3 for 3's, \$1.85 to \$2 for 2's; raspberries, \$1.65 to \$1.80; strawberries, \$1.90 to \$2.10; apples, 3's, 90c to \$1, gallons, \$2.15 to \$2.25, and preserved fancy quarters at \$1.35 to \$1.40; salmon, \$1.35 to \$1.50, in tall tins, and \$1.55 to \$1.60, in flat tins; do., Cohoes, \$1.05 to \$1.10; do. "Horseshoe" brand, \$1.45 to \$1.50; canned mackerel, \$1 to \$1.10; lobsters, \$1.70 to \$2 for tall tins, and \$2.25 to \$2.75 for flat tins. Canadian canned beef, 1's, \$1.65 to \$1.75; 2's, \$2.65 to \$2.75; 6's, \$8 to \$8.25; 14's, \$18 to \$19. Chicago canned beef, 1's, \$1.75 per dozen; 2's, \$2.85. Australian mutton, boiled, 2 lb. cans, \$3.40; ditto, corned and roast, \$3.75.

COFFEES.

The market is fairly well supplied with Rio coffees, and further shipments are coming forward. Demand is fair, for the season. We quote green in bags: Rio, 19½ to 21½c.; East Indian, 27 to 30c.; South American, 21 to 23c.; Santos, 20 to 22½c.; Java, 28 to 33c.; Mocha, 30 to 35c.; Maracaibo, 21 to 23c.; Jamaica, 21 to 25c.

RICE.

There is nothing special to note either in regard to business or prices. We quote unchanged prices: "B," 3½ to 3¾c.; extra Japan, 5¼ to 5¾c.; imported Japan, 5¼ to 6¼c.; tapioca, pearl, 3¼ to 5½c.

SPICES.

Cassia, cloves, and in fact spices generally, are firm at slightly advanced prices in the primary markets. Pepper is firm at the recent advance. We quote: Pure black pepper, 10 to 12c.; pure white, 18 to 25c.; pure Jamaica ginger, 25 to 27c.; cloves, 15c.; pure mixed spice, 25 to 30c.; cream of tartar, 22 to 28c. per lb.

NUTS.

Business continues seasonably quiet at unchanged prices. We quote: Brazil nuts, 11 to 11½c.; Sicily shelled almonds, 25 to 26c.; Tarragona almonds, 14 to 14½c.; peanuts, 10 to 12c. for roasted, and 7 to 10c. for green; cocoanuts, \$4.50 to \$5 per sack; Grenoble walnuts, 15 to 16c.; Marbot walnuts, 12½ to 14c.; Bordeaux walnuts, 12 to 13c.; Sicily filberts, 9 to 10c. for sacks and 10½ to 11c. for small lots; pecans, 10½ to 11c.

SUGAR.

The demand for sugar has flattened out completely. There is practically nothing doing. The outside markets have been somewhat irregular, but the Canadian refineries are still firm in their views, and nominal as their quotations are they steadfastly refuse to shade prices, holding that the sugar season and a consequent better demand is not very remote. The wholesalers are, however, not so particular about shading their quotations, the ruling figures being slightly lower than a week ago. We quote prices: Granulated, No. 1, 4¼ to 4¾c.; do., No. 2, 4¼ to 4¾c.; yellows, 3¼ to 3¾c.; Demerara, 3½c.

A London cable of Monday read: "Closed firmer. Last week's decline caused by clever bear manœuvres on desire shown by German and French factories to sell old crop and by favorable weather for new crop. This influenced bucket shop bulls and nervous holders who were looking for an advance."

Mail advices received this week from Demerara quote sugar a little firmer.

SYRUPS.

The market is fairly firm in syrups, but there is not much enquiry. We quote: Dark, 30 to 32c.; medium, 33 to 35c.; bright, 40 to 42c.

MOLASSES.

The situation is unchanged locally. We quote: New Orleans, barrels, 30 to 32c.; half-

MARKETS—Continued

barrels, 33½ to 35c.; Barbadoes, barrels, 31 to 35c.; half-barrels, 33 to 37c.

TEAS.

There is a little more doing in Japan teas, some nice liquoring and drawing teas having changed hands. Supplies of medium grade are still small. The wholesale demand is principally for a tea at about 16c., brokers reporting sales of high grade Japans disappointing. Samples of new season's Moning Congous and Indian teas are arriving this week. As noted elsewhere, the price of new Monings is high on account of the Russian demand. In China green teas there is some demand for the higher grades, which are scarce. Some beautiful teas of this description have changed hands during the past few days. China black teas are neglected. We quote ruling prices to retailers as follows: Young Hysons, 12 to 18c. for low grades, 24 to 27c. for mediums, and 30 to 45c. for high grades; China Congous, 14 to 18c. for mediums, and 35 to 55c. for high grades; Japans, 16 to 20c. for mediums, 28 to 35c. for high grades; Indians and Ceylons, 18 to 22c. for mediums, and 30 to 45c. for high grades.

DRIED FRUIT.

With an odd exception, there has been an all-round appreciation in values in the outside markets during the past few days.

Valencia raisins in active demand, and prices are higher in some of the outside markets. There is no change here. We quote present figures: Off-stalk, 85 to 90c. per box; fine off-stalk, 4 to 4½c.; selected, 5½ to 6c.; layers, 4½ to 5½c.

The currant market in Greece has assumed a stronger tone, and old fruit is getting pretty well sold out. Advices state that prospects for the new crop are good, although the quality is not likely to be as good as last year, when it was credited with being the best for seventeen years. Prices have advanced ¼ to ½c. per lb. in New York. We quote as before: Filiatras, half-barrels, 4 to 4½c., barrels, 4½c.; fine Filiatras, half-bbls., 4½c., barrels, 4½c.; Patras, 5½c., in cases; Casalinas, 4½ to 5½c.; Vostizzas, 6½ to 7c. in cases and half-cases.

Sultana raisins have advanced ¼c. in New York, but there is no change here, 6½ to 7c. still being the ruling price for good bright fruit. Crop prospects are reported to be about the same as last year.

Prunes, in both California and France, are likely to be a short crop, and prices are firm. The demand is still being maintained. We quote: "Sphinx"—"U," 110 to 115 to half kilo, 4¼ to 5c. per lb.; "C," 85 to 90 to half kilo, 6½c. per lb.; "B," 80 to 85 to half kilo, 6½ to 7¼c. per lb.; "Atlas,"—"D," 110 to 115 to half kilo, 4¼ to 5c.

per lb.; "Unicorn," 5 to 5½c.; Bordeaux prunes, 4½ to 6½c.

Advices report prospects for fig crop much about the same as last year. The demand here continues light and prices nominally unchanged. We quote: 14 oz., 8 to 9c.; 10 lb., 8 to 10c.; 18 lb., 12c.; 28 lb., 15c.; taps, 4¼ to 4½c.; naturals, 6 to 7c.

Dates are quiet and unchanged at from 4½c. up.

BUTTER AND CHEESE.

The butter trade continues almost featureless. The old country markets are still "sick," and until there is an improvement there dealers here cannot expect much better prices. Some of the country merchants do not feel like taking current prices, and as a result there is an accumulation in their cellars. This butter, if held long, will be very much deteriorated in quality, and the result will be that they will eventually have to accept a very low price. On the whole we think that merchants will do well to move their butter at current prices while it is sweet, so that there will be no culls on their hands. So far, the greatest accumulations seem to be in the creamery factories, and those who have not got facilities for carrying it are liable to experience a serious loss. Prices are a trifle weaker the past week. We quote: Old summer dairy and store packed, 5 to 7c.; fresh large rolls, 10 to 12c.; prints, 13 to 14c.; fresh tubs, 11 to 12½c.; Fresh creamery—Tubs, 15 to 16c.; pound prints, 16 to 17c.

CHEESE—Cable reports do not show any marked improvement in the situation in the old country, although dealers are generally advancing their prices, presumably on the principle that they are low and that the probability is that there must be an improvement later on. Of course cheese is different from butter, and does not deteriorate in quality as butter will, so that the risk in carrying cheese is small. The big local dealers, however, seem to think that cheese will not be higher this year. August and September makes of Canadian cheese bring 10 to 10½c., and new Canadian cheese is quoted at 8 to 8½c. Small Stiltons bring 10 to 11c.

GREEN FRUIT.

Trade continues quite brisk on the whole. Imported fruits and vegetables are becoming more plentiful and cheaper. Oranges are a little firmer and lemons maintain their strong position. Domestic strawberries and cherries are now properly upon the market. The former are scarce and of poor quality, but a little improved since the rainfall of the other night, and the latter are fine fruit, but not very plentiful. Red currants are also coming in. We quote: Messina lemons, 300's, 360's, and 420's, \$5 to \$6; Oranges—Messinas, half boxes, 80's, \$1.75 to \$2; 100's, \$1.75 to \$2.50; boxes, 160's 200's and 300's, \$3.50 to \$4; navels, \$4 to \$4.75; Messina ovals, 80's, \$2.25 to \$2.50;

California seedlings, \$3 to \$4. Bananas, \$1.25 to \$2 for firsts and seconds. Strawberries, 8 to 12c. a quart; cocoanuts, \$4.50 a sack; pineapples, 8 to 12c.; cucumbers, \$2 to \$2.50 per crate; new cabbage, \$1.40 to \$1.65 a crate; \$1.75 to \$2 a bbl.; tomatoes, \$1.40 to \$1.65 per crate; green California apricots, \$2.25 to \$2.50 per box; peaches, ditto; cherries, ditto. Domestic cherries, \$1.25 per basket; red currants, 85c. to \$1.10 per basket.

COUNTRY PRODUCE

BEANS—What are left in the market of choice hand picked bring \$1.60 to \$1.65 per bushel.

DRIED APPLES—Seem a little weaker at 5 to 5½c. per lb.

EVAPORATED APPLES—In 50-lb. boxes 6½ to 7c. per lb.

ONIONS—Domestic are pretty well out of the market, and Spanish, Valencias and Egyptians are quoted at varying prices.

POTATOES—Old are very weak, bringing only 30c. on the track and 40c. out of store. This is strange, as new are rather scarce on the local market, the price quoted in the south being high.

EGGS—The quality of the eggs this year has been so good as to make the consumption much larger than at the same time last season. They are not so plentiful as they were, and command 10½ to 11c. per dozen.

HONEY—Is up to 7 and 8c. in bulk, strained, and \$1.50 to \$1.80 a dozen in the comb.

FISH.

There is not much change in the situation since last week. Prices for salt fish are purely nominal, while trade in fresh is reported below the average. Blue fish and Spanish mackerel are introduced on the local market this week for the first time this season. We quote: Skinned and boned cod-fish, 6½c.; boneless fish, 3½ to 4c.; haddock, 5 to 6c.; Labrador herring, \$3.25 to \$3.50 per half barrel and \$5.50 to \$5.75 per barrel; Newfoundland herring, \$2.50 per half barrel, and \$4.50 to \$4.75 per barrel; fresh water salt herring, \$3 per bbl.; blue-back herring, 4c.; pike, 4½ to 5c. per lb.; flitched cod, 5c.; finnan haddies, 8c.; Digby herring, in bundles of 5 boxes, 11c.; ditto, lengthwise, 10c.; large halibut, 10 to 13c.; Georgian Bay trout, 6 to 6½c.; white fish, 7c.; Lake Erie white fish, extra fine, 10 to 12c. per lb.; Lake Erie herring, \$2 to \$2.25 per 100; Restigouche salmon, 14 to 16c.; blue fish, 9c.; Spanish mackerel, 20c.

PROVISIONS AND DRESSED HOGS.

The market is firm, with a fair demand and steady prices. Dressed hogs bring \$6 to \$6.25 per 100 lbs. Products are quoted thus:

BACON—Long clear, 8c. for carload lots, 8c. for ton lots, and 8¼c. for small lots;

Wholesale Grocers

TORONTO - - ONTARIO

MARKETS—Continued

breakfast bacon, 11c to 11½c.; rolls, 8c. to 8¼c.

HAMS—Large, 22 lbs. and over, 10c.; medium, 15 to 20 lbs., 11c.; small hams, 11 to 11½c.; pickled, 10 to 10½c.

LARD—Pure Canadian, tierces, 9c.; tubs, 9¼c.; pails, 9½c.

BARREL PORK—Canadian heavy mess, \$15.75; Canadian short-cut, \$16 to \$16.50; clear shoulder mess, \$13.75 to \$14; shoulder mess, \$13.50 to \$13.75.

FLOUR AND FEED.

WHEAT—Has fallen away below the dollar mark again. White is quoted at 88c.; red at 88c., and goose at 83c.

OATS—Are rather weak at 43c.

BARLEY—Quoted on the street market at 50c.

FLOUR—The market is less active, and prices are weaker in accord with the drop in wheat. We quote: Straight roller, \$4.50 to \$4.55; Manitoba, \$4.60 to \$4.65; patents, \$4.85 to \$4.90.

BREAKFAST FOODS—Oatmeal is weak and 10c. per barrel lower. We quote: Standard oatmeal, \$4.40 to \$4.50; rolled oats, \$4.40 to \$4.50; rolled wheat, \$2.75 in 100 lb. barrels; cornmeal, \$3.50; split peas, \$3.50; pot barley, \$3.75 to \$4 per bbl.

SALT.

A good business is doing at unchanged figures, viz.: Barrels, 85c.; coarse sacks, 58c.; fine sacks, 60c.; dairy, \$1.25; rock, \$9.

HIDES, SKINS, WOOL AND TALLOW

HIDES—Hides on the western markets are reported ¼ to ½c. off in price, but no change is recorded here, 8c. for No. 1 and 7c. for No. 2 being paid on the few brought in.

SHEEPSKINS—Few are offering, the season being nearly over. Sheepskins bring \$1 to \$1.25, lambskins 25c., and shearlings 15c.

CALFSKINS—The season for those is over practically.

WOOL—Local competition has forced prices up again to 20 to 21c. There is considerable activity on the market and dealers are buying freely at those figures. They seem well satisfied too, as they say the selections they are getting are excellent, and worth holding over for better figures than can now be got from the mills.

PETROLEUM.

Petroleum is quiet, both locally and on the primary markets, but prices have not altered. The long days will soon be over, and then an advance in illuminating oils is looked for. We quote in 1 to 10 bbl. lots, imperial gallon, Toronto: Canadian, 16 to 17c.; carbon safety, 18 to 19c.; Canadian water white, 18 to 19c.; American water white, 20½c.; photogene, 21½ to 22c.

TORONTO NOTES.

Canned tomatoes are excited.

Samples of new Moning teas are here.

Davidson & Hay are offering Bul's extract ginger beer, put up in 25c. bottles.

John Sloan & Co. are in receipt of a shipment of "Eagle" brand canned salmon.

Shipments of syrups, Durkee's salad dressing, and Japan teas are to hand this week with Davidson & Hay.

D. Gunn, Flavelle & Co. are giving a special cut in breakfast bacons for the next

twenty days. If specially requested these bacons will be put up in parchment paper. Those ordering should ask for parchment wrapper if they want it.

Clemes Bros. are in receipt this week of first car of Georgia watermelons.

Smith & Keighley have to arrive Marshall's fish products and Aberdeenshire lambs' tongues.

Todhunter, Mitchell & Co. report large sales of their new "Dominion Mills" pickle spice in large 10c. packages.

Perkins, Ince & Co. have to hand this week samples of new season's Moning Congous. They show good quality.

Lemon and citron peels in 20-lb. cartoons are to hand with John Sloan & Co. They are understood to be showing good value.

A good demand for flavoring extracts is reported by the Pure Gold Mfg. Co., and business is better with the firm than last year.

Graham, McLean & Co. report the quality of eggs they are receiving this year away above the average, and consequently selling better.

McWilliam & Everist report the arrival of three cars of Mississippi tomatoes, two cars of Tennessee potatoes, and two cars of watermelons.

The domestic supply of strawberries and cherries is as yet limited. The strawberries are of rather poor quality, and the cherries seem rather scarce.

Large sales of Beardsley's "Acme" beef, "Star" brand herrings and shredded codfish are reported by R. S. McIndoe, agent for Toronto and the west.

The feature of the Eby, Blain Co.'s sample room this week is the enclosure, from base to capital, of one of the large iron pillars with pound packages of "Orient" tea.

Dawson & Co. are just in receipt of two carloads of tomatoes direct from Crystal Springs. They claim that one of these cars contains the finest lot of tomatoes ever received in Toronto.

The new June list from Marshall & Co., Aberdeen, Scotland, shows reductions in prices of kippered herrings, fresh herrings, bloaters, herrings in tomato, shrimp and anchovy sauce.

The Pure Gold Mfg. Co. is this week making a shipment of tomato catsup to England. "We have a letter from Halifax," said Mr. Jardine, "which says that our sweet tomato catsup is going to be a great seller, and is considered the best on the market."

D. Gunn, Flavelle & Co. are having a good run on their sweet pickled green rolls, which they are putting up in barrels, on which they are giving special prices. This firm also reports a marked improvement in the demand for long clear bacon.

Byrant's root beer—five gallons for 10c.—wholesale from H. P. Eckardt & Co., Elliott & Co., Lyman, Knox & Co., the Toronto Biscuit and Confectionery Co., and Davidson & Hay, for Toronto; Masuret & Co., London Drug Co., A. M. Smith & Co., for London; Geo. Robertson & Son, for Kingston; D. H. Rennoldson, Lyman, Knox & Co., for Montreal; Lumsden Bros., for Hamilton.

HAMILTON NOTES.

Spratt's Patent Dog Biscuit, for which W. H. Gillard & Co. are agents, is finding a ready sale. Gillard & Co. are sending to purchasers of Dog Biscuit a little pamphlet

containing a treatise on dogs, which is valuable to those interested in our canine friends.

Lucas, Steele & Bristol are offering their customers the celebrated "Golden" finnan haddies.

Special inducements are being offered by W. H. Gillard & Co. on three brands of first-class salmon which they hold.

Two-lb. "C C" beef is in demand now, and buyers can purchase at manufacturers' prices from W. H. Gillard & Co., of Hamilton.

The sun-dried cod offering by Lucas, Steele & Bristol, in quintals, is same quality as they had last season. They are large size.

James Turner & Co. find their trade in "Golden" finnan haddies increasing. They are receiving another lot of these goods this week.

Lucas, Steele & Bristol report a good tea demand of late. Their values in Japans at 15 and 16c. are said to be exceptional. In Ceylons 19 and 30c. are their drives.

A snap is being offered by Lucas, Steele & Bristol in Royans a la Bordelaise. These goods are first-class, and packed by Dandicolle & Gaudin, of Bordeaux, France.

The New York ginger ale appears to be a wonderfully successful line to handle, and is becoming more popular every season, and W. H. Gillard & Co. report a large business. The article is made popular by the reasonable price at which it is sold, viz., 80c. per doz. in quart bottles.

BRANTFORD NOTES.

The manufacture of biscuits reaches its highest standard in Paterson's sodas.

Wm. Paterson & Son report a brisk demand for their high-class domestic pickles.

Wm. Paterson & Son have appointed C. & E. Macmichael, of St. John, N.B., selling agents for their biscuits.

Mr. Wm. Paterson, senior member of the firm of Wm. Paterson & Son, biscuit manufacturers, sails for England on Saturday, accompanied by his wife and daughter. This is his first visit to the "Old Sod," and we wish him a safe passage and an enjoyable time.

Mr. P. L. Mason is taking a trip through the Eastern Provinces. He is accompanied by Mrs. Mason, and is on business and pleasure bent.

QUEBEC MARKETS.

MONTREAL, June 27, 1895.

GROCERIES.

THE grocery market has presented quite a few interesting features during the week. Chief in this connection has been the activity and strength in canned goods of most kinds from first to second hands, but especially in canned salmon, which is now very firmly held. The same can be said also of staple lines of vegetables and fruit. In other lines, however, business is dull. Dealers generally appear to have been better supplied with sugar than at first thought, and, as a result, though the preserving season is at hand the refiners are not experiencing any accession in the demand. In syrups quietness also rules, and though there is considerable life in the trade

between first and second hands in molasses, the jobbing movement is small. The same can be said of tea and other lines of staple groceries. In teas sales agents have been around with some new samples of 1895 crop, and found very indifferent buyers.

SUGAR.

The sugar market has ruled rather quieter this week, and it would appear from reports from the country that supplies in third hands are more ample than anticipated. The result is only a moderate degree of life in the staple, though the housewives are now in their preserving season. Refiners are doing very little business as a result of this, and their price is unchanged at 4¼c. for granulated, and 3¼ to 3¾c. for yellows, as to quality at the refinery. In a jobbing way quotations range from 4¾c. on granulated to 3½ to 4c. on yellows, as to quality.

SYRUPS.

There has been little or no activity to note in syrups since our last report, and no material change seems to be anticipated. Both jobbers and retailers are said to be well supplied, and this conduces to continued quietness. Prices are steady at 1¾ to 2¼c. for straight lots from first hands, with ⅞ to ¾c. advance on this for jobbing business in the ordinary way.

MOLASSES.

Firmness has been the prevailing characteristic of the molasses market, business being confined to large sales between importers and jobbers. Several cargoes arrived during the week, but as they were all sold ahead and distributed, the fact had no influence whatever upon prices, which are as firmly held as ever. The sale of some 600 puncheons to a Quebec house which took place Monday ex wharf will reduce the supply available here to that extent. In fact, nothing but firmness is looked for, and prices are strong at 37c. for single puncheons and 36c. for car lots of Barbadoes, and 36c. for single puncheons and 35c. for car lots of Porto Rico.

RICE.

The rice market rules steady and unchanged, business being much as it was. We quote jobbing prices: Japan, \$4.30 to \$4.50; crystal Japan, \$4.80 to \$5; standard B, \$3.45; English style, \$3.30; Patna, \$4.37½ to \$5; and Carolina, \$7 to \$7.50.

SPICES.

There is only a limited demand for spices, and there is no change in prices to report. We quote jobbing prices as follows: Penang black pepper, 9 to 10c.; white pepper, 13 to 15c.; cloves, 15 to 20c.; cassia, 12 to 20c.; nutmegs, 65 to 90c.; Jamaica ginger, 20 to 25c., as to grade.

COFFEES.

The coffee market is quiet and unchanged. Business is of moderate dimensions, and does not furnish any special feature. We quote: Maracaibo, 21½ to 23c.; Rio, 19 to 21c.; Java, 25 to 30c.; Jamaica, 20 to 22c.; and Mocha, 29 to 32c.

TEA.

The tea market rules very quiet, and there is little doing either between houses or from jobbers' hands. Samples of new crop Japans now on the way have been shown during the week and pronounced fine, but the selling agents have not met with very gratifying results in their efforts to secure buyers. These new teas have been offered at a range from 18 to 35c., as to quality. Congous

We are always open to buy or sell, in car lots or less, Grain, Apples, or Produce.

FIRST ARRIVAL OF

Water Melons

Also

California Fruits

Peaches, Cherries, Apricots.

Lemons at right prices.

CLEMES BROS. - TORONTO

QUEBEC MARKETS—Continued

have changed hands in a small way at 14c., blacks at 14c., and Japans at 13c.

DRIED FRUITS.

There has been a fairly active trade in California raisins in a jobbing way at steady prices. The quality of these fruit at present offering here, it is generally admitted, gives them the preference over the supplies of other raisins offering. We quote: 6½c. for 4-crown loose muscatels and 5½c. for 3-crown ditto.

Valencia raisins are dull and neglected, and some holders are disposed to shade prices to effect a clearance. It is hardly permissible, however, to give any quotable reduction in the range of values. They rule from 3½ to 5c., as to quality.

The currant market is quiet and steady. We quote: 3½c. in barrels and cases, 4 to 4½c. for Filatras and Provincials, Patras 5 to 5½c. and Vostizzas 7c.

Prunes are almost all cleaned up on this market, and none are spoken of as coming forward. The few Austrians offering here are held firm at 4 to 5c., as to grade.

All the dates here are in one or two hands, and are wanted. They can be quoted at 4½ to 5c.

NUTS.

There is no change in this market. We quote: Brazils, 8 to 9c.; shelled almonds, 18 to 25c.; Tarragona, 11 to 13c.; Grenoble walnuts, 12 to 13c.; shelled ditto, 24 to 25c.; filberts, 6½ to 7½c.; and pecans, 8 to 10c.

CANNED GOODS.

The market has been an active one, and the general tendency of values is firm, both on fruits, vegetables and fish. The activity displayed, however, has been largely in the shape of trade from first to second hands, for jobbers are not disposed to urge business with the tendency of values as they are at present. Contracts for future delivery of canned salmon continue a leading feature, and the basis for the new business that has been put through has been firm at \$4.50. In consequence of this, prices on old pack are more firmly held. Fruit and vegetables also show a strong tone, in consequence of the news from the producing districts in Ontario. We quote: Lobsters, \$5.75 to \$6.50 per case; sardines, \$8.50 to \$10.50; salmon, \$4.80 to \$5.20; tomatoes, 80 to 90c. per doz.; peaches, \$2 to \$3.00 per doz.; corn, 85c. to \$1 per doz.; peas, 85 to 95c. per doz.; strawberries, \$2 to \$2.25; raspberries, \$1.75 to \$2; green gages, \$2 to \$2.25; blue plums or damsons, \$1.50 to \$1.75; pineapples, \$2 to \$2.25, and 3-lb. apples, \$1 to \$1.10.

GREEN FRUIT.

BANANAS—The market for these has ruled rather firmer during the week, and prices are higher, at 80c. to \$2, as to quality.

LEMONS—An easier feeling has been developed in lemons since our last report, and we quote prices 50c. lower here, at \$4 to \$5 per case.

ORANGES—There has been no change in oranges, which rule much as they were, at \$3 to \$4.50, as to quality.

PINEAPPLES—Steady, at 10 to 20c. each.

CALIFORNIA PEACHES—Range steady, from \$2 to \$2.50 per box.

CALIFORNIA APRICOTS—Are unchanged at 90c. to \$1.10 per box.

CRANBERRIES—Receipts of these have

been rather freer, but prices are steady at \$2.50 to \$3 per box.

STRAWBERRIES—Montreal Island berries, which are offering freely at 4¼ to 5c., have driven all other descriptions out of the market.

CHERRIES—Receipts of local cherries have been free and prices have declined in consequence to \$1.25 to \$1.75, as to quality.

COUNTRY PRODUCE.

EGGS—The egg market is quiet and unchanged, but prices are steady at 10 to 10½c.

MAPLE PRODUCTS—The market for these will soon be over. We quote: Syrup, 50 to 60c. in tins, and sugar, 6 to 7c.

HOPS—No change is to note in these, offers being freely made of last year's crop at 5c.

HONEY—Supplies of this are light, but demand is small. We quote: New extracted 7 to 9c. per lb.; old, 5 to 6c., and comb stock, 10 to 12c.

BEANS—Firm and unchanged at \$1.60 to \$1.75 for hand-picked.

POTATOES—The potato market is easy at 40c. per bag. Some new stock has been offered, but the quantity has been too small almost to mention.

ONIONS—Bermuda onions are steady at \$2.25 to \$2.50 per crate, and Egyptian \$1.75 to \$2 per bag.

TOMATOES—Are selling steady at \$3 per carrier.

ASPARAGUS—Receipts are moderate and prices range from 80 to 90c. per basket.

CAULIFLOWERS—The quality of the offerings is excellent, but the supply is large. We quote \$1 per dozen.

PROVISIONS.

Hams and bacon are the only provisions for which there is any demand. Prices are steady and unchanged. We quote: Canadian short cut, clear, \$17; Canadian short cut, mess, \$18; hams, city cured, per lb., 10 to 11c.; lard, Canadian, in pails, 10 to 11c.; bacon, per lb., 10 to 10½c.; lard, common, refined, per lb., 7½ to 8c.

FLOUR AND MEAL.

In Manitoba flours a fair amount of business has been transacted, but Ontario grades are not enquired for at all. Values generally rule easier than they did a week ago. We quote: Winter wheat, \$5 to \$5.25; spring wheat, patents, \$4.90; straight roller, \$4.80 to \$4.90; straight roller, bags, \$2.25 to \$2.30; extra, \$4.20 to \$4.30; extra, bags, \$2.15 to \$2.20; Manitoba strong bakers', \$4.75.

The market for oatmeal has been dull and prices show no material change. We quote: Standard, bbls., \$4.10 to \$4.20; granulated, bbls., \$4.20 to \$4.30; rolled oats, bbls., \$4.20 to \$4.30.

An active business has been transacted in feed, and Manitoba millers state that they are well sold up of all stock on spot and what is on the way. We quote: Bran, \$14; shorts, \$16; mouillie, \$22 to \$23.

BUTTER.

The butter market shows no improvement and there appears to be little prospect of any in the immediate future. English buyers do not show any desire at all for Canadian butter, and the only outlet is the local demand. This restricts itself solely to the pick of the creamery offering, which is readily available at 15¼c.

CHEESE.

Speculative operations by shippers in the different country markets have had the effect of rigging prices, which are above what the market outlet warrants. Values this week are in consequence fully 1c. higher than they were a week ago, viz., 8 to 8½c., but it is impossible to do business in a legitimate way over the cable on this basis.

ASHES.

A fair business is reported in ashes at steady prices. We quote: First pots, \$4.10; seconds, \$3.80, and pearls, \$5.50 per 100 lbs.

MONTREAL NOTES.

A large lot of Roquefort cheese has just been taken into store by T. J. Cook & Co.

A large lot of Hires' root beer was sent forward to Bauld, Gibson & Co., of Halifax, last week.

Caverhill, Hughes & Co. have just landed a shipment of Stowers' lime juice cordial ex s.s. Montevidian.

A consignment of Sicilian lemonade tablets was sent forward this week to W. H. Gillard & Co., of Hamilton.

Laporte, Martin & Co. are having a big demand for their "Golden" finnan haddies. New pack are being received.

Alex. Millan, with W. T. Benson & Co., is paying a visit to the friends of the firm this week in Ontario and the west generally.

How, McIntyre & Co. have been appointed agents for "Golden" finnan haddies, and report an increasing demand.

George Childs & Co. find their trade for Marshall's Scotch herrings and lunch tongues good for this season of the year.

Consignments of Hires' root beer went forward the other day to Lumsden Bros., of Hamilton, and H. M. Bate & Sons, of Ottawa.

Mr. Chaput, of L. Chaput, Fils & Co., who was down in Quebec this week, states that the molasses market is very firm down there.

Kennedy, Greig & Co. have sent forward this week a large shipment of "Crown" brand extracts to Bauld Gibson & Co., of Halifax.

George Childs & Co. are receiving this week a large shipment of Pettijohn's breakfast food, and report a brisk demand for the delicacy.

Grocers generally in Montreal report that McLaren's Imperial cheese is gaining in favor. It is sold by all the principal grocers.

The crop of strawberries on the Island of Montreal this year is an unusually good one. The fact is having its influence on local prices.

The first offerings of new crop potatoes were offered here this week. They were very small, but being a novelty brought as high as \$1 per bag.

A Quebec wholesale house took 600 puncheons of Barbadoes ex Sicilian off this market. This is a considerable reduction in the supply available here.

The s.s. Tritonia brought in a large consignment of Patterson's lemon squash for Rose & Lafamme. It is put up in 1 dozen cases, and is good value.

D. H. Reynoldson is landing this week another shipment of Cunningham & Defournier's potted meats. These preparations are meeting a large sale this season.

Gillespie & Co. have placed in the vicinity of 10,000 cases of new pack canned

salmon here for forward delivery, and J. Alex. Gordon about 15,000 more.

Two carloads of choice southern tomatoes and boxed southern apples were received by Vipond McBride this week. The apples were the finest offered this season.

Perkins, Ince & Co., of Toronto, are landing this week a large shipment of Stowers' lime juice cordial, and A. P. Tippet & Co. note the arrival of other large lots as well.

Consignments of "Buttermilk" toilet soap are being landed this week for George Childs & Co., Caverhill, Hughes & Co., Hudon, Hebert & Co., and L. Chaput, Sons & Co.

A large lot of "Ram Lal's" tea was received this week by Rose & Laflamme. They find that the fine quality of this tea is showing itself in increased sales every month.

Geo. Vipond and J. McBride, of Vipond, McBride & Co., left for New York on Monday. Their steamer, the Premier, arrived at that port with 10,000 bunches of bananas. They went down to look after the cargo.

Kennedy, Greig & Co. are completing arrangements with several new English houses to represent them this fall. They also sent forward this week several large shipments of Carr's English biscuits to Toronto houses, and also some of their new specialty, Jelloine.

"Well, I am not a prophet nor the son of a prophet," said Mr. Geo. Mann, the Montreal representative of "Salada" Ceylon tea, the other day, "but if straws show which way the wind blows, or if there is anything in the signs of the times, then 'Salada' is going to have an enormous sale in this city in the near future. It is now on sale in nearly 200 grocery stores, and the repeat orders are coming in most encouragingly."

NEW BRUNSWICK MARKETS.

OFFICE OF THE CANADIAN GROCER

ST. JOHN, N.B., June 27, 1895.

THE past week has been an eventful one. The quieter demand and rather large stocks are tending to somewhat weaken markets. In the country market there is little to note. Beef is very firm. In chemicals, market shows little change. Cream of tartar is easier, some 20 casks being placed in this market during the past week. In spice the market is firm with but a limited quantity moving. Teas continue to show good demand at firmer prices. Molasses continues to be a matter of interest, and is very firm at quotations. There is every prospect of higher prices. In canned salmon merchants are rather holding off on account of price, but advices from canners are that at present quotations they are good value. In almost all lines holders are sellers.

ALWAYS THE BEST.

CIDER AND WHITE WINE VINEGARS

Of the purest and best description, manufac-
tured from the celebrated Norfolk County
apples—the finest flavored fruit in Canada.
Prices very low. Send for quotations to

THE DOVER VINEGAR WORKS
PORT DOVER, ONT.

Butter is in rather better condition than for some time, and good new sells freely.

OIL—Quotations in burning oils remain unchanged, with light demand. Linseed oil shows increased firmness at advance. We quote: American, best burning oil, 22½c.; Canadian, best, 21½c.; second, 17½c., no charge for barrels.

SALT—There is nothing new to report. Prices remain firm at quotations. There is very light demand. The importation of American salt in boxes has largely fallen off owing to the Windsor salt being put up in that way. The same is true of cartoons. We quote: Coarse, 50 to 55c.; fine factory filled, \$1 to \$1.10; 5-lb. bags, \$3 to \$3.25 per bbl.; 10-lb. bags, \$2.80 to \$3 per bbl.; 20-lb. boxes, 20c.; 10-lb. boxes, 12c.; cartoons, \$2 per doz.; cheese salt, bbls., bulk, \$2 70.

CANNED GOODS—Demand is good. The new stock of finnan haddies are now coming into the market, and large quantities are being shipped through to Ontario and western points, where demand shows a steady increase at good prices. In salmon stocks of old are light, and are held firm. Merchants and packers are not of one mind as regards new, and but very few are as yet sold. On account of the length of time these goods have to be held before there is a local demand, buyers are backward. New canned lobsters are now in this market. We quote: Corn, 90c. to \$1; peas, 95c.; tomatoes, \$1 to \$1.05; new gallon apples, \$2.25 to \$2.40; corned beef, 2 lb. tins, \$3 to \$3 10; 1-lb. tins, \$1.70 to \$1.75; oysters, 2's, \$2 to \$2 25; 1's, \$1.60 to \$1.65; peaches, 3's, \$3 to \$3.15; 2's, \$2 to \$2 10; salmon, \$1.40 to \$1.50; lobsters, \$1.75 to \$2; haddies, \$1.40; clams, \$5.50 for 4 doz.; chowder, \$3 for 2 doz.; scallops, \$5.50 for 4 doz.; Digby chickens, \$1.

DRIED FRUIT—Valencia layers continue very low. They are being offered in quantities to wholesale trade by brokers, as low as \$1 per box delivered. Demand along all lines is light. In loose muscatels the feeling is firm, but prices are still very low. Holders of evaporated apples have been much disappointed at the turn the market has taken. The position of dried is better; as stocks are very light, prices outside of local demand are lower. Prunes and dates are slow. Peanuts, which are finding good demand, are up from 1 to 2c. We quote: Currants, 1 lb. cartoons, 7½c.; bulk, 6½c.; dried apples, 5½ to 5¾c.; evaporated apples, 7½ to 8c.; sultana raisins, 6 to 7c.; Valencia, 4 to 4½c.; layers, 5 to 5½c.; London lavers, \$2 to \$2.25; loose muscatels, 5 to 5½c.; currants, bbls., 3¾ to 4c.; half-cases, 4¼ to 4½c.; dates, 4 to 4½c.; prunes, 4½ to 5½c.; figs, 11 to 18c.; Bermuda onions, \$1.50 per crate; Egyptian, 2 to 2¼c.; California evaporated peaches, 12 to 13c.; do. apricots, 12 to 14c.; do. pears, 12 to 13c.

DAIRY PRODUCE—Butter is in rather better demand, and good new sells freely at quotations. The stock of old is getting cleaned up somewhat. It can be bought at any price. There is still some through the country. Creamery prints are rather firmer, though demand is yet light. Cheese remains in light demand. The West India market, which has, as a rule, taken large quantities of cheese, about 30 lbs. each, is now very dull. There are still a few old through the country and city. The bulk of the demand is for the new. In eggs more are coming in and prices are easy. We quote: Old butter, dairy, 12 to 14c.; creamery, 14 to 15c.; new dairy, 15 to 16c.; new

creamery prints, 18 to 19c. Cheese, new, 8½ to 9c.; old, 9 to 9½c.; eggs, 9 to 10c.

GREEN FRUIT—Mr. C. H. Dearborn, of Dearborn & Co., who is just home from his orange grove in Florida, reports the effect of the frosts most disastrous, and that there will be no oranges for a number of years. On the pineapples it was not so bad, and next year's crop will be probably a full one. Prices here are firm, particularly lemons. Large quantities of goods are moving. Rhubarb is being received in large quantities, of good quality, and sells freely at quotations. We quote: Pineapples, 18 to 20c.; rhubarb, ½c.; strawberries, 10 to 12c.; Messinas, \$4 to \$4.50; bloods, \$2.50 to \$2.75; Valencias, \$6; lemons, \$4 50; bananas, \$1.75 to \$2.50.

MOLASSES—Demand is rather easier, though stocks continue light, the best part of what has arrived having gone into the country. There are quite a number of barrels now here which at price are finding good sale. Prices are very firm and the tendency of the market is upward. A cargo of Porto Rico is expected in a few days. We quote: Barbadoes, 34 to 35c.; Porto Rico, 35 to 36c.; St. Croix, 33 to 34c.; bbls, 34 to 35c.

SUGAR—There is fair demand, but prices are not so firm, though in value there cannot be said to be any decline. Dealers, on account of large stocks, are selling very close to refiners' price. Present quotation is the bottom of the market, and at these prices it is considered good stock, higher prices being looked for. We quote: Granulated, 4½ to 4¾c.; yellow, 3½ to 3¾c.; Paris lump, 5 to 5½c.; powdered, 5 to 5½c.

FISH—Fresh salmon continue to be the most active line. Though the quantity caught on the north shore is such as to cause the price to be made there, ours is considered the best quality. Catch has so far been light. Shad are scarce and the season is about over. Lobsters are also scarce, and in most cases small, the best being shipped west. In other lines the market is quiet, West Indian demand being very light, and shipments show very poor returns. We quote: Halibut, 8c.; gaspereaux, 50c.; smoked, \$1 per 100; lobsters, \$6 per 100; large cod, \$3.75 to \$3.90; medium, \$3.60 to \$3.70; small, \$2.75; pollock, \$1.70; bay herring, \$1.40 to \$1.50 per half-bbl.; Shelburne, No. 1, \$4 per bbl.; half-bbl., \$2.40 to \$2.50; shad, 9 to 10c.; smoked herring, 5½ to 6c.; Digby chickens, 10c.; salmon, 11 to 12c.

PROVISIONS—Demand is very light. Beef is rather easier. Lard is the best seller, but even that is moving in small quantities. Rolls are offered more freely than they have been. We quote: Clear pork, \$18 to \$18.50; mess, \$16.50 to \$17; beef, \$14.50 to \$15; pure lard, 9 to 10½c.; hams, 11 to 12c.; compound lard, 8 to 9c.; rolls, 9 to 9½c.; cottolene, 9¼ to 9¾c.

FLOUR, FEED AND MEAL—The flour market, though still high and on leading brands showing no change, outside brands are more freely offered and millers more anxious to sell. Middlings are still scarce, but rather easier. Millers not selling flour in this market do not care to ship feed here; and in no market is it more difficult to introduce new brands of flour. Cornmeal continues firm at prices. Oats are rather easier. Most buyers prefer Ontario to P.E.I., but will not give the difference. Some from the Island, however, are giving splendid satisfaction, and Ontario people are rather more inclined to meet their prices. Oatmeal continues to be offered at least as

low as millers' figures. Hay is moving more freely at rather better figures. We quote: Manitoba, \$5.65 to \$5.75; best Ontario, \$5.35 to \$5.50; medium, \$5.10 to \$5.25; oatmeal, \$4.60 to \$4.70; cornmeal, \$3.10; middlings, \$24 to \$25 on track; bran, \$22 to \$22.50; hand-picked beans, \$1; prime, \$1.75 to \$1.80; oats, Ontario, 51 to 52c.; hay, \$9 to \$9.50; pot barley, \$4.15 to \$4.25; round peas, \$3.75 to \$3.90; split, \$3.75 to \$3.90; P.E.I. oats, 46 to 47c.

ST. JOHN NOTES.

Lobster canning. The position of this product is not what one would wish. It is a matter of great importance to New Brunswick and Prince Edward Island. The trouble has been that too many of the packers are careless of the reputation their goods get so long as they get them off, and they seem to think that the cheaper they can put them up the more profit they will make, forgetting that such conduct will ruin the trade altogether. Already the English buyers say the quality runs so uneven as to make them most unsatisfactory goods to handle. Among the troubles are the poor quality of the lobsters packed, the poor quality of the tins used, which are often unlined, and sometimes carelessly soldered. Another difficulty is that pieces of solder and drops of acid get into the tin, discoloring the lobster. There are, however, some of our packers who by care have made such a

name for their goods that they find no difficulty in getting at least 25c. per dozen more for their output than the bulk of the goods bring. A little extra cost, a little extra care, will more than repay the canner.

Dean Bros., retail grocers, mourn the loss of their collector and some \$75 to \$100.

The importers of root beer extract have been called upon by the Government to pay alcohol duty.

Even in the States, so much thought of by some, and by them so often held to be a so much better place than Canada, everything does not bring high prices. It is understood potatoes are selling in Maine at 30c. per barrel.

The firm of Simeon Jones have been appointed agents for Reinhardt & Co., the brewers of Salvador and Bavarian lager beer.

Connor's rope walk is again to be operated. This is welcome news to the old employees. It is opened by the Consumers' Cordage Co. to prevent an opposition factory opening.

Messrs. T. Collins & Co. have received a shipment of extra grocery molasses in barrels, 40 gallons each.

An effort is being made by the police to have the Sunday observed better. The movement is particularly against the cigar storekeepers, who make no pretence of keeping the day. The grocers wish the movement success.

Jardine & Co. report good sales of Marshall's Scotch fish products. Considering the fish country they live in, it speaks well for the productions of Marshall & Co., Aberdeen.

Mr. Felix Taussig, representing the well-known firm of N. W. Taussig & Co., has been in the city during the past week. His firm do a large business here. They are represented by J. Hunter White.

The attractive ad. of Williams, Davis, Brooks & Co., of Detroit, proprietors of Bryant's Root Beer in the last number of THE CANADIAN GROCER has drawn general attention. Their goods have had a very large sale in this market. They are handled by the following wholesale houses: T. B. Barker & Son, druggists; Baird & Peters and C. & E. Macmichael, grocers; White, Colwell & Co., manufacturing confectioners; and H. Rattenbury, Charlotte-town. J. Hunter White is their representative.

FREDERICTON.

Lumber business continues very active. At the booms in Fredericton 2,531 joints were rafted in one day. During the present week some eight steamers and a number of large ships have been loading.

RICHIBUCTO.

A large trade has been done at Richibucto this season shipping mackerel in ice to Boston, one firm alone shipping eight hundred barrels last week.

GRAND MANAN.

A new shaped herring box is being used at Grand Manan. It is in two compartments, each holding about 100 medium-sized herring. It is said to keep the fish in better condition than the old box.

TO STOCK T., H. & B.

A meeting of railway magnates will be held at the Queen's Hotel, Toronto, on Tuesday next, July 2. Representatives will be present from the T., H. & B., N. Y. C., M. C. R., Canada Southern and C. P. R.,

and the object is the issuing of bonds, stocking the road, and to discuss other matters in connection with the Toronto, Hamilton & Buffalo Railway.

NOVA SCOTIA MARKET REPORT.

OFFICE OF THE CANADIAN GROCER,

HALIFAX, June 27, 1895.

THE past week has been characterized by a general dulness in trade. Reports from all parts of the province are of the same tenor. There is no one branch showing any marked improvement. The letter of G. C. Brown, in the last issue of THE CANADIAN GROCER, in reference to trade with Jamaica, seems to hit the nail on the head pretty correctly. Shippers here have complained time and again about the excessive freight rates, but they have had to take it out in complaining. The letter was re-published in Monday's Chronicle, and was the general theme of conversation among business men all that day. A prominent member of the Board of Trade said to-day that the present state of affairs would not exist for ever. The letter has had the effect of wakening our shippers out of a long sleep. They are easy going and put up with a great deal, but when they get roused they are wide-awake.

FISHSTUFFS—Mackerel is the only article in fish showing any life. The demand is very good, owing to the poor supply. The few arrivals sell readily. The bulk of our spring catch has been stuffed fish, and that is a factor in keeping up present high values, the quotations being: large 3's, \$9.50 to \$10. If the receipts during the next few days are at all large, values will decline. Dry cod are now down to their proper value—\$2.50 to \$3.25—according to quality, only the choicest bringing the latter figures. Alewives remain unchanged at \$2.50. Herring are still in over supply; West India grades are worth \$1.25 to \$1.50.

FLOUR—The flour market is fairly active. A few hundred barrels of American have been received. Quotations remain: Hungarian patent, Manitoban, \$5.60 to \$5.75; Manitoba strong bakers', \$5.50 to \$5.60; Canadian pastry, \$5.40 to \$5.60; 75 p.c. roller patents, \$5.35 to \$5.50; 80 p.c. ditto, \$5.25 to \$5.35; 90 p.c. ditto, \$5 to \$5.25; straight, \$4.90 to \$5.10; extra, \$4.75 to \$4.85.

SUGAR—The refinery reports no change from last week. The business is still in the hands of the dealers, and prices are unchanged.

GREEN FRUIT—The market is well stocked with green fruit of all kinds. Native strawberries are plentiful and retailing at 15c. per box for extra good fruit. Some fine California peaches have arrived, but only in small quantities. Large supplies are expected next week. The demand is fair. Prices remain unchanged.

EGGS—There is a drop in eggs. The price on P.E. Island is 9½c., which means 10c. here.

PRODUCE—The produce market is dull. There is nothing doing in potatoes at 34 and 35c. Large lots can be had at 30c.

BUTTER—This article remains dull. No. 1 western is offered at 11c, equal to 11½c. landed here, including icing. Small tubs of native are offered at 16c.

MARKET TRUCK—Long Island cabbages

are in abundance. Fresh beans and cucumbers are also arriving in large quantities.

MOLASSES—Stocks are not large. A cargo of Porto Rico arrived early in the week. There is no Cienfuegos on the market. Antigua is quoted at 30c; Porto Rico, 32c. to 35c; Trinidad, 30c; Barbadoes, 34c; Demerara, "M.R." brand, 39c, and St. Kitts, 28c.

HALIFAX NOTES.

M. O. Wier & Co. have opened a retail grocery on Argyle street.

Two-pound loaves of bread are still sold by Wm. Moir & Co. at 4c.

Hubley & Co., grocers, have dissolved partnership. John H. Blaikeney will conduct the business in the future.

M. & N. Smith, fish exporters, have made extensive improvements to their premises. They have now a handsome suite of offices.

The Eastern Trust Company have been appointed liquidators of the McDougall Brewing Co. The bonds are fixed at \$10,000.

Mr. Louis Butler has arrived to look up another general cargo for Hayti. He sends out fish, flour, dogs, cats, horses, wagons, etc., to the extent of \$25,000 monthly.

J. A. Leaman & Co., vituallers, have fitted up their slaughter house on new and improved lines. This firm is the largest of the kind in the lower provinces. They are large importers of Ontario beef, having the contract to supply the military, which only takes the best.

Quite a quantity of stuff went forward to the West Indies by the steamer Taymouth Castle last week. Her cargo consisted of fish, butter, oats, peas, boots and shoes, woollens, cement, rope, condensed milk, carriages, whiskey, hay, biscuits, cheese, shingles, and, to make the assortment complete, nine Chinamen.

KENTVILLE.

Mr. James Stewart, a former newspaper man, has gone into strawberry farming. This year he produced strawberries nine days earlier than ever before in the county. He has two and a half acres of strawberries and twenty acres in other small fruits, and is making as big a success of farming as he did of making newspapers.

Kentville had some out-standing 5 per cent. water loans, and thought it might do better. So it called for tenders for \$25,000 25 year bonds, and \$2,500 20 year bonds, both at 4 per cent. The offers received were:

Rufus Curry, Windsor, (for both loans, and this offer accepted)	\$98.18
J. C. Mackintosh, Halifax, for \$2,500	98.05
J. C. Mackintosh, Halifax, for \$25,000	98.01
Confederation Life Assurance, Toronto	97.50
Halifax Fire Insurance Co., \$15,000	97.50
Hanson Bros., Montreal	96.05
R. Wilson Smith, Montreal	95.27
Jarvis & Co., Toronto, for \$2,500 ..	94.29
J. A. Meldrum, Toronto	94.28
Jarvis & Co., Toronto, \$25,000	93.58

CREAMERY BUTTER INSPECTOR.

It is learned that the Minister of Agriculture has appointed F. E. Jodery, of Montreal, to inspect the fresh made creamery butter which is sent through to Great Britain, using the cold storage arrangements which have been provided by the Department of Agriculture in Montreal and on board the steamships. Mr. Jodery is further appointed to act as official referee in cases of dispute in regard to quality of cheese and butter. It is understood that his efficiency for these important services is undoubted.

HAMILTON TRADE GOSSIP.

TRADER has ruled much about the same as a week ago. Prices show no decline, although the volume of business is light. What tendency to change there may be is in an upward direction. "I think this goes to show," remarked one wholesaler, "that there must be good prospects for the future. If it were not so, there would be more cutting than there is."

In all descriptions of canned goods the movement has continued brisk, if anything, more so than a week ago. This applies to vegetables, fruits, canned and potted meats and salmon. On tomatoes the ruling price still seems to be 80 to 85c., but there is a stronger feeling, and higher figures are being talked of. One house, in fact, is asking 87½c. for brands it was a week ago willing to take 85c. for. Outside one or two houses local stocks of canned vegetables are said to be light.

The new canned finnan haddie put upon the market is opening up well. "Probably better than last year," remarked one wholesaler. "We are now anxiously awaiting the arrival of new pack lobster," he added.

Salmon continues strong. There have been some transactions in futures at \$4.50 on the Coast, but holders are still inclined to hold off. Some inferior brands have changed hands at \$4.20 on the Coast. "As far as we can learn," said one jobber with whom I was conversing, "there appears to be no possibility of a cut in the price of salmon on the Coast, which means that the cheapest brand of anything like red salmon, would cost to-day in 1,000 case lots \$1.20 per dozen net cash laid down."

One wholesale house here informs me that it to-day (Wednesday) received its first quotations for the season on canned tomatoes, peas and corn for future delivery. They came from two different packers. One quoted tomatoes alone and asked 80c. The other quoted tomatoes, peas and corn and wanted 85c. There were no transactions.

Local jobbers appear to be pretty well sold out of last season's Japan teas. One wholesaler was congratulating himself to me that he only had five packages in his warehouse. I don't know how many are in this enviable position. "You know," he said, as he paced the floor of his warehouse, "it is worse than drawing teeth to sell old Japan tea after shipments of new season's arrive."

There has, I understand, been a little increased activity in Japan tea during the week. "People are sorting up," said a member of one firm, "and we are looking for further improvement the beginning of the month, as people will then have found out that new season's teas coming to hand are not only inferior liquoring teas, but that

they are poorly made, being full of flat leaves, which is something the retailer objects to very much."

Currants and raisins are getting into smaller compass, and values offering here in both of them are exceptionally good. "For instance," remarked one jobber, "we are selling that currant there at 4½c. They can be retailed at four pounds for 25c., and they are better, or quite as good, as what are usually retailed at three pounds for 25c."

At a meeting of the Railway Committee in Ottawa on Saturday, that body was asked to decree that before any further concessions were made to the T. H. & B. railway they be compelled to pay the arrears of wages due the workmen. Hon. Mr. Haggart explained that the committee had no authority to deal with a matter of that kind. It might, however, be made a condition in any legislation before Parliament. Now a Hamilton firm of lawyers is advertising for the signatures of the creditors of Bracy Bros., the insolvent contractors of the road, asking the Dominion Government to rule that no further legislation shall be granted to the T. H. & B. until the laborers and those who supplied material have been paid.

Work on the tunnel of the T. H. & B. was commenced June 24th. There are over 200,000 cubic yards of earth to remove, and four steam shovels will be employed in this work. The tunnel is to be 1,900 feet long, made of brick and stone, and is to cost somewhere in the neighborhood of \$300,000.

The first shipment of merchandise to go on board the new steamer Majestic at Collingwood for the upper lakes was a consignment from James Turner & Co., of this city.

W. H. Gillard & Co.'s tea room has just been thoroughly renovated, re-arranged and re-fitted with new furniture. "We think this is about the best tea room in the country," admiringly remarked a member of the firm. "You see, it faces the north, and there is no light like that from the north for sampling teas."

The crop of raspberries promises to be most bountiful. "I was down east a few days ago, right through the raspberry section," said a wholesale grocer to me, "and the people tell me the crop will be simply enormous, and we expect to get a run on sugar in about a week," he added with a smile. "Yes," remarked another grocer, "the raspberry crop is going to be large, and it is raspberries, you must remember, that is the great preserving staple."

Among the delegates who were here last week attending the Foresters' convention were a number of merchants. And a wholesale friend of mine informed me that more

than one of them spoke in particularly complimentary terms regarding THE CANADIAN GROCER. "They tell me," he said, "that it is getting more valuable to them all the time. And I have evidence, too, that our Hamilton merchants carefully read your paper," he concluded.

The demand for sugar is very light, but jobbers are still holding out for 4¾ to 4½c. for granulated, although lower prices have been accepted from first-class men for quantities.

The Board of Trade met on Monday and elected these officers, all by acclamation: Messrs. John Hoodless, president; J. G. Bowes, vice-president; C. R. Smith, secretary-treasurer; Geo. E. Bristol, J. B. Fairgrieve, George E. Tuckett, Wm. Hendrie, J. Turnbull, John Proctor, A. T. Wood, to Council of the Board for three years; J. M. Young, R. T. Steele, Alfred Powis, J. M. Burns, to Board of Arbitration for three years. The annual meeting will be held on Tuesday next, when the retiring president, Mr. Kittson, will deliver an address.

I had a little chat a few days ago with Mr. H. C. Beckett, of W. H. Gillard & Co., who has been holidaying in the neighborhood of Port Arthur. "Trade prospects," he said in reply to a query of mine, "are fairly good. They are getting out a good deal of pulp wood, which appears to be one of their principal industries just now. Port Arthur is going to be a great place yet. One man told me that in 1878 you could have shot a cannon ball down the main street without striking anyone, while there were so many unfinished buildings that window and door sashes were taken out and shipped to Duluth for use in buildings there. If Duluth has become such an important place, I don't see why Port Arthur cannot, do you?"

W. L. E.

A PURE GOLD EXHIBIT.

At a stand in John Catto's big new building in King street east, Toronto, is to be seen a great array of the commodities prepared by the Pure Gold Mfg. Co. Tins and boxes of Delicatine, baking powder, Pure Gold icing and Pure Gold flavoring are piled in pyramids and other geometrical figures behind a large plate-glass window. To attract special attention to the display, the original study for G. A. Reid's celebrated picture, "The Story," valued at \$500, is shown.

MARRIED IN JUNE.

On June 19 Frank Edwin Taylor, of the firm of Allan Taylor & Co., general merchants and foundrymen, Waterloo, Que., was married to Miss Laura Emily, second daughter of E. L. Roberts, of West Shefford, Que. Rev. R. D. Mills, M.A., rector of Berthier En Hunt, uncle of the bride, performed the ceremony, assisted by Rev. Seth Mills, rector of West Shefford. Service over, the large party of invited guests repaired to the hospitable Roberts mansion, where a most recherche repast awaited the guests, and where the vast number of valuable wedding souvenirs were on view. The newly married couple left on the Halifax express for a lengthy trip through the Maritime Provinces and New England States.

IF YOU'RE THINKING

Of buying a Refrigerator—large or small—let us know. We manufacture

The "EUREKA"

And as it's the very best Refrigerator in the world, you ought (in justice to yourself) to see it before you purchase. We make it in about thirty sizes, and if none of these suit you, we can make one that will. The same perfect system throughout.

The Eureka Refrigerator Co.

54 & 56 Noble Street

WILBERT HOOEY, Manager

TORONTO.

DOMINION COUNTER SCALE**With Patent Automatic Scoop Balance**

Simple in construction Nothing complicated or liable to get out of order.

Capacity, 210 lbs. by Oz.

Size of Platform, 14 in. long, 11 in. wide.

Nickel-plated Beam, Poises and Scoop Balance. Double Beam, marked on both sides. The Automatic Scoop Balance is now offered for the first time, and every grocer who uses it will find it a great saving in time, and it will also obviate liability to error. When scoop is placed on the platform, the ball on back end of beam automatically rolls to the right, thus balancing scale with scoop on, and when scoop is taken off scale, the ball rolls to the left, balancing scale without scoop. Scale with this latest device is assuredly the most complete and desirable scale for general use in the market.

Manufactured exclusively by

THE GURNEY SCALE CO.

Hamilton, Ont., Can.

THERE IS SOME STYLE about a Brace end like this. It has an air of Durability and Perfection. The Drawer Supporter is an entirely new innovation that will hold like a bull-dog, not a tin toy. It's a trade bringer to every store who handles it. **DOMINION SUSPENDER COMPANY,**

United States, NIAGARA FALLS, Canada.

YES, WE KNOW

That somebody is after you with an imitation of our "Queen" Coffee Pot—we expected that. But the trouble with them is that they cannot get at the quality of either the Coffee or the Tin. The reason is obvious. They have not our facilities. Meantime, we do not wish you to forget our Tomato Catsup. For flavor and quality we will match it against anything in the world, and we guarantee that it will not spoil from exposure to the air.

THE DRUMMER'S BAGGAGE.

"I can tell after a single glance at the baggage carried by a drummer about how long he has been on the road," said a lawyer at the Commercial Travelers' Club. "When the young man first starts out to the grand tour of the west or south, he is likely to carry in one large trunk enough samples to stock a village store. Another trunk will contain changes of clothing and linen sufficient for a trip around the world. He will carry two large hand satchels—one containing samples, the other a bountiful supply of gents' furnishings and toilet articles. Two overcoats—one light, the other heavy—a shawl or blanket and a mackintosh rolled up and strapped, a leather hat box containing a 'sixer,' an umbrella and a cane and a large pair of field-glasses swung over his shoulders on a strap will complete the outfit.

"Six months later this young man will have discarded one of the trunks, the hat-box, the cane and the field-glass. At the end of a year two satchels and the umbrella will comprise his belongings. He has gradually learned that every first class hotel in the country can do laundry work in 12 hours; that umbrellas can be hired at the check-room; that one middle-weight overcoat is sufficient for his wants; that a cane is in the way; that the place for a silk hat is on the head, or, better still, that a derby is good enough; that blankets are supplied

in the Pullman service; that field-glasses are only of use on race tracks, and then behold the angel of commerce with his change of linen on one side and his samples on the other of a single traveling bag, selling more goods in a day than he formerly sold in a week, and not paying out from \$3 to \$10 a day on excess of baggage."—New York World.

AN AMERICAN TEA FARM.

A few miles from Charleston, on the old South Carolina railroad, is the only tea farm in the United States. It belongs to Dr. Charles U. Shephard, a distinguished chemist and public-spirited citizen who is devoting his time and means to continuing an experiment begun here in 1877 by Gen. Leduc, Commissioner of Agriculture under President Hayes. When the latter went out of office the enterprise was practically abandoned, and in 1888, when Dr. Shephard went to Summerville, he found everything in a discouraging condition with the exception of thousands of lusty young tea plants that had germinated from the seed the winds had blown from the old plants in every direction.

He bought the place, cleared off the rubbish and the weeds, and commenced an analytical study of the character and habits of the plant. He imported also various kinds of Oriental seeds from Japan, China,

Ceylon, Formosa and other places until he had twenty acres of various varieties of the tea plant, with which he is experimenting to ascertain those most suitable for the climate and method of their cultivation.

During 1894 he produced 500 pounds of excellent black tea, which sold for \$1.20 a pound in Summerville and Charleston, and about 300 pounds of green tea, which sold for \$1.50 a pound. During 1895, if conditions are favorable, he expects to reach conclusions as to climate, cultivation, fertilizing, etc., which he believes will be of practical value to the farmers of the United States.

MONEY IN POULTRY.

According to a recent authority, the Canadian farmers do not pay enough attention to their poultry. A young hen is not a worthless nuisance to be left alone to pick her own living. She is valuable property, and, if properly cared for, will pay larger interest on cost and labor than other farm stock. Increase your flock to 2,000 hens at once. Build a suitable house for them. It will pay you. Few are aware of the value and importance of the egg trade as a source of wealth.

The amount of business done in the United States in the egg trade exclusively will amount to over \$2,000,000 each year. New York city alone consumed \$12,000,000 worth at an average price of 18c. a dozen. The poultry and egg business outranks any single product, except corn, raised and sold in that country.

TRADE CHAT.

NEWs has been received of the robbery of the Bank of Rainy Lake on Thursday by two masked men, who, after holding up and knocking senseless the cashier and binding the teller, robbed the bank of some \$30,000, and made their escape.

Australian trade declined £8,000,000 last year.

The Toronto City Council has decided to abolish market fees.

The Rosburn (Man.) cheese factory will be ready for work in a short time.

The United States revenue on sugar for the 11 months ending May 31 was \$15,642,648.

The Guelph Stilton Cheese Co. on Monday made their first shipment of the product of their factory to Toronto.

The London Street Railway Co. have commenced work on their line to Springbank, on the south side of the river.

Levi Rightmeyer, for many years identified with the salt industry of Canada, died at his home in Kincardine, Ont., on Saturday morning.

A despatch from Wyoming, Del., says : "It is estimated that the shipments of peaches from this station this season will total about 275,000 baskets. The number usually shipped is 575,000 baskets. During

the phenomenal season of two years ago they aggregated 650,000 baskets. The tenor of reports from all districts is that this year's crop will only be about half the size of last year's."

The Cornwall canal, three lock gates of which were carried away by the steamer Ocean last Wednesday week, has been re-opened for navigation. The Ocean was floated and taken to Montreal to be put in dry dock for repairs.

Mr. Palmisano, fruit dealer, of London, Ont., was charged at the Police Court on Monday morning with driving faster than a walk over the St. George street bridge. He was fined \$5 and \$1.85 costs.

"I am too much of a gentleman, sir, to tell you what I think of you here," exclaimed the irate politician, "but if I ever catch you in Congress, I'll call you a liar, sir."—Chicago Evening Post.

At a meeting of the Civic Finance Committee yesterday afternoon, it was decided to recommend Council to instruct the city solicitor to defend the suit now pending against the legality of the early closing by-law.—Free Press, Winnipeg.

The Standard Oil & Gas Co., the stock of which is chiefly owned by the Detroit Gas Co., this spring announced that they would enter the field in competition with the Ontario Gas Co. and proceeded to sink wells in Essex. It now appears that their idea

was merely to use the incorporation as a club over the Ontario Co., and they have since made an arrangement with that company to supply the Detroit Gas Co. with gas at 8c. per thousand feet, about half what they formerly paid. The customers of the Ontario Co. in Windsor pay 25c. a thousand, and are somewhat nettled at the difference in price.

SHORT CROP OF PEANUTS.

Advices which were received by leading fruit houses on Tuesday were very firm on peanuts. Both Hart & Tuckwell and Vipond, McBride & Co., of Montreal, were advised that the crop of the nut in Virginia was only about half the average.

In consequence of this news, and the strength in New York, prices in peanuts were advanced $\frac{1}{2}$ c to $7\frac{1}{2}$ and 8c.

SALMON FACTORIES BURNED.

During the past week Costello & McMorran's new cannery, near the mouth of the Fraser River, was completely destroyed by fire. The cannery was well appointed, and had preparations well in hand for this season ; their output would have probably been in the neighborhood of 15,000 cases.

Advices received from the Skeena River announce the destruction by fire of the Windsor cannery, which last year packed 9,279 cases.

Both establishments will be rebuilt during the summer, and be ready for operation by next season. — B.C. Commercial Journal, June 18.

Abraham Lincoln once said :

“You can fool some people all the time, you can fool all the people sometimes, but you can't fool all the people all the time.”

Some customers may upon recommendation accept a box of inferior matches “just to try,” or because it is a cent or two cheaper.

If they do they will be fooled.

E. B. EDDY'S MATCHES have sustained and added to their reputation—not by putting forth good matches at spasmodic intervals, but by steadily offering matches always serviceable in use, unvarying in good quality, and moderate in price.

Don't fool your customers and you won't be fooled.

THE JAM TRADE.

A FEW years ago when Mr. Gladstone, in one of his charming bucolic orations at Hawarden, recommended the British farmer to turn his attention to fruit cultivation and the making of jam, his advice was received with a good deal of cheap and ignorant ridicule. As usual, the ex-Premier has proved a good deal wiser than his critics, and those who gave ear to his counsel in this instance have had no reason to regret their confidence. In an interview a famous provider says, according to The Westminster Gazette :—

"The motive that induced me to take up the jam trade was my knowledge of the fact that within late years the demand for preserves had been steadily increasing, while that for butter has, no doubt in consequence, shown a tendency rather to decline than otherwise. Catering as I do for some 300,000 daily customers, I have naturally good opportunity of knowing what the public want in the matter of provisions.

"Jam has a great future before it. The people are using it more and more largely every year, and, in my opinion, they are doing wisely, for what could be cheaper and at the same time healthier than a good jam made from sound English fruit?

"I attribute the superiority of English fruit to the nature of the soil and to the fact that the fruit ripens more gradually in our climate than in countries where there is more continuous and powerful sunshine. The slower the ripening process the better is the flavor of the fruit.

"You may not perhaps be aware that strawberries grown in the northern parts of Scotland are vastly superior in all respects to those grown in southern England, without doubt because they take longer to mature. Australian jams are being pushed largely in India and elsewhere, and may very probably come here before long to compete with our home produce.

"In Ireland there is a magnificent future for the fruit growing industry, if only its opportunities were turned to account. Even now most of the blackberries that come to the English markets are grown in Ireland. But there are enormous possibilities there of which no one has yet taken advantage. Properly worked, its fruit trade might yet do much to insure Ireland's commercial prosperity."

WHY HIRAM WALKER NEVER TOOK THE OATH.

Many people have wondered why Hiram Walker never became a British subject, because it was in this country that he first made the money that laid the foundation of his immense fortune. But Mr. Walker's refusal to take the oath of allegiance now means the saving of nearly a quarter of a million to him. Some years

ago the Local Government passed a law levying a tax of so much per cent on the estates left by deceased persons from a certain sum upward, the amount so derived to go to the fund for the maintenance of the asylums and penal institutions of the province. The executors of the will of the late Alexander Cameron paid the Government \$35,000, and if Mr. Walker had taken out his naturalization papers it would have cost his estate over \$200,000, taking \$8,000,000 as the amount of his possessions in this province.—Ex.

CALIFORNIA FRUIT.

Arthur P. Tippet & Co., under date of June 25, report as follows with regard to the coming crop of California raisins :

Raisins—The first crop in quantity will be about the same as last year ; in quality it will be better, provided the weather is favorable from now until harvest time. The total quantity will be about the same as last year, provided all the second crop is cured ; this latter, however, is very doubtful, as, owing to the exceedingly low prices that have been ruling, growers have not realized cost of harvesting second crop raisins of 1894, and unless there is a reasonable prospect of at least getting the cost out of them, the second crop will not be harvested. The shipments of California raisins last year were upwards of 80,000,000 lbs., or over 4,000 carloads.

Peaches—The crop is heavy and of unusually good quality ; the quantity dried will be large and prices reasonable.

Apricots—The quantity will no doubt be much short of last year, scarcely more than 50 per cent.

Prunes—The quantity of these will probably be about the same as last year ; the quality will be exceptionally fine.

NEW WAY TO SELL BUTTER.

The grocers of Ithaca, N. Y., says The Grocery World, have adopted an idea in selling butter which might be of advantage to the trade in other towns. They have arranged to sell this commodity from a central store, under their united control and in charge of an expert.

Several advantages are expected to accrue from this innovation. At present, not only in Ithaca, but in almost every other country town, grocers buy butter from farmers on a trade basis. Butter bought and sold in this way is practically never dealt with on its merits strictly. Inasmuch as the farmer's trade must be catered to, it becomes necessary to pay each farmer the same, whether the qualities embodied are the same or not. It also becomes necessary, as a rule, to pay considerably more for farmer's butter than it is really worth and could be bought for in a strictly cash deal, for if the farmer gets an idea that he is not receiving enough for his product, he takes his sometimes remunerative trade to some other grocer.

The Ithaca scheme embodies the purchase of butter for cash strictly, the question of merit only to be considered. The butter is then to be sold on the same basis, the fine grades commanding the price due to them, and the ordinary qualities likewise. This will place the good butter-maker in a class

where he belongs as well as the producer of poor butter, and will render the butter trade much more remunerative than now, where good, bad and indifferent butter must be bought and sold on the same basis.

FROM THE

Amherst, N.S., "Daily Press,"

20th JUNE, 1895.

"The Taylor safe which was in the building of Rhodes, Curry & Co., which was burned in the fire of a year ago, was opened yesterday for the first time. The safe has been out, face upward, since the fire, and beyond the damage done by water, which worked in through the door, everything was in good condition. The woodwork and carpeting was unhurt by the fire. Considering the fact that this safe passed through the hottest kind of a fire of oils, tarred paper and kiln-dried lumber, the reputation of Taylor's safes is well deserved."

Pickling Spice

Put up in ten-cent packages

With the approach of the pickling season and the consequent enquiries for spices, you should be in a position to fill first orders with what will please your customers and hold their trade in that line through the season. We guarantee our

Dominion Mills Pickle Spice

to be the best combination of whole spices that can be got, giving that much desired flavor and bouquet, peculiar to certain well known brands of English pickles.

HAYING SEASON

will soon be here and with it comes the demand for salt for curing it. Dealers in car lots will find that no salt will give the satisfaction for this purpose that

Windsor Fine barrel and sack **Salt**

does. There are reasons why it is better than coarse salt. It is purer and stronger, being fine the crystals do not drop to the bottom of the mow, and, being made by the Vacuum process the crystals are softer and dissolve more readily, curing the hay better than it is possible to do it with ordinary coarse salt. Once introduced in a section, the farmers will not use any other. Put up in barrels, 280 lbs. net, and in 200 lb. sacks.

WINDSOR SALT WORKS, WINDSOR, ONTARIO
Manufacturers.

BRITISH TRADE IN MAY.

THE Board of Trade returns for the past month, as summarized by The London Times, are fairly satisfactory, even after making allowance for there being one more working day in the past month than in May, 1894. The imports are valued at £34,752,086, which is more than the total of May, 1894, by £618,026, or 1.8 per cent.; the exports of British and Irish produce amount to £18,344,744, an increase of £860,532, equal to 4.9 per cent. The exports of foreign and colonial merchandise are valued at £5,215,785, which again is £311,677 more than the total in the corresponding month of last year. As regards the classes into which imported goods are divided, animals, articles of food and drink, raw materials other than for textile purposes and sundry articles, are less in value, but metals, chemicals, etc., oils, raw materials for textile manufacture, manufactured articles and parcel post articles are more.

The receipts of barley and Indian corn are much below last year's totals. Butter also is lower, the shipments from Denmark having fallen off. Refined sugar is more in quantity and value; both Germany and France have sent more. Raw sugar is greater in quantity, but less in value, the increase being in beet sugar. Cocoa, tea and tobacco each show considerable increases. Copper is less both in quantity and value, but iron ore, quicksilver, tin, zinc and lead are more both in quantity and value. Petroleum oil is more in quantity by 12.7 per cent., and in value is 97.2 per cent. more, owing to the great rise in its price. Cotton, hemp and flax were shipped more freely, but there is a heavy fall in jute. Sheep's wool is less 1.7 per cent. in quantity, but in value 9.7 per cent. Hides are much more both in quantity and value. Hewn wood also is more in quantity and value, but sawn is less by 151,000 loads in quantity and £326,346 in value. Manufactured articles as a whole have increased by £913,300 net. Of this large increase cotton manufactures account for £62,000, leather for £137,000, linen yarn for £45,000, paper for £39,000, silks for \$390,000, and woollens for £160,000.

As in previous months of this year the shipments of yarns and textile fabrics to the United States have conduced to the increased total value. Cotton piece goods, which are 2.0 per cent. less in quantity, are, however less in value by 7.7 per cent. Textiles are generally lower in price. Woolens have, however, best maintained their prices. The following figures illustrate how the shipments of textiles in the five months to the United States stand in comparison with last year :

	—Five Months—	
	1894. Yards.	1895. Yards.
Cottons.....	20,790,000	35,090,000
Jute piece goods.....	43,612,000	51,385,000
Linen piece goods.....	29,389,000	59,410,000
Woolen piece goods.....	629,000	5,028,000
Worsted piece goods.....	5,516,000	29,827,000

Copper and iron are each more in quantity and value, but telegraph wires, etc., are

less by £63,000. Of iron the chief increase is in pig. As to machinery, steam is less on account of Russia having taken fewer machines other than locomotives and agricultural. The shipments of mining machinery to South Africa are valued at £46,000, compared with £13,000 in May, 1894. Several countries in Europe have taken more of textile machinery.

A CHOICE JAPAN TEA.

Wm. Dallas, of New York, was upon the Toronto tea market on Friday last. He reported that Mourilyan, Heiman & Co., of Yokohama, for whom he acts as American agent, have purchased from an Oojikawa garden, Joshiu Prefecture, some 150 kin of the choicest leaf of the tea crop, \$137 being the figure named. If we mistake not, this is the highest priced tea ever reported since the port was opened to foreigners in 1868.

The tea will sell here for \$1.25 a pound. As Japan teas are generally very cheap, it will readily be seen, therefore, that Mr. Dallas is introducing a very superior line.

SALMON RUN.

The salmon run in the Fraser and Columbia rivers this season has been excellent, and it is declared by the oldest fishermen on the rivers that the quality of the fish was never so fine. The weight of the salmon is increasing yearly, and this year averages fully twenty-eight pounds per salmon. Buyers and distributors say that a large proportion of the public of this continent have only recently begun to be consumers of canned salmon, a result ascribed to the recent innovation of packing perfect steaks of the fish in oval cans. About 100,000 cases of Columbia river salmon have been bought for the British Isles this season, as against 30,000 cases last year.—Canadian Trade Bulletin.

CUBA SUGAR CROP.

Our estimate of the present crop, 975,000 tons, was long looked upon as excessive, but the closing figures are bearing out our predictions. We now with equal confidence predict that the next crop in Cuba will not exceed 800,000 tons, and may out-turn only 600,000 tons. There are several good reasons for our estimates. The fall plantings of new cane were much neglected, and the spring plantings almost entirely neglected. As fields must be renewed to keep up crops, these items alone mean 200,000 tons less sugar next year. The low price of sugar and difficulties of labor caused this neglect, and now staring the planters in the face are greater difficulties. With an insurrection in full blast and gaining power every day, already outgrown its limits at one end of the island, and rapidly spreading into new sugar districts, the moneyed powers

who usually find the wherewithal for making the crop will be very slow to put their money into such danger as now threatens the plantations and cane fields from rebel attack and fires. Without money the laborer can't be hired, and he is rapidly joining the rebels in arms, who have abundance of everything for comfort, and are destitute only of arms and ammunition for the new recruits flocking to their lines. Such is the reliable information brought us personally from the seat of war, and our Cuba cable received to-day says: "Crop prospects are becoming worse." Hence, we will be surprised if the crop finally reaches our outside estimate of 600,000 tons.—Willett & Gray.

COLD STORAGE.

J. J. Philip, of Winnipeg, has awarded the contract for the erection of his large cold storage warehouse on Elgin avenue. The building will be 34 by 48, two stories and a basement; the later of stone, with timber superstructure. The basement walls will be lined with brick, the floor laid with cement, and frost-proof, well adapted for warm storage in the winter and cold storage in the summer. The cold or freezing rooms will be on the ground floor, and will be built on the latest improved plans to obtain the desired result. The floor above will be for general storage. The necessity for such a building has long been realized, and he may be congratulated on the inauguration of this addition to the mercantile conveniences of the city.

TO PROTECT CANNERS.

The salmon canners of the Columbia river, says an exchange, are considering a scheme for the protection of their pack against competition with inferior fish, labeled by dishonest persons as "Columbia River Salmon." They propose to organize a "Columbia River Salmon Packers' Association," and to get up or copyright a stamp or tag which is to be attached to every can of spring-packed Columbia river salmon as a guaranty of its genuineness.

J. F. Burns, of J. F. Burns & Co., general store, Kingston, Ont., is dead.

FIRES.

Duncan McAlpine, general store, Lockport, N.S., has been burned out. Insured for \$2,000.

SOUTHAMPTON VS. LIVERPOOL.

THE rivalry between these two ports continues unabated. The Liverpool Journal of Commerce, which, of course, ardently defends its own port, says: "The deepening of the bar, and the improved landing facilities of Liverpool, at last admit of an authoritative contradiction being given to the many published aspersions on our port still in active circulation throughout both hemispheres, and to turn the tables upon our competitors by the equally authoritative statement that it is now possible for

the American traveler to reach London via Liverpool in 14 hours' less time than he ever has done or is likely to do for years to come via Southampton. The basis of calculation for this statement is found in the logs of the two steamers that have at present made the fastest time between New York and Liverpool and New York and Southampton, and it will be observed that the margin is wide enough to allow of two other Liverpool steamers, judged by their records, making better time to London than the best via Southampton, while three of our other steamers' performances show that these passengers could reach London within one to three hours' time of the best record via Southampton, including the detention off Queenstown.

NEW YORK TO LONDON, VIA QUEENSTOWN.

Rail journey, Southampton to London ..	0	1	45
Total New York wharf to London ..	6	17	41

"It is understood that the Mersey Docks Board are preparing for distribution throughout the United States chromo-lithographs depicting the extended landing-stage and the Riverside Railway station. If to that be added information that the new station is distant only 3 hours 50 minutes from London, or so many hours from Glasgow, Edinburgh, Leeds, Bradford, etc., the fact will come home to observers that all parts of the United Kingdom, including the metropolis, are far more accessible from Liverpool than from any other port."

CANNING PINEAPPLES.

W BOULTER & SONS, whose celebrated canning factories are located at Picton, Toronto and Demorestville, have this season introduced a new line. This year for the first time they are canning pineapples, and on Friday last a representative of THE CANADIAN GROCER visited their Toronto factory to witness the process of converting the spiked fruit into the tinned preserve.

On entering the first department of the establishment the visitor found himself surrounded with cases of pineapples piled half way to the ceiling. The fruit was the choicest, being the rich golded-hued "Red Bahama" used by the best American canners, two carloads of which had just arrived from a warmer climate.

In the next room of the factory the "pines" were seen entering a simple looking machine in a procession, out of which they came neatly cored, peeled and sliced so as to greatly resemble evaporated apples as they are generally put upon the market.

Hence the fruit is conveyed in the whitest of white deal boxes to a series of the cleanest of tables, where a small army of women waits to assort them into two lots. In grade No. 1, perfect slices of the fruit only are kept, while grade No. 2 (every bit as good except in appearance) is made up of broken or irregular pieces.

Passing along further, another batch of women seated at tables are seen, filling the cans with alternate layers of pure granulated sugar and fruit. Into each two-pound can, it may be here mentioned, about one-and-a-quarter pines are packed, with a corresponding quantity of granulated sugar.

In this condition the cans pass through an automatic "exhauster", which expels all the cold air from the fruit, and leaves it floating in a thick syrup within the can.

A patent "wiping" machine next dries the cans, which are passed through an ingeniously constructed soldering contrivance.

Now, being hermetically sealed, the cans are dumped into great boiling cauldrons. The length of time that they are there kept is not divulged to the public by the canners, for this portion of the process they seem to regard as a valuable secret.

Now the tins are beautifully burnished top and bottom, and passed through a labelling machine, out of which they come clothed in a wrapper of beautiful design. To the label the firm have paid particular attention, and they claim it beats even that used by the best American canners.

Before leaving the factory the writer sampled a can of the pineapple and found it delicious.

The capacity of the factory, it may be mentioned, is 7,000 cans a day, and 60 hands are employed.
